## INDEX AND SUMMARY OF S. 3497

- Feb. 26, 1968 Both Houses received President's message on City Problems. H. Doc. 261. Print of document.
- Sen. Sparkman introduced and discussed S. 3029 which was referred to Senate Banking and Currency Committee. Print of bill as introduced and remarks of author.
- Mar. 4, 1968 Sen. Williams, N. J., submitted an amendment to S. 3029. Print of amendment.
- Mar. 12, 1968 Several amendments were submitted. Sen. Proxmire discussed a proposed amendment.
- May 15, 1968 Senate committee reported an original bill, S. 3497. S. Report 1123. Print of bill and report.
- May 23, 1968 Senate made S. 3497 its unfinished business.
- May 24, 1968 Senate began debate on S. 3497.
- May 27, 1968 Senate continued debate on S. 3497.
- May 28, 1968 Senate passed S. 3497 with amendments.
- May 29, 1968 S. 3497 was referred to House Banking and Currency Committee. Print of bill as referred.
- June 19, 1968 Rep. Patman introduced H. R. 17989 which was referred to House Banking and Currency Committee. Print of bill as introduced.
- June 20, 1968 House committee voted to report H. R. 17989.
- June 25, 1968 House committee reported H. R. 17989 without amendment. H. Report 1585. Print of bill and report.
- June 27, 1968 House Rules Committee granted an open rule on H. R. 17989.
- July 1, 1968 House Rules Committee reported resolution for consideration of H. R. 17989. H. Res. 1238. H. Rept. 1603. Print of resolution and report.
- July 8, 1968 House began debate on H. R. 17989.

### HOUSE

1. HOUSING MESSAGE. Both Houses received the President's message on city problems (H. Doc. 261) (pp. H1306-11, S1621-27). Included in his recommendations were the following: Appropriations to the full level of Congressional authorization--\$2.18 billion--for the anti-poverty program; a proposed Housing and Urban Development Act of 1968, which will "authorize the construction and rehabilitation of 2.35 million housing units with \$2.34 billion of contracting authority

for the first five years of the ten year program" and "offer the American family an alternative to crowded cities and sprawling suburbs, through a program to build new communities;" \$2.5 billion for the Model Cities special grants over the next three years:--\$500 million for fiscal 1969,--\$1 billion each for fiscal 1970 and 1971;" a \$20 million appropriation for urban technology and research; and a proposed New Communities Act of 1968 which will "offer incentives to channel jointly-financed programs for public facilities into the creation of new communities," which incentives "will take the form of an increased Federal share in these programs." Several Members discussed the President's message (pp. H1311-19, H1364, H1377, H1378-~~20~~, S1682-3, S1688, S1703-4, E1149, E1175, E1181-2, E1187-8). <sup>H1376</sup>

Rep. Barrett announced that in order "to expedite the President's legislative proposals, the Subcommittee on Housing has scheduled 3 weeks of hearings beginning March 12 on the President's bill and other housing and urban development bills." p. H1303

2. TRANSPORTATION. Both Houses received the President's message on urban mass transportation (H. Doc. 262) (pp. H1319-20, S1627).
3. SURPLUS PROPERTY. The Government Operations Committee reported S. 805, to amend the Federal Property and Administrative Services Act of 1949 to authorize the Administrator of the General Services Administration, in his discretion, to perform care and handling functions for excess real and related personal property (H. Rept. 1105). p. H1388
4. LANDS. A subcommittee of the Interior and Insular Affairs Committee approved for full committee action H. R. 13176, to authorize the State of Ohio to use the proceeds from the sale of certain lands for educational purposes. p. D122
5. DAIRY PRODUCTS. Rep. McFall stated "it is inconsistent...for the Department of Agriculture to support the prices of milk and dairy products through the price support program, while at the same time, the Department of Defense fails to use available butter and other dairy products in its feeding programs." pp. H1362-3
6. EGGS. Rep. Dow spoke in support of his bill which "is an enabling act which would set up a marketing control in the egg industry only if the producers want it." p. H1377
7. ROADS. Rep. Don H. Clausen inserted testimonies before the subcommittee considering the "authorizations for the Federal aid A-B-C program and the future highway programs in urban and rural areas." pp. H1384-7
8. WATER RESOURCES. Received from the Water Resources Council a proposed bill to amend the Water Resources Planning Act to revise the authorization of appropriations for administering the provisions of the act; to Interior and Insular Affairs Committee. p. H1388

#### SENATE

9. COTTON. A subcommittee of the Agriculture and Forestry Committee ordered reported without recommendation S. 1975 and H. R. 10915, to reduce quota on extra-long staple cotton. p. D120

## HOUSES AND CITIES

---

### MESSAGE

FROM

## THE PRESIDENT OF THE UNITED STATES

TRANSMITTING

### A MESSAGE ON HOUSING AND CITIES

---

FEBRUARY 26, 1968.—Referred to the Committee of the Whole House on the State of the Union and ordered to be printed

---

*To the Congress of the United States:*

The cities that sprang up along the seaports, the river banks and the prairie crossroads of America were built and grew with pride and hope—until the early 20th century.

For several decades, now, the tide has run against the growth, strength and vitality of our cities.

Today, America's cities are in crisis. This clear and urgent warning rises from the decay of decades—and is amplified by the harsh realities of the present.

The crisis has been long in forming. At the turn of the century, Lincoln Steffens told of "the shame of the cities." Jane Addams spoke of "the vast numbers of the city's disinherited."

Powerful forces swept the city after World War II, hastening its erosion.

People who could afford to began moving by the hundreds of thousands to new suburbs to escape urban crush and congestion. Other hundreds of thousands were trapped inside by a wall of prejudice, denial, and lack of opportunity.

They were joined by still thousands more from America's rural heartland—the unskilled and the unprepared, displaced by advances in technology. Their thirst was for opportunity, for jobs, and for a better life. They found instead a mirage: for stripped of its bright lights, the city for them was poverty, unemployment and human misery.

We see the results dramatically in the great urban centers where millions live amid decaying buildings—with streets clogged with traffic; with air and water polluted by the soot and waste of industry

which finds it much less expensive to move outside the city than to modernize within it; with crime rates rising so rapidly each year that more and more miles of city streets become unsafe after dark; with increasingly inadequate public services and a smaller and smaller tax base from which to raise the funds to improve them.

But these problems exist in hundreds of smaller towns and cities across America—towns and cities whose growth is in numbers of people, but not in homes, or jobs, or public services, or schools or health facilities to serve them. The result too often is that these cities grow with decay, human misery, lack of job opportunity and increasingly concentrated poverty.

If the promise of the American city is to be recaptured—if our cities are to be saved from the blight of obsolescence and despair—we must now firmly set the course that America will travel.

There is no time to lose.

### THE PEOPLE OF THE CITY

The human problems of the city are staggering:

- Ghetto youth with little education, no skills and limited opportunity.
- Citizens afraid to walk their streets at night, and justifiably so.
- Negroes, Puerto Ricans and Mexican Americans barred by prejudice from full participation in the city's life.

Illiteracy and disease, a lack of jobs and even dignity itself—these are the problems of the city, just as its tenements, traffic jams and rats are problems.

The city will not be transformed until the lives of the least among its dwellers are changed as well. Until men whose days are empty and despairing can see better days ahead, until they can stand proud and know their children's lives will be better than their own—until that day comes, the city will not truly be rebuilt.

That is the momentous and inescapable truth we face in this hour of America's history.

No single statement or message can embrace the solutions to the city's problems. No single program can attack them.

No one can say how long it will take, or how much of our fortune will eventually be committed. For the problems we are dealing with are stubborn, entrenched and slow to yield.

But we are moving on them—now—through more than a hundred programs, long and short range, making financial commitments of more than \$22 billion to the task.

### THE WORK SO FAR

The last several years have witnessed a remarkable record of legislative achievement—and most of it has borne on the problems of the cities.

We struck down discrimination in job opportunities, public accommodations, and voting in the Civil Rights Acts of 1964 and 1965.

We provided job training for nearly two million disadvantaged men and women who now have the skills to support themselves and their families with dignity and self-respect.

We cut through a century of opposition and controversy to help the poor school child with the Elementary and Secondary Education Act of 1965.

We brought healing and health to the elderly and the poor through Medicare and Medicaid.

We moved to help combat the pollution that poisons a city's air and fouls its waters.

And, with the Economic Opportunity Act of 1964, we finally embarked on a concentrated effort to eliminate poverty in this nation. That landmark measure has helped to change the lives of 6 million Americans.

These programs have brought hope to people in every city and town in America. Children from the slums find a new chance to succeed through Head Start. Poor teenagers earn their first paychecks through a Neighborhood Youth Corps program and stay in school. Needy young men and women, whose talents might once have been their life's frustration, go on to college through Upward Bound. Men find self-respect and good jobs through work training programs. Half a million volunteers are engaged in a mission of service to the destitute of their communities. More than 6 million Americans have been lifted out of poverty.

But almost 29 million citizens still remain in poverty.

If the problems of the city are to be solved, there can be no retreat in the War on Poverty. It must be pressed, with renewed emphasis on the most critical needs of the poor—job opportunities and education for the young, and the chance to join in cooperative self-help efforts to improve their own lives, as well as to participate in the broader community attack on poverty.

Last year the Congress extended the life of the poverty program for two years—but it appropriated only \$1.77 billion, some \$290 million less than we sought.

*For Fiscal 1969, I recommend appropriations to the full level of Congressional authorization—\$2.18 billion—for the anti-poverty program.*

All of these measures help the people who live in our cities.

They are new programs, and only now are they beginning to take hold in improving lives of men, women and children.

With other proposals I have made to Congress this year—for open housing, for safe streets, for gun control, for 500,000 new, private sector job opportunities for the hard-core unemployed, for better education—we can further protect and improve the lot and the life of the city dweller.

Today, however, I want to speak of programs designed especially for our cities—of shelter for its citizens and plans for its revitalization. This message, too, is for men and their families. For our lives are profoundly affected by the environment in which we live, the city in which we work and reside, the home in which we relax and renew our strength.

#### AN EVOLUTIONARY RESPONSE

Five Presidents and fifteen Congresses have forged the Federal response to the problems of housing and urban development.

It began in 1937, when Franklin Roosevelt saw a third of the nation ill-housed. He and the 75th Congress recognized that poor families could not, with their own resources, afford homes on the private market, and that some form of Government help was necessary if they were to have decent shelter. The result was the historic legislation that launched the Public Housing Program.

Twelve years later, with the Housing Act of 1949, President Truman and the 81st Congress started urban renewal and pledged "as soon as feasible . . . a decent home and a suitable living environment for every American family."

In the 1954 Housing Act, President Eisenhower and the 83rd Congress expanded the program of urban renewal.

At the beginning of this decade, President Kennedy and the 87th Congress enlarged the Government's role to bring decent houses into the reach of families with moderate income.

In spite of these strides, when I became President:

- We had a loose collection of federal housing agencies, each operating programs in isolation, not only of each other but also of the federal assistance programs of other departments.
- Urban renewal was demolishing slum housing and dislocating people, but not enough new housing was being built for those forced to relocate.
- There was little interest in the private sector—by builders, architects and engineers—in providing decent shelter for poor families, and the public housing program was stagnated in numbers and in quality.
- Our concern with housing, health care, education, welfare and other social services was fragmented in the local neighborhoods where it counts.

Over the past four years, you in the Congress have approved our proposals to:

- Establish a Department of Housing and Urban Development to bring scattered housing and urban development programs together and give the American city the cabinet role it deserves.
- Begin a new program of Rent Supplements to increase the housing supply for needy families. Built and operated by private enterprise, the portion of rent paid by the Government declines as the tenant's income rises.
- Inaugurate the Model Cities Program, the first effort to attack blight on a massive scale and renovate entire neighborhoods, by providing special supplementary grants to those cities that concentrate the entire array of Federal, state and local programs, from health to housing, in the worst slum neighborhoods.

Even these achievements are not sufficient to deal with the crisis our cities face today. They do provide a base on which the proposals in this message build.

#### THE HOUSING AND URBAN DEVELOPMENT ACT OF 1968

*I propose the Housing and Urban Development Act of 1968—a charter of renewed hope for the American city.*

With this Act, the Nation will set a far-reaching goal to meet a massive national need: the construction of 26 million new homes and apartments over the next 10 years. Six million of these will finally replace the shameful substandard units of misery where more than 20 million Americans still live.

This Act will authorize the construction and rehabilitation of 2.35 million housing units with \$2.34 billion of contracting authority for the first five years of the ten-year program.

Under this legislation, we will in the year ahead:

- Start 300,000 housing units for more than one million citizens who need federal assistance to obtain decent housing. This is triple the rate of this year, and more than half the number built over the last decade.
- Continue to restore the core of our center cities—and with that, improve the lives of nearly 4 million Americans—through the Model Cities Program.

- Summon the talents and energies of private enterprise to the task of housing low-income families through the creation of a federally-chartered private, profit-making housing partnership.
- Make Urban Renewal a more effective instrument for reclaiming neighborhoods, through a new neighborhood development program.
- Add many thousands of construction job opportunities in the inner city.
- Stimulate the flow of private credit for home building in the city by providing flexible interest ceilings on FHA mortgages and transferring the secondary market operations of the Federal National Mortgage Association to private ownership.
- Help American cities develop modern and efficient mass transit systems and services.
- Offer the American family an alternative to crowded cities and sprawling suburbs, through a program to build new communities.
- Improve planning for the orderly development of public facilities for urban areas.
- Establish a base of research, analysis and knowledge of urban areas so we can make better informed decisions about the cities.

#### WHAT IS REQUIRED

To achieve our housing goal, we must move from low to high production.

We can make that shift only if the challenge summons the commitment of

- The capital and mortgage finance markets*, to supply the private funds which are the lifeblood of the construction industry. These funds must flow steadily and in increasing scale.
- The home building industry*, to tap an expanded Federally-assisted market for private low and moderate income sales and rental housing.
- The genius of American business to bring to home building* its skill and resources and the methods of modern technology so that houses can be built faster, less expensively and more efficiently than ever before.
- American labor*, which has pledged to provide the necessary skilled manpower without discrimination.
- Government at all levels*, to improve the working relationships with each other, and with the builders, lenders, and low income families who will be served by this program.
- Most importantly, the Congress.*

First, the Congress must take steps now to insure strong, stable economic growth for the nation as a whole and the home building industry in particular.

Once again I call upon the Congress to pass the anti-inflation tax which I recommended more than a year ago. Soaring interest rates will cripple the homebuilding industry. The temporary surcharge tax legislation can help to keep that from happening.

Second, I urge the Congress to enact the fair housing legislation recommended repeatedly by this Administration.

Third, I urge the Congress to renew, fully fund and strengthen the basic housing and urban development legislation already on the books.

## HOMES FOR AMERICANS

*I urge the Congress to enact a program to provide 300,000 housing starts in fiscal 1969 for the poor, the elderly, the handicapped, the displaced, and families with moderate incomes.*

This program would:

1. *Enable 100,000 low-income families to buy or repair their own homes.*

Home ownership is a cherished dream and achievement of most Americans.

But it has always been out of reach of the nation's low-income families.

Owning a home can increase responsibility and stake out a man's place in his community. The man who owns a home has something to be proud of and good reason to protect and preserve it.

With the exception of the pilot program I began last year, low-income families have been able to get Federal help in securing shelter only as tenants who pay rent.

*Today I propose a program to extend the benefits of home ownership to the nation's needy families.*

Under this program, the broad outline of which has already been set forth in S. 2700, low-income families will be able to buy modest homes financed and built by the private sector. These families will devote what they can reasonably afford—a specified percentage of their income—to mortgage payments, with the Government paying the difference in the form of an interest subsidy. Under this interest subsidy, the Federal Government would pay all but 1 percent of the interest on the mortgage, depending on the income of the homebuyer.

2. *Start 75,000 public housing units, to provide homes for 300,000 Americans.*

The job is to turn authorization to action—by accelerating the processing of applications, by moving quickly from commitment to construction, and by involving private industry fully under the new Turnkey concept.

Under Turnkey, a low-income project can be put up in less than half the time traditionally required for public housing.

Turnkey frees the builder from complicated and cumbersome procedures and stimulates his initiative to develop imaginative and well-designed buildings at lower cost.

We have already extended the Turnkey concept to enable private industry not only to build low-income housing developments, but also to manage them.

Some Public Housing projects built in the past—when the challenge was simply to get units in place—reflect a tasteless conformity, and an indifference to community amenities.

At my direction, the Secretary of the Department of Housing and Urban Development has been working with leading architects and planners to achieve higher design standards for public housing developments. We know new projects can be pleasant places to live, reflecting the needs of human beings, with attention to comfort and convenience.

Our concern must be not only with the quantity of new public housing, but with its quality as well.

*I propose a \$20 million program to promote improved tenant services in public housing developments.*

With these funds, we can enable those who live in public housing to take better advantage of job, health and education opportunities.

We can help and encourage them to become involved, personally and responsibly, in the day-to-day problems of the projects where they live.

3. *Authorize 72,500 units under the Rent Supplement Program to provide shelter for almost 250,000 poor Americans.* In fiscal 1969, 35,000 dwelling units will be started under this program.

This program, which holds so much promise for the poor families of America, has been underfunded by the Congress. Last year, we sought \$40 million in annual payment authority. The Congress granted only \$10 million.

Rent Supplements is a free-enterprise program, strongly endorsed by the home building, real estate, and insurance industries which have responded enthusiastically to this new approach to low-income housing. It contains incentives for escape from poverty, while creating modest, but decent shelter for those in poverty.

If we are to match our concern for the cities with our commitments, this program must be adequately funded.

*I recommend \$65 million in authority for the Rent Supplement Program for Fiscal 1969.*

4. *Begin to build 90,000 rental housing units for 360,000 members of moderate income families.*

A program to provide housing for families with incomes too high to qualify for public housing, but too low to afford standard housing began in 1961.

This is a below market interest rate program known as "221(d)(3)." It serves families earning between \$4,000 and \$8,000 a year.

After 5 years of testing, we are ready now to move this program into full production.

But first we must improve it.

*I recommend legislation to strengthen the financial tools under which the moderate income rental housing program operates.*

Under this legislation, capital financing would be shifted to the private sector, and the Government would increase its support by providing assistance to reduce rents to levels moderate income families can afford.

Now the Government provides financial support for loans at 3 percent interest. Under this new arrangement, the private sector would make loans at market rates. The Government would make up the difference between the market rate of interest and 1 percent. The loans would remain in private hands.

## TO HELP THE NON-PROFIT SPONSOR

Many housing projects are sponsored by non-profit organizations—including church groups, and fraternal orders. In many instances these groups lack the technical and financial know-how which modern construction demands.

Their efforts are in the best interests of this nation, and the nation should help them.

*I propose legislation to provide needed technical assistance and skills to the non-profit sponsors of our housing programs.*

Through grants, loans, and technical assistance, this program will help small private non-profit organizations in our cities. These organizations will then be able to draw quickly upon architects, engineers and financial experts to speed the construction of low income housing.

## THE BLIGHTED NEIGHBORHOOD

### MODEL CITIES

The slum is not solely a wasteland of brick and mortar. It is also a place where hope dies quickly, and human failure starts early and lingers long.

Just as the problem of the slum is many-faced, so must the effort to remove it be many-sided.

The Model Cities program gave us the tools to carry forward the nation's first comprehensive concentrated attack on neighborhood decay.

It was developed by some of the country's foremost planners, industrialists and urban experts.

The program is simple in outline—to encourage the city to develop and carry out a total strategy to meet the human and physical problems left in the rubble of a neighborhood's decay.

That strategy, which Model Cities spurs through special grants, is to bring to a dying area health care services, as well as houses; better schools and education, as well as repaved streets and improved mass transit; opportunities for work, as well as open space for recreation.

This program is now in its early stages. Sixty-three cities are drawing their plans to reclaim the blighted neighborhoods where 4 million Americans live. By this summer, a second group of cities will begin their planning.

Last year, I requested full funding of the amount authorized for Model Cities—\$662 million. But the Congress approved less than half that amount.

To the cities of this land, that cut came as a bitter disappointment.

In the cities' struggle for survival, we dare not disappoint them again. We must demonstrate that they can rely on continued Federal support.

I recommend \$2.5 billion for the Model Cities special grants over the next three years:

—\$500 million for fiscal 1969.

—\$1 billion each for fiscal 1970 and 1971.

In addition, for fiscal 1969 I recommend \$500 million in appropriations for urban renewal solely related to the Model Cities program. This includes full funding for a \$350 million increase in the authorization.

The total funds needed to move the Model Cities program forward in fiscal 1969 are \$1 billion.

I urge the Congress to fund fully this vital request for the people who live in America's worst urban neighborhoods.

### URBAN RENEWAL

Urban Renewal is the weapon that deals primarily with the physical side of removing blight. An essential component of the Model Cities Program, it is a major instrument of reform in its own right.

Last year, nearly 900 American communities were reclaiming inner city land under urban renewal.

Last year, the Congress appropriated \$750 million for Urban Renewal in Fiscal 1969.

*To give communities sufficient lead time for planning, I recommend that the Congress appropriate now \$1.4 billion for fiscal 1970.*

Even at these higher appropriation levels, under existing law Urban Renewal will not operate at sufficient speed to overtake the decay of our cities.

The lag between a community's decision to rebuild a neighborhood and the breaking of ground is far too long. Urgent neighborhood needs go unmet, awaiting the development and approval of a total plan for an entire area.

We must begin now to make urban renewal more immediately responsive to urban needs.

*To apply our resources more quickly, I recommend that Congress authorize a new Neighborhood Development Program under Urban Renewal.*

This legislation would permit detailed planning and execution to proceed segment by segment in an Urban Renewal area. Under existing law, neither demolition nor rehabilitation can begin on any portion of the area to be renewed until it is ready to begin throughout the entire area.

With this Neighborhood Program, cities can start work quickly on the most pressing problems that are to be renewed, with the emphasis on the construction of new and rehabilitated housing.

#### MEETING THE INSURANCE CRISIS OF OUR CITIES

Insurance protection is a basic necessity for the property owner. But for the resident of the city's inner core and the local businessman who serves him, protection has long been difficult to obtain.

The problem has been heightened by civil disorder or its threat.

Last August I established a Special Panel to seek the solutions to this problem. The Panel, headed by Governor Richard Hughes of New Jersey, offered a clear example of how the States, industry and the Federal Government can join in a constructive effort.

The Panel looked deeply into the property owner's dilemma, and reported:

Society cannot erase the suffering of the innocent victims of fire, windstorm, theft, or riot. But it can at least provide the opportunity to obtain insurance to safeguard their capital, and thereby prevent a disastrous occurrence from becoming a permanent tragedy.

The Panel recommended a comprehensive program of mutually supporting actions by the insurance industry, the States, and the Federal Government.

My advisers and I have reviewed the Panel's proposals carefully. We believe they are sound.

Accordingly, I call upon the insurance industry to take the lead in establishing plans in all States to assure all property owners fair access to insurance. These plans will end the practice of "red-lining" neighborhoods and eliminate other restrictive activities. They will encourage property improvement and loss prevention by responsible owners.

I call upon the States to cooperate with the industry and, where necessary, to organize insurance pools and take other steps to cover urban core properties. These measures will assure that all responsible property owners can obtain insurance, and provide a method of spreading equitably throughout the insurance industry risks that no single insurer would otherwise accept.

*I recommend that the Congress establish a cooperative Federal-State-Industry program by chartering a National Insurance Development Corporation within the Department of Housing and Urban Development.*

This Corporation will bring together all those vitally interested in

the inner city insurance problem—members of the public, state insurance regulators and other state officials, insurance industry representatives, and interested Federal agencies.

The Corporation will perform a number of vital functions in support of the actions of private industry and the states to assure adequate property insurance in all areas of our nation's cities.

Through the sale of reinsurance against the risk of civil disorders, the Corporation will marshal the resources of the insurance industry and add to this the backing of the states and the Federal Government. Without this reinsurance, many insurers and state insurance regulators do not believe the industry can move forward to provide adequate property insurance in urban areas.

This program will assist the insurance industry and the States to offer adequate property insurance for the inner cities. Through reinsurance, the program can help the States provide for the contingency of any large emergency losses.

For those companies who participate in this program, *I recommend tax deferral measures, proposed by the Panel, to increase the industry's capacity to insure homes and businesses in the center city.*

This program will encourage insurance companies to increase their reserves to cover unusual losses. Any deferred taxes will be invested in appropriate Government securities, so that no Federal revenues will be lost by the tax deferral unless unusual losses do occur.

Insurance is vital to rebuilding our cities. It is a cornerstone of credit. It can provide a powerful incentive for homeowners and businessmen to rehabilitate their own property and thereby improve the community.

#### THE PRIVATE SECTOR

The Federal role—a quarter of a century in the making—is designed to assure that every citizen will be decently housed.

The Government's concern is to stimulate private energy and local action—to provide capital where needed, to guarantee financing, to offer assistance that encourages planning and construction.

The real job belongs to local government and the private sector—the homebuilder, the mortgage banker, the contractor, the non-profit sponsor, the industrialist who now sees in the challenge of the cities a new opportunity for American business.

All of the programs I have outlined in this message are directed toward the deeper involvement of the private sector. That involvement must match the massive dimension of the urban problem.

What is needed is a new partnership between business and Government. The first outlines of that partnership are already visible.

We see it in:

—The recent undertaking of the American Bar Association to improve the landlord-tenant laws—now more medieval than modern—and to attack other legal problems in our urban centers.

—The commitment of 318 of the nation's life insurance companies to invest \$1 billion of their capital in low-income housing.

Within the next several days, the Savings and Loan Associations and the Mutual Savings Banks of this nation will announce their plans to intensify the investment of their capital for similar purposes.

#### NATIONAL HOUSING PARTNERSHIPS

How can the productive power of America—which has mastered space and created unmatched abundance in the marketplace—be

harnessed to meet the most pressing unfilled need of our society: rebuilding the urban slum?

Last June, I asked a selected Commission of leading industrialists, bankers and labor leaders to study this question. That Commission, headed by Edgar F. Kaiser, has now given me an interim report with many valuable recommendations.

Acting on the Commission's recommendations, *I propose that the Congress authorize the formation of privately-funded partnerships that will join private capital with business skills to help close the low-income housing gap.*

The Kaiser Commission identified three principal reasons why American industry has not yet been attracted to the field of low and moderate-income housing. The problems and the steps proposed to meet them are:

### 1. Concentration of Risk

The profitability of individual housing projects varies widely and the risk of loss on any one project is high. The proposed national partnerships would permit industrial and financial firms to pool their investments and spread their risks over a large number of projects.

### 2. Rate of Return

Substantial operating losses are usually incurred in the first 10 years of a housing project's life to cover operating expenses, interest and depreciation.

By employing the partnership form of organization, which some building owners now use, under existing tax law these operating losses can be "passed through" to each investor, and offset against the investor's other taxable income. This reduces the investor's current income taxes otherwise payable, and makes possible an annual cash return on investment comparable to the average earnings of American business in other manufacturing enterprises.

### 3. Management

The management personnel of major corporations are inexperienced in the field of low-income housing. They cannot afford to devote substantial time to occasional housing ventures.

The proposed national partnerships would be strongly financed organizations, fully committed to long term activity in the single field of housing for the poor. As such, the proposed partnerships should be able to attract top flight management and technical experts on a competitive career basis.

The objective of these partnerships will be to attract capital from American industry and put that capital to work. Their exclusive purpose will be to generate a substantial additional volume of low and moderate-income housing. They will use the best private management talent, planning techniques and advanced methods of construction. They will probe for the savings inherent in the latest technology and in economies of scale.

They will:

- Participate in joint ventures throughout the country in partnership with local builders, developers and investors.
- Join with American labor to open new job opportunities for the very people their projects will house.
- Participate in our existing and proposed federal programs for assisting low and moderate-income housing projects on the same basis as other project sponsors.

This new undertaking will begin with one national partnership. We expect that others will follow as the approach proves itself.

### A NEW ERA IN HOME FINANCING

The supply of credit is not unlimited. The nation's banks, insurance companies, pension funds and other financial sources have an obligation to their depositors and shareholders to seek a fair and competitive return for their investments.

To insure that home financing remains competitive with alternative long-term investment opportunities, I recommend that the Congress:

- authorize the Secretary of Housing and Urban Development to adjust the FHA interest rate ceilings.
- authorize federal insurance of bond obligations issued by private mortgage companies or trusts holding sizeable pools of FHA-insured and VA-guaranteed home mortgages.
- transfer the secondary market operations of the Federal National Mortgage Association to completely private ownership.

### FHA INTEREST RATES

Mortgages insured by the Federal Housing Administration and the Veterans Administration can by law carry no more than a 6 percent interest rate. In today's market this is no longer competitive. In practical terms, the result is the sale of mortgages at substantial discounts.

Discounts require hard cash beyond the normal downpayment. They erode the hard-earned equity of a home-owner and the profit margin of the builder of new housing. For when the rate of return on federally-insured mortgages is less than lending institutions can obtain from other investments, they require property-sellers to absorb discounts. To sell their homes, therefore, sellers realize less than they originally anticipated. And when builders of large projects—with 90% mortgages of \$1 or \$2 million, or more—must find additional hard cash to pay deep discounts, they will defer construction until the cash requirements are reduced.

As a result, many a house goes unsold and many apartment projects go unbuilt in a deep credit squeeze.

To assure a steady flow of funds into homebuilding, *I recommend that the Congress authorize the Secretary of Housing and Urban Development to adjust the FHA interest rate ceilings to reflect the economic realities of the financial markets. I have already recommended a similar adjustment on the interest rates for home loans to veterans.*

### FEDERALLY-INSURED MORTGAGE BONDS

Some private institutional and individual investors have shunned investments in home mortgages because they could realize nearly comparable rates of return in other investments, and avoid the book-keeping and paper work associated with hundreds of individual mortgages.

These pools of savings—in large institutional pension funds, private trusts, and occasionally in individual estates—can be attracted to residential finance. It will take a new, marketable financial investment, with competitive yields and security. Such a bond-type obligation can be created to cover federally-insured mortgages held by private mortgage bankers or trusts.

To enhance the attractiveness of such an obligation to investors, and thus attract additional funds to the housing market, *I recommend that the Congress authorize the Department of Housing and Urban Development to insure mortgage bonds that are secured by pools of FHA-insured and VA-guaranteed mortgages.*

#### FEDERAL NATIONAL MORTGAGE ASSOCIATION

Through the Federal National Mortgage Association, the Federal Government has helped keep mortgage funds flowing by buying mortgages when credit was tight and selling them when money was plentiful.

Today, FNMA is a hybrid, owned in part by private shareholders, in part by the government, but managed by Government officials.

This secondary market operation is largely a private function, which ought to be performed by the private sector—as the Congress has always intended.

*I propose legislation to transfer the secondary market operation of the Federal National Mortgage Association on an orderly basis to completely private ownership.*

This new FNMA, concerned exclusively with providing an increasing and continuous flow of funds into residential financing will close an important gap in the existing network of financial institutions.

This change will not affect the Government's special assistance to selected types of mortgages which are not yet readily accepted in the private market.

#### URBAN TRANSPORTATION

In the modern city the arteries of transportation are worn and blocked. The traffic jam has become the symbol of the curse of congestion.

It was only a few years ago, however, that we recognized this as a national problem. In signing the Urban Mass Transportation Act in 1964, I said:

This is a many sided challenge. We cannot and we do not rely upon massive spending programs as cure-alls. We must instead look to closer cooperation among all levels of government and between both public and private sectors to achieve the prudent progress that Americans deserve and that they expect.

Under this Act, we are

- Aiding cities to draw the blueprints to modernize, expand and reorganize their transportation systems.
- Helping to train specialists in the urban transportation field.
- Advancing research to improve the system and the service.
- Assisting communities to buy the capital equipment and to build terminals for their transit systems.

We must step up this effort.

In the year ahead, we expect to increase our grants to cities from \$140 million to \$190 million.

*I recommend that the Congress provide \$230 million for fiscal 1970 so cities can begin now to plan the improvement of their mass transit systems and service to the people.*

Urban transportation is the concern of our two newest Departments—Housing and Urban Development, and Transportation.

The Department of Housing and Urban Development is responsible for the development of the metropolitan community—and transportation is an essential part of that effort.

The Department of Transportation is responsible for the coordination of different—but closely related—modes of transportation.

Moreover, research facilities bearing on transportation—out of which will come the transportation technology of tomorrow—are concentrated in this Department.

When the Department of Transportation was established in 1966, the Congress required both Secretaries of Housing and Urban Development and Transportation to study this problem and recommend the arrangement which would best assure the Government's ability to meet the transportation needs of America's urban citizens.

On the basis of their intensive study, and their recommendations, *I will shortly submit a reorganization plan*

—*transferring to the Department of Transportation the major urban transit grant, loan, and related research functions now in the Department of Housing and Urban Development.*

—*Maintaining in the Department of Housing and Urban Development the leadership in comprehensive planning at the local level, that includes transportation planning and relates it to broader urban development objectives.*

### RESEARCH AND TECHNOLOGY FOR THE CITIES

Federally-sponsored research has helped us guard the peace, cure disease, and send men into space.

Yet, we have neglected to target its power on the urban condition. Although 70 percent of our people live in urban areas, less than one-tenth of one percent of the Government's research budget has been devoted to housing and city problems.

We must:

—Learn how to apply modern technology to the construction of new low-income homes and the rehabilitation of old ones.

—Test these ideas in practice, and make them available to builders and sponsors.

—Look deep into the fiscal structure of the cities—their housing and building codes, zoning, and tax policies.

—Learn how best the federal government can work with state and local governments—and how states and local governments can improve their own operations.

—Evaluate our city programs, so we can assess our priorities.

Last year, I sought the first major appropriations for urban research: \$20 million. Congress appropriated only half that amount.

*I once again propose a \$20 million appropriation for urban technology and research.* This will assist the universities and private institutions of America to carry out the studies so crucially needed.

These funds, along with those from other Government agencies, will also help launch the new Urban Institute, which I recently recommended. This is a private non-profit research corporation formed to create a bank of talent to analyze the entire range of city problems.

### PLANNING FOR THE FUTURE

A passenger on an airline flying from Miami to Boston is rarely out of sight of city lights below.

As our urban areas expand, the citizen's sense of community broadens. He may live in one locality, work in another and seek leisure in still another.

The face of the landscape is changing with our growth.

The question is: *How shall our communities grow?*

Unless we decide now for order and purpose, the result will be sur-

render to chaos, confusion, ugliness and unnecessary and exorbitant cost.

The key to orderly growth is planning—planning on an area-wide basis.

Planning, both immediate and long-range, is the function and the responsibility of the State and community. But the Federal Government has long recognized the need for its support.

That need grows as the problem grows.

*I urge the Congress to provide \$55 million in Fiscal 1969 to assist planning for the orderly growth of our urban areas, a 22 percent increase over last year.*

So essential is orderly development to the future of our urban centers that we must provide incentives to encourage it. In 1966 the Congress authorized—but did not fund—such a program of incentive grants.

*I ask Congress to authorize \$10 million for a program of area-wide Incentive Grants in Fiscal 1969.*

The Federal share of a project will increase by up to 20 percent of the costs of projects of areawide significance—if they are part of a comprehensive area plan.

The far-sighted community which responds to this incentive program will find its burdens lighter in providing hospitals, roads, sewage systems, schools and libraries.

#### NEW COMMUNITIES

Over the next decade, 40 million more Americans will live in cities.

Where and how will they all live? By crowding further into our dense cities? In new layers of sprawling suburbia? In jerry-built strip cities along new highways?

Revitalizing our city cores and improving our expanding metropolitan areas will go far toward sheltering that new generation. But there is another way as well, which we should encourage and support. It is the new community, freshly planned and built.

These can truly be the communities of tomorrow—constructed either at the edge of the city or farther out. We have already seen their birth. Here in the nation's capital, on surplus land once owned by the Government, a new community within the city is springing up.

In other areas, other communities are being built on farm and meadow land. The concept of the new community is that of a balanced and beautiful community—not only a place to live, but a place to work as well. It will be largely self-contained, with light industry, shops, schools, hospitals, homes, apartments and open spaces.

New communities should not be built in any set pattern. They should vary with the needs of the people they serve and the landscapes of which they are a part.

Challenge and hard work await the founders of America's new communities:

—Careful plans must be laid.

—Large parcels of land must be acquired.

—Large investments in site preparation, roads and services must be made before a single home can be built and sold.

—The development period is long, and return on investment is slow.

—But there is also a great opportunity for, as well as a challenge to, private enterprise.

The job is one for the private developer. But he will need the help of his Government at every level.

In America—where the question is not so much the standard of living, but the quality of life—these new communities are worth the help the Government can give.

*I propose the New Communities Act of 1968.*

For the lender and developer, this Act will provide a major new financing method.

A Federally-guaranteed "cash flow" debenture will protect the investment of private backers of new communities at competitive rates of return. At the same time it will free the developer from the necessity to make large payments on his debts, until cash returns flow from the sale of developed land for housing, shops and industrial sites.

For the local and State government, the Act will offer incentives to channel jointly-financed programs for public facilities into the creation of new communities. The incentives will take the form of an increased Federal share in these programs

### A SENSE OF PLACE AND PURPOSE

"A city," Vachel Lindsay wrote, "is not builded in a day."

Nor—we know well—will its problems be conquered in a day. For the city's tides have been ebbing for several decades. We are the inheritors of those tragic results of the city's decline.

But we are the ones who must act. For us that obligation is inescapable.

Our concern must be as broad as the problems of men—work and health, education for children and care for the sick. These are the problems of men who live in cities. And the very base of man's condition is his home: he must find promise and peace there.

The cry of the city, reduced to its essentials, is the cry of a man for his sense of place and purpose.

Violence will not bring this. But neither should fear forestall it.

The challenge of changing the face of the city and the men who live there summons us all—the President and the Congress, Governors and Mayors. The challenge reaches as well into every corporate board room, university, and union headquarters in America. It extends to church and community groups, and to the family itself. The problem is so vast that the answer can only be forged by responsible leadership from every sector, public and private.

We dare not fail to answer—loud and clear.

To us, in our day, falls the last clear chance to assure that America's cities will once again "gleam, undimmed by human tears."

No one can doubt that the hour is late.

No one can understate the magnitude of the work that should be done.

No one can doubt the costs of talk and little action.

As we respond to the cities problems—to the problems caused by the accumulated debris of economic stagnation, physical decay and discrimination—let us recall and reaffirm the reasons for our national strength: unity, growth and individual opportunity.

And recalling these truths, let us go forward, as one nation in common purpose joined, to change the face of our cities and to end the fear of those—rich and poor alike—who call them home.

LYNDON B. JOHNSON.

THE WHITE HOUSE, February 22, 1968.

**Section 1237. General powers of corporation**

This section sets forth the general corporate powers of the Corporation; including the power to have a corporate seal; to sue and be sued (and that all suits of a civil nature in which the Corporation is a party shall be deemed to arise under the laws of the United States); to enter into and perform contracts, leases and other agreements without competitive bidding; to employ a staff; to issue such rules and regulations as the Corporation deems necessary or appropriate to carry out the title; and to exercise all powers specifically granted by this title and such incidental powers as are necessary to carry out the title.

**Section 1238. Services and facilities of other agencies—Utilization of personnel, services, facilities and information**

This section authorizes the Corporation, with the consent of the agency concerned, to utilize the personnel and information of any agency of the Federal Government on a reimbursable basis and to obtain data relating to matters within the jurisdiction of the Corporation from any agency having custody of such data without reimbursement, to the extent permitted by law.

**Section 1239. Finality of certain transactions**

This section provides that any financial transaction of the Corporation relating to reinsurance under the title shall be final and conclusive on all officers of the United States.

**Section 1240. Taxation**

This section exempts the Corporation from taxation by any local or State government and the Federal Government, except on real property acquired as a result of reinsurance. Real property may be taxed by a State or political subdivision thereof, to the same extent, according to the value of the property, as other real property in the State is taxed.

**Section 1241. Annual report**

This section requires the Secretary to include in his annual report a report on the operation of the Corporation.

**Section 1242. Appropriations**

This section authorizes such appropriations as may be necessary to carry out the title.

**Section 4. Financing**

This section of the bill amends section 520(b) of the National Housing Act to authorize payments by the Secretary for property losses reinsured under title XII of the Act.

**Section 5. Government Corporation Control Act**

This section defines the National Insurance Development Corporation as a wholly-owned government corporation under the Government Corporation Control Act.

**Section 6. Compensation of Executive Director**

This section provides for compensation of the Executive Director of the National Insurance Development Corporation at the rate prescribed for Level IV of the Federal Executive Salary Schedule.

**GENERAL EXPLANATION OF THE NATIONAL INSURANCE DEVELOPMENT CORPORATION ACT OF 1968**

The bill would implement the recommendations of the Report by the President's National Advisory Panel on Insurance in Riot-Affected Areas, entitled *Meeting the Insurance Crisis of our Cities*. It would add a new title XII to the National Housing Act, "National Insurance Development Corporation".

The bill would create a National Insurance Development Corporation (NIDC) in the Department of Housing and Urban Development. The Corporation would be managed under the supervision of the Secretary

by an Executive Director appointed by the President, by and with the advice and consent of the Senate. A nineteen-member Advisory Board, appointed by the President, would meet periodically to advise on the general policies of the Corporation. The members of the Advisory Board could include members of the public, insurance industry representatives, and State and Federal officials. Operation of the Corporation would be limited to five years.

The bill is designed to meet two serious and urgent problems confronting owners of residential and business properties in urban areas of the Nation by authorizing new programs to improve the availability of property insurance. A major problem, of critically growing proportions, is the limited availability of fire and extended coverage, and insurance against vandalism and malicious mischief and burglary and theft in the core areas of our Nation's cities. In many cases, private insurance companies have considered it uneconomic to provide these lines of insurance in certain areas, regardless of the condition of the individual risk. The bill would authorize the National Insurance Development Corporation to encourage the private property insurance industry to cooperate with State insurance authorities, in developing statewide plans to assure all property owners fair access to property insurance.

A second, and related, insurance problem requiring urgent attention has been precipitated by recent riots and civil disorders in urban areas across the Nation. The amount of losses which the property insurance industry has paid on riot and civil commotion coverage raises the serious question as to whether the industry will continue to provide this coverage, or indeed any insurance coverage, in certain areas of the Nation's cities. To meet this problem, the bill would authorize the NIDC to offer reinsurance in order to provide continuity of private insurance coverage, and thus prevent a credit crisis of serious national proportions which would arise if insurance coverage were withdrawn in urban areas.

Riot losses would be shared first by the private insurance companies and then by the separate States in which riot losses may occur. The Federal Government, through the NIDC, would reinsure the balance of insured losses from riots and civil disorders.

**STATEWIDE PROPERTY INSURANCE PLANS**

Part A of the new title XII provides for statewide plans to assure Fair Access to Insurance Requirements (FAIR Plans).

Owners of homes and businesses in sections of center cities frequently find it impossible to purchase important insurance protection. Without insurance coverage against major perils, banks and other lending organizations will not extend credit for the purchase and improvement of real property, and the financing of business inventories. Consequently, property cannot be maintained and business cannot be conducted; the result is that property deteriorates and business, particularly small business, stagnates.

Owners of well-maintained properties and businesses have complained that individual insurance risks have not been considered on their respective merits, but instead have been denied insurance merely because of the location of the property in a particular neighborhood or section of a community. Without insurance responsible owners lose incentive to maintain their property. Families and businesses move out and a blighted area develops and grows.

The bill would meet the lack of fire and extended coverage, and coverage against vandalism and malicious mischief and burglary and theft by encouraging State insurance commissioners and the property insurance industry to cooperate in developing statewide property insurance plans to improve access

to these coverages. Similar plans of limited range—principally for making fire and extended coverage available on residential properties in specified areas—have been introduced by the private property insurance industry in a dozen or so communities.

The new plans would require measures for inspecting risks for fire and extended coverage not only on residential, but also on commercial and other properties in urban areas. In addition, the plans would provide inspections to obtain vandalism and malicious mischief and burglary and theft insurance on these properties. The plans also call for a cooperative all-industry facility which would place insurance in the regular market.

Including vandalism and crime insurance in the statewide plans will offer property owners an opportunity to purchase these important coverages. Although the urban core poses special problems for the crime insurance underwriter, the plans should encourage the industry to focus more attention on loss prevention and policy design, and should make this coverage more economical.

The criteria for "FAIR" plans are specified in the bill. The State insurance authorities would have the responsibility to review the operation of the plans and report periodically to the Corporation on their effectiveness in improving the market for property insurance coverage.

Under such plans, property owners could not be charged more than the standard rate or be denied essential insurance coverages unless there has first been a physical inspection of the property. If an inspection discloses that the risk is not insurable because of physical hazards on the premises or other deficiencies, the owner would be advised by the company or its representative of the specific measures which must be taken to meet reasonable underwriting standards. If such measures are taken, the property would be eligible for insurance and, if necessary, the statewide placement facility would try to place such insurance with a private company or companies.

In some cases the owner of an otherwise insurable property cannot now obtain insurance because of environmental hazards not under his control—for example, a neighboring "fire trap." The statewide placement facility should be able to distribute equitably these risks throughout the industry. Where a substantial number of these properties make this approach impractical, however, it is expected that within two years after enactment of the bill insurers will form pools to accept these risks.

The incentive to insurance companies to cooperate with State insurance authorities and the Corporation in developing and carrying out these plans is the program of reinsurance to be offered on a State-by-State basis.

**REINSURANCE COVERAGE**

Part B of the new title contains authority for the new reinsurance program.

Much of the property damage to residences and businesses from recent riots in cities across the Nation was protected by insurance against loss from riot and other civil commotion. Insurance companies which offer various lines of property insurance customarily reinsure against abnormally high losses from various perils, including riot and other civil commotion, with organizations specializing in reinsurance. Insurance claims for losses in riot-struck cities have been paid by primary property insurers, in part, from such reinsurance.

So long as the insurance industry believes that the threat—however remote—of the catastrophic riot and civil commotion losses continues, reinsurers cannot reasonably be expected to offer such protection except at prohibitive cost which the insurance-buying public would be expected to bear. If losses continue, reinsurers might even withdraw from the market altogether.

The consequences of either market development would be critical to the national economy. Without reinsurance, primary insurers cannot continue to provide riot and civil commotion protection in the various lines of insurance, and may seek to cancel policies currently in force or, since most policies are short-term, refuse to renew them when they expire. Without property insurance coverage, banking and other lending organizations would refuse to extend credit.

The bill would meet this threat to the economy by authorizing a reinsurance program through the National Insurance Development Corporation, with appropriate loss-sharing by insurers, the States, and the Federal Government. Reinsurance would be offered to insurance companies in each State for the riot and civil commotion peril in all lines of property coverage. Agreements would be entered into between the Corporation and the insurance company, prescribing the terms and conditions for the reinsurance.

Companies would pay premiums to the Corporation for such reinsurance. Premium rates would be negotiated, from time to time, between the Corporation and the private property insurance industry. Under the bill the first year premiums should provide sufficient income to cover a level of riot losses greater than those in 1967.

Reinsurance losses would be shared among the companies, the States, and the Corporation. In the event losses in a State exceed the amount of losses which the companies would assume under reinsurance agreements, and the amount of losses assumed by the State, then the Corporation would reimburse the Companies for the balance.

The retention of losses by the companies might be as follows: Assume that in State X, the total insured claims for losses from riot and civil disorders by companies doing business in the State in a given calendar year amounted to \$45 million. Assume that policy premiums earned by all companies in a State X on all lines of property insurance amounted to \$150 million, and further, that premiums earned by all companies on re-insured lines in such State in that year amounted to \$100 million.

The bill authorizes the specific terms of reinsurance arrangements (including company retentions of loss and percentage sharing) to be negotiated from time to time between the Corporation and private companies. However, the typical arrangement might involve two features: (1) an initial retention of losses, equal to a percentage of premiums earned in a State on lines re-insured, plus (2) the assumption of an additional percentage of total losses, above and beyond the initial retention.

For illustrative purposes, the first percentage might be assumed to be 3 percent. Applied against premiums earned, this would amount to \$3 million (\$100 million  $\times$  3%). If the second percentage is assumed to be 10 percent, this would amount to \$4.2 million (\$42 million  $\times$  10%; \$42 million equals \$45 million, less \$3 million). The private insurance companies' retention of riot losses would be the sum of \$3 million (initial retention) plus \$4.2 million (override), or \$7.2 million, to be paid from their own resources.

The State's share of the reinsurance losses might be illustrated by an extension of the foregoing example. Under the bill, the "ceiling" for any State's share would be 5 percent of total premiums earned by the insurance companies on all property lines in that State. Such sharing, however, would not be required unless reinsured losses in a State exceeded the sum of (1) the premiums paid by the insurance industry for reinsurance in that State, and (2) the companies' retained losses.

Assuming that premiums for reinsurance paid by companies in the State in a calendar

year would be 2 percent of earned premiums on all reinsured lines in the State, this would amount to \$2 million (\$100 million  $\times$  2%). To arrive at the State "sharing" point, the losses retained by the companies would be added to this amount. The sum of these two amounts is \$9.2 million (\$2 million plus \$7.2 million). Since total riot losses exceed this amount, in the example (i.e. \$45 million), the State's share would be \$7.5 million (premiums earned by all companies in the State on all lines of property insurance, or \$150 million  $\times$  5%).

There would remain yet to be paid \$30.3 million, the amount to be paid by the Corporation, from premiums received from companies for reinsurance in other States.

#### FINANCING

Under the bill, it is intended that the reinsurance program would be self supporting, drawing on reinsurance premiums for any losses that might be incurred.

If, however, riot losses throughout the Nation resulted in reinsurance claims in excess of the aggregate amount of premiums received by the Corporation from reinsurance, the excess would be paid with funds borrowed from the Treasury. These funds would, in turn, be repaid from future reinsurance premiums.

#### STUDY AND REPORT TO CONGRESS

Part C of the new title, in addition to containing general provisions, directs the Corporation to conduct a study and to make a report for transmission by the Secretary to the President and the Congress within one year on reinsurance and other means to assure an adequate market for property insurance in urban areas. In this study, the Corporation would consider the feasibility of offering reinsurance against such perils as exposure hazards from neighboring properties, the risk of crime losses, and default on contractors' surety bonds—in addition to riots and civil disorders.

### S. 3029—INTRODUCTION OF HOUSING AND URBAN DEVELOPMENT ACT OF 1968

Mr. SPARKMAN. Mr. President, I introduce the administration's proposed Housing and Urban Development Act of 1968, to implement the recommendations made by the President in his message on cities. I have just received this bill and, consequently, I have not had the opportunity to study it in depth. As usual, I am sure it contains proposals that are good, and which I can support, and some which I may not be able to support.

Nevertheless, I said last week that the President's message was a timely one. The problems of our towns and cities are national problems affecting all of us whether we live in the city or in the country. The administration's recommendations are designed to deal with this national problem.

Last year, the Subcommittee on Housing and Urban Affairs, and the Committee on Banking and Currency, worked tirelessly and long in an effort to develop a program that would help make it possible for more low-income families to own their homes. A program was developed and approved. The committee bill, S. 2700, is now on the Senate Calendar and includes many of the provisions recommended by the President. In view of what has already been done, I am hopeful that the committee may be able to dispose of that part of the administration's bill covered by S. 2700 quickly.

Mr. President, I ask unanimous consent that a section-by-section summary of the administration's Housing and Urban Development Act of 1968 be included in the RECORD at this point in my remarks.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the section-by-section summary will be printed in the RECORD.

The bill (S. 3029) to assist in the provision of housing for low- and moderate-income families, and to extend and amend laws relating to housing and urban development, introduced by Mr. SPARKMAN, was received, read twice by its title, and referred to the Committee on Banking and Currency.

The section-by-section summary, presented by Mr. SPARKMAN, is as follows:

#### SECTION-BY-SECTION SUMMARY OF HOUSING AND URBAN DEVELOPMENT ACT OF 1968

##### TITLE I—LOW AND MODERATE INCOME HOUSING *Homeownership for low and moderate income families*

Section 101. Subsection (a) would add a new section 235 to the National Housing Act to establish a homeownership assistance program for low and moderate income families. The assistance would be provided in the form of periodic payments to the mortgagee which would serve to reduce interest costs on a market rate home mortgage or a cooperator's share of a cooperative association's mortgage. In addition, the provisions of the present section 221(h) of the National Housing Act would be incorporated into the new section and the nonprofit organization sponsoring the project, as well as the individual lower income purchasers, would be eligible to receive the benefits of assistance payments.

The homeowner would be required to pay 20 percent of his monthly income toward the monthly payment due under the mortgage for principal, interest, taxes, insurance, and mortgage insurance premium. The difference between this amount and the total monthly payment required under the mortgage would be made up by the assistance payments. However, in no event could the amount of the assistance payment exceed the difference between the required monthly payment under the mortgage for principal, interest, and mortgage insurance premium and that amount which would be required for principal and interest if the mortgage bore interest at a rate of 1 percent. In addition, the Secretary could reimburse the mortgagee for its expenses in handling the mortgage.

To qualify for assistance payments, a family would have to be of low or moderate income whose income could not exceed limits prescribed by the Secretary. Family incomes of homeowners would be recertified at least every 2 years for the purpose of adjusting assistance payments. In calculating family income, a deduction of \$200 would be made for each minor child in the household, and earnings of minor children would not be included in family income.

Mortgages under this section would generally meet the requirements of either section 221(d)(2) sales housing for low and moderate income housing, section 234 condominium housing, section 213 cooperative housing, or the provisions of section 221(h) incorporated into this section. In addition, families eligible for insurance under the above sections (except section 213), but who must obtain insurance under section 237 (proposed by section 102 of the bill) because of their credit or income ratings, would also be eligible for assistance payments under this section.

Assistance payments would generally be made only with respect to newly constructed

or substantially rehabilitated units. However, a mortgage involving existing single family or condominium housing could be insured under this section, where it involved (1) a tenant occupying a unit in a rental project covered by a mortgage insured under section 236 (proposed by section 201 of the bill) or occupying a unit in a rent supplement project and wishing to purchase his unit; (2) displacees; (3) families occupying low-rent public housing; and (4) families with five or more minor children.

The amount of the mortgage would be limited to \$15,000 (\$17,500 in high-cost areas), except that in the case of families with five or more persons the limits would be \$17,500 and \$20,000, respectively. In order to prevent the price of a dwelling being unnecessarily increased because of the availability of assistance payments, the Secretary would be required to prescribe regulations to assure that the consideration paid for homes under this program is not increased above their appraised value. These mortgages would be insured under the new Special Risk Insurance Fund proposed by section 104 of the bill.

Contracts for assistance payments would be authorized, subject to approval in appropriation acts, in the amount of \$75 million annually prior to July 1, 1969, which amount may be increased by \$100 million on July 1, 1969, by \$125 million on July 1, 1970, by \$150 million on July 1, 1971, and by \$150 million on July 1, 1972.

Assistance under this new section 235 would be available in both urban and rural areas. However, insofar as the administration of this section in rural areas is concerned, the Secretary will assign to the Secretary of Agriculture necessary authority, along with appropriate transfer of funds, for the implementation thereof as agreed upon by the two Secretaries. Section 513 of the Housing Act of 1949 would be amended by section 1003 of the bill to authorize appropriations to pay for Agriculture's administrative expenses in connection with any such assignment.

*Subsection (b)* would increase the mortgage limits on single family dwellings under section 221(d)(2) of the National Housing Act to correspond to the limits provided in section 235. This subsection would also permit a mortgagor under section 221(d)(2) (and, therefore, also one under section 235) to contribute the value of his labor to the acquisition cost of his dwelling.

*Subsection (c)* would prohibit the insurance of any blanket mortgage under section 221(h) of the National Housing Act after the effective date of this section, except pursuant to a commitment issued prior to that date. It would also permit mortgages on the individual units sold by a nonprofit organization holding a blanket mortgage under section 221(h) to be insured under section 235 with assistance payments.

*Subsection (d)* would amend section 212 of the National Housing Act to make the labor standards of that section applicable to blanket mortgages held by nonprofit organizations insured under section 235 to the same extent as now applicable to such mortgages insured under section 221(h) of such Act.

*Subsection (e)* would authorize the Secretary to provide, either directly or by contract, budget, debt management, and related counseling to homeowners with mortgages insured under section 235.

#### *Credit assistance*

*Section 102.* Would add a new section 237 to title II of the National Housing Act to authorize mortgage insurance for families of low and moderate income who cannot qualify for mortgage insurance under regular FHA programs because of their credit histories or irregular income patterns, but who the Secretary finds are "reasonably satisfactory" credit risks and capable of homeownership with the assistance of budget, debt management, and related counseling provided by

the Secretary. Mortgage insurance under this program would have to meet the requirements (other than credit and income requirements) under certain regular FHA single family sales programs, except that the principal obligation of the mortgage could not exceed \$15,000 (\$17,500 in high-cost areas) and the mortgagor could not undertake a mortgage which, in combination with local real estate taxes, required monthly payments which exceeded 25 percent of the mortgagor's income. These mortgages would be insured under the new Special Risk Insurance Fund (proposed by section 104 of the bill). The Secretary would be authorized to provide, either directly or by contract, budget, debt management and related counseling services to these mortgagors. A conforming amendment would be made to section 226 of the National Housing Act to require that the home purchaser be furnished a copy of the FHA appraisal of the property, prior to the sale of the property, for homes insured under both this section and the new section 235 (proposed by section 101 of the bill).

#### *Relaxation of mortgage insurance requirements in certain urban neighborhoods*

*Section 103.* Would amend section 223 of the National Housing Act by adding a new subsection (e) to give FHA a more flexible authority in providing financing for the repair, rehabilitation, construction, or purchase of properties located in older, declining urban areas by authorizing FHA to accept for insurance mortgages on properties which may not, because of the areas in which they are located, be able to meet all the normal eligibility requirements for insurance. Such mortgages could be accepted for insurance where FHA is able to establish that the areas are reasonably viable, giving consideration to the need for providing adequate housing for families of low and moderate income in such areas and that the properties are an acceptable risk in view of such consideration. This section replaces an older provision (section 203(1)) which is limited to sales housing in riot-prone areas and which is repealed.

#### *Special risk insurance fund*

*Section 104.* Would add a new section 238 to title II of the National Housing Act to establish a "Special Risk Insurance Fund", which fund is not intended to be actuarially sound and out of which claims would be paid on mortgages insured under the new sections 235—homeownership assistance (proposed by section 101 of the bill); 236—assistance for rental and cooperative housing (proposed by section 201 of the bill); and 237—credit assistance (proposed by section 102 of the bill); as well as those mortgages insured pursuant to the authority contained in the amendment to section 223 (properties in older, declining urban areas) proposed by section 103 of the bill. Payments on claims would be made in cash or debentures and could be in an amount equal to the unpaid principal balance of the loan plus any accrued interest and any advances made by the mortgagee with the approval of the Secretary and under the provisions of the mortgage. Income such as insurance premiums and service charges in connection with these programs would be deposited in the new fund. To establish the fund, the Secretary would be authorized to advance to the fund \$5 million from the General Insurance Fund. This advance would be repayable at such times and at such interest rates as the Secretary deemed appropriate. Appropriations to the fund would be authorized to cover any losses sustained by the fund in carrying out the mortgage insurance obligations of these sections.

#### *Condominium and cooperative ownership for low and moderate income families*

*Section 105.* Would amend section 221 of the National Housing Act by adding new subsections (i) and (j) to permit section 221(d)

(3) below-market interest rate rental projects to be converted to condominium or cooperative ownership.

Under the new subsection (i), a low or moderate income purchaser could purchase an individual family unit and an undivided interest in the common areas and facilities of the project at a price not in excess of the appraised value of the property. The purchase could be financed with a mortgage which bears an interest rate no less than the below-market interest rate in effect with respect to 221(d)(3) projects at the time the commitment to insure the mortgage is issued. The mortgage would contain a provision permitting the Secretary to increase the interest rate, up to the maximum permissible under section 221 at the time the mortgage commitment was issued, upon determination that the mortgagor's annual income had increased to an amount permitting payment of a greater rate of interest. If the original mortgagor ceases to occupy the property, the rate would also increase to the highest rate permissible at the time of commitment, unless the property is sold to a nonprofit purchaser approved by the Secretary or to a low or moderate income purchaser whose income is within the limits established for occupancy in a below-market interest rate project insured under section 221(d)(3).

Under the new subsection (j), a cooperative, with membership open only to low and moderate income families meeting income limits prescribed for section 221(d)(3) below-market interest rate projects, could purchase the project for an amount not exceeding the appraised value of the property for continued use as a cooperative at the below-market interest rate in effect at the time the commitment to insure the mortgage is issued.

#### *Assistance to nonprofit sponsors of low and moderate income housing*

*Section 106. Subsection (a)* would authorize the Secretary of HUD to undertake a program of assistance to nonprofit sponsors of low and moderate income housing. Activities could include the provision of information and technical assistance with respect to the construction, rehabilitation, and operation of low and moderate income housing.

*Subsection (b)* would provide financial assistance, in the form of 80 percent interest-free loans, to cover certain preconstruction costs of such nonprofit sponsors in connection with their low or moderate income housing undertakings under federally assisted programs. The loans could cover such items as market surveys, architectural and engineering fees, land options, and application and commitment fees. There would be established a \$7.5 million revolving fund to be used by the Secretary to make these loans. These loans would normally be repaid when the project is permanently financed, but the Secretary would be authorized to cancel any part of a loan which could not be recovered from the proceeds of the permanent loan.

#### **TITLE II—RENTAL HOUSING FOR LOW AND MODERATE INCOME FAMILIES**

##### *Part A—Private housing*

#### **Rental and Cooperative Housing for Low and Moderate Income Families**

*Section 201. Subsection (a)* would add a new section 236 to the National Housing Act to establish an assistance program for rental and cooperative housing for low and moderate income families. The assistance would be provided in the form of periodic payments to the mortgagee on behalf of the mortgagor which would serve to reduce interest costs on a market rate project market. In addition, the Secretary could reimburse the mortgagee for its expenses in handling the mortgage.

The interest reduction payments would reduce payments on the project mortgage from what would be required on a market rate mortgage to what would be required on a mortgage bearing an interest rate of 1 percent.

The interest reduction payments would reduce rentals to a basic charge, and a tenant or cooperative member would either pay the basic charge or such greater amount as represented 25 percent of his income, but not in excess of the charges which would be necessary without any interest reduction payments. Income of tenants would be reexamined at least every two years for the purpose of adjusting rentals. Rental charges collected by the project owner in excess of the basic charges would be returned to the Secretary for deposit in a revolving fund for the purpose of making other interest reduction payments.

To qualify for mortgage insurance under this section, a mortgagor would have to be a nonprofit organization, a cooperative, or a limited dividend entity of the types permitting under section 221(d)(3) of the National Housing Act. In addition the mortgage limitations with respect to maximum mortgage amount and the amount of the mortgage attributable to each dwelling unit would be the same as those mortgages insured under section 221(d)(3). The project could include such nondwelling facilities as the Secretary deemed adequate and appropriate to serve the occupants of the project and the surrounding neighborhood, as long as the project was predominantly residential and any nondwelling facilities contributed to the economic feasibility of the project, with due consideration being given to the possible effect of the project on other business enterprises in the community. Where a project was designed primarily for occupancy by elderly or handicapped families (as defined in section 202 of the Housing Act of 1959), it could include related facilities for use of such families, such as dining, work, recreation, and health facilities. The mortgages would be insured under the new Special Risk Insurance fund established by section 104 of the bill.

To be eligible for occupancy in a project, a family would have to be of low or moderate income under standards prescribed by the Secretary. Individuals of low or moderate income under 62 years of age would be eligible for occupancy in a project, as long as no more than 10 percent of the dwelling units in the project were so occupied. With approval of the Secretary, a mortgagor could sell the individual dwelling units to low and moderate income purchasers, including elderly or handicapped, and these purchasers would be eligible for individual assistance payments under the provisions of the new section 235 (proposed by section 101 of the bill).

A provision is included to enable a cooperative or private nonprofit corporation or association to purchase a project from a limited dividend mortgagor and to finance the purchase with a mortgage insured under this section. In such case, the Secretary is authorized to insure the purchaser's mortgage in an amount not exceeding the appraised value of the property at the time of purchase, thereby making it possible for the cooperative or nonprofit organization to borrow, under a single mortgage, the funds needed to obtain ownership, while enabling the limited dividend seller to realize a net amount out of the sales proceeds sufficient to recover its cash investment and to retire the outstanding mortgage.

Contracts for assistance payments would be authorized, subject to approval in appropriation acts, in the amount of \$75 million annually prior to July 1, 1969, which amount may be increased by \$100 million on July 1, 1969, by \$125 million on July 1, 1970, by \$150 million on July 1, 1971, and by \$150 million on July 1, 1972.

As under the new section 235 (proposed by section 101 of the bill), assistance under this new section 236 would be available in both urban and rural areas. However, insofar as the administration of the section in

rural areas is concerned, the Secretary will assign to the Secretary of Agriculture necessary authority, along with appropriate transfer of funds, for the implementation thereof as agreed upon by the two Secretaries. Appropriations would also be authorized, pursuant to section 1003 of the bill, to pay for Agriculture's administrative expenses in connection with any such assignment.

Subsection (b) would amend section 212 of the National Housing Act to make the labor standards of that section applicable to section 236 projects and would amend section 227 of such Act to make cost certification requirements applicable to section 236 projects.

Subsection (c) would authorize the insurance on mortgages covering projects for low and moderate income families under section 221(d)(3) of the National Housing Act which have been approved for a below-market interest rate to be transferred, prior to final endorsement, to section 236.

Subsection (d) would authorize projects for the elderly or handicapped approved for loans under section 202 of the Housing Act of 1959 to be refinanced under section 236 at any time up to, or a reasonable time thereafter, project completion.

Subsection (e) would amend section 101 of the Housing and Urban Development Act of 1965 to authorize rent supplement benefits for tenants in a section 236 project, but limited to no more than 20 percent of the units in any one project.

#### Increased Authorization for the Rent Supplement Program

Section 202. Makes available an additional \$40,000,000 in contract authority for rent supplement payments in fiscal year 1970, plus an additional \$100,000,000 in contract authority in each of the fiscal years 1971, 1972, and 1973.

#### Part B—Low-rent public housing Increased Low-Rent Public Housing Authorization

Section 203. Would amend section 10(e) of the United States Housing Act of 1937 to increase the authorization for annual contributions contracts for the low-rent public housing program by \$100 million on the date of enactment and by \$150 million on July 1 in each of the years 1969 and 1970, and by \$200 million on July 1 in each of the years 1971 and 1972.

Would also amend section 20 of such Act to modify the method of computing HUD's use of borrowing authority under the program.

#### Upgrading Management and Services in Public Housing Projects.

Section 204. Would add a new paragraph to section 15 of the United States Housing Act of 1937 to authorize the Secretary of HUD to enter into grant contracts with local housing authorities to assist them, where necessary, in upgrading their management activities and providing tenant services to families living in low-rent housing projects, and would authorize appropriations in an amount not to exceed \$20,000,000 in fiscal year 1969 and such amounts in subsequent fiscal years as may be necessary for this purpose.

#### Purchase of Units by Tenants

Section 205. Would amend section 15(9) of the United States Housing Act of 1937 to broaden existing law to permit local housing authorities to sell any low-rent housing unit to a tenant if such unit is suitable for individual ownership. Existing law permits tenants to purchase only detached or semi-detached units.

#### Public Housing in Indian Areas

Section 206. Would amend section 1 of the United States Housing Act of 1937 to permit public housing assistance for Indian families without regard to the present limitation that

such a family may not live on property located on or adjacent to their farm land.

#### TITLE III—FHA INSURANCE OPERATIONS

##### *Mortgage insurance premiums for servicemen and their widows*

Section 301. Would amend section 222 of the National Housing Act to permit payment of FHA mortgage insurance premiums by the Secretary of Defense or the Secretary of Transportation in cases where a serviceman assumes a home mortgage previously insured under any other provision of the National Housing Act. Under present law, a serviceman may receive this benefit only when he purchases a home and places a new mortgage on it under the provisions of section 222.

Would also direct the Secretary of Defense or the Secretary of Transportation to continue making the premium payments on behalf of the widow of a serviceman who dies in the service for 2 years after his death or until she sells the house, whichever occurs sooner. The Secretaries would be directed to promptly notify the widow of the increased cost she would have to bear upon the termination of the payment of the insurance premium at the end of the 2-year period.

##### *Flexible interest rates for mortgage insurance programs*

Section 302. Would authorize the Secretary of HUD to establish the interest rates on all FHA mortgage insurance programs, except for the land development program (which has no statutory ceiling) and the below-market interest rate programs provided for under sections 221(d)(3) and (h), without regard to any present limitations set out in the National Housing Act. The Secretary would be authorized to set these rates at such levels as he finds necessary to meet the mortgage market.

##### *Modifications in terms of insured mortgages covering multifamily projects*

Section 303. Would add a new section 239 to the National Housing Act to require the Secretary of HUD to approve a request for the extension of time for curing a default on any FHA multifamily mortgage or for a modification of the terms of such a mortgage only pursuant to regulations prescribed by him. Under such regulations, the mortgagor would have to agree to place in trust any income or funds derived from the project in excess of what is required to meet actual and necessary operating expenses. The Secretary could provide for granting such consent in any case or class of cases, without regard to the requirements of the regulations, where he determined such action would not jeopardize the interests of the United States. Any knowing and willful misdistribution of the rents or other income received during the period of extension or modification would subject the party to criminal penalty (\$5,000 or 3-year imprisonment, or both).

##### *Condominiums*

Section 304. Would amend section 234(c) and (f) of the National Housing Act to (1) authorize FHA insurance for the individual units in a condominium project with 2 to 11 dwelling units without requiring that the project be first covered by an FHA insured project mortgage, (2) provide the same downpayment and maximum mortgage limitations for the FHA condominium program as are provided for the regular single-family FHA section 203(b) program, and (3) permit blanket mortgages to cover four or more units instead of the present limitation of five or more units.

##### *Insurance of loans for purchase of fee simple title from lessors*

Section 305. Would add a new section 240 to the National Housing Act to permit FHA to insure loans to homeowners to finance the

purchase of fee simple title to property on which their homes are located where the homeowner has only a leasehold interest in the land. Would also amend section 5(c) of the Home Owners' Loan Act of 1933 to permit savings and loan associations to invest in the loans described above.

*Extend section 221(d)(2) sales housing program for two, three, and four family residences to all low and moderate income families*

**Section 306.** Would authorize FHA mortgage insurance under section 221(d)(2) for mortgages secured by two, three, and four family properties for all low and moderate income families, when one of the units will be occupied by the mortgagor. Under present law, insurance of a mortgage under section 221(d)(2) for two, three, and four family properties is only authorized where the mortgagor is a displaced family intending to occupy the property.

*Remove dividend restriction for nondwelling facilities in section 221 projects*

**Section 307.** Would amend section 221(f) of the National Housing Act to remove the requirement that a mortgagor of a 221 multifamily project in an urban renewal area (other than a mortgagor whose mortgage bears interest at a below-market rate) must waive dividends on its equity investment in nondwelling facilities in a project where these facilities are designed to serve the needs of others than residents of the project.

*Supplemental loan program for projects financed with FHA insured mortgages*

**Section 308.** Would add a new subsection (f) to section 223 of the National Housing Act to authorize insurance of supplementary loans to finance improvements and additions to multifamily projects (including nursing homes) and group practice facilities financed with an FHA-insured mortgage. The supplementary loan could also include equipment for a nursing home or group practice facility. Supplementary loans would be limited to 90 percent of the Secretary's estimate of the value of the required improvements, additions, and equipment and to an amount which, when added to the outstanding balance of the existing mortgage, does not exceed the basic mortgage limitations of the program under which the project is financed.

**Title I—Home improvement loans—Increase in maximum maturity, finance charge, and loan amount**

**Section 309.** Would amend section 2 of title I of the National Housing Act, which authorizes insurance of property improvement loans, to increase the maximum loan limitation of \$3,500 to \$5,000 and the maximum maturity from 5 years and 32 days to 7 years and 32 days. Would also increase the maximum permissible financing charge on the first \$2500 of a loan from a discount of \$.50 to \$.55 per \$100. of the original face amount of the loan, and on that portion of the loan in excess of \$2500 the maximum finance charge would be increased from a \$.40 to a \$.45 discount.

*Experimental housing program*

**Section 310.** Would amend section 233 of the National Housing Act, the FHA experimental housing program, to make the program available for use in connection with all FHA programs. At present, section 233 is available only with respect to properties and projects meeting the requirements of one of the other sections of title II of the National Housing Act. The experimental housing program would now be authorized to be used in connection with land development projects or group practice facilities where the mortgages are insured under titles X and XI, respectively.

*Term of FHA insured mortgages for land development*

**Section 311.** Would amend section 1002(d)(1) of the National Housing Act to permit the Secretary of HUD to prescribe a maturity

longer than seven years for land development project mortgages, as is presently permitted for insured mortgages covering privately owned water and sewer systems and new communities under Title X.

*Rehabilitated multifamily projects in urban renewal areas*

**Section 312.** Would amend sections 220(d)(3)(B)(ii) and 221(d)(3)(iii) of the National Housing Act to permit FHA mortgage insurance under those sections for the purchase of multifamily properties in urban renewal areas which have been rehabilitated by a local public agency pursuant to the authority provided by the amendment to title I of the Housing Act of 1949 proposed by section 504 of the bill. Mortgages on these properties could also be insured under the new section 236 of the National Housing Act (proposed by section 201 of the bill). Under present law, FHA mortgage insurance for multifamily properties is only available in connection with projects which are either newly constructed or substantially rehabilitated subsequent to the issuance of a commitment for mortgage insurance by FHA.

*Miscellaneous housing insurance*

**Section 313.** Would make 5 technical amendments to section 223 of the National Housing Act to permit refinancing of an FHA mortgage insured under any section or title of the National Housing Act as well as insurance of an FHA mortgage assigned to the Secretary or executed in connection with a sale of an acquired property under any section or title of the Act. Under present law this authority is limited to specific sections enumerated in section 223 and must be amended each time a new section is added to the National Housing Act. It would also permit payment in cash of an insurance claim, instead of just debentures, in connection with a mortgage assigned to the Secretary or a mortgage executed in connection with the sale of an acquired property.

*Supplementary loans for cooperative housing purchased from the Federal Government*

**Section 314.** Would amend section 213(j) of the National Housing Act to authorize mortgage insurance for supplementary loans to housing cooperatives which purchased wartime housing, covered by an uninsured mortgage for part of the purchase price, from the Federal Government. The loan would be subject to the same maximum amount limitations presently applicable under section 213(j) to supplementary loans to cooperatives with FHA insured mortgages. Where the mortgage on the property is dated more than 20 years prior to the date of the commitment to insure and the loan is for major rehabilitation or modernization, as determined by the Secretary, the loan may have a maturity date not more than 10 years in excess of the remaining term on the uninsured mortgage.

*Equipment in nursing homes*

**Section 315.** Would amend section 232 of the National Housing Act to permit the cost of major items of equipment used in the operation of a nursing home to be included in the insured mortgage. Similar authority is presently provided for group practice facilities under title XI.

**TITLE IV—GUARANTEES FOR FINANCING NEW COMMUNITY LAND DEVELOPMENT**

*Short title*

**Section 401.** This title would be referred to as the "New Communities Act of 1968."

*Purpose*

**Section 402.** States that the purpose of the title would be to encourage, through enlistment of private capital, the development of new communities that (1) contribute to better living conditions through improved overall community design; (2) contribute to the sound and economic growth of the areas in which they are located; (3) provide needed additions to the general housing supply; (4) provide opportunities for innovation in technology and land use planning; (5) enlarge

housing, employment and investment opportunities; and (6) encourage a diversified local homebuilding industry.

*Guarantee*

**Section 403.** Would authorize the Secretary of Housing and Urban Development to guarantee the bonds, debentures, notes and other obligations issued by new community developers to help finance new community development projects. In making such guarantees the Secretary would take into account (1) the large initial capital investment required, (2) the extended period before initial returns can be expected, (3) the irregular pattern of cash returns characteristic of such investment, and (4) the financial interests of the United States.

*Eligible new community development*

**Section 404.** Would make a new community development project eligible for assistance only if the Secretary determines that (1) the proposed new community will be economically feasible and will contribute to the orderly development of the area of which it is a part; (2) there is a practical plan (and time schedule) for financing the land acquisition and development costs and for the improvement and marketing of the land which, giving consideration to the purposes of this Act and the special problems involved, represents an acceptable financial risk to the United States; (3) there is a sound and comprehensive internal plan for the new community that meets State and local requirements, provides for a proper balance of housing for families of low and moderate income, and provides satisfactory supporting facilities for its future residents, and (4) the internal plan is consistent with comprehensive planning for the area in which the new community is situated.

*Eligible obligations*

**Section 405.** Would require any obligation guaranteed under this Act to (1) be issued by a new community developer, other than a public body, approved by the Secretary on the basis of financial, technical and administrative ability, (2) be issued to investors approved by the Secretary or, if there is an offering to the public, be underwritten upon terms approved by the Secretary, (3) be issued to finance a program of land development (including land acquisition or use) approved by the Secretary, (4) involve a principal obligation not to exceed the lesser of (1) 80 percent of the Secretary's estimate of the value of the property upon completion of the land development or (2) the sum of 75 percent of the Secretary's estimate of the value of the land before development and 90 percent of his estimate of the actual cost of the land development, (5) bear interest at a rate satisfactory to the Secretary, (6) provide for repayment and maturity satisfactory to the Secretary, and (7) contain such provisions with respect to protection of the security interests of the United States as the Secretary may prescribe.

With respect to a single new community development project the outstanding principal obligations guaranteed could not exceed \$50,000,000.

*Fees and charges*

**Section 406.** Would authorize the Secretary to establish guarantee fees and to make such other charges as he considers reasonable. The Secretary would be required to make a report to Congress on or before January 1, 1970, giving an estimate of the charges and fees which would be required for a self-supporting program.

*Guarantee fund*

**Section 407.** Would authorize the Secretary to establish a revolving fund to consist of (1) all guarantee fees and other charges, (2) all recoveries and other receipts obtained in connection with guarantees, and (3) such appropriations, which are here authorized, as may be required for program operations and non-administrative expenses and to make all payments under these guarantees. The

credit of the United States would be pledged to the payment of all guarantees. The Secretary could pursue to final collection or compromise any security, subrogation or other rights obtained under this Act; and expenses incurred in acquiring and disposing of property thus obtained may be paid out of the guarantee fund. The aggregate of outstanding principal obligations guaranteed under the title would at no time exceed \$500 million.

#### *Incontestability*

**Section 408.** Would make any guarantee by the Secretary conclusive evidence of the eligibility of the obligations for such guarantee. The validity of any guarantee would be incontestable in the hands of a qualified holder of the guaranteed obligation except for fraud or material misrepresentation on the part of such holder.

#### *Encouragement of small builders*

**Section 409.** Would require the Secretary to adopt requirements that will encourage the maintenance of a diversified local home-building industry, and broad participation by builders, particularly small builders.

#### *Labor*

**Section 410.** Would require payment of prevailing wage rates (as determined by the Secretary of Labor in accordance with the Davis-Bacon Act) to laborers and mechanics employed in land development assisted under section 403. The Secretary of Housing and Urban Development would be required to obtain adequate assurance, before extending such assistance, that the prevailing wage requirements will be met. It also specifies that the powers given the Secretary of Labor under Reorganization Plan No. 14 to coordinate the enforcement of prevailing wage provisions and the powers given him under the Davis-Bacon Act (40 U.S.C. 276c) to issue regulations will apply.

#### *Real property taxation*

**Section 411.** Would make any real property acquired by the Secretary by lien or subrogation rights subject to real property taxation to the same extent, according to its value, as other real property is taxed.

#### *Supplementary grants*

**Section 412.** Would authorize the Secretary to make supplementary grants to States and local public bodies carrying out "new community assistance projects" if the Secretary determines such grants are necessary or desirable for carrying out an approved new community development project.

"New community assistance projects" would be projects assisted by grants under the basic water and sewer program and the open space land program of the Department of Housing and Urban Development and under the water and waste disposal facilities program of the Farmers' Home Administration. Supplementary grants would be limited to 20 percent of the cost of such projects and, in determining such cost, the Secretary would accept certifications from the Department of Agriculture as to the cost of the projects assisted by the Farmers' Home Administration. In no event could the total Federal grants for a project exceed 80 percent of its cost.

Appropriations would be authorized for these supplementary grants, to be available until expended.

#### *General provisions and rules and regulations*

**Section 413.** Would vest in the Secretary (1) the authority to issue rules and regulations and (2) other powers and duties set forth in section 402 (except subsection (c) (2) and (f) which are not relevant and (d) which is duplicatory) of the Housing Act of 1950. These are administrative powers and duties customarily provided for in connection with Federal programs. A corporate budget would be provided for under this section except that supplementary grants under section 412 would be accounted for separately.

#### *Definitions*

**Section 414.** Would define the term "land development", to mean the process of grading land, making, installing, or constructing water lines and water supply installations, sewer lines and sewage disposal installations, steam, gas and electric lines and installations, roads, streets, curbs, gutters, sidewalks, storm drainage facilities, and other installations or work, whether on or off the site, which the Secretary deems necessary or desirable to prepare land for residential, commercial, industrial or other uses, or to provide facilities for public or common use. The term would not include any building unless it is (1) a building which is needed in connection with a water supply or sewage disposal installation or a steam, gas, or electric line or installation, or (2) a building, other than a school, which is to be owned and maintained jointly by the residents of the new community or is to be transferred to public ownership after completion.

The term "actual costs" would be defined to mean the costs (exclusive of rebates or discounts) incurred by a new community developer in carrying out the land development assisted under this Act. These costs may include amounts paid for labor, materials, construction contracts, land planning, engineers' and architects' fees, surveys, taxes and interest during development, organizational and legal expenses, such allocation of general overhead expenses as are acceptable to the Secretary, and other items of expense incidental to development which may be approved by the Secretary. If the Secretary determines that there is an identity of interest between the new community developer and the contractor, there may be included an allowance for the contractor's profit in an amount deemed reasonable by the Secretary.

The term "new community assistance projects" would be defined to mean projects assisted under section 702 of the Housing and Urban Development Act of 1965 (basic water and sewer grant program), under section 306(a) (2) of the Consolidated Farmers' Home Administration Act (water and waste disposal facilities grant program), or title VII of the Housing Act of 1961 (open space land program).

#### *Conforming amendments*

**Section 415.** These changes in existing law would—

(1) amend section 202(b) (4) of the Housing Amendments of 1955 so that the population limit (50,000) applicable to the political jurisdiction eligible to receive public facility loans under the 1955 law would be waived in the case of public facilities serving new communities (aided under this title) within jurisdictions (such as counties) whose total population would otherwise make them ineligible to receive such loans.

(2) amend section 24 of the Federal Reserve Act so as to authorize national banks to invest in obligations guaranteed under title III.

(3) amend section 5(c) of the Home Owners Loan Act of 1933 to authorize Federal savings and loan associations to invest in obligations guaranteed under title III.

#### *TITLE V—URBAN RENEWAL*

##### *Neighborhood development programs*

**Section 501.** Would add a new Part B to title I of the Housing Act of 1949. This Part would authorize the Secretary of HUD to provide financial assistance to local public agencies to assist them in carrying out neighborhood development programs. A neighborhood development program would consist of urban renewal project undertakings and activities in one or more urban renewal areas that are planned and carried out on the basis of annual increments. The requirements governing these undertakings and activities would be similar to those governing the provision of Federal financial assistance for regular urban renewal projects now provided for under Title I.

The major differences would be that the contract for loan or capital grant for the annual increment of a program could cover activities in several contiguous or non-contiguous urban renewal areas, and the funding would be based on the amount of loan and grant funds needed to carry out the activities planned during a 12-month period in each of the urban renewal areas contained in a community's program. There would be no obligation on the part of HUD to fund beyond the immediate 12-month period for which it has entered into a contract, but, if funds were available and a community's program was acceptable to the Secretary, it is anticipated that a community would receive financial assistance based on its needs for subsequent annual increments of its program. Although there would be a computation of project cost at the end of each 12-month period, financial settlement at the end of the period may not be possible because of the inability in that period to dispose of all the land acquired during the year or to complete or place under contract all public improvements planned for that year. In such cases, any loans outstanding would be continued until all monies due to be received under the contract for that year were received, or, in the alternative, the carried over financial items may be merged with the financing for a subsequent increment.

If in any annual period proceeds from land sold by the local public agency and land retained by it for use in accord with the urban renewal plan exceed the total project cost for that period, the local public agency would be required to pay to the Secretary  $\frac{2}{3}$ 's of the excess or  $\frac{3}{4}$ 's (in the case of a program on a  $\frac{1}{4}$  grant basis) and the Secretary would be empowered to use this amount to make grant payments under title I.

Local grants-in-aid would generally be calculated as they are under the present urban renewal program. However, the determination of their eligibility would be based on whether their construction started no more than 3 years (under section 110(d)) prior to the authorization by the Secretary of the first contract for financial assistance under a community's program which includes the urban renewal area which is benefited by the public improvement or facility for which credit is claimed; or seven years (under section 112(b)) prior to the date of authorization by the Secretary of the first contract for financial assistance under the program which includes the urban renewal area which is benefited by the expenditures for which credit is claimed. A noncash grant-in-aid would only be eligible for inclusion in computing the gross project cost of a program for any 12 month period, if its construction had commenced and only to the extent of the amount actually expended or obligated by contract.

In addition, there would be a provision to prevent pooling of excess noncash grant-in-aid credits from a neighborhood development program with other urban renewal projects being carried out by a community. However, any excess grant-in-aid credit from regular urban renewal projects could be pooled for the benefit of a neighborhood development program. Also noncash credits which are in excess of what is needed for any annual increment would be available to be applied toward the local share of the cost of subsequent annual increments.

As under regular urban renewal projects, a workable program would have to be in existence (at the date of authorization of any annual increment), relocation requirements would apply to each annual increment, and the local approval and public hearing requirements would have to be met. Since planning and project execution activities in most cases would be taking place simultaneously, especially in the early years of a program, the Secretary would be authorized to permit the urban renewal plan

to cover one or more of the urban renewal areas embraced by a program and to allow the plan to meet such requirements as to scope and content as he deems appropriate, taking into consideration the degree of detail needed in the plan to properly and expeditiously carry out the activities and undertakings proposed in any annual increment.

#### *Increased authorization*

**Section 502.** Would amend section 103(b) of the Housing Act of 1949 to increase the amount of funds available for urban renewal and other activities under title I of that Act by \$1,400,000,000 on July 1, 1969. Would also amend this section to increase the amount of funds available for urban renewal projects in model cities areas by \$350 million.

#### *Rehabilitation grants*

**Section 503.** Would amend section 115(b) of the Housing Act of 1949 to increase the rehabilitation grant that can be made to low-income homeowners from \$1,500 to \$2,500. It also makes a technical amendment to section 115(a) to authorize the payment of funds to otherwise qualified recipients for rehabilitation work on their "real property" used for dwelling purposes. At present assistance is limited solely to their dwelling structures, not including unsafe walks, or driveways, or fences or other related structures.

#### *Rehabilitation in urban renewal areas*

**Section 504.** Would amend section 110(c) (8) of the Housing Act of 1949 to remove the present limitation on the acquisition and rehabilitation of residential properties by a local urban renewal agency. (Present law permits the local agency to acquire and rehabilitate for demonstration purposes no more than 100 units or 5 percent of the total residential units in the urban renewal area, whichever is lesser).

#### *Disposition of property for low and moderate income housing*

**Section 505.** Would amend section 107(a) of the Housing Act of 1949 to permit land to be disposed of for both low and moderate income housing purposes and to permit this disposition to be done by lease as well as by sale. Would also permit housing to be sold to a mortgagor qualified under the new FHA 236 program (proposed to be added by section 201 of the bill) and to nonprofit organizations under the new FHA 235(j) (1) program (proposed to be added by section 101 of the bill) which will rehabilitate the property and sell it to low or moderate income persons.

#### *Capital grants for low and moderate income housing open land projects*

**Section 506.** Would amend section 103(a) (1) of the Housing Act of 1949 to permit capital grants to be made with respect to urban renewal open land projects (which now only qualify for loans) in an amount not to exceed two-thirds of the difference between the proceeds from any land disposed at its value for low or moderate income housing (under section 107 of such Act) and the proceeds which would have been realized if the land had been disposed of at its fair value without regard to the special provisions of section 107.

#### *Urban renewal loan contracts*

**Section 507.** Would amend section 102(c) of the Housing Act of 1949 to permit a local public agency to borrow funds to finance project undertakings on the private market at an interest rate in excess of the Federal lending rate set out in its loan contract with the Government. The full difference between the interest cost on the private market and the interest cost at which the local public agency could have borrowed from the Federal Government under its loan contract would be made up by a supplemental grant from the Government. A local public agency following this procedure, and thereby amending its loan contract for this purpose, would not be governed by the provisions of section

110(g) of such Act which require all loan contracts (originally executed prior to September 2, 1964) on their first amendment after that date to have incorporated in them a provisions for periodic revision of the Federal lending rate.

#### *Project close-out with small parcels of land remaining*

**Section 508.** Would amend section 106 of the Housing Act of 1949 to add a new subsection (1) which would permit the Secretary of HUD to allow an urban renewal project to be closed out where (1) not more than 5 percent of the total acquired land remains to be disposed of, (2) the local public agency does not expect to be able, due to circumstances beyond its control, to dispose of that land in the near future, (3) all other project activities are completed, and (4) the local public agency has agreed to dispose of or retain such land in the future for uses in accordance with the urban renewal plan. Would also amend section 110(f) of that Act to include in the amount of land proceeds, for the purposes of computing net project cost, an amount equal to the value of this land not yet disposed of.

#### *Rehabilitation loans*

**Section 509.** Would amend section 312 of the Housing Act of 1964 to provide such appropriations in each fiscal year as may be necessary to make rehabilitation loans (presently limited to \$100 million a year) and to extend the program from its present expiration date of October 1, 1969 to June 30, 1973.

### TITLE VI—URBAN PLANNING AND FACILITIES

#### *Comprehensive planning*

**Section 601.** Would rewrite section 701 of the Housing Act of 1954 (urban planning assistance). The principal change would authorize the Secretary of HUD to make planning grants to State planning agencies for assistance to district planning agencies for rural and other nonmetropolitan areas. A grant authorization of \$20 million would be provided for such planning grants in fiscal year 1969, and the Secretary of Agriculture would be given certain functions with respect to planning grants for districts, including a requirement that he be consulted before any such grant is made.

For fiscal year 1969 there would be a further increase of \$15,000,000 in the amount of funds that could be appropriated. For fiscal year 1970 and each subsequent fiscal year there would be authorized to be appropriated such amounts as are necessary with \$10,000,000 a year available solely for district planning. The section would also authorize the use of an additional \$10,000,000 from available grant funds for study, research, and demonstration projects covering such matters as the planning for entire systems of public facilities and services within metropolitan areas and other multijurisdictional regions.

Other changes would authorize the Secretary to make planning grants directly to tribal planning councils or other bodies for planning on Indian reservations and would require that metropolitan, regional, and district planning agencies, to the greatest extent practical, be composed of or responsible to elected officials of local governments. The rewritten section would also authorize grants under section 701(g) for regional and district councils of government, as well as those organized on a metropolitan basis, and would broaden the definition of comprehensive planning to include planning for the provision of governmental services and for the development and utilization of human and natural resources. However, comprehensive district planning could not include planning aimed at encouraging businesses to relocate from another area into the district.

Additional changes would authorize planning grants to official governmental planning

agencies for areas where rapid urbanization is expected to result on land developed or to be developed as a new community approved under the provisions of title IV of the bill, and would permit three-quarters grants for economic development districts designated under the Public Works and Economic Development Act of 1965

#### *Planned areawide development*

**Section 602.** Would amend title II of the Demonstration Cities and Metropolitan Development Act of 1966 by changing the heading of the title to "Planned Areawide Development" and, in keeping with this change in title, would amend the sections and subsections thereto to permit supplementary incentive grants authorized for certain federally assisted projects in metropolitan areas to be made for such projects being carried out in any multijurisdictional area, such as the rural planning districts that are recognized by the amendments in section 601 of the bill. Section 206(b) of the 1966 act is also amended to make available for appropriations for grants for areawide development any of the funds authorized for fiscal years 1967 and 1968, which have not been appropriated, through fiscal year 1970.

#### *Advance acquisition of land*

**Section 603.** Would rewrite section 704 of the Housing and Urban Development Act of 1965 to:

(1) change the definition of eligible land from "land planned to be utilized in connection with the future construction of public works or facilities" to "land planned to be utilized in the future for public purposes";

(2) replace the requirement that the proposed use be undertaken within five years with a requirement that it be undertaken within a reasonable time;

(3) clarify the status of the land in the interim between acquisition and utilization for the approved purpose;

(4) permit the Secretary to approve the diversion of the land to another public purpose which is in accord with the then applicable comprehensive plan and give him discretion to require repayment of the grant or the substitution of land of equivalent value when the land is diverted to a non-public purpose;

(5) provide that assistance under this section will not render a project ineligible for other Federal assistance programs and that the cost of land acquired with this assistance will not be an ineligible project cost in such other programs;

(6) provide for grant assistance for imputed interest charges when an applicant uses other than borrowed funds to finance the acquisition of the land; and

(7) clarify the authority of States to participate in the program.

#### *Extension of interim planning requirements in water and sewer facilities program*

**Section 604.** Would extend the expiration date of the interim planning requirements provision in the basic water and sewer facilities program from July 1, 1968 to October 1, 1969.

#### *Authorizations for the water and sewer facilities, neighborhood facilities, and advanced acquisition of land programs*

**Section 605.** Would amend section 708(b) of the Housing and Urban Development Act of 1965 to provide that any of the funds authorized for these programs, that have not been appropriated, will remain available for appropriation through fiscal year 1970.

#### *Open-space land program*

**Section 606.** Would amend section 702(b) of the Housing Act of 1961 to convert the funding provision for grants under the Open-Space Land Program from the present authority to enter into contracts not in excess of \$310,000,000 to a regular authorization for appropriations not in excess of \$310,000,000

prior to July 1, 1969. For fiscal year 1970 and subsequent fiscal years there would be authorized to be appropriated such amounts as are necessary. With these changes the sublimitations on grants for beautification and the acquisition of developed land in built-up portions of urban areas would be removed. Also section 708(b) of such Act would be amended to increase from \$50,000 to \$125,000 the amount of grant funds that may be used during any fiscal year for studies and the publishing of information.

*Authorize the making of feasibility studies in the public works planning advances program*

Section 607. Would clarify the authority of the Secretary under section 702 of the Housing Act of 1954 to make advances for the conduct of feasibility studies respecting specific public works, the planning of which may be assisted under section 702.

#### TITLE VII—URBAN MASS TRANSPORTATION Grant authorization

Section 701. Would amend section 4(b) of the Urban Mass Transportation Act of 1964 to increase the amount of funds authorized to be appropriated for the various activities under that Act by \$190,000,000 for fiscal year 1970. The amount of funds which may be used for research, development and demonstration projects, under section 6 of that Act, commencing July 1, 1968, would be increased by \$6,000,000. On or after July 1, 1969, the Secretary would be authorized to use such sums for this purpose, out of the funds available under the program, as he deems appropriate.

#### Definition of mass transportation

Section 702. Would broaden the statutory definition of "mass transportation" in section 12(c)(5) of the Urban Mass Transportation Act of 1964 to allow greater flexibility, scope, and opportunity for innovation, development, and application of new concepts and systems. The existing definition of "mass transportation" requires that such transportation serve the "general public" and operate "over prescribed routes." Both of these requirements would be eliminated. There would be substituted a requirement that the transportation provide to the public general or special service (excluding school buses or sightseeing or charter service) on a regular and continuing basis.

#### Extension of emergency program under the Urban Mass Transportation Act

Section 703. Would amend section 5 of the Urban Mass Transportation Act of 1964 to extend from November 1, 1968, to October 1, 1969, the emergency capital grant program.

#### TITLE VIII—SECONDARY MORTGAGE MARKET

This title would make changes in the statutes affecting the Federal National Mortgage Association and its functions in the secondary mortgage market. The principal change would be the fulfillment of the purpose of Congress fourteen years ago, as stated in section 303(g) of the Federal National Mortgage Association Charter Act, "to transfer to the owners of the outstanding common stock of the Association the assets and liabilities of the Association in connection with, and the control and management of, the secondary market operations of the Association under section 304 of this title in order that such operations may thereafter be carried out by a privately financed corporation." Other amendments, principally, would give the privately-owned corporation needed new methods of financing its existing portfolio of mortgages and its future operations.

#### Purposes

Section 801. States as the purposes of the title the partition of FNMA as heretofore existing into two separate corporations, one of which will be a Government-sponsored private corporation to operate the second-

ary market operations, and the other of which will remain in the Government and continue to operate the special assistance functions and management and liquidating functions.

#### Amendments to the FNMA Charter Act

Section 802. Would make a number of amendments to the FNMA Charter Act to achieve the purpose stated in section 801. The changes to be made by each subsection are set out below. References to section numbers, unless expressly stated otherwise, are to sections of the FNMA Charter Act (title III of the National Housing Act).

Subsection (a). Would amend the heading to title III of the National Housing Act to make it descriptive of that title as it would be amended by this bill.

Subsection (b). Would amend section 301 to bring up to date the statements in that section describing the purposes of the FNMA Charter Act.

Subsection (c). Would provide that, on an effective date to be established as provided in section 807 of the bill, the existing Federal National Mortgage Association is partitioned into two separate corporations. The corporation to remain in the Government and operate the special assistance functions and management and liquidating functions would be known as Government National Mortgage Association (GNMA). The corporation which will become entirely privately owned and which will operate the secondary market operations, will be known as Federal National Mortgage Association (FNMA).

Subsection (d). Would amend section 302(b) so that the powers stated therein would be applicable to both corporations. The present restrictions against buying mortgages at a price in excess of par and against buying mortgages offered by, or covering property held by, State and local instrumentalities would be applicable only to GNMA. The purchase authority of FNMA would be extended to include securities guaranteed by GNMA under section 306(g).

Subsection (e). Technical.

Subsection (f). Technical.

Subsection (g). Technical.

Subsection (h). Would amend the heading of section 303 to emphasize the fact that the capitalization provisions therein would be applicable only to FNMA.

Subsection (i). Would:

(1) change the common stock from non-voting to voting and from \$100 par value to no par value;

(2) clarify the free transferability of the common stock;

(3) repeal the provision for retirement of the common stock at par;

(4) delete the restriction that payments to retire the preferred stock must come entirely out of capital surplus and general surplus accounts; and

(5) provide that the preferred stock shall be retired as rapidly as possible after the effective date of these amendments.

Subsection (j). Would provide that fees and charges imposed by FNMA in the secondary market operations could be regarded as elements of pricing, so that they would not necessarily be considered fees for services.

Subsection (k). Would allow FNMA to issue common stock in addition to that now required to be issued in connection with FNMA's purchasing and lending activities. It would also require each servicer of mortgages for FNMA to own at all times a minimum amount of FNMA common stock. This minimum amount, measured by the stock's stated value, would be not less than 2 percent nor more than 4 percent of the outstanding principal balances of all mortgages owned by FNMA and serviced by the servicer, but this requirement would not apply to mortgages purchased by FNMA before the effective date of these amendments. It would also strike out the provision limiting the

return on the common stock to 5 percent of its par value and insert a provision providing that cash dividends shall not exceed a rate determined by the Secretary of Housing and Urban Development to be a fair rate of return.

Subsection (l). Would prohibit issuance of any preferred stock after the effective date of these amendments.

Subsection (m). Technical.

Subsection (n). Would change the heading of section 304 to emphasize the fact that the secondary market operations provisions therein would apply only to FNMA.

Subsection (o). Would strike out an obsolete restriction which prohibits FNMA from purchasing any mortgage insured or guaranteed prior to August 2, 1954.

Subsection (p). Would amend the provision limiting the amount of secondary market operations obligations outstanding at any one time to 15 times the sum of its capital, surplus, and reserves, by inserting a provision which would allow the Secretary of HUD to fix FNMA's debt-to-capital ratio at a higher figure.

Subsection (q). Would strike out the provision in section 304(c) which would prohibit FNMA's borrowing from the Treasury after retirement of the preferred stock.

Subsection (r). Technical.

Subsection (s). Would amend the heading to section 305 to emphasize the fact that the special assistance functions provisions therein would apply only to GNMA.

Subsection (t). Would amend the heading to section 306 to emphasize the fact that the management and liquidating functions provisions therein would apply only to GNMA.

Subsection (u). Technical.

Subsection (v). Technical.

Subsection (w). Technical.

Subsection (x). Would eliminate the present board of directors and vest all the powers and duties of GNMA in the Secretary of HUD, and would make provisions for a board of directors for FNMA. Subject to the temporary provisions of section 809(b) of the bill, the FNMA board would consist of from nine to fifteen members, one-third of whom would be appointed by the Secretary and the remainder of whom would be elected by the stockholders. The appointments and elections would be for one-year terms only. The Secretary would be required to appoint, as members of the board, one person from the home building industry and one person from the real estate industry.

Subsection (y). Would make the existing general corporate powers set forth in section 309(a) applicable to both corporations.

Subsection (z). Would amend section 309(c) so that GNMA would retain its tax exemptions. It would strike out the present provision requiring the payment of a Federal income tax "equivalent" under the secondary market operations and would make FNMA subject to all Federal taxes. FNMA would be exempt from other taxes, except for real property taxes.

Subsection (aa). Would give the board of directors of FNMA the power to appoint and employ officers and employees without regard to civil service laws, but each person who is employed during the transitional period and is subject to the civil service retirement law immediately prior to his employment would continue to be subject to that law for so long as his employment by FNMA continues without a break in continuity of service. FNMA would pay into the Civil Service Retirement and Disability Fund the amount determined by the Civil Service Commission to be the amount required, in addition to employee deductions, to cover the total costs of the retirement system attributable to its employees. In addition, FNMA would pay to the Fund each year the amount estimated by the Civil Service Commission to be the cost of administration of the Fund attributable to its employees. The maximum amount of basic pay of any individual

counted for retirement purposes would be the amount specified for Level I of the Executive Schedule (now \$35,000).

*Subsection (bb).* Would amend section 309(e) so that its prohibition against use by others of FNMA's name would apply as well to GNMA. In addition it would repeal the criminal sanctions for violations and substitute in lieu thereof civil penalties.

*Subsection (cc).* Would amend section 309(g) so that the authority to use the Federal Reserve banks as depositories, custodians, and fiscal agents would apply to both corporations. It would also reword the provision to remove any question concerning the authority of Federal Reserve banks to serve these corporations while they are acting in a fiduciary capacity. It would also confirm the authority of both corporations to receive deposit payments and act as a depository for others.

*Subsection (dd).* Would provide regulatory authority over FNMA to the Secretary of HUD, to make rules and regulations to insure that the purposes of the FNMA Charter Act are accomplished and to require that a reasonable portion of FNMA's mortgage purchases be related to housing for low and moderate income families (but with reasonable economic return to the corporation). No stock or obligations could be issued without the Secretary's approval, and the Secretary could examine and audit FNMA's books and financial transactions and require reports on its activities.

*Subsection (ee).* Would amend section 311 so that the provisions therein making the obligations of the Association lawful investments would apply to the obligations of both corporations. It would also exempt all stocks, obligations, securities, and other instruments issued by both corporations from regulation by the Securities and Exchange Commission, but would require that such issuances be made only with the approval of the Secretary of HUD.

#### *Participations*

*Section 803.* Would permit GNMA, as a trustee under trusts created for sales of participation certificates, to issue such certificates for refinancing purposes without regard to the requirement of appropriation Act authority, thereby permitting increased flexibility in management of the trusts. Under the amendment, any appropriation for insufficiencies accompanying the original authorization would apply as well to any rollover sale as to the original sale.

#### *Mortgage-backed securities*

*Section 804.* Would amend section 304 of the FNMA Charter Act to allow FNMA to issue and sell securities backed by a set-aside portion of its portfolio of mortgages. It would also amend section 306 of the FNMA Charter Act to allow GNMA to guarantee the payment of principal and interest on any such securities issued by FNMA. GNMA could also guarantee similar securities issued by other private issuers approved by it for this purpose, so long as the securities are backed by mortgages or loans guaranteed or insured by FHA or the Veterans' Administration, or by the Farmers' Home Administration under title V of the Housing Act of 1949, and set aside or subjected to a trust in a manner similar to that established by FNMA under section 304. GNMA would be authorized to collect a reasonable guaranty fee and other charges. In the event of the necessity of any payment under the guaranty, GNMA would become subrogated to the rights satisfied by the payment.

#### *Subordinated and convertible obligations*

*Section 805.* Would amend section 304 of the FNMA Charter Act to allow FNMA to issue obligations which are subordinated in any manner set forth therein and could also be convertible into common stock as set forth therein. The total amount of such

subordinated obligations outstanding at any one time could not exceed twice the capital and surplus of FNMA, and the amount outstanding at any one time could be considered to be a part of the capital of the corporation for determining the total amount of secondary market operations general obligations which could be outstanding at any one time.

#### *Amendments to other laws*

*Section 806.* Would make numerous changes in other laws necessitated by the separation of functions as set forth in section 802 of the bill.

#### *Effective date*

*Section 807.* Would make the amendments in this title effective from and after a date to be determined by the Secretary of HUD, but within 120 days after enactment of the bill.

#### *Savings provisions*

*Section 808.* Would preserve causes of action and legal proceedings existing or instituted by or against FNMA prior to the effective date of these amendments so that they will not abate.

#### *Transitional provisions*

*Section 809.* Would make certain transitional provisions regarding the capital stock of FNMA and would provide for the board of directors during a transitional period, which would end at such time as one-third of the common stock is owned by persons or institutions in the mortgage lending, home building, real estate or related businesses, but not sooner than May 1, 1970, nor later than May 1, 1973. During this period, the board would consist of 9 members. The Secretary of HUD would appoint all members for the first year. For the second year, he would appoint 7 members, and the stockholders would elect 2. For the remainder of the period, he would appoint 5 members, and the stockholders would elect 4. It would also provide that FNMA would be considered to be a wholly owned corporation for the purposes of the Government Corporation Control Act until the last share of preferred stock is retired. It would also provide that the officers and employees of the present FNMA immediately prior to the effective date shall become officers and employees of GNMA on that date, that FNMA and GNMA shall provide for the conditions and methods whereby FNMA could hire GNMA's employees, that the two corporations may provide by contract for the operation by either of such corporations of any of the functions of the other, and that the Secretary of HUD shall make every reasonable effort to place those GNMA employees who are neither employed by FNMA nor retained by GNMA.

#### *TITLE IX—NATIONAL HOUSING PARTNERSHIPS*

##### *Statement of purpose*

*Section 901.* Would state that the volume of housing being produced for families of low or moderate income must be increased, and that there should be created one or more private organizations to encourage maximum participation by private investors in programs and projects to provide low and moderate income housing.

##### *Creation of corporations*

*Section 902.* Would authorize the creation of private corporations for profit, which will not be government agencies, organized under this title and the District of Columbia Business Corporation Act. One such corporation is to be created initially (called the "Corporation"), with the President authorized to cause the creation of additional corporations (and additional partnerships described under section 907) when he determines it to be in the national interest. This section makes it clear that others may create organizations for the purposes set forth in this title for national partnerships.

#### *Process of organization*

*Section 903.* Would authorize the President to appoint incorporators, by and with the advice and consent of the Senate, who shall take any actions necessary to establish the Corporation. The incorporators would serve as the initial board of directors and would arrange for the initial offering of shares of stock in the Corporation and of interests in the national partnership to be formed pursuant to this title.

#### *Directors*

*Section 904.* Would provide that the Corporation shall have a fifteen member Board of Directors, twelve to be elected by the stockholders, and three to be appointed for three-year terms by the President by and with the advice and consent of the Senate. Of the first three directors appointed by the President, one would be appointed to serve a term of one year, the second to serve a term of two years, and the third a full three-year term.

#### *Financing the Corporation*

*Section 905.* Would authorize the Corporation to issue the number of shares specified in its articles of incorporation, which may be divided into one or more classes, have par value or be without par value, and have the preferences, voting powers, rights and limitations specified in the articles of incorporation.

#### *Purposes and powers of the Corporation*

*Section 906.* Would authorize the Corporation to engage in activities appropriate to the provision of housing and related facilities primarily for families and individuals of low or moderate income, with or without the use of Federal programs. These would include the building, rehabilitation, purchase, leasing, ownership, and management of housing and related facilities, and the provision of funds in connection with such undertakings by the Corporation. The Corporation would also be authorized to enter into all forms of partnerships and associations, act as general partner in such partnerships and associations, conduct research and study projects in the housing field, provide technical assistance to other organizations with respect to the provision of low and moderate income housing, and provide financial assistance to other organizations in connection with the Corporation's low and moderate income housing activities.

#### *National housing partnership*

*Section 907.* Would authorize the Corporation to form, as a separate organization, a limited partnership (called the "Partnership") under the District of Columbia Uniform Limited Partnership Act, in which the Corporation would be the general partner and each of the stockholders of the Corporation and others would be permitted to become limited partners. The capital of the Partnership and the contributions of the partners would be specified in the Partnership Agreement. The Partnership would be authorized to engage in the same activities as those authorized for the Corporation, and would enter into partnerships, limited partnerships, and joint ventures organized under State or local law for the purpose of engaging in low and moderate income housing undertakings in particular localities. Its participation in such undertakings would be designed to encourage participation by local interests, and the Partnership's investment could not exceed 25 percent of the aggregate initial equity investment for the project, except where the balance required is not readily obtainable from investors in the local community.

This section states that the Partnership shall be deemed to have the legal status of a limited partnership, notwithstanding any inconsistency between the provisions of this title and the provisions of the District of Columbia Uniform Limited Partnership Act and the District of Columbia Uniform

Partnership Act, or of any other law. It also provides that a corporation which is one of the limited partners of the Partnership shall not become liable as a general partner by reason of the fact that it holds the Corporation's voting shares, not over 5 percent, or that an officer or director of such corporation is a director of the Corporation. Nor will the interests of a limited partner in the Partnership be treated as a stock interest in the Corporation, even though such interest may be proportionate to his stock interest in the Corporation.

#### *Report to Congress and records*

**Section 908.** Would require the Corporation to submit annual reports to the President for transmittal to the Congress and to have its accounts audited annually.

#### *Antitrust laws*

**Section 909.** Would make it clear that the activities of the Corporation, the Partnership, and of the persons participating in partnerships and ventures with them shall be subject to the Federal antitrust laws.

#### *Right to repeal, alter or amend*

**Section 910.** Would reserve the right to repeal, alter, or amend this title.

#### *Amendment to banking laws*

**Section 911.** Would amend section 24 of the National Bank Act so as to permit national banks to invest in the Corporation and in a partnership, limited partnership, or joint venture formed pursuant to this title.

#### **TITLE X—RURAL HOUSING**

##### *Housing for low and moderate income persons and families*

**Section 1001.** Would amend Title V of the Housing Act of 1949 by adding a new section 521 authorizing direct and insured loans in rural areas (places not exceeding 5,500 population) to low and moderate income persons and families and to provide rental or co-operative housing for such persons and families, where assistance is not available under sections 235 and 236 of the National Housing Act (added by sections 101 and 201 of the bill). Interest will be at a rate which will be set by the Secretary of Agriculture after considering the cost of money to the Treasury and the payment ability of the applicants. The interest rate may not in any event be less than 1 percent per annum. An interest supplement necessary to market the insured loans will be paid from, and reimbursed by annual appropriations to, the Rural Housing Insurance Fund. Eligibility for these loans will be broadened to include persons not previously residing in rural areas. This provision regarding nonrural residents will be administered so as to restrict it to persons of low or moderate income who are employed in rural areas.

##### *Housing for rural trainees*

**Section 1002.** Would authorize financial and technical assistance to provide, in rural areas, housing and related facilities for rural trainees (and their families) enrolled in federally assisted training courses to improve their employment capability. The Secretary of Agriculture could use this authority only after he determined that such housing and facilities could not be reasonably provided in any other way. The Secretary would be required to first consult with the Secretaries of Labor, HEW, and HUD and the Director of the Office of Economic Opportunity before providing this assistance. Training and housing sites would be selected only after consideration of a labor area survey and full coordination among all Federal, State, and local government agencies administering related programs. Related facilities would include, in addition to other service facilities, rooms and buildings for training purposes. Advances for land purchase would be repayable within periods not longer than 33 years and will bear interest. Other advances would be nonrepayable, or repayable with or with-

out interest, depending on the applicant's payment ability, from project net income and any other available sources. Any interest charged on advances will be at a rate prescribed by the Secretary of Agriculture after considering the cost of money to the Treasury and the payment ability of the applicants. In no event would the rate be less than 1 percent per annum.

#### *Appropriations*

**Section 1003.** Since necessary authority under sections 235 and 236 of the National Housing Act (added by sections 101 and 201 of the bill) will be assigned to the Secretary of Agriculture as he and the Secretary of HUD agree, this section would authorize appropriations to the Secretary of Agriculture for the cost of such administration.

#### *Purchase of land for building sites*

**Section 1004.** Would broaden the eligible purposes of domestic farm labor housing loans to include the purchase of necessary land for building sites.

#### **TITLE XI—MISCELLANEOUS**

##### *Model cities*

**Section 1101.** Would amend section 111(b) of the Demonstration Cities and Metropolitan Development Act of 1966 to increase the funds authorized to be appropriated for supplemental grants and for other purposes by \$1,000,000,000 for each of the fiscal years 1970 and 1971. Would also provide that any amounts authorized in any fiscal year but not appropriated may be appropriated for any succeeding fiscal year commencing prior to July 1, 1971.

##### *Urban renewal demonstration grant program*

**Section 1102.** Would amend section 314 of the Housing Act of 1954 to permit grants for developing, testing, and reporting methods and techniques, and carrying out demonstrations and other activities, for the prevention and the elimination of slums and urban blight to be made to anyone, not just to public bodies. The amount of the grant could cover up to the full cost of the undertaking, instead of the present limitation to two-thirds of the cost of the demonstration plus the full cost of writing and publishing the report. The amount of funds available to the program would be increased from \$10 million to \$20 million.

##### *Authorization for urban information and technical assistance services program*

**Section 1103.** Would amend section 906 of the Demonstration Cities and Metropolitan Development Act of 1966 to authorize appropriation of such funds as are necessary to carry out the purposes of title IX of the 1966 Act. Would also provide that once funds are appropriated they shall remain available until expended.

##### *Advances in technology in housing and urban development*

**Section 1104.** Would amend section 1010 of the Demonstration Cities and Metropolitan Development Act of 1966 to authorize the appropriation of such amounts as may be necessary commencing with fiscal year 1969, and would also permit research contracts to be entered into for periods of up to four years, instead of the present authorized two-year period.

##### *Interest rate on college housing loans*

**Section 1105.** Would amend sections 401(c) and 401(e) of the Housing Act of 1950 to (1) establish a new lending rate for college housing loans based on the current average market yield for obligations of the United States with remaining periods to maturity comparable to the average maturities of college housing loans, less such a rate, not to exceed 1 per cent per annum, as the Secretary of HUD may determine, and (2) establish a new rate of interest on the funds for the program borrowed from the Treasury based on the same determination as the lending rate without any optional decrease.

#### *Federal-State training programs*

**Section 1106.** Would amend sections 801 and 802 of title VIII of the Housing Act of 1964 to expand the program to permit grants to States for the training of subprofessional (as well as professional persons) who will be employed by nonprofit organizations (as well as public organizations) in the field of housing and community development.

Section 805 of such Act would also be amended to make Guam, American Samoa, and the Trust Territory of the Pacific Islands eligible for grants under the program.

#### *Additional Assistant Secretary of HUD*

**Section 1107.** Would amend the first sentence of section 4(a) of the Department of Housing and Urban Development Act and paragraph (87) of section 5315 of title 5, United States Code, to increase the number of Assistant Secretaries for the Department from four to five.

#### *International housing*

**Section 1108.** Would rewrite section 604 of the Housing Act of 1957 to clarify authority of HUD to (1) exchange data on housing and urban development with foreign countries; (2) employ private citizens to participate in intergovernmental and international meetings sponsored or attended by HUD; and (3) accept funds and other donations from international organizations, foreign countries, and private foundations in connection with activities carried on jointly under international housing programs, thereby permitting a sharing of costs.

#### *Low-rent public housing—Corporate status*

**Section 1109.** Repeals obsolete provisions of the United States Housing Act of 1937 to permit the retirement of the \$1,000,000 capital stock of the U.S. Housing Authority and the return of the \$1,000,000 to the Treasury. Also would amend section 101 of the Government Corporation Control Act to delete reference to the Federal Public Housing Authority.

#### *Eligibility for rent supplement payments*

**Section 1110.** Would extend eligibility to participate in the rent supplement program under section 101 of the Housing and Urban Development Act of 1965, to two projects in New York City which were approved for mortgage insurance shortly prior to August 10, 1965 (and therefore presently ineligible for rent supplement assistance), but, in connection with which, on an experimental basis, rent supplement assistance was provided for a temporary period through a joint effort of the Office of Economic Opportunity, the New York City Rent and Rehabilitation Administration, and HUD.

#### *Consolidation of low-rent public housing projects in the District of Columbia*

**Section 1111.** Would allow the National Capital Housing Authority in Washington, D.C. to consolidate, pursuant to section 15(6) of the United States Housing Act of 1937, into its annual contributions contract for its 8,423 units of low-rent housing under title II of the District of Columbia Alley Dwelling Act the operating income and operating expense accounts for its 72 units of low-rent housing under title I of such Act. Title I governs housing provided prior to enactment of the United States Housing Act of 1937, whereas title II governs housing originally provided with aid under the 1937 Act.

#### *Earthquake study*

**Section 1112.** Would amend section 5 of the Southeast Hurricane Disaster Relief Act of 1965 by extending the date the Secretary of HUD is required to report his findings and recommendations on earthquake insurance from October 31, 1968 to June 30, 1969.

#### *Technical amendments*

**Section 1113. Subsection (a)** would amend section 110(c) of the Housing Act of 1949 to make it clear that urban renewal project funds can be used for "the restoration of

acquired properties of historical or architectural value."

Subsection (b) would amend section 110 (d) of the Housing Act of 1949 to make it clear that grant-in-aid credit can be given for expenditures by a public body for the construction of foundations and platforms on air rights sites in urban renewal projects to the same extent that such work could now be done with project funds.

Subsection (c) would amend section 110(e) of the Housing Act of 1949 to make it clear that the restoration of historic properties can be carried out as an urban renewal project cost for those projects approved for three-fourths Federal grant assistance on a limited project cost basis.

Subsection (d) would amend section 1101 (c) (3) of the National Housing Act to permit amortization of the mortgage term under the medical group practice facilities program to commence after completion of construction of the facility rather than at the time the mortgage is executed.

Subsection (e) would amend section 213 (a) of the National Housing Act to clarify the authority of the Secretary to invest all moneys, not currently needed for the operation of the cooperative management housing insurance fund, in Government bonds or obligations, or in the purchase on the open market of debentures which are the obligation of the fund.

Subsection (f) would amend section 810 (e) of the National Housing Act to permit an individual, who is approved by the Secretary, to be a mortgagor under the FHA section 810 housing program for military personnel or employees or personnel of NASA or AEC research or development installations.

#### RENT SUPPLEMENTS

Mr. MONDALE. Mr. President, for more than three decades the Nation has worked to solve the problem of building decent housing for low-income families. In all this time, we have sought the maximum participation of private industry in meeting these objectives. But the economics of housing production put the low-income market out of the reach of private enterprise.

The U.S. Housing Act of 1937 gave us the public housing program, and it has done a very creditable job over the years. Thousands of low-income families have a sound housing and a decent environment in which to raise their children because of the low-rent program.

In spite of substantial progress under this program, many knowledgeable persons felt that we could do more to house poor families if we could bring the resources and talents of the private sector more to bear on the problem. In 1965, we cleared the way for greater private involvement in the low-income market with enactment of the rent supplement program.

Private sponsors develop the housing. Private builders construct the housing, and private owners select the tenants and manage the housing.

The families served are truly of low income—those who meet local public housing requirements. They pay one-fourth of monthly income toward the economic rent and the difference is made up by the rent supplement payment from the Federal Housing Administration directly to the private owner.

If family income increases, the supplement decreases and it is possible for a family to improve its income so that it pays all the rent and the supplement ceases. But the family does not have to

move out of a decent home as it would if it were over income for public housing.

In the first year that the program was funded, all \$32 million in contract authority was exhausted. The current \$10 million in funds has virtually been expended. Many additional project proposals have already been received in FHA.

Altogether, some 42,000 units of rent supplement housing are in various stages of planning, construction, or management.

President Johnson has asked for \$65 million in contract authority for this program for fiscal 1969. This will produce some 72,500 additional units.

This program is desperately needed. I urge my colleagues to join me in supporting full funding of the rent supplement program.

#### S. 3031: INTRODUCTION OF BILL ENTITLED "THE ENVIRONMENTAL QUALITY PRESERVATION ACT OF 1968"

Mr. NELSON. Mr. President, increasingly of late, more and more people have been sounding the alarm about the grave threats to our environment posed by a vast tide of air and water pollution, by our urban sprawl and by the products and byproducts of our rapidly burgeoning technology.

There is no question that the quality of our environment is deteriorating rapidly and that the health and welfare of our citizens is imminently threatened. The degradation of our air and water has reached alarming proportions. The air in many of our major cities is not safe to breathe and the water in many of our lakes and streams is not safe even for partial body contact.

Our Government has a vital stake in restoring the quality of our environment. In order that it may better meet its responsibilities, I am introducing today a bill—the Environmental Quality Preservation Act of 1968—which will serve to coordinate and expand the State, local, and Federal governments' role in meeting the environmental crisis.

Title I of the bill would create a Council on Environmental Quality in the Executive Office of the President to oversee the programs of the Federal, State, and local governments to determine to what extent these activities are contributing to the achievement of environmental quality and to gather, analyze, and interpret conditions and trends in environmental quality.

The principal task of the Council will be to develop within a 5-year period comprehensive national policies and programs to improve and maintain the quality of our environment. This is a job of enormous import not only to us today but also to many generations to come.

Under title II of the bill, the Secretary of the Interior is authorized to conduct studies of natural environmental systems in the United States to document and define changes in these systems, and to develop and maintain an inventory of natural resource development projects and other related projects which may make significant modifications in the natural environment.

Further, the Secretary of the Interior is directed to establish a clearinghouse for information on ecological problems and studies and to disseminate information about progress in the field and to establish a program in which representative natural environments on Federal lands can be set aside for scientific study and for preservation. Also, the Secretary of the Interior will assist and encourage the establishment of similar natural preserves on State and private lands.

Title III of the bill would establish, under the Secretary of Health, Education, and Welfare, a comprehensive waste management research program, coordinating all such research now being done under a number of different Federal programs. The Secretary of Health, Education, and Welfare is also directed to compile a national inventory of waste management needs and problems and of waste management technology.

In addition, the bill would establish a clearinghouse for information on all aspects of air, water, and soil pollution and waste disposal. This information would be made available to business, industry, municipalities, and the general public.

This measure will serve effectively to coordinate and channel the efforts of State, local, and Federal governments in our struggle to restore the quality of our environment.

We have been warned repeatedly by our scientists about the dangers involved in disrupting the delicate balance of nature. We have seen many times the disastrous results of manmade ecological disruptions.

We find in this country today a rapidly diminishing natural resource base. The continued destruction of our once abundant resources is accelerated by our technology and our urban sprawl. We have arrived at a critical point in time, at a very important crossroad. If we do not move boldly and decisively now, before long we will have seriously eroded our resource base and dangerously degraded our whole environment.

The effort that we must make has to be thorough and comprehensive. We cannot afford to make any mistakes. And we need the support of every citizen and of every public official at all levels of government, from city and county government right on up to the White House.

There can be little doubt that we have pushed nature far beyond its capacity to regenerate that which we have taken away and to dilute all the polluting wastes that we pour in mountainous quantities into the air and water and onto the land.

We must halt the senseless pollution of our air and water; we must shepherd our remaining last resources with great care; we must evaluate very carefully any new project or development which threatens to disrupt or disturb our environment in any way.

Now is the time. This may well be our last chance. We all have an obligation to consider exactly what is at stake. We must decide what kind of a world we want this to be both for us and for our children and our grandchildren. Now is the time for decision.

I ask unanimous consent that the text of this bill—the Environmental Quality Preservation Act of 1968—be printed in the RECORD at this point in my remarks.

The VICE PRESIDENT. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 3031) to provide for the formulation of a national policy for environmental quality, and for other purposes, introduced by Mr. NELSON, was received, read twice by its title, referred to the Committee on Public Works, and ordered to be printed in the RECORD, as follows:

#### S. 3031

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That this Act may be cited as the "Environmental Quality Preservation Act of 1968".

#### SEC. 2. The Congress finds and declares—

(a) that the quality of the environment of the Nation—its air, water, and soil—has substantially deteriorated and is continuing to do so at an increasing rate;

(b) that this decline in environmental quality is threatening the health and survival of plant and animal life, and indeed of man himself; is depriving man of esthetic and recreational values increasingly important to his physical and mental health; and is obstructing, and indeed may eventually prevent, the economic, social, and material development necessary to meet the grave problems of an expanding population, and continuing urbanization and industrialization;

(c) that present pollution control programs, directed as they are to specific problems of pollution of water, air or soil, do not together constitute a comprehensive environmental quality program and cannot maintain overall environmental quality at a level sufficient for the emerging needs of the Nation; and

(d) that the purposes of this Act therefore are to provide for the formulation and recommendation to the Congress of a comprehensive national environmental quality program; to foster interest in and attention to the problems of environmental quality by the Congress and throughout the Executive branch; and to reorganize and redirect existing research programs, and establish new programs, in order to expand rapidly knowledge of all kinds in the areas of environmental quality, pollution control, and waste management.

#### TITLE I—COUNCIL ON ENVIRONMENTAL QUALITY

SEC. 101. The President shall transmit to the Congress annually beginning not later than June 30, 1969, an Environmental Quality Report (hereinafter referred to as the "Report") which shall set forth (1) the status and condition of the major natural, man-made, or altered environmental systems of the Nation, including, but not limited to, the air, the aquatic, including marine, estuarine, and fresh water, and the terrestrial environment, including, but not limited to, the forest, dryland, wetland, range, urban, suburban, and rural environment; and (2) current and foreseeable trends in management and utilization of such environments and the effects of those trends on the social, economic, and other requirements of the Nation.

SEC. 102. (a) There is hereby created in the Executive Office of the President a Council on Environmental Quality (hereinafter referred to as the "Council"). The Council shall be composed of five members who shall be appointed by the President, by and with the advice and consent of the Senate, each of whom shall be a person who, as a result of his training, experience, and attainments, is exceptionally qualified to analyze and in-

terpret environmental information of all kinds, to appraise the environmental quality programs of Federal, State and local governments, and to formulate and recommend national policy to promote the improvement of the quality of the environment.

(b) The Council may employ such officers and employees as may be necessary to carry out its functions under this title. In addition, the Council may employ and fix the compensation of such experts and consultants as may be necessary for the carrying out of its functions under this title, in accordance with section 3109 of title 5, United States Code (but without regard to the last sentence thereof).

(c) It shall be the principal duty of the Council to develop comprehensive national policies and programs to improve and maintain the quality of the environment needed to meet the emerging social, economic, material, and other requirements of the Nation. The recommendations of the Council shall be transmitted by the President to the Congress by January 1, 1973.

(d) In addition to those in subsection (c), it shall be the duty and function of the Council—

(1) to assist and advise the President in the preparation of the Environmental Quality Report;

(2) to gather timely and authoritative information concerning the conditions and trends in environmental qualities both current and prospective, to analyze and interpret such information and to compile and submit to the President studies relating to such conditions and trends;

(3) to appraise the various programs and activities of Federal, State, and local government for the purpose of determining the extent to which such programs and activities are contributing to the achievement of environmental quality, and to make recommendations to the President with respect thereto;

(4) to make and furnish such studies, reports, and recommendations, with respect to matters of policy and legislation as the President may request; and

(5) to foster study and research in the social, technical, administrative, economic, political, and other aspects of environmental quality at institutions of higher learning throughout the Nation.

(e) In exercising its powers, functions, and duties under this title—

(1) the Council shall consult with such representatives of science, industry, agriculture, labor, conservation, State and local governments, and other organizations and groups, as it deems advisable; and

(2) the Council shall, to the fullest extent possible, utilize the services, facilities, and information (including statistical information) of public and private agencies, organizations, and individuals, in order that duplication of effort and expense may be avoided.

#### TITLE II—ECOLOGICAL RESEARCH

SEC. 201. The Secretary of the Interior (hereinafter referred to as the "Secretary"), in order to carry out the purposes of this title, is authorized—

(1) to conduct investigations, studies, surveys, research, and analyses;

(2) to document and define changes in the natural environment, including the plant and animal systems, and to accumulate necessary data and other information for a continuing analysis of these changes or trends and an interpretation of their underlying causes;

(3) to develop and maintain an inventory of natural resource development projects, engineering works, and other major projects such as, but not limited to, eradication projects contemplated or planned by public or private agencies or organizations which may make significant modifications in the natural environment;

(4) to establish a system of collecting and receiving information and data on ecological

research and evaluations which are in progress or are planned by other public or private agencies or organizations, or individuals;

(5) to evaluate and disseminate information of an ecological nature to public and private agencies or organizations, or individuals in the form of reports, publications, atlases, and maps;

(6) to initiate and utilize ecological information and in the planning and development of resource-oriented projects;

(7) to encourage other public or private agencies planning development projects to consult with the Secretary on the impact of the proposed projects on the natural environment;

(8) to encourage and assist public (non-Federal) or private agencies or organizations, including educational institutions, museums, and botanical and zoological gardens, and other scientific or conservation organizations, or individuals, to acquire, designate, and maintain representative samples of important natural environmental systems, including natural areas for observation and for manipulation, and to encourage such agencies, organizations, and individuals to utilize existing areas under their control or jurisdiction for such purposes;

(9) to establish through interagency coordination, on federally owned lands, a Federal system of natural areas for scientific purposes and develop the means and methods for withdrawal of such areas from non-conforming uses, and provide for their management and protection to serve the natural research needs for all agencies, both public and private; except that in developing standards governing any such withdrawals, the Secretary shall give due consideration to future alternative uses of such areas subject to withdrawal; and

(10) to assist and advise the Council on Environmental Quality established under title I of this Act.

SEC. 202. The Secretary is further authorized for the purposes of this title (1) to make grants and enter into contracts or cooperative agreements with public or private agencies or organizations, or individuals, (2) to accept and use donations of funds, property, personal services, or facilities, (3) to acquire selected areas of lands or interests in lands by donation, acquisition with donated funds, devise, or exchange for acquired lands or public lands under his jurisdiction which he finds suitable for disposition, (4) to administer such lands or interests for experimental purposes, including the observation and manipulation of natural areas, and (5) to issue such regulations as he deems necessary with respect to the administration of such lands.

SEC. 203. Activities authorized under this title may be carried out on lands under the jurisdiction or control of other departments or agencies of the Government only with the approval of the head of the department or agency concerned.

SEC. 204. The Secretary shall consult with and provide technical assistance to departments and agencies of the Government, and he is authorized to obtain from such departments and agencies such information, data, reports, advice, and assistance as he deems necessary or appropriate, and which can reasonably be furnished by such departments and agencies in carrying out the purposes of this title. Any Federal agency furnishing advice or assistance hereunder may expend its own funds for such purposes, with or without reimbursement by the Secretary.

SEC. 205. Nothing in this title is intended to give, or shall be construed as giving, the Secretary any authority over any of the authorized programs of any other department or agency of the Government, or as repealing, modifying, restricting, or amending existing authorities or responsibilities that any department or agency may have with respect to the natural environment. The

in my area of Wisconsin where his family summer cottage is located. His funeral is today in Havana, Illinois. We all join in paying our respects and expressing our sympathy to his family. Scott Lucas will be missed by all of us.

(Mr. LAIRD asked and was given permission to revise and extend his remarks.)

Mr. GERALD R. FORD. Mr. Speaker, will the gentleman yield?

Mr. PRICE of Illinois. I yield to the distinguished minority leader.

Mr. GERALD R. FORD. Mr. Speaker, I thank the gentleman for yielding.

Although it was not my privilege to know the Honorable Scott Lucas as a Member of the House of Representatives, and although I did not know him well when I served concurrently in this body, and he in the other body, however, I did become well acquainted with him after his departure from the Senate.

He was a gentleman of the highest order. His reputation was one of the finest, not only here, but throughout the country. Scott Lucas had a multitude of friends in every segment of our society. I thoroughly enjoyed his friendship. I greatly admired his record of public service.

I join with the others in extending to his family our deepest condolences at this time.

Mr. SPRINGER. Mr. Speaker, will the gentleman yield?

Mr. PRICE of Illinois. I yield to the gentleman from Illinois.

Mr. SPRINGER. I thank the gentleman for yielding.

Mr. Speaker, for some 4 years I was Scott Lucas' Congressman, and when the change was made to put Mason County in the 22d Congressional District in 1961, he made it a point to visit my office and to welcome me to the district as his Congressman.

Although he had been a member of the other party all of his life, and had served in this body and also in the other body, and had been majority leader in the other body for a number of years, he was the kind of a man who anyone would want to know, regardless of party affiliation. He was one of those typical midwest Illinoisians, as I would describe him, who not only was interested in his country but who enjoyed all of the things that we do in the middle west, and central Illinois; such as hunting and fishing. He lived on the Illinois River, and for a number of years took an active part in the promotion of all the recreational legislation along the Illinois River, and in which he had taken an active part while in the Congress.

He was a man in his home community of Havana who was recognized, and who was loved by everyone. He was not one of those who was appreciated every place except in his home community, he was loved and respected there as much as he was in Washington.

Mr. Speaker, I am happy to pay tribute to this good man, and proud of the fact that I had known him such a long time. He was one of the finest gentlemen I have ever known.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. PRICE of Illinois. I yield to our distinguished Speaker, the gentleman from Massachusetts [Mr. McCORMACK].

Mr. McCORMACK. I thank the gentleman for yielding.

Mr. Speaker, I was very grieved when I read of the death of my dear and valued friend for many years, the late Scott W. Lucas, of Illinois. Scott Lucas and I enjoyed a close personal friendship for many years, a friendship that emanated in this body, continued while he was a Member of the other body, and continued after the termination of his services in the other branch of the Congress.

Scott W. Lucas served 2 years in this branch of the Congress, and was elected to the Senate in 1938. He was honored by his Democrat colleagues in the U.S. Senate by being elected as the majority leader, the Democrat leader of that body, in which position he served with great distinction.

Scott W. Lucas was a strong Democrat, but he had a profound feeling of respect and friendship for his Republican colleagues. Like myself, he had a strong feeling of respect for the dignity of both political parties in the United States because he realized that the best means of the American people expressing their views and placing responsibility was through the medium of the two-party system. So while he was a strong Democrat, he was not an enemy, he was an advocate of the Democratic Party, and the principles for which it stood, but he always respected, as I said, the dignity and the position and the importance of the two-party system under our scheme of form of government.

Scott Lucas was a progressive. As has been stated by my friend, the gentleman from Illinois [Mr. PRICE], he strongly supported social security and all other progressive bills. He was also one of the strongest advocates that the agricultural community of America had in either branch of the Congress of the United States. He was always fighting for the best interests of the farmers of our country, and doing so with great success both in this body and in the other body.

Over and above that he was also a firm supporter of a strong foreign policy and also a strong supporter of a powerful national defense.

Scott Lucas has made his mark, and his contributions to the dignity and strength and progress of our country are written in the pages of the legislative history of our country.

He was a great American and an outstanding legislator. In his passing I have lost a dear, valued, close, and personal friend. I extend to his son my deepest sympathy in his great loss and sorrow.

#### GENERAL LEAVE

Mr. PRICE of Illinois. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to extend their remarks in tribute to the late Honorable Scott W. Lucas.

The SPEAKER pro tempore (Mr. SELDEN). Without objection, it is so ordered.

There was no objection.

#### AMERICAN CIVIL LIBERTIES UNION ATTEMPTING TO DICTATE TO PRINCIPALS OF PUBLIC SCHOOLS IN FLORIDA

(Mr. HALEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. HALEY. Mr. Speaker, I have today sent to the desk, for appropriate reference, a petition bearing the signatures of more than 12,000 of my constituents who are properly concerned by an effort of the American Civil Liberties Union to dictate to principals of public schools in the State of Florida.

The purpose of this petition is to protest the uninvited and unwanted effort of the ACLU to intrude itself into matters of public school administration which are the business of the principals and not of this outside organization.

This presumptuous effort was made, as is set forth in the petition, through a letter, dispatched last year, warning all principals of schools in my State against holding religiously oriented Christmas celebrations in the schools.

I scarcely need say that I sympathize with the point of view expressed in this petition. I have been an unwavering objector of the so-called school prayers decision of the Supreme Court, which was the product of this tribunal's remarkable ability to misinterpret the real meaning of the U.S. Constitution in such manner as to substitute its own sociological-ideological beliefs for the law of the land and of its various States. It is my hope that the day will come when those of us in the House who disagree with this decision would be allowed the opportunity to vote on the proposed constitutional amendment to negate it.

It seems obvious to me—and I believe to almost all Americans—that the Constitution's guarantee of "freedom of religion" has been distorted by the Supreme Court to mean "freedom from religion," which is an entirely different matter. By denying the opportunity for voluntary expression in public schools of religious beliefs, the Supreme Court has in effect denied the right of exercise of religious freedom.

#### COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives.

OFFICE OF THE CLERK,  
HOUSE OF REPRESENTATIVES,  
Washington, D.C., February 23, 1968.

The Honorable the SPEAKER,  
U.S. House of Representatives,  
Washington, D.C.

DEAR SIR: I have the honor of transmitting herewith a sealed envelope received by my office at 11:20 a.m., Friday, February 23, 1968, from the White House and said to contain a Message from the President concerning American Cities.

Respectfully yours,  
W. PAT JENNINGS,  
Clerk, U.S. House of Representatives.

#### CORRECTION OF VOTE

Mr. DULSKI. Mr. Speaker, on rollcall No. 26 I am recorded as not voting. I was

present and voted "yea." I ask unanimous consent that the permanent RECORD and Journal be corrected accordingly.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

#### CORRECTION OF VOTE

Mr. DOLE. Mr. Speaker, on rollcall No. 402, first session of the 90th Congress I am recorded as not voting. I was present and voted "yea." I ask unanimous consent that the permanent RECORD and Journal be corrected accordingly.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kansas?

There was no objection.

#### THE CRISIS OF THE CITIES—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER. The Chair lays before the House a message from the President of the United States.

#### CALL OF THE HOUSE

Mr. HALL. Mr. Speaker, under the presumption that this message pertains to the long hot summer, I believe the Members should hear it, and I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. ALBERT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 32]

Ashley	Griffiths	Pickle
Baring	Gurney	Pollock
Brasco	Halleck	Pucinski
Brown, Mich.	Halpern	Quile
Buchanan	Hanna	Rallsback
Burton, Utah	Hardy	Rees
Cohelan	Hays	Resnick
Conyers	Jarman	Ronan
Corman	Jones, Ala.	Rooney, Pa.
Dent	King, Calif.	Rostenkowski
Diggs	Lloyd	Roudebush
Dorn	Mailliard	Roybal
Edwards, Calif.	Mathias, Calif.	St Germain
Fallon	Michel	St. Onge
Farbstein	Mink	Schwengel
Feighan	Minshall	Stephens
Fraser	Nix	Sullivan
Gallagher	O'Hara, Ill.	Talcott
Gardner	O'Neal, Ga.	Tunney
Gibbons	Passman	Watkins
Gray	Pepper	Williams, Pa.
Green, Oreg.		

The SPEAKER pro tempore (Mr. ALBERT). On this rollcall, 368 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

#### THE CRISIS OF THE CITIES—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 261)

The SPEAKER pro tempore laid before the House the following message from the President of the United States, which was read:

#### To the Congress of the United States:

The cities that sprang up along the seaports, the river banks and the prairie crossroads of America were built and grew with pride and hope—until the early 20th century.

For several decades, now, the tide has run against the growth, strength and vitality of our cities.

Today, America's cities are in crisis. This clear and urgent warning rises from the decay of decades—and is amplified by the harsh realities of the present.

The crisis has been long in forming. At the turn of the century, Lincoln Steffens told of "the shame of the cities." Jane Addams spoke of "the vast numbers of the city's disinherited."

Powerful forces swept the city after World War II, hastening its erosion.

People who could afford to begin moving by the hundreds of thousands to new suburbs to escape urban crush and congestion. Other hundreds of thousands were trapped inside by a wall of prejudice, denial, and lack of opportunity.

They were joined by still thousands more from America's rural heartland—the unskilled and the unprepared, displaced by advances in technology. Their thirst was for opportunity, for jobs, and for a better life. They found instead a mirage; for stripped of its bright lights, the city for them was poverty, unemployment and human misery.

We see the results dramatically in the great urban centers where millions live amid decaying buildings—with streets clogged with traffic; with air and water polluted by the soot and waste of industry which finds it much less expensive to move outside the city than to modernize within it; with crime rates rising so rapidly each year that more and more miles of city streets become unsafe after dark; with increasingly inadequate public services and a smaller and smaller tax base from which to raise the funds to improve them.

But these problems exist in hundreds of smaller towns and cities across America—towns and cities whose growth is in numbers of people, but not in homes, or jobs, or public services, or schools or health facilities to serve them. The result too often is that these cities grow with decay, human misery, lack of job opportunity and increasingly concentrated poverty.

If the promise of the American city is to be recaptured—if our cities are to be saved from the blight of obsolescence and despair—we must now firmly set the course that America will travel.

There is no time to lose.

#### THE PEOPLE OF THE CITY

The human problems of the city are staggering:

—Ghetto youth with little education, no skills and limited opportunity.

—Citizens afraid to walk their streets at night, and justifiably so.

—Negroes, Puerto Ricans and Mexican Americans barred by prejudice from full participation in the city's life.

Illiteracy and disease, a lack of jobs and even dignity itself—these are the problems of the city, just as its tenelements, traffic jams and rats are problems.

The city will not be transformed until the lives of the least among its dwellers are changed as well. Until men whose days are empty and despairing can see better days ahead, until they can stand proud and know their children's lives will be better than their own—until that day comes, the city will not truly be rebuilt.

That is the momentous and inescapable truth we face in this hour of America's history.

No single statement or message can embrace the solutions to the city's problems. No single program can attack them.

No one can say how long it will take, or how much of our fortune will eventually be committed. For the problems we are dealing with are stubborn, entrenched and slow to yield.

But we are moving on them—now—through more than a hundred programs, long and short range, making financial commitments of more than \$22 billion to the task.

#### THE WORK SO FAR

The last several years have witnessed a remarkable record of legislative achievement—and most of it has borne on the problems of the cities.

We struck down discrimination in job opportunities, public accommodations, and voting in the Civil Rights Acts of 1964 and 1965.

We provided job training for nearly two million disadvantaged men and women who now have the skills to support themselves and their families with dignity and self-respect.

We cut through a century of opposition and controversy to help the poor school child with the Elementary and Secondary Education Act of 1965.

We brought healing and health to the elderly and the poor through Medicare and Medicaid.

We moved to help combat the pollution that poisons a city's air and fouls its waters.

And, with the Economic Opportunity Act of 1964, we finally embarked on a concentrated effort to eliminate poverty in this nation. That landmark measure has helped to change the lives of 6 million Americans.

These programs have brought hope to people in every city and town in America. Children from the slums find a new chance to succeed through Head Start. Poor teenagers earn their first paychecks through a Neighborhood Youth Corps program and stay in school. Needy young men and women, whose talents might once have been their life's frustration, go on to college through Upward Bound. Men find self-respect and good jobs through work training programs. Half a million volunteers are engaged in a mission of service to the destitute of their communities. More than 6 million Americans have been lifted out of poverty.

But almost 29 million citizens still remain in poverty.

If the problems of the city are to be solved, there can be no retreat in the War on Poverty. It must be pressed, with renewed emphasis on the most critical needs of the poor—job opportunities and education for the young, and the chance

to join in cooperative self-help efforts to improve their own lives, as well as to participate in the broader community attack on poverty.

Last year the Congress extended the life of the poverty program for 2 years—but it appropriated only \$1.77 billion, some \$290 million less than we sought.

*For fiscal 1969, I recommend appropriations to the full level of Congressional authorization—\$2.18 billion—for the anti-poverty program.*

All of these measures help the people who live in our cities.

They are new programs, and only now are they beginning to take hold in improving lives of men, women, and children.

With other proposals I have made to Congress this year—for open housing, for safe streets, for gun control, for 500,000 new, private sector job opportunities for the hard-core unemployed, for better education—we can further protect and improve the lot and the life of the city dweller.

Today, however, I want to speak of programs designed especially for our cities—of shelter for its citizens and plans for its revitalization. This message, too, is for men and their families. For our lives are profoundly affected by the environment in which we live, the city in which we work and reside, the home in which we relax and renew our strength.

#### AN EVOLUTIONARY RESPONSE

Five Presidents and fifteen Congresses have forged the Federal response to the problems of housing and urban development.

It began in 1937, when Franklin Roosevelt saw a third of the nation ill-housed. He and the 75th Congress recognized that poor families could not, with their own resources, afford homes on the private market, and that some form of Government help was necessary if they were to have decent shelter. The result was the historic legislation that launched the Public Housing program.

Twelve years later, with the Housing Act of 1949, President Truman and the 81st Congress started urban renewal and pledged "as soon as feasible . . . a decent home and a suitable living environment for every American family."

In the 1954 Housing Act, President Eisenhower and the 83rd Congress expanded the program of urban renewal.

At the beginning of this decade, President Kennedy and the 87th Congress enlarged the Government's role to bring decent houses into the reach of families with moderate income.

In spite of these strides, when I became President:

- We had a loose collection of federal housing agencies, each operating programs in isolation, not only of each other but also of the federal assistance programs of other departments.
- Urban renewal was demolishing slum housing and dislocating people, but not enough new housing was being built for those forced to relocate.
- There was little interest in the private sector—by builders, architects and engineers—in providing decent shelter for poor families, and the public housing program was stagnated in numbers and in quality.

—Our concern with housing, health care, education, welfare and other social services was fragmented in the local neighborhoods where it counts.

Over the past four years, you in the Congress have approved our proposals to:

- Establish a Department of Housing and Urban Development to bring scattered housing and urban development programs together and give the American city the cabinet role it deserves.
- Begin a new program of Rent Supplements to increase the housing supply for needy families. Built and operated by private enterprise, the portion of rent paid by the Government declines as the tenant's income rises.
- Inaugurate the Model Cities Program, the first effort to attack blight on a massive scale and renovate entire neighborhoods, by providing special supplementary grants to those cities that concentrate the entire array of Federal, State and local programs, from health to housing, in the worst slum neighborhoods.

Even these achievements are not sufficient to deal with the crisis our cities face today. They do provide a base on which the proposals in this message build.

#### THE HOUSING AND URBAN DEVELOPMENT ACT OF 1968

*I propose the Housing and Urban Development Act of 1968—a charter of renewed hope for the American city.*

With this Act, the Nation will set a far-reaching goal to meet a massive national need: the construction of 26 million new homes and apartments over the next 10 years. Six million of these will finally replace the shameful substandard units of misery where more than 20 million Americans still live.

This Act will authorize the construction and rehabilitation of 2.35 million housing units with \$2.34 billion of contracting authority for the first five years of the ten year program.

Under this legislation, we will in the year ahead:

- Start 300,000 housing units for more than one million citizens who need federal assistance to obtain decent housing. This is triple the rate of this year, and more than half the number built over the last decade.
- Continue to restore the core of our center cities—and with that, improve the lives of nearly 4 million Americans—through the Model Cities Program.
- Summon the talents and energies of private enterprise to the task of housing low income families through the creation of a federally-chartered private, profit-making housing partnership.
- Make Urban Renewal a more effective instrument for reclaiming neighborhoods, through a new neighborhood development program.
- Add many thousands of construction job opportunities in the inner city.
- Stimulate the flow of private credit for home building in the city by providing flexible interest ceilings on FHA mortgages and transferring

the secondary market operations of the Federal National Mortgage Association to private ownership.

- Help American cities develop modern and efficient mass transit systems and services.
- Offer the American family an alternative to crowded cities and sprawling suburbs, through a program to build new communities.
- Improve planning for the orderly development of public facilities for urban areas.
- Establish a base of research, analysis and knowledge of urban areas so we can make better informed decisions about the cities.

#### WHAT IS REQUIRED

To achieve our housing goal, we must move from low to high production.

We can make that shift only if the challenge summons the commitment of

- The capital and mortgage finance markets*, to supply the private funds which are the lifeblood of the construction industry. These funds must flow steadily and in increasing scale.
- The home building industry*, to tap an expanded Federally-assisted market for private low and moderate income sales and rental housing.
- The genius of American business* to bring to home building, its skill and resources and the methods of modern technology so that houses can be built faster, less expensively and more efficiently than ever before.
- American labor*, which has pledged to provide the necessary skilled manpower without discrimination.
- Government at all levels*, to improve the working relationships with each other, and with the builders, lenders, and low income families who will be served by this program.
- Most importantly, the Congress.*

First, the Congress must take steps now to insure strong, stable economic growth for the nation as a whole and the home building industry in particular.

*Once again I call upon the Congress to pass the anti-inflation tax which I recommended more than a year ago.* Soaring interest rates will cripple the home-building industry. The temporary surcharge tax legislation can help to keep that from happening.

*Second, I urge the Congress to enact the fair housing legislation recommended repeatedly by this Administration.*

*Third, I urge the Congress to renew, fully fund and strengthen the basic housing and urban development legislation already on the books.*

#### HOMES FOR AMERICANS

*I urge the Congress to enact a program to provide 300,000 housing starts in fiscal 1969 for the poor, the elderly, the handicapped, the displaced, and families with moderate incomes.*

This program would:

1. *Enable 100,000 low-income families to buy or repair their own homes.*

Home ownership is a cherished dream and achievement of most Americans.

But it has always been out of reach of the nation's low-income families.

Owning a home can increase responsibility and stake out a man's place in his community. The man who owns a

home has something to be proud of and good reason to protect and preserve it.

With the exception of the pilot program I began last year, low-income families have been able to get Federal help in securing shelter only as tenants who pay rent.

*Today I propose a program to extend the benefits of home ownership to the nation's needy families.*

Under this program, the broad outline of which has already been set forth in S. 2700, low-income families will be able to buy modest homes financed and built by the private sector. These families will devote what they can reasonably afford—a specified percentage of their income—to mortgage payments, with the Government paying the difference in the form of an interest subsidy. Under this interest subsidy, the Federal Government would pay all but 1 percent of the interest on the mortgage, depending on the income of the homebuyer.

*2. Start 75,000 public housing units, to provide homes for 300,000 Americans.*

The job is to turn authorization to action—by accelerating the processing of applications, by moving quickly from commitment to construction, and by involving private industry fully under the new Turnkey concept.

Under Turnkey, a low-income project can be put up in less than half the time traditionally required for public housing.

Turnkey frees the builder from complicated and cumbersome procedures and stimulates his initiative to develop imaginative and well-designed buildings at lower cost.

We have already extended the Turnkey concept to enable private industry not only to build low-income housing developments, but also to manage them.

Some Public Housing projects built in the past—when the challenge was simply to get units in place—reflect a tasteless conformity, and an indifference to community amenities.

At my direction, the Secretary of the Department of Housing and Urban Development has been working with leading architects and planners to achieve higher design standards for public housing developments. We know new projects can be pleasant places to live, reflecting the needs of human beings, with attention to comfort and convenience.

Our concern must be not only with the quantity of new public housing, but with its quality as well.

*I propose a \$20 million program to promote improved tenant services in public housing developments.*

With these funds, we can enable those who live in public housing to take better advantage of job, health and education opportunities.

We can help and encourage them to become involved, personally and responsibly, in the day-to-day problems of the projects where they live.

*3. Authorize 72,500 units under the Rent Supplement Program to provide shelter for almost 250,000 poor Americans. In fiscal 1969, 35,000 dwelling units will be started under this program.*

This program, which holds so much promise for the poor families of America, has been underfunded by the Congress. Last year, we sought \$40 million in an-

nual payment authority. The Congress granted only \$10 million.

Rent Supplements is a free-enterprise program, strongly endorsed by the home building, real estate, and insurance industries which have responded enthusiastically to this new approach to low-income housing. It contains incentives for escape from poverty, while creating modest, but decent shelter for those in poverty.

If we are to match our concern for the cities with our commitments, this program must be adequately funded.

*I recommend \$65 million in authority for the Rent Supplement Program for Fiscal 1969.*

*4. Begin to build 90,000 rental housing units for 360,000 members of moderate income families.*

A program to provide housing for families with incomes too high to qualify for public housing, but too low to afford standard housing, began in 1961.

This is a below market interest rate program known as "221(d)(3)." It serves families earning between \$4,000 and \$8,000 a year.

After 5 years of testing, we are ready now to move this program into full production.

But first we must improve it.

*I recommend legislation to strengthen the financial tools under which the moderate income rental housing program operates.*

Under this legislation, capital financing would be shifted to the private sector, and the Government would increase its support by providing assistance to reduce rents to levels moderate income families can afford.

Now the Government provides financial support for loans at 3 percent interest. Under this new arrangement, the private sector would make loans at market rates. The Government would make up the difference between the market rate of interest and 1 percent. The loans would remain in private hands.

#### TO HELP THE NONPROFIT SPONSOR

Many housing projects are sponsored by non-profit organizations—including church groups, and fraternal orders. In many instances these groups lack the technical and financial know-how which modern construction demands.

Their efforts are in the best interests of this nation, and the nation should help them.

*I propose legislation to provide needed technical assistance and skills to the non-profit sponsors of our housing programs.*

Through grants, loans, and technical assistance, this program will help small private non-profit organizations in our cities. These organizations will then be able to draw quickly upon architects, engineers, and financial experts to speed the construction of low income housing.

#### THE BLIGHTED NEIGHBORHOOD

##### MODEL CITIES

The slum is not solely a wasteland of brick and mortar. It is also a place where hope dies quickly, and human failure starts early and lingers long.

Just as the problem of the slum is many-faced, so must the effort to remove it be many-sided.

The Model Cities program gave us the

tools to carry forward the nation's first comprehensive concentrated attack on neighborhood decay.

It was developed by some of the country's foremost planners, industrialists and urban experts.

The program is simple in outline—to encourage the city to develop and carry out a total strategy to meet the human and physical problems left in the rubble of a neighborhood's decay.

That strategy, which Model Cities spurs through special grants, is to bring to a dying area health care services, as well as houses; better schools and education, as well as repaved streets and improved mass transit; opportunities for work, as well as open space for recreation.

This program is now in its early stages. Sixty-three cities are drawing their plans to reclaim the blighted neighborhoods where 4 million Americans live. By this summer, a second group of cities will begin their planning.

Last year, I requested full funding of the amount authorized for Model Cities—\$662 million. But the Congress approved less than half that amount.

To the cities of this land, that cut came as a bitter disappointment.

In the cities' struggle for survival, we dare not disappoint them again. We must demonstrate that they can rely on continued Federal support.

I recommend \$2.5 billion for the Model Cities special grants over the next three years:

—\$500 million for fiscal 1969.

—\$1 billion each for fiscal 1970 and 1971.

In addition, for fiscal 1969 I recommend \$500 million in appropriations for urban renewal solely related to the Model Cities program. This includes full funding for a \$350 million increase in the authorization.

The total funds needed to move the Model Cities program forward in fiscal 1969 are \$1 billion.

I urge the Congress to fund fully this vital request for the people who live in America's worst urban neighborhoods.

#### URBAN RENEWAL

Urban renewal is the weapon that deals primarily with the physical side of removing blight. An essential component of the Model Cities program, it is a major instrument of reform in its own right.

Last year, nearly 900 American communities were reclaiming inner city land under urban renewal.

Last year, the Congress appropriated \$750 million for urban renewal in fiscal 1969.

*To give communities sufficient lead time for planning, I recommend that the Congress appropriate now \$1.4 billion for fiscal 1970.*

Even at these higher appropriation levels, under existing law urban renewal will not operate at sufficient speed to overtake the decay of our cities.

The lag between a community's decision to rebuild a neighborhood and the breaking of ground is far too long. Urgent neighborhood needs go unmet, awaiting the development and approval of a total plan for an entire area.

We must begin now to make urban renewal more immediately responsive to urban needs.

*To apply our resources more quickly, I recommend that Congress authorize a new Neighborhood Development Program under Urban Renewal.*

This legislation would permit detailed planning and execution to proceed segment by segment in an urban renewal area. Under existing law, neither demolition nor rehabilitation can begin on any portion of the area to be renewed until it is ready to begin throughout the entire area.

With this Neighborhood Program, cities can start work quickly on the most pressing problems that are to be renewed, with the emphasis on the construction of new and rehabilitated housing.

#### MEETING THE INSURANCE CRISIS OF OUR CITIES

Insurance protection is a basic necessity for the property owner. But for the resident of the city's inner core and the local businessman who serves him, protection has long been difficult to obtain.

The problem has been heightened by civil disorder or its threat.

Last August I established a Special Panel to seek the solutions to this problem. The Panel, headed by Governor Richard Hughes of New Jersey, offered a clear example of how the States, industry and the Federal Government can join in a constructive effort.

The Panel looked deeply into the property owner's dilemma, and reported:

Society cannot erase the suffering of the innocent victims of fire, windstorm, theft, or riot. But it can at least provide the opportunity to obtain insurance to safeguard their capital, and thereby prevent a disastrous occurrence from becoming a permanent tragedy.

The Panel recommended a comprehensive program of mutually supporting actions by the insurance industry, the States, and the Federal Government.

My advisers and I have reviewed the Panel's proposals carefully. We believe they are sound.

Accordingly, I call upon the insurance industry to take the lead in establishing plans in all States to assure all property owners fair access to insurance. These plans will end the practice of "red-lining" neighborhoods and eliminate other restrictive activities. They will encourage property improvement and loss prevention by responsible owners.

I call upon the States to cooperate with the industry and, where necessary, to organize insurance pools and take other steps to cover urban core properties. These measures will assure that all responsible property owners can obtain insurance, and provide a method of spreading equitably throughout the insurance industry risks that no single insurer would otherwise accept.

*I recommend that the Congress establish a cooperative Federal-State-Industry program by chartering a National Insurance Development Corporation within the Department of Housing and Urban Development.*

This Corporation will bring together all those vitally interested in the inner city insurance problem—members of the public, state insurance regulators and

other state officials, insurance industry representatives, and interested Federal agencies.

The Corporation will perform a number of vital functions in support of the actions of private industry and the states to assure adequate property insurance in all areas of our nation's cities.

Through the sale of reinsurance against the risk of civil disorders, the Corporation will marshal the resources of the insurance industry and add to this the backing of the states and the Federal Government. Without this reinsurance, many insurers and state insurance regulators do not believe the industry can move forward to provide adequate property insurance in urban areas.

This program will assist the insurance industry and the States to offer adequate property insurance for the inner cities. Through reinsurance, the program can help the States provide for the contingency of any large emergency losses.

For those companies who participate in this program, *I recommend tax deferral measures, proposed by the Panel, to increase the industry's capacity to insure homes and businesses in the center city.*

This program will encourage insurance companies to increase their reserves to cover unusual losses. Any deferred taxes will be invested in appropriate Government securities, so that no Federal revenues will be lost by the tax deferral unless unusual losses do occur.

Insurance is vital to rebuilding our cities. It is a cornerstone of credit. It can provide a powerful incentive for homeowners and businessmen to rehabilitate their own property and thereby improve the community.

#### THE PRIVATE SECTOR

The Federal role—a quarter of a century in the making—is designed to assure that every citizen will be decently housed.

The Government's concern is to stimulate private energy and local action—to provide capital where needed, to guarantee financing, to offer assistance that encourages planning and construction.

The real job belongs to local government and the private sector—the homebuilder, the mortgage banker, the contractor, the non-profit sponsor, the industrialist who now sees in the challenge of the cities a new opportunity for American business.

All of the programs I have outlined in this message are directed toward the deeper involvement of the private sector. That involvement must match the massive dimension of the urban problem.

What is needed is a new partnership between business and Government. The first outlines of that partnership are already visible.

We see it in:

—The recent undertaking of the American Bar Association to improve the landlord-tenant laws—now more medieval than modern—and to attack other legal problems in our urban centers.

—The commitment of 318 of the nation's life insurance companies to invest \$1 billion of their capital in low-income housing.

Within the next several days, the Savings and Loan Associations and the Mutual Savings Banks of this nation will announce their plans to intensify the investment of their capital for similar purposes.

#### NATIONAL HOUSING PARTNERSHIPS

How can the productive power of America—which has mastered space and created unmatched abundance in the marketplace—be harnessed to meet the most pressing unfilled needs of our society: rebuilding the urban slum?

Last June, I asked a select Commission of leading industrialists, bankers and labor leaders to study this question. That Commission, headed by Edgar F. Kaiser, has now given me an interim report with many valuable recommendations.

Acting on the Commission's recommendation, *I propose that the Congress authorize the formation of privately-funded partnerships that will join private capital with business skills to help close the low-income housing gap.*

The Kaiser Commission identified three principal reasons why American industry has not yet been attracted to the field of low and moderate-income housing. The problems and the steps proposed to meet them are:

##### 1. CONCENTRATION OF RISK

The profitability of individual housing projects varies widely and the risk of loss on any one project is high. The proposed national partnerships would permit industrial and financial firms to pool their investments and spread their risks over a large number of projects.

##### 2. RATE OF RETURN

Substantial operating losses are usually incurred in the first 10 years of a housing project's life to cover operating expenses, interest and depreciation.

By employing the partnership form of organization, which some building owners now use, under existing tax law these operating losses can be "passed through" to each investor, and offset against the investor's other taxable income. This reduces the investor's current income taxes otherwise payable, and makes possible an annual cash return on investment comparable to the average earnings of American business in other manufacturing enterprises.

##### 3. MANAGEMENT

The management personnel of major corporations are inexperienced in the field of low income housing. They cannot afford to devote substantial time to occasional housing ventures.

The proposed national partnerships would be strongly financed organizations, fully committed to long term activity in the single field of housing for the poor. As such, the proposed partnerships should be able to attract top flight management and technical experts on a competitive career basis.

The objective of these partnerships will be to attract capital from American industry and put that capital to work. Their exclusive purpose will be to generate a substantial additional volume of low and moderate income housing. They will use the best private management talent, planning techniques and advanced methods of construction. They

will probe for the savings inherent in the latest technology and in economies of scale.

They will:

- Participate in joint ventures throughout the country in partnership with local builders, developers and investors.
- Join with American labor to open new job opportunities for the very people their projects will house.
- Participate in our existing and proposed federal programs for assisting low and moderate-income housing projects on the same basis as other project sponsors.

This new undertaking will begin with one national partnership. We expect that others will follow as the approach proves itself.

#### A NEW ERA IN HOME FINANCING

The supply of credit is not unlimited. The nation's banks, insurance companies, pension funds and other financial sources have an obligation to their depositors and shareholders to seek a fair and competitive return for their investments.

To insure that home financing remains competitive with alternative long-term investment opportunities, I recommend that the Congress:

- authorize the Secretary of Housing and Urban Development to adjust the FHA interest rate ceilings.
- authorize federal insurance of bond obligations issued by private mortgage companies or trusts holding sizeable pools of FHA-insured and VA-guaranteed home mortgages.
- transfer the secondary market operations of the Federal National Mortgage Association to completely private ownership.

#### FHA INTEREST RATES

Mortgages insured by the Federal Housing Administration and the Veterans Administration can by law carry no more than a 6 percent interest rate. In today's market this is no longer competitive. In practical terms, the result is the sale of mortgages at substantial discounts.

Discounts require hard cash beyond the normal downpayment. They erode the hard-earned equity of a home-owner and the profit margin of the builder of new housing. For when the rate of return on federally-insured mortgages is less than lending institutions can obtain from other investments, they require property-sellers to absorb discounts. To sell their homes, therefore, sellers realize less than they originally anticipated. And when builders of large projects—with 90% mortgages of \$1 or \$2 million, or more—must find additional hard cash to pay deep discounts, they will defer construction until the cash requirements are reduced.

As a result, many a house goes unsold and many apartment projects go unbuilt in a deep credit squeeze.

To assure a steady flow of funds into homebuilding, I recommend that the Congress authorize the Secretary of Housing and Urban Development to adjust the FHA interest rate ceilings to reflect the economic realities of the financial markets. I have already recom-

mended a similar adjustment on the interest rates for home loans to veterans.

#### FEDERALLY INSURED MORTGAGE BONDS

Some private institutional and individual investors have shunned investments in home mortgages because they could realize nearly comparable rates of return in other investments, and avoid the book-keeping and paper work associated with hundreds of individual mortgages.

These pools of savings—in large institutional pension funds, private trusts, and occasionally in individual estates—can be attracted to residential finance. It will take a new, marketable financial investment, with competitive yields and security. Such a bond-type obligation can be created to cover federally-insured mortgages held by private mortgage bankers or trusts.

To enhance the attractiveness of such an obligation to investors, and thus attract additional funds to the housing market, I recommend that the Congress authorize the Department of Housing and Urban Development to insure mortgage bonds that are secured by pools of FHA-insured and VA-guaranteed mortgages.

#### FEDERAL NATIONAL MORTGAGE ASSOCIATION

Through the Federal National Mortgage Association, the Federal Government has helped keep mortgage funds flowing by buying mortgages when credit was tight and selling them when money was plentiful.

Today, FNMA is a hybrid, owned in part by private shareholders, in part by the government, but managed by Government officials.

This secondary market operation is largely a private function, which ought to be performed by the private sector—as the Congress has always intended.

I propose legislation to transfer the secondary market operation of the Federal National Mortgage Association on an orderly basis to completely private ownership.

This new FNMA, concerned exclusively with providing an increasing and continuous flow of funds into residential financing will close an important gap in the existing network of financial institutions.

This change will not affect the Government's special assistance to selected types of mortgages which are not yet readily accepted in the private market.

#### URBAN TRANSPORTATION

In the modern city the arteries of transportation are worn and blocked. The traffic jam has become the symbol of the curse of congestion.

It was only a few years ago, however, that we recognized this as a national problem. In signing the Urban Mass Transportation Act in 1964, I said:

This is a many sided challenge. We cannot and we do not rely upon massive spending programs as cure-alls. We must instead look to closer cooperation among all levels of government and between both public and private sectors to achieve the prudent progress that Americans deserve and that they expect.

Under this Act, we are

- Aiding cities to draw the blueprints to modernize, expand and reorganize their transportation systems.

—Helping to train specialists in the urban transportation field.

—Advancing research to improve the system and the service.

—Assisting communities to buy the capital equipment and to build terminals for their transit systems.

We must step up this effort.

In the year ahead, we expect to increase our grants to cities from \$140 million to \$190 million.

*I recommend that the Congress provide \$230 million for fiscal 1970 so cities can begin now to plan the improvement of their mass transit systems and service to the people.*

Urban transportation is the concern of our two newest Departments—Housing and Urban Development, and Transportation.

The Department of Housing and Urban Development is responsible for the development of the metropolitan community—and transportation is an essential part of that effort.

The Department of Transportation is responsible for the coordination of different—but closely related—modes of transportation. Moreover, research facilities bearing on transportation—out of which will come the transportation technology of tomorrow—are concentrated in this Department.

When the Department of Transportation was established in 1966, the Congress required both Secretaries of Housing and Urban Development and Transportation to study this problem and recommend the arrangement which would best assure the Government's ability to meet the transportation needs of America's urban citizens.

On the basis of their intensive study, and their recommendations, I will shortly submit a reorganization plan

—transferring to the Department of Transportation the major urban transit grant, loan, and related research functions now in the Department of Housing and Urban Development.

—Maintaining in the Department of Housing and Urban Development the leadership in comprehensive planning at the local level, that includes transportation planning and relates it to broader urban development objectives.

#### RESEARCH AND TECHNOLOGY FOR THE CITIES

Federally-sponsored research has helped us guard the peace, cure disease, and send men into space.

Yet, we have neglected to target its power on the urban condition. Although 70 percent of our people live in urban areas, less than one-tenth of one percent of the Government's research budget has been devoted to housing and city problems.

We must:

- Learn how to apply modern technology to the construction of new low-income homes and the rehabilitation of old ones.
- Test these ideas in practice, and make them available to builders and sponsors.
- Look deep into the fiscal structure of the cities—their housing and building codes, zoning, and tax policies.

—Learn how best the federal government can work with state and local governments—and how states and local governments can improve their own operations.

—Evaluate our city programs, so we can assess our priorities.

Last year, I sought the first major appropriations for urban research: \$20 million. Congress appropriated only half that amount.

*I once again propose a \$20 million appropriation for urban technology and research.* This will assist the universities and private institutions of America to carry out the studies so crucially needed.

These funds, along with those from other Government agencies, will also help launch the new Urban Institute, which I recently recommended. This is a private non-profit research corporation formed to create a bank of talent to analyze the entire range of city problems.

#### PLANNING FOR THE FUTURE

A passenger on an airline flying from Miami to Boston is rarely out of sight of city lights below.

As our urban areas expand, the citizen's sense of community broadens. He may live in one locality, work in another and seek leisure in still another.

The face of the landscape is changing with our growth.

The question is: *How shall our communities grow?*

Unless we decide now for order and purpose, the result will be surrender to chaos, confusion, ugliness and unnecessary and exorbitant cost.

The key to orderly growth is planning—planning on an area-wide basis.

Planning, both immediate and long-range, is the function and the responsibility of the State and community. But the Federal Government has long recognized the need for its support.

That need grows as the problem grows.

*I urge the Congress to provide \$55 million in Fiscal 1969 to assist planning for the orderly growth of our urban areas, a 22-percent increase over last year.*

So essential is orderly development to the future of our urban centers that we must provide incentives to encourage it. In 1966 the Congress authorized—but did not fund—such a program of incentive grants.

*I ask Congress to authorize \$10 million for a program of area-wide Incentive Grants in Fiscal 1969.*

The Federal share of a project will increase by up to 20 percent of the costs of projects of areawide significance—if they are part of a comprehensive area plan.

The far-sighted community which responds to this incentive program will find its burdens lighter in providing hospitals, roads, sewage systems, schools and libraries.

#### NEW COMMUNITIES

Over the next decade, 40 million more Americans will live in cities.

Where and how will they all live? By crowding further into our dense cities? In new layers of sprawling suburbia? In jerry-built strip cities along new highways?

Revitalizing our city cores and improving our, expanding metropolitan areas will go far toward sheltering that new

generation. But there is another way as well, which we should encourage and support. It is the new community, freshly planned and built.

These can truly be the communities of tomorrow—constructed either at the edge of the city or farther out. We have already seen their birth. Here in the nation's capital, on surplus land once owned by the Government, a new community within the city is springing up.

In other areas, other communities are being built on farm and meadow land. The concept of the new community is that of a balanced and beautiful community—not only a place to live, but a place to work as well. It will be largely self-contained, with light industry, shops, schools, hospitals, homes, apartments and open spaces.

New communities should not be built in any set pattern. They should vary with the needs of the people they serve and the landscapes of which they are a part.

Challenge and hard work await the founders of America's new communities:

—Careful plans must be laid.

—Large parcels of land must be acquired.

—Large investments in site preparation, roads and services must be made before a single home can be built and sold.

—The development period is long, and return on investment is slow.

—But there is also a great opportunity for, as well as a challenge to, private enterprise.

The job is one for the private developer. But he will need the help of his Government at every level.

In America—where the question is not so much the standard of living, but the quality of life—these new communities are worth the help the Government can give.

*I propose the New Communities Act of 1968.*

For the lender and developer, this Act will provide a major new financing method.

A Federally-guaranteed "cash flow" debenture will protect the investment of private backers of new communities at competitive rates of return. At the same time, it will free the developer from the necessity to make large payments on his debts, until cash returns flow from the sale of developed land for housing, shops and industrial sites.

For the local and State government, the Act will offer incentives to channel jointly-financed programs for public facilities into the creation of new communities. The incentives will take the form of an increased Federal share in these programs.

#### A SENSE OF PLACE AND PURPOSE

A city—

Vachel Lindsay wrote—

is not builded in a day.

Nor—we know well—will its problems be conquered in a day. For the city's tides have been ebbing for several decades. We are the inheritors of those tragic results of the city's decline.

But we are the ones who must act. For us that obligation is inescapable.

Our concern must be as broad as the problems of men—work and health, edu-

cation for children and care for the sick. These are the problems of men who live in cities. And the very base of man's condition is his home: he must find promise and peace there.

The cry of the city, reduced to its essentials, is the cry of a man for his sense of place and purpose.

Violence will not bring this. But neither should fear forestall it.

The challenge of changing the face of the city and the men who live there summons us all—the President and the Congress, Governors and Mayors. The challenge reaches as well into every corporate board room, university, and union headquarters in America. It extends to church and community groups, and to the family itself. The problem is so vast that the answer can only be forged by responsible leadership from every sector, public and private.

We dare not fail to answer—loud and clear.

To us, in our day, falls the last clear chance to assure that America's cities will once again "gleam, undimmed by human tears."

No one can doubt that the hour is late.

No one can understate the magnitude of the work that should be done.

No one can doubt the costs of talk and little action.

As we respond to the cities' problems—to the problems caused by the accumulated debris of economic stagnation, physical decay and discrimination—let us recall and reaffirm the reasons for our national strength: unity, growth and individual opportunity.

And recalling these truths, let us go forward, as one nation in common purpose joined, to change the face of our cities and to end the fear of those—rich and poor alike—who call them home.

LYNDON B. JOHNSON.

THE WHITE HOUSE, February 22, 1968.

The message was, without objection, referred by the Speaker pro tempore (Mr. ALBERT) to the Committee of the Whole House on the State of the Union and ordered to be printed.

(Mr. ROGERS of Colorado asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. ROGERS of Colorado. Mr. Speaker, a Federal program of areawide incentive grants as proposed by President Johnson in his message on the cities would offer help to communities across the Nation that are now faced with increasing demand for public facilities. Water and sewer system, hospitals, nursing homes, cultural and recreational facilities all are needed to serve a growing, urbanizing population.

When several communities combine projects to develop public facilities and carry out planning on an areawide scale, they share in the economies that result. This is a proven fact.

And yet this kind of "economy of scale" planning is not as widespread as it should be.

The proposed program would provide supplemental grants to localities engaged in sound, areawide planning. Such grants would increase by up to 20 percent the cost of eligible projects. This would offer a number of important benefits.

It would provide public facilities for a broader section of the population. It would encourage more systematic and coordinated planning by the communities involved. It would result in more localities sharing in the benefits of projects planned with an eye to economy of scale.

The supplemental grants program not only would encourage better planning and save money, but would have other, far reaching effects as well.

Localities already taking an areawide approach would be encouraged to continue. Qualifying areas would be stimulated to develop effective institutions and procedures for dealing with facilities development and other problems. Local funds, released through the economies achieved, could be used to help meet other community objectives.

Joining forces, with the incentive provided by Federal supplemental grants, the cooperating local jurisdictions could provide better service to more people in a larger area at lower cost.

(Mr. HOLIFIELD asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. HOLIFIELD. Mr. Speaker, the President's proposals on insurance in the center cities are both significant and commendable. The problems of obtaining insurance in our blighted urban areas are well known to anyone who has studied the question. The inability to obtain this insurance is a real obstacle to the revitalization of our cities.

The lack of insurance in times as troubled as last summer results in a tremendous financial loss for our cities—a loss which only exaggerates the reluctance of our businesses to invest in our blighted urban areas.

This is a tragic situation we as a nation cannot afford. But it is a tragedy we can avoid in the future—if we have the courage and the foresight to stand behind the insurance provisions in the President's message.

It is obvious that the task of offering adequate insurance to residents of the inner city has become too enormous, and too onerous, to be undertaken by the insurance industry alone. We must combine the resources of the industry itself and of government at all three levels—Federal, State, and local—not only to save our cities from further deterioration, but to begin rebuilding them.

The property insurance proposals in the message call for a partnership between the industry and government which would result in adequate protection for all concerned—for the companies that volunteer to participate in the program, and for the property owner living in the inner city.

The proposals face up to the problems directly—and offer constructive solutions. Let us join together in acting on them favorably.

Mr. PATTEN. Mr. Speaker, the President has asked us to face up to the challenge of our cities. It is as great a challenge as any ever posed this Nation. Our response to it will determine the Nation's well being in the years to come.

Today, approximately 140 million Americans live in urban areas. This number is expected to rise to 280 million by the year 2000.

The millions of new Americans—too many of them poor—who will be in urban communities before the end of the century will place unparalleled demands on the housing industry.

As the President has pointed out, an industry which in its best year produced 1.6 million new units will have to complete approximately 26 million units a year and be prepared to sustain this rate of production for 10 years.

The business community has a vital stake in this effort. The brunt of the drive to keep pace with the demand for housing—the renewing of old cities and the building of new ones—must be borne by private funds, private firms, and private leadership.

Already private enterprise has begun to respond—to an encouraging degree. But much more of a commitment is needed. No concerned American can ignore the plight of our cities any longer. For too many years both the Federal Government and business have avoided the problem. The President has asked us to face up to it today. Both sectors, public and private, can only respond with a commitment of resources as the President has asked. We must support him—and act now.

Mr. KYROS. Mr. Speaker, in the days ahead when we debate over the needs of the cities, we will be listening carefully to hear how America's private enterprise system has reacted to the President's message.

If the business community is largely silent, if it turns a deaf ear to all calls for meeting the needs of our cities, then all our debate shall have an empty ring. For nothing is more crucial to solving today's and tomorrow's urban problems than business and industry assuming a leadership role.

Without the active participation of businessmen in rebuilding urban America, we can accomplish only token success. If we gain only a token success we shall miserably fail, and God help America.

Let us hope and pray that, when we hear from business and industry, we will hear more than token support for the measures in the President's message. Token support is not sufficient to reverse the tides that threaten all who live and learn and work in the cities and metropolitan places—over 140 million people. It has become too commonplace that we cannot hope to succeed without industry support and participation. That is true, of course. But the task ahead is massive. It cannot afford halfhearted or window-dressing-type support.

It is time for all-out leadership by not just 25 leading corporate executives but by hundreds or thousands of such executives who are willing to join forces in solving our urban problem.

We in Congress can do only so much, the President can do only so much, mayors and Governors can do only so much, community leaders can do only so much—unless private enterprise does its full share.

In his message on the cities, President Johnson has offered an opportunity for increased business participation—he has asked that Congress charter national housing partnerships.

These partnerships will be privately

funded and can attract large amounts of private investments that are so necessary to build low-income housing in large volumes.

It is now up to Congress to provide additional incentives to private enterprise and thus encourage their increased involvement in urban problems. I urge my colleagues to join with me in acting favorably on the President's proposal.

Mr. TENZER. Mr. Speaker, the President has spelled out what he believes is necessary to rebuild our cities and now it is up to Congress to act on his proposals. We in this Chamber will be moving forward with our deliberations bearing in mind the temper of the Nation and the degree of public response to the President's appeal for prompt action.

I am greatly encouraged, as most of us are with the reports of strong support for the President's proposals which have already been received from one of the most important of all segments of our public—private industry. This indeed is most encouraging.

Industry has a real stake in the cities. When we think of the vast changes in our skylines, in our new expressways and other great construction projects, we are forced to realize that these changes have been wrought directly or indirectly by the growth of industry and the changing patterns of our private enterprise system. Say what you will about the movement of plants to the suburbs, or about now kinds of service industries, there is no doubt that nearly all business growth takes place in and around our cities.

If there is a crisis in our cities, then our business executives know—or at least are coming fast to know—that their own corporations have a crisis, too. As Fortune magazine recently pointed out, business and the Negro and the city have a common cause in wiping out the root causes of urban decline, blight, joblessness, crime, and other ills. Quoting Fortune:

American business, busily generating change, has in the main stood apart from the responsibilities—and the opportunities—of coping with the community needs that arise from change. . . . The business attitude toward the problems of the city is shifting.

The President's message on the cities offers hope for increasing the opportunity for participation of private enterprise.

Most important it contains a proposal that Congress authorize privately funded partnerships to bring increased private capital to bear on urban problems, particularly the problem of low-income housing. Also by enlisting business skills and putting them to work in our cities, we can begin with confidence the massive task that lies ahead.

I call to the attention of my colleagues the following editorial which appeared in the February 24, 1968, edition of Newsday as further evidence of the expressions of support already received for the President's proposals:

[From Newsday, Feb. 24, 1968]

#### PARTNERSHIP IN THE SLUMS

President Johnson's message to Congress on the needs of the cities is impressive, not only for his proposal to provide 6,000,000 new housing units for low and middle income families, but also because of his summons to

the private sector of the economy to join in the replacement of slum housing.

Certainly if our private enterprise system can pour out new cars, new TV sets and luxuries of all types, why could it not also help to pour out new housing at a rate unprecedented in our history? It is a challenge peculiarly fitted to the mass production economy which began when Henry Ford created the assembly-line system for building motor cars after World War I.

Six million new units would be more than 10 times the 560,000 homes and apartments built with federal aid or incentives during the last 10 years. Both single family homes and apartment rental units would be included. In addition the President proposes federal help for another 20,000,000 new homes for families above the poverty level but still in need of better housing.

Bold action is necessary if the slums are to be rebuilt and if all Americans are to have the opportunity to live in decent houses. Retired Gen. James M. Gavin spells out the challenge in an article in this week's Saturday Review. Gavin, now head of a management consulting firm, says:

"To act with sufficient energy to solve the housing problem we need to end the tired debate about the public vs. the private sector, or liberal-conservative methods. The '60s are not the '20s. We live in a mixed economy. The debate between those who believe that private industry is always bad and federal intervention always good, or that the federal government is always wrong and private industry is always right, has ceased to have any meaning. What we need are new inventions; new ways to attack our urgent problems."

The President's program seeks to establish a minimum standard for housing in America. It will be costly, to be sure, but it is a task that cannot be avoided.

I strongly support the President's goals and the proposals he has set forth today to meet those goals. They present a challenge to all—public, private, and the citizen.

Mr. McFALL. Mr. Speaker, satisfying the need for public facilities to serve the growing urban areas of the Nation—small towns and suburbs as well as the cities—is a major challenge and an unprecedented opportunity to improve the quality of urban life for Americans in communities of all sizes.

Communities in our suburban and rural areas are faced with growing demands for public facilities and growing problems of financial responsibility. The possibility that these necessary facilities—sewer and water networks, hospitals, parks, and public buildings—might be built with poor planning or none at all warrants our utmost concern.

President Johnson has called upon Congress to fund an areawide development grant program. This program will help the growth areas of our nation install public facilities to serve their people.

And areawide cooperation for the economical provision of public facilities, under local initiative, is the goal of this proposal. It will offer incentives to communities to plan for that healthy and orderly growth without which the Nation as a whole will suffer.

In effect it will allow the Federal Government to serve as a catalyst to encourage cooperative local projects.

Localities engaged in sound areawide planning should be encouraged through supplemental grants. Also, those who do not now subscribe to this concept should be made aware of the urgency of systematic planning efforts.

Communities across the Nation are faced with unprecedented demands for public facilities of all kinds: for meeting such basic requirements as water systems and sewer lines; for medical facilities—hospitals, nursing homes, extended care facilities; for cultural and recreational facilities that enhance the quality of our everyday lives—libraries, parks, and community centers.

Many grant programs—such as open space, water and waste disposal systems—partially finance these types of facilities by requiring that projects be consistent with areawide planning. Others do not.

A program to provide supplemental funds for projects that meet specific planning requirements would encourage cooperative efforts to meet an entire area's public facilities requirements while promoting other beneficial consequences. For example:

First. An areawide development grant program would encourage communities to construct public facilities more economically through joint support.

Second. It would encourage the development of effective institutions—such as areawide councils of government and planning councils—for attacking their mutual problems in a coordinated and systematic fashion, rather than on a piecemeal basis.

Third. It would encourage localities already undertaking areawide planning to accelerate their efforts. It would help them to reach compromises and workable arrangements to qualify for supplementary grants.

Fourth. Finally, it would release local funds to realize or hasten community development objectives which otherwise might be slowed or deferred.

The importance of a program which both saves communities' money and makes Federal expenditures go further cannot be overestimated. The joint action, encouraged by this grant program, would achieve economies of scale and provide levels of service unavailable to a single locality going it alone. And certainly, such cooperation will assure orderly growth and development.

For example, a community might submit plans for a library or a water system designed to serve a cluster of small rural communities or even a whole developing urban area—including a specific blueprint for future growth. This type of areawide planning makes better sense than several small facilities built to serve only a limited area. It is a rational allocation of scarce resources—money on the local and national level—and is the only feasible path to follow, if we are to achieve planned development.

Moreover, by demonstrating the efficiencies that can result from planning and programming for public facilities on an areawide basis, the program would earn its cost many times over. It would reward innovative approaches to solving those unpostponable problems of public facility construction faced by communities of all sizes—and such approaches would result in solutions most economical in the long run.

Mr. Speaker, I applaud President Johnson for recognizing the heavy burdens public facility investments are plac-

ing on the rapid growth areas of this country. And I commend his proposal for an areawide development grant program to offer a measure of relief for communities willing to put planning into action on an areawide basis.

The Federal Government through an incentive grant program can point the way to increased cooperation among local jurisdictions with similar needs and aspirations. It is a proven fact that when a group of communities join forces to provide a needed public facility, the result is better service to more people in a larger area at lower cost. That, after all, is what the taxpayer is seeking for his dollar.

Mr. ANNUNZIO. Mr. Speaker, those of us who are privileged to represent urban areas are very concerned about the almost incomprehensible problems of the cities. The newspapers and people decry crime in the streets and race riots and general disorder. But we know these are all just specific instances of a range of connected problems collectively known as poverty.

Thankfully, we have been able to launch an attack on the economic and cultural poverty of the ghettos' residents through the Office of Economic Opportunity. The work done by that Agency is necessary, but it only begins to scratch the surface of the problems. What we need, what we must have if the cities are not to languish and degenerate into little more than huge islands of despair, is a concerted, national attack on the range of problems plaguing our cities. We must work so they do not become simply gigantic traffic jams. We must labor so that even the most affluent of us is not choked by the noxious fumes given off in a city's daily life.

That is why the President's message on urban problems is so important. It lays bare the nature and complexity of problems now facing the cities. But it also shows how we all—and especially the Congress—can work to keep those problems from growing and new one's from arising.

Mr. NIX. Mr. Speaker, now that President Johnson's message on the cities has been delivered, the question is, Shall we, in the august body, deliver?

This is my reaction: We must and shall deliver. One of my reasons is the President's request for \$1 billion for model cities. For the first time in our history we are now giving our cities a real opportunity to combat their slums and blight in the only manner in which they can successfully be eliminated—by locally developed and executed programs.

Model cities enable cities to coordinate all of their local resources, both public and private, with State and Federal aids, in a combined, really massive assault on all problems of slum living: substandard housing and education, poor health, unemployment, and illiteracy.

The programs are going to develop from the local communities upward and not from Washington downward, as has been the case too often in the past. In other words, the residents of the slums themselves, are going to work together with city, State, and Federal officials, in determining what can be done about the conditions of their neighborhoods,

and how it can be accomplished most speedily and efficiently.

In the first round of approvals, 63 cities, large and small, were approved for model cities planning grants. Some 4 million people live in the model city neighborhoods of these cities. They suffer more from poverty, unemployment, and housing than the average American. But they are determined to do something about their plight.

Can we afford to let them down? I think not, and I ask you to join me in supporting the President's request for model cities.

Mr. FUQUA. Mr. Speaker, we have entered a new era of business and industrial statesmanship. President Johnson in his urban and housing programs has extended and called for greater support of this activity to meet our urban needs today.

The response of business to public service has been encouraging.

More businesses have worked with government and public bodies to combine public and private resources to serve housing, employment, and other needs.

This new partnership of private and public efforts can become one of the most powerful forces in our urban future.

Those who work at the community level have for many years known what can be done—because they have done it. Business leadership and resources have been applied locally through urban renewal, planning, and housing programs in the community.

But sporadic local commitment is not enough. As the Federal Government seeks to move into volume production, it must ask the business community for its nationwide commitment of talent, energy, and imagination. As the President has recognized, the creative partnership of business and government which will result will be the major impetus in urban improvement. We must work with him to forge that partnership.

Mr. KIRWAN. Mr. Speaker, I heartily support President Johnson's recommendations for a stepped-up urban renewal program.

This time-tested Federal-local program, authorized in 1949, has proved its worth over the years. Today, it is being used in more than 900 large and small communities in 48 States, the District of Columbia, Puerto Rico, the Virgin Islands, and Guam.

In addition to the impressive effects of this program on the physical rebuilding of our cities, it has generated an impressive financial record. Since 1949, \$7 billion in urban grants have been authorized. For each Federal dollar, however, private enterprise has invested about \$4½. Furthermore, the real estate tax return from completed projects is about 4½ times the tax return prior to redevelopment.

Over the years urban renewal has meant the rebuilding and revitalization of many downtown areas in the Nation's cities. It has resulted in the restoration of industrial and commercial complexes. It has brought about the public and private construction of new housing, as well as the rehabilitation of usable housing for low- and moderate-income families. Finally, it has rejuvenated many ailing

neighborhoods and put them on the road to good health.

We have found that urban renewal has a contagious effect. When a blighted neighborhood is improved, the positive effects are felt by adjoining areas, and the spirit of improvement spreads.

Today, there is a new face on urban renewal. Its top priority mission is to help the poor through improved housing and expanded job opportunities.

I sincerely believe that the urban renewal program must be expanded as recommended by President Johnson, if we are to attain our national housing goals of "a decent home and a suitable living environment for every American family."

Mr. PRICE of Illinois. Mr. Speaker, at long last we have President Johnson's message on the cities. It is full of new ideas, new legislation, new ways to meet the rising crisis in our cities.

One of the outstanding parts of the message to me is that dealing with the model cities programs. I have been a partisan on the side of model cities ever since it was first introduced 2 years ago. I am still an enthusiastic supporter of model cities, and believe that the President's request for \$1 billion is really a minimum request.

The potentialities of model cities is enormous. Imagine, if the \$1 billion is approved we will have, within a couple of years, 130 or more local laboratories of experimentation in ways to solve the problems of slum living.

Better than that, the people in charge of the experimentation will be those actually involved in the experiments. The people living in the slum areas where model cities techniques are to be created and tried will be responsible for the planning and execution of the programs designed to improve their living conditions.

This is the logical end of the long, long road we have been traveling for three decades. For 30 years we have been trying one program after another to cure the slums, to help the people forced to live there. Some worked partially, others not at all.

Now, instead of trying to find the answers ourselves, we are asking the people in the cities themselves—local public officials and residents alike—to come up with answers. Will they? Maybe yes, maybe no. Probably some of both. But we'll never know unless we give them the chance. The \$1 billion requested by President Johnson will give them the chance. And I am going to do my best to see they get it.

Mr. ST GERMAIN. Mr. Speaker, currently over 70 percent of our Nation's population now lives in urban areas.

Realizing the significance and magnitude of the city problem, the Congress enacted remedial legislation whereby local governments in working in conjunction with the Federal Government would be given the means to overcome the problem of the cities.

One of the most significant legislative achievements toward this end was the model cities program. This program would attempt to completely rebuild entire neighborhoods of slums and blighted areas. It is premised upon a finding and declaration by Congress that improving

the quality of urban life is the most critical domestic problem facing this Nation.

Having been intimately involved in the drafting of this legislation as a member of the Housing Subcommittee of the House Banking and Currency Committee, I am fully convinced that this program will greatly contribute toward overcoming this great problem that faces our Nation. It is a straightforward attempt to remove the cancerous slums of our cities which feed crime, delinquency, and disease, and drain our local governments of the strength needed to progress as they should. Though the legislative machinery to meet the great problem of our cities has been made available, the fuel has not and our urban programs are proceeding at a snail's pace in a jet age.

In a recent message, President Johnson focused attention upon America's urban problems. Mr. Johnson's message on the cities is essentially an appeal to the Congress to provide the necessary funds in support of programs designed to overcome the great problem of our cities. In his message, the President has asked this Congress to renew its pledge to eliminate the slums and blighted neighborhoods of our country and to continue the full development of these areas. President Johnson has asked the Congress to authorize and appropriate \$500 million of urban renewal funds for use in the model cities program, and has requested \$1.4 billion of advanced urban renewal appropriations for fiscal year 1970.

Coupled with his request for additional funds, the President has called for a change in the urban renewal process that would enable our communities to gain the greatest good and the most expeditious action from renewal funds each year.

The urban renewal program of the Department of Housing and Urban Development has distinctly proven its ability and strength to rebuild our cities and towns. Let us now, in accordance with the President's request, provide the necessary funds so that these programs may attain their true potential. We have a firm commitment to the cities of our Nation in the form of legislation already enacted and it is time that we live up to this commitment by providing the necessary funds.

Today there are 1,949 approved urban renewal projects in over 900 communities in our 48 States, Puerto Rico, the District of Columbia, Guam, and the Virgin Islands. Total grant authority approved for these projects is \$6.22 billion.

Of these 1,949 approved projects, 570 are in planning stages, over 1,000 are in various stages of execution, and 333 have been completed.

Through 1967, the cumulative total of the number of dwelling units which had been built in urban renewal areas had reached approximately 107,000 of which nearly 100,000 are occupied. One-fourth of these new dwelling units are for low- and moderate-income families.

But urban renewal involves more than just new construction. In more than 620 projects in 375 communities there is a great deal of rehabilitation work under way. The rehabilitation workload at the end of 1967 reached a total of 96,298

structures, involving more than 211,000 dwelling units. Another 119,000 dwelling units were scheduled for rehabilitation in projects still in the planning stage.

These figures of accomplishment are even more impressive when you remember that each Federal dollar for urban renewal results in \$5 of private investment. Furthermore, the real estate tax return from completed or in process urban renewal projects is about 4½ times the tax return prior to renewal.

While much has been done in rebuilding our cities through urban renewal, much remains to be done.

This is evidenced by the great demand for urban renewal assistance from communities across our land. At the end of 1966, the Renewal Assistance Administration of the Department of Housing and Urban Development had applications for projects amounting to \$1.4 billion. A year later, at the end of 1967, the demand on hand had risen to a total of \$1.8 billion. This demand grew despite the fact that \$50 million had been approved for projects during that year.

Communities have recognized the value and the importance of urban renewal, which has served as the catalyst for the rebuilding and the revitalization of communities.

Over the years, the focus of the urban renewal effort has been changed. What started out as a purely clearance and redevelopment program has now evolved into a program designed to meet the paramount needs of the people of the cities.

This has not just happened. HUD and its Renewal Assistance Administration recognized that the principal immediate needs of most cities are housing and jobs.

In his message on the cities, the President has underlined this recognition by calling for an acceleration of that part of HUD's urban renewal program which is aimed primarily at the rehabilitation of existing housing in renewal neighborhoods. Called neighborhood development projects, this acceleration process would allow cities with large blighted residential neighborhoods which are to be renewed primarily for the benefit of the existing residents of the neighborhood to have annual action programs.

It cuts the time between planning and action by requiring only that degree of planning necessary to indicate the city's concept and standards for renewal and to specify the actual work program which could be undertaken with confidence in that year. This new process would eliminate the time consuming, long term, and detailed planning necessary when a renewal area is to be completely redeveloped for a new use.

As I see it this new renewal approach would: enable local communities to take rapid, visible action to upgrade housing in urban renewal areas and provide psychological impetus to the project; provide good housing for low- and moderate-income families now living in substandard conditions in the least possible time; and help prevent further deterioration or decline in the neighborhood during the planning stage.

It would allow action during and concurrent with planning and give our cities and towns a faster return on their in-

vestment. Needless to say, this new flexible approach will be particularly relevant to our model cities program.

I support President Johnson's request for increased urban renewal funds and for his neighborhood development program which will provide our cities with annual action projects. I support them because I recognize the hard fact of life that we must continue to provide help for our cities and towns in their efforts to rebuild and attain our national housing goal of "a decent home and a suitable living environment for every American family."

Mr. THOMPSON of New Jersey. Mr. Speaker, as far as I am concerned, the President's message on cities is outstanding for one main reason—its request for \$1 billion for model cities.

This is the kind of legislation the Nation has been waiting for ever since passage of the Housing Act of 1937. For 30 years we in the United States have been waiting for the kind of housing and urban development bill that would encompass all the problems of urban poverty; not just housing, not just clearance, not just health—but all of these and more.

Now, for the first time, we have that kind of legislation. If we fail to give President Johnson the kind of support he has requested we fail the people of the United States. More than that, we make a mockery of the model cities legislation we have already passed, and the appropriations—modest though they are—that we have approved. Many of us have worked hard and long to make model cities legislation come true, and we feel that the moment of truth is here.

Model cities is the comprehensive kind of legislation that promises to do the whole job; not just a bit or piece. It gives the cities the utmost flexibility in planning and in carrying out those plans.

It gives a role to the people who live in the slum areas they have never had before; a chance to plan their own futures. Maybe they will succeed, maybe they will fail, but it will be their own failures or successes, not one's thrust upon them from above or below. Personally, I am convinced that when the people in our local communities get a chance to determine their own environments, their own needs for better schools, housing, and jobs, they will succeed beyond all our expectations.

They deserve that chance. And model cities gives it to them. That is why I say, support President Johnson's message.

Mr. KUPFERMAN. Mr. Speaker, inadequate housing is one of the Nation's greatest problems. The President, in his message read to us today, puts this at the top of his legislative list, and I agree.

No major city in America has eliminated its bad housing. Over 4½ million urban families live in structures of such disrepair as to violate decent standards. To meet the challenge of the future we need to provide at least 50 percent more housing annually than has been built in any year in the past. We do not provide sufficient low- and moderate-income housing, of adequate quality, at a reasonable price.

This is at the heart of our urban problem. For substandard housing leads to the development of widespread slum

areas. Inadequate and insufficient housing contributes to the hopelessness of the ghetto resident; it is a factor in high rates of crime, delinquency, and disease. Largely inadequate housing is a characteristic of the Harlems, Watts, and other slums of cities large and small.

Housing is central to all of our hopes for remaking the urban areas. Unless there is better housing available to those who are not now adequately housed, we will be hampered in our efforts to solve the problems of employment, education, and all the other problems which affect the ghetto.

I will go further and say that I feel there is less likelihood of making an impact on any of our urban problems unless at the same time the housing choices in this Nation are also expanded and equalized.

We must provide an adequate supply of decent housing for low-income people unable to pay the full cost of housing in the private market. With the President's proposed program we can hope to do so.

I urge my colleagues to support the campaign for more—and better—housing. This is a nonpartisan issue. It was a Republican, the late Senator Robert A. Taft, who led the fight for slum replacement. We must continue that fight.

Mr. ADAMS. Mr. Speaker, one of the most significant developments of recent years in the housing and urban field—and now so strongly stressed in President Johnson's program—is the total approach.

Time was only a few years ago when private was private and public was public, and never the twain could meet. We deliberately maintained walls and gaps between private and public enterprise in dealing with our housing and urban problems.

Thank heaven we have changed that. And I am glad to see the heavy stress that President Johnson in his message on the cities, has placed on the role of the private sector in meeting public needs, and role of public action to support private progress. We need them both and we need them working closely together.

Look at the changes that have occurred:

Private developers are now initiating, building, and in some cases even managing low-rent public housing.

Public funds, through subsidies and low-interest rates, are making it possible for low- and moderate-income families to live in privately owned rental housing.

Private funds, along with public money, are now going into new methods and materials, into research, and into practical demonstrations to lower cost housing, for efficient means of rehabilitation, for better design, for planning and facilities—to bring better housing to more people and improve the urban environment.

We now find private and public joining together to produce apartment units at lower cost, and to improve housing without displacing people. We must keep the public financing of these joint ventures moving ahead.

And President Johnson has made such a proposal—authorization for the formation of privately funded partnerships.

The express purpose of these partnerships will be to join private capital with business skills to help close the low-income housing gap.

It is a worthwhile proposal and one which merits the enthusiastic support by Congress.

Mr. ROSENTHAL. Mr. Speaker, President Johnson has called for the building of 300,000 new low- and middle-income housing units beginning in fiscal 1969. In so doing he has recognized one of the great problems facing our country—inadequate housing—and he has called on us to move decisively in meeting it.

Today's message calls for an expansion of existing housing programs—such as public housing and rent supplements and for the enactment of new programs—such as the interest payment program.

The urban population of this great Nation will increase drastically over the next 30 years—and so will the demand for adequate housing. But even if our population stood still we would still have to come to grips with the fact that there are approximately 6 million substandard housing units being lived in in this country today. This in itself is a problem demanding our attention.

When both these factors are considered together, it becomes imperative that we act now—and decisively. The President has recognized the full dimensions of the problem—and he has asked us to join him in a campaign to solve it. We can do no less than give him our full support.

Mr. BOLAND. Mr. Speaker, our country is faced today with what seems to be two incompatible realities. We are at once confronted with a crisis of unmet needs in our cities and other important demands on our resources which require that we keep spending to a minimum.

At this critical juncture we cannot decide on an either-or choice of action. We must do both. The blight, despair, and human frustration in our urban areas cannot wait for more affluent days. Our only realistic course of action is to take a hard look at the way we spend money for our cities and make sure that every dollar spent brings a maximum return in making our cities better places in which to live.

In his message on cities, President Johnson has set his priorities and asked this Congress to appropriate \$1 billion for the model cities program. I support that decision to concentrate resources in this new program and I hope my fellow Congressmen will recognize the prudence and necessity of allocating the requested \$1 billion for model cities.

Model cities is not a new program in the sense of spending new money to achieve new objectives. Rather, model cities is a program designed to accomplish the best possible use of the over 200 categorical grant-in-aid programs already created by Congress to solve urban problems.

An editorial published February 23 in the Springfield Daily News points out how President Johnson's Model Cities program will help knit together the efforts to rebuild America's cities:

**SAVE THE CITIES**

No American seriously concerned with the decay and despair of the cities can fault the President's ambitious program calling for a

massive rebuilding program during the next 10 years.

The important thing, nonetheless, is that a good start has already been made through urban renewal and antipoverty, and now rent supplement and Model Cities programs. Model Cities—in which Springfield has a vital stake—is proposed for a \$2.5 billion expenditure over the next three fiscal years. In addition, the President seeks \$500 million in fiscal 1969 for urban renewal work related solely to the Model Cities program.

Funding is not likely to keep pace with hopes in Model Cities and other areas. But this must not deter us from our urban goal. It is encouraging at the same time that much of the stress in the President's housing and urban message focuses on the role of the private sector which is being asked to cooperate to an ever increasing extent with the government's attack on urban blight.

It should be clear to all by now that—as the President stressed again yesterday—"America's cities are in crisis" and "There is no time to lose." What is needed now is the determination to go out and do the job that must be done.

Every model cities supplemental dollar will attract 10 additional dollars in local public funds, private investment, and other Federal funds. The great quality of the model cities program is that it allows these selected cities to insure that the effect of these dollars will not be dissipated in fragmented, overlapping efforts. In a period when we must measure the value of every dollar spent against a yardstick of human betterment, the model cities program provides an effective channel for concentrating the impact of limited resources.

For the 63 cities and counties selected for the model cities program last November and for the 70 that will be chosen this year, model cities means new hope—a new hope of transforming slums into decent places to live. With the new tools model cities offers, these cities can chart a path that will lead to the fulfillment of long standing unmet needs.

The urgent needs of the 4 million people living in the first 63 target neighborhoods in undeniable:

Nearly a third of the 1 million families they constitute are living below the poverty level.

One-fourth of the housing in these neighborhoods is substandard.

One out of three adults has an elementary education.

Unemployment is twice the national rate and the number of those working below their capacity is too great.

Across country these 63 cities, large and small, have begun planning to change these intolerable conditions.

Within days after the November announcement of cities, representatives of the Department of Housing and Urban Development and other Federal agencies were visiting these cities to pledge full cooperation in carrying out their programs. The cities will have the full range of Federal urban programs, technical assistance from Federal interagency teams, and model cities supplemental funds to use for filling gaps in existing programs and exploring new solutions. The challenge is to coordinate these tools along with other private and public resources in a locally tailored program to meet much problems as insufficient housing, unemployment, poor education, and ill health.

Applications prepared by these cities last spring as the first step in the model cities effort show that they are ready to meet the challenge. These applications reveal soul-searching analyses of basic problems and solid constructive approaches for attacking them. A few examples will illustrate my point.

In Seattle, Wash., where 10 percent of the employable men living in the model neighborhood area are jobless, the city proposes a comprehensive employment program to recruit, train, and find new careers for the unemployed. Block workers from the model neighborhood would seek out fellow residents who have long since given up hope of finding a decent job. Employment services located in a multipurpose community service center would plan a training program leading to a new career.

Complementing these activities, small commercial shops to be opened up in apartment buildings throughout the neighborhood would create job opportunities for other residents and at the same time provide a valuable resource for the community. Financing for shops and training for budding entrepreneurs would come through the combined efforts of the Seattle business community and the Small Business Administration.

At the other end of the country Baltimore, Md., proposes using the superior education and medical facilities of a great university in combination with the talents and training of Negro medics returning from Vietnam to improve health and employment in the community. Model neighborhood residents would be trained as professional health aides to work with the medics in special health programs for the model neighborhood.

Recognizing that good education for our young people will be a key to a better future for our cities, Oakland, Calif., proposes using a combination of professionals from the business community and parents from the neighborhood to improve schools. Local industry would work with the school system to make curriculum more relevant to future job needs and volunteer professionals would teach classes in line with their particular talents. Parents working as teacher aides would earn additional income while playing a vital role in their local schools.

These are but a few of the innovative ideas that the cities have suggested in their model cities applications. Two key elements are apparent—cities are planning to use a combination of public and private resources to meet multiple needs, and they are anxious to explore fresh approaches to old problems.

Herein lies the significance of the model cities program. Concentration and coordination will multiply the impact of dollars spent in this program. Communities can work out solutions that will best fit their needs. Smaller cities like Eagle Pass, Tex., and Gainesville, Ga., have needs different from those of New York City and Chicago. Within the framework of model cities communities of all sizes and economic conditions will be able to pursue their own answers to problems of urban blight.

In the short range, model cities means better lives for the people living in the

model neighborhoods of the 63 selected cities and the 70 more to come. In the long run, model cities will mean a series of tried and tested techniques which cities everywhere can use to meet urban problems. We have long paid lipservice to the concept of our localities as experimental laboratories for problem solving approaches. The model cities program gives the cities the freedom to make this concept a reality.

During this year these 63 cities will be building on their original applications to plan a 1-year detailed action program for upgrading model neighborhoods and a long-range 5-year program. We must take action now to make sure that the hopeful approaches these cities are now developing will reach the stage of actions. The \$200 million of model cities supplemental money we appropriated last year is only a small beginning toward what these 63 cities will need to carry out their programs.

The \$1 billion requested for model cities by the President in his cities message represents \$500 million for direct model cities supplemental grants and \$500 million for urban renewal projects in model cities areas. All but \$350 million of the urban renewal funds has already been authorized by Congress and our task in this session is to give full authorization and appropriation so that these communities can begin the hard work ahead of them.

The question our Nation faces today is not whether we will devote part of our resources to break the forces of ignorance, poverty, and despair that grip our cities—the need is too great to require an answer. What we must decide is how we can best use our resources to open up the doors of opportunity for our inner city dwellers.

I would suggest to you that appropriating \$1 billion for the model cities program will be a wise investment in, not only the future of approximately 130 cities that will participate in the program, but—even more importantly—wise investment in the future of America.

Mr. EVINS of Tennessee. Mr. Speaker, President Johnson's message on the crisis of the cities is certainly a challenging and compelling document.

This eloquent message is a catalog of the problems that beset our cities—large and small—progress made toward solution of these problems—and of the President's proposed response to these problems.

Mr. Speaker, it is time that our larger cities are caught in a population stragulation—our small cities are caught in a population decimation.

Many observers feel that the Nation is careening downhill toward its third great crisis—the crisis of our cities. These authorities say the first great crisis was the Civil War. The second great crisis was the great depression. The third is said to be the continuing deterioration of our cities under the massive pressures of the population explosion—coupled with the impact of great and sudden change in many dimensions affecting urban life.

All of us know the symptoms of the accelerated urbanization that has already placed seven out of 10 people in this Nation on 1 percent of the land.

We must proceed in an orderly way—in a society of law and order to solve the problems created by this transition. We must meet the challenges of change.

Certainly greater participation by private enterprise in programs designed to assist our cities is needed. The President is to be commended for this recommendation.

The President makes a number of other sweeping recommendations in regard to programs for our cities that the Congress must carefully study and evaluate.

The problems of our towns and cities have been developing over the years and require our constant, careful, and unremitting attention.

Certainly we must continue to make further progress in the solution of the problems of our cities.

Mr. BUTTON. Mr. Speaker, my colleagues have today and in the past offered many good solid reasons for supporting the model cities program and the approach it offers for solving the problems of the cities. President Johnson's message on the cities requests that we continue our support of this program with \$1 billion. I think we should support this request which will enable this unique and highly promising program to continue proper operation.

My support for model cities is for several reasons. I want to talk briefly about one of them which I feel is absolutely vital to a successful national urban effort. I am convinced that we will never make real headway in the battle against urban blight unless we can enlist the support, the skills, and the resources of our greatest national asset—private enterprise.

The Model Cities Act was one of the first pieces of legislation to call for maximum participation of private enterprise in the effort to rebuild our cities. Model cities encourages and requires a strong local alliance between the city government and business to get the job done. Business in recent years has shown an increased awareness of social needs. In its recent issue on the cities *Fortune* magazine referred to the model cities program as "perhaps the most important new example of Federal-local cooperation."

Business is looking for ways to become involved, the model cities program offers them the opportunity to effectively employ their resources right at home.

The numerous examples of business participation in preparing the 193 applications for planning grants last May indicates readiness to meet the challenge. McDonnell Aircraft lent the services of one of their top management specialists for several months to help draw up the St. Louis application. In Poughkeepsie, N.Y., IBM Corp. worked with the city in the application effort. Kodak in Rochester, N.Y., is now starting a program to help establish small industry which will mesh with the model cities program. In application after application local businesses committed themselves to supporting the local model cities effort. To me this local business interest is one of the most encouraging and promising elements of the model cities program.

President Johnson's message on the cities calls for funding the model cities

program at a level of \$1 billion. I ask you to support that request.

Mr. KORNEGAY. Mr. Speaker, I want particularly to point out the emphasis that President Johnson has placed on the role that private enterprise can play in dealing with our housing and urban problems.

The Federal Government cannot be the sole agent of urban change. The job requires the talent, resources and flexibility of private enterprise.

There are already indications that business is responding. A list of major industries and businesses that are now channeling resources of talent and money on a high priority basis into our housing and urban areas is beginning to read like a blue-chip list from your stockbroker.

Some corporations are actively involved in planning and development of housing and new communities, in research and development into more efficient methods of mass transportation, in job training and recruiting from the low-income group.

Some companies have been involved with investments and capital on a large scale in urban renewal.

Large materials producers are moving on their own initiative into the fields of rehabilitation and upgrading of slum areas.

Our large insurance companies are devoting heavy capital investments in renewal, in redevelopment, and now have committed an initial \$1 billion to low-cost housing financing in our blighted areas.

But much remains to be done. I commend the President in his efforts to keep this partnership of business and Government growing.

Mr. BARRETT. Mr. Speaker, the President's message on the crisis in our cities is one of the most far reaching proposals ever made in the field of housing and urban development. It fully recognizes the magnitude of the problem and it further recognizes that a meaningful answer requires the involvement of every segment of our economy—Federal and local government, and business, labor, and civic leadership.

Undoubtedly responsible citizens in every field will heed the President's call and rally to the support of this year's legislation and beyond that will work vigorously to carry out these programs. One of the first to respond is the president of the United Auto Workers, Walter P. Reuther. Under unanimous consent I include the text of Mr. Reuther's message to the President at this point in the RECORD:

Mr. President, I congratulate you on the vision and the commitment that inspired this historic recommendation on urban affairs. The scope and magnitude of the proposals are such that they will begin to achieve the goal of the 1949 Housing Act, of providing all Americans with a suitable living environment. The priority that urban affairs must have in our national policy consideration has begun to be realized. It is imaginative and innovative. It suggests using the public and private sectors in ways that will permit both to work together so that we can make all our communities livable.

We especially support those efforts that start to provide more housing—rental and ownership—for our low income families. The proposed interest rate subsidy, increasing model cities funding, developing new towns based on diversity of income and race, and

the long-term funding of these programs provide the tools necessary to do the job. We are especially gratified by the proposed changes in F.N.M.A. for they will make it possible to utilize efficiently union pension funds for housing. In addition, the consortium proposal enables private enterprise to place its resources behind social development and stimulate the creation of local housing consortia. The FNMA and consortium proposals permit the private sector to harness its energies in socially useful ways that will benefit the entire Nation.

The Housing and Urban Development Act of 1968 will be one of the most important pieces of legislation that the Congress has considered in recent years. Your proposals deserve full support. They should be enacted promptly. We will work hard to help pass them.

Mr. PEPPER. Mr. Speaker, President Johnson's proposal for expansion of the urban renewal program is one of the most essential proposals before us. It is critical to the success of the model cities program. It is just as critical to the towns and cities which, while not yet in that program, are moving ahead in eliminating blight and rehabilitating slums.

The President has called for \$500 million in urban renewal money as vital support for the model cities program. And he has called for a stepped-up renewal program in all urban areas over the next 2 years.

These grant funds will mean \$8 to \$10 billion in private development added to the public funds.

It will mean a rapid expansion of rehabilitation and neighborhood conservation efforts well underway in most of our towns and cities.

It will mean opening needed land in our cities for low- and moderate-income housing—where most of the people are and will be.

It will mean strengthening the programs of code enforcement now in progress in scores of towns and cities.

It will mean parks and playgrounds instead of garbage-strewn streets for children to grow up in.

It will mean changing the lives of thousands of families, and turning areas that were once the shame of the community into inviting neighborhoods that will inspire pride and hope.

The towns and cities want and need even more than the President proposes. We must not give them less.

Mr. Speaker, I highly support the President's recommendations for combating the crisis of the cities. We should all strongly support such a proposal and work for its passage before it is too late.

Mr. ANDERSON of Tennessee. Mr. Speaker, satisfying the need for public facilities to serve the growing urban areas of the Nation—small towns and suburbs as well as the cities—is a major challenge and an opportunity to improve the quality of urban life for Americans in communities of all sizes.

Communities in our suburban and rural areas are faced with growing demands for public facilities and growing problems of financial responsibility. The possibility that these necessary facilities might be built on a haphazard, individual basis, without regard to economy of scale and area-wide needs, warrants the utmost concern.

The area-wide incentive grant program would, at a modest cost, encourage the planned provision of public facilities to serve the most people at the lowest cost in our growth areas. By providing incentive grants to be applied to projects planned with an entire area in mind, the program would demonstrate the efficiencies that can result from planning and programing for public facilities on an area-wide basis, and earn its cost many times over.

Projects included under 10 separate Federal grant programs and administered by five different departments and agencies would be eligible to receive supplemental grants. Eligible projects would include basic water and sewer facilities, medical, cultural, and recreational facilities, among others.

The Federal Government would point the way through such incentive grants to increased cooperation among local jurisdictions with similar needs and goals. It is a well-documented fact that when a group of communities join forces to provide a needed public facility, the result is better service to more people in a larger area at a lower cost. We cannot afford to spend our tax dollars any less wisely.

Mr. BROWN of California. Mr. Speaker, President Johnson has called for a low-income housing program that will see the start of 300,000 units in the next fiscal year and the construction of 6 million in the next 10 years.

That is a large order. We have never approached that in the past. Some may ask whether we should do it at the present.

I say to you that there is no longer time to ask whether we should undertake this effort. We all know the dimensions of the crisis afflicting our cities—and at the core of this crisis is housing. Not only do we have to work with the millions of substandard units currently lived in our cities—we must develop programs to assure millions of new Americans each year adequate shelter.

The question is no longer should we. It is simply how can we. And today the President has proposed an answer.

He has called on Congress to enact legislation which will enable the Federal Government, through new and existing programs, to move into volume production.

The need is clear. The time for action is now. It is up to us. I urge you to join me in the President's campaign to construct 6 million units of federally assisted housing over the next 10 years. I urge you to support his proposals.

These and new broadened means for combining private and public action stand ready now, thanks to these new breakthrough efforts, to meet the President's goal next year and in the next 10 years. We must back this goal to the full.

#### CITY INSURANCE

Mr. BURKE of Massachusetts. Mr. Speaker, I would like to express my support for the President's proposals concerning the insurance of property in our center cities.

I do not regard this as an attempt by the Federal Government either to com-

pete with, or substitute for, the efforts of private industry. Nor can it be construed as a move to encroach upon State or local jurisdictions. Rather, these proposals merge the talents and resources of all involved to achieve what I believe is a workable solution to an admittedly difficult problem.

Under this program, the insurance industry itself would take the lead in forming voluntary plans assuring all property owners fair access to property insurance.

Second, the States in cooperation with the industry, would form pools to insure properties that the companies otherwise might not accept.

Third, it creates a National Insurance Development Corporation, representing all interested parties, to back the companies in the event of large riot losses.

Fourth, it would permit the Federal Government to defer taxes for participating companies.

Supplementing action would be taken to train agents and brokers from core areas, eliminate discrimination in company hiring, and develop new ways of preventing losses from the sale of insurance to low-income areas.

This bill is needed as part of an overall program to revitalize our cities. It will restore confidence and commitment to our blighted urban areas. It deserves our fullest support.

Mr. FRASER. Mr. Speaker, the 90th Congress is faced, in this year of limited Government spending, with the responsibility of stamping priorities on some of the country's most pressing problems. In my opinion, where we place those priorities will be of lasting significance.

Not only are we faced with financing a war abroad, but the challenges 1968 presents at home are staggering—crime, rising population, crowded classrooms, and the urban crisis, to name a few. But I count chief among our domestic needs the problems of the urban poor, and I am especially pleased that the President, too, places a high priority on these needs. I intend to support his imaginative proposals for urban renewal, model cities and are development grants, and I urge Members of the House to join me.

It is unfortunate that urban discontent has, in the past few years, become almost an expected facet of the summer months. Riots, we can all agree, solve nothing. They bring financial loss, public shame, death and anguish. They leave our cities burning, and our people in discord and bitterness. They force Americans to fight Americans. But until the urban the crisis is met head-on, the discontent and tension that produce riots cannot be alleviated. So long as we permit absentee landlords to deal high-handedly with tenants, who live without heat in substandard buildings then we are not meeting the urban crisis. So long as we fail to provide adequate funds for additional low-cost housing and increased urban renewal then we are not meeting the urban crisis.

So long as rats and insects breed disease in our cities then we are not meeting the urban crisis. So long as residents of urban slums fail to get respect and consideration due them as human beings, and so long as the opportunity for a bet-

ter life is withheld from them then we are not meeting the urban crisis. And until we do meet these challenges, we will not alleviate the principal causes of tension and riots in our cities.

The President's urban proposals have been directed to meet these challenges, attacking the source of poverty and injustice. Coupled with the full \$2.18 billion sought for the war on poverty, the package represents a significant step forward. Let me urge, Mr. Speaker, that we show our concern for the poor with a strong, effective and timely endorsement of the President's proposals.

Mr. SHIPLEY. Mr. Speaker, the pride that families took in their rugged land with its log cabin during the founding years of this country is not much different from that of the present day family in a home that contains every modern convenience.

Homeownership continues to bring a sense of community belonging, of participation, of accomplishment. It gives a measure of social standing.

But, unfortunately, there are citizens of this Nation who do not now have the opportunity of buying their home, let alone the fact of homeownership. Low-income families also want to own the place where they live. But, at present, the benefits of homeownership are beyond their resources. This is a situation that must be corrected.

The homeownership proposal in the President's housing bill offers a major step toward the solution of this situation. We have the opportunity to help less fortunate citizens—especially those who reside in our urban areas, upgrade their lives—to help themselves.

We can provide the catalyst that could be the stabilizing influence in neighborhoods throughout this Nation. Through the incentive of homeownership, the family, the neighborhood, the entire community can be renewed. By developing ways and means for moderate income families to attain the goal of homeownership, we are also aiding in the development of stable economic conditions, price, and self-confidence.

Congress has a history of heeding the needs of all people. The need now is decent homes for our people, homes that they can take pride in, homes that they can work to preserve, homes that they can call their own.

Mr. MATSUNAGA. Mr. Speaker, President Johnson has chosen to make the model cities program a keystone of the national strategy on urban problems. I consider this program one of the most effective tools ever devised for meeting urban needs and I strongly support the model cities proposals in the President's message on the cities.

The needs of the 63 cities and counties selected for model cities planning grants last November are urgent. The almost four million residents of these target areas are living in some of the worst conditions of poverty imaginable. Nearly one-third of the families have incomes of less than \$3,000 annually; a fourth live in substandard housing; unemployment is double the national rate; twice as many babies do not live beyond infancy; and one in three adults never made it to high school. But statistics tell only part

of the story. They do not reflect the hundreds of young men who have long since given up hope of finding a decent job and have stopped looking. They do not reflect the men with families who may be working at two jobs and still not earning enough money to support their families. How, then, can they ever hope to provide a decent home for their families?

The model cities program offers hope to the residents of these neighborhoods and to the residents of the other target areas that will be named this year. Through this program the city will be able to pull together existing Federal programs and local resources, both public and private, to revitalize these slum areas.

During the last few months there have been encouraging signs of citizen response to model cities. In Winooski, Vt., 268 people from a neighborhood of only 300 families turned out in subzero weather to elect representatives for a model cities advisory committee. In Atlanta, Ga., hundreds of model neighborhood residents attended a citizens convention to decide how they wanted to participate in the program. In my own home city of Honolulu, initial misunderstandings have been cleared up and community support is evident. Citizens, government officials, and private businessmen are now demonstrating their commitment to the model cities program. Our investment of \$1 billion will bring many returns for them and for our future as an urban nation.

Mrs. MINK. Mr. Speaker, President Johnson has shown his concern for the millions of low- and moderate-income families living in unfit housing by proposing a greatly accelerated effort to produce decent shelter for them.

The President has made it clear that what is needed now is volume production, using existing programs reinforced by increased Federal financial aid.

That is why the President has recommended a program for cities and people that covers a wide range of needs. He has called for housing for low- and moderate-income families in greatly increased volume—300,000 units to be started next year; and unprecedented campaign over the next 10 years to build 6 million federally assisted housing units in cooperation with private industry and labor.

The existing low- and moderate-income housing programs must and should be speeded up. In public housing, for example, increased production can largely come through the process of having private industry build the housing and turn the key over to the local housing agency—the so-called turnkey process. Preliminary indications are that it is quicker and less expensive than previous methods.

The President's call for greater housing volume is consistent with actions he has already taken. He has placed greater emphasis on rehabilitating usable structures. A Presidential commission is searching communities across the Nation for Federal surplus land that can be used for low- and moderate-income housing. The Federal Housing Administration is becoming more and more involved in residential construction in

hard-core areas. The FHA rent supplement program is also providing rental assistance for families as well as increasing the inventory of good housing.

In all of this, the Government's housing agencies have begun to help carry out the President's program. It is now up to Congress to translate his proposals into law, so that we can get along with the job that must be done.

I ask you to join me in supporting these programs.

Mr. RHODES of Pennsylvania. Mr. Speaker, it has been said that the best Federal programs benefit the man in the street while helping to strengthen the Nation's economy. Such a program is outlined in the New Communities Act, as proposed by President Lyndon B. Johnson.

Brand new communities, built from the ground up, with homes, stores, and jobs, will be created on the fringes of metropolitan areas, on bypassed tracts within cities, and on the sites of existing small towns.

Under the proposed new communities program this would be achieved with a limited amount of Federal financial involvement. Loans needed by private developers would be guaranteed by the Government and repayment would be geared to the actual cash flow experience of the developers as work progresses.

Further incentives would be provided to cooperating local public authorities through incentive grants. An estimated \$500 million in private investment would be stimulated for the development of communities that could help relieve the population pressures on the Nation's aging urban centers.

The New Communities Act, as proposed, offers a promise for achieving some of our national urban objectives—an increased supply of housing; a better allocation of land and water resources; and the means to direct the resources of the private enterprise toward the solution of our urban problems.

Such a program could point the Nation in a new direction, providing a show case for new applications of technology and science to improvement of urban living.

#### URBAN MASS TRANSPORTATION— MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 262)

The SPEAKER pro tempore laid before the House the following message from the President of the United States, which was read:

*To the Congress of the United States:*

As long as he has lived in cities, man has struggled with the problem of urban transportation. But:

- Never before have these problems affected so many of our citizens.
- Never before has transportation been so important to the development of our urban centers.
- Never before have residents of urban areas faced a clearer choice concerning urban transportation—shall it dominate and restrict enjoyment of all the values of urban living, or shall it be shaped to bring convenience and efficiency to our citizens in urban areas.

[Mr. McFALL] is recognized for 10 minutes.

Mr. McFALL. Mr. Speaker, I wish to call to the attention of the Members of the House a memorandum of the Department of Defense relating to the use of butterfat substitutes in milk products in overseas areas which has resulted in increased cost to the Federal Government and a contradiction in Federal policy with regard to the Nation's dairy industry.

The memorandum to which I refer was issued by the Department of Defense on September 14, 1966. It directed that the military services use substitutes procured from U.S. sources for butterfat in the manufacture of milk and dairy products in overseas areas.

While there may have been some justification for the position taken by this memorandum at the time of its issue, today there is absolutely no justification whatsoever for the memorandum. This is because no hard-dollar savings accrue from the use of butterfat substitutes in the manufacture of milk and dairy products in place of real butterfat. In fact, this policy results in increased and unnecessary expenditures by the Department of Defense and the Department of Agriculture. This is because the Department of Defense is presently able to obtain butter from the Commodity Credit Corporation under the U.S. Department of Agriculture donation program. Through this program, the Department of Defense, upon purchasing its normal butter requirements is entitled to receive quantities of butter held by the Commodity Credit Corporation in excess of normal requirements.

Despite the present ability of the Department of Defense to obtain butter from the Commodity Credit Corporation, the Department has continued to contract for the purchase of butterfat substitutes for use in the manufacture of milk and dairy products in overseas areas. Inasmuch as the cost of processing butter which the Commodity Credit Corporation could make available to the Department of Defense is approximately 4 cents per pound and the cost of butterfat substitutes is approximately 17 cents per pound, it is obvious that the Department is incurring unnecessary expenses which increase the obligation of each American taxpayer.

Furthermore, this procedure results in increased expenditures to the Department of Agriculture which, under the price support program, must continue to purchase butter, as well as other dairy products. Since the Commodity Credit Corporation has approximately 120 million pounds of butter in storage and available for use by the Department of Defense, failure to so use such butter results in increased expenditures for storage and other related costs by the Department of Agriculture, further adding to the total budget of the Federal Government.

A second reason which supports the rescission of this memorandum is the importance of the domestic dairy industry to our national economy. Since dairy farming is one of the most important segments of our agricultural economy, it

is vitally important that the Congress do all in its power to encourage a strong and healthy dairy industry. This is because in recent years, income from dairy farming, as well as other agricultural enterprises, has not kept pace with the rest of our national economy. Consequently, large numbers of dairy farmers have sold their farms and their herds, and have gone out of business, and milk production has steadily declined to the point that American consumers are faced with the possibility of a serious shortage of domestically produced milk and dairy products.

Inasmuch as there is no other dependable source of supply available to American consumers other than domestically produced milk and dairy products, it is important that the Federal Government continue to pursue the goal of parity prices for dairy farmers which is the goal of legislation, such as the Agricultural Marketing Agreement Act of 1937, and the Agricultural Act of 1949. It is inconsistent, therefore, for the Department of Agriculture to support the prices of milk and dairy products through the price support program, while at the same time, the Department of Defense fails to use available butter and other dairy products in its feeding programs.

A final and more compelling reason supporting the use of butterfat, rather than butterfat substitutes, is the need of our Armed Forces to be supplied with fresh and wholesome milk and dairy products. It is important that our young men in the Armed Forces be provided with the finest food we are able to make available to them. They deserve to receive fresh milk and dairy products.

Mr. Speaker, several Members of the Congress have written a letter to the Secretary of Defense pointing out the invalidity of the memorandum directing the use of butterfat substitutes in milk products. It is my hope that the Secretary will take this obviously necessary action. Continuation of the use of butterfat substitutes in the manufacture of milk and dairy products in overseas areas can only have an adverse effect on the domestic dairy economy, deprive our armed forces of fresh milk and dairy products, allow Commodity Credit Corporation stocks of butter to continue to build, and result in increased expenditures to the Department of Defense and the Department of Agriculture.

#### LEGISLATION TO AMEND THE INTERNAL REVENUE CODE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey [Mr. HOWARD] is recognized for 10 minutes.

Mr. HOWARD. Mr. Speaker, I am today introducing legislation to amend the Internal Revenue Code in order to close one of the gaping loopholes in our Nation's tax laws. I refer to the section of the Code which presently exempts from taxation the earnings of American-owned ships which are registered under the flags of other nations.

There are two compelling reasons why this tax exemptions should be removed:

First. Through this exemption, Amer-

ican shipowners evade paying their fair share of the cost of Government, giving them an unfair competitive advantage over other American shipping companies which register their ships under the American flag.

Second. Through this exemption, American shipping companies are encouraged to operate their ships under foreign flag, instead of under the Americans flag. As a result, the dollars paid for the carriage of cargo aboard these American-owned, foreign-flag operations cause a billion-dollar-a-year deficit in our balance of payments.

This problem of American firms putting their ships under foreign registry is not a new one. For more than two decades, a growing number of American shipping lines have indulged in this practice. As a result, this "runaway flag" fleet today is larger than the American-flag fleet.

The American owners of these ships insist that they have registered their vessels abroad as a "convenience." By this they mean that it is more "convenient" not to have to pay American taxes, it is more "convenient" not to have to pay American wage scales, and it is more "convenient" not to have to meet rigid American safety requirements in the construction and operation of their vessels.

All of these "conveniences" give these foreign-flag operations an enormous competitive advantage over the companies which keep their ships at home, pay American taxes, hire American sailors and meet American safety standards. I do not believe, Mr. Speaker, that our Government should foster this kind of totally unfair competition by allowing these companies the tax haven that the Internal Revenue Code presently provides.

But unfair competition aside, there is another compelling reason why the present tax exemption should be eliminated. We are now faced with a crisis in our international balance of payments. For 17 out of the last 18 years, we have had a deficit balance, and today this deficit stands at something like \$4 billion.

The legislation I am introducing today would strike at one of the main causes of that deficit. As I have said, we pay in the neighborhood of \$1 billion each year to these "runaway-flag" ships to carry American exports and imports. This means that these are dollars flowing out of the United States and into the pockets of foreign nationals, into the treasuries of foreign governments, and into overseas bank accounts.

As a very minimum, withdrawing of the present tax exemption for these American-owned, foreign registered ships will mean this:

First. The companies will be required to pay their proportionate share of the cost of our Government—the same as most other businesses and individuals are required to do.

Second. At least a part of the competitive edge which these companies now have over American-registered ships will be eliminated, giving U.S.-flag shipping a better chance to capture some of the cargo now denied it.

Third. We will be taking the first major step forward toward plugging this particular drain in the balance of payments.

Over the long haul, it is my hope that, by ending this tax advantage, we will be encouraging the American owners of these ships to take a new look at the picture, with a view toward the repatriation of these ships. If there were no "runaway-flag" fleet, we would be a billion dollars closer to equalization of the international payments account—and our own merchant fleet would be that much stronger, and that much more capable of contributing to a healthier domestic and international economy.

#### NEW COMMUNITIES ACT OF 1968

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin [Mr. REUSS] is recognized for 10 minutes.

Mr. REUSS. Mr. Speaker, the "new communities" movement is an idea whose time has come. Today, a growing number of nations have turned to the establishment of new urban centers as a means of guiding their internal development. President Johnson has called to the attention of all Americans two major problems of our cities: blight and deterioration on the one hand and runaway, unplanned, or ill-planned growth on the other.

Today in his message on the cities, President Johnson has called our attention to the concept of new towns as an alternative in helping absorb the population pressures and relocation problems of the central cities.

The potential of these new communities in achieving more orderly population patterns and more equitable distribution of economic activities is extensive. Moreover, "new communities" could offer promise for achieving our national urban objectives—an increased supply of housing; a better allocation of land and water resources; the opportunity to bring technology and science to bear on the urban environment; and the means to direct the resources and imagination of private capital and initiative toward urban problems.

Basically, the President's proposal seeks to remedy present flaws in the capital market while undertaking little in the way of new Federal financial obligations. It would provide incentives for using existing Federal grant-in-aid and loan programs to further new community development.

How would this be done? First, through an innovative program of Federal assistance to developers which would encourage the establishment of new communities. Second, through grant and loan incentives to public bodies as a means of drawing upon State and local government support for new communities development. Third, by providing Federal assistance for new communities both within and without metropolitan areas—whether they are "in town" areas or free-standing new cities in undeveloped, but potentially growing regions.

For a private developer, the major obstacles to building new communities are

the initial large capital requirements. Costs of securing the land and installing basic services are accompanied by high carrying charges and large cash requirements. During early stages of the long development period there is minimum return on the investment.

The President's new communities proposal is designed to overcome these obstacles to development. It provides a Federal guarantee to back private financing raised by the developers of new communities. Most probably this would take the form of a long-term loan which the government would guarantee. Repayment requirements would be keyed to actual cash flow experience of the new town development.

Thus, financial problems which inhibit possible private developers of new communities could be corrected by a rather limited degree of Federal support.

In some cases, State or local governments may wish to aid new community builders by providing municipal facilities. To encourage this cooperation of local governments, the Federal Government would offer certain incentives.

These proposed aides should provide the flexibility needed to assist the development of new communities with a wide range of types and localities. And they should serve to overcome the obstacles which, heretofore, have hampered the building of new communities on a large scale.

Traditionally, the Federal Government has been concerned with the quality and adequacy of housing, the conservation and best use of the land and its resources, and the quality of community life.

I am convinced that the development of new communities is an opportunity to reaffirm this concern by applying past experience and new technology to guiding urban growth.

#### DEDICATION OF PISCATAWAY PARK

(Mr. ASPINALL was granted permission to extend his remarks at this point in the RECORD.)

Mr. ASPINALL. Mr. Speaker, last Thursday, Washington's Birthday, the newest addition to the system of parks and recreation areas administered by the National Park Service was dedicated by the Secretary of the Interior. I refer to Piscataway Park on the banks of the Potomac opposite Mount Vernon. The ceremony occurred nearly 6½ years after the act authorizing the establishment of Piscataway Park was signed by President Kennedy and 14 years after the first efforts to have it established were made.

The Piscataway story began more than a century ago, when the Mount Vernon Ladies' Association, under the leadership of Ann Carmela Cunningham, began its work to preserve our first President's mansion and farm. Even then the view from Mount Vernon, which today is a high point in a visit to that shrine, was recognized as vital to the preservation project.

Fortunately, the major spread of Washington's suburbs at that time was moving in other directions. The shore

and inland farms opposite Mount Vernon were relatively untouched.

By 1954, however, the suburban growth pattern had changed, and the decision of the owner of a 500-acre tract of Piscataway property to sell his land resulted in considerable anxiety that year. The National Park Service was called in and asked to study the region and evaluate its potential as a Federal park. Its report was favorable, for the area contains historic, archaeological, natural, and scenic values that more than meet the criteria for Federal protection, but the Park Service had neither authority or funds to acquire the 1,500-plus acres it then considered as the optimum area for a park.

Another crisis occurred in 1955 when there were proposals to establish an oil tank farm at Piscataway. This was averted by a generous-minded citizen who intervened and bought the property to protect Mount Vernon. Perhaps even more important, a local movement to protect the open character of the Piscataway area, already well established, took on new vigor as a result of this episode.

In 1956, a program to protect the property on the Potomac River and Piscataway Bay was agreed upon by the Moyaone Association, the Alice Ferguson Foundation, and others. Dr. Henry G. Ferguson donated his 120 acres of land, known as Hardbargain, to the Alice Ferguson Foundation under restrictions that they never be developed adverse to the general open and wooded character of the area.

The next year the Accokeek Foundation was organized as a nonprofit organization to preserve and protect the historical sites, relics, trees, plants, and wildlife along the historic Maryland shore of the Potomac. It subsequently received sizable donations of land for this purpose.

There was another crisis in 1960 when the Washington Suburban Sanitary Commission announced plans to build a sewage treatment plant at Mockley Point, in the heart of Piscataway's scenic area. This plant was planned to stretch a mile along the river, rise to three stories in height, and have one or more large smoke stacks. Since the Washington Suburban Sanitary Commission has the power to eminent domain, the threat was real and dangerous, but it, too, was averted through the vigorous opposition of the Accokeek Foundation, the Alice Ferguson Foundation, the Mayaone Association, and a large number of individuals.

In its own way, the actions of the sanitary engineers, intolerable though their proposal was, served a useful purpose. They focused national attention on the need to preserve these lands across the river from Mount Vernon. The introduction of bills providing for acquisition of the lands by the Federal Government followed. I had the honor of introducing one such bill. My colleague, Congressman SAYLOR, introduced another which is the one that was ultimately enacted. In the other body, Senator ANDERSON introduced still another. This legislation was speedily adopted by the Congress and became law when it was signed by President Kennedy on October 4, 1961.

the public interest policies of President Roosevelt and President Truman, the Federal Reserve Board was forced to hold the line on interest rates. From 1939 until the Eisenhower Administration—a 14-year period—interest rates on long-term Government obligations were kept at 2½ percent and below. In fact, at times, short-term interest rates were as low as three-eighths of 1 percent in the Roosevelt and Truman administrations.

Mr. Speaker, the "independence" which the Federal Reserve seized under President Eisenhower has continued and it has been difficult—if not impossible—for the people and their elected representatives to regain what the Republicans gave away.

The Republican Party cannot escape the fact that interest rates were low under the Democratic administrations of Roosevelt and Truman. They cannot escape the fact that the genesis of our current monetary problems began under President Eisenhower. The figures plainly show this to be the case and I place in the record two tables showing the drastic increase in interest rates that occurred after the Republicans took the White House in 1953. These tables compare the 14-year period from 1939 to 1952 and the 14-year period from 1953 through 1966:

#### I. Yields on long-term Government bonds 1939 to present

Years:	[Percent per annum]	Yield
1939	-----	2.36
1940	-----	2.21
1941	-----	1.95
1942	-----	2.46
1943	-----	2.47
1944	-----	2.48
1945	-----	2.37
1946	-----	2.19
1947	-----	2.25
1948	-----	2.44
1949	-----	2.31
1950	-----	2.32
1951	-----	2.57
1952	-----	2.68
1953	-----	2.94
1954	-----	2.56
1955	-----	2.84
1956	-----	3.08
1957	-----	3.47
1958	-----	3.43
1958	-----	4.06
1960	-----	4.02
1961	-----	3.90
1962	-----	3.95
1963	-----	4.00
1964	-----	4.15
1965	-----	4.12
1966	-----	4.65
Average for 14-year period (1939-52)	-----	2.36
Average for 14-year period (1953-66)	-----	3.65

Mr. Speaker, these tables show dramatically what happened after the Eisenhower administration and the Federal Reserve got together.

When President Truman left office, the actual yield on long-term Government securities was about 2.68 percent. The first year of the Eisenhower administration saw this same yield jump to 2.94 and by 1960—the last year of the Eisenhower administration—the figure had jumped to 4.02 percent.

In other words, in the 8 years of the Republican administration the yield on long-term Government securities skyrocketed by 50 percent.

Mr. Speaker, the same dramatic increases can be seen in the short-term rates, particularly 91-day Treasury bills. The following chart shows that the yields on 91-day bills stood at 1.7 at the end of the Truman administration. By the end of the Eisenhower administration, they had risen to more than 2.9 percent.

In the short, these yields jumped more than 70 percent in the Eisenhower administration.

#### II. Average annual yield on 91-day Treasury bills 1939 to present

Year:	Yield
1939	0.023
1940	.014
1941	.103
1942	.326
1943	.373
1944	.375
1945	.375
1946	.375
1947	.594
1948	1.040
1949	1.102
1950	1.218
1951	1.552
1952	1.766

Average yield (14-year period) -- .645

1953	1.931
1954	.953
1955	1.753
1956	2.658
1957	3.267
1958	1.839
1959	3.405
1960	2.928
1961	2.378
1962	2.778
1963	3.157
1964	3.549
1965	3.954
1966	4.811

Average yield (14-year period) -- 2.797

Mr. Speaker, since 1951, when William McChesney Martin became Chairman of the Federal Reserve, the American people have paid more than \$212 billion in excess and unnecessary interest charges. The excess interest on private and public debt combined amounts to more than \$14.5 billion each year since Mr. Martin took office.

#### COMPARISON OF INTERESTS COSTS

##### I. NET PUBLIC AND PRIVATE DEBT, TOTAL INTEREST PAID, AND AVERAGE RATE OF INTEREST IN THE UNITED STATES, 1951-66

Year	Total debt (billions)	Interest paid (billions)	Computed average interest paid (3÷2)	Interest costs figured at 1951 computed rate
(1)	(2)	(3)	(4)	(5)
1951	\$524.0	\$17.8	3,397	\$17.8
1952	555.2	19.7	3,548	18.9
1953	586.5	21.9	3,734	19.9
1954	612.0	23.7	3,873	20.8
1955	672.3	26.0	3,867	22.8
1956	707.5	29.8	4,212	24.0
1957	738.9	34.0	4,601	25.1
1958	782.6	36.0	4,600	26.6
1959	846.2	40.8	4,821	28.7
1960	890.2	45.7	5,134	30.2
1961	947.7	48.4	5,107	32.2
1962	1,019.3	53.4	5,238	34.6
1963	1,096.9	59.8	5,452	37.3
1964	1,174.3	66.5	5,663	39.9
1965	1,270.3	74.0	5,825	43.2
1966 (estimated)	1,368.3	82.7	6,044	46.5
Total		680.2		468.5

Note: See the following table:

	Billions
Total col. 3	\$680.2
Less total col. 5	—468.5
Excess cost	211.7

Source: Economic Report of the President, 1967.

#### II. TOTAL FEDERAL DEBT AND INTEREST PAID, FISCAL 1951-68

Fiscal year	Total Federal debt (billions)	Total interest paid (billions)	Computed annual interest rates	Computed interest cost at 1951 rate (billions)
1951	\$255.3	\$5.7	2,233	\$5.7
1952	259.2	5.9	2,276	5.8
1953	266.1	6.6	2,480	5.9
1954	271.3	6.5	2,396	6.1
1955	274.4	6.4	2,332	6.1
1956	272.8	6.8	2,493	6.1
1957	270.6	7.3	2,698	6.0
1958	276.4	7.7	2,786	6.2
1959	284.8	7.7	2,704	6.4
1960	286.5	9.3	3,246	6.4
1961	289.2	9.0	3,112	6.5
1962	298.6	9.2	3,081	6.7
1963	306.5	10.0	3,263	6.8
1964	312.5	10.7	3,424	7.0

#### THE SHARPENED CRISES IN VIETNAM

(Mr. MORGAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MORGAN. Mr. Speaker, the executive council of the American Federation of Labor and Congress of Industrial Organizations, in a meeting on February 20, 1968, at Bal Harbour, Fla., issued a statement on Vietnam which merits most careful consideration. I wish personally to commend the AFL-CIO Executive Council for issuing an excellent statement which puts the recent developments in Vietnam in proper perspective. I heartily agree with the council's appeal to the entire American people to support the President in his persistent efforts to end the war through negotiations. The text of this splendid statement is as follows:

STATEMENT BY THE AFL-CIO EXECUTIVE COUNCIL ON THE SHARPENED CRISIS IN VIETNAM, BAL HARBOUR, FLA., FEBRUARY 20, 1968

For nearly three years, the U.S. has repeatedly offered to enter unconditionally into negotiations for ending the war in Vietnam. These offers have fallen on deaf ears in Hanoi, Moscow, and Peking. To demonstrate further its earnest desire for negotiations, our government recently reduced considerably, for over a month, its bombing of the Hanoi and Haiphong military targets. But Ho Chi Minh interpreted these peace efforts as proof of American weakness. Then, under cover of the Tet holiday, Hanoi proceeded to escalate its aggression by launching an offensive against the main South Vietnamese urban centers, slaughtering thousands of innocent civilians, turning the city streets into bloody battlefields.

The latest escalation of terrorist warfare by Hanoi is a development of sinister international significance. In this connection, it would be folly to disregard the address recently delivered by LeDuan, General Secretary of the North Vietnam Communist Party, in which he emphasized that: "The theory

and practice of the October revolution has helped the Vietnamese revolutionaries realize that national liberation must be linked to world proletarian revolution. The struggle of the Vietnamese people forms the spearhead of the world revolutionary tide." This declaration should make clear, to even the most embittered critic of the President, the austere and painful reality of Vietnam, freed from wishful thinking, false hopes, and sentimental dreams.

Furthermore, for days prior to their onslaught, the clandestine Communist "Liberation Radio" appealed to the South Vietnamese people, as Lenin did to the Russian people on the eve of the Bolshevik seizure of power. The so-called "National Leadership Committee" urged: "We exhort the officers, soldiers, and the police forces of the Saigon regime to side with the ranks of the people and to give their arms and ammunition to the revolutionary armed forces. Let us go forward together. The revolution will certainly be crowned with success." The Communists appealed for and counted on a popular uprising to welcome their raiders as liberators. In this, they failed dismally. The only place in the capital where the self-styled nationalist Viet Cong succeeded in winning some popular support was in the Chinese township of Cholon.

It is still too early to estimate the extent of damage which this fruitless Communist attempt to seize power has inflicted on the pacification and re-development programs or on the recent progress made by the South Vietnamese in building constitutional government and democratic institutions. Clearly, this aggression against the cities was an integral part of the Communist strategy aimed at undermining America's determination and at strengthening those in our country who, wittingly or otherwise, would have the U.S. submit to the dictates of Hanoi as the road to peace in South East Asia.

This offensive has been of no decisive military value to Hanoi. However, it does show an unexpected Communist capacity to launch destructive attacks against targets of their choice, with the enormous volume of aid from all other Communist countries and to the effectiveness of Hanoi's underground apparatus which has been continually built up in South Vietnam for more than twenty years. In the face of these developments and their possible recurrence, there is a paramount urgency for the democratic allies in Vietnam to avoid all overconfidence and expand their social, economic, political and military moves to deter and defeat aggression, while persisting in their efforts to negotiate peace.

The opponents of the Administration's tenacious resistance to Communist aggression have hastened to seize upon whatever initial political and psychological successes Hanoi may have scored in its latest escalation of the war as evidence that our country's policy is wrong and that we should get out of South Vietnam and all Southeast Asia. In panic, some academicians have rushed to conclude that the time has arrived for U.S. policymakers to realize that we have been defeated in terms of our original objective—to prove that so-called wars of national liberation do not pay and that we can stop them.

This hasty conclusion is without foundation in fact. Vietnam is not the first or only place where the Communists have resorted to their so-called national liberation tactics. After World War II, they tried it in Greece and Korea and failed in both countries. They tried and failed in Malaysia and Indonesia, in Bolivia, Colombia, Peru, and Venezuela. They have not had much luck with such tactics in Burma and the Middle East. Nor have they gotten far in South Vietnam, despite years of preparation, subversion, and aggression. They have already been driven out of most towns and the remaining fight in the cities is not going their way. In addition, the Communists have had to pay dearly

in heavy losses among their elite cadres who controlled vital rural areas and were trained for months for their operations against the cities. Since many of them were killed, wounded, or captured, the Communist grip on these rural regions will consequently be weakened.

The destructive capacity of the Communist underground does not mean that Hanoi has the support of the workers and the people as a whole. In fact, the Saigon CVT Council has pointed out that the "armed Viet Cong propaganda teams" which "toured the workers' neighborhoods, trying to hold rallies to influence the population against the South Vietnamese government and the U.S. did not attract crowds because of worker indifference and hostility to the Viet Cong." We welcome the assurance of our CVT colleagues that "the terrorist campaign has only hardened the resolve of Vietnamese labor to resist terror and oppression."

Today, the people of South Vietnam are fighting harder to "win for themselves" than France, the Lowlands, and some Scandinavian countries fought against the overwhelming Nazi onslaught in World War II. Clearly, there are situations where the first and most direct targets of aggression are themselves, alone, not able to conduct effective military resistance and must have massive support from countries thousands of miles away in order to defeat the aggressors and restore and safeguard their independence and security. We need but cite the plight of western continental Europe and the resulting necessity of our country entering the war against Nazi aggression and subsequently providing the European peoples with generous assistance for the reconstruction and recovery of their economy and free way of life. In the light of their own experience, the free people of Europe should have no difficulty in understanding our country's current Vietnam policies and the urgency of their supporting the struggle against Communist aggression in Vietnam.

The Executive Council of the AFL-CIO appeals to the millions in our ranks, to workers everywhere, to the entire American people:—Strengthen the President's hands in his persistent efforts to end the war through negotiations. We further pledge our full support to the President in his determination to achieve our country's sole aim in the Vietnam conflict—to halt Communist aggression against the people of South Vietnam. We pledge our all-out support to help the CVT enhance its effectiveness and enable it to play an increasing role in defeating Communist subversion and promoting social justice, the development of democratic institutions, and a viable economy. We are confident that the CVT and all other democratic forces in South Vietnam will do their utmost to have their government speed rural reforms which will immediately give land to the individual peasant. Coincidentally, we urge our government to provide the peasants with the fertilizers and technical assistance which will enable them to raise their agricultural productivity and improve their living standards.

Such reform measures, combined with an invigorated campaign against corruption, will facilitate the resumption of the pacification program on a sounder basis and firmer foundation. Such social and economic actions will rally the people of South Vietnam and strengthen the determination of our country and the efforts of our allies to halt the Communist aggressors and promote peace in South East Asia and throughout the world.

#### FLEXIBLE INTEREST RATES FOR FEDERALLY INSURED MORTGAGES

(Mr. BLACKBURN asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. BLACKBURN. Mr. Speaker, the President has requested this Congress to authorize flexible interest rates for federally insured mortgages. I support this measure.

Under present law, the maximum interest rate that can be charged on mortgages insured by the Federal Housing Administration is 6 percent.

Under the flexible rate proposal, the Secretary of the Department of Housing and Urban Development would have authority to establish the maximum FHA interest rate on all market rate programs at a level he finds necessary to meet conditions of the mortgage market.

This is a more realistic approach toward maintaining an adequate supply of money for the mortgage market than for us to set an arbitrary rate and hope it will do. Present economic conditions bear this out.

Today's stringent market makes it difficult for home purchasers to obtain necessary financing. The problem is especially acute for families who need the favorable FHA mortgage terms in order to buy.

Inadequate flow of investment funds into mortgages leads to decreasing home sales and, in turn, to a decrease in home construction.

Under present market conditions, lenders are unwilling to make FHA-insured mortgage loans without the collection of substantial discounts because competitive securities can produce yields higher than 6 percent, the maximum statutory rate.

It is not unusual in some sections of the country for the seller, or builder of a home to pay as much as an 8-percent discount to lenders for FHA financing. On a \$20,000 home, this would amount to \$1,600—a heavy premium to pay for selling a home.

Authorizing the Secretary of HUD to establish interest rates to meet market conditions should work to ease the discount situation, and would enable those seeking FHA-insured financing to compete more equitably in the money market for available funds.

The average FHA-insured home mortgage is about \$15,500. The average value of the home with that mortgage amount is about \$16,000. FHA requires a minimum downpayment of \$600 for a home of that price.

But, if lenders will not make FHA-insured financing available because the interest rate does not yield enough return, another form of financing has to be obtained.

For the family who has saved the downpayment and amounts for other charges in the transaction, it is a disheartening thing to be unable to find a lender who will write an FHA mortgage.

What is the family's alternative? Conventional financing?

Conventional lenders require as much as 30 percent down. On the same house this amounts to some \$4,800.

Not having the needed cash, the family would have to postpone buying or obtain secondary financing at rates that might create an undue financial burden.

The problem is widely recognized, and the need for action to alleviate the situation is equally apparent.

Change to a flexible interest rate system would not only affect the financing and production of homes but also development of housing in multifamily projects for many thousands of people.

Present FHA market rate programs for multifamily housing projects are being adversely affected by current money conditions.

Discounts that sponsors of such projects have to pay are burdensome. When added to other costs of a project, the net effect is to discourage builders from proceeding with many worthwhile projects. This is precisely the situation the home-building industry must be able to avoid—if adequate shelter is to be provided to the millions of new Americans who will require it in the next decades.

A flexible rate would open the mortgage money market to many sponsors—particularly those seeking to serve moderate- and lower-middle-income families—who are now reluctant because of the discount. It would open it as well to countless individuals who seek new homes with FHA financing.

I do not think we can afford to ignore this problem. I do not think this country can afford it. The continued success of many home purchase and rental housing programs depends on our action.

I urge my colleagues to join with me in support of a flexible FHA interest rate.

#### CORRECTION OF VOTE BY CONGRESSMAN DOW

(Mr. DOW asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DOW. Mr. Speaker, on January 10, 1967, rollcall vote No. 5 was a motion on the previous question offering the same rules for the 90th Congress that prevailed in the 89th Congress. I am recorded as having voted against the motion.

Very recently a number of constituent organizations have prepared tabulations of the voting pattern of Members, including myself. They selected rollcall No. 5, which involves retention of the 21-day rule to bring bills to the floor, as a critical vote deserving publication in respect to each Congressman.

Mr. Speaker, on that vote I was recorded in the negative, incorrectly. I could not say whether this was due to my own error or to some other. I desire to be recorded in the affirmative, as favoring the motion to retain the rules of the 89th Congress, including the 21-day rule.

My expression at this time is reinforced by the fact that I voted in the negative on rollcall vote No. 6, to eliminate the 21-day rule.

#### DOW INTRODUCES TABLE-EGG MARKETING ACT

(Mr. DOW asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DOW. Mr. Speaker, on last Wednesday, February 21, I introduced the Table-Egg Marketing Act, H.R. 15488. This legislation will permit the egg pro-

ducers of our Nation to make their own decision on whether or not they want to control the supply of eggs and bring it into line with demand.

My bill is an enabling act which would set up a marketing control in the egg industry only if the egg producers want it. It is my belief that producers should have this privilege because of the continuing low price of eggs.

The election provided for in this legislation will be administered by the Department of Agriculture, with the producers themselves having the only voice as to whether they want to place controls on their own laying flocks.

No order will be issued by the Secretary of Agriculture until a majority of the registered producers vote to approve it. The majority of those voting must also own not less than a majority of the laying hens represented by the registered producers voting. Under this formula, if producers are in favor of egg quota legislation, then controls will be placed on the number of hens that each producer may maintain by a National Egg Board. The National Egg Board will be composed of two producer members from each table-egg production district.

The Secretary of Agriculture, under the legislation, would propose an order only on those commodities which would insure an adequate supply of table eggs. The commodities which would fall under the order would be limited to baby chicks, started pullets, laying hens, and table eggs and products.

#### A FEDERAL NEW COMMUNITIES PROGRAM

(Mr. DOW asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DOW. Mr. Speaker, President Johnson has proposed that Congress authorize a New Communities Act. This proposal could provide the foundation for a new approach to guiding the internal growth of the Nation's urban centers.

The President has called the attention of all Americans to two major problems of the cities: Blight and deterioration are destroying older urban centers, built in the past. Unplanned or ill-planned growth is often taking place where new development is going on.

New communities planned for today's needs cannot solve all these problems but they can help to relieve the explosive pressures of crowded cities. They can solve many of the relocation problems that result when development or renewal plans for an urban area require the people who live in the area to move elsewhere.

Given the option of more centers to absorb our urban throngs we will gain some long-sought objectives. The Nation will achieve more orderly population patterns, as well as a more equitable distribution of economic activities. New communities thus will have a very positive effect on the well-being of urban Americans and on the Nation's economic life. Best of all, most of the results will be accomplished through the working of the private enterprise system.

Provisions of this New Communities

Act would involve a minimum amount of new Federal financial obligation. Using the existing grant-in-aid and loan programs, the act would provide incentives for local and State governments to back the development of new communities. Also this proposal calls for Federal guarantees to back private financing raised by the new community developers. Repayment of the financing would be geared to the actual cash flow experience of the new town as it grows.

It has been estimated that about \$500 million in private investment in new communities development would be generated by the proposed program.

New Communities Act is another forward-thinking proposal. I urge my fellow Members to join in support of the President's proposal.

#### VA AND FHA INTEREST RATES

(Mr. DORN was granted permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DORN. Mr. Speaker, the President has recognized in his message shortages of mortgage funds work great hardship on the home building industry and on families seeking to become homeowners.

In 1966, for example mortgage money dried up quickest for families who needed this credit the most—lower middle income and moderate-income families.

Since the sharp decline of mortgage funds, we have seen some improvement, but we are still in a very tight situation that makes it impossible for many families who want to buy homes to obtain financing on terms they can afford.

The range of discounts charged by lenders in order to make available mortgages insured by the Federal Housing Administration and Veterans' Administration continues at a very high level because the statutory rate allowed on these mortgages is not realistic in today's market.

Investors who are seeking to make FHA-insured mortgages competitive with alternative investments are forced to use the discount device. This makes the cost of offering property with FHA-supported financing extremely expensive to the seller of the home.

In my judgment, we should not delay in providing relief in this situation. We should move swiftly to open the way to FHA financing for homebuyers who need the liberal terms of FHA-insured mortgages in order to buy. We also need to take this action soon to ease the severe problems faced by families who want to sell their homes with FHA terms.

I support the concept of a flexible FHA interest rate to be set in response to mortgage market forces, and invite my colleagues to join me in this.

#### WHY VIETNAM?

(Mr. DORN was granted permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DORN. Mr. Speaker, Maj. Charles W. Lollis paid the supreme sacrifice in South Vietnam on February 6. Memorial services were conducted at Curtis Bap-

list Church in Augusta, Ga., on February 13 and final rites were held at Fort Myer Chapel and Arlington National Cemetery in the afternoon on February 21.

Major Lollis, son of Mr. and Mrs. Wm. L. "Sam" Lollis, of Liberty, S.C., was a graduate of Liberty High School. He attended Bob Jones University and Clemson University. Major Lollis was a patriotic, devoted, and dedicated American. I commend to the attention of every American who cherishes freedom this great soldier's last letter to his family:

DEAR FOLKS: First off, I'm fine after one of the worst weeks of the war here in Vietnam. There have been anxious moments since last Wednesday, but as I have told you before, I won't take any unnecessary chances. Things have quieted down pretty well again and I'm back at work.

This mess all got started on Wednesday morning and I didn't get to work until Saturday noon. It is now 2 a.m. Sunday morning. From the methods or tactics that Charlie has used this week it looks like the dying gasp of his efforts to enslave the Vietnamese people. It is inconceivable that the VC can continue the loss of people the way they have this week. As I see it he made 3 basic mistakes in his efforts to take over Saigon. First he didn't touch the electrical system, second the water system and third, but not least, the telephone system. Those utilities would have crippled the city. His biggest mistake of all, however, was that he turned on the civilians for the first time.

The VC used large numbers of civilians as hostages, moved into their houses and committed all kinds of atrocities. He at one point holed up in a children's hospital and was in almost all the Vietnamese hospitals at one time or another. They used churches and schools as headquarters. No one knows how long they had been tunneling in the graveyards where some of the bitterest fighting took place.

The death toll of the VC has passed 13,000 for a week. This number has not come cheap to the US and Vietnamese military but the ratio of communist vs free world has been impressive.

This must be the beginning of the end. The tactics used have been suicide just as the Japanese used in the closing days of the Second World War with the kamikaze pilots. The VC need an impressive victory before they go to the bargaining table. This victory has been denied and my hope is that it will continue to be denied. If we can defeat the communists here in Vietnam once and for all, we can pull out and leave it to the Vietnamese. I feel we made our big mistake in Korea in 1951 when we stopped at the DMZ. Here 17 years later, we are still heavily committed there. The communists only understand brute force. We cannot be "nice" as we have in the past and continue to exist. Some where in the world we are going to have to defeat the communist effort decisively or there will always be this type of war. If not here, some place else.

Truly, we are in the end times and there will no longer be peace on earth until the Prince of Peace returns. One thing that Christ said was that there would be wars and rumors of wars and the end was not yet. Watch, pray, and trust is all we can do. Our responsibility to mankind cannot be shirked. We must show to the World that there is hope in a freedom to worship the one true God.

There is hope, and the gospel of Christ can be spread under freedom, but not under communism. Here we stand with our responsibility—what will we do with it? Follow our own selfish pleasures, God forbid. We have a much higher calling than that. There is no pleasure in pleasure if the cost is not

determined. Fun is not fun if there is no way to tell when we aren't having fun. We must have a contrast to be able to appreciate one side or another. Hardship brings an appreciation for good times.

Oh, how small our thoughts are. How small our world and appreciation of it is. I pray that I shall never be blinded to the suffering of my fellowman, red, yellow, black or white and not be able to feel compassion for him. Our wealth is measured in our friends and we only gain friends through our love for people, and the only love you can show is the love that God puts in our hearts for our brothers. It will always be recognized and returned. And each day is a new challenge to love the unlovely. Why then do we have war? Why did the Israelites have war? It is only a small part of the struggle between good and evil.

It almost sounds contradictory to justify physical conflict but we are not fighting men as individuals but as ideas; it is there and cannot be denied. There is a constant conflict between good and evil.

Well, enough of philosophy for today. Almost 5 months of this tour is past history. Soon 1/2 of it will be over and once again we can be united to share the new love we have found. Rom. 8:28. There is no doubt in my mind about returning home, and I know there is none in yours. Don't worry about me. I do know how to take care of myself and have been doing just that. We took some casualties. Some of my friends have passed on this week and after investigating the circumstances surrounding what happened to them—they failed to exercise due caution. Mistakes like that are final. There is naturally a feeling of sorrow, but from their mistakes we can also learn.

Take care of yourselves, don't work too hard, tell everyone hello for me and I'll see you soon.

Love,

CHARLES.

### LOW-INCOME HOUSING

(Mr. FASCELL was granted permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. FASCELL. Mr. Speaker, mindful of the need for decent housing for millions of Americans living in squalor, President Johnson last Thursday recommended a substantial increase in the number of dwellings for low-income families.

For many years, the federally aided public housing program, enacted in 1937, has been the principal source of shelter for low-income families, but it is still woefully short of the actual need.

The President in his message to the Congress made clear his dissatisfaction with the pace of federally assisted housing. His proposed budget calls for the start of 300,000 units next year. It also asks for 6 million housing units in 10 years, 11 times more than were provided in the last 10 years.

The President has asked us to move decisively on two phases of our urban crises: To reduce the number of substandard units inhabited by today's Americans while building new adequate shelter for the millions of new Americans who will live in our cities in the coming years.

Far too long have we failed to face up to the mounting crisis in housing. The President has now proposed a program to meet the crisis head on. His imaginative proposals deserve our fullest support.

### CONTRIBUTIONS OF ALABAMIANS TO THE DEVELOPMENT OF OUR COUNTRY

(Mr. BEVILL was granted permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. BEVILL. Mr. Speaker, this, traditionally, is the season when we pay tribute to George Washington, our first President, and the most illustrious leader in our Nation's history. February 22, 1968, is also the 90th birthday of Miles C. Allgood, a good friend of mine; a constituent who served in this House from 1922 to 1934 from the State of Alabama.

Last September, Mr. Allgood stopped by to see me on a return trip from Expo '67 in Montreal. I had seen a group picture of President Franklin D. Roosevelt signing the TVA bill. Mr. Allgood also appeared in this picture. I realized he was an old timer whose life began in the 19th century. I thought it would be of interest to my colleagues to have Mr. Allgood recount the part he played in the history of his day. One of the things I asked was what Members of Congress from Alabama had contributed most to Alabama and the development of our country.

Under unanimous consent, Mr. Speaker, I am pleased to pass on to my colleagues the following information as he gave it to me:

REMARKS OF HON. MILES ALLGOOD, FORMER MEMBER, U.S. HOUSE OF REPRESENTATIVES, FEBRUARY 26, 1968

Senator John T. Morgan, of Selma, Alabama, was known as the "Father of the Isthmian Canal." He kept it before Congress for 30 years until it became a reality. The Canal brought the Atlantic, the Gulf of Mexico and Pacific port cities some eight thousand miles nearer, and opened commercial seaways for many products of the nations of the world.

It has increased our commerce by billions of dollars and helped make the U.S.A. a prosperous nation. Alabama kept John T. Morgan in the U.S. Senate until the Isthmian Canal Bill was enacted, so please give Alabama credit for the part she played in securing this canal. I had the high privilege of meeting Sen. Morgan and hearing him speak in his last campaign.

Another great Senator of Alabama was John Bankhead, father of Senator John Bankhead, Jr., and Rep. Will Bankhead (one-time Speaker of the House of Representatives) and grandfather of Tallulah, famous actress. Senator Bankhead is known in Congress as the "Father of Good Roads." He was the first to advocate federal aid to states to construct public roads for rural parcel post mail delivery. Today, paved highways connect our cities, towns, countryside, villages, farms and homes throughout the entire country. Millions of people traverse them by car, bus and truck. Good roads have developed our country and brought untold wealth, comfort, peace, pleasure and happiness to the American people.

In 1916, when I was State Auditor of Alabama, I went to Washington, D.C., with a tourist party. We asked Senator Bankhead to see if he could get President Wilson to welcome us to the White House. President Wilson shook hands with 60 of us.

Again, please give Alabama credit for sending to Congress Senator John Bankhead, the "Father of Good Roads," in the U.S.A.

In November, 1932, Franklin Roosevelt was elected President. The last of November, he called me to come to Warm Springs, Georgia.

His stenographer took the following interview: Roosevelt said, "Congressman Allgood,

# Senate

MONDAY, FEBRUARY 26, 1968

The Senate met at 12 o'clock meridian, and was called to order by Hon. JOHN STENNIS, a Senator from the State of Mississippi.

Rev. Hans Rebane, pastor, Estonian Evangelical Lutheran Congregation, Seabrook, N.J., offered the following prayer:

Our gracious heavenly Father, it is good to pause with Thee for a moment before starting out into the business of this day.

Thou hast called us and our Nation to a place of trust and responsibility throughout the world; enlighten the thoughts and govern the actions of all those in our country and in all other lands who are responsible for justice and order and peace. Guide and protect those who guard us and watch upon the ramparts the men in line of battle; those who direct them here and abroad; the leaders of this Nation who bear the weight of duty, even when those around them are uncertain and critical. Grant us grace fearlessly to contend against evil wherever it is found, and to make no peace with oppression and tyranny.

Thou, heavenly Father, knowest the aspirations and hopes of all Estonians on this 50th anniversary of the proclamation of their independence; the independence for which that small nation paid a great price but which was snatched from them by the cruel aggressor. We pray, make the aggressor loosen his grip on their homeland and all the other countries still kept captive. Hasten the day when all men shall dwell together in peace and unity and in obedience of Thy law of love.

We are grateful to know that we do not pray in vain in Jesus' name. Amen.

## DESIGNATION OF ACTING PRESIDENT PRO TEMPORE

The legislative clerk read the following letter:

U.S. SENATE,  
PRESIDENT PRO TEMPORE,  
Washington, D.C., February 26, 1968.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. JOHN STENNIS, a Senator from the State of Mississippi, to perform the duties of the Chair during my absence.

CARL HAYDEN,  
President pro tempore.

Mr. STENNIS thereupon took the chair as Acting President pro tempore.

## THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Thursday, February 22, 1968, be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## MESSAGE FROM THE PRESIDENT ON HOUSING RECEIVED DURING ADJOURNMENT (H. DOC. NO. 261)

The ACTING PRESIDENT pro tempore. Pursuant to the order of Wednesday, February 21, 1968, the Secretary of the Senate on February 22, 1968, received a message from the President of the United States on housing.

The Chair now lays the message before the Senate, and without objection it will be printed in the RECORD without being read, and then appropriately referred.

The message from the President was referred to the Committee on Banking and Currency, as follows:

To the Congress of the United States:

The cities that sprang up along the seaports, the river banks and the prairie crossroads of America were built and grew with pride and hope—until the early 20th century.

For several decades, now, the tide has run against the growth, strength and vitality of our cities.

Today, America's cities are in crisis. This clear and urgent warning rises from the decay of decades—and is amplified by the harsh realities of the present.

The crisis has been long in forming. At the turn of the century, Lincoln Steffens told of "the shame of the cities." Jane Addams spoke of "the vast numbers of the city's disinherited."

Powerful forces swept the city after World War II, hastening its erosion.

People who could afford to began moving by the hundreds of thousands to new suburbs to escape urban crush and congestion. Other hundreds of thousands were trapped inside by a wall of prejudice, denial, and lack of opportunity.

They were joined by still thousands more from America's rural heartland—the unskilled and the unprepared, displaced by advances in technology. Their thirst was for opportunity, for jobs, and for a better life. They found instead a mirage: for stripped of its bright lights, the city for them was poverty, unemployment and human misery.

We see the results dramatically in the great urban centers where millions live amid decaying buildings—with streets clogged with traffic; with air and water polluted by the soot and waste of industry which finds it much less expensive to move outside the city than to modernize within it; with crime rates rising so rapidly each year that more and more miles of city streets become unsafe after dark; with increasingly inadequate public services and a smaller and smaller tax base from which to raise the funds to improve them.

But these problems exist in hundreds of smaller towns and cities across America—towns and cities whose growth is in

numbers of people, but not in homes, or jobs, or public services, or schools or health facilities to serve them. The result too often is that these cities grow with decay, human misery, lack of job opportunity and increasingly concentrated poverty.

If the promise of the American city is to be recaptured—if our cities are to be saved from the blight of obsolescence and despair—we must now firmly set the course that America will travel.

There is no time to lose.

## THE PEOPLE OF THE CITY

The human problems of the city are staggering:

- Ghetto youth with little education, no skills and limited opportunity.
- Citizens afraid to walk their streets at night, and justifiably so.
- Negroes, Puerto Ricans and Mexican Americans barred by prejudice from full participation in the city's life.

Illiteracy and disease, a lack of jobs and even dignity itself—these are the problems of the city, just as its tenements, traffic jams and rats are problems.

The city will not be transformed until the lives of the least among its dwellers are changed as well. Until men whose days are empty and despairing can see better days ahead, until they can stand proud and know their children's lives will be better than their own—until that day comes, the city will not truly be rebuilt.

That is the momentous and inescapable truth we face in this hour of America's history.

No single statement or message can embrace the solutions to the city's problems. No single program can attack them.

No one can say how long it will take, or how much of our fortune will eventually be committed. For the problems we are dealing with are stubborn, entrenched and slow to yield.

But we are moving on them—now—through more than a hundred programs, long and short range, making financial commitments of more than \$22 billion to the task.

## THE WORK SO FAR

The last several years have witnessed a remarkable record of legislative achievement—and most of it has borne on the problems of the cities.

We struck down discrimination in job opportunities, public accommodations, and voting in the Civil Rights Acts of 1964 and 1965.

We provided job training for nearly 2 million disadvantaged men and women who now have the skills to support themselves and their families with dignity and self-respect.

We cut through a century of opposition and controversy to help the poor

school child with the Elementary and Secondary Education Act of 1965.

We brought healing and health to the elderly and the poor through Medicare and Medicaid.

We moved to help combat the pollution that poisons a city's air and fouls its waters.

And, with the Economic Opportunity Act of 1964, we finally embarked on a concentrated effort to eliminate poverty in this nation. That landmark measure has helped to change the lives of 6 million Americans.

These programs have brought hope to people in every city and town in America. Children from the slums find a new chance to succeed through Head Start. Poor teenagers earn their first paychecks through a Neighborhood Youth Corps program and stay in school. Needy young men and women, whose talents might once have been their life's frustration, go on to college through Upward Bound. Men find self-respect and good jobs through work training programs. Half a million volunteers are engaged in a mission of service to the destitute of their communities. More than 6 million Americans have been lifted out of poverty.

But almost 29 million citizens still remain in poverty.

If the problems of the city are to be solved, there can be no retreat in the War on Poverty. It must be pressed, with renewed emphasis on the most critical needs of the poor—job opportunities and education for the young, and the chance to join in cooperative self-help efforts to improve their own lives, as well as to participate in the broader community attack on poverty.

Last year the Congress extended the life of the poverty program for two years—but it appropriated only \$1.77 billion, some \$290 million less than we sought.

*For fiscal 1969, I recommend appropriations to the full level of Congressional authorization—\$2.18 billion—for the anti-poverty program.*

All of these measures help the people who live in our cities.

They are new programs, and only now are they beginning to take hold in improving lives of men, women and children.

With other proposals I have made to Congress this year—for open housing, for safe streets, for gun control, for 500,000 new, private sector job opportunities for the hard-core unemployed, for better education—we can further protect and improve the lot and the life of the city dweller.

Today, however, I want to speak of programs designed especially for our cities—of shelter for its citizens and plans for its revitalization. This message, too, is for men and their families. For our lives are profoundly affected by the environment in which we live, the city in which we work and reside, the home in which we relax and renew our strength.

#### AN EVOLUTIONARY RESPONSE

Five Presidents and fifteen Congresses have forged the Federal response to the problems of housing and urban development.

It began in 1937, when Franklin Roosevelt saw a third of the nation ill-housed.

He and the 75th Congress recognized that poor families could not, with their own resources, afford homes on the private market, and that some form of Government help was necessary if they were to have decent shelter. The result was the historic legislation that launched the Public Housing program.

Twelve years later, with the Housing Act of 1949, President Truman and the 81st Congress started urban renewal and pledged "as soon as feasible . . . a decent home and a suitable living environment for every American family."

In the 1954 Housing Act, President Eisenhower and the 83rd Congress expanded the program of urban renewal.

At the beginning of this decade, President Kennedy and the 87th Congress enlarged the Government's role to bring decent houses into the reach of families with moderate income.

In spite of these strides, when I became President:

- We had a loose collection of federal housing agencies, each operating programs in isolation, not only of each other but also of the federal assistance programs of other departments.
- Urban renewal was demolishing slum housing and dislocating people, but not enough new housing was being built for those forced to relocate.
- There was little interest in the private sector—by builders, architects and engineers—in providing decent shelter for poor families, and the public housing program was stagnated in numbers and in quality.
- Our concern with housing, health care, education, welfare and other social services was fragmented in the local neighborhoods where it counts.

Over the past four years, you in the Congress have approved our proposals to:

- Establish a Department of Housing and Urban Development to bring scattered housing and urban development programs together and give the American city the cabinet role it deserves.
- Begin a new program of Rent Supplements to increase the housing supply for needy families. Built and operated by private enterprise, the portion of rent paid by the Government declines as the tenant's income rises.
- Inaugurate the Model Cities Program, the first effort to attack blight on a massive scale and renovate entire neighborhoods, by providing special supplementary grants to those cities that concentrate the entire array of Federal, state and local programs, from health to housing, in the worst slum neighborhoods.

Even these achievements are not sufficient to deal with the crisis our cities face today. They do provide a base on which the proposals in this message build.

#### THE HOUSING AND URBAN DEVELOPMENT ACT OF 1968

*I propose the Housing and Urban Development Act of 1968—a charter of renewed hope for the American city.*

With this Act, the Nation will set a

far-reaching goal to meet a massive national need: the construction of 26 million new homes and apartments over the next 10 years. Six million of these will finally replace the shameful substandard units of misery where more than 20 million Americans still live.

This Act will authorize the construction and rehabilitation of 2.35 million housing units with \$2.34 billion of contracting authority for the first five years of the ten-year program.

Under this legislation, we will in the year ahead:

- Start 300,000 housing units for more than one million citizens who need federal assistance to obtain decent housing. This is triple the rate of this year, and more than half the number built over the last decade.
- Continue to restore the core of our center cities—and with that, improve the lives of nearly 4 million Americans—through the Model Cities Program.
- Summon the talents and energies of private enterprise to the task of housing low-income families through the creation of a federally-chartered private, profit-making housing partnership.
- Make Urban Renewal a more effective instrument for reclaiming neighborhoods, through a new neighborhood development program.
- Add many thousands of construction job opportunities in the inner city.
- Stimulate the flow of private credit for home building in the city by providing flexible interest ceilings on FHA mortgages and transferring the secondary market operations of the Federal National Mortgage Association to private ownership.
- Help American cities develop modern and efficient mass transit systems and services.
- Offer the American family an alternative to crowded cities and sprawling suburbs, through a program to build new communities.
- Improve planning for the orderly development of public facilities for urban areas.
- Establish a base of research, analysis and knowledge of urban areas so we can make better informed decisions about the cities.

#### WHAT IS REQUIRED

To achieve our housing goal, we must move from low to high production.

We can make that shift only if the challenge summons the commitment of

- The capital and mortgage finance markets*, to supply the private funds which are the lifeblood of the construction industry. These funds must flow steadily and in increasing scale.
- The home building industry*, to tap an expanded Federally-assisted market for private low and moderate income sales and rental housing.
- The genius of American business* to bring to home building its skill and resources and the methods of modern technology so that houses can be built faster, less expensively and more efficiently than ever before.

—American labor, which has pledged to provide the necessary skilled manpower without discrimination.

—Government at all levels, to improve the working relationships with each other, and with the builders, lenders, and low income families who will be served by this program.

—Most importantly, the Congress.

First, the Congress must take steps now to insure strong, stable economic growth for the nation as a whole and the home building industry in particular.

Once again I call upon the Congress to pass the anti-inflation tax which I recommended more than a year ago. Soaring interest rates will cripple the homebuilding industry. The temporary surcharge tax legislation can help to keep that from happening.

Second, I urge the Congress to enact the fair housing legislation recommended repeatedly by this Administration.

Third, I urge the Congress to renew, fully fund and strengthen the basic housing and urban development legislation already on the books.

#### HOMES FOR AMERICANS

I urge the Congress to enact a program to provide 300,000 housing starts in fiscal 1969 for the poor, the elderly, the handicapped, the displaced, and families with moderate incomes.

This program would:

1. Enable 100,000 low-income families to buy or repair their own homes.

Home ownership is a cherished dream and achievement of most Americans.

But it has always been out of reach of the nation's low-income families.

Owning a home can increase responsibility and stake out a man's place in his community. The man who owns a home has something to be proud of and good reason to protect and preserve it.

With the exception of the pilot program I began last year, low-income families have been able to get Federal help in securing shelter only as tenants who pay rent.

Today I propose a program to extend the benefits of home ownership to the nation's needy families.

Under this program, the broad outline of which has already been set forth in S. 2700, low-income families will be able to buy modest homes financed and built by the private sector. These families will devote what they can reasonably afford—a specified percentage of their income—to mortgage payments, with the Government paying the difference in the form of an interest subsidy. Under this interest subsidy, the Federal Government would pay all but 1 percent of the interest on the mortgage, depending on the income of the homebuyer.

2. Start 75,000 public housing units, to provide homes for 300,000 Americans.

The job is to turn authorization to action—by accelerating the processing of applications, by moving quickly from commitment to construction, and by involving private industry fully under the new Turnkey concept.

Under Turnkey, a low-income project can be put up in less than half the time traditionally required for public housing.

Turnkey frees the builder from complicated and cumbersome procedures and

stimulates his initiative to develop imaginative and well-designed buildings at lower cost.

We have already extended the Turnkey concept to enable private industry not only to build low-income housing developments, but also to manage them.

Some Public Housing projects built in the past—when the challenge was simply to get units in place—reflect a tasteless conformity, and an indifference to community amenities.

At my direction, the Secretary of the Department of Housing and Urban Development has been working with leading architects and planners to achieve higher design standards for public housing developments. We know new projects can be pleasant places to live, reflecting the needs of human beings, with attention to comfort and convenience.

Our concern must be not only with the quantity of new public housing, but with its quality as well.

I propose a \$20 million program to promote improved tenant services in public housing developments.

With these funds, we can enable those who live in public housing to take better advantage of job, health and education opportunities.

We can help and encourage them to become involved, personally and responsibly, in the day-to-day problems of the projects where they live.

3. Authorize 72,500 units under the Rent Supplement Program to provide shelter for almost 250,000 poor Americans. In fiscal 1969, 35,000 dwelling units will be started under this program.

This program, which holds so much promise for the poor families of America, has been underfunded by the Congress. Last year, we sought \$40 million in annual payment authority. The Congress granted only \$10 million.

Rent Supplements is a free-enterprise program, strongly endorsed by the home building, real estate, and insurance industries which have responded enthusiastically to this new approach to low-income housing. It contains incentives for escape from poverty, while creating modest, but decent shelter for those in poverty.

If we are to match our concern for the cities with our commitments, this program must be adequately funded.

I recommend \$65 million in authority for the Rent Supplement Program for Fiscal 1969.

4. Begin to build 90,000 rental housing units for 360,000 members of moderate income families.

A program to provide housing for families with incomes too high to qualify for public housing, both too low to afford standard housing began in 1961.

This is a below market interest rate program known as "221(d)(3)." It serves families earning between \$4,000 and \$8,000 a year.

After 5 years of testing, we are ready now to move this program into full production.

But first we must improve it.

I recommend legislation to strengthen the financial tools under which the moderate income rental housing program operates.

Under this legislation, capital financing would be shifted to the private sector, and the Government would increase its support by providing assistance to reduce rents to levels moderate income families can afford.

Now the Government provides financial support for loans at 3 percent interest. Under this new arrangement, the private sector would make loans at market rates. The Government would make up the difference between the market rate of interest and 1 percent. The loans would remain in private hands.

#### TO HELP THE NONPROFIT SPONSOR

Many housing projects are sponsored by non-profit organizations—including church groups, and fraternal orders. In many instances these groups lack the technical and financial know-how which modern construction demands.

Their efforts are in the best interests of this nation, and the nation should help them.

I propose legislation to provide needed technical assistance and skills to the non-profit sponsors of our housing programs.

Through grants, loans, and technical assistance, this program will help small private non-profit organizations in our cities. These organizations will then be able to draw quickly upon architects, engineers and financial experts to speed the construction of low income housing.

#### THE BLIGHTED NEIGHBORHOOD MODEL CITIES

The slum is not solely a wasteland of brick and mortar. It is also a place where hope dies quickly, and human failure starts early and lingers long.

Just as the problem of the slum is many-faced, so must the effort to remove it be many-sided.

The Model Cities program gave us the tools to carry forward the nation's first comprehensive concentrated attack on neighborhood decay.

It was developed by some of the country's foremost planners, industrialists and urban experts.

The program is simple in outline—to encourage the city to develop and carry out a total strategy to meet the human and physical problems left in the rubble of a neighborhood's decay.

That strategy, which Model Cities spurs through special grants, is to bring to a dying area health care services, as well as houses; better schools and education, as well as repaved streets and improved mass transit; opportunities for work, as well as open space for recreation.

This program is now in its early stages. Sixty-three cities are drawing their plans to reclaim the blighted neighborhoods where 4 million Americans live. By this summer, a second group of cities will begin their planning.

Last year, I requested full funding of the amount authorized for Model Cities—\$662 million. But the Congress approved less than half that amount.

To the cities of this land, that cut came as a bitter disappointment.

In the cities' struggle for survival, we dare not disappoint them again. We must

demonstrate that they can rely on continued Federal support.

I recommend \$2.5 billion for the Model Cities special grants over the next three years:

—\$500 million for fiscal 1969.

—\$1 billion each for fiscal 1970 and 1971.

In addition, for fiscal 1969 I recommend \$500 million in appropriations for urban renewal solely related to the Model Cities program. This includes full funding for a \$350 million increase in the authorization.

The total funds needed to move the Model Cities program forward in fiscal 1969 are \$1 billion.

I urge the Congress to fund fully this vital request for the people who live in America's worst urban neighborhoods.

#### URBAN RENEWAL

Urban Renewal is the weapon that deals primarily with the physical side of removing blight. An essential component of the Model Cities Program, it is a major instrument of reform in its own right.

Last year, nearly 900 American communities were reclaiming inner city land under urban renewal.

Last year, the Congress appropriated \$750 million for Urban Renewal in Fiscal 1969.

*To give communities sufficient lead time for planning, I recommend that the Congress appropriate now \$1.4 billion for fiscal 1970.*

Even at these higher appropriation levels, under existing law Urban Renewal will not operate at sufficient speed to overtake the decay of our cities.

The lag between a community's decision to rebuild a neighborhood and the breaking of ground is far too long. Urgent neighborhood needs go unmet, awaiting the development and approval of a total plan for an entire area.

We must begin now to make urban renewal more immediately responsive to urban needs.

*To apply our resources more quickly, I recommend that Congress authorize a new Neighborhood Development Program under Urban Renewal.*

This legislation would permit detailed planning and execution to proceed segment by segment in an Urban Renewal area. Under existing law, neither demolition nor rehabilitation can begin on any portion of the area to be renewed until it is ready to begin throughout the entire area.

With this Neighborhood Program, cities can start work quickly on the most pressing problems that are to be renewed, with the emphasis on the construction of new and rehabilitated housing.

#### MEETING THE INSURANCE CRISIS OF OUR CITIES

Insurance protection is a basic necessity for the property owner. But for the resident of the city's inner core and the local businessman who serves him, protection has long been difficult to obtain.

The problem has been heightened by civil disorder or its threat.

Last August I established a Special Panel to seek the solutions to this problem. The Panel, headed by Governor Richard Hughes of New Jersey, offered a

clear example of how the States, industry and the Federal Government can join in a constructive effort.

The Panel looked deeply into the property owner's dilemma, and reported:

Society cannot erase the suffering of the innocent victims of fire, windstorm, theft, or riot. But it can at least provide the opportunity to obtain insurance to safeguard their capital, and thereby prevent a disastrous occurrence from a permanent tragedy.

The Panel recommended a comprehensive program of mutually supporting actions by the insurance industry, the States, and the Federal Government.

My advisers and I have reviewed the Panel's proposals carefully. We believe they are sound.

Accordingly, I call upon the insurance industry to take the lead in establishing plans in all States to assure all property owners fair access to insurance. These plans will end the practice of red-lining neighborhoods and eliminate other restrictive activities. They will encourage property improvement and loss prevention by responsible owners.

I call upon the States to cooperate with the industry and, where necessary, to organize insurance pools and take other steps to cover urban core properties. These measures will assure that all responsible property owners can obtain insurance, and provide a method of spreading equitably throughout the insurance industry risks that no single insurer would otherwise accept.

I recommend that the Congress establish a cooperative Federal-State-Industry program by chartering a National Insurance Development Corporation within the Department of Housing and Urban Development.

This Corporation will bring together all those vitally interested in the inner city insurance problem—members of the public, State insurance regulators and other State officials, insurance industry representatives, and interested Federal agencies.

The Corporation will perform a number of vital functions in support of the actions of private industry and the states to assure adequate property insurance in all areas of our nation's cities.

Through the sale of reinsurance against the risk of civil disorders, the corporation will marshal the resources of the insurance industry and add to this the backing of the states and the Federal Government. Without this reinsurance, many insurers and state insurance regulators do not believe the industry can move forward to provide adequate property insurance in urban areas.

This program will assist the insurance industry and the States to offer adequate property insurance for the inner cities. Through reinsurance, the program can help the States provide for the contingency of any large emergency losses.

For those companies who participate in this program, *I recommend tax deferral measures, proposed by the Panel, to increase the industry's capacity to insure homes and businesses in the center city.*

This program will encourage insurance companies to increase their reserves to cover unusual losses. Any deferred taxes will be invested in appropriate

Government securities, so that no Federal revenues will be lost by the tax deferral unless unusual losses do occur.

Insurance is vital to rebuilding our cities. It is a cornerstone of credit. It can provide a powerful incentive for homeowners and businessmen to rehabilitate their own property and thereby improve the community.

#### THE PRIVATE SECTOR

The Federal role—a quarter of a century in the making—is designed to assure that every citizen will be decently housed.

The Government's concern is to stimulate private energy and local action—to provide capital where needed, to guarantee financing, to offer assistance that encourages planning and construction.

The real job belongs to local government and the private sector—the homebuilder, the mortgage banker, the contractor, the non-profit sponsor, the industrialist who now sees the challenge of the cities a new opportunity for American business.

All of the programs I have outlined in this message are directed toward the deeper involvement of the private sector. That involvement must match the massive dimension of the urban problem.

What is needed is a new partnership between business and Government. The first outlines of that partnership are already visible.

We see it in:

—The recent understaking of the American Bar Association to improve the landlord-tenant laws—now more medieval than modern—and to attack other legal problems in our urban centers.

—The commitment of 318 of the Nation's life insurance companies to invest \$1 billion of their capital in low-income housing.

Within the next several days, the Savings and Loan Associations and the Mutual Savings Banks of this nation will announce their plans to intensify the investment of their capital for similar purposes.

#### NATIONAL HOUSING PARTNERSHIPS

How can the productive power of America—which has mastered space and created unmatched abundance in the marketplace—be harnessed to meet the most pressing unfilled need of our society; rebuilding the urban slum?

Last June, I asked a select Commission of leading industrialists, bankers and labor leaders to study this question. That Commission, headed by Edgar F. Kaiser, has now given me an interim report with many valuable recommendations.

Acting on the Commission's recommendation, *I propose that the Congress authorize the formation of privately-funded partnerships that will join private capital with business skills to help close the low-income housing gap.*

The Kaiser Commission identified three principal reasons why American industry has not yet been attracted to the field of low- and moderate-income housing. The problems and the steps proposed to meet them are:

#### 1. Concentration of Risk

The profitability of individual housing projects varies widely and the risk of loss

on any one project is high. The proposals national partnerships would permit industrial and financial firms to pool their investments and spread their risks over a large number of projects.

### 2. Rate of Return.

Substantial operating losses are usually incurred in the first 10 years of a housing project's life to cover operating expenses, interest and depreciation.

By employing the partnership form of organization, which some building owners now use, under existing tax law these operating losses can be "passed through" to each investor, and offset against the investor's other taxable income. This reduces the investor's current income taxes otherwise payable, and makes possible an annual cash return on investment comparable to the average earnings of American business in other manufacturing enterprises.

### 3. Management

The management personnel of major corporations are inexperienced in the field of low-income housing. They cannot afford to devote substantial time to occasional housing ventures.

The proposed national partnerships would be strongly financed organizations, fully committed to long term activity in the single field of housing for the poor. As such, the proposed partnerships should be able to attract top flight management and technical experts on a competitive career basis.

The objective of these partnerships will be to attract capital from American industry and put that capital to work. Their exclusive purpose will be to generate a substantial additional volume of low and moderate-income housing. They will use the best private management talent, planning techniques and advanced methods of construction. They will probe for the savings inherent in the latest technology and in economies of scale.

They will:

- Participate in joint ventures throughout the country in partnership with local builders, developers and investors.
- Join with American labor to open new job opportunities for the very people their projects will house.
- Participate in our existing and proposed federal programs for assisting low and moderate-income housing projects on the same basis as other project sponsors.

This new undertaking will begin with one national partnership. We expect that others will follow as the approach proves itself.

#### A NEW ERA IN HOUSING

The supply of credit is not unlimited. The Nation's banks, insurance companies, pension funds and other financial sources have an obligation to their depositors and shareholders to seek a fair and competitive return for their investments.

To insure that home financing remains competitive with alternative long-term investment opportunities, I recommend that the Congress:

- authorize the Secretary of Housing and Urban Development to adjust the FHA interest rate ceilings.
- authorize federal insurance of bond obligations issued by private mort-

gage companies or trusts holding sizeable pools of FHA-insured and VA-guaranteed home mortgages.

- transfer the secondary market operations of the Federal National Mortgage Association to completely private ownership.

#### FHA INTEREST RATES

Mortgages insured by the Federal Housing Administration and the Veterans Administration can by law carry no more than a 6 percent interest rate. In today's market this is no longer competitive. In practical terms, the result is the sale of mortgages at substantial discounts.

Discounts require hard cash beyond the normal downpayment. They erode the hard-earned equity of a home-owner and the profit margin of the builder of new housing. For when the rate of return on federally-insured mortgages is less than lending institutions can obtain from other investments, they require property-sellers to absorb discounts. To sell their homes, therefore, sellers realize less than they originally anticipated. And when builders of large projects—with 90% mortgages of \$1 or \$2 million, or more—must find additional hard cash to pay deep discounts, they will defer construction until the cash requirements are reduced.

As a result, many a house goes unsold and many apartment projects go unbuilt in a deep credit squeeze.

To assure a steady flow of funds into homebuilding, *I recommend that the Congress authorize the Secretary of Housing and Urban Development to adjust the FHA interest rate ceilings to reflect the economic realities of the financial markets. I have already recommended a similar adjustment on the interest rates for home loans to veterans.*

#### FEDERALLY-INSURED MORTGAGE BONDS

Some private institutional and individual investors have shunned investments in home mortgages because they could realize nearly comparable rates of return in other investments, and avoid the bookkeeping and paper work associated with hundreds of individual mortgages.

These pools of savings—in large institutional pension funds, private trusts, and occasionally in individual estates—can be attracted to residential finance. It will take a new, marketable financial investment, with competitive yields and security. Such a bond-type obligation can be created to cover federally-insured mortgages held by private mortgage bankers or trusts.

To enhance the attractiveness of such an obligation to investors, and thus attract additional funds to the housing market, *I recommend that the Congress authorize the Department of Housing and Urban Development to insure mortgage bonds that are secured by pools of FHA-insured and VA-guaranteed mortgages.*

#### FEDERAL NATIONAL MORTGAGE ASSOCIATION

Through the Federal National Mortgage Association, the Federal Government has helped keep mortgage funds flowing by buying mortgages when credit was tight and selling them when money was plentiful.

Today, FNMA is a hybrid, owned in part by private shareholders, in part by the government, but managed by Government officials.

This secondary market operation is largely a private function, which ought to be performed by the private sector—as the Congress has always intended.

*I propose legislation to transfer the secondary market operation of the Federal National Mortgage Association on an orderly basis to completely private ownership.*

This new FNMA, concerned exclusively with providing an increasing and continuous flow of funds into residential financing will close an important gap in the existing network of financial institutions.

This change will not affect the Government's special assistance to selected types of mortgages which are not yet readily accepted in the private market.

#### URBAN TRANSPORTATION

In the modern city the arteries of transportation are worn and blocked. The traffic jam has become the symbol of the curse of congestion.

It was only a few years ago, however, that we recognized this as a national problem. In signing the Urban Mass Transportation Act in 1964, I said:

This is a many sided challenge. We cannot and we do not rely upon massive spending programs as cure-alls. We must instead look to closer cooperation among all levels of government and between both public and private sectors to achieve the prudent progress that Americans deserve and that they expect.

Under this Act, we are

- Aiding cities to draw the blueprints to modernize, expand and reorganize their transportation systems.
- Helping to train specialists in the urban transportation field.
- Advancing research to improve the system and the service.
- Assisting communities to buy the capital equipment and to build terminals for their transit systems.

We must step up this effort.

In the year ahead, we expect to increase our grants to cities from \$140 million to \$190 million.

*I recommend that the Congress provide \$230 million for fiscal 1970 so cities can begin now to plan the improvement of their mass transit systems and service to the people.*

Urban transportation is the concern of our two newest Departments—Housing and Urban Development, and Transportation.

The Department of Housing and Urban Development is responsible for the development of the metropolitan community—and transportation is an essential part of that effort.

The Department of Transportation is responsible for the coordination of different—but closely related—modes of transportation. Moreover, research facilities bearing on transportation—out of which will come the transportation technology of tomorrow—are concentrated in this Department.

When the Department of Transportation was established in 1966, the Congress required both Secretaries of Hous-

ing and Urban Development and Transportation to study this problem and recommend the arrangement which would best assure the Government's ability to meet the transportation needs of America's urban citizens.

On the basis of their intensive study, and their recommendations, *I will shortly submit a reorganization plan.*

—*transferring to the Department of Transportation the major urban transit grant, loan, and related research functions now in the Department of Housing and Urban Development.*

—*Maintaining in the Department of Housing and Urban Development the leadership in comprehensive planning at the local level, that includes transportation planning and relates it to broader urban development objectives.*

#### RESEARCH AND TECHNOLOGY FOR THE CITIES

Federally-sponsored research has helped us guard the peace, cure disease, and send men into space.

Yet, we have neglected to target its power on the urban condition. Although 70 percent of our people live in urban areas, less than one-tenth of one percent of the Government's research budget has been devoted to housing and city problems.

We must:

—Learn how to apply modern technology to the construction of new low-income homes and the rehabilitation of old ones.

—Test these ideas in practice, and make them available to builders and sponsors.

—Look deep into the fiscal structure of the cities—their housing and building codes, zoning, and tax policies.

—Learn how best the federal government can work with state and local governments—and how states and local governments can improve their own operations.

—Evaluate our city programs, so we can assess our priorities.

Last year, I sought the first major appropriations for urban research: \$20 million. Congress appropriated only half that amount.

*I once again propose a \$20 million appropriation for urban technology and research.* This will assist the universities and private institutions of America to carry out the studies so crucially needed.

These funds, along with those from other Government agencies, will also help launch the new Urban Institute, which I recently recommended. This is a private non-profit research corporation formed to create a bank of talent to analyze the entire range of city problems.

#### PLANNING FOR THE FUTURE

A passenger on an airline flying from Miami to Boston is rarely out of sight of city lights below.

As our urban areas expand, the citizen's sense of community broadens. He may live in one locality, work in another, and seek leisure in still another.

The face of the landscape is changing with our growth.

The question is: *How shall our communities grow?*

Unless we decide now for order and purpose, the result will be surrender to chaos, confusion, ugliness and unnecessary and exorbitant cost.

The key to orderly growth is planning—planning on an area-wide basis.

Planning, both immediate and long-range, is the function and the responsibility of the State and community. But the Federal Government has long recognized the need for its support.

That need grows as the problem grows. *I urge the Congress to provide \$55 million in Fiscal 1969 to assist planning for the orderly growth of our urban areas, a 22 percent increase over last year.*

So essential is orderly development to the future of our urban centers that we must provide incentives to encourage it. In 1966 the Congress authorized—but did not fund—such a program of incentive grants.

*I ask Congress to authorize \$10 million for a program of area-wide Incentive Grants in Fiscal 1969.*

The Federal share of a project will increase by up to 20 percent of the costs of projects of areawide significance—if they are part of a comprehensive area plan.

The far-sighted community which responds to this incentive program will find its burdens lighter in providing hospitals, roads, sewage systems, schools and libraries.

#### NEW COMMUNITIES

Over the next decade, 40 million more Americans will live in cities.

Where and how will they all live? By crowding further into our dense cities? In new layers of sprawling suburbia? In jerry-built strip cities along new highways?

Revitalizing our city cores and improving our expanding metropolitan areas will go far toward sheltering that new generation. But there is another way as well, which we should encourage and support. It is the new community, freshly planned and built.

These can truly be the communities of tomorrow—constructed either at the edge of the city or farther out. We have already seen their birth. Here in the nation's capital, on surplus land once owned by the Government, a new community within the city is springing up.

In other areas, other communities are being built on farm and meadow land. The concept of the new community is that of a balanced and beautiful community—not only a place to live, but a place to work as well. It will be largely self-contained, with light industry, shops, schools, hospitals, homes, apartments and open spaces.

New communities should not be built in any set pattern. They should vary with the needs of the people they serve and the landscapes of which they are a part.

Challenge and hard work await the founders of America's new communities:

—Careful plans must be laid.

—Large parcels of land must be acquired.

—Large investments in site preparation, roads and services must be made before a single home can be built and sold.

—The development period is long, and return on investment is slow.

—But there is also a great opportunity for, as well as a challenge to, private enterprise.

The job is one for the private developer. But he will need the help of his Government at every level.

In America—where the question is not so much the standard of living, but the quality of life—these new communities are worth the help the Government can give.

*I propose the New Communities Act of 1968.*

For the lender and developer, this Act will provide a major new financing method.

A Federally-guaranteed "cash flow" debenture will protect the investment of private backers of new communities at competitive rates of return. At the same time, it will free the developer from the necessity to make large payments on his debts, until cash returns flow from the sale of developed land for housing, shops and industrial sites.

For the local and State government, the Act will offer incentives to channel jointly-financed programs for public facilities into the creation of new communities. The incentives will take the form of an increased Federal share in these programs.

#### A SENSE OF PLACE AND PURPOSE

"A city," Vachel Lindsay wrote, "is not builded in a day."

Nor—we know well—will its problems be conquered in a day. For the city's tides have been ebbing for several decades. We are the inheritors of those tragic results of the city's decline.

But we are the ones who must act. For us that obligation is inescapable.

Our concern must be as broad as the problems of men—work and health, education for children and care for the sick. These are the problems of men who live in cities. And the very base of man's condition is his home: he must find promise and peace there.

The cry of the city, reduced to its essentials, is the cry of a man for his sense of place and purpose.

Violence will not bring this. But neither should fear forestall it.

The challenge of changing the face of the city and the men who live there summons us all—the President and the Congress, Governors and Mayors. The challenge reaches as well into every corporate board room, university, and union headquarters in America. It extends to church and community groups, and to the family itself. The problem is so vast that the answer can only be forged by responsible leadership from every sector, public and private.

We dare not fail to answer—loud and clear.

To us, in our day, falls the last clear chance to assure that America's cities will once again "gleam, undimmed by human tears."

No one can doubt that the hour is late.

No one can understate the magnitude of the work that should be done.

No one can doubt the costs of talk and little action.

As we respond to the cities problems—to the problems caused by the accumulated debris of economic stagnation, physical decay and discrimination—let us recall and reaffirm the reasons for our national strength: unity, growth and individual opportunity.

And recalling these truths, let us go forward, as one nation in common purpose joined, to change the face of our cities and to end the fear of those—rich and poor alike—who call them home.

LYNDON B. JOHNSON.

THE WHITE HOUSE, February 22, 1968.

#### REORGANIZATION PLAN NO. 2 OF 1968—URBAN MASS TRANSPORTATION—MESSAGE FROM THE PRESIDENT (H. DOC. NO. 262)

The ACTING PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which, with the accompanying paper, was referred to the Committee on Government Operations:

*To the Congress of the United States:*

As long as he has lived in cities, man has struggled with the problem of urban transportation. But:

- Never before have these problems affected so many of our citizens.
- Never before has transportation been so important to the development of our urban centers.
- Never before have residents of urban areas faced a clearer choice concerning urban transportation—shall it dominate and restrict enjoyment of all the values of urban living, or shall it be shaped to bring convenience and efficiency to our citizens in urban areas.

How America and its cities solve the transportation problem depends largely on our two newest Federal Departments—the Department of Transportation and the Department of Housing and Urban Development:

- The Department of Housing and Urban Development is responsible for the character of all urban development.
- The Department of Transportation is concerned specifically with all the modes of transportation and their efficient interrelationship.

At present, responsibility for program assistance for urban highways and urban airports, and urban mass transportation is divided between the Department of Transportation and the Department of Housing and Urban Development. As a result:

- Federal coordination of transportation systems assistance is more difficult than it need be.
- Communities which have measured their own needs and developed comprehensive transportation proposals must deal with at least two Federal agencies to carry out their programs.

To combine efficiently the facilities and services necessary for our urban centers and to improve transportation within our cities, State and local government agencies should be able to look to a single Federal agency for program assistance and support. The large future cost of transportation facilities and services to

the Federal Government, to State and local governments, and to the transportation industry makes wise investments and efficient transportation systems essential.

An urban transportation system must:

- combine a basic system of efficient, responsive mass transit with all other forms and systems of urban, regional, and intercity transportation;
- conform to and support balanced urban development.

In this, my second reorganization plan of 1968, I ask the Congress to transfer urban mass transportation programs to the Secretary of Transportation and to establish an Urban Mass Transportation Administration within the Department of Transportation to strengthen the organizational capacity of the Federal Government to achieve these objectives.

The plan transfers to and unifies in a new Urban Mass Transportation Administration in the Department of Transportation those functions which involve urban mass transportation project assistance and related research and development activities. Because urban research and planning and transportation research and planning are closely related, however, the plan provides that the Department of Housing and Urban Development perform an important role in connection with transportation research and planning insofar as they have significant impact on urban development.

We expect the Department of Transportation to provide leadership in transportation policy and assistance. The Department of Housing and Urban Development will provide leadership in comprehensive planning at the local level that includes transportation planning and relates it to broader urban development objectives.

The transfer of urban mass transportation programs will not diminish the overall responsibilities of the Department of Housing and Urban Development with respect to our cities. Rather, adequate authority is reserved to that Department to enable it to join with the Department of Transportation to assure that urban transportation develops as an integral component of the broader development of growing urban areas.

The new Urban Mass Transportation Administration in the Department of Transportation, working with other elements of the Department, will consolidate and focus our efforts to develop and employ the most modern transportation technology in the solution of the transportation problems of our cities.

The reorganization plan provides for an Administrator at the head of the Administration who would be appointed by the President, by and with the advice and consent of the Senate. The Administrator would report directly to the Secretary of Transportation and take his place in the Department with the heads of the Federal Aviation Administration, Federal Highway Administration, Federal Railroad Administration and the Coast Guard.

I have found, after investigation, that each reorganization included in the reorganization plan transmitted herewith is necessary to accomplish one or more of the purposes set forth in section 901

(a) of title 5 of the United States Code.

I have also found that it is necessary to include in the accompanying plan, by reason of these reorganizations, provisions for the appointment and compensation of the new officer specified in section 3(b) of the plan. The rate of compensation fixed for this officer is comparable to those fixed for officers in the Executive Branch of the Government having similar responsibilities.

The reorganizations included in this plan will provide more effective management of transportation programs. It is not feasible to itemize the reduction in expenditures which the plan will achieve, but I have no doubt that this reorganization will preserve and strengthen overall comprehensive planning for developing urban areas while simultaneously insuring more efficient transportation systems for our cities than would otherwise have occurred.

I strongly urge that the Congress allow the reorganization plan to become effective.

LYNDON B. JOHNSON.

THE WHITE HOUSE, February 26, 1968.

#### EXECUTIVE MESSAGES REFERRED

As in executive session,

The ACTING PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the Committee on the District of Columbia.

(For nominations this day received, see the end of Senate proceedings.)

#### MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Bartlett, one of its reading clerks, informed the Senate that, pursuant to the provisions of section 1, Public Law 86-42, the Speaker had appointed Mr. SLACK, of West Virginia, as a member of the U.S. Delegation of the Canada-United States Interparliamentary Group, vice Mr. PIKE, of New York, excused.

The message announced that the House had passed the bill (S. 1093) to authorize the use of the vessel *Annie B.* in the coastwise trade, with an amendment, in which it requested the concurrence of the Senate.

The message also announced that the House had passed a bill (H.R. 14743) to eliminate the reserve requirements Federal Reserve notes and for U.S. notes and Treasury notes of 1890, in which it requested the concurrence of the Senate.

#### ENROLLED BILL SIGNED

The message further announced that the Speaker had affixed his signature to the enrolled bill (S. 269) to authorize an exchange of lands at Acadia National Park, Maine, and it was signed by the Vice President.

#### HOUSE BILL PLACED ON THE CALENDAR

The bill (H.R. 14743) to eliminate the reserve requirements for Federal Reserve

notes and for U.S. notes and Treasury notes of 1890, was read twice by its title and ordered placed on the calendar.

#### WAIVER OF CALL OF THE CALENDAR

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the call of the Legislative Calendar, under rule VIII, be dispensed with.

The PRESIDING OFFICER (Mr. MONTOYA in the chair). Without objection, it is so ordered.

#### LIMITATION ON STATEMENTS DURING TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that statements in relation to the transaction of routine morning business be limited to 3 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### THE HONORABLE SCOTT W. LUCAS

Mr. DIRKSEN. Mr. President, the passing of the Honorable Scott W. Lucas, former majority leader of the U.S. Senate, marks the end of a colorful career.

Scott Lucas and I grew up together in the same area of Illinois, for we lived but 30 miles apart. I first came to know him when he played baseball as a first baseman in the old Illinois-Missouri league. In that field, he gained a great reputation and became known to thousands of baseball fans, young and old, as an outstanding player.

But it was by virtue of our association in the American Legion that we became intimately acquainted. He had served in World War I both as an enlisted man and as a lieutenant. My service was exactly the same.

He became active in Democrat politics as chairman of the State tax commission, as a delegate to many Democrat National Conventions, and then as a Member of Congress.

I came to the 73d Congress, and he was elected to the 74th and 75th Congresses. He was elected to the Senate in 1938 and again in 1944.

It became our destiny that I should become his opponent for the Senate in the campaign of 1950, and after his defeat he returned to the practice of law.

Some years ago, a circulatory affliction necessitated the amputation of his left leg. I went to the hospital to visit with him shortly before this surgery. No man faced such an ordeal with greater cheerfulness and courage; and when it became possible for him to move around, he attended dinners, baseball, and football games, and golf tournaments with magnificent determination.

While we were cast in the role of political opponents, it did not fracture our lifelong friendship. Scott Wike Lucas had a great career in public service, and he discharged every duty responsibility and well. He had a host of friends in all parts of the Nation, who will mourn his passing.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield.

#### INTERFERENCE WITH CIVIL RIGHTS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the hour between now and the vote on cloture be equally under the control of the minority and majority leaders or whomever they may designate.

The PRESIDING OFFICER. Does the Senator desire that the unfinished business be laid down at the present time?

Mr. MANSFIELD. Yes. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the unfinished business.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 2516) to prescribe penalties for certain acts of violence or intimidation, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. MANSFIELD. Mr. President, I ask unanimous consent—this will vacate a previous request that was granted—that the morning hour occur after the vote on cloture, so that the time can be devoted to that and related matters in between.

Mr. STENNIS. Mr. President, reserving the right to object, I did not understand the procedure of the majority leader in making these requests. He might have conferred with someone else. I am the one on duty today.

Mr. MANSFIELD. I must apologize.

Mr. STENNIS. There is no objection to it. The majority leader plans to arrange for an hour of active debate on the measure?

Mr. MANSFIELD. That is correct.

Mr. STENNIS. I have no objection.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. JAVITS. There is a word of art which we understand from the Parliamentarian with respect to "morning hour." Does the Senator refer to morning business?

Mr. MANSFIELD. The morning business.

The PRESIDING OFFICER. Without objection, the agreement is so altered.

Mr. MANSFIELD. If the Senator would allow me 1 minute, I yield my time on the pending proposed legislation to the distinguished Senator from Michigan, the lonely end.

Mr. HART. Mr. President, I yield to my majority leader such time as he may desire.

#### THE HONORABLE SCOTT W. LUCAS

Mr. MANSFIELD. Mr. President, I join the distinguished minority leader in expressing my deep sense of loss in the passing of an old colleague of ours and a former majority leader, the late Scott Lucas, of Illinois.

There is not much I can add to what the distinguished minority leader has already said, except to state that Scott Lucas was a man of great talents, not only in the field of athletics, but in the field of politics and in the field of law as well. He was a well known figure in the

annals of the American Legion in the State of Illinois. He was a highly competent majority leader, a man who handled the legislative work with great ability, and who remained a friend to all of us, even after he retired from the Senate.

On behalf of my family I wish at this time to extend my deepest sympathy to the family of Scott Lucas and say to them that we will miss him. May his soul rest in peace.

Mr. CARLSON. Mr. President, I was shocked last Thursday to learn of the sudden and untimely death of Scott Lucas.

Scott and Mrs. Lucas were our neighbors in the Sheraton Park Hotel for many years. We were not only neighbors, we were close friends.

Scott and I were sworn in as Members of the House of Representatives at the same time. During our service in the House, I was fortunate to have the opportunity to learn to know him and work with him, particularly in the field of agriculture. As a member of the House Committee on Agriculture, he rendered great service to the farmers of our Nation. This was during the depression days and agriculture was in serious difficulty.

Scott was majority leader when I became a Member of the U.S. Senate. Following his service in the Senate, I had many opportunities to seek his advice on legislation and other current and pressing problems. My many personal contacts with him will always be remembered fondly.

He was kindly, courteous, and considerate of his fellow man. It can be truly said of Scott Lucas that he was a great American and a great public servant.

Mr. PERCY. Mr. President, all of us note with sadness the passing of a great public servant, former majority leader of the Senate, Scott Lucas.

Scott Lucas' service to his State and his Nation began with his election as State's attorney for Mason County, Ill., in 1920, and continued uninterrupted until the day of his death. In his brilliant political career he served both in the House of Representatives and the Senate, and the measure of the esteem in which he was held is shown by his election as majority leader in 1948.

I had the privilege of talking with Senator Lucas frequently last year, during my first few months in Washington, when we both lived in the Sheraton Park Annex. He maintained an active interest in public affairs, and provided wise and valuable counsel not only to me, but to many others, on a wide variety of subjects. He advised me, for instance, on our homeownership for low-income family program, in which he maintained an active interest.

We of Illinois are particularly proud of his distinguished service to his State and his Nation. He left his mark on the Congress and will long be remembered by his friends and colleagues. He will be sadly missed by them, and by the Nation he served so well.

#### INTERFERENCE WITH CIVIL RIGHTS

The Senate resumed the consideration of the bill (H.R. 2516) to prescribe

Relationship with Canada, of course, holds the future of Libby Dam, the completion of the road that would link Glacier and Waterton Lakes National Parks on the west, and Alberta ranks with California and Washington as the principal sources of Montana tourists. Lethbridge, the irrigation center of Canada, is watered by streams that rise in the United States.

As far as Canada is concerned, we doubt that a single high school in Montana gives more than a fleeting reference to our friends across the line. Americans often as not teach Spanish at the high school level with the idea of friendly relationship with neighboring Latin America. This has merit. On the other hand these northern states, especially, overlook the situation of Canada being neighbor.

Back at the University of North Dakota, also near the border, we followed a familiar pattern as a student and took a minor in European history. We do not recall a single course that emphasized Canada. We haven't heard that schools in Montana are any better in this respect.

In a brief check here in Columbia Falls, a typical high school student answer was, "We had something about Canada in fourth grade geography."

Canada is 40 airmiles from Columbia Falls. It is the world's second largest country—3,845,774 square miles compared to Russia's 8,598,701 square miles, China with outlying areas, 3,760,339 square miles the United States including Alaska and Hawaii, 3,615,210 square miles and Brazil with 3,288,050.

Canada's immediate neighbors are the United States to the south, and north across the pole, Russia.

Our neighbors to the north are doing a remarkable job increasing living standards. Population of the dominion is 17,442,000.

American ignorance of Canada was evident during the National Governors' Conference at Many Glacier last June. Principal speaker by invitation of Montana's Governor J. Hugo Aronson was Canada's colorful and distinguished prime minister, John G. Diefenbaker.

New York's Governor Nelson A. Rockefeller got the headlines and the one picture of the conference used by Time Magazine for example.

The Hungry Horse News is acutely aware of Glacier being a part of Waterton-Glacier International Peace Park and the proximity of Alberta and British Columbia to Montana. This newspaper presented a picture of Prime Minister Diefenbaker on top of page one, where it belonged.

Our intention here at the Hungry Horse News is to present more information about Canada, our important neighbor. How lucky Americans and Canadians are. We speak the same language, and have many of the same values as to home, church and democracy.

[From the Columbia Falls (Mont.) Hungry Horse News, Oct. 28, 1966]

#### SEE ELK NEAR ROADS IN CANADIAN PARKS

Recommended fall outing for residents of the Flathead who want to hunt elk with a camera is to the Canadian national parks.

From Columbia Falls to Kootenay National Park is 220 miles over good road. Route is by way of U.S. 93 through Whitefish and Eureka to Elko junction, thence on Canadian Highway 3 to the Highway 93 junction and north to Radium Hot Springs. Roads are better in British Columbia than in Montana.

Not advised is going through Kimberley, B.C., a longer route with poorer roads.

Motel rates in Radium and Banff are cheaper this time of the year, and one can expect to see elk and mountain sheep. It's an easy weekend for the family budget.

Clean, attractive Canadian National Parks pools at Radium are open for swimming. Water in the hot pool ranges from 100 to 113 degrees, and above 70 degrees in the other.

The Hungry Horse News editor prefers Canadian parks in the fall and spring. Admittance for a car to all Canadian parks for a year is \$2.

Elk pictures in this series were taken in Yoho National Park on road to Emerald Lake earlier this month.

[From the Columbia Falls (Mont.) Hungry Horse News, Sept. 13, 1967]

#### ALONG TRANS-CANADA HIGHWAY—WHERE VISITOR TRAFFIC BOOMED

(By Mel Ruder)

The 1963 travel year saw a shift in travel from U.S. Highway 2 and Glacier National Park to Canada's wide, splendid Trans-Canada Highway through its national parks and across Rogers Pass.

The Hungry Horse News editor traveled the route last October, and drove it again this past weekend.

Even without the stimulus of the Seattle World's Fair there was a marked increase in travel in Banff this summer.

#### RECORD TRAVEL YEAR, 1962

Here in Glacier National Park, U.S.A., there was a tremendous 1962 visitor flow and a record 966,100 guests up 31 per cent from 739,982 in 1961. Traffic for 1963 generally has been running 17 to 18 per cent below last year. Motel owners of the Flathead are well aware of the drop.

In Banff Saturday there was an announcement by Supt. D. B. Coombs that August, 1963 saw a marked increase over traffic of August a year ago. Banff last month had 97,693 vehicles with 327,817 passengers enter its east gate up from 84,697 passenger vehicles with 288,406 riders in August, 1962. The Rogers Pass section of the Trans-Canada Highway that runs through Banff had its first through traffic July 30, 1962.

At an Esso station in Banff we chatted with Norm Stevenson. He said that gasoline sales were up 20 per cent this summer. Of course with better cars there are fewer lube jobs, and he said this phase of his business and repair jobs were down.

#### A \$2 PARK FEE IN CANADA

Fred Doyle and Phillips Spaens, both of Field, B.C. were at the Yoho National Park gate. Incidentally it costs just \$2 a year for a car to enter all Canadian national Parks in a year. Canadians have a difficult time understanding why Americans charge \$2 for 15 days or \$4 for the season in Glacier, and then \$6 for 15 days or \$6 for the season in Yellowstone.

Doyle had some interesting figures on American cars in Canada.

The jump in number of American cars entering Yoho was from 2,986 for July, 1962 (prior to Rogers Pass opening) to 8,206 in July, 1963. For August, 1963 there were 8,005 American cars.

Likewise there was an increase in numbers of Canadian cars from eastern provinces, especially Ontario.

Daily check of all cars (Canadians and Americans) through the Yoho entrance was 368 (per day) for July, 1962 jumping to 1,788 cars per day for July, 1963.

#### INCREASE FOR GLACIER

At the entrance to Glacier National Park (Canada) we chatted with Charles Raven of Revelstoke, whom we had seen last October on our trip over Rogers Pass. He said traffic was now averaging 700 cars a day (one way) had been averaging over 2,000, and peaked at 3,000.

We'd heard that Trans-Canada traffic last summer was often bumper to bumper. We found as much traffic on Trans-Canada last weekend as takes place on U.S. 10 in summer. Actually the road will not handle the traffic volume that a four-lane inter-state will in Montana.

Here we think of Canadians as relatively slow drivers. Up on the Trans-Canada Saturday and Sunday we were driving 55 to 60 miles an hour (speed limit 60) and were often passed.

In the Sept. 7 issue of "The Vancouver Sun" we noticed an interview with B. C. Highways Minister P. A. Gaglardi.

His conclusions were: "Traffic on the Rogers Pass (Trans-Canada) is reaching a point where tourists can't slow down and take the advantage of the scenery."

#### TOO CROWDED SCENIC ROAD

The British Columbia Highways Minister wants development of the Yellowhead Highway to provide an alternate route from Central Alberta to the coast "and take the strain off Rogers Pass."

Friday we drove to Radium Hot Springs on U.S. and Canadian 93 and then by way of St. Steele and Wasa to Highway 95 in four hours. A few years ago going by way of Kimberley, it would take 5½ hours. British Columbia this summer has had tremendous improvement of the road to Radium under-way.

Winter rates are in effect at Radium Hot Springs, and we noted that Saturday evening a number of the motels were full. We stay at the Columbia Motel, attracted first by the name similarity.

C. W. Neild, who is in charge of the fine Kootenay National Park Aquacourt, told us that through Sept. 6 there has been 228,350 paid swimmers and bathers up from 218,810 a year ago. July 1963 had fewer swimmers than July a year ago.

#### SLOWER SUMMER AT RADIUM

Radium motels had a poorer year than 1962. They also missed the World's Fair, realized the traffic increase from Banff through Golden and across the Trans-Canada, and also the considerable construction along Highway 95 north and south.

Of much interest to the Kootenay National Park area residents is completion of Highway 3 from Cranbrook through Creston and across British Columbia along the American border. The last link near Creston is just being completed.

We also saw the new Kootenay National Park Campground where the Canadian government has provided swings and teeter-totters for youngsters. Imagine Glacier National Park having playground equipment in its campgrounds?

A fundamental difference is that Canadians think of their national parks more as places to vacation and play as well as communing with nature.

At Rogers Pass, we parked next to a car with a Montana 7 license. It turned out to be Charles White, Kalispell attorney, with his brother, Father White of the Carroll College faculty, Helena. They'd returned from a trip to the coast, and incidentally caught their limit of salmon at Westport.

[From the Columbia Falls (Mont.) Hungry Horse News, Sept. 22, 1967]

#### RECOMMEND FALL OUTING TO VIEW CANADIAN PARKS

(By Mel Ruder)

Increasing numbers of north-western Montana residents drive to Kootenay and Banff National Parks in Canada.

Route is by way of U.S. 93, Canadian 3 then to 93 and 95 north to Radium Junction, gateway community to Kootenay National Park. Banff is 80 miles further.

Only poor highways for the outing are in Montana. Radium is 220 miles from Columbia Falls.

#### BUSY SEPTEMBER

Last weekend Radium seemed busier than West Glacier in August. There was a golf tournament. A few motels had "No Vacancy" signs. They were full.

However motel rates were at winter discounts. For example a \$10 unit with bedroom, bath and kitchen now rents for 8.

To be kept in mind is that U.S. Customs and Canadian Customs hours at Roosville, north of Eureka, are now from 9 a.m. to 6 p.m.

J. D. Nutter at U.S. Customs and Immigration said that traffic this season was up 3 or 4 per cent. Incidentally the station's attractive beds of petunias had escaped frost.

At Kootenay National Park traffic this year is somewhat down from a year ago. Expo 67 has attracted prairie and eastern Canadians away from western parks.

July 1—Dominion Day—saw the Aquacourt at Radium have its record day with 4,900 in the pools. The place was still rather busy last weekend with 864 admittance Friday and even more Saturday.

Damages from the May 3, 1967 explosion of the tanker just above the pools is obvious.

#### GAS EXPLODES

It was during the noon hour at 12:45 p.m. when the driver lost control of his vehicle 200 feet above the pools. The truck went into Sinclair Creek and the 6,000 gallons of gasoline exploded.

Miraculously the eight bathers escaped, and the pool was reopened in seven days.

Damage shows with a great fire scar of burned trees on the mountain, and many missing windows from the Aquacourt Building covered with plastic. Insurance settlement is still pending.

The hot pool—water up to 113 degrees—is scheduled for enlargement this winter. Information is that hot water will then be sent into the cool pool, ordinarily about 70 degrees.

#### REBUILDING HIGHWAY

Also to be under contract this winter and completed by next July is reconstruction of Highway 93 through the pool area.

American visitors should keep in mind that Canadians will observe their Thanksgiving Monday, Oct. 9. Reservations are recommended for persons going to Canada that weekend. There is also a teachers' convention. Our recollection is mid-October.

The big Redstreak Campground with 241 units is open until Sept. 30. There were 53 overnight campers Friday.

Campgrounds in Canadian parks present displays of flowers, and this large Kootenay National Park campground had four-foot high Canna lilies, brilliant geraniums and petunias.

Last weekend saw an absence of animals along the highway in the Kootenay Valley. Ordinarily the best show comes in mid to late October.

[From the Columbia Falls (Mont.) Hungry Horse News, Oct. 20, 1967]

#### CONSTRUCTION UNDERWAY ON MAJOR HIGHWAY 93 CONTRACT

Construction started this week on a \$2.2 million contract to rebuild Highway 93 in the vicinity of Radium Hot Springs, Kootenay National Park, Canada.

Contractor for this less than two mile contract is Burns and Dutton, Calgary.

Effective this week Highway 93 near the aquacourt (pools) is closed to through traffic from 8 a.m. to 3 p.m. Monday through Friday, and open Saturday and Sunday round-the-clock.

This is the route Flathead residents take when going to Banff in fall and winter months.

The contract provides for a parking area at the Radium pools somewhat below the present grade. Running overhead will be the new through highway. There will be large fills. Contract completion is June, 1969 with construction to be advanced so as to not hinder the 1968 travel season.

To coincide with highway construction is enlargement of the hot pool (113 degrees) at

Radium. Contract award is slated for November. Design of the present hot pool will be changed considerably to include a shallow end near the aquacourt building.

While this construction is underway, the 113 degree naturally hot water will be piped into the present cool (80 degree) pool. Hours at the pool last weekend were 10 a.m. to 9:30 p.m. daily. There may be some change because of construction activity.

Superintendent of the 543 square mile Kootenay National Park is J. E. Rae, who last weekend was in Ottawa. Our thanks to Naturalist Ian D. Jack for helping obtain information.

Kootenay National Park is entirely within British Columbia. Immediately to the north is Yoho National Park, and to the northeast meeting at the Continental Divide, Banff National Park.

[From the Columbia Falls (Mont.) Hungry Horse News, Dec. 29, 1967]

#### ELK GREET VISITORS IN CANADA

Pleasant winter outing for residents of the Flathead is less than five hour drive up Highway 93 to Canada's Kootenay and Banff National Parks.

Convenient overnight accommodations are available at Radium Junction—entrance to Kootenay National Park—220 miles from Columbia Falls. Roads are better in Canada than between Whitefish and Eureka. Take route in Canada through Ft. Steele.

This winter sees the Sinclair Pass section between Radium Junction and the hot pools closed Monday through Friday from 8 a.m. to 3 p.m. except for holidays. Burns and Dutton, Calgary, has a \$2.2 million contract for reconstruction of less than two miles of highway and a parking area. The road is open Saturday and Sunday. Banff is 85 miles from Radium.

Also under construction is the 113 degree outdoor hot pool at Radium which is being more than doubled in size. In use is the former cool pool with the piped natural hot water bringing temperature to about 90-95 degrees.

Swimmers these days can look above the pool to a decorated Christmas tree. It is also a pleasant experience to be comfortable swimming outdoors in warm water while snow is falling.

There have been fewer visitors at Radium this winter because of road and pool construction.

Obviously absent were older persons who take the hot water cure for aches and pains.

Snow depths are less than normal so far in Kootenay and Banff National Parks. Apparently the storms went south to Arizona.

[From the Columbia Falls (Mont.) Hungry Horse News, Feb. 9, 1968]

#### FERNIE TO BOOM WITH \$650 MILLION AWARD (By Mel Ruder)

A major industrial boom is starting 100 miles north of the Flathead Valley at Fernie, B.C.

Yet Montanans heard or read practically nothing of the Jan. 31 announcement. International boundary between Canada and the United States continues to be a tremendous news barrier.

Hungry Horse News editor went to Fernie, Natal and Michel Monday.

#### ENTERPRISING PAPER

First stop was at "The Fernie Free Press." Half the front page of the enterprising newspaper had a big headline: "\$650 Million, It's Signed!" We don't own type as large as they used.

Page one stories told of a contract signed between Kaiser Coal, Ltd., subsidiary of Kaiser Steel Corporation, and Mitsubishi-Shoji Kaisha, representing seven major Japanese steel firms.

The contract calls for shipment of more

than 45 million long tons of high-grade coking coal over a 15-year period starting in early 1970. The coal will come from new mining operations to be developed in the Crows Nest area of southeastern British Columbia.

This area is 100 airmiles north of Columbia Falls.

Jack L. Ashby, president and chief executive officer of Kaiser Steel Corporation and Kaiser Coal Ltd., told Publisher Adrian Kennedy of the Fernie Free Press: "As a result of this sales contract, we are proceeding with acquisition and development of coal lands as provided for in our agreement with Crows Nest Industries."

#### MAJOR INVESTMENT

Ashby indicated Kaiser Steel's investment in Canada for new mining facilities will approximate \$55 million and will increase production of Crows Nest coal from the present 800,000 tons a year to about four million tons per year for Japanese and other markets including North America (the United States).

Publisher Kennedy showed us a picture of Harmer Ridge where bituminous coal in a 65-foot thick seam has been exposed. The Balmer seam on this ridge runs for at least eight and a half miles and averages 50 feet thick. New operations will be here.

The Fernie publisher came to Canada from Ireland 30 years ago, and arrived in Fernie five years ago from the uranium boomtown of Elliot Lake, Ontario. We also met Gilbert Wood, mechanical superintendent, and Lloyd Phillips, news editor. Kennedy, Wood and Ron Powell, Cranbrook publisher, own the Fernie paper which is presently printed in Cranbrook.

Kennedy said that Fernie has 2,861 residents and has been static for years. Now prediction is for 10,000 by 1975.

Much of the business section contains brick buildings erected in 1909 following a disastrous fire. Noted was that only two new business buildings had been erected since 1909.

#### ONCE PROSPEROUS

Once Fernie was prosperous with the Great Northern owning much Crows Nest Industries stock, and a line bringing coal to Rexford.

Of considerable interest to Montanans is prospect of a rail line being built by the Kootenay & Elk Railway, Crows Nest Industries subsidiary, south to the Great Northern near Eureka.

The Canadian newsmen thought the Great Northern connection should be built. So did men sitting in the lobby at the King Edward Hotel, and the service station man who filled our tank, prefixed Canadian Pacific with a cuss word. The CPR badly needs public relations improvement in Fernie, and is credited with holding the community back.

To be noted is Saturday's "Lethbridge Herald" with the top story under this headline: "Government Will Insist on Canada Coal Route."

The story starts: "Vancouver—Transport Minister Paul Hellyer said Friday the federal government will insist that the \$650,000,000 of B.C. coal destined for Japan under a Kaiser Steel contract be shipped from the mines to Tidewater by an all-Canadian route. . . ."

#### PRESIDENT'S PROGRAM FOR THE CITIES

Mr. RIBICOFF. Mr. President, President Johnson has proposed a comprehensive program to deal with the Nation's most urgent domestic problem—the city.

The program proposed in the President's message to the Congress and the American people blends the strongest forces of our society—government, business, and labor—in a cooperative and creative way to solve some of the problems that beset our urban centers.

By mobilizing decisive economic tools—the profit motive and tax incentives—we can make an excellent start in remedying the sickness that has our cities in its grasp.

The program draws upon the recommendations and proposals advanced by recognized leaders in the urban field. And we in the Senate can be proud of our contributions to the President's message.

Many of us have called for bold leadership in urban affairs. This message demonstrates that leadership and a grasp of the basic steps required if we are to fulfill our commitment to urban America.

The program is not a panacea for the problems of cities. The President, I am sure, did not intend it to be. The plan builds—very properly—on the initiative of the model cities and poverty programs. It forges the successes of the past into a tool with which we can deal with the problems of today and a plan to deal with problems of the future.

Under the President's plan, housing programs will no longer depend on those in Washington and in the cities alone. For the message calls upon the talents of the Nation's corporations, the strength of labor, the knowledge of the men in finance, the imagination of city planners and administrators and—equally important—the concept of self-help for the poor.

The President has spelled out the challenge in clear-cut terms. Now it is up to Congress, the Governors, State legislators, the mayors and city councils of America. Now is the time for all of our citizens to unite in recognition of the problems we face. President Johnson has pointed the way. Now we must—with all our determination—move against these problems.

#### THE ENVIRONMENTAL CRISIS

Mr. NELSON. Mr. President, there is today increasing concern about the continuing deterioration of environment. Our air, water, and soil are all threatened by the vast tide of pollution that is sweeping the country. Modern man has far exceeded nature's capacity to dilute and purify all his wastes and the wastes of his society.

In a speech recently before the Natural Resources Committees of the U.S. Chamber of Commerce, Secretary of Agriculture Orville Freeman outlined the enormity of the environmental crisis we face today and spoke specifically about some pollution problems which are related to agricultural practices.

The beneficial aspects of pesticides have never been questioned. There is, however, great concern—and it is justified—over the continued, widespread use of pesticides like DDT which do not break down in nature after application. Secretary Freeman, in his speech, points out the drastic reduction in DDT use by the Department of Agriculture in the last 10 years. Further, he defines the basic policy of the Department of Agriculture regarding DDT which is that persistent pesticides are used only when there is no effective alternative available. I fully endorse this position.

The Secretary, in his speech, describes some other specific problems which il-

lustrate the need to develop broad soil and water conservation programs aimed at preserving all of our remaining land resources, both agricultural and non-agricultural. Controlling erosion and the resultant siltation are a significant part of our program to halt the pollution of our waters.

I commend Secretary Freeman's speech to my colleagues and ask unanimous consent that the full text of the speech be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

REMARKS BY SECRETARY OF AGRICULTURE ORVILLE L. FREEMAN TO THE AGRICULTURE AND NATURAL RESOURCES COMMITTEE OF THE U.S. CHAMBER OF COMMERCE, WASHINGTON, D.C., FRIDAY, FEBRUARY 2, 1968

A week or so ago, I saw these lines in George Stewart's new book, "Not So Rich as You Think":

"When some future historian sits down to summarize what the present generation of Americans has accomplished, his climactic sentence could read: 'Of the waters, they made a cesspool; of the air, a depository of poisons, and of the good earth itself, a dump...'"

Too harsh—perhaps so. But I am very much afraid that future generations will judge most harshly a race of men that had all the technical knowledge, all the resources they needed to provide a clean water, air and land, but lacked the will to do so.

If we let that happen, then they will so judge us.

It is no secret that we are facing an environmental crisis. It affects every one of the basic elements of the biosphere—air, earth and water, and every one of us.

I know that you in agriculture and agribusiness are concerned. I know that the public is concerned. Pollution is now ubiquitous. Its effects on the American people—70 percent of whom live in urban areas—could be aptly summed up like this: "The total effect of pollution is greater than the sum of its separate parts." It isn't just a matter of dirty water, or of just dirty air, or just noise pollution or suburban sprawl and clutter—which someone described as "land pollution." It's all these things coming together at once in a combined assault on the senses.

This has finally persuaded the average citizen that he has a crisis on his hands. I can assure you that the Secretary of Agriculture is vitally concerned with this crisis, and aims to do something about it.

Few Americans stop to realize that the USDA administers conservation programs covering nearly 81 percent of this country's land... all the crop land, the grassland pasture and range, and the National Forests.

We have "first," federal responsibility for the water than falls on this 81 percent of the land. We have extensive programs for controlling, conserving and developing this water where it falls. About half our total personnel—50,000 people—are involved in conservation work, either in research or action programs.

These 50,000 people are the shock troops of the war on pollution—and they're beleaguered. Now, everyone's against pollution, just as everyone's against sin. But, in a very real sense, we all want those things that are the proximate cause of pollution.

We like cars, which invariably are the leading pollutants of metropolitan airsheds. We like the manufactured bounty from factories that pollute the waters, and we like the thousand-and-one other products of the most highly-advanced technological society man has ever known.

We even like our back-yard barbecues, whose steaks contribute their bit toward murky skies.

With this general introduction, let me proceed to the subject you invited me to speak on, agriculture and pollution:

Agriculture is both sinner—and sinned against—in this matter. Last year, crop damage from air pollution alone was nearly half a billion dollars. And farmers—like everyone else—need clean water to drink, clean air to breathe and, of course, unpolluted air and water for their crops and livestock.

I suppose that we are "sinners" also, a subject I'll discuss in depth in a moment. For now, let me say that we're on top of this problem of agriculturally-caused pollution:

(1) We will ask Congress, in this session, for new authority to deal with the urgent problem of water pollution, as it pertains to agriculture and;

(2) Existing programs—that this Department has administered for many years—are receiving my personal attention, with an eye toward redirecting them to meet new needs.

Now, let me tell you about three major areas of my current concern:

The first is chemicals and pesticides. The Department has reduced its own spraying with persistent pesticides, such as DDT, by a factor of 50 to 1 over the past 10 years. We have established an effective and widespread monitoring system. More on this in a moment.

A second is animal wastes: Today, two-thirds of all beef produced comes from feed lots. The disposal facilities to cope with the staggering amount of animal wastes from highly concentrated feeding operations just don't exist. This is also giving us serious concern.

And finally, the old problem of silt. This is still the most widespread single source of water pollution. Our Soil Conservation Service has been dealing with it for a long time. But new conditions have created the necessity for new directions and new legislation.

So let's start with some simple facts on chemicals and pesticides. The world can't feed a population that may reach 7 billion or more in another three decades without them. We couldn't feed our own people at the lowest cost in the world—less than 18 percent of disposable income this year—without the help of them. This is primary.

Last year, Americans applied 32 million tons of fertilizers to their farms, lawns, gardens and pastures. Too much? Well, even though we've doubled the use of fertilizers every 10 years in the past half-century, the average use of chemical fertilizers per cropped acre here in the U.S., is only one-tenth the level used in the Netherlands, to cite one example.

These fertilizers are not without their problems. Nitrogen and phosphorus nurture the growth of "algal blooms" on ponds, lakes, and streams. It is true that some nitrogen moves in land runoff from fertilized fields. But most of our scientific evidence indicates this is a minor contributor to stream nitrogen right now.

I'm not unconcerned about this problem. But I do feel that the real answer to it is better land use practices to curb the run-off and sediment delivery that transports unwanted fertilizers into watersheds. This makes good sense, both from an economic point of view—keeping it on the land—and from a conservation viewpoint—keeping it out of river systems.

We're not stopping here, however. For 80 years now the Department has been studying behavior of phosphorus in soils, water and plants. In this, and in nitrogen research, we've developed—and distributed to farmers—information on proper fertilizer placement, timing applications, and optimal levels of application for every different soil in the U.S. This helps farmers gain the maximum economic use of fertilizer and minimize losses to his environment. We aim to do more of this.

## PESTICIDES

The same can be said of pesticides.

Already the Department has made great strides in meeting the environmental problems of pesticide use.

For instance:

Research in this field has been greatly expanded.

We recognize the great danger from improper pesticide use. We're working constantly on better licensing, better instruction, and better information in using them.

The Department's research divisions are also working on less persistent sprays, and better monitoring and surveillance of pesticide use.

And as you all know from screw-worm eradication and other programs, we've developed biological methods of pest control. Sterilization, use of predators and pathogenic—or harmful—organisms have eliminated the need for chemicals in controlling some pests.

We're finding more selective chemical pesticides. Major basic research is pressing forward to new solutions to pest control problems.

The Department reduced its own spraying with DDT from 4.9 million acres in 1957 down to and just over 100,000 acres in 1967—a reduction of 50 to 1. We now use persistent pesticides, such as DDT, only when there is no effective alternative.

And, as I mentioned earlier, we're expanding our rural areas monitoring of pesticide use. We now have 55 monitoring stations across the country.

## ANIMAL WASTES

The second great problem I mentioned earlier is the safe disposal of *two billion* tons of animal waste a year.

About two-thirds of the U.S. beef output now comes from feedlots. Today, feedlots with 10,000 head of cattle; broiler operations with 100,000 birds, are not uncommon. This confinement of cattle, hogs and fowl to small, concentrated areas has created a serious and growing sewage disposal problem.

Nebraska and Iowa, for example, feed nearly 3 million head of cattle a year. Their animal waste is equivalent to that produced by 49 million people, or 11 times the human population of these two states. Unfortunately, sewage disposal systems to handle this volume of waste are woefully inadequate.

One cow produces animal wastes equal to the sewage of sixteen people. One feedlot of 10,000 head of cattle has the waste of disposal needs of a city of 160,000 people.

Now, you know the statistics of the problem. I'm sure you've been exposed to them before. Back when most of us in this room last rode on a manure spreader, the problem was simple. We spread it on the fields. But now it's cheaper for farmers to get their nitrogen from a bag than from a barnyard—the price of nitrogen fertilizer in 1968 is cheaper than it was during the nineteen thirties.

The farmer and the feedlot operator are left with manure they usually can't sell, can't even give away, can't burn. And all too often it winds up in the streams, with predictable results.

This is a relatively new problem, and research is in its infancy. We all know—me most of all—that farmers are in a cost-price squeeze. We can't expect them to use economic fertilizers. What's needed, in my opinion, is a crash research program, both in the scientific aspects of this problem, as well as the economic. The problem can be met, and we're working on it now.

We're researching plans for a number of waste-disposal systems. They include lagoons, incinerators and waste-destroying bacteria. We're testing the principle of purifying polluted water by percolating it down through the soil. In some places waste runoff can be diverted into grassy areas with a high filtration capacity.

This problem can be met. There are solutions. But it will take cooperation, money and hard work to do it.

## SALINE POLLUTION

Now a word about saline pollution—about half the 32 million acres of irrigated land in our 17 western states is subject to it. One of these Western states is heavily irrigated California, that grows 40% of the Nation's fresh fruits and vegetables.

Some irrigated lands in the Southwest have registered up to 25 tons of salt per acre foot of water used. But a more typical example is the land near Yuma, Arizona, where the Colorado river carries about a ton of dissolved salt in every acre foot of water. There, when a farmer applies 5 acre feet of water, he also so to say, "applies" roughly 5 tons of salt. Then, as the salts build up, they must be washed out with more water if the crops are not to suffer.

Our scientists are exploring new types of salt-resistant food crops. They've established the salt tolerance of over 60 plants. They're working on water quality measurements and leaching requirements.

This salinity research may eventually help us solve the world food problem. Immense acreage of agricultural lands in food-poor countries are now useless from salt buildup. If dependable methods can be found to reclaim salty soil and prevent future salt buildups, it will mean better food, and a better life, for literally millions of people.

## SILT

That brings us to the oldest of all water pollutants—one that was around long before man came on the scene—silt and sediment. The cost of sediment in our reservoirs alone is \$100 million a year. Sediment ruins recreational lakes, kills fish, costs millions in taxes for dredging and filtering, and carries other pollutants into the water. Total yearly silt pollution damage is in excess of \$346 million.

Listen to this, from an article last month in the *Des Moines Register*:

"The Iowa Conservation Commission moved Wednesday to save the state's lakes from filling up with silt, but the action may have come too late for some lakes and streams.

"At stake are all our natural lakes," said James R. Hamilton, a Storm Lake attorney.

"In a unanimous vote, the commission directed its staff to write a comprehensive plan for control and improvement of the watershed areas from the standpoint of siltation control.

"The plan, at the urging of Hamilton, will also embrace the matter of compelling offending landowners through appropriate legal action to remedy the injurious effect of the siltation processes.

"The commission intends to seek approval from the next session of the Iowa Legislature to clamp down on farmers who, through poor soil conservation practices, flood Iowa's lakes and streams with silt and sand."

Sediment is a terrible example of a resource out of place. It hurts the land where it comes from and hurts the water where it goes.

And it isn't just a farm problem. In 1967 the Nation stripped one-and-a-half million acres bare for housing developments, new roads, and other construction. Sometimes it is years before we build on this land—and, in the meantime, it erodes.

You've seen this construction around Washington. It's the fastest growing large metropolitan area in the Nation. About 25% of the sediment that turns the lower estuary of the Potomac brown comes from these construction sites. In metro Maryland, studies show that land undergoing development produces from 2 to 200 times the amount of sediment as nearby farmland.

Suburbia isn't the only villain: In the intermountain West, 66 to 90 percent of the sediment produced by streams comes from streambank and streambed erosion. Else-

where, two million acres of strip mined lands—all producing heavy sediment—need conservation treatment. A bill before Congress now would authorize USDA to assist more directly in sediment control in such areas.

This non-farm erosion will increase unless steps are taken to control it. New building construction during the present decade will exceed all other building in this country since the Revolution to now.

This Administration is concerned.

The Department of Agriculture and the Department of Housing and Urban Development last year co-sponsored the first national conference on suburban soil and water problems. It was attended by contractors, conservationists and others. Future conferences are being planned all over the country to meet the problem.

## A 20 TO 1 COST-BENEFIT RATIO

Soil is going to wind up somewhere. It's a solid part of our environment. That leads me to a rhetorical question: Is it better, through erosion control measures, to pay a little bit to keep useful soil on the land—or is it better to pay a great deal more at the other end of the line, and dredge that soil out of some river or reservoir?

The comparative costs are 1 to 20. That is, it averages 20 times as much to dredge sediment out of water, as it would have cost to keep it as soil on the land, leaving aside the productive loss to the farmer from his lost topsoil.

This form of pollution prevention—rather than costly correction, is simple logic. Sediment pollution is not only our highest-volume pollutant, it's one of our most expensive. It carries other pollutants, such as chemicals, into streams, which arrive there along with sediment and runoff water.

Conservation keeps both—soil and runoff water—on the land.

We know from long experience that conservation measures such as contour strip cropping, terracing cover crops do markedly reduce sediment loads. We know these same principles of land use can be adapted to urban fringe lands as well.

Let me close by saying this: There aren't any easy answers to the problem I've discussed this noon. But they're not beyond our ability to solve. In this country—and I believe this as an article of faith—we can do anything we want to do.

Just look at what we've done so far.

The Department of Agriculture has helped landowners to contour 43 million acres of American soil. We've helped plant 110,000 lineal miles of hedgerows and windbreaks, and another 13 million acres of trees. We've helped build a million and a half acres of grassed waterways. By the nineteen fifties, when another potential dust bowl descended on Kansas, farmer-conservation measures reduced the days of blowing dust from 120 days a year, during 1936 and 1937—down to 40 days in 1956 and '57, when conditions were just as bad.

We can do it. The government can't do it alone. We need your help, and I ask for it now.

Thank you.

## COMMENDATION FOR U.S. CONSUMER

Mr. HART. Mr. President, the U.S. consumer—as most of us are aware—needs all the help she can get in making wise selections from the multitudinous number of products clamoring for her dollar in today's marketplace.

Periodically in the past 3 or 4 years publications have cropped up which attempted to serve consumers by supplying information. Unfortunately, many of the new ones—perhaps because of hasty

"For feed grains, the level would be raised from 25 to 30 million tons at which the minimum sale price of 100 percent of parity less the value of the effective price support takes effect. For soybeans, the level at which the minimum sale price of 100 percent of parity takes effect would be raised from 35 to 60 million bushels.

"Increasing these levels as indicated will place a larger quantity of grain under the protection of a relatively high resale price. It would reassure consumers that adequate stocks would be available in case of an emergency, while guaranteeing farmers that the security reserve could not be used to hold down farm prices." And quote.

Here, as in so many previous battles over farm programs, a strategic reserve is supported by every general farm organization save one. It's the old game of odd-man-out.

We lost this fight in the last session when the Purcell bill failed of passage—and along with it we lost an estimated \$300 to \$400 million in extra income that strengthened prices would have brought to farmers. We dare not lose it again this time.

Which brings me to my final point, the "national referendum" on farm programs next November 5.

Without these farm programs we face the one-third drop in net farm income predicted by independent surveys of the Land Grant Colleges, Presidential Commissions and the Congress.

This wouldn't be any short-time shakeout, "separating the men from the boys," as some would have us believe. The capacity for overproduction in the grains is a long-term phenomenon.

I'm sure you're familiar with the study done by the Center for Agricultural and Economic Development at Iowa State University for the Food and Fiber Commission. But let's refresh our memories. This report says that even by 1980, in the absence of programs, wheat would sell for \$1.27 a bushel, with no offsetting certificates, corn at 75 cents a bushel with no diversion payments; soybeans at \$1.23 a bushel.

Gentlemen, there are more than 20 bills before the congress to today that would abolish all or parts of our wheat and feed grain programs. What would the end of his program mean, for example, to a farmer with a 100-acre corn base, with an 80-bushel yield.

At even 85 cents a bushel, 10 cents higher than the price predicted in the study I just mentioned, a farmer's return on that hundred acres would be \$6,800 in the absence of supply-management program.

Under the present program, even in the low-price year of 1967, the average return was \$1.26 a bushel on the entire production, a figure arrived at as follows: The average price was \$1.07 a bushel, plus price support payments of 19 cents. Diverting 20 percent of his 100-acre base, the operator had a 1967 gross return of \$8,048. He also saved about \$650 in production costs on the 20 acres diverted to conserving uses.

Per bushel, the difference is 41 cents—in your billfold or out of it—take your choice.

The Food and Agriculture Act won't stay on the books if we don't fight for it. In 1965 it passed the House by only 49 votes. Today, 53 of the "yea" votes are no longer in the Congress.

Of 435 Representatives in the 90th Congress, only 47 represent districts having 20 percent or more farm population. Fewer than one House district in three has as much as 10 percent farm population.

What this means, is that without strong Presidential leadership, no meaningful commodity legislation can be expected to pass the Congress in the years ahead. It just isn't in the cards. In short, the Presidential election this year is more important to farmers than ever before in our history.

I know that you believe in farm programs. We both know they can be improved, and by working together we can improve them. We have a four year bill for the first time in history. We now have before the Congress the kind of strategic reserve bill we've all wanted, and fought for, over the years.

You have a right and an obligation to find out where the candidates for President and other offices stand on farm programs. Start with the feed grain program now on the books. Find out if it has the candidate's unequivocal support and, if not, how he would improve it.

Let me make one more request. When you return home, please join with the Department and your fellow farmers all over the Nation to assure a sign-up that will make the 1968 feed grain program the most successful of the eight we have launched at this historic series of meetings.

You owe it to yourself and your Nation. Thank you. I'll now try to answer any questions you have.

#### THE 50TH ANNIVERSARY OF ESTONIAN INDEPENDENCE

Mr. PROXMIRE. Mr. President, it is a privilege for me to join Senators in recognizing the 50th anniversary of Estonia's proclamation of independence. This small but proud nation has established a homogenous culture in spite of foreign occupation for some 700 years. Indeed, the Estonians suffered over 250 years of Russian occupation prior to their achievement of independence on February 24, 1918.

Their freedom did not come easily. A 14-month war of independence was necessary to drive both the Germans and Russians off their soil. With the establishment of independence, Estonia prospered as never before with outstanding industrial and agricultural expansion, and a tremendous development of national skills and talents.

Unfortunately, this period of independence lasted for only two decades. Estonia was again caught up in the vortex of history, for with the onslaught of World War II, Estonia was occupied by the Soviet Union. This was followed by German occupation from 1941 to 1944, and then again by Soviet occupation, which has lasted to this day.

Because Estonia is not independent on the 50th anniversary of her proclamation of independence, we cannot consider this to be a day for rejoicing. It is instead, a day of hope—a day in which we take cognizance of and salute an extremely proud, self-reliant people who have maintained a national identity in the face of the most terrible oppression. This then is the significance of February 24—the honoring of a people who maintain a constant, categorical, inner resistance to absorption by an alien culture. Attempts at Russification, attempts at deportation and decimation have been and continue to be of no avail—for the Estonian culture and faith in eventual freedom and independence lives on.

I join Senators in greeting Estonians the world over. May I say that their culture is highly respected by us; indeed through Estonian immigration to the United States we have benefited directly and richly. May I also say that their faith in eventual freedom is shared by us.

Eventual freedom and independence will come to this valiant people, and at that time the anniversary of Estonia's proclamation of independence will truly be a day of happiness.

#### DETERMINATION OF MOUNTAIN WEST TO PREVENT URBAN DECAY

Mr. McGEE. Mr. President, my State does not boast enormous metropolitan areas. The cities in my State have been fortunate in not having experienced the violence and agony and confusion we have witnessed in Watts, Newark, and Detroit. But the people of my State are no less interested than those of the more populous States in President Johnson's recommendations on the cities.

All Americans, in 1968, know that our cities face almost overwhelming problems. Urban areas have grown so rapidly that our ability to insure that cities are livable has barely kept pace. In some cases, it has not kept pace. Overcrowded living conditions, school systems strained to the bursting point, persistent unemployment, poverty—these are the great problems that afflict our cities today. And these are the problems to which President Johnson has given his attention in the message now before the Congress.

Mr. President, those of us from the Mountain West are also determined to prevent urban decay. We know that our cities, as well as our timberland and scenic areas, are a precious national resource. We will have achieved very little in America if our cities become increasingly places of intolerable discomfort, poverty, and hopelessness. I commend President Johnson for the comprehensive package he has given us to consider. I urge the Senate to match his interest and concern with prompt action on his proposals.

#### INVITATION TO DISASTER

Mr. HANSEN. Mr. President, I think it is becoming quite obvious that the President's unfortunate statement of February 12 that summer riots are inevitable has given many thoughtful people, of all political persuasions, great alarm. For the statement was nothing less than an excuse in advance for failure to enforce the law and an invitation to more violence.

Prof. Daniel Moynihan made this point last week, and I placed a report of his remarks in the RECORD for Senators to read. I also felt compelled to speak out, asking that the President and all in executive authority make it clear that violence will not be tolerated.

Mr. President, the Wyoming State Tribune has put the case quite precisely in an editorial published February 20. The Tribune concludes:

What both President Johnson and his attorney general should have said, but markedly did not, was: The laws will be enforced, in the streets, in the cities, in the countryside, in this nation. People who may consider breaches of the peace or of the laws of any kind can expect sure and swift retribution. Massive disorders will be put down to the fullest resources of power and the law

available to the government. Riot at your risk!

This point is vital to any progress we make toward a just and better society. I hope all thoughtful men will emphasize the necessity of maintaining peace and order if we are to fulfill the promises of America.

Mr. President, I ask unanimous consent that the entire editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Wyoming State Tribune, Feb. 20, 1968]

#### INVITATION TO DISASTER

A week ago yesterday, President Johnson in an informal talk to a group of college students in Washington said more urban riots this summer are inevitable. He said the best would be done with the resources available—apparently meaning federal money—but even at that, another bad summer could not be averted.

If the Administration can just get more money out of Congress, Mr. Johnson suggested, for education, health, model cities and antipoverty programs, perhaps things won't turn out so bad.

"If we can get these we will make a dent in some of the causes of unrest, and give hope to people to the point that they would be inspired and stimulated to hold on rather than throw up their hands and say there is no hope," Johnson said.

As for the months ahead, the President said: "We can't avert it. We will have a bad summer. We will have several bad summers before the deficiencies of centuries are erased."

In the same negative tone of hopelessness, Attorney General Ramsey Clark said Sunday that the Administration does not plan a "get tough" policy with riots. "We can cause riots by fear itself, by over-concern," said the nation's No. 1 law enforcement official.

But we also can cause riots by saying to troublemakers, dissidents, and those who believe in taking the law into their own hands, that their actions are viewed by the highest authorities in this nation as inevitable, and that nothing will be done about it.

That in essence is what both President Johnson and Attorney General Ramsey Clark have told the urban disturbers of the peace; they can now be expected to proceed as indicated.

The remarks of both of these officials—the chief magistrate of this country and one of his ranking subordinates—are nothing more nor less than an open invitation to civil disorder.

What both President Johnson and his attorney general should have said, but markedly did not, was: The laws will be enforced, in the streets, in the cities, in the countryside, in this nation. People who may consider breaches of the peace or of the laws of any kind can expect sure and swift retribution. Massive disorders will be put down to the fullest resources of power and the law available to the government. Riot at your risk!

#### PRESIDENT JOHNSON APPOINTS DISTINGUISHED AMERICANS TO COMMISSION FOR THE OBSERVANCE OF HUMAN RIGHTS YEAR

Mr. PROXMIRE. Mr. President, the Senate's inaction toward the ratification of the Human Rights Conventions on Forced Labor, Freedom of Associa-

tion, Genocide, and Political Rights of Women continues.

However, President Johnson has once again gone on record in support of U.S. ratification of the human rights treaties. Last October the President urged ratification. Just last month in appointing the members of the President's Commission for the Observance of Human Rights Year he again emphasized his continuing support of the principles embodied in these Conventions and for this country's ratification of them.

The year 1968 is Human Rights Year. There could be no more fitting observance of this Human Rights Year than the Senate's ratification of these treaties. The Senate is the only roadblock. President Johnson supports ratification. Ambassador Goldberg has testified in favor of ratification. The State Department is on record in favor of ratification.

Now the President has appointed a distinguished group of Americans to serve on his Commission for Observance of Human Rights Year. These are the names of the Commission members:

Bruno V. Bitker, of Wisconsin.

Tom C. Clark, of Texas.

Anna Roosevelt Halsted, of Michigan, Vice Chairman.

Elinor L. Gordon, of New York.

W. Averell Harriman, of New York, Chairman.

J. Willis Hurst, of Georgia.

George Meany, of Maryland.

Robert B. Meyner, of New Jersey.

A. Philip Randolph, of New York.

#### HOMEOWNERSHIP

Mr. MCINTYRE. Mr. President, I wish to express my complete agreement with the priority that President Johnson has placed on increasing the supply of low- and moderate-income housing. A Nation as wealthy and prosperous as the United States cannot continue to allow 6 million families to live in substandard and dilapidated housing.

We must not only increase the supply of decent housing, but we must also extend the opportunities of home ownership for low- and moderate-income families. In one of our most successful national efforts we have made it possible for millions of middle-income families to buy their own homes through VA and FHA insurance.

Now is the time to extend these benefits to families of lower incomes. For these people owning a home signifies not only a decent place to live with enough space to accommodate their families, but it can mean a new sense of dignity and independence. In a society where we are searching for ways to bring a fairly large group of alienated people back into the mainstream of American life, homeownership offers one answer.

Support for this idea of homeownership is already apparent. I would point out, for example, that 59 of the 63 cities selected for the model cities program proposed some type of homeownership plan for the low-income people living in their target areas. Those at the local level recognize the value of homeownership;

the President's message responds to these expressed needs.

President Johnson has suggested proposals that would allow thousands to attain the American tradition of owning their own homes.

I hope Senators will join me in giving these proposals our immediate attention.

#### THE METRIC SYSTEM OF WEIGHTS AND MEASURES

Mr. PELL. Mr. President, every year the metric system of weights and measures spreads to new users in other parts of the world. Now that Great Britain has decided to make mandatory the use of the metric system by its citizenry, only the United States remains among great nations committed to the antiquated, complicated system we inherited from the British in the 18th century.

Whether to switch has become an increasingly contested question. Advocates suggest that a changeover to metric would increase efficiency in many walks of American life and would improve our export sales picture among nations already on the metric system. Critics of this idea complain that the changeover might cost billions and, in fact, would be so expensive that any advantages would be outweighed. The fact of the matter is that we simply do not know what the specific answers are. For several years I have been pressing for a metric study bill which would inquire into the feasibility of making a change. Only when such a study is undertaken, can this country know whether a change will make sense or not.

In the last Congress the metric study bill I introduced was passed by the Senate and the House Committee on Science and Astronautics, under the skillful guidance of its chairman, Congressman MILLER of California. In this Congress the able Senator GRIFFIN of Michigan has also introduced a bill to provide a feasibility study which is currently under consideration before the Senate Commerce Committee. In the House, Chairman MILLER has again guided a similar bill through the Science and Astronautics Committee, but to date this bill has not been accorded a rule.

It seems clear to me that this country should take the necessary steps in order to be able to make an intelligent decision on this question. Strong public statements by all interested and knowledgeable on this subject will doubtless help to bring the Congress to eventual legislative action. The Metric Association held a meeting last December to provide a forum for such pronouncements.

Mr. President, I think that the address by Assistant Secretary of Commerce for Science and Technology, John F. Kincaid, could be a bellweather expression which can lead us to move ahead. I ask unanimous consent that his excellent and eloquent address entitled "International Standards and the Metric System: A Time for Decision" be included in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

our agricultural exports to the Common Market, trade barriers were lowered on only \$200 million, some 13%. At the same time, out of a total of \$3.7 billion of all our industrial exports to the Common Market, we negotiated a lowering of trade barriers on items comprising \$2.4 billion, or 65%.

Since 1960, our wheat exports to Western Europe have fallen off one and a half million tons a year. USDA's forecast for 1970 shows a decline in grain imports for Western Europe, but an increase for Japan. At the same time, if we are to minimize our share of the decline and maximize our share of the increase, we must be price competitive with other surplus producing countries. Bargaining power for farmers which results in prices deemed "fair and reasonable" in our economy could, at the same time, result in non-competitive prices for export. Unless this bargaining power excepted commodities for export, or unless the taxpayers were willing to subsidize these exports, we could lose our large commodity export surplus—if not our export trade altogether. I would not foreclose the possibility of subsidizing agricultural exports—especially if there is a reciprocal lowering of the cost of farm programs; and I said just a year ago in a speech before the Grain and Feed Dealers convention in New York that if inflation isn't stopped so that our commodities can remain competitive in world markets, we would be forced to subsidize our exports.

The other side of the trade picture—imports—is an equally important policy matter. It is obvious, of course, that foreign trade cannot be a one-way street. And it is generally agreed, I believe, that a genuinely reciprocal lowering of trade barriers will stimulate an increase in foreign trade to the benefit of all concerned. But adherence to these principles must not be permitted to blind us to inequities of foreign competition. There is much more to so-called "free trade" than the reciprocal lowering of tariffs, with which the Kennedy Round was concerned. As our Joint Economic Committee pointed out in its recent report, entitled "The Future of U.S. Foreign Trade Policy":

"Not infrequently . . . non-tariff barriers deny to the individual countries and the world the gains and efficiencies of free trade more effectively and more insidiously than the visible tariff obstructions themselves. . . . The European Common Market practice of rebating their own indirect taxes on their exports and levying these same taxes on imports . . . constitutes a conspicuous form of discrimination against U.S. exports. Moreover, similar border adjustments by the United States would be an ineffective weapon neither mitigating nor offsetting the discriminatory process, because the tax structure of the United States places relatively small emphasis on indirect taxes. This issue is one that the United States will have to resolve. . . . Unfortunately, Congress and the executive branch presently do not have dependable statistical information on the significance and weights to be assigned to various nontariff obstructions which experts of the various countries have devised."

One way to resolve this issue (at least until the requisite statistical data are available and until reciprocal lowering or elimination of nontariff barriers is achieved) is to establish a system of reasonable import quotas—based on a historical base period percentage of our domestic market—which would allow foreign countries, and particularly those imposing nontariff obstructions against our exports, to share (rather than take over) the market provided by our increased domestic consumption. If this is not done, bargaining power of farmers will be weakened if not destroyed by excessive imports. And if there is any doubt about it, those engaged in cotton, dairy, and livestock production will be pleased to demonstrate what excessive imports in recent years have been doing to their prices.

If it is suggested that a national farmer bargaining law should prevent members of purchaser groups from buying imported commodities as a means of preventing cheaper imports from undercutting "fair and reasonable" prices negotiated by farmers' bargaining groups, I would have to advise that such a measure would not pass the Congress. It would, in effect, be a throwback to the old Smoot-Hawley days when the Congress sought to insulate the United States behind a wall of confiscatory tariffs, with truly disastrous results. And it would be contrary to national policy reflected in the Trade Expansion Act of 1962. The best, and fairest, that can be hoped for is the nontariff quota approach guaranteeing reasonable access of imports to our markets—the same approach, by the way, taken by our own negotiators during the Kennedy Round in seeking a guaranteed access for our grains to the Common Market.

Not to be overlooked in all of this are treaty commitments of the United States. These are the law of the land—regardless of what a collective bargaining agreement may be. Now pending in the Senate for proposed ratification is the International Grains Arrangement negotiated in 1967. This arrangement consists of the Food Aid Convention and the Wheat Trade Convention. The Wheat Trade Convention establishes a minimum and maximum price range for wheat moving in international trade, with a 40¢ per bushel price spread. These prices are approximately 23¢ above the price range provided under the old International Wheat Agreement, and the minimum level would likely be above world market prices at the time the convention went into effect. If the convention is ratified, it can be expected to encourage increased production on the part of some exporting countries not producing as efficiently as the United States, and it would be necessary to adjust "fair and reasonable" prices negotiated by farmers' producing groups, insofar as export wheat is concerned, to maintain our competitive position, or to establish a program of export subsidies to which I have previously referred.

The "fair and reasonable" prices for agricultural commodities, which should be the objective of bargaining power for farmers, naturally must take into account the costs of production. The cost-price squeeze on farmers' net income, which has stimulated concern over bargaining power for farmers, is a combination of low parity prices and ever-increasing costs of production.

Using 1958 as a base year with an index of 100, prices paid by farmers in 1967 had risen to a weighted index of 117; whereas prices received by farmers had risen to a weighted index of only 104. From the 1958 index of 100, interest was up to 259, taxes were up to 178, labor costs were up to 146, and farm machinery was up to 130. 1967 farm production costs were up \$1.2 billion over the previous year.

Prices of some agricultural commodities are higher today than they were several years ago, but they are lower in real dollar purchasing power—after inflation is taken out; and they are lower in relation to prices of things the farmer has to buy, which is why parity today is at the level of the Great Depression of the 1930's. It is true that net farm income shows a cumulative increase of \$8 billion for the last seven years. It is also true that net farm debt shows a cumulative increase of \$20 billion for the same period. It is true that net income per farm last year was 55 percent higher than in 1960. It is also true that net debt per farm last year was 110 percent higher than in 1960. During 1966 net income per farm increased nearly \$400 over 1965, but net debt per farm was up over \$1,200 over 1965. During 1967, net farm income dropped almost \$2 billion, down \$283 per farm, and net debt per farm increased another \$1,500. If the record of the past seven years is continued, the only way farm-

ers as a class will be able to pay off their debt will be to liquidate.

One of the reasons for this critical situation is the fiscal policy of the federal government. By "fiscal" we mean spending and taxes, and when the fiscal policy of those in control of your federal government is to run the government billions of dollars deeper into debt, year after year, there will be inflation. The purchasing power of our dollar has gone down from 47¢ seven years ago to 40¢ today. The only way a lender can protect himself against the prospect of being repaid in cheaper dollars is to charge more interest. And when the federal government has to cover its deficits by borrowing money or selling its bonds, this provides more competition for money in the private money market. This is why interest rates today are the highest since the Civil War.

The point to be made is that "fair and reasonable" prices established by farmers' bargaining power can be undercut by federal fiscal policy. A price that is "fair and reasonable" for a farmer who does not have to borrow money to operate might not be "fair and reasonable" for the farmer who has to operate on borrowed capital bearing 7-8% interest. Increased costs of production spurred on by inflation could seriously impair a "fair and reasonable" price negotiated before the increases could be foreseen or computed. Inflation compounded by speculation has boosted up the cost of farm land to almost prohibitive levels, but I doubt that this factor could be taken into account in bargaining for "fair and reasonable" prices for commodities.

Somewhat related is the amount of money appropriated by the federal government for farm programs. To what extent would federal payments to farmers be taken into account in setting a "fair and reasonable" price for commodities; and would there be a different price for farmers who are in a program and receive payments and farmers who are not in a program and do not receive payments?

I am not, by any means, attempting to disparage the idea of bargaining power for farmers. What I have attempted to do, instead, is to make clear that in devising a mechanism to establish this power, we must not only take into account the fiscal and foreign trade policies of our federal government; we must demand that these policies be made harmonious with the goal of "fair and reasonable" prices for food and fibre. I deeply regret to say that for far too long they have not been harmonious. It will take political action to change them, and an enlightened public opinion, recognizing that the future of our most basic industry is threatened, will do it.

#### THE CRISIS OF THE CITIES

Mr. PELL. Mr. President, President Johnson's message "Crisis of the Cities" is a landmark document. It details with compassion and realism the enormous problems our cities face. And it proposes realistic solutions. One of the key phrases of the message, in my opinion, is the President's closing warning that "no one can doubt the costs of talk and little action."

We have heard it said consistently since the urban summer riots of the last few years that our cities were wracked with problems. Some attempts have been made to solve those problems—I am thinking of the Economic Opportunity Act of 1964 which has helped some 6 million people out of poverty. But we have far from discharged our obligations to urban revitalization, and it is inexcusably dilatory to act too slowly on remedial

efforts. With the problem so obvious, we cannot blame the poor for loss of patience if we engage in talk and little action.

The proposals contained in the President's message both capitalize on the success of existing programs and urge new and exciting efforts to renew our cities and the lives of those who live in them. As the President has said:

If the promise of the American city is to be recaptured—if our cities are to be saved from the blight of obsolescence and despair—we must now firmly set the course that America will travel.

Truly, as the President stressed, "there is no time to lose." I know the Senate will act speedily to consider this remarkable message.

#### VIETNAM

Mr. HATFIELD. Mr. President, from time to time I read or I hear from one source or another that the critics of American policy in Vietnam represent many different parts of the American political and social scene. I believe this to be true. One of these critics, Hamilton Fish of New York, a former Congressman and former chairman of the first congressional Committee To Investigate Communist Activities in 1930-31, wrote to me recently about a letter which he sent to the New York Times to oppose the war.

Mr. Fish currently serves as president general of the Order of Lafayette, a national patriotic organization which has bestowed anticommunism awards on such illustrious Americans as Dwight D. Eisenhower, Douglas MacArthur, Herbert Hoover, Barry Goldwater, Francis Cardinal Spellman, Lucius Clay, and Curtis LeMay. My friend, Mr. Fish, states that he believes our involvement in Vietnam is "the wrong war, in the wrong place, at the wrong time." I agree with him and I commend him for his statement. I ask unanimous consent, Mr. President, to permit Mr. Fish's letter to be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

[From the New York Times, Feb. 12, 1968]

#### WAR OPPOSED

To the Editor:

I admit utter confusion over the position of the Johnson Administration in South Vietnam. While President Johnson encourages trade and the creation of consulates with the Communists, he continues to send young Americans to defend Southeast Asia against Communism.

It is beginning to appear more and more that the original understanding of the Tonkin incident in 1964 was not correct. Senator Fulbright, chairman of the Foreign Relations Committee, who steered the Gulf of Tonkin Resolution through, now claims that our ships had been spying on North Vietnam and had even violated the territorial waters of that country. The information regarding the Tonkin incident was apparently not only incorrect but was manipulated to secure the authorization from Congress for President Johnson to take whatever military action he deemed necessary.

#### FOR NEGOTIATED PEACE

The Republicans in Congress are right in supporting our armed forces once they are engaged in battle and for refusal to withdraw until a just and honorable peace has been

negotiated. However, the Republican leadership in Congress errs in not making it perfectly plain that this was not Eisenhower's or Kennedy's war, but is and has been Johnson's war, and for not pressing harder for a negotiated peace. President Kennedy said, "Let us never negotiate out of fear, but let us never fear to negotiate."

It is my opinion that any of the Republican candidates mentioned will defeat President Johnson, if the war is still going on, by merely copying what President Eisenhower did in the Korean war: promising to end it immediately after he became President.

As a long-time anti-Communist leader, I am convinced that our involvement in Vietnam was unnecessary, illegal and unconstitutional, and the wrong war, in the wrong place, at the wrong time.

Soviet Russia and Communist China, two dominating forces, want to keep our armed forces bogged down while Communism reaps the harvest of hatred as a result of their massive propaganda depicting our killing and napalming women and children. But, even more than that, Soviet Russia is quietly seizing economic and military control and rapidly increasing influence throughout the Middle East and along the coast of the Red Sea, free from interference from the United States, trapped in Vietnam.

HAMILTON FISH,

Chairman of the First Congressional Committee To Investigate Communist Activities, 1930-31.

NEW YORK, February 1, 1968.

#### THE MEXICAN AMERICAN—SIGNIFICANT STEPS TOWARD PROGRESS

Mr. MONTONA. Mr. President, last summer President Johnson appointed a special Cabinet committee which would dedicate itself solely to the improvement of opportunity for the Spanish-speaking citizen of this country.

In October, in El Paso, the Mexican American Affairs Committee sponsored what must be described as one of the most successful people-to-people forums in history. Thousands of Mexican Americans met and discussed their problems face to face with a series of the President's Cabinet officers.

The results of these initiatives are today evident in President Johnson's statement. Decisions have been made, and the actions have been taken which will be directly beneficial to the Mexican-American community.

I need only mention the Bilingual Education Act which will help Spanish-speaking children obtain the full benefits of education. The President signed that excellent measure, and the Congress has allocated some millions of dollars for its implementation in the next few years.

The Johnson administration has moved swiftly forward in the area of job opportunity—for the Mexican American and for all those who have been left behind in the march of American prosperity.

New Government specialists are being trained with expertise in the Spanish language so as to serve as closer links between Government and the Mexican-American community.

The President has directed that all Government programs be analyzed to make certain that Mexican-Americans and other Spanish-speaking minorities obtain their full rights as citizens.

A number of American cities selected as model cities contain large concentrations of Spanish-speaking residents who will benefit from the coordinated model cities approach to education, health, crime prevention, job opportunity, and improved housing.

The new focus on opportunity which Lyndon Johnson directed for the Spanish-speaking American less than a year ago has begun to bear fruit.

A new attitude exists in Government toward the Mexican-American.

Private enterprise and government are now joining forces to help the Mexican-American help himself.

The President's statement is another indication of the progress we have so far made, and of the progress we must necessarily make. I ask unanimous consent that the statement be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

PROGRAMS FOR SPANISH-SPEAKING AMERICANS  
(Statement by the President on actions taken based on recommendations of the Cabinet Committee on Mexican-American affairs, February 23, 1968)

Last October, in El Paso, I attended a conference of high purpose. There, with the Vice President and members of the Cabinet, I met with 1,200 Spanish-speaking Americans.

This was the first time that the Mexican-American community had an opportunity to discuss matters of direct concern—ranging from education to economic opportunity, housing to health—with the highest officials of government.

The aim of the 3-day conference was to assure that America's second largest minority was receiving its fair and just share of Federal programs in these areas.

Out of that conference, ideas and suggestions flowed to a Cabinet-level committee on Mexican-American Affairs, which I appointed last June.

Based on the recommendations of the committee—many of which stemmed from the El Paso conference—I have taken the following actions:

#### In education:

I have signed into law the first Federal bilingual education program. It will help Spanish-speaking children overcome the barriers of language which have prevented them from receiving the fullest benefits of education.

I have asked Congress to provide funds to expand and improve adult and vocational educational programs aimed particularly at those Americans who have no high school diplomas. About 20 percent of these are Spanish-speaking.

I have instructed the Secretary of Health, Education, and Welfare to:

Accelerate the training of specially-trained teachers to work with Mexican-American school children and migrant workers.

Insure compliance with Title VI of the 1964 Civil Rights Act. This forbids discrimination in school-district boundaries and in quality of education, wherever the schools receive Federal financial assistance.

#### In health and welfare:

I have requested the Secretary of Health, Education, and Welfare to:

Simplify application and claim procedures in Medicare, Social Security and other programs serving the Mexican-American communities.

Gather and analyze data on the health of Spanish-speaking Americans.

I have asked the Congress to increase its support of special medical programs for

but they steadfastly clung to their national goal: the attainment of national independence.

They had to await long before the realization of that goal. Finally, 50 years ago, on February 24, 1918, they proclaimed their independence and founded the Estonian Republic.

Then for about two decades, during the interwar years, they enjoyed their richly deserved and hard-won freedom. But this happy interlude was abruptly broken early in the last war. Russia again—not the czars this time, but Communist Russia—was the villain. The men in the Kremlin decided to put an end to an independent and free Estonia. The Red army invaded and overwhelmed Estonia in mid-1940; the Estonian people lost their freedom and were enslaved by their heartless conquerors.

Since the incorporation of Estonia into the Soviet Union, these freedom-loving people have not known freedom in their homeland. They still suffer Communist totalitarian tyranny. There cannot be any talk of observing their independence day there, but we here in this great Republic join hands with all Americans of Estonian heritage, solemnly observe the 50th anniversary of Estonian Independence Day, and echo their genuine patriotic sentiment for freedom and independence.

### Rent Supplement Program Deserves Continued Support of Congress

#### HON. BOB CASEY

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, February 26, 1968

Mr. CASEY. Mr. Speaker, in the past year and a half, we have seen a new partnership develop between private enterprise and the Federal Government in working to meet the great housing need among low-income families.

This partnership was created through the rent supplement program, and has proved that cooperation between the private and public sectors can result in substantial progress in meeting the low-income housing demand.

Since the first allocation by Congress for the rent supplement program in 1966, some 554 projects with more than 42,000 units have been provided to low-income families.

The \$65 million requested by the President for the program for fiscal year 1969 will make another 72,500 housing units available for the poor. These are families with incomes eligible for public housing in the area, the elderly, the handicapped, the widowed—the disadvantaged families whose misfortune is compounded and intensified by slum living.

Rent supplements provide an incentive to these families because it does not force them to move back to the slums when their incomes exceed public housing limits. Instead, the supplement is eliminated and the family pays the economic rent itself while continuing in their home.

Thousands of unfortunate Americans face the daily problems of deplorable

housing conditions. They are denied the basic amenities of privacy and decency. By approving the President's request we will be moving toward the goal of sound homes for all Americans.

A partnership such as the rent supplement program must be continued and expanded for the health and welfare of our people.

When we have the opportunity to vote on appropriations for this program, I hope my fellow Members will not hesitate to authorize the full \$65 million asked for by the administration.

### Support for President Johnson's Program To Meet the Threat to Our Cities

#### HON. EMANUEL CELLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, February 26, 1968

Mr. CELLER. Mr. Speaker, we are at a time in our history when, as a nation, we must make a firm decision on the future of our cities. To do nothing is to insure a tragedy that will dwarf anything we have experienced in the past. To temporize now, to delay, to fail to act positively on the recommendations of the President can only exacerbate the critical problems that threaten the existence of our major cities. I am not the purveyor of a doomsday message, but one has only to look about him, to read the newspapers or watch television, to know with unshakable certainty that our cities are sick with an illness that will not be cured by anything less than a massive effort to save them. Without this effort on the part of the National Government, our cities will rot like apples fallen to the ground and left ungathered.

A blight has settled over the tall spires that form the skylines of our cities and it is seeping into every pore of the cities' bodies. Physically, morally, and spiritually, our cities have become tarnished. The bright beacons that once attracted commerce and people have been permitted to grow dim as the cities staggered from decade to decade under the weight of mounting problems.

The tide is running against the cities, and it must be reversed if we are to save them. Should our urban areas be strangled by the welter of problems that now confront them, and will confront them in the future, we will be guilty of complicity in the destruction of one of our most valuable resources—our great cities. We should not waste precious time in debate on rural interests as opposed to urban interests. What we are concerned with here is a common interest. It is important that our cities, with all their attributes, with all that they contribute to our Nation, receive the aid they need so urgently. To have our cities fall into further decay is unthinkable. The recommendations made by the President address themselves to critical problems and offer workable solutions. I urge that they be adopted as a step in the right direction.

The vision of urban renewal is one of a new city, free of pollution and congestion, slum housing and blighted business

districts. But the vision is also one of a free and happy people. To this end, we must see that the President's antipoverty proposals are not forgotten.

The President, in his housing message today, has asked the Congress for the full \$2.18 billion appropriation for the Office of Economic Opportunity in fiscal year 1969.

This is the human side of the urban renewal we seek and the President's request should be granted in full.

### Personal Explanation

#### HON. L. H. FOUNTAIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, February 26, 1968

Mr. FOUNTAIN. Mr. Speaker, while serving as one of the two official delegates from the Congress of the United States to the 22d session of the General Assembly of the United Nations during the period of September 16 to December 20, 1967, I was naturally not able to answer all rollcalls in the House. During this period, however, I secured pairs whenever possible.

On those bills when pairs were not possible, I wish to state that had I been personally present I would have voted as hereinafter indicated on the following bills:

House Joint Resolution 888, continuing appropriations: On the motion to adopt the section which required a \$9 billion reduction in budget fiscal 1968 obligations for the executive branch, December 11, I would have voted "yea."

House Joint Resolution 936, bill making continuing appropriations for Federal agencies and programs not yet covered in regular fiscal year 1968 appropriations bills: On passage of the bill, November 28, I would have voted "yea."

H.R. 13706, farm loan interest rates. On the Patman motion to recommit the bill with instructions to limit its provisions to a 2-year period, November 29, I would have voted "nay."

H.R. 4765, establishes special rules for the income tax treatment of distribution by companies which become bank holding companies under Public Law 89-485.

On adoption of the conference report on the bill to allow a favorable tax adjustment for shareholders of Financial General Corp., and to provide \$22 million in tax rebates for American Motors Corp., December 12, I would have voted "nay" because of dangers to the regular legislative process.

S. 1003, authorizes the Secretary of Commerce to issue standards on the flammability of fabrics used in clothing or interior furnishings. On passage of the bill, November 27, I would have voted "yea."

H.R. 12603, authorizes the Secretary of the Interior to make agreements and leases with a private company for a National Visitors Center in Washington, D.C. On passage of the bill, November 27, I would have voted "yea."

S. 2171, Subversive Activities Control Act amendments. On adoption of the

conference report, December 13, I would have voted "yea."

H.R. 12080, Social Security Amendments for 1967. On adoption of the conference report, December 13, I would have voted "yea."

H.R. 10595, bill restricting the role of federally insured banks and thrift institutions in a state lottery. On adoption of the conference report, December 12, I would have voted "yea."

H.R. 7977, Postal rate and Federal pay increase bill. On the motion to accept conference version of the bill, December 11, I would have voted "yea."

H.R. 12144, Federal Meat Inspection Act. On adoption of conference report, December 6, I would have voted "yea."

### Meeds Commends Senior Citizens of Four Freedoms House

#### HON. LLOYD MEEDS

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Monday, February 26, 1968

Mr. MEEDS. Mr. Speaker, the Four Freedoms House of Seattle, sponsored by four major international trade unions to provide comfort and convenience to the elderly in the Seattle area, is setting an example of involvement for all the elderly in the United States. Four Freedoms is not only a living group, they are a force for good throughout the community.

They are involved in many projects, one of the biggest of which is their Pat Smith Hospital project. They take great pride in their project which they have been involved in for nearly a year, as the following excerpts from their February newsletter explains:

#### THE PAT SMITH HOSPITAL PROJECT: KONTUM HOSPITAL FUND

It is with pride we inform those of you who may be relatively new residents, of a project not yet one year in existence here at the Four Freedoms, which has captivated the hands as well as the hearts of many of us who are determined not "to be dead before we die", and we consider it a privilege to devote two hours or more, weekly, of our time in preparing and rolling bandages made from old sheets for Seattle's own Dr. Pat Smith who has already given *eight years* of her life and talents to the primitive and disease-ridden Montagnards of Kontum, South Vietnam, bringing them medical care and comfort.

Dr. Patricia Smith was born and raised in the Ballard district and was graduated from Seattle University in 1948. She received her M.D. from the University of Washington School of Medicine in 1955. After internship at Cincinnati General Hospital she worked for two and one half years at one of the Miner's Memorial Hospitals in McDowell, Kentucky, deep in the coal mining area of Appalachia. Having heard of the even more pressing needs for medical care in the underdeveloped countries, she volunteered for service overseas and was asked to go to Kontum in 1959. Since then Dr. Pat has succeeded in expanding a leprosarium outside of Kontum. It was the only thing which even offered anything resembling a medical facility and this she expanded to village clinics. In 1960 a small dispensary was opened in Kontum and in 1963 a hospital with forty beds was added. This latter addition was made possible thru the German Bishops Relief Fund, various other relief organizations

and drug companies. Two nurses from Milwaukee, Wisconsin had also, by this time, arrived to assist her and as Dr. Pat had succeeded during the months of the hospital construction in establishing a rapport with the Montagnards, she found herself "in business."

Descendants of the aborigines of Vietnam, the Montagnards even today live at the lowest level of human existence and suffer from some of the worst diseases known to man. The leprosy rate alone is one of the highest in the world—as many as 10% in some areas are afflicted with the disease and tuberculosis runs a close second. Ignorance, superstition and malnutrition too, exist in fantastically high rates, so the problem of treating these people is an immense one.

Dr. Pat's Minh-Quy Hospital is located about 4 Km from the provincial capitol of Kontum, in the highlands near the Laotian border where the chief emphasis of the hospital has always been to care for the needs of the Montagnard tribespeople, the very poor amongst the Vietnamese population of Kontum are also admitted for care, the only criticism for help being real medical and financial need. No charge of any kind is made for either in-patient or out-patient service, medicine or food, altho the patients are asked when possible, to bring their own food with them. Many of the patients' entire families accompany them and have come from as far away as 75 miles to be treated by "The Big One" as she is referred to by the small statured Montagnards. The family makes itself "at home" outside of the hospital doors and remains until the patient is discharged.

Since our first working session of Dr. Pat's helpers on April 12, 1967, we have turned in the following supplies to the Kontum Hospital Fund Center at 824 Broadway, Seattle, Wash.

135 hospital gowns—converted from used shirts; 117 bundles of rolled bandages—or approx. 10,000 bandages torn from used sheets; 47 knitted bandages; 349 surgical drapes; 13 Ace bandages—donated; 22 cartons misc. & supplies from N.W. Hospital; 90 instrument wraps; 17 sweaters—donated; 4 bags—soap—donated; 39 towels & wash cloths—donated; 4 blankets—donated; 91 misc. items, i.e., underwear, suit, coat, dresses, socks, etc.

Mr. Speaker, as the foregoing explains, this Four Freedoms project has been a big help to Dr. Smith in Vietnam. Members of the Four Freedoms House have heard repeatedly that their supplies are anticipated with pleasure by the patients at Kontum.

I commend the work and energy of these fine citizens of Seattle who are donating so much of themselves to the betterment of their fellow man. Four Freedoms was originally organized to provide freedom from want and fear and to insure the freedoms of speech and worship for its members. It has become in addition a major source of good will in the Seattle area, parceling out much more to the world than it is getting.

It is an excellent example of what influence our most experienced citizens can have on their community.

### The Mail Doesn't Go Through

#### HON. CHESTER L. MIZE

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Monday, February 26, 1968

Mr. MIZE. Mr. Speaker, there is great concern among my constituents these

days over the deterioration of mail service. An editorial in the February 18 issue of the Topeka Capital-Journal, "The Mail Doesn't Go Through," gives voice to the frustration of these people when they experience delays and mistakes in mail handling. Under leave to extend my remarks, I bring this editorial to the attention of my colleagues, as follows:

#### THE MAIL DOESN'T GO THROUGH

Mail service is getting worse, not better, since postage rates went up a few weeks ago.

Business people and householders are griping. Frequently when several get together they exchange stories of how long it takes to get mail these days.

In a recent gathering, a Topeka woman whose daughter lives in Emporia, said she received a letter Feb. 14 which had been mailed to her Feb. 7. It was a week on its way—about 60 miles.

A man told about getting two airmail letters, one from Chicago, the other from New York, both posted Feb. 14. They were delivered Feb. 16. Flights from both cities require only hours.

Many complaints are about late delivery of magazines. Some mail patrons say weekly magazines which used to be delivered Tuesday now arrive Thursday, sometimes Friday.

Mistakes in delivery seem to be more frequent lately. One of the worst examples related during a gripe session concern a sailor home on leave and with orders to report on a certain date to San Diego. The day before he was to leave, a neighbor two doors away handed him a letter which had been put in his mailbox while he was away over a weekend. It was a change of orders, directing the sailor to report next day to a different ship at Long Beach.

Kansans living in smaller towns than Topeka say mail delivery is becoming more erratic with discontinuance of mail cars and trains to their areas.

Take Leoti, in Western Kansas, as an example. It had twice-a-day mail from the Colorado Eagle, but that train quit running in 1966. Now mail takes at least a day longer and may suffer even longer delays in the complex air and truck connections between Kansas City and Pueblo.

Patrons realize the post office is being flooded with mail these days, but this is not their personal concern. What they want is the service they used to have and to which they think they are entitled—especially since postage rates went up.

### Two Big Days Due in March for Labor's Pat O'Malley

#### HON. CHARLES A. VANIK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, February 26, 1968

Mr. VANIK. Mr. Speaker, on March 30, dignitaries from all over the country will converge on Cleveland to honor a great labor leader, a great human being—Mr. Patrick J. O'Malley, who will retire as the regional director of the United Auto Workers for the past 19 years.

On the wall behind Pat O'Malley's desk in the UAW office in Cleveland, he proudly displays a picture of the Honorable JOHN W. MCCORMACK inscribed with these words: "You are a great labor leader and a great American."

Pat O'Malley's career has been varied and he has been involved in every important fight for the laboring man's

We at Chrysler think this is a productive way to combine the practical expertise of private industry, the professional talents of the educator, and the support of government so as to help people improve themselves and in turn improve their community.

Early this month we announced a new joint training program with the federal government that is larger than any previous program of this kind that we have undertaken.

Too often in the past, education has been designed to prepare young people for college. We are beginning to learn that education of this kind fails to meet the needs of great masses of our people. As a result, it leaves many of them outside our society, unemployed and discouraged.

We are only beginning to understand how to cultivate all our human resources through education. As yet we haven't learned how to allocate either our educational funds or our teaching talents to get a balanced social result. Here, as in many other phases of our complex urban civilization, we are groping for answers.

Feeling as I do about the University of Michigan, I hope that it will provide some breakthrough solutions in the field of education, as it has in so many other fields over the years.

I would also hope that in all our efforts to provide a balance of educational opportunity to meet the needs of all the people in our society we will keep in mind the desirability of creating new centers of excellence like Ann Arbor.

In a democratic society there always exists the tendency to level off standards of education and culture—and the related tendency to underemphasize the virtue of distinguished achievement.

It would be unfortunate if our present nationwide effort to broaden educational opportunity should have this effect.

To put it another way, as we work at the never-ending task of improving our educational system, maybe we should try to make it a source of distinguished leadership and a seedbed of culture and inspiration for a world that stands in need of both.

### Model Cities

## HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, February 26, 1968

Mr. EILBERG. Mr. Speaker, today we have one of the most historic of all Presidential messages—President Johnson's message on the cities. To me one of its most significant aspects is the request for \$1 billion for model cities.

I intend to support this request because it is clear to me that we have here one of the basic answers to a problem that has been plaguing us for more than 100 years—our city's slums. We have analyzed the problem, we have decried it, we have nibbled at it—but we have never come close to solving it.

Why not? Because each time we approached the problems of our cities, we either did not realize their depth or else we moved away from their full implications. Gentlemen—the crisis of our cities is the domestic crisis of our generation. The model cities program is an effort by this country to coordinate and direct

the resources necessary to begin to meet this crisis.

Last November the first 63 cities—both large and small—were selected to participate in the first round of model cities planning. The President in his message now asks us to give this program the resources it needs to enable these 63 and more to be selected later this year to begin a proper assault on the problems that plague them.

Will the funds be there? It all depends on this Congress. I hope you will join me with your support of the model cities program.

### The Lost M14 Rifle

## HON. HENRY C. SCHADEBERG

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, February 26, 1968

Mr. SCHADEBERG. Mr. Speaker, a recent story of a young veteran of the Vietnamese war, Mr. Ernest Wagner of Racine, Wis., who has been billed by the Army for a rifle lost in combat has created quite a stir in my district and throughout the United States. My office has received several hundred letters backing my stand that the proposed charge is frivolous and a blunder on the part of the Army.

Perhaps the best of the stories to emerge from the Army's attempt to collect from the decorated veteran really puts the incident in its proper perspective. John Keasler of the Miami News on Wednesday, February 14, 1968, titled his article "So You Lost Your M14 Rifle, Eh?" I ask that it be printed at this point in the RECORD so that all may enjoy Mr. Keasler's excellent sense of humor.

The article follows:

SO YOU LOST YOUR M14 RIFLE, EH?

(By John Keasler)

"WASHINGTON, AP—The Army was reported to be trying to collect \$70.21 from a veteran of the Vietnam war because he lost his M14 rifle in combat."

The news story went on to say that Rep. Henry C. Schadeberg (R-Wis.) is infuriated about this; says if the Army collects from the soldier it should collect \$30 million from Secretary McNamara for loss of the Pueblo.

The claim was made against Ernest J. Wagner of Racine, Wis., who was with the 25th Combat Infantry in Vietnam. He said his rifle fell out of a helicopter during a combat mission.

Legal action is threatened by the Army within 30 days if the ex-GI doesn't pay for the rifle—I imagine the collection letters will follow the usual procedure.

DEAR FRIEND OF THE U.S. ARMY (First notice): Please disregard this notice if you have already mailed your check! This is merely a regular monthly reminder and we wouldn't even have sent it to you, because we cherish your patronage, but our computer insists on it. We hopefully await your continued trade, and should like to take this opportunity to wish you a Happy New Year, or a Joyous Independence Day, whichever may be closer.

Yours in friendship,

U.S. ARMY.

DEAR FRIEND (Second Notice): Could it be that in these pressure-ridden times your account of \$70.21 has been overlooked? We understand how that can happen, ha ha. However, enclosed find our Handi-Grip, Reddi-Lick, Selfy-Dressy envelope. Simply enclose your check and drop it in your nearest "Mailbox." Easy, eh? We strive to please.

YOUR FRIENDLY U.S. ARMY.

DEAR SIR (Third Notice): We regret to state your account in the amount of \$70.21 due for M14 Rifle is overdue on your Flexible household account. Please remit.

U.S. ARMY.

DEAR SIR (Fourth Notice): We acted in good faith in allowing you to take your M14 Rifle and we expect you to act in good faith by living up to the terms of your contract. Failure to do so can reflect on your rating. Just remember—you may want another M14 rifle sometime.

U.S. ARMY.

Telegram. Fifth Notice): Unless your account is paid in full by ten o'clock yesterday morning, legal action will be taken against you.

CREDIT MANAGER,

U.S. Army.

HALF NELSON, THROTTLE & GLUE,

COLLECTORS AT LARGE,

LEGIRON BUILDING.

NOW LOOK, FELLA (Sixth notice): We know how it is, old buddy! Everybody gets up against it from time to time. If you can't pay the entire \$70.21 for your M14 rifle just do the best you can. Send along a little now, a little later. Say \$70 now and \$.21 tomorrow. There's a swell fellow!

We're your friends. We don't resort to a lot of crude methods, as some do. You can park your M14 Rifle anywhere in the neighborhood secure in the peace of mind we won't drive it off in the dead of night, or sell it at public auction, or publicly disgrace you, or anything like that.

Just do it today, huh? Without a lot more stalling? You dig?

CHUCKLES HALF NELSON,

Collectors at Large.

SMART-ALEX DEADBEAT (Seventh Notice): Don't try to beat around the bush with us, kiddo. We've heard 'em all! That story about dropping your rifle out of a helicopter cuts no ice with us—you should have thought of that before you took your rifle up in the stupid helicopter.

Don't give us a hard time, Buster. Send the cash and now. That's what our client hired us for. We get any more trouble out of you, debtor's prison will look like two weeks on the Riviera to you.

Furthermore, we'll blacklist you in every Army Navy Surplus Store from coast to coast. If we don't hear from you by Saturday, you can expect me to pound on your door bright and early Monday morning!

CHUCKLES HALF NELSON,

President, Collectors at Large.

DEAR MR. ERNEST J. WAGNER: Uh, about that rifle. This file has been brought to our attention by a certain congressman and we are happy to report this account is closed. It was probably an oversight in the computer. Mr. Halfnelson will send you no more threatening letters, after eating the other two.

Enclosed is your shiny new chargin' plate and please feel free to call on us anytime you need an M14 rifle. Mr. McNamara sends his regards. Will you please quit mentioning the Pueblo? You know how hard it is to keep track of things in a war.

DEPARTMENT OF DEFENSE.

## Russia: Power Play on the Oceans

## HON. JAMES A. BURKE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, February 26, 1968

Mr. BURKE of Massachusetts. Mr. Speaker, I would like to bring to the attention of the Members the attached article from Time magazine of February 23, 1968, concerning the development of the Russian fleet. I think it would be well for each Member to read this article so that they will become more aware of one of the increasing problems of our country.

The article follows:

## RUSSIA: POWER PLAY ON THE OCEANS

The flag of the Soviet navy now proudly flies over the oceans of the world. Sooner or later, the U.S. will have to understand that it no longer has mastery of the seas. (Admiral Sergei Gorshkov.)

The author of that threatening boast walked up to a snake charmer in the Indian city of Agra last week and, while his aides looked on aghast, seized a thick, six-foot-long python in his strong hands and draped it over his shoulders. Making a ten-day tour of India, the commander of the Russian navy was acting like the traditional sailor on shore leave. He viewed the Taj Mahal by moonlight, visited the Nehru Museum and the site where Mahatma Gandhi's body was cremated, and shopped for souvenirs. But Admiral Sergei Georgievich Gorshkov's trip to India had an entirely serious purpose, as do all his trips these days. He is trying to line up a worldwide system of ports of call and bases for his navy, and he hoped to persuade India, which is about to receive at least three submarines from the Soviet Union, to reciprocate by allowing Soviet men-of-war to fuel and make repairs in Indian ports.

While the attention of the U.S. is focused on Viet Nam, the Russians are mounting at sea a new challenge that the U.S. and its allies will have to deal with long after the fighting in Southeast Asia is ended. This may come as a surprise to most laymen—but not to U.S. naval experts. While Russia's stock of intercontinental missiles and its huge land army on Europe's periphery still remain the major military threats to the West, in recent years the Russians have developed a global navy second only to the U.S. in size and weaponry. As a comparison between the two navies shows (see chart), the U.S. remains indisputably the world's greatest sea power. But, in a remarkable turnaround since World War II, Moscow has transformed a relatively insignificant coastal-defense force that seldom ventured far from land into a real blue-water fleet.

## NAVAL STRENGTH

United States		U.S.S.R.	
Type	Number	Type	Number
Attack carriers.....	15	Attack carriers.....	0
Helicopter and support carriers.....	17	Helicopter carriers.....	2
Battleships and cruisers.....	14	Cruisers.....	19
Destroyers, frigates, and destroyer escorts.....	330	Destroyers, frigates, and destroyer escorts.....	170
Nuclear-powered submarines.....	75	Nuclear-powered submarines.....	55
Other submarines.....	80	Other submarines.....	305
Landing craft.....	105	Landing craft.....	100
Torpedo and missile boats.....	0	Torpedo and missile boats.....	560

## MERCHANT FLEET

14,000,000 deadweight tons.....	1,000	10,000,000 deadweight tons.....	1,350
---------------------------------	-------	---------------------------------	-------

If any one man is responsible for this change, it is Admiral Gorshkov, 57, who became the youngest admiral in Soviet history at 31 and has guided the growth of the navy as its chief for the past twelve years. He has totally reshaped the Soviet Union's once conservative naval strategy and transformed the fleet into the most effective and flexible arm of Soviet foreign policy.

## FORMIDABLE FLEETS

Since 1957, Russia has added to its navy virtually all of the ships that now make up its impressive striking power. It has a modern force of 19 cruisers, 170 destroyers, missile frigates and destroyer escorts, and 560 motor torpedo boats. Its 360 submarines, 55 of them nuclear, give Russia the world's largest submarine fleet, far exceeding the U.S. total of 155 subs but falling short of the U.S. fleet of 75 nuclear subs.

Moreover, unlike other naval powers, the Soviet Union uses its merchant marine and other seagoing services as important arms of the navy. Russia has the world's fastest-growing merchant fleet, which will pass the lagging U.S. merchant marine in tonnage in the early 1970s. Its high-seas fishing fleet is the world's largest and most modern; many of its 4,000 craft fish for vital information along foreign coasts as well as for the creatures of the sea. The Soviet Union also has the largest oceanographic fleet, whose 200 ships plumb the earth's waters for militarily valuable data on depths, currents, bottom topography and other information of interest to its ships and submarines. Says Admiral John McCain Jr., commander in chief of U.S. naval forces in Europe: "The Russian program to develop its seapower is more advanced and fully developed today than most people realize. It encompasses the full spectrum of the uses of the sea—in its military, economic, political and commercial connotations."

The new Soviet emphasis on seapower represents a major strategic decision. With its arsenal of 720 ICBMs more than offset by a larger U.S. deterrent, with its huge land army muscle-bound and deprived of global mobility in the middle of the great Eurasian land mass, Russia has turned to the sea to break out of its own geographic confines and attempt to wield truly global power.

Using the navy as a political as well as a military force, the Kremlin hopes that its mere presence in many places will act as a deterrent to the U.S. Moreover, the Russians want to be ready to move quickly into any areas where U.S. power and prestige may recede. They not only plan to project a more tangible Russian influence in the underdeveloped world but also, by using their merchant fleet, to get a strong hold on the raw materials vital to Soviet—and often to American—industry. Ultimately, though, the Russian navy's biggest threat is a military one. Its offensive strategy not only zeroes submarine-carried nuclear missiles in on U.S. cities, but aims to isolate North America from Europe and Asia in case of war.

## BRIDGE OF TROUBLE

The imperial reach of the Soviet navy has already begun to have its impact on world events. In the tense Sea of Japan, a flotilla of 16 Soviet cruisers and missile frigates has in the past few weeks shouldered its way between the coast of North Korea and the U.S. Navy task force that was sent into the area to add some muscle to U.S. diplomatic demands for the return of the *Pueblo* and its crew. Soviet destroyers have also closely shadowed the carrier *Enterprise*, which withdrew because of North Korean protests shortly before the Soviet navy's approach. The Soviet presence checkmates the U.S. pressure on North Korea and gives the Kremlin a local pressure point without having to resort to nuclear threats.

Soviet seapower sustains the two countries that are giving the U.S. the most trouble. A bridge of 150 freighters from Russian ports carries to Haiphong the SAMs, the petroleum, the rockets, the assault rifles and the ammu-

nition that keep North Viet Nam fighting and killing U.S. soldiers. Moreover, it is the fear of hitting those Russian ships that has so far kept the U.S. from bombing Haiphong's piers or mining the harbor. And it is another bridge of Soviet ships that carries the \$1,000,000-a-day in supplies that sustains Castro's Cuba as the only Communist foothold in the Hemisphere.

## OUTFLANKING NATO

In the Mediterranean, the impact of the Soviet fleet has been particularly dramatic. Where Russia had only a half dozen ships a year ago, it now has 46 ships, almost as many as the 50-ship U.S. fleet, which for years had made the "Med" practically an American lake. Many of the Soviet ships came through the Dardanelles during the Six-Day War, and their arrival helped persuade the Israelis to accept a cease-fire. The Soviets have enhanced their new image as the protector of their Arab allies by keeping a few ships in Alexandria and Port Said so that Israeli bombers will not be tempted to blast away at the vast amount of war matériel that is flowing into those ports.

One main Soviet objective is to outflank NATO's land-based defenses—a goal that the Russian navy has partially reached by penetrating the Mediterranean. In a report to the Western European Union last November, Dutch Delegate Frans Goedhart warned: "It is no longer correct to speak of the 'danger' of the Soviet Union outflanking the NATO southern flank. This 'danger' has become a reality." To the north, the Russians have also turned the Baltic into a virtual Red Sea on which their warships now outnumber NATO forces 5 to 1.

To support its growing naval activity, Russia is searching for new bases and ports of call. Soviet diplomats are setting up an embassy in the new republic of South Yemen, where the Russians have their eye on the former British naval installation at Aden; the installation not only controls entry to the Red Sea but is an ideal base from which to expand influence into the oil-rich sheikdoms of the Persian Gulf. The Soviets may also be able to use the facilities of the big British naval base at Singapore, which Prime Minister Lee Kuan Yew has said he will rent to all comers after the Royal Navy pulls out in 1971. The big question in the Mediterranean is whether the Russians will move into the Algerian naval base at Mers-el-Kebir, which the French evacuated last month; it is only 315 miles east of Gibraltar. Russians have also used their influence with the Arabs to set up secret stockpiles of spare parts within trucking distance of Arab ports.

## RUSSIAN MARINES

Admiral Gorshkov's ships are not only wide-ranging but among the world's newest and best equipped. Unlike the U.S. and Britain, both of which emerged from World War II with large surface fleets, Russia had to start practically from scratch after the war. The result: while 60% of the U.S. fleet consists of ships 25 years old or older, the Soviet navy's surface fleet is sleek and modern. "Almost every time you go into a harbor," says U.S. Navy Captain Harry Allendorfer, an expert on Soviet seapower, "if there are no flag markings and you pick out the cleanest and best-looking ships, nine out of ten of them will be Russian."

The Soviet Union is adding to its fleet of 55 nuclear-powered submarines at the rate of five a year. Most of the Soviet nukes are hunter-killers whose mission is to destroy U.S. Polaris subs in time of war, but a growing number fire a new underwater missile that has a range of at least 1,500 miles (v. the U.S. missile's range of 2,500 miles). Since he believes that naval guns are obsolete, Admiral Gorshkov has equipped almost all Soviet surface ships, from the smallest to the largest, with ship-to-ship missiles. The Soviet missiles are so-called "cruise missiles" that fly about 700 miles an hour, steer themselves either by radar or heat-seeking systems

tions engaged in it are the international organizations. Many of these are specialized agencies associated with the United Nations, but they also include the Organization for Economic Cooperation and Development as well as the regional development banks. These entities have made significant contributions to economic development and the protection of peace. Their continuing participation in the world's everyday work is not the less useful because it is largely unhonored and unsung.

It would be unrealistic, nevertheless, not to recognize that the international organizations are in danger of disappointing the publics which support them. One reason may be that these organizations and their parliamentary bodies sometimes succumb to the risk of contributing more to the already worldwide surplus of oratory than to the stock of new ideas and useful activities. Another reason, unquestionably, is the continuing multiplication of new organizations. In the end, the sight of so many hands outstretched from so many different directions, in gestures either to help or of supplication, must lead to confusion and bewilderment.

It is time, I suggest for us in the international organizations to take an anti-proliferation pledge: to reserve the creation of new entities for functions that clearly have no possible home among the many rooms offered by the international family; to allow the organizations to concentrate their attention on the improvement of existing efforts; and to permit them to work out a more effective coordination and distribution of labors among themselves. Looking at world and regional organizations directly concerned with development finance, it is easy to see, for instance, that we should go further in coordinating and centralizing functions of research, fact-gathering and reporting. That would reduce demands on the time and patience of our client countries and would increase our own efficiency. I am sure that other important opportunities for a better distribution of effort exist not only among the financial institutions but throughout the structure of international organizations.

I wish also to observe that international organizations, no less than national entities, must be alert to the necessity for new approaches. The tendency of any institution is to develop and apply standard formulas, a tendency from which I may say the World Bank Group is not immune. Working out new solutions and breaking old habits is not as easy task; but it will always be necessary for progress. In the World Bank Group, for instance, we have been slow to finance state-owned enterprises because of the problem in many countries of ensuring efficient management of undertakings that, for want of private savings, must operate under government sponsorship. We have only scratched the surface of financing projects to promote tourism, even though the results of such financing may be of first importance for economic development in a number of countries. No doubt other international organizations have barriers of thought which it would be equally useful to break down.

If there is one thing which all of us in the development business should remember, it is that we do live in a world of change. A world in which not only problems but opportunities are multiplying at increasing speed. The new opportunities being opened up by advances in technology, if we take advantage of them, could bring about important breakthroughs on some of the most difficult development problems, and could help bring about a spectacular transformation of the prospects of the developing countries. Let me mention a few possibilities:

One—Greatly increased yields in agriculture through the availability of large quantities of fertilizers at low cost. This can be achieved on the basis of new processes for producing cheap ammonia. A high degree of

international cooperation is required to achieve the chain of primary materials, manufacturing facilities and financing and distribution organizations needed to serve individual countries. The problems which must be solved are formidable, but in my opinion not insoluble. Progress on this front would be of the greatest significance.

Two—A considerable fortification of nutrition, through the continuing development of plants producing high crop yields and containing high protein and caloric values. Advances already made in this respect are beginning to be widely applied here in India, for instance. Recent successes in the laboratory put us on a biological frontier which considerably increases the possibilities of developing products which will exceed in nutritional values anything now found in nature.

Three—Overcoming water shortages by making sea water usable for drinking, for industrial use and eventually for agricultural use. Processes for large-scale de-salting of sea water are soon to have their first trials; and the cost of making sea water suitable for drinking and for irrigation may in this generation approach levels which would make possible applications on a wide scale.

Four—A worldwide slowing in rates of population growth, based on simple, inexpensive and reliable methods of birth control. Here the problem is not only further technical advance but also accelerated social action to see that the technology is used.

Mr. Chairman, I have spoken to this meeting as a banker, not as a diplomat, and I have not used the guarded phrases which international civil servants often employ. One of the great contributions which this meeting could make to the progress of human affairs would be to bring about a sharper feeling of urgency about the tasks of development. It therefore seemed to me that to indulge in an exercise of mere politeness would be a disservice to the Conference and would scarcely recognize the importance of its deliberations.

I have stated my opinion that up to now, performance in development and in development assistance has fallen short of our aspirations. The prosperous nations have been irresolute and to some extent even irrelevant in their efforts to assist the less developed countries. The underdeveloped world is very far from being in a position to say that it has done all it could to help itself. Among international organizations, a multiplicity sometimes verging on disarray is evident.

Despite this, much progress has been made and much more, I am convinced, is in prospect. Sheer physical achievement in the less developed world—the tens of millions of kilowatts of electric generating capacity, the hundreds of thousands of miles of highways and railways constructed or reconditioned, the multitude of industrial plants—has been tremendous.

Throughout many parts of the less developed world, an infrastructure has been put down on the basis of which other kinds of economic growth can and should proceed more rapidly. Even more portentous for the future is the growing number of people who are acquiring the skills and attitudes which will accelerate that growth. A number of countries have acquired the momentum that will carry them to satisfactory standards of living; and I think that in their forward movement, others will join in increasing numbers.

The speed at which development moves forward will depend much on the spirit in which the older and richer countries, the newer and poorer countries, and the international organizations all conduct their common efforts. *Imagination* will be indispensable to meet the many and almost infinitely diverse challenges of the situation of the developing nations. *Patience* is a quality which will be needed in plenty, because the way for

many nations will be long; pauses and setbacks are bound to happen.

The tasks facing rich and poor countries alike—of reconciling rival political views, of relaxing social tensions, of refereeing intense competition for budgetary resources, of providing for internal order and external defense—these common tasks ought to engender mutual respect and tolerance between the countries giving aid and those receiving it. And in the face of the scale and seriousness of these responsibilities which national authorities are carrying, *humility* is the way the international agencies, with their armies of initials, ought to conduct their business of trying to act as inspiration and guide to development.

Savants and scholars, Mr. Chairman, tell us that humanity is now passing through a revolutionary transformation more important than anything since the changes that followed on the invention of agriculture, perhaps ten thousand years ago. Advances in scientific discovery and technical application follow each other with more and more bewildering speed. The technological revolution greatly increases the potential of mankind, but increases it both for good and ill; we stand at a point where humanity literally has the power either to blow itself to bits or to achieve for the whole human race security and comfort of which kings of old never dreamed.

So far the world is only beginning to tap its new potential. The very coming together of this Conference, which provides a crossroads for discussion, is a hopeful sign that no one is satisfied with the present state of affairs. It gives reason to hope that at this particular turning in the road of human history, we will go in the right direction: that just as man turned long ago from savagery to civilization, he will now turn toward an increasingly better life on this planet.

### Homeownership

HON. ANDREW JACOBS, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, February 26, 1968

Mr. JACOBS. Mr. Speaker, I was pleased to see an increased emphasis on homeownership for lower income families in President Johnson's message on the cities. Despite all our efforts and numerous programs to improve the conditions of our cities and the lives of the people who live there, we have failed in one vital element: We have failed to convince a significant segment of our citizenry that our American system works for them. In short, we have failed to convince them that they have any real stake in our society. The alienation, despair, and desolation felt by inner city residents has been made all too apparent by urban unrest and violence in city after city.

An opportunity for homeownership can serve as one way to give these people a stake in our system. Pride of ownership is a subtle but powerful force. Past experience has shown us that families offered decent homes at prices they could afford have demonstrated a new dignity, a new attitude toward their jobs, and a new sense of participation in their community. Incidents of vandalism in communities where residents were given the opportunity to purchase their own homes have declined markedly. It is only

logical that people who own their homes will care more about what happens in a community than those that merely live there.

The proposals in the message on the cities will make homeownership possible for an increased number of families. These families will have a concrete incentive for striving to improve their own lives as well as the life of the community. The American system has made the benefits of homeownership possible for millions of our citizens; the President's proposals would extend those benefits to many who have traditionally felt bypassed by that system. I ask you to support these proposals for homeownership with the enthusiasm they deserve.

### President Johnson and the Mexican American Citizen—Journey Toward Full Opportunity

**HON. HENRY B. GONZALEZ**

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, February 26, 1968

Mr. GONZALEZ. Mr. Speaker, demonstrating once again that he is the equal rights and opportunity President par excellence, Lyndon B. Johnson has shown the Nation and its Spanish-speaking citizens that he means to make the complete journey toward full opportunity.

In the statement he has issued from the White House entitled "A New Focus on Opportunity for the Spanish-Speaking American," the President has briefly listed the significant actions he has taken as based on the work of his special committee on Mexican American affairs.

To cite a few accomplishments—the enactment of the first national bilingual education program, especially important to the Mexican American and Spanish-speaking child and adult.

The President's request to Congress to improve employment opportunities for Spanish-speaking people, and for greater linguistic help in applying and becoming eligible for Government-supported programs in education, health, job training, and so forth.

The training of teachers to work with Mexican American schoolchildren and migrant workers.

The benefits the Spanish-speaking citizen will obtain from the President's comprehensive programs for millions of housing units and hundreds of thousands of jobs in the next decade for the poor and the unemployed.

All these are indicative of the seriousness of the President's intentions last summer when he set up his special Cabinet Committee on Mexican American Affairs.

I am proud to represent a district which numbers many citizens who speak the Spanish language. I am proud to number many Mexican Americans among my constituents. And I am proud of a President who believes that the journey toward full opportunity must not be ended until the job is completed.

I insert in the RECORD a copy the Pres-

ident's remarks entitled "A New Focus on Opportunity for the Spanish Speaking American":

PROGRAMS FOR SPANISH-SPEAKING AMERICANS  
(Statement by the President on actions taken based on recommendations of the Cabinet Committee on Mexican-American Affairs, February 23, 1968)

Last October, in El Paso, I attended a conference of high purpose. There, with the Vice President and members of the Cabinet, I met with 1,200 Spanish-speaking Americans.

This was the first time that the Mexican-American community had an opportunity to discuss matters of direct concern—ranging from education to economic opportunity, housing to health—with the highest officials of government.

The aim of the 3-day conference was to assure that America's second largest minority was receiving its fair and just share of Federal programs in these areas.

Out of that conference, ideas and suggestions flowed to a Cabinet-level committee on Mexican-American Affairs, which I appointed last June.

Based on the recommendations of the committee—many of which stemmed from the El Paso conference—I have taken the following actions:

In education:

I have signed into law the first Federal bilingual education program. It will help Spanish-speaking children overcome the barriers of language which have prevented them from receiving the fullest benefits of education.

I have asked Congress to provide funds to expand and improve adult and vocational educational programs aimed particularly at those Americans who have no high school diplomas. About 20 percent of these are Spanish-speaking.

I have instructed the Secretary of Health, Education, and Welfare to:

Accelerate the training of specially-trained teachers to work with Mexican-American school children and migrant workers.

Insure compliance with Title VI of the 1964 Civil Rights Act. This forbids discrimination in school district boundaries and in quality of education, wherever the schools receive Federal financial assistance.

In health and welfare:

I have requested the Secretary of Health, Education, and Welfare to:

Simplify application and claim procedures in Medicare, Social Security and other programs serving the Mexican-American communities.

Gather and analyze data on the health of Spanish-speaking Americans.

I have asked the Congress to increase its support of special medical programs for migrant farm workers, most of whom are Mexican-Americans and Puerto Ricans.

I have appointed a distinguished Mexican-American scholar, Dr. Julian Samora, to a Presidential Commission evaluating the Nation's welfare system.

In housing:

The Department of Housing and Urban Development has selected a number of cities to begin planning under the Model Cities program. Among them are San Antonio, Eagle Pass, and Waco, Texas; Denver and Trinidad, Colorado; Albuquerque, New Mexico; New York City and San Juan, Puerto Rico—all with large Spanish-speaking populations.

I have directed the Secretary of HUD to work with Laredo, Texas and its sister city in Mexico, Nuevo Laredo, in an international cooperative effort to help develop a Model Cities program that will improve the condition of life in this border area.

I have requested, in the 1969 budget, \$1 billion for the Model Cities program to revitalize and rebuild entire slum neighborhoods and barrios. In my special message

on the cities, I asked the Congress, industry and labor to begin a ten-year program to construct six million new housing units for low and moderate income families, many of whom are Spanish-speaking.

I have urged the Congress—once more—to pass a Fair Housing Law, insuring that all Americans can have the opportunity to live in a place of their own choosing.

In Federal employment:

I have instructed all Federal agencies:

To work together to increase employment opportunities for Spanish-speaking Americans.

To require employees to know Spanish where they serve large groups of Spanish-speaking people.

To re-examine their hiring and recruiting methods to assure that potentially good workers are not refused jobs because a language barrier works against them in written examinations.

In private employment:

I have asked Congress for funds to extend a test training program to relocate workers from areas of high unemployment to those where work is available.

I have moved to assure that Federal manpower training programs provide English language training for Spanish-speaking people who need it.

I have proposed the job opportunities in business sector (JOBS) program—a new partnership between government and private industry—to train and hire those who have the greatest difficulty finding work.

I have directed the Secretary of Labor to bring together in one unified effort all manpower programs for an attack on hard-core rural and urban unemployment. As a result, the concentrated employment program is underway in several of the largest cities of the Southwest. I have recommended expansion of this program in the 1969 budget.

I have urged Congress again, as I did last year, to give the Equal Employment Opportunity Commission the power to order a halt to employment discrimination.

In rural matters:

I have asked the Congress to authorize a major project to improve Forest Service grazing land in the Southwest, to serve the small rancher.

I have instructed the Secretary of Agriculture to expand the activities of the County Extension Service to meet more fully the needs of the small Mexican-American farmer.

I am directing the Secretaries of Agriculture and Labor to hold hearings so that they can set realistic minimum wages for certain farm workers.

Last June, when I established the Cabinet Committee on Mexican-American Affairs, I said: "We today reaffirm this truth: that what we do for any minority, we do as well for any majority. After all, we do this for all of America."

These convictions remain firm and resolute.

With this report of progress and action, we have begun the journey towards full opportunity for the Mexican-Americans, Puerto Ricans and other Spanish-speaking people of our land.

(NOTE.—The statement was released at Austin, Texas. For the report of the Cabinet Committee on Mexican-American Affairs, see 3 Weekly Comp. Pres. Docs, pages 841, 842.)

### The 100th Anniversary of the Elks

**HON. ED REINECKE**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, February 26, 1968

Mr. REINECKE. Mr. Speaker, this year marks the 100th anniversary of the

We must learn to dispense welfare with dignity and encourage a return to useful society.

We must do the job with some semblance of efficiency.

Item three. Housing. There are too many areas of deplorable housing in our wealthy nation and housing is a massive, complex problem. There are a few simple things, I believe, that are universally necessary. We must have decent housing codes and ordinances and strong provisions for enforcing them.

We must take the profit out of slum and sub-standard housing for the unscrupulous landlord.

We must embark on long range planning. When you break down a three family occupancy into one, there's got to be a place for the other two. It isn't sufficient to clear a slum area and have no place for the people to go.

I debated whether or not to include this next question in my remarks because of its emotional aspects that torment even the most well meaning of men. It is simply this: Is every citizen free to buy a house he can afford even if his neighbors are of a different race? I think this question troubles middle and lower class families even more than it does the more affluent, creating more problems in middle class property values. On the other side of the coin it is easy to see why freedom of housing is a fundamental concern of the rising and growing group of educated Negroes. The pressure for this will not just go away. This year, or next year, or the next year it will be facing your community.

Incidentally, I think that when each community faces up to the problem, there will not be a fraction of the impact that is feared now.

Items four and five on my list are inseparable. They are education and jobs. There is no way to say which comes first. If a young man can't get a job after finishing high school, for instance, why bother to finish? And yet, if he hasn't finished high school he can't qualify for a job. We've got to be willing to approach this matter as a total system, surround it, and realize that it will take at least a generation to make real progress. In my opinion, we have got to find a way to expose pre-schoolers to learning opportunities so that we're not playing catch-up for the whole school life.

We know full well that all children are not equal. All the Whites aren't equal, nor are all the Irish, nor all the Joneses. We'll never know what they can do until they are given an equal crack at something.

I see it happen often. Through a set of circumstances I found myself looking for a spot for a nephew of one of our Negro workers. The boy was bright, aggressive and hard-working but had finished only seven years of school. He is now making a contribution to our laundry equipment plant. This is an isolated and unusual example and there are a half dozen failures for every success. It does point out another aspect of the problem. We not only have to provide equal educational opportunities, we've also got to find a way to salvage the people who have already dropped out of the race.

The task is not as impossible as it may seem. We have had some great results with young men who were discarded or who discarded themselves. We don't win them all, but the proportion is growing.

After all the debating is over, a fellow has got to have a job. He needs the income, the status, the dignity, the stability that a job gives him. "There is nothing like a job," to get a man on his feet. Not all the welfare or all the houses of correction are anything like a job.

Now, I've told you what I think has got to be done . . . what we have to do. And who is "WE"? In the last couple of years I've developed a strong feeling that "WE" can be a group that has not yet made a real effort, as a group, to turn the tide.

We've seen the churches make passes at social progress without any real solid success.

We've watched the volunteer groups of a community do a host of fine and wonderful things, but each touches only a facet of a community problem. They do not have power or influence over the waves of trouble.

The schools are having a tough enough time handling classroom problems. They cannot extend their influence.

The local governments that logically should be in a position to control such things have failed miserably. And the loud and diversified shouts of outraged citizenry do not lead to effective action.

What group then is left? What group can do something? I think that we are the group that can do something. We, the businessmen, the industrialists.

We businessmen are the only group in most communities who have the wherewithal to make significant dents in these problems.

Consider if you will . . . we have most of the jobs under our jurisdiction and we can change policies and practices to meet whatever circumstances arise. We have, in our total enterprises, most of the money that can be brought to bear on problems of our Choosing. We have most of the management skills in town working for us. It's simply the character of our work.

We businessmen can put together more sheer power for good or for evil than all the rest of the elements of the community combined. Call it power . . . call in influence . . . call it clout. By any name it is the ability to get things done.

Most of us, however, and you can include me until recently, have not wanted to throw our weight around. We haven't felt it the province of business to get into social problems. Many of us have attempted to make individual contributions toward solving community problems.

Whatever personal comfort you may get from the individual approach, it won't do a thing toward curing problems of such great dimensions. I believe the job can only be done by an organized, unanimous, massive assault by businessmen.

You don't have to do it out of a feeling of altruism either, it can be a hard-headed business judgment. Look at your community. You have your money and your time invested there. In our case, we are a very big part of the community and even if we didn't have a drop of human kindness in us, we couldn't sit and watch the community deteriorate and become unfit to work and live in.

The truth is: we can't afford not to become involved in social problems. It has got to be a cost of doing business . . . and it will be costly . . . so that your community will be worth doing business in and living in.

I think you will also find that when you, as a group, put muscle into a project your community will stand up and cheer. They're ready for leadership, leadership that isn't coming from other community sources. They'll applaud your leadership, even if it does utilize some raw muscle.

You may not share my opinions but I know you share the problem. If you do not involve yourself in a solution, the problem may engulf you.

I simply ask that you give these ideas a chance to season, and then, ask yourself . . . If not us . . . who? If not now . . . when?

### National Safety Patrol Week Resolution

**HON. HERVEY G. MACHEN**

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, February 26, 1968

Mr. MACHEN. Mr. Speaker, as you know, a number of other Congressmen

have already introduced legislation to designate the second week of May as "National Safety Patrol Week." I, too, have introduced a bill today for that purpose because I believe that the boys and girls across the country who make up the school safety patrol are performing an inestimable service not only to themselves and their classmates but to all of us by learning and teaching the principles of safety. For their efforts, they certainly deserve the honor that this bill would provide.

There are over 900,000 safety patrols serving in over 40,000 schools in 15,000 communities. They are found in every State and there are 10,000 in suburban Maryland alone. In addition, there are some 156,000 patrol members serving in foreign nations.

Since the establishment of the safety patrol program in the 1920's, over 16 million boys and girls have served in it. I believe that the experience which these boys and girls have gained through their association with this program will always stand them in good stead. Certainly, the respect for the law which they learn through this program is excellent. We need more such programs to teach and encourage our youngsters to develop a healthy and cooperative attitude toward the law and the law-enforcement officers of the Nation. Therefore, I feel honored and privileged to join with others in encouraging the recognition of the tremendous service which this program and its members are providing to the Nation.

### Homeownership

**HON. JOHN H. DENT**

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, February 26, 1968

Mr. DENT. Mr. Speaker, over the years, our Nation has shown great wisdom in fostering and enacting legislation which has encouraged homeownership. Tens of millions of families across the land have become homeowners. The percentage of American families owning their own homes has risen from 41 percent in 1940 to about 66 percent recently.

Homes and homeownership have significant values for the owners and the community. It instills in men a pride of having a physical stake in the locality—and in the Nation. It produces in the owner a greater interest in the well-being and character of the community. And, for the community, a large percentage of homeowners makes for stable living conditions.

Since the early housing legislation in the 1930's to the present, we in this body of Congress have recognized the validity of these propositions and have taken many steps to enable those of modest incomes to attain homeownership. You know the institutions that have been developed to provide for it—the Federal Home Loan Bank system, the Federal Housing Administration, and others.

In this session of Congress, we will have the opportunity to expand the horizon of homeownership even further. The President has called for legislation

to enable 100,000 low-income families to buy or repair their own homes through an interest payment program.

We must continue the sound course of previous Congresses and vote to provide the needed additions to American homeownership. The President's recommendations deserve our favorable action.

**Dr. Ivan A. Gettling: Boss of the Year**

**HON. CHARLES H. WILSON**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, February 26, 1968

Mr. CHARLES H. WILSON. Mr. Speaker, I am very proud to announce that, in selecting the 1968 international boss of the year, the National Secretaries Association has chosen one of California's most distinguished aerospace leaders, Dr. Ivan A. Gettling, president of the Aerospace Corp. This award is the highest tribute to management bestowed annually by the 25,000-member organization.

Since the Aerospace Corp. is situated in my 31st Congressional District, I recently had the privilege of visiting the center to discuss operations with Dr. Gettling and his associates and can readily attest to the brilliance of Dr. Gettling's administration as seen in the company's position of leadership in the aerospace industry.

Dr. Gettling came to the presidency of Aerospace in 1960 after an impressive career in advanced engineering. An Edison scholar at the Massachusetts Institute of Technology, and a Rhodes scholar at Oxford University where he earned his Ph. D., he first served the U.S. Air Force as assistant for development planning in the air staff. Then he returned to MIT where, from 1940 through 1945, he directed the division of fire control and Army radar at the Radiation Laboratory while also heading up the naval fire control section of the Office of Scientific Research and Development and sitting on the Combined Chiefs of Staff Committee on Searchlight and Fire Control.

From 1945 to 1950, Dr. Gettling was a professor in MIT's electrical engineering department, and it was with this varied experience that he first entered industry as vice president for engineering and research of the Raytheon Co.

A man truly dedicated to the advancement of science, Dr. Gettling is unstinting with his time, serving as adviser to many Government committees whenever he feels he can be of value. He chaired the Limited Warfare Panel of the President's Science Advisory Committee from 1961 to 1964 and has also served on the U.S. Air Force Scientific Advisory Board, the Signal Corps Advisory Council, the Underseas Warfare Committee of the National Research Council, and the Defense Department's Research and Engineering Advisory Panel on Electronics.

This is the first time the National Secretaries Association has selected a Californian as international boss of the year. They could not have made a better choice.

## Auto Piggyback

**HON. CLAUDE PEPPER**

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, February 26, 1968

Mr. PEPPER. Mr. Speaker, thousands of Americans are waiting for the day when they may be able to drive their cars onto specially designed railroad cars and ride in them in comfort and leisure to distant points. When the train arrives at its destination, under this visionary method of transportation, the riders will be able to drive their cars from the train and proceed, rested and relaxed, to enjoy the convenience of their own automobiles at the new location.

Unfortunately, Federal funds for an experimental program of "auto piggyback" were deleted by the House and House-Senate conference committee from last year's appropriation for the Office of High-Speed Ground Transportation. The Director of the high-speed program, Dr. Robert Nelson, is still negotiating with private industry sources for \$4 million to keep the program alive. Meanwhile, the many Americans who are anxious to take advantage of this much-needed transportation service are deprived of the opportunity.

Mr. Speaker, I hope that a breakthrough will be made in making the auto piggyback program a reality. I can foresee the time when trains will carry carloads of visitors to Miami, where they will be able to see many more of the sights and attractions of our city.

Mr. Speaker, I would like to place, at this point, in the CONGRESSIONAL RECORD an article from the Miami Herald of February 1, 1968, bringing up to date the progress—or lack of it—being made on auto piggyback, along with an article by Mr. Arne C. Wiprud, regarding the need to enact this service for those in Florida's east coast and the whole State. Also, I would like to insert a letter from Mr. Hyman Reinstein, one of many who have written to me and the Department of Transportation in support of this proposal.

[From the Miami Herald, Feb. 1, 1968]

**FAST TRAINS AND AUTO PIGGY BACKS ARE STALLED IN APATHY**

WASHINGTON.—No one seems to want high speed rail service—no one, that is, but the public.

Most railroads apparently couldn't care less. Freight, not people, is their main concern.

As for Congress, its record on improving rail service is less than good. Just this year, it cut funds for the experimental auto train.

But at the Office of High Speed Ground Transportation there is a file bulging with letters from would-be riders who not only want fast train service, but point out that it is long overdue.

Basically, the government's immediate program to improve rail service is divided into three projects. Like many passenger trains, all are behind schedule.

The Washington to Jacksonville, Fla., car train was stalled this year when Congress failed to approve the funds needed to begin the test.

But the head of the high speed program, Dr. Robert Nelson, is not giving up hope. He said the government is "negotiating with

private industry" for \$4 million to keep the project alive.

He said, however, that railroad equipment makers may be willing to put up enough money to keep the project going.

Under the car train program, a traveler would drive his own car into a specially designed railroad car. His car would be his seat, but the train's equipment would include everything from a diner to a movie house and a playroom for children.

As for fares, they would be levied on a per-automobile basis, rather than for each passenger. The one-way fare to Jacksonville for the car and a "reasonable" number of passengers would be \$100.

Yet, even if private industry puts up the money, the service could not possibly begin until February 1969, Nelson said.

The other two rail projects are high-speed trains designed to relieve congestion in the heavily-traveled northeast corridor between Boston and Washington.

One train will operate over the tracks of the bankrupt New York, New Haven and Hartford Railroad. The cars are being built by United Aircraft, using special aircraft turbo-prop engines.

When it begins operation, the train is expected to shave an hour off the normal run of four and a quarter hours between New York and Boston.

Another leg will be operated by the Pennsylvania Railroad between New York and Washington. It will use electric trains running at speeds of up to 120 miles an hour.

In November, speeds of 164 miles an hour were reached by two electric cars being tested by the Pennsylvania Railroad on a special high-speed track between New Brunswick and Trenton, N.J.

Pennsylvania R.R. President Allen J. Greenough said the new self-propelled cars are the first of 50 undergoing rigorous testing.

Transportation Secretary Alan S. Boyd originally said this service would begin in October 1967, but the target date now is early spring of 1968. The delay is attributed to technical difficulties—the firms producing the special cars have not been able to deliver them on schedule.

The Transportation Department hopes to keep the experiment going for two years, but no one can predict what the outcome will be. More passengers are expected to ride the trains, but whether the increase will be enough to offset the high operating cost is anyone's guess.

Nelson concedes that aside from the Pennsylvania Railroad and the New York Central, most of the nation's other railroads have shown little interest in financing high-speed rail service.

The statistics tell why. In 1966, railroad passenger revenue dropped to \$545 million—one-twentieth of the rail industry's total revenue. In terms of people, the railroads carried more than 910 million passengers in 1944. In 1966, the total dropped to 300 million.

But things were different on the freight side of the ledger. Freight accounted for 90 per cent of the industry's \$10 billion gross revenue total last year.

The railroads argue that they are not the only guilty party. They point to the government decision to take profitable mail contracts off passenger trains and put them on airplanes. Labor union demands and the public's fascination with air travel are other key reasons for the decline of the passenger train, the railroads claim.

Nelson refused to commit himself one way or another on the outcome of the high-speed experiment.

He said he thought the trains would get "substantial patronage," but added that it was quite possible it would not be enough to offset the cost of the service.

If the experiment fails to make money, it could end up as a subsidized government operation. Or, commuter hopefuls may have

PROCEEDINGS AND DEBATES OF THE 90<sup>th</sup> CONGRESS, SECOND SESSION

Vol. 114

WASHINGTON, MONDAY, FEBRUARY 26, 1968

No. 28

## House of Representatives

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward Gardiner Latch, D.D., offered the following prayer:

*The hand of our God is upon all of them for good that seek Him.—Ezra 7: 22.*

Eternal God, our Father, we, Thy humble servants, bow before Thee at the altar of prayer. As we remember Thine unflinching goodness which has attended us all our days, we pray for Thy good spirit to move within our hearts as we start our deliberations this day.

We acknowledge our shortcomings, our selfishness and our sins. Forgive us, we pray Thee, when we fall short of Thy will for us and Thy way for our Nation. Cleanse the thoughts of our hearts by the inspiration of Thy holy spirit that we may think better, speak better, and do better than ever before.

We pray for those in positions of influence in our Nation that they may lead our people in right and just paths. Lay Thy hand in blessing upon our President, our Speaker, the Members of this body, and all who labor with them. Give them the assurance that with Thee great things are possible. Thus may our faith be renewed, our hope restored, and good will revived in all our hearts. In the name of Him who went about doing good we pray. Amen.

### THE JOURNAL

The Journal of the proceedings of Thursday, February 22, 1968, was read and approved.

### MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Geisler, one of his secretaries, who also informed the House that on February 19, 1968, the President approved and signed a bill of the House of the following title:

H.R. 13094. An act to amend the Commodity Exchange Act, as amended.

### ANNOUNCEMENTS OF SCHEDULE OF HEARINGS ON HOUSING PROGRAM

(Mr. BARRETT asked and was given permission to address the House for 1

minute and to revise and extend his remarks.)

Mr. BARRETT. Mr. Speaker, last week the President delivered his truly great message on the crisis of the cities, and this week he is transmitting to the Congress the Housing and Urban Development Act of 1968 which he most aptly calls a charter of renewed hope for the American city.

I would like to inform our colleagues that in order to expedite the President's legislative proposals, the Subcommittee on Housing has scheduled 3 weeks of hearings beginning March 12 on the President's bill and other housing and urban development bills pending before the Banking Committee. Groups and organizations having an interest in the legislation who wish to testify or file statements should get in touch with subcommittee staff members, Jim McEwan or Ken Burrows, 2129 Rayburn Building, telephone 225-7054.

### NAVAL NUCLEAR PROPULSION

(Mr. PRICE of Illinois asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PRICE of Illinois. Mr. Speaker, I am very pleased that we of the Joint Committee on Atomic Energy were able to get our naval nuclear propulsion hearing print out before the planned House Armed Services Committee hearings on this subject. This record, which covers last year's hearings and the executive hearings we held earlier this month, gives an up-to-date picture of this critical defense area.

We have problems in the naval nuclear propulsion field. We need advanced performance attack submarines and need them badly. We need nuclear-powered warships to escort our aircraft carriers. Our security system concerning nuclear warship technology apparently needs some tightening up. Our industrial capability to build naval nuclear propulsion plants is on the wane.

We tried to include in the record of these hearings all the basic information we could, within the bounds of security, which are pertinent to the issue of nuclear warships. The record summarizes

what all the responsible committees of the Congress have done in this area and should provide a good base for the House Armed Services Committee to take off from in its public hearing.

I am sorry we were not able to obtain the additional data on nuclear propulsion we asked the Secretary of the Navy for earlier this month—see page 497 of committee print. This data concerned a study done by Admiral Rickover. Frankly, the cooperation we have received from the Defense Department in getting this information leaves much to be desired.

The House Armed Services Committee has also asked for this information and has not received it.

For reasons I do not understand, the Joint Committee request of the Secretary of the Navy for a document on nuclear propulsion which Admiral Rickover prepared ended up in the office of the Assistant Secretary, Systems Analysis, in the Defense Department. I am sure that this request for information will receive attention in the House Armed Services Committee next Tuesday if the data has not been received at that time.

### DEATH OF JUDGE ARTHUR KLEIN

(Mr. CELLER asked and was given permission to extend his remarks at this point in the Record.)

Mr. CELLER. Mr. Speaker, Arthur Klein lies in timeless sleep, where there is neither calendar nor almanac.

Death found him a shining mark—an eminent jurist, judge of the Supreme Court of the State of New York—in which capacity he served with diligence, dedication, and devotion. Prior to his service on the bench he had been a Congressman from the Empire State. His tenure as Congressman was marked by tact, wisdom, and efficiency. He was repeatedly rewarded by reelections. I served with him and grew to have an affectionate regard for him and high respect for his judgment.

His ascendancy to the bench was a loss to Congress and a decided boon to the bench.

He was a humble man. Through the fabric of his seriousness there ran a deli-

cate thread of humor that was most comforting and refreshing.

We shall dearly miss him. I have lost a loyal friend. His wife has lost a true helpmate, and his children a devoted father.

We shall always remember him. Indeed, to live in the hearts of those we leave behind us is not to die.

Let us say—God has placed his finger upon him and he sleeps.

#### SOME PUBLICITY CREATES A BAD AND DISTORTED IMAGE

(Mr. TAYLOR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TAYLOR. Mr. Speaker, on February 19, 1968, an Associated Press wire photo appeared in American newspapers showing a Vietcong suspect lying on the ground with a gun pointed at him by a South Vietnamese marine. The cutline beneath the picture stated that this prisoner was executed after he had stated that he had been forced to serve the Vietcong.

Earlier a similar picture appeared in American papers showing a Vietcong prisoner, according to the cutline, being shot in the head with a pistol held by a South Vietnamese official.

Supposing that these atrocities did take place, and we only have one news photographer's word for it, what earthly good can come from placing pictures of this type in American newspapers? Certainly we all abhor such inhuman treatment of war prisoners. American military authorities should make every possible effort to put an end to such.

But this publicity is creating a bad image, and I believe a distorted image, of the people that we are fighting with and for.

American newspapers are read all over the world and this includes North Vietnam. Such pictures and publicized stories of cruelty are apt to cause the Communists to retaliate against our soldiers and marines when they are taken as prisoners.

These pictures can be reproduced by the Communists and used to convince their troops that if they surrender, they will be killed, thus making it more difficult for us to bring this war to a successful conclusion.

To me this does unnecessary and irreparable damage to our war efforts in Vietnam and should not be continued.

#### HIGH INTEREST RATES THREATEN VETERANS' PROGRAMS

(Mr. PATMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PATMAN. Mr. Speaker, on January 30, President Johnson sent his second message on veterans to the Congress. This message combined with his earlier statement on veterans of January 31, 1967, is a clear call for the country to meet its full obligation to our servicemen who are sacrificing so much.

Mr. Speaker, President Johnson, throughout his career in the Congress,

recognized and supported measures designed to give the veterans the benefits which they had so fully earned. Now, as President, he has continued and expanded his concern for the welfare of the returning serviceman. President Johnson's program gives the veteran a full opportunity to continue his education, to obtain job training, home loans, hospitalization, and a variety of other assistance which has been accorded veterans of earlier conflicts.

Mr. Speaker, the Congress must respond fully to the President's program for the veterans and provide the necessary funds to make these programs work. Unfortunately, these needs must be met—and met fully—during a period of very tight budgetary conditions in the Federal Government. With these growing needs of the veteran, it is tragic that so much of our national wealth and our Federal budget must be allocated to pay interest on the national debt.

This year, Mr. Speaker, the Federal Government must pay \$15.5 billion in interest on the national debt—the second largest single item in the budget. If interest rates had been kept at the level existing in 1952, when President Truman left office, we would be paying \$8 billion less on the current national debt. This is \$8 billion that could be used for a variety of needed programs, including veterans' assistance.

Mr. Speaker, if we continue to allow the interest rates to go up, we will be paying so much on the national debt that there will be little left for the veterans and other needy segments of our society.

Mr. ANDERSON of Illinois. Mr. Speaker, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman from Illinois.

Mr. ANDERSON of Illinois. How much less would the interest on the national debt be today if the interest rates were the same as those in 1960? The gentleman went back to 1952. Would the gentleman give us the figures for 1960?

Mr. PATMAN. I will be glad to detail the situation on interest rates. I will put this in the body of the RECORD later today.

Mr. ANDERSON of Illinois. I will look for that information with great interest.

#### THE LATE HONORABLE SCOTT W. LUCAS

(Mr. PRICE of Illinois asked and was given permission to address the House for 1 minute.)

Mr. PRICE of Illinois. Mr. Speaker, on last Thursday morning one of the great legislative leaders of our time passed away. I speak of the Honorable Scott W. Lucas, a former Member of this body, a former Member of the other body, who closed his legislative career as the majority leader of the other body.

I knew Scott Lucas over 35 years. I first met him in Illinois in 1932. Since that time I have been in close association with him. I worked closely with him on many projects affecting the State of Illinois.

As a Member of Congress Scott Lucas devoted much of his time to social legislation that has been placed on the statute books in the past 25 years. He was a

champion of the social security program and of many progressive and important farm measures.

Scott Lucas was a dynamic leader, a statesman of the highest caliber. Most of all he was a loyal friend. I know all of us in the House who have had the privilege of serving with him mourn his passing.

Mr. ALBERT. Mr. Speaker, will the gentleman yield?

Mr. PRICE of Illinois. I am glad to yield to the majority leader.

Mr. ALBERT. Mr. Speaker, I join the distinguished gentleman from Illinois in his tribute to a great former Member of this House and an outstanding leader in our Nation, the former majority leader of the Senate. I have had the honor of knowing Scott Lucas for many, many years. I knew him before I came to the Congress. I knew him and had some association with him as a lawyer before World War II. Scott Lucas was a great lawyer as well as a great statesman. He has lived a full and remarkable life. I join my friend from Illinois in extending to his loved ones my deepest sympathy.

Mr. ARENDS. Mr. Speaker, will the gentleman yield?

Mr. PRICE of Illinois. I yield to the gentleman from Illinois [Mr. ARENDS], the minority whip.

Mr. ARENDS. Mr. Speaker, when back in the district this last weekend I learned with great sorrow of the passing of former Senator Scott Lucas. For many years I have known Scott Lucas not only as a legislator, but likewise as a friend. Before coming to Congress I was associated with him in the American Legion in the great State of Illinois. He and I became good friends not only in the House of Representatives where we served 4 years together but likewise in the many years that he served in the U.S. Senate. He became majority leader of the U.S. Senate.

Scott Lucas did an outstanding job not only in behalf of his district but of the State of Illinois and the Nation during his many years of public service. He was favorably known all over the Nation. I was pleased to be associated with and proud to call him my friend. Those of us who knew him in the legislative Halls and who knew him in private life always appreciated his warmth and sincerity. Many, many times I played golf with Scott, this being his favorite game. Always he was the true sportsman, never asking for more than he was willing to give. He at one time was president of Burning Tree Club where he was loved and respected by all. Scott will be missed tremendously by all the membership.

I extend to his family my deepest and sincerest sympathy at this time.

Mr. LAIRD. Mr. Speaker, will the gentleman yield?

Mr. PRICE of Illinois. I am glad to yield to the gentleman from Wisconsin [Mr. LAIRD].

Mr. LAIRD. Mr. Speaker, I thank the gentleman from Illinois for yielding to me to pay my respects and tribute to the former majority leader of the U.S. Senate, Scott Lucas of Illinois. Scott Lucas was an outstanding legislator, but more importantly he was a great and true friend. Scott Lucas spent many summers

## IN THE SENATE OF THE UNITED STATES

FEBRUARY 26, 1968

Mr. SPARKMAN introduced the following bill; which was read twice and referred to the Committee on Banking and Currency

---

## A BILL

To assist in the provision of housing for low and moderate income families, and to extend and amend laws relating to housing and urban development.

1       *Be it enacted by the Senate and House of Representa-*  
2       *tives of the United States of America in Congress assembled,*  
3       That this Act may be cited as the "Housing and Urban  
4       Development Act of 1968".

### 5       TITLE I—LOW AND MODERATE INCOME

### 6                               HOUSING

### 7       HOMEOWNERSHIP FOR LOW AND MODERATE INCOME

### 8                               FAMILIES

9       SEC. 101. (a) Title II of the National Housing Act is  
10       amended by adding at the end thereof the following new  
11       section:

1 “HOMEOWNERSHIP FOR LOW AND MODERATE INCOME  
2 FAMILIES

3       “SEC. 235. (a) For the purpose of assisting low and  
4 moderate income families in acquiring homeownership or in  
5 acquiring membership in a cooperative association operating  
6 a housing project, the Secretary is authorized to make, and  
7 to contract to make, periodic assistance payments on behalf  
8 of such homeowners and cooperative members. The assist-  
9 ance shall be accomplished through payments to mortgagees  
10 holding mortgages meeting the special requirements specified  
11 in this section.

12       “(b) To qualify for assistance payments, the homeowner  
13 or the cooperative member shall be of low or moderate income  
14 and satisfy eligibility requirements prescribed by the Secre-  
15 tary, and—

16 “ (1) the homeowner shall be a mortgagor under a  
17 mortgage which meets the requirements of and is insured  
18 under subsection (i) or (j) (4) of this section: *Pro-*  
19 *vided*, That a mortgage meeting the requirements of sub-  
20 section (i) (3) (A) of this section but insured under  
21 section 237 may qualify for assistance payments if such  
22 mortgage was executed by a mortgagor determined not  
23 to be an acceptable credit risk for mortgage insurance  
24 purposes (but otherwise eligible) under subsection  
25 (j) (4) of this section or under section 221 (d) (2) or

234 (c) and accepted as a reasonably satisfactory credit risk under section 237; and

“(2) the cooperative association of which the family is a member shall operate a housing project, the construction or substantial rehabilitation of which has been financed with a mortgage insured under section 213 and which has been completed within two years prior to the filing of the application for assistance payments and the dwelling unit has had no previous occupant other than the family: *Provided*, That assistance payments may be made with respect to a dwelling unit in an existing cooperative project which meets such standards as the Secretary may prescribe, if the family qualifies as a displaced family as defined in section 221 (f), or a family which includes five or more minor persons, or a family occupying low-rent public housing: *Provided further*, That the amount of the mortgage attributable to the dwelling unit shall involve a principal obligation not in excess of \$15,000 (\$17,500 in any geographical area where the Secretary authorizes an increase on the basis of a finding that cost levels so require), except that with respect to any family with five or more persons the foregoing limits shall be \$17,500 and \$20,000, respectively.

“(c) The assistance payments to a mortgagee by the Secretary on behalf of a mortgagor shall be made during

1 such time as the mortgagor shall continue to occupy the prop-  
2 erty which secures the mortgage. The payment shall be in an  
3 amount not exceeding the lesser of—

4 “ (1) the balance of the monthly payment for prin-  
5 cipal, interest, taxes, insurance, and mortgage insur-  
6 ance premium due under the mortgage remaining unpaid  
7 after applying 20 per centum of the mortgagor's income :  
8 *Provided*, That, in determining a mortgagor's income  
9 for the purposes of this paragraph, there shall be de-  
10 ducted an amount equal to \$200 for each minor person  
11 who is a member of the immediate family of, and living  
12 with, the mortgagor, and the earnings of any such minor  
13 person shall not be included in the income of such mort-  
14 gagor ; or

15 “ (2) the difference between the amount of monthly  
16 payment for principal, interest, and mortgage insurance  
17 premium which the mortgagor is obligated to pay under  
18 the mortgage and the monthly payment for principal and  
19 interest which the mortgagor would be obligated to pay  
20 if the mortgage were to bear interest at the rate of 1  
21 per centum per annum.

22 “ (d) Assistance payments to a mortgagee by the  
23 Secretary on behalf of a family holding membership in a  
24 cooperative association operating a housing project shall be  
25 made only during such time as the family is an occupant of

1 such project and shall be in amounts computed on the basis  
2 of the formula set forth in subsection (c) applying the co-  
3 operative member's proportionate share of the obligations  
4 under the project mortgage to the items specified in the  
5 formula.

6 “(e) The Secretary may include in the payment to the  
7 mortgagee such amount, in addition to the amount computed  
8 under subsection (c), (d), or (j) (6), as he deems appro-  
9 priate to reimburse the mortgagee for its expenses in han-  
10 dling the mortgage.

11 “(f) Procedures shall be adopted by the Secretary  
12 for recertifications of the mortgagor's (or cooperative mem-  
13 ber's) income at intervals of two years (or at shorter in-  
14 tervals where the Secretary deems it desirable) for the  
15 purpose of adjusting the amount of such assistance payments  
16 within the limits of the formula described in subsection (c).

17 “(g) The Secretary shall prescribe such regulations as  
18 he deems necessary to assure that the sales price of, or other  
19 consideration paid in connection with, the purchase by a  
20 homeowner of the property with respect to which assistance  
21 payments are to be made is not increased above the ap-  
22 praised value on which the maximum mortgage which the  
23 Secretary will insure is computed

24 “(h) There are authorized to be appropriated such  
25 sums as may be necessary to carry out the provisions of this

1 section, including such sums as may be necessary to make the  
2 assistance payments under contracts entered into under this  
3 section. The aggregate amount of contracts to make such  
4 payments shall not exceed amounts approved in appropria-  
5 tions Acts, and payments pursuant to such contracts shall  
6 not exceed \$75,000,000 per annum prior to July 1, 1969,  
7 which maximum dollar amount shall be increased by \$100,-  
8 000,000 on July 1, 1969, by \$125,000,000 on July 1, 1970,  
9 by \$150,000,000 on July 1, 1971, and by \$150,000,000  
10 on July 1, 1972.

11 “(i) (1) The Secretary is authorized, upon applica-  
12 tion by the mortgagee, to insure a mortgage executed by a  
13 mortgagor who meets eligibility requirements for assistance  
14 payments prescribed by the Secretary under subsection (b).  
15 Commitments for the insurance of such mortgages may be  
16 issued by the Secretary prior to the date of their execution  
17 or disbursement thereon, upon such terms and conditions  
18 as the Secretary may prescribe.

19 “(2) To be eligible for insurance under this subsection,  
20 a mortgage shall meet the requirements of section 221  
21 (d) (2) or 234 (c), except as such requirements are modi-  
22 fied by this subsection.

23 “(3) The mortgage to be insured under this subsection  
24 shall—

25 “(A) involve a single-family dwelling which has

1        been approved by the Secretary prior to the beginning  
2        of construction or substantial rehabilitation or a one-  
3        family unit in a condominium project (together with  
4        an undivided interest in the common areas and facilities  
5        serving the project) which is released from a multi-  
6        family project, the construction or substantial rehabilita-  
7        tion of which has been completed within two years  
8        prior to the filing of the application for assistance pay-  
9        ments with respect to such family unit and the unit has  
10       had no previous occupant other than the mortgagor:  
11       *Provided*, That the mortgage may involve an existing  
12       dwelling or a family unit in an existing condominium  
13       project which meets such standards as the Secretary  
14       may prescribe, if the mortgagor qualifies as a displaced  
15       family as defined in section 221 (f), or a family which  
16       includes five or more minor persons, or a family occupy-  
17       ing low-rent public housing: *Provided further*, That the  
18       mortgage may involve a dwelling unit in an existing  
19       project covered by a mortgage insured under section 236  
20       or in an existing project receiving the benefits of finan-  
21       cial assistance under section 101 of the Housing and  
22       Urban Development Act of 1965;

23       “(B) where it is to cover a one-family unit in a  
24       condominium project, have a principal obligation not ex-  
25       ceeding \$15,000 (\$17,500 in any geographical area

1 where the Secretary authorizes an increase on the basis  
2 of a finding that cost levels so require), except that with  
3 respect to any family with five or more persons the fore-  
4 going limits shall be \$17,500 and \$20,000, respectively;  
5 and

6 “(C) be executed by a mortgagor who shall have  
7 paid (i) in the case of a displaced family, as defined in  
8 section 221 (f), at least \$200, or (ii), in the case of  
9 any other family, at least 3 per centum (or such larger  
10 amount as the Secretary may require) of the Secretary’s  
11 estimate of the cost of acquisition, in cash or its equiva-  
12 lent, which amount in either instance may be applied for  
13 the payment of settlement costs and initial payments for  
14 taxes, hazard insurance, mortgage insurance premiums,  
15 and other prepaid expenses.

16 “(j) (1) In addition to mortgages insured under the  
17 provisions of subsection (i), the Secretary is authorized,  
18 upon application by the mortgagee, to insure a mortgage  
19 (including advances under such mortgage during rehabilita-  
20 tion) which is executed by a nonprofit organization to finance  
21 the purchase and rehabilitation of deteriorating or substand-  
22 ard housing, for subsequent resale to low or moderate income  
23 home purchasers who meet eligibility requirements for  
24 assistance payments prescribed by the Secretary under sub-  
25 section (b). Commitments for the insurance of such mort-

gages may be issued by the Secretary prior to the date of their execution or disbursement thereon, upon such terms and conditions as the Secretary may prescribe.

“(2) To be eligible for insurance under paragraph (1) of this subsection, a mortgage shall—

“(A) be executed by a private nonprofit organization, approved by the Secretary, for the purpose of financing the purchase and rehabilitation (with the intention of subsequent resale) of property comprising one or more tracts or parcels, whether or not contiguous, consisting of (i) four or more single-family dwellings of detached, semidetached, or row construction, or (ii) four or more one-family units in a structure or structures for which a plan of family unit ownership approved by the Secretary is established;

“(B) be in a principal amount not exceeding the appraised value of the property at the time of its purchase under the mortgage plus the estimated cost of the rehabilitation;

“(C) bear interest (exclusive of premium charges for insurance and service charge, if any) at not to exceed such per centum per annum, on the amount of the principal obligation outstanding at any time, as the Secretary finds necessary to meet the mortgage market;

“(D) provide for complete amortization (subject to

1 paragraph (4) (E) ) by periodic payments within such  
2 term as the Secretary may prescribe; and

3 “(E) provide for the release of individual single-  
4 family dwellings from the lien of the mortgage upon their  
5 sale in accordance with paragraph (4) .

6 “(3) No mortgage shall be insured under paragraph  
7 (1) unless the mortgagor shall have demonstrated to the  
8 satisfaction of the Secretary that (A) the property to be re-  
9 habilitated is located in a neighborhood which is sufficiently  
10 stable and contains sufficient public facilities and amenities  
11 to support long-term values, or (B) the rehabilitation to be  
12 carried out by the mortgagor plus its related activities and  
13 the activities of other owners of housing in the neighborhood,  
14 together with actions to be taken by public authorities, will  
15 be of such scope and quality as to give reasonable promise  
16 that a stable environment will be created in the neighbor-  
17 hood.

18 “(4) (A) No mortgage shall be insured under para-  
19 graph (1) unless the mortgagor enters into an agreement,  
20 satisfactory to the Secretary, that it will offer to sell the  
21 dwellings involved, upon completion of their rehabilitation,  
22 to low or moderate income individuals or families meeting the  
23 requirements established by the Secretary under subsection  
24 (b) .

25 “(B) The Secretary is authorized to insure under this

1 paragraph mortgages executed to finance the sale of in-  
2 dividual dwellings to low or moderate income purchasers as  
3 provided in subparagraph (A). Any such mortgage shall—

4 “(i) be in a principal amount not in excess of that  
5 portion of the unpaid principal balance of the blanket  
6 mortgage covering the property which is allocable to the  
7 individual dwelling involved;

8 “(ii) bear interest at the same rate as the blanket  
9 mortgage; and

10 “(iii) provide for complete amortization by periodic  
11 payments within a term equal to the remaining term  
12 (determined without regard to subparagraph (E)) of  
13 such blanket mortgage.

14 “(C) The price for which any individual dwelling is sold  
15 under this paragraph shall be in an amount equal to that  
16 portion of the unpaid principal balance of the blanket mort-  
17 gage covering the property which is allocable to the dwelling  
18 plus such additional amount, not less than \$200 (which may  
19 be applied in whole or in part toward closing costs), as the  
20 Secretary may determine to be reasonable.

21 “(D) Upon the sale under this paragraph of any indi-  
22 vidual dwelling, such dwelling shall be released from the  
23 lien of the blanket mortgage. Until all of the individual  
24 dwellings in the property covered by the blanket mortgage  
25 have been sold, the mortgagor shall hold and operate the

1 dwellings remaining unsold at any given time, in such  
2 manner and under such terms as the Secretary may prescribe,  
3 as though they constituted rental units.

4 “(E) Upon the sale under this paragraph of all the  
5 individual dwellings in the property covered by the blanket  
6 mortgage and the release of all individual dwellings from  
7 the lien of the blanket mortgage, the insurance of the blanket  
8 mortgage shall be terminated and no adjusted premium  
9 charge shall be charged by the Secretary upon such  
10 termination.

11 “(5) Where the Secretary has approved a plan of  
12 family unit ownership, the terms ‘single-family dwelling’,  
13 ‘single-family dwellings’, ‘individual dwelling’, and ‘individ-  
14 ual dwellings’ shall mean a family unit or family units,  
15 together with the undivided interest (or interests) in the  
16 common areas and facilities.

17 “(6) In addition to the assistance payments authorized  
18 under subsection (b), the Secretary may make such pay-  
19 ments to a mortgagee on behalf of a nonprofit organization  
20 which is a mortgagor under the provisions of paragraph  
21 (1) in an amount not exceeding the difference between the  
22 monthly payment for principal, interest, and mortgage  
23 insurance premium which the mortgagor is obligated to pay  
24 under the mortgage and the monthly payment for principal  
25 and interest such mortgagor would be obligated to pay if the

1 mortgage were to bear interest at the rate of 1 per centum  
2 per annum.”

3 (b) (1) Section 221 (d) (2) (A) of the National Hous-  
4 ing Act is amended by—

5 (A) striking out “not to exceed (i) \$12,500”  
6 and inserting in lieu thereof “not to exceed (i)  
7 \$15,000 (or \$17,500, in the case of a family with five or  
8 more persons)”; and

9 (B) striking out “not to exceed \$15,000” in the  
10 second proviso and inserting in lieu thereof “not to  
11 exceed \$17,500 (or \$20,000 in the case of a family  
12 with five or more persons)”.

13 (2) Section 221 (d) (2) (B) of such Act is amended  
14 by—

15 (A) inserting “, in cash or its equivalent” before  
16 the semicolon after the words “acquisition cost” in the  
17 first proviso; and

18 (B) inserting before the semicolon at the end  
19 thereof the following: “: *Provided further*, That, if the  
20 mortgagor is the owner and an occupant of the property,  
21 such mortgagor shall to the maximum extent feasible  
22 be given the opportunity to contribute the value of his  
23 labor as equity in such dwelling”.

24 (c) (1) Section 221 (h) (1) of such Act is amended

1 by adding at the end thereof the following new sentence:  
2 “No mortgage shall be insured under this paragraph after  
3 the effective date of section 101 of the Housing and Urban  
4 Development Act of 1968, except pursuant to a commitment  
5 to insure issued before such date.”

6 (2) The purchase of any individual dwelling, sold by  
7 a nonprofit organization pursuant to the provisions of section  
8 221 (h) (5) of the National Housing Act after the effective  
9 date of this section, may be financed with a mortgage in-  
10 sured under the provisions of section 235 (j) (4) of such  
11 Act, but such mortgage shall bear interest at the rate pro-  
12 vided in section 235 (j) (2) (c) of such Act.

13 (d) Section 212 (a) of the National Housing Act is  
14 amended by inserting “or section 235 (j) (1)” after “sub-  
15 section (h) (1)” each place it appears.

16 (e) The Secretary of Housing and Urban Develop-  
17 ment is authorized to provide, or contract with public or  
18 private organizations to provide, such budget, debt manage-  
19 ment, and related counseling services to mortgagors whose  
20 mortgages are insured under section 235 (i) or 235 (j)  
21 (4) of the National Housing Act as he determines to be  
22 necessary to assist such mortgagors in meeting the respon-  
23 sibilities of homeownership. There are authorized to be  
24 appropriated such sums as may be necessary to carry out  
25 the provisions of this subsection.

## CREDIT ASSISTANCE

SEC. 102. (a) Title II of the National Housing Act is amended by adding after section 236 (as added by section 201 of this Act) the following new section:

## "SPECIAL MORTGAGE INSURANCE ASSISTANCE

"SEC. 237. (a) The purpose of this section is to help provide adequate housing for families of low and moderate income, including those who, for reasons of credit history, irregular income patterns caused by seasonal employment, or other factors, are unable to meet the credit requirements of the Secretary for the purchase of a single-family home financed by a mortgage insured under section 203, 220, 221, 234, or 235 (j) (4), but who, through the incentive of homeownership and counseling assistance, appear to be able to achieve homeownership.

"(b) The Secretary is authorized upon application by the mortgagee to insure under this section any mortgage meeting the requirements of this section.

"(c) To be eligible for insurance under this section, a mortgage shall—

"(1) meet the requirements of section 203, 220 (d) (3) (A), 221 (d) (2), 221 (i), 234 (c), or 235 (j) (4) except as such requirements are modified by this section;

"(2) involve a principal obligation (including such

1 initial service charges, appraisal, inspection, and other  
2 fees as the Secretary shall approve) in an amount not to  
3 exceed \$15,000: *Provided*, That the Secretary may in-  
4 crease the amount to not exceed \$17,500 in any geo-  
5 graphical area where he finds that cost levels so require:  
6 *Provided further*, That no mortgage meeting the re-  
7 quirements of section 203 (h) or 203 (i) shall be eligible  
8 for insurance under this section if its principal obligation  
9 is in excess of the maximum limits prescribed in such  
10 subsections;

11 “(3) be executed by a mortgagor who the Secre-  
12 tary has determined, after a full and complete study of  
13 the case, would not be an acceptable credit risk for mort-  
14 gage insurance purposes under section 203, 220, 221,  
15 234, or 235 (j) (4), because of his credit standing, debt  
16 obligations, total annual income, or income characteris-  
17 ties, but who the Secretary is satisfied would be a reason-  
18 ably satisfactory credit risk, consistent with the objec-  
19 tives stated in subsection (a), if he were to receive  
20 budget, debt management, and related counseling: *Pro-*  
21 *vided*, That, in determining whether the mortgagor is a  
22 reasonably satisfactory credit risk, the Secretary shall  
23 review credit histories of applicants giving special con-  
24 sideration to those delinquent accounts which were ulti-  
25 mately paid by the applicant and to extenuating factors

1 which may have caused credit accounts of the applicant  
2 to become delinquent; and the Secretary shall also give  
3 special consideration to income characteristics of appli-  
4 cants whose total income over the two years prior to  
5 their applications has remained at levels of eligibility  
6 (as required under paragraph (4) of this subsection),  
7 but who, because of the character of their seasonal em-  
8 ployment or for other reasons, have not maintained con-  
9 tinuous employment under one employer during that  
10 time; and

11 “(4) require monthly payments which, in combi-  
12 nation with local real estate taxes, do not exceed 25 per  
13 centum of the applicant’s income, based on his aver-  
14 age monthly income during the year prior to his applica-  
15 tion or the average monthly income during the three  
16 years prior to his application, whichever is higher.

17 “(d) The Secretary shall give preference in approving  
18 mortgage insurance applications under this section to families  
19 living in public housing units, especially those families re-  
20 quired to leave public housing because their incomes have  
21 risen beyond the maximum prescribed income limits, and  
22 families eligible for residence in public housing who have  
23 been displaced from federally assisted urban renewal areas.

24 “(e) The Secretary is authorized to provide, or contract

1 with public or private organizations to provide, such budget,  
 2 debt management, and related counseling services to mort-  
 3 gagors whose mortgages are insured under this section, as he  
 4 determines to be necessary to meet the objectives of this sec-  
 5 tion. The Secretary may also provide such counseling to  
 6 otherwise eligible families who lack sufficient funds to supply  
 7 a downpayment to help them to save an amount necessary  
 8 for that purpose.

9 “(f) The aggregate principal balance of all mortgages  
 10 insured under this section and outstanding at one time shall  
 11 not exceed \$200,000,000.

12 “(g) There are authorized to be appropriated such sums  
 13 as may be necessary to carry out the provisions of subsec-  
 14 tion (e) of this section.”

15 (b) Section 226 of the National Housing Act is amended  
 16 by inserting “235 (i), 237,” after “234,”.

17 RELAXATION OF MORTGAGE INSURANCE REQUIREMENTS

18 IN CERTAIN URBAN NEIGHBORHOODS

19 SEC. 103. (a) Section 223 of the National Housing Act  
 20 is amended by adding at the end thereof a new subsection as  
 21 follows:

22 “(e) Notwithstanding any of the provisions of this title,  
 23 and without regard to limitations upon eligibility contained in  
 24 any section of this title, the Secretary is authorized, upon ap-  
 25 plication by the mortgagee, to insure under any section of

1 this title, a mortgage executed in connection with the repair,  
 2 rehabilitation, construction, or purchase of property located  
 3 in an older, declining urban area in which the conditions are  
 4 such that one or more of the eligibility requirements appli-  
 5 cable to the section of this title under which insurance is  
 6 sought could not be met, if the Secretary finds that (1) the  
 7 area is reasonably viable, giving consideration to the need for  
 8 providing adequate housing for families of low and moderate  
 9 income in such area, and (2) the property is an acceptable  
 10 risk in view of such consideration. The insurance of a mort-  
 11 gage pursuant to this subsection shall be the obligation of the  
 12 Special Risk Insurance Fund.”

13 (b) Section 203 (1) of such Act is repealed.

14 SPECIAL RISK INSURANCE FUND

15 SEC. 104. (a) Title II of the National Housing Act is  
 16 amended by adding after section 237 (as added by section  
 17 102 of this Act) the following new section:

18 “PAYMENT OF INSURANCE—SPECIAL RISK INSURANCE  
 19 FUND

20 “SEC. 238. (a) (1) Any mortgagee under a mortgage  
 21 insured under section 235 (i), 235 (j) (4), or 237 of this title  
 22 shall be entitled to receive the benefits of the insurance as  
 23 provided in section 204 (a) with respect to mortgages insured  
 24 under section 203. The provisions of subsections (b), (c),  
 25 (d), (g), (j), and (k) of section 204 shall be applicable to

1 mortgages insured under section 235 (i), 235 (j) (4), or  
2 237, except that all references therein to the 'Mutual Mort-  
3 gage Insurance Fund' shall be construed to refer to the  
4 'Special Risk Insurance Fund' established by subsection (b)  
5 of this section, and all references therein to section 203 shall  
6 be construed to refer to the appropriate section.

7       “(2) Any mortgagee under a mortgage insured under  
8 section 235 (j) (1) or 236 shall be entitled to receive the  
9 benefits of insurance provided in section 207 (g) with  
10 respect to mortgages insured under section 207. The pro-  
11 visions of subsections (d), (e), (h), (i), (j), (k), (l),  
12 and (n) of section 207 shall be applicable to mortgages in-  
13 sured under section 235 (j) (1) or 236, except that all  
14 references therein to the 'General Insurance Fund' shall be  
15 construed to refer to the 'Special Risk Insurance Fund' and  
16 the premium charge provided in section 207 (d) shall be  
17 payable only in cash or debentures of the Special Risk  
18 Insurance Fund.

19       “(3) In lieu of the amount of insurance benefits com-  
20 puted pursuant to paragraph (1) or (2) of this subsection,  
21 the Secretary, in his discretion and in accordance with such  
22 regulations as he may prescribe, may (with respect to any  
23 mortgage loan acquired by him) compute and pay insur-  
24 ance benefits to the mortgagee in a total amount equal to the  
25 unpaid principal balance of the loan plus any accrued inter-

1 est and any advances approved by the Secretary and made  
2 previously by the mortgagee under the provisions of the  
3 mortgage.

4 “ (b) There is hereby created a ‘Special Risk Insurance  
5 Fund’ (hereinafter referred to as the ‘fund’) which shall be  
6 used by the Secretary as a revolving fund for carrying out  
7 the mortgage insurance obligations of sections 223 (e) , 235,  
8 236, and 237, and the Secretary is hereby authorized to  
9 advance to such fund the sum of \$5,000,000 from the Gen-  
10 eral Insurance Fund established pursuant to the provisions  
11 of section 519. Such advance shall be repayable at such  
12 times and at such rates of interest as the Secretary deems  
13 appropriate. Premium charges, adjusted premium charges,  
14 inspection and other fees, service charges, and any other  
15 income received by the Secretary under such sections, to-  
16 gether with all earnings on the assets of the fund, shall be  
17 credited to the fund. All payments made pursuant to claims  
18 of mortgagees with respect to mortgages insured under sec-  
19 tions 235, 236, and 237 or pursuant to section 223 (e) , cash  
20 adjustments, the principal of and interest paid on debentures  
21 which are the obligation of the fund, expenses incurred in  
22 connection with or as a consequence of the acquisition and  
23 disposal of property acquired under such sections, and all  
24 administrative expenses in connection with the mortgage  
25 insurance operations under such sections shall be paid out of

1 the fund. There is authorized to be appropriated such sums  
2 as may be needed from time to time to cover losses sustained  
3 by the fund in carrying out the mortgage insurance obliga-  
4 tions of sections 223 (e) , 235, 236, and 237. Moneys in the  
5 fund not needed for current operations of the fund shall be  
6 deposited with the Treasurer of the United States to the  
7 credit of the fund or invested in bonds or other obligations  
8 of, or in bonds or other obligations guaranteed by, the United  
9 States. The Secretary, with the approval of the Secretary of  
10 the Treasury, may purchase in the open market debentures  
11 which are the obligation of the fund. Such purchases shall be  
12 made at a price which will provide an investment yield of  
13 not less than the yield obtained from other investments au-  
14 thorized by this section. Debentures so purchased shall be  
15 canceled and not reissued.”

16 (b) Section 224 of the National Housing Act is amended  
17 by striking out “or section 233” and inserting in lieu thereof  
18 “section 233, or section 238”.

19 CONDOMINIUM AND COOPERATIVE OWNERSHIP FOR LOW  
20 AND MODERATE INCOME FAMILIES

21 SEC. 105. (a) Section 221 of the National Housing  
22 Act is amended by adding at the end thereof two new sub-  
23 sections as follows:

24 “(i) (1) The Secretary is authorized, with respect to  
25 any project involving a mortgage insured under subsection

1 (d) (3) which bears interest at the below-market interest  
2 rate prescribed in the proviso of subsection (d) (5), to per-  
3 mit a conversion of the ownership of such project to a plan  
4 of family unit ownership. Under such plan, each family  
5 unit shall be eligible for individual ownership and provision  
6 shall be included for the sale of the family units, together  
7 with an undivided interest in the common areas and facilities  
8 which serve the project, to low or moderate income pur-  
9 chasers. The Secretary shall obtain such agreements as he  
10 determines to be necessary to assure continued maintenance  
11 of the common areas and facilities. Upon such sale, the family  
12 unit and the undivided interest in the common areas shall  
13 be released from the lien of the project mortgage.

14 “(2) (A) The Secretary is authorized, upon applica-  
15 tion by the mortgagee, to insure under this subsection mort-  
16 gages financing the purchase of individual family units under  
17 the plan prescribed in paragraph (1). Commitments may be  
18 issued by the Secretary for the insurance of such mortgages  
19 prior to the date of their execution or disbursement thereon,  
20 upon such terms and conditions as the Secretary may pre-  
21 scribe. To be eligible for such insurance, the mortgage  
22 shall—

23 “(i) be executed by a mortgagor having an income  
24 within the limits prescribed by the Secretary for occu-  
25 pants of projects financed with a mortgage insured un-

1       der subsection (d) (3) which bears interest at the  
2       below-market rate prescribed in the proviso of subsec-  
3       tion (d) (5) ;

4           “(ii) involve a principal obligation (including such  
5       initial service charges, appraisal, inspection, and other  
6       fees as the Secretary shall approve) in an amount not to  
7       exceed the Secretary’s estimate of the appraised value  
8       of the family unit, including the mortgagor’s interest in  
9       the common areas and facilities, as of the date the mort-  
10      gage is accepted for insurance ;

11          “(iii) bear interest at a rate determined by the  
12       Secretary (which may vary in accordance with the  
13       regulations of the Secretary promulgated pursuant to  
14       the last sentence of paragraph (4) of this subsection)  
15       but no less than the below-market rate in effect under  
16       the proviso of subsection (d) (5) at the date of com-  
17       mitment for insurance ; and

18          “(iv) provide for complete amortization by periodic  
19       payments within such term as the Secretary may pre-  
20       scribe, but not to exceed the lesser of forty years or  
21       three-quarters of the Secretary’s estimate of the re-  
22       maining economic life of the building improvements.

23          “(B) The price for which the individual family unit  
24       is sold to the low or moderate income purchaser shall not  
25       exceed the appraised value of the property, as determined

1 under subparagraph (A) (ii), except that the purchaser  
2 shall be required to pay on account of the property at the  
3 time of purchase at least such amount, in cash or its equiva-  
4 lent (not less than 3 per centum of such price which may  
5 be applied in whole or in part toward closing costs), as the  
6 Secretary may determine to be reasonable and appropriate.

7 “(3) Upon the sale of all of the family units covered  
8 by the project mortgage, and the release of all of the family  
9 units (including the undivided interest allocable to each unit  
10 in the common areas and facilities) from the lien of the proj-  
11 ect mortgage, the insurance of the project mortgage shall be  
12 terminated and no adjusted premium charge shall be collected  
13 by the Secretary upon such termination.

14 “(4) Any mortgage covering an individual family unit  
15 insured under this paragraph shall contain a provision that,  
16 if the original mortgagor does not continue to occupy the  
17 property, the interest rate shall increase to the highest rate  
18 permissible under this section and the regulations of the  
19 Secretary effective at the time the commitment was issued  
20 for the insurance of the project mortgage; except that the  
21 requirement for an increase in interest rate shall not be appli-  
22 cable if the property is sold and the purchaser is (i) a non-  
23 profit purchaser approved by the Secretary, or (ii) a low  
24 or moderate income purchaser who has an income within  
25 the limits prescribed by the Secretary for occupants of proj-

1   ects financed with a mortgage insured under subsection  
 2   (d) (3) which bears interest at the below-market rate pre-  
 3   scribed in the proviso of subsection (d) (5). The mortgage  
 4   shall also contain a provision that, if the Secretary determines  
 5   the annual income of the original mortgagor (or a purchaser  
 6   as described in clause (ii) of this paragraph) has increased  
 7   to an amount enabling payment of a greater rate of interest,  
 8   the interest rate of the individual mortgage may be increased  
 9   up to the highest rate permissible under the regulations of  
 10  the Secretary for mortgages insured under this section effec-  
 11  tive at the time the commitment was issued for the insurance  
 12  of the mortgage.

13       “(5) For the purpose of this subsection, the term—

14           “(i) ‘mortgage’, when used in relation to a mort-  
 15       gage insured under paragraph (2) of this subsection,  
 16       includes a first mortgage given to secure the unpaid  
 17       purchase price of a fee interest in, or a long-term lease-  
 18       hold interest in, a one-family unit in a multifamily proj-  
 19       ect and an individed interest in the common areas and  
 20       facilities which serve the project; and

21           “(ii) ‘common areas and facilities’ includes the  
 22       land and such commercial, community, and other facili-  
 23       ties as are approved by the Secretary.

24       “(j) (1) The Secretary is authorized, with respect to  
 25  any rental project involving a mortgage insured under sub-

1 section (d) (3), which bears interest at the below-market  
2 interest rate prescribed in the proviso of subsection (d)  
3 (5), to permit a conversion of the ownership of such proj-  
4 ect to a cooperative approved by the Secretary. Member-  
5 ship in such cooperative shall be made available only to  
6 those families having an income within the limits prescribed  
7 by the Secretary for occupants of projects financed with a  
8 mortgage insured under subsection (d) (3) which bears  
9 interest at such below-market rate: *Provided*, That families  
10 residing in the rental project at the time of its conversion  
11 to a cooperative who do not meet such income limits may  
12 be permitted to become members in the cooperative under  
13 such special terms and conditions as the Secretary may  
14 prescribe.

15 “(2) The Secretary is authorized, upon application by  
16 the mortgagee, to insure under this subsection cooperative  
17 mortgages financing the purchase of projects meeting the  
18 requirements of paragraph (1). Commitments may be issued  
19 by the Secretary for the insurance of such mortgages prior  
20 to the date of their execution or disbursement thereon, upon  
21 such terms and conditions as the Secretary may prescribe. To  
22 be eligible for such insurance, the mortgage shall—

23 “(i) involve a principal obligation (including such  
24 initial service charges, appraisal, inspection, and other  
25 fees as the Secretary shall approve) in an amount

1 not exceeding the appraised value of the property for  
 2 continued use as a cooperative, which value shall be  
 3 based upon a mortgage amount on which the debt  
 4 service can be met from the income of the property  
 5 when operated on a nonprofit basis, after the payment  
 6 of all operating expenses, taxes, and required reserves;

7 “(ii) bear interest at the below-market rate pre-  
 8 scribed in the proviso of subsection (d) (5) ; and

9 “(iii) provide for complete amortization within  
 10 such terms as the Secretary may prescribe.”

11 (b) Section 221 (g) (1) of such Act is amended by  
 12 striking out “or paragraph (5) of subsection (h) of this  
 13 section” and inserting in lieu thereof “paragraph (5) of  
 14 subsection (h) of this section or paragraph (2) of subsec-  
 15 tion (i) of this section”.

16 (c) Section 221 (g) (2) of such Act is amended by  
 17 striking out “paragraph (1) of subsection (h)” and insert-  
 18 ing in lieu thereof “paragraph (1) of subsection (h) or  
 19 paragraph (2) of subsection (j) of this section,”.

20 ASSISTANCE TO NONPROFIT SPONSORS OF LOW AND

21 MODERATE INCOME HOUSING

22 SEC. 106. (a) The Secretary of Housing and Urban  
 23 Development is authorized to provide, or contract with pub-  
 24 lic or private organizations to provide, information, advice,  
 25 and technical assistance with respect to the construction, re-

1 habilitation, and operation by nonprofit organizations of  
2 housing for low or moderate income families. Assistance by  
3 the Secretary may include—

4           (1) the assembly, correlation, publication, and dis-  
5       semination of information with respect to the construc-  
6       tion, rehabilitation, and operation of low and moderate  
7       income housing, and

8           (2) providing advice and technical assistance with  
9       respect to the construction, rehabilitation, and operation  
10      of low and moderate income housing.

11       (b) (1) The Secretary is authorized to make loans to  
12 nonprofit organizations for the necessary expenses, prior to  
13 construction, in planning, and obtaining financing for, the re-  
14 habilitation or construction of housing for low or modern in-  
15 come families under any federally assisted program. Such  
16 loans shall be made without interest and shall not exceed 80  
17 per centum of the reasonable costs expected to be incurred in  
18 planning, and in obtaining financing for, such housing prior  
19 to the availability of financing, including, but not limited to,  
20 preliminary surveys and analyses of market needs, prelimi-  
21 nary site engineering and architectural fees, site acquisition,  
22 application and mortgage commitment fees, and construction  
23 loan fees and discounts. The Secretary shall require repay-  
24 ment of loans made under this subsection, under such terms  
25 and conditions as he may require, upon completion of the

1 project or sooner, and may cancel any part or all of a loan as  
2 he may determine cannot be recovered from the proceeds of  
3 any permanent loan made to finance the rehabilitation or  
4 construction of the housing.

5 (2) The Secretary shall determine prior to the making  
6 of any loan that the nonprofit organization meets such re-  
7 quirements with respect to financial responsibility and stabil-  
8 ity as he may prescribe.

9 (3) There is hereby authorized to be appropriated for  
10 the purposes of this subsection not to exceed \$7,500,000. All  
11 funds appropriated shall be deposited in a fund which shall  
12 be known as the Low and Moderate Income Sponsor Fund,  
13 which shall be available without fiscal year limitation and  
14 be administered by the Secretary as a revolving fund for  
15 carrying out the purposes of this subsection. Sums received  
16 in repayment of loans made under this subsection shall be  
17 deposited in such fund.

18 TITLE II—RENTAL HOUSING FOR LOW AND  
19 MODERATE INCOME FAMILIES

20 PART A—PRIVATE HOUSING

21 RENTAL AND COOPERATIVE HOUSING FOR LOW AND MODER-  
22 ATE INCOME FAMILIES

23 SEC. 201. (a) Title II of the National Housing Act is  
24 amended by adding after section 235 (as added by section  
25 101 of this Act) the following new section:

1 “RENTAL AND COOPERATIVE HOUSING FOR LOW AND MOD-  
2 ERATE INCOME FAMILIES

3 “SEC. 236. (a) For the purpose of reducing rentals for  
4 low and moderate income families, the Secretary is author-  
5 ized to make, and to contract to make, periodic interest  
6 reduction payments on behalf of the owner of a rental  
7 housing project designed for occupancy by low and moderate  
8 income families, which shall be accomplished through pay-  
9 ments to mortgagees holding mortgages meeting the special  
10 requirements specified in this section.

11 “(b) Interest reduction payments with respect to a  
12 project shall only be made during such time as the project  
13 is operated as a rental housing project and is subject to a  
14 mortgage which meets the requirements of, and is insured  
15 under, subsection (j) of this section.

16 “(c) The interest reduction payments to a mortgagee  
17 by the Secretary on behalf of a project owner shall be in  
18 an amount not exceeding the difference between the monthly  
19 payment for principal, interest, and mortgage insurance  
20 premium which the project owner as a mortgagor is obligated  
21 to pay under the mortgage and the monthly payment for  
22 principal and interest such project owner would be obligated  
23 to pay if the mortgage were to bear interest at the rate of  
24 1 per centum per annum.

25 “(d) The Secretary may include in the payment to the

1 mortgagee such amount, in addition to the amount computed  
2 under subsection (c), as he deems appropriate to reimburse  
3 the mortgagee for its expenses in handling the mortgage.

4 “(e) As a condition for receiving the benefits of in-  
5 terest reduction payments, the project owner shall operate  
6 the project in accordance with such requirements with re-  
7 spect to tenant eligibility and rents as the Secretary may  
8 prescribe. Procedures shall be adopted by the Secretary  
9 for review of tenant incomes at intervals of two years (or at  
10 shorter intervals where the Secretary deems it desirable).

11 “(f) For each dwelling unit there shall be established  
12 with the approval of the Secretary (1) a basic rental charge  
13 determined on the basis of operating the project with pay-  
14 ments of principal and interest due under a mortgage bear-  
15 ing interest at the rate of 1 per centum per annum; and (2)  
16 a fair market rental charge determined on the basis of op-  
17 erating the project with payments of principal, interest, and  
18 mortgage insurance premium which the mortgagor is obli-  
19 gated to pay under the mortgage covering the project. The  
20 rental for each dwelling unit shall be at the basic rental  
21 charge or such greater amount, not exceeding the fair mar-  
22 ket rental charge, as represents 25 per centum of the tenant’s  
23 income.

24 “(g) The project owner shall, as required by the Sec-  
25 retary, accumulate, safeguard, and periodically pay to the

1 Secretary all rental charges collected in excess of the basic  
2 rental charges. Such excess charges shall be deposited by  
3 the Secretary in a fund which may be used by him as a re-  
4 volving fund for the purpose of making interest reduction  
5 payments with respect to any rental housing project cov-  
6 ered by a mortgage insured under this section, subject to  
7 limits approved in appropriation acts pursuant to subsection  
8 (i). Moneys in such fund not needed for current operations  
9 may be invested in bonds or other obligations of the United  
10 States or in bonds or other obligations guaranteed as to prin-  
11 cipal and interest by the United States.

12 “(h) In addition to establishing the requirements speci-  
13 fied in subsection (e), the Secretary is authorized to make  
14 such rules and regulations, to enter into such agreements,  
15 and to adopt such procedures as he may deem necessary or  
16 desirable to carry out the provisions of this section.

17 “(i) There are authorized to be appropriated such sums  
18 as may be necessary to carry out the provisions of this sec-  
19 tion, including such sums as may be necessary to make  
20 interest reduction payments under contracts entered into  
21 under this section. The aggregate amount of contracts to  
22 make such payments shall not exceed amounts approved in  
23 appropriation Acts, and payments pursuant to such contracts  
24 shall not exceed \$75,000,000 per annum prior to July 1,

1 1969, which maximum dollar amount shall be increased by  
2 \$100,000,000 on July 1, 1969, by \$125,000,000 on July 1,  
3 1970, by \$150,000,000 on July 1, 1971, and by \$150,-  
4 000,000 on July 1, 1972.

5 “(j) (1) The Secretary is authorized, upon application  
6 by the mortgagee, to insure a mortgage (including advances  
7 on such mortgage during construction) which meets the re-  
8 quirements of this subsection. Commitments for the insur-  
9 ance of such mortgages may be issued by the Secretary prior  
10 to the date of their execution or disbursement thereon, upon  
11 such terms and conditions as he may prescribe.

12 “(2) As used in this subsection—

13 “(A) the terms ‘family’ and ‘families’ shall have  
14 the same meaning as in section 221;

15 “(B) the term ‘elderly or handicapped families’  
16 shall have the same meaning as in section 202 of the  
17 Housing Act of 1959; and

18 “(C) the terms ‘mortgage’, ‘mortgagee’, and ‘mort-  
19 gator’ shall have the same meaning as in section 201.

20 “(3) To be eligible for insurance under this subsection,  
21 a mortgage shall meet the requirements specified in subsec-  
22 tions (d) (1) and (d) (3) of section 221, except as such  
23 requirements are modified by this subsection. In the case of  
24 a project financed with a mortgage insured under this sub-  
25 section which involves a mortgagor other than a cooperative

1 or a private nonprofit corporation or association and which  
2 is sold to a cooperative or a nonprofit corporation or associa-  
3 tion, the Secretary is further authorized to insure under this  
4 subsection a mortgage given by such purchaser in an amount  
5 not exceeding the appraised value of the property at the time  
6 of purchase, which value shall be based upon a mortgage  
7 amount on which the debt service can be met from the  
8 income of the property when operated on a nonprofit basis,  
9 after payment of all operating expenses, taxes, and required  
10 reserves.

11 “(4) The mortgage to be insured under this subsection  
12 shall—

13 “(A) be executed by a private mortgagor eligible  
14 under subsection (d) (3) or (e) of section 221;

15 “(B) bear interest (exclusive of premium charges  
16 for insurance and service charges, if any) at not to ex-  
17 ceed such per centum per annum, on the amount of the  
18 principal obligation outstanding at any time, as the Sec-  
19 retary finds necessary to meet the mortgage market; and

20 “(C) provide for complete amortization by periodic  
21 payments within such term as the Secretary may  
22 prescribe.

23 “(5) The property or project shall—

24 “(A) comply with such standards and conditions as

1       (3) Section 227 (c) of such Act is amended by striking  
2 out "or section 233 (b) (2)" each place it appears and in-  
3 serting in lieu thereof "section 233, or section 236".

4       (c) The Secretary of Housing and Urban Develop-  
5 ment is authorized, upon such terms and conditions as he may  
6 prescribe, to transfer to section 236 (j) of the National  
7 Housing Act the insurance of a mortgage which has not  
8 been finally endorsed for insurance under section 221 (d) (3)  
9 of such Act and which has been approved for the below  
10 market interest rate prescribed in the proviso of section  
11 221 (d) (5) of such Act.

12       (d) The Secretary of Housing and Urban Develop-  
13 ment is authorized, upon such terms and conditions as he  
14 may prescribe, to insure under section 236 (j) of the Na-  
15 tional Housing Act a mortgage meeting the requirements of  
16 such section given to refinance a mortgage loan which was  
17 made under section 202 of the Housing Act of 1959: *Pro-*  
18 *vided*, That the application for such insurance is filed with  
19 the Secretary on or before the date of project completion,  
20 or within such reasonable time thereafter as the Secretary  
21 may permit.

22       (e) (1) Section 101 (g) of the Housing and Urban  
23 Development Act of 1965 is amended by striking out "and  
24 231 (c) (3)" and inserting in lieu thereof ", 231 (c) (3),  
25 and 236".

(2) Section 101 (j) (1) of such Act is amended by—

(A) striking out “and” at the end of subparagraph

(B) ;

(B) striking out the period at the end of subparagraph (C) and inserting in lieu thereof “; and”; and

(C) inserting a new subparagraph (D) to read as follows:

“(D) a private nonprofit corporation or other private nonprofit legal entity, a limited dividend corporation or other limited dividend legal entity, or a cooperative housing corporation, which is a mortgagor under a mortgage insured under section 236 (j) of the National Housing Act which has been approved for receiving the benefits of this section: *Provided*, That payments shall not be made with respect to more than 20 per centum of the dwelling units in any property so financed.”

INCREASED AUTHORIZATION FOR THE RENT SUPPLEMENT  
PROGRAM

SEC. 202. Section 101 (a) of the Housing and Urban Development Act of 1965 is amended by striking out everything after the word “exceed” the second time the word appears in the third sentence and inserting in lieu thereof the following: “\$150,000,000 per annum prior to July 1, 1969, which maximum dollar amount shall be increased by

1 \$40,000,000 on July 1, 1969, and by \$100,000,000 on  
2 July 1 in each of the years 1970, 1971, and 1972.”

3 PART B—LOW-RENT PUBLIC HOUSING

4 INCREASED LOW-RENT PUBLIC HOUSING AUTHORIZATION

5 SEC. 203. (a) Section 10(e) of the United States  
6 Housing Act of 1937 is amended by striking out in the  
7 first sentence “\$366,250,000 per annum, which limit shall  
8 be increased by \$47,000,000 on the date of enactment of  
9 the Housing and Urban Development Act of 1965, and by  
10 further amounts of \$47,000,000 on July 1 in each of the  
11 years 1966, 1967, and 1968, respectively,” and inserting  
12 in lieu thereof the following: “\$554,250,000 per annum,  
13 which limit shall be increased by \$100,000,000 on the date  
14 of enactment of the Housing and Urban Development Act  
15 of 1968 and by further amounts of \$150,000,000 on July 1  
16 in each of the years 1969 and 1970 and \$200,000,000 on  
17 July 1 in each of the years 1971 and 1972,”.

18 (b) Section 20 of such Act is amended by—

19 (1) striking out “not to exceed \$1,500,000,000”  
20 in the first sentence and inserting in lieu thereof “which  
21 shall not, unless authorized by the President, exceed  
22 \$1,500,000,000”; and

23 (2) inserting after the first sentence the following:  
24 “For the purpose of determining obligations incurred  
25 to make loans pursuant to this Act against any limita-

tion otherwise applicable with respect to such loans, the Secretary shall estimate the maximum amount to be loaned at any one time pursuant to loan agreements then outstanding with public housing agencies.”.

#### UPGRADING MANAGEMENT AND SERVICES IN PUBLIC

#### HOUSING PROJECTS

SEC. 204. Section 15 of the United States Housing Act of 1937 is amended by adding at the end thereof the following new paragraph:

“(10) The Secretary is authorized to enter into contracts to make grants to public housing agencies to assist, where necessary, in financing tenant services for families living in low-rent housing projects. There is authorized to be appropriated for this purpose not to exceed \$20,000,000 in fiscal year 1969 and such amounts in subsequent fiscal years as may be necessary. Any amounts so appropriated shall remain available until expended.”

#### PURCHASE OF UNITS BY TENANTS

SEC. 205. Section 15 (9) of the United States Housing Act of 1937 is amended by striking out “which is suitable by reason of its detached or semidetached construction” and inserting in lieu thereof “, if the property to be acquired is sufficiently separable from other property retained by the public housing agency to make it suitable”.

1 PUBLIC HOUSING IN INDIAN AREAS

2 SEC. 206. (a) Section 1 of the United States Housing  
3 Act of 1937 is amended by striking out “urban and rural  
4 nonfarm” in the first sentence and inserting in lieu thereof  
5 “urban, rural nonfarm, and Indian”.

6 (b) Section 10 (a) of such Act is amended by inserting  
7 “or Indian” after “nonfarm” in the fourth proviso.

8 TITLE III—FEDERAL HOUSING ADMINISTRA-  
9 TION INSURANCE OPERATIONS

10 MORTGAGE INSURANCE PREMIUMS FOR SERVICEMEN AND  
11 THEIR WIDOWS

12 SEC. 301. Section 222 of the National Housing Act is  
13 amended by—

14 (1) striking out “Secretary of the Treasury” each  
15 place it appears and inserting in lieu thereof “Secretary  
16 of Transportation”; and

17 (2) adding at the end thereof two new subsections  
18 as follows:

19 “(f) The Secretary is authorized to transfer to this sec-  
20 tion the insurance on any mortgage covering a single-family  
21 dwelling or a one-family unit in a condominium project in-  
22 sured under this Act, if the mortgage indebtedness thereof  
23 has been assumed by a serviceman who at the time of as-  
24 sumption is the owner of the property and either occupies the  
25 property or certifies that his failure to do so is the result of

1 his military assignment, or, in the case of the United States  
2 Coast Guard, other assignment.

3 “(g) Where a serviceman dies while on active duty in  
4 the Armed Forces of the United States or in the United  
5 States Coast Guard, leaving a surviving widow as owner of  
6 the property, the period of ownership (as such term is used  
7 in subsection (c) of this section) shall extend for two years  
8 beyond the date of the serviceman’s death or until the date  
9 the widow disposes of the property, whichever date occurs  
10 first. The Secretary of Defense or the Secretary of Transpor-  
11 tation, as the case may be, shall notify such widow promptly  
12 following the serviceman’s death of the additional costs to be  
13 borne by the mortgagor following termination of the two-  
14 year period.”

15 FLEXIBLE INTEREST RATES FOR MORTGAGE INSURANCE

16 PROGRAMS

17 SEC. 302. (a) Section 203 (b) (5) of the National  
18 Housing Act is amended to read as follows:

19 “(5) Bear interest (exclusive of premium charges for  
20 insurance and service charges if any) at not to exceed such  
21 per centum per annum, on the amount of the principal obli-  
22 gation outstanding at any time, as the Secretary finds neces-  
23 sary to meet the mortgage market.”

24 (b) The second paragraph of section 207 (c) (3) of  
25 such Act is amended by striking out “at not to exceed  $5\frac{1}{4}$

1 per centum per annum on the amount of the principal obliga-  
2 tion outstanding at any time” and inserting in lieu thereof “at  
3 not to exceed such per centum per annum, on the amount of  
4 the principal obligation outstanding at any time, as the Sec-  
5 retary finds necessary to meet the mortgage market”.

6 (c) The first sentence of section 213 (d) of such Act is  
7 amended by striking out “ $5\frac{1}{4}$  per centum” and all that fol-  
8 lows preceding the period and inserting in lieu thereof “such  
9 per centum per annum, on the amount of the principal obli-  
10 gation outstanding at any time, as the Secretary finds neces-  
11 sary to meet the mortgage market”.

12 (d) The second sentence of section 220 (d) (4) of such  
13 Act is amended by striking out “5 per centum” and all that  
14 follows preceding the period and inserting in lieu thereof  
15 “such per centum per annum, on the amount of the principal  
16 obligation outstanding at any time, as the Secretary finds  
17 necessary to meet the mortgage market”.

18 (e) Section 220 (h) (2) (iii) of such Act is amended  
19 by striking out “a rate prescribed by the Secretary, but not  
20 in excess of 6 per centum per annum of the amount of  
21 the principal obligation outstanding at any time” and insert-  
22 ing in lieu thereof “such per centum per annum, on the  
23 amount of the principal obligation outstanding at any time,  
24 as the Secretary finds necessary to meet market conditions”.

25 (f) Section 221 (d) (5) of such Act is amended by

1 striking out “5 per centum” and all that follows preceding  
2 the first semicolon and inserting in lieu thereof “such per  
3 centum per annum, on the amount of the principal obligation  
4 outstanding at any time, as the Secretary finds necessary to  
5 meet the mortgage market”.

6 (g) Section 231 (c) (6) of such Act is amended by  
7 striking out “5 per centum” and all that follows preceding  
8 the semicolon and inserting in lieu thereof “such per centum  
9 per annum, on the amount of the principal obligation out-  
10 standing at any time, as the Secretary finds necessary to  
11 meet the mortgage market”.

12 (h) Section 232 (d) (3) (B) of such Act is amended  
13 by striking out “5 per centum” and all that follows preceding  
14 the period and inserting in lieu thereof “such per centum per  
15 annum, on the amount of the principal obligation outstanding  
16 at any time, as the Secretary finds necessary to meet the  
17 mortgage market”.

18 (i) The first sentence of section 234 (f) of such Act  
19 is amended by striking out “5 $\frac{1}{4}$  per centum” and all that  
20 follows preceding the period and inserting in lieu thereof  
21 “such per centum per annum, on the amount of the prin-  
22 cipal obligation outstanding at any time, as the Secretary  
23 finds necessary to meet the mortgage market”.

24 (j) Section 1101 (c) (4) of such Act is amended by  
25 striking out “5 per centum” and all that follows preceding

1 the period and inserting in lieu thereof "such per centum  
2 per annum, on the amount of the principal obligation out-  
3 standing at any time, as the Secretary finds necessary to  
4 meet the mortgage market".

5       MODIFICATIONS IN TERMS OF INSURED MORTGAGES

6               COVERING MULTIFAMILY PROJECTS

7       SEC. 303. Title II of the National Housing Act is  
8 amended by adding after section 238 (as added by section  
9 104 of this Act) the following section:

10      "MODIFICATIONS IN TERMS OF INSURED MORTGAGES

11               COVERING MULTIFAMILY PROJECTS

12      "SEC. 239. (a) The Secretary shall not consent to any  
13 request for an extension of the time for curing a default under  
14 any mortgage covering multifamily housing, as defined in the  
15 regulations of the Secretary, or for a modification of the terms  
16 of such mortgage, except in conformity with regulations pre-  
17 scribed by the Secretary in accordance with the provisions  
18 of this section. Except as otherwise hereinafter provided, such  
19 regulations shall require as a condition to the granting of any  
20 such request, that, during the period of such extension or  
21 modification, any part of the rents or other funds derived by  
22 the mortgagor from the property covered by the mortgage  
23 which is not required to meet actual and necessary expenses  
24 arising in connection with the operation of such property,  
25 including amortization charges under the mortgage, be held

1 in trust by the mortgagor and distributed only with the con-  
2 sent of the Secretary. In prescribing regulations under this  
3 section the Secretary may provide for the granting of con-  
4 sent to any request for an extension of the time for curing  
5 a default under any mortgage covering multifamily housing,  
6 or for a modification of the terms of such mortgage, without  
7 regard to the foregoing requirement, in any case or class of  
8 cases in which an exemption from such requirement does not  
9 (as determined by the Secretary) jeopardize the interests  
10 of the United States.

11 “(b) Whoever, as an owner of a property which is  
12 security for a mortgage described in subsection (a), or as  
13 a stockholder of a corporation owning such property, or as  
14 a beneficial owner under any business organization or trust  
15 owning such property, or as an officer, director, or agent of  
16 any such owner, (1) willfully uses or authorizes the use of  
17 any part of the rents or other funds derived from property  
18 covered by such mortgage in violation of a regulation pre-  
19 scribed by the Secretary under subsection (a), or (2) if  
20 such mortgage is determined, as provided in subsection (a),  
21 to be exempt from the requirement of any such regulation  
22 or is not otherwise covered by such regulation, willfully and  
23 knowingly uses or authorizes the use, while such mortgage is  
24 in default, of any part of the rents or other funds derived from  
25 the property covered by such mortgage for any purpose other

1 than to meet actual and necessary expenses arising in con-  
 2 nection with such property (including amortization charges  
 3 under the mortgage), shall be fined not more than \$5,000  
 4 or imprisoned not more than three years, or both."

#### 5 CONDOMINIUMS

6 SEC. 304. (a) Section 234 (c) of the National Housing  
 7 Act is amended by striking out "rental housing, and (3)"  
 8 in the first sentence and inserting in lieu thereof the following  
 9 new proviso: "rental housing: *Provided*, That a one-family  
 10 unit in a multifamily project involving eleven or less units  
 11 shall be eligible for insurance without having been covered  
 12 by a project mortgage, and (3)".

13 (b) Section 234 (c) of such Act is further amended by  
 14 striking out "(iii) 75 per centum" in the third sentence,  
 15 and inserting in lieu thereof "(iii) 80 per centum".

16 (c) Section 234 (f) of such Act is amended by strik-  
 17 ing "five" and inserting in lieu thereof "four".

#### 18 INSURANCE OF LOANS FOR PURCHASE OF FEE SIMPLE

#### 19 TITLE FROM LESSORS

20 SEC. 305. (a) Title II of the National Housing Act  
 21 is amended by adding after section 239 (as added by sec-  
 22 tion 303 of this Act) the following section:

23 "PURCHASE OF FEE SIMPLE TITLE FROM LESSORS

24 "SEC. 240. (a) The Secretary is authorized, upon such  
 25 terms and conditions as he may prescribe, to make commit-

1   ments to insure and to insure loans made by financial insti-  
2   tutions for the purpose of financing purchases by home-  
3   owners of the fee simple title to property on which their  
4   homes are located.

5       “(b) As used in this section—

6           “(1) the term ‘financial institution’ means a lender  
7   approved by the Secretary as eligible for insurance  
8   under section 2 or a mortgagee approved under section  
9   203 (b) (1) ; and

10          “(2) the term ‘homeowner’ means a lessee under a  
11   long-term ground lease,

12       “(c) To be eligible for insurance under this section, a  
13   loan shall—

14           “(1) relate to property on which there is located  
15   a dwelling designed principally for a one-, two-, three-,  
16   or four-family residence;

17           “(2) not exceed the cost of purchasing the fee  
18   simple title, or \$10,000 per family unit, whichever is  
19   the lesser;

20           “(3) be limited to an amount which when added  
21   to any outstanding indebtedness related to the property  
22   (as determined by the Secretary) creates a total out-  
23   standing indebtedness which does not exceed the mort-  
24   gage limits prescribed in section 203 (b) ;

1           “(4) bear interest at not to exceed such per centum  
2       per annum, on the amount of the principal obligation out-  
3       standing at any time, as the Secretary finds necessary  
4       to meet market conditions, and such other charges (in-  
5       cluding such service charge, appraisal, inspection, and  
6       other fees) as may be approved by the Secretary;

7           “(5) have a maturity satisfactory to the Secretary,  
8       but not to exceed twenty years from the beginning of  
9       amortization of the loan or three-quarters of the remain-  
10      ing economic life of the home, whichever is the lesser;  
11      and

12          “(6) comply with such other terms, conditions, and  
13      restrictions as the Secretary may prescribe.

14          “(d) The provisions of paragraphs (3), (5), (6), (7),  
15      (8), and (10) of section 220 (h) shall be applicable to loans  
16      insured under this section and, as applied to loans insured  
17      under this section, references in those paragraphs to ‘home  
18      improvement loans’ and ‘this subsection’ shall be construed  
19      to refer to loans under this section.”

20          (b) Section 5 (c) of the Home Owners Loan Act of  
21      1933, as amended (12 U.S.C. 1464 (c) ), is amended by  
22      adding immediately before the last paragraph the following  
23      new paragraph:

24          “Notwithstanding any other provisions of this subsec-  
25      tion, an association may invest in loans or obligations, or in-

1 terests therein, as to which the association has the benefit of  
2 insurance under section 240 of the National Housing Act, or  
3 of a commitment or agreement therefor, and such invest-  
4 ments shall not be included in any percentage of assets or  
5 other percentage referred to in this subsection.”

6 EXTEND SECTION 221(d)(2) SALES HOUSING PROGRAM FOR

7 TWO-, THREE-, AND FOUR-FAMILY RESIDENCES TO ALL

8 LOW AND MODERATE INCOME FAMILIES

9 SEC. 306. Section 221 (d) (2) of the National Housing  
10 Act is amended by striking out “a displaced family” at the  
11 end of the first proviso and inserting in lieu thereof “the  
12 mortgagor”.

13 REMOVE DIVIDEND RESTRICTION FOR NONDWELLING FACIL-

14 ITIES IN SECTION 221 PROJECTS

15 SEC. 307. Section 221 (f) of the National Housing Act  
16 is amended by striking out in the first sentence all that fol-  
17 lows the word “mortgage” in the proviso and inserting in  
18 lieu thereof “: *Provided further*, That, in the case of a mort-  
19 gage which bears interest at the below-market interest rate  
20 prescribed in the proviso of subsection (d) (5), the pro-  
21 visions of section 220 (d) (B) (iv) shall only apply if the  
22 mortgagor waives the right to receive dividends on its equity  
23 investment in the portion thereof devoted to commercial  
24 facilities.”

1 SUPPLEMENTAL LOAN PROGRAM FOR PROJECTS FINANCED  
2 WITH FEDERAL HOUSING ADMINISTRATION INSURED  
3 MORTGAGES

4 SEC. 308. Section 223 of the National Housing Act is  
5 amended by adding after subsection (e) (as added by sec-  
6 tion 103 of this Act) the following new subsection:

7 “(f) (1) With respect to a multifamily project or group  
8 practice facility covered by a mortgage insured under any  
9 section or title of this Act, the Secretary is authorized, upon  
10 such terms and conditions as he may prescribe, to make  
11 commitments to insure, and to insure, supplementary loans  
12 (including advances during construction or improvement)  
13 made by financial institutions approved by the Secretary.  
14 As used in this subsection, ‘supplementary loan’ means a  
15 loan, advance of credit, or purchase of an obligation repre-  
16 senting a loan or advance of credit made for the purpose of  
17 financing improvements or additions to such project: *Pro-*  
18 *vided*, That a loan involving a nursing home covered by a  
19 mortgage insured under section 232 or a loan involving a  
20 group practice facility covered by a mortgage insured under  
21 title XI may also be made for the purpose of financing equip-  
22 ment to be used in the operation of such nursing home or  
23 facility.

24 “(2) To be eligible for insurance under this subsection,  
25 a supplementary loan shall—

1           “(A) be limited to 90 per centum of the amount  
2       which the Secretary estimates will be the value of such  
3       improvements, additions, and equipment, except that  
4       such amount, when added to the outstanding balance of  
5       the mortgage covering the project or facility, shall not  
6       exceed the maximum mortgage amount insurable under  
7       the section or title pursuant to which the mortgage cover-  
8       ing such project or facility is insured;

9           “(B) have a maturity satisfactory to the Secretary  
10      but not to exceed the remaining term of the mortgage;

11          “(C) bear interest (exclusive of premium charges  
12      for insurance and service charges, if any) at not to ex-  
13      ceed such per centum per annum, on the amount of the  
14      principal obligation outstanding at any time, as the  
15      Secretary finds necessary to meet market conditions.

16          “(D) be secured in such manner as the Secretary  
17      may require; and

18          “(E) contain such other terms, conditions, and  
19      restrictions as the Secretary may prescribe.

20          “(3) The provisions of subsections (d), (e), (g), (h),  
21      (i), (j), (k), (l), and (n) of section 207 shall be appli-  
22      cable to loans insured under this subsection, except that (A)  
23      all references to the term ‘mortgage’ shall be construed to  
24      refer to the term ‘loan’ as used in this subsection, (B) loans

1 involving projects covered by a mortgage insured under sec-  
 2 tion 213 that is the obligation of the Cooperative Manage-  
 3 ment Housing Insurance Fund shall be insured under and  
 4 shall be the obligation of such fund, and (C) loans involving  
 5 projects covered by a mortgage insured under section 236  
 6 shall be insured under and shall be the obligation of the Spe-  
 7 cial Risk Insurance Fund.”

8 HOME IMPROVEMENT LOANS—INCREASE IN MAXIMUM  
 9 MATURITY, FINANCE CHARGE, AND LOAN AMOUNT

10 SEC. 309. Section 2 (b) of the National Housing Act is  
 11 amended by—

12 (1) striking out “\$3,500” and inserting in lieu  
 13 thereof “\$5,000”;

14 (2) striking out “five years” and inserting in lieu  
 15 thereof “seven years”;

16 (3) striking out “\$5 discount” and inserting in lieu  
 17 thereof “\$5.50 discount”; and

18 (4) striking out “\$4 discount” and inserting in lieu  
 19 thereof “\$4.50 discount”.

20 EXPERIMENTAL HOUSING PROGRAM

21 SEC. 310. Section 233 of the National Housing Act is  
 22 amended by—

23 (1) striking out “of this title” immediately before  
 24 the semicolon in subsection (b) and inserting in lieu  
 25 thereof “or titles of this Act”; and

(2) striking out “of this title” in subsection (e) and inserting in lieu thereof “or title of this Act”.

TERM OF FEDERAL HOUSING ADMINISTRATION MORTGAGES  
FOR LAND DEVELOPMENT

SEC. 311. Section 1002 (d) (1) of the National Housing Act is amended by striking out “(A) in the case of a privately owned system for water or sewerage, and (B) in the case of a new community approved under section 1004”.

REHABILITATED MULTIFAMILY PROJECTS IN URBAN RE-  
NEWAL AREAS

SEC. 312. (a) Section 220 (d) (3) (B) (ii) of the National Housing Act is amended by inserting immediately preceding the semicolon at the end thereof “: *Provided further*, That the mortgage may involve the financing of the purchase of property which has been rehabilitated by a local public agency with Federal assistance pursuant to section 110 (c) (8) of the Housing Act of 1949, and, in such case, the foregoing limitations upon the amount of the mortgage shall be based upon the appraised value of the property as of the date the mortgage is accepted for insurance”.

(b) Section 221 (d) (3) (iii) of the National Housing Act is amended by inserting immediately preceding the colon at the end of the first proviso “: *Provided further*, That the mortgage may involve the financing of the purchase of prop-

erty which has been rehabilitated by a local public agency with Federal assistance pursuant to section 110(c) (8) of the Housing Act of 1949, and, in such case, the amount of the mortgage shall not exceed the appraised value of the property as of the date the mortgage is accepted for insurance”.

MISCELLANEOUS HOUSING INSURANCE

SEC. 313. Section 223 of the National Housing Act is amended by—

(1) striking out the text in subsection (a) which precedes the first numbered clause and inserting in lieu thereof the following:

“(a) Notwithstanding any of the provisions of this Act and without regard to limitations upon eligibility contained in any section or title of this Act, the Secretary is authorized, upon application by the mortgagee, to insure or make commitments to insure under any section or title of this Act any mortgage—”;

(2) striking out in the first and second provisos of subsection (a) (7) “applicable to loans insured under section 203, 207, 213, 220, 221, 222, 231, 232, or 233, as the case may be” and inserting in lieu thereof “prescribed under the applicable section or title of this Act”;

(3) striking out in subsection (c) each time it

1 appears “this title” and inserting in lieu thereof “this  
2 Act”;

3 (4) striking out in subsection (c) “title I, title II,  
4 title VI, title VII, title VIII, or title IX” and in-  
5 serting in lieu thereof “any section or title of this  
6 Act”; and

7 (5) striking out at the end of subsection (c)  
8 “(except that in any case the payment of insurance  
9 shall be in debentures)”.

10 SUPPLEMENTARY LOANS FOR COOPERATIVE HOUSING PUR-  
11 CHASED FROM THE FEDERAL GOVERNMENT

12 SEC. 314. Section 213 (j) of the National Housing Act  
13 is amended by—

14 (1) inserting after the first sentence of paragraph  
15 (1) the following sentence: “The Secretary is further  
16 authorized to make commitments to insure and to insure  
17 supplementary cooperative loans (including advances  
18 during construction or improvement) with respect to  
19 any property purchased from the Federal Government  
20 by a nonprofit corporation or trust of the character  
21 described in paragraph (1) of subsection (a), if the  
22 property is covered by an uninsured mortgage repre-  
23 senting a part of the purchase price.”; and

24 (2) adding before the semicolon at the end of par-

1       agraph (2) (B) the following: “, except that, in the  
 2       case of repairs or improvements to a property covered by  
 3       an uninsured mortgage dated more than twenty years  
 4       prior to the date of the commitment to insure, of such  
 5       magnitude that the Secretary deems them to be a major  
 6       rehabilitation or modernization of such property, the loan  
 7       may have a maturity date up to ten years in excess of  
 8       the remaining term of the uninsured mortgage”.

9                               EQUIPMENT IN NURSING HOMES

10       SEC. 315. Section 232 of the National Housing Act is  
 11       amended by—

12               (1) striking out the text of subsection (b) (2) and  
 13       inserting in lieu thereof the following:

14               “(2) the term ‘mortgage’ means a first mortgage  
 15       on real estate in fee simple, or on the interest of either  
 16       the lessor or lessee thereof (A) under a lease for not  
 17       less than ninety-nine years which is renewable, or (B)  
 18       under a lease having a period of not less than fifty years  
 19       to run from the date the mortgage was executed. The  
 20       term ‘first mortgage’ means such classes of first liens as  
 21       are commonly given to secure advances (including but  
 22       not limited to advances during construction), on, or the  
 23       unpaid purchase price of, real estate under the laws of  
 24       the State in which the real estate is located, together

1 with the credit instrument or instruments, if any, secured  
2 thereby, and any mortgage may be in the form of one or  
3 more trust mortgages or mortgage indentures or deeds  
4 of trust, securing notes, bonds, or other credit instru-  
5 ments, and, by the same instrument or by a separate  
6 instrument, may create a security interest in initial  
7 equipment, whether or not attached to the realty. The  
8 term 'mortgagor' shall have the meaning set forth in  
9 section 207 (a) of this Act.”;

10 (2) striking out the text in subsection (d) which  
11 precedes the first numbered clause and inserting in lieu  
12 thereof the following:

13 “(d) In order to carry out the purposes of this  
14 section, the Secretary is authorized to insure any  
15 mortgage which covers a new or rehabilitated nursing  
16 home, including equipment to be used in its operation,  
17 subject to the following conditions:”; and

18 (3) striking out “when the proposed improvements  
19 are completed” before the period at the end of subsection  
20 (d) (2) and inserting in lieu thereof the following:  
21 “, including equipment to be used in the operation of the  
22 nursing home, when the proposed improvements are  
23 completed and the equipment is installed”.

1 TITLE IV—GUARANTEES FOR FINANCING NEW  
2 COMMUNITY LAND DEVELOPMENT

3 CITATION

4 SEC. 401. This title may be referred to as the “New  
5 Communities Act of 1968.”

6 PURPOSE

7 SEC. 402. It is the purpose of this title, by facilitating  
8 the enlistment of private capital in new community develop-  
9 ment, to encourage the development of new communities  
10 that—

11 (1) contribute to the general betterment of living  
12 conditions through the improved quality of community  
13 development made possible by a consistent design for  
14 the provision of homes, commercial and industrial facili-  
15 ties, public and community facilities, and open spaces;

16 (2) make substantial contributions to the sound  
17 and economic growth of the areas in which they are  
18 located;

19 (3) provide needed additions to the general housing  
20 supply;

21 (4) provide opportunities for innovation in hous-  
22 ing and community development technology and in land  
23 use planning;

24 (5) enlarge housing and employment opportunities  
25 by increasing the range of housing choice and providing

new investment opportunities for industry and commerce; and

(6) encourage the maintenance and growth of a diversified local homebuilding industry.

#### GUARANTEE AUTHORITY

SEC. 403. To carry out the purposes of this title the Secretary is authorized to guarantee, and enter into commitments to guarantee, the bonds, debentures, notes, and other obligations issued by new community developers to help finance new community development projects. The Secretary may make such guarantees and enter into such commitments, subject to the limitations contained in sections 404 and 405, upon such terms and conditions as he may prescribe, taking into account (1) the large initial capital investment required to finance sound new communities, (2) the extended period before initial returns on this type of investment can be expected, (3) the irregular pattern of cash returns characteristic of such investment, and (4) the financial and security interests of the United States in connection with guarantees made under this title.

#### ELIGIBLE NEW COMMUNITY DEVELOPMENT

SEC. 404. No guarantee or commitment to guarantee may be made under this title unless the Secretary has determined that—

(1) the proposed new community (A) will be

1 economically feasible in terms of economic base or po-  
2 tential for growth, and (B) will contribute to the  
3 orderly growth and development of the area of which it  
4 is a part;

5 (2) there is a practicable plan (including appropri-  
6 ate time schedules) for financing the land acquisition and  
7 land development costs of the proposed new community  
8 and for improving and marketing the land which, giving  
9 due consideration to the public purposes of this title and  
10 the special problems involved in financing new com-  
11 munities, represents an acceptable financial risk to the  
12 United States;

13 (3) there is a sound internal development plan for  
14 the new community which (A) has received all govern-  
15 mental approvals required by State or local law or by  
16 the Secretary; and (B) is acceptable to the Secretary as  
17 providing reasonable assurance that the development  
18 will contribute to good living conditions in the area being  
19 developed, will be characterized by sound land use pat-  
20 terns, will include a proper balance of housing for fami-  
21 lies of low and moderate income, and will include or be  
22 served by such shopping, school, recreational, transpor-  
23 tation, and other facilities as the Secretary deems satis-  
24 factory; or

25 (4) the internal development plan is consistent with

1 a comprehensive plan which covers, or with comprehen-  
2 sive planning being carried on for, the area in which the  
3 land is situated, and which meets criteria established by  
4 the Secretary for such comprehensive plans or planning.

5 ELIGIBLE OBLIGATIONS

6 SEC. 405. (a) Any bond, debenture, note or other obli-  
7 gation guaranteed under this title shall—

8 (1) be issued by a new community developer, other  
9 than a public body, approved by the Secretary on the  
10 basis of financial, technical and administrative ability  
11 which demonstrates his capacity to carry out the pro-  
12 posed project;

13 (2) be issued to and held by investors approved  
14 by, or meeting requirements prescribed by, the Secre-  
15 tary, or if an offering to the public is contemplated, be  
16 underwritten upon terms and conditions approved by  
17 the Secretary;

18 (3) be issued to finance a program of land devel-  
19 opment (including acquisition or use of land) approved  
20 by the Secretary: *Provided*, That the Secretary may,  
21 through cost certification procedures, escrow or trustee-  
22 ship requirements, or other means, insure that all pro-  
23 ceeds from the sale of obligations guaranteed under this  
24 title are expended pursuant to such program;

25 (4) involve a principal obligation in an amount

1 not to exceed the lesser of (A) 80 per centum of the  
 2 Secretary's estimate of the value of the property upon  
 3 completion of the land development or (B) the sum  
 4 of 75 per centum of the Secretary's estimate of the  
 5 value of the land before development and 90 per centum  
 6 of his estimate of the actual cost of the land development;

7 (5) bear interest at a rate satisfactory to the Sec-  
 8 retary, such interest to be exclusive of any service  
 9 charges and fees that may be approved by the Secretary;

10 (6) contain repayment and maturity provisions sat-  
 11 isfactory to the Secretary; and

12 (7) contain such provisions with respect to protec-  
 13 tion of the security interests of the United States (in-  
 14 cluding subrogation provisions), liens and releases of  
 15 liens, payment of taxes, and other matters as the Secre-  
 16 tary may, in his discretion, prescribe.

17 (b) The outstanding principal obligations guaranteed  
 18 under this title with respect to a single new community  
 19 development project shall at no time exceed \$50,000,000.

#### 20 FEES AND CHARGES

21 SEC. 406. The Secretary is authorized to establish and  
 22 collect fees for guarantees made under this title and may  
 23 make such charges as he considers reasonable for the analy-  
 24 sis of development and financing plans and for appraisals  
 25 and inspections related to new community development proj-

1   ects. On or before January 1, 1970, the Secretary shall  
2   make a report to the Congress concerning the fees and other  
3   charges under this title that he estimates will be adequate to  
4   provide income sufficient for a self-supporting program.

5                                   GUARANTEE FUND

6       SEC. 407. (a) To provide for the payment of any lia-  
7   bilities incurred as a result of guarantees made under this  
8   title, the Secretary is authorized to establish a revolving fund  
9   which shall be comprised of (1) receipts from fees and  
10  charges; (2) recoveries under security or subrogation rights  
11  or other rights, and any other receipts obtained in connection  
12  with such guarantees; and (3) such sums, which are hereby  
13  authorized to be appropriated, as may be required for pro-  
14  gram operations and nonadministrative expenses and to make  
15  any and all payments guaranteed under this title.

16       (b) The full faith and credit of the United States is  
17  pledged to the payment of all guarantees made under this  
18  title with respect to both principal and interest, including  
19  interest, as may be provided for in the guarantee, accruing  
20  between the date of default under a guaranteed obligation  
21  and the payment in full of the guarantee.

22       (c) Notwithstanding any other provision of law relating  
23  to the acquisition, handling, improvement, or disposal of real  
24  and other property by the United States, the Secretary shall

1 have power, for the protection of the interests of the guaran-  
2 tee fund authorized under this section, to pay out of such  
3 fund all expenses or charges in connection with the acqui-  
4 sition, handling, improvement, or disposal of any property  
5 acquired by him under this title; and notwithstanding any  
6 other provision of law, the Secretary shall also have power to  
7 pursue to final collection by way of compromise or other-  
8 wise all claims acquired by him in connection with any se-  
9 curity, subrogation, or other rights obtained by him in carry-  
10 ing out this title.

11 (d) The aggregate of the outstanding principal obliga-  
12 tions guaranteed under this title shall at no time exceed  
13 \$500,000,000.

14 INCONTESTABILITY

15 SEC. 408. Any guarantee made by the Secretary under  
16 this title shall be conclusive evidence of the eligibility of the  
17 obligations for such guarantee, and the validity of any guar-  
18 antee so made shall be incontestable in the hands of a quali-  
19 fied holder of the guaranteed obligation except for fraud or  
20 material misrepresentation on the part of such holder.

21 ENCOURAGEMENT OF SMALL BUILDERS

22 SEC. 409. The Secretary shall adopt such requirements  
23 as he deems necessary to assure that new community con-  
24 struction assisted under this title will encourage the mainte-

1 nance of a diversified local homebuilding industry and broad  
2 participation by builders, particularly small builders.

### 3 LABOR

4 SEC. 410. All laborers and mechanics employed by con-  
5 tractors or subcontractors in land development assisted under  
6 section 403 shall be paid wages at rates not less than those  
7 prevailing on similar construction in the locality as deter-  
8 mined by the Secretary of Labor in accordance with the  
9 Davis-Bacon Act, as amended (40 U.S.C. 276a—276a-5).  
10 No assistance shall be extended under section 403 for land  
11 development without first obtaining adequate assurance that  
12 these labor standards will be maintained upon the construc-  
13 tion work involved in such development. The Secretary of  
14 Labor shall have, with respect to the labor standards specified  
15 in this section, the authority and functions set forth in Reor-  
16 ganization Plan Numbered 14 of 1950 (64 Stat. 1267), and  
17 section 2 of the Act of June 13, 1934 (40 U.S.C. 276c).

### 18 REAL PROPERTY TAXATION

19 SEC. 411. Nothing in this title shall be construed to  
20 exempt any real property that may be acquired and held by  
21 the Secretary as a result of the exercise of lien or subroga-  
22 tion rights from real property taxation to the same extent,  
23 according to its value, as other real property is taxed.

## 1 SUPPLEMENTARY GRANTS

2 SEC. 412. (a) The Secretary is authorized to make  
3 supplementary grants to State and local public bodies and  
4 agencies carrying out "new community assistance projects",  
5 as defined below, if the Secretary determines that such grants  
6 are necessary or desirable for carrying out a new community  
7 development project approved for assistance under section  
8 403.

9 (b) In no case shall any grant under this section exceed  
10 20 per centum of the cost of the new community assistance  
11 project for which the grant is made; and in no case shall the  
12 total Federal contributions to the cost of such project be  
13 more than 80 per centum.

14 (c) In carrying out his authority under this section the  
15 Secretary shall consult with the Department of Agriculture  
16 with respect to new community assistance projects assisted  
17 by that Department, and he shall, for the purpose of sub-  
18 section (b), accept that Department's certifications as to  
19 the cost of such projects.

20 (d) There are hereby authorized to be appropriated  
21 such sums as may be necessary for grants under this section.  
22 Appropriations authorized under this section shall remain  
23 available until expended.

## 1 GENERAL PROVISIONS AND RULES AND REGULATIONS.

2 SEC. 413. In the performance of, and with respect to,  
3 the functions, powers, and duties vested in him by this title,  
4 the Secretary shall (in addition to any authority otherwise  
5 vested in him) have the functions, powers, and duties (in-  
6 cluding the authority to issue rules and regulations) set  
7 forth in section 402, except subsections (c) (2), (d), and  
8 (f), of the Housing Act of 1950: *Provided*, That subsec-  
9 tion (a) (1) of section 402 shall not apply with respect to  
10 functions, powers, and duties under section 412 of this title.

## 11 DEFINITIONS

12 SEC. 414. As used in this title—

(a) The term "land development" means the process of grading land, making, installing, or constructing water lines and water supply installations, sewer lines and sewage disposal installations, steam, gas, and electric lines and installations, roads, streets, curbs, gutters, sidewalks, storm drainage facilities, and other installations or work, whether on or off the site, which the Secretary deems necessary or desirable to prepare land for residential, commercial, industrial, or other uses, or to provide facilities for public or common use. The term "land development" shall not include any building unless it is (1) a building which is needed in con-

1 nection with a water supply or sewage disposal installation  
2 or a steam, gas, or electric line or installation, or (2) a  
3 building, other than a school, which is to be owned and  
4 maintained jointly by the residents of the new community  
5 or is to be transferred to public ownership, but not prior  
6 to its completion.

7 (b) The term "actual costs" means the costs (exclu-  
8 sive of rebates or discounts) incurred by a new community  
9 developer in carrying out the land development assisted  
10 under this title. These costs may include amounts paid for  
11 labor, materials, construction contracts, land planning, engi-  
12 neers' and architects' fees, surveys, taxes, and interest dur-  
13 ing development, organizational and legal expenses, such  
14 allocation of general overhead expenses as are acceptable to  
15 the Secretary, and other items of expense incidental to devel-  
16 opment which may be approved by the Secretary. If the  
17 Secretary determines that there is an identity of interest  
18 between the new community developer and a contractor,  
19 there may be included as a part of actual costs an allowance  
20 for the contractor's profit in an amount deemed reasonable  
21 by the Secretary.

22 (c) The term "new community assistance projects"  
23 means projects assisted by grants made under section 702  
24 of the Housing and Urban Development Act of 1965, sec-

1 tion 306 (a) (2) of the Consolidated Farmers' Home Admin-  
2 istration Act, or title VII of the Housing Act of 1961.

3 CONFORMING AMENDMENTS

4 SEC. 415. (a) Section 202 (b) (4) of the Housing  
5 Amendments of 1955 is amended by adding before the  
6 period at the end of the second sentence "or under title IV  
7 of the Housing and Urban Development Act of 1968".

8 (b) The first paragraph of section 24 of the Federal  
9 Reserve Act is amended by striking out all that follows  
10 "national banking association" in the fourth sentence and  
11 adding "may make loans or purchase obligations for land  
12 development which are secured by mortgages insured under  
13 title X of the National Housing Act or guaranteed under  
14 title IV of the Housing and Urban Development Act of  
15 1968."

16 (c) The next to last paragraph of section 5 (c) of the  
17 Home Owners' Loan Act of 1933 is amended by adding at  
18 the end thereof the following new sentence: "Without regard  
19 to any other provision of this subsection, an association may  
20 invest in loans or obligations, or interests therein, as to which  
21 the association has the benefit of any guaranty under title IV  
22 of the Housing and Urban Development Act of 1968 as now  
23 or hereafter in effect, or of a commitment or agreement there-  
24 for, and such investments shall not be included in any per-

1 centage of assets or other percentage referred to in this  
2 subsection.”

### 3 TITLE V—URBAN RENEWAL

4 SEC. 501. (a) Title I of the Housing Act of 1949 is  
5 amended by adding after the title heading the following new  
6 subheading:

7 “PART A—URBAN RENEWAL PROJECTS, DEMOLITION PRO-  
8 GRAMS, AND CODE ENFORCEMENT PROGRAMS”

9 (b) Title I of that Act is further amended by adding at  
10 the end thereof the following new part:

11 “PART B—NEIGHBORHOOD DEVELOPMENT PROGRAMS

12 “PURPOSE AND AUTHORITY

13 “SEC. 131. (a) To facilitate more rapid renewal and  
14 development of urban areas on an effective scale, and to en-  
15 courage more efficient and flexible utilization of public and  
16 private development opportunities by local communities in  
17 such areas, the Secretary is authorized to make financial as-  
18 sistance available under this title to local public agencies  
19 for undertakings and activities which are carried out under a  
20 neighborhood development program approved by him pur-  
21 suant to this part.

22 “(b) A neighborhood development program shall con-  
23 sist of urban renewal project undertakings and activities in  
24 one or more urban renewal areas which are planned and  
25 carried out on the basis of annual increments in accordance

1 with the provisions of this title for planning and carrying out  
2 urban renewal projects, except as modified by the provisions  
3 of this part.

4 “(c) No application for financial assistance in planning  
5 and carrying out a neighborhood development program shall  
6 be approved by the Secretary unless—

7 “(1) the governing body of the locality has, by  
8 resolution or ordinance, approved the proposed program  
9 and the annual increment covered by the application  
10 and authorized the filing of the application for financial  
11 assistance; and

12 “(2) the Secretary has concluded that there is the  
13 necessary capacity to carry out the undertakings and  
14 activities included under the program.

15 “FINANCIAL PROVISIONS

16 “SEC. 132. (a) Upon the approval of a neighborhood de-  
17 velopment program by the Secretary, the cost of any under-  
18 takings and activities authorized as part of the program shall  
19 be financed in accordance with the loan, capital grant, and  
20 project cost provisions of part A, except:

21 “(1) net project cost may be calculated on the basis  
22 of costs incurred and proceeds derived for the account  
23 of the program during a specified twelve-month period,  
24 and may be recalculated for succeeding periods of twelve

1 months to reflect additional costs and additional proceeds  
2 since the date of the last computation or recomputation;  
3 and

4 “ (2) if property has been acquired but not disposed  
5 of prior to the computation or recomputation of net proj-  
6 ect cost, temporary loans made or secured under this title  
7 to finance undertakings or activities included in the pro-  
8 gram may remain outstanding until the property has  
9 been disposed of and the proceeds thereof, together with  
10 additional funds becoming available to the program, are  
11 sufficient to permit repayment of the loans.

12 “ (b) In the event that gross project cost as computed  
13 for a specified twelve-month period is exceeded, with respect  
14 to that period, by the sum of (1) the sales price of land  
15 or other property sold, and (2) the imputed capital value  
16 of land or other property leased or retained by the local  
17 public agency in accordance with the provisions of the urban  
18 renewal plan, the local public agency shall pay to the  
19 Secretary two-thirds of the excess (or three-fourths in the  
20 case of a program on a three-fourths grant basis), which  
21 amount shall be available to the Secretary for grant payments  
22 under section 103.

23 “LOCAL GRANTS-IN-AID

24 “SEC. 133. (a) For the purpose of determining the  
25 eligibility of local grants-in-aid in connection with under-

1 takings and activities carried out under a neighborhood  
2 development program, the three-year period referred to in  
3 section 110 (d) shall be deemed to be a period of three  
4 years prior to the authorization by the Secretary of the  
5 first contract for financial assistance under the program which  
6 includes the urban renewal area which is benefited by the  
7 public improvement or facility for which credit is claimed;  
8 and the seven-year period referred to in clause (1) of sec-  
9 tion 112 (b) shall be deemed to be a period of seven years  
10 prior to the date of authorization by the Secretary of the  
11 first contract for financial assistance under the program which  
12 includes the urban renewal area which is benefited by the  
13 expenditures for which credit is claimed.

14 “(b) No portion of the cost of a public improvement or  
15 public facility (to the extent otherwise eligible) may be in-  
16 cluded as a local grant-in-aid in computing the gross project  
17 cost of an approved program for any twelve-month period—

18 “(1) prior to commencement of construction of the  
19 improvement or facility, or

20 “(2) in excess of the amount actually expended or  
21 obligated by contract.

22 “(c) The provisions of section 104 with respect to the  
23 pooling of local grants-in-aid among the various projects  
24 undertaken by a local public agency shall not be applicable  
25 with respect to any excess local grants-in-aid resulting from

1 the urban renewal projects contained in a neighborhood de-  
2 velopment program.

3 "GENERAL PROVISIONS

4 "SEC. 134. (a) For purposes of this part—

5 " (1) the workable program requirement in section  
6 101 (c) shall apply to the authorization, rather than the  
7 execution, of any contract for loans or capital grants;

8 " (2) capital grants on a three-fourths basis may  
9 only be made under section 103 (a) (2) (B) ;

10 " (3) the relocation requirements specified in sec-  
11 tion 105 (c) shall apply to each annual increment of an  
12 approved program ;

13 " (4) section 106 (g) (relating to transient hous-  
14 ing) shall apply to activities undertaken under approved  
15 programs, except that the determination as to need for  
16 transient housing shall be made with respect to any sale  
17 or lease of land for construction of such housing prior to  
18 such sale or lease; and

19 " (5) the requirement concerning demolition and  
20 removal of buildings and improvements stated in clause  
21 (A) of the sentence following paragraph (10) of sec-  
22 tion 110 (c) shall apply to each annual increment of an  
23 approved program.

24 " (b) The approval by the Secretary of financial assist-

1   ance for one or more annual increments of a neighborhood  
2   development program shall not be considered as obligating  
3   him to provide financial assistance for any subsequent annual  
4   increments.

5       “(c) The urban renewal plan referred to in section 110  
6   (b) may cover one or more of the urban renewal areas cov-  
7   ered by a neighborhood development program and such plan  
8   may be modified from time to time to cover additional urban  
9   renewal areas added to the program. The Secretary may  
10   establish such requirements, as he deems appropriate, pre-  
11   scribing the scope and content of such plan, taking into con-  
12   sideration, among other matters, the degree of detail needed  
13   in the plan to properly and expeditiously carry out the activi-  
14   ties and undertakings proposed in any annual increment of a  
15   neighborhood development program.”

16                   INCREASED   AUTHORIZATION

17       SEC. 502. (a) Section 103 (b) of the Housing Act  
18   of 1949 is amended by striking out in the first sentence  
19   everything after “exceed” and inserting in lieu thereof “\$7,-  
20   600,000,000, which amount shall be increased by \$1,400,-  
21   000,000 on July 1, 1969”.

22       (b) Section 103 (b) of such Act is further amended by  
23   striking out “\$250,000,000” in the second sentence and in-  
24   serting in lieu thereof “\$600,000,000”.

## 1 REHABILITATION GRANTS

2 SEC. 503. (a) The second sentence of section 115 (a)  
3 of the Housing Act of 1949 is amended by striking out the  
4 words "a structure" and "structure" and inserting in lieu  
5 thereof "real property".

6 (b) Section 115 (b) of such Act is amended by striking  
7 out "\$1,500" and inserting in lieu thereof "\$2,500".

## 8 REHABILITATION IN URBAN RENEWAL AREAS

9 SEC. 504. Section 110 (c) (8) of the Housing Act of  
10 1949 is amended by striking out (1) "guidance purposes,  
11 and", and (2) the proviso at the end thereof.

## 12 DISPOSITION OF PROPERTY FOR LOW AND MODERATE

## 13 INCOME HOUSING

14 SEC. 505. Section 107 (a) of the Housing Act of 1949  
15 is amended by—

16 (1) inserting ", section 235 (j) (1), or section  
17 236" after "or (d) (4)";

18 (2) inserting "or lessee" after "purchaser" where it  
19 appears and "or lease" after "purchase";

20 (3) striking out "rental or cooperative"; and

21 (4) striking out "moderate" and inserting in lieu  
22 thereof "low or moderate".

1 CAPITAL GRANTS FOR LOW AND MODERATE INCOME HOUS-  
2 ING IN OPEN LAND PROJECTS

3 SEC. 506. Section 103 (a) (1) of the Housing Act of  
4 1949 is amended by inserting before the period at the end  
5 thereof the following: “, except that he may contract for  
6 such a grant in an amount not to exceed two-thirds of the  
7 difference between the proceeds from any land disposed of  
8 pursuant to section 107 hereof, and the fair value of the  
9 land without regard to such section”.

10 URBAN RENEWAL LOAN CONTRACTS

11 SEC. 507. (a) Section 102 (c) of the Housing Act of  
12 1949 is amended by:

13 (1) striking out “at interest rates lower than pro-  
14 vided in the loan contract” in the first sentence; and

15 (2) inserting before the period at the end of the  
16 first sentence the following: “: *Provided*, That, if at  
17 any time during the undertaking of the project, the inter-  
18 est rate on such a loan from a source other than the  
19 Federal Government is greater than the rate at which  
20 funds could be made available under the Federal loan  
21 contract, the Secretary may make a supplemental grant  
22 to the local public agency in the amount of the difference

1       between the interest cost from such sources and the  
2       interest cost at the contract rate, and no part of the  
3       amount of any such grant shall be required to be con-  
4       tributed as a part of the local grant-in-aid”.

(b) Loan contracts outstanding on the date of enactment of this section may be amended to incorporate the provisions authorized by the amendment contained in subsection (a) without regard to the proviso in section 110 (g) of the Housing Act of 1949.

10 PROJECT COMPLETION PRIOR TO DISPOSITION OF CERTAIN  
11 PROPERTY

12 SEC. 508. (a) Section 106 of the Housing Act of 1949  
13 is amended by adding at the end thereof the following new  
14 subsection:

15       “(i) Upon a determination by the Secretary that (1)  
16 not more than 5 per centum of the total area of land ac-  
17 quired as part of an urban renewal project remains to be  
18 disposed of, (2) the local public agency does not expect  
19 to be able, due to circumstances beyond its control, to dis-  
20 pose of such land in the near future, (3) all other project  
21 activities are completed, and (4) the local public agency  
22 has agreed to dispose of or retain such land for uses in ac-  
23 cordance with the urban renewal plan, the urban renewal  
24 project may be deemed completed, and the net project cost  
25 may be computed and the capital grant paid.”

(b) Section 110 (f) of such Act is amended by inserting before the period at the end thereof the following: "or for subsequent disposition or retention as provided under section 106 (i)".

#### REHABILITATION LOANS

SEC. 509. (a) Section 312 (d) of the Housing Act of 1964 is amended by rewriting the first sentence to read as follows: "There is authorized to be appropriated for each fiscal year such amounts as may be necessary which shall constitute a revolving fund to be used by the Secretary in carrying out this section."

(b) Section 312 (h) of such Act is amended by striking out "October 1, 1969" and inserting in lieu thereof "June 30, 1973".

### TITLE VI—URBAN PLANNING AND FACILITIES

#### COMPREHENSIVE PLANNING

SEC. 601. Section 701 of the Housing Act of 1954 is amended to read as follows:

#### "COMPREHENSIVE PLANNING

"SEC. 701. (a) In order to assist State and local governments in solving planning problems, including those resulting from the increasing concentration of population in metropolitan and other urban areas and the out-migration from and lack of coordinated development of resources and

1 services in rural areas; to facilitate comprehensive planning  
2 for urban and rural development, including coordinated  
3 transportation systems, on a continuing basis by such govern-  
4 ments; and to encourage such governments to establish and  
5 improve planning staffs and techniques on an areawide basis,  
6 the Secretary is authorized to make planning grants to—

7 “(1) State planning agencies for the provision of  
8 planning assistance to (A) cities and other municipali-  
9 ties having a population of less than fifty thousand  
10 according to the latest decennial census, and counties  
11 without regard to population: *Provided*, That grants  
12 shall be made under this paragraph for planning assist-  
13 ance to counties having a population of fifty thousand  
14 or more, according to the latest decennial census, which  
15 are within metropolitan areas, only if (i) the Secretary  
16 finds that planning and plans for such county will be co-  
17 ordinated with the program of comprehensive planning,  
18 if any, which is being carried out for the metropolitan  
19 area of which the county is a part, and (ii) the aggre-  
20 gate amount of the grants made subject to this proviso  
21 does not exceed 15 per centum of the aggregate amount  
22 appropriated, after September 2, 1964, for the purposes  
23 of this section, (B) any group of adjacent communities,  
24 either incorporated or unincorporated, having a total pop-  
25 ulation of less than fifty thousand according to the latest

1 decennial census and having common or related urban  
2 planning problems, (C) cities, other municipalities, and  
3 counties, referred to in paragraph (3) of this subsection  
4 and areas referred to in paragraph (4) of this subsec-  
5 tion, and (D) Indian reservations;

6 “(2) State, metropolitan, and regional planning  
7 agencies for metropolitan or regional planning;

8 “(3) cities, other municipalities, and counties which  
9 (A) are situated in redevelopment areas or economic  
10 development districts designated by the Secretary of  
11 Commerce under title IV of the Public Works and Eco-  
12 nomic Development Act of 1965, or (B) have suffered  
13 substantial damage as a result of a catastrophe which  
14 the President, pursuant to section 2 (a) of ‘An Act to au-  
15 thorize Federal assistance to States and local govern-  
16 ments in major disasters, and for other purposes’, ap-  
17 proved September 30, 1950, as amended (42 U.S.C.  
18 1855a), has determined to be a major disaster;

19 “(4) official governmental planning agencies for  
20 areas where rapid urbanization has resulted or is ex-  
21 pected to result from the establishment or rapid and  
22 substantial expansion of a Federal installation, or for  
23 areas where rapid urbanization is expected to result on  
24 land developed or to be developed as a new community

1 approved under section 1004 of the National Housing  
2 Act or title IV of the Housing and Urban Develop-  
3 ment Act of 1968;

4 “(5) State planning agencies for State and inter-  
5 state comprehensive planning and for research and coor-  
6 dination activity related thereto, including technical and  
7 other assistance for the establishment and operation of  
8 intrastate and interstate planning agencies;

9 “(6) State planning agencies for assistance to dis-  
10 trict planning, or planning for areas within districts,  
11 carried on by or for district planning agencies;

12 “(7) metropolitan and regional planning agencies,  
13 with the approval of the State planning agency or (in  
14 States where no such planning agency exists) of the  
15 Governor of the State, for the provision of planning as-  
16 sistance within the metropolitan area or region to cities,  
17 other municipalities, counties, groups of adjacent com-  
18 munities, or Indian reservations described in clauses  
19 (A), (B), (C), and (D) of paragraph (1) of this  
20 subsection;

21 “(8) official governmental planning agencies for  
22 any area where there has occurred a substantial reduc-  
23 tion in employment opportunities as the result of (A)  
24 the closing (in whole or in part) of a Federal installa-  
25 tion, or (B) a decline in the volume of Government

1 orders for the procurement of articles or materials pro-  
2 duced or manufactured in such area;

3 “(9) tribal planning councils or other tribal bodies  
4 designated by the Secretary of the Interior for planning  
5 for an Indian reservation; and

6 “(10) the Appalachian Regional Commission, es-  
7 tablished by the Appalachian Regional Development  
8 Act of 1965, for comprehensive planning for the Appa-  
9 lachian region as defined by section 403 of such Act  
10 (or State agencies or instrumentalities participating in  
11 such planning).

12 Planning assisted under this section shall, to the maximum  
13 extent feasible, cover entire areas having common or related  
14 development problems. The Secretary shall encourage co-  
15 operation in preparing and carrying out plans among all  
16 interested municipalities, political subdivisions, public agen-  
17 cies, and other parties in order to achieve coordinated devel-  
18 opment of entire areas. To the maximum extent feasible,  
19 pertinent plans and studies already made for areas shall be  
20 utilized so as to avoid unnecessary repetition of effort and  
21 expense. Planning which may be assisted under this section  
22 includes the preparation of comprehensive transportation  
23 surveys, studies, and plans to aid in solving problems of  
24 traffic congestion, facilitating the circulation of people and  
25 goods in metropolitan and other areas and reducing trans-

1 portation needs. Funds available under this section shall be  
2 in addition to and may be used jointly with funds available for  
3 planning surveys and investigations under other federally  
4 aided programs, and nothing contained in this section shall  
5 be construed as affecting the authority of the Secretary of  
6 Transportation under section 307 of title 23, United States  
7 Code.

8 “ (b) A planning grant made under subsection (a) shall  
9 not exceed two-thirds of the estimated cost of the work for  
10 which the grant is made: *Provided*, That such a grant may  
11 be made for up to 75 per centum of such estimated cost when  
12 made for planning primarily for (1) redevelopment areas or  
13 economic development districts, or portions thereof, described  
14 in subsection (a) (3) (A), (2) areas described in subsection  
15 (a) (8), and (3) the Appalachian region, as described in  
16 subsection (a) (10). All grants made under this section shall  
17 be subject to terms and conditions prescribed by the Secre-  
18 tary. No portion of any grant made under this section shall  
19 be used for the preparation of plans for specific public works.  
20 The Secretary is authorized, notwithstanding the provisions  
21 of section 3648 of the Revised Statutes, as amended, to make  
22 advance or progress payments on account of any grant made  
23 under this section. There is hereby authorized to be appro-  
24 priated to the Secretary not exceeding \$265,000,000 prior  
25 to July 1, 1969, to carry out his duties under this section,

1 which amount shall be increased by such additional sums in  
2 fiscal year 1970 and subsequent fiscal years as are necessary.  
3 Of the amount available prior to July 1, 1969, \$20,000,000  
4 may be used only for district planning grants under subsec-  
5 tion (a) (6), which amount shall be increased by \$10,000,-  
6 000 on July 1 in each subsequent fiscal year. Any amounts  
7 appropriated under this section shall remain available until  
8 expended: *Provided*, That of any funds appropriated under  
9 this section, not to exceed an aggregate of \$10,000,000 plus  
10 5 per centum of any funds so appropriated may be used by  
11 the Secretary for studies, research, and demonstration proj-  
12 ects, undertaken independently or by contract, for the devel-  
13 opment and improvement of techniques and methods for com-  
14 prehensive planning and for the advancement of the purposes  
15 of this section, and for grants to assist in the conduct of  
16 studies and research relating to needed revisions in State  
17 statutes which create, govern, or control local governments  
18 and local governmental operations.

19 “(c) The Secretary is authorized, in areas embracing  
20 several municipalities or other political subdivisions, to en-  
21 courage planning on a unified regional, district, or metro-  
22 politan basis and to provide technical assistance for such  
23 planning and the solution of problems relating thereto.

24 “(d) It is the further intent of this section to encourage  
25 comprehensive planning, including transportation planning,

1 for States, cities, counties, metropolitan areas, districts, re-  
2 gions, and Indian reservations and the establishment and  
3 development of the organizational units needed therefor. In  
4 extending financial assistance under this section, the Secre-  
5 tary may require such assurances as he deems adequate that  
6 the appropriate State and local agencies are making reason-  
7 able progress in the development of the elements of com-  
8 prehensive planning. The Secretary is authorized to provide  
9 technical assistance to State and local governments and their  
10 agencies and instrumentalities, and to Indian tribal bodies,  
11 undertaking such planning and, by contract or otherwise, to  
12 make studies and publish information on related problems.

13       “(e) In the exercise of his responsibilities under this  
14 section, the Secretary shall consult with those officials of  
15 the Federal Government responsible for the administration of  
16 programs of Federal assistance to the States and municipali-  
17 ties for various categories of public facilities and other com-  
18 prehensively planned activities. He shall, particularly, con-  
19 sult with the Secretary of Agriculture prior to his approval  
20 of any district planning grants under subsections (a) (6) and  
21 (g). The Secretary of Agriculture may provide technical  
22 assistance, with or without reimbursement, in connection with  
23 the establishment of such districts and the carrying out of  
24 such planning.

25       “(f) The consent of the Congress is hereby given to any

1 two or more States to enter into agreements or compacts, not  
2 in conflict with any law of the United States, for cooperative  
3 efforts and mutual assistance in the comprehensive planning  
4 for the growth and development of interstate, metropolitan,  
5 or other urban areas, and to establish such agencies, joint or  
6 otherwise, as they may deem desirable for making effective  
7 such agreements and compacts.

8 “(g) In addition to the planning grants authorized by  
9 subsection (a), the Secretary is further authorized to make  
10 grants to organizations composed of public officials whom  
11 he finds to be representative of the political jurisdictions  
12 within a metropolitan area, region, or district for the purpose  
13 of assisting such organization to undertake studies, collect  
14 data, develop metropolitan, regional, and district plans and  
15 programs, and engage in such other activities as the Secre-  
16 tary finds necessary or desirable for the solution of the metro-  
17 politan, regional, or district problems in such areas, regions,  
18 or districts. To the maximum extent feasible, all grants under  
19 this subsection shall be for activities relating to all the de-  
20 velopmental aspects of the total metropolitan area, region, or  
21 district including, but not limited to, land use, transportation,  
22 housing, economic development, natural resources develop-  
23 ment, community facilities, and the general improvement of  
24 living environments. A grant under this subsection shall not

1 exceed two-thirds of the estimated cost of the work for which  
2 the grant is made.

3 “(h) In addition to the other grants authorized by this  
4 section, the Secretary is authorized to make grants to assist  
5 any city, other municipality, or county in making a survey  
6 of the structures and sites in such locality which are de-  
7 termined by its appropriate authorities to be of historic or  
8 architectural value. Any such survey shall be designed to  
9 identify the historic structures and sites in the locality, deter-  
10 mine the cost of their rehabilitation or restoration, and pro-  
11 vide such other information as may be necessary or appro-  
12 priate to serve as a foundation for a balanced and effective  
13 program of historic preservation in such locality. The aspects  
14 of any such survey which relate to the identification of his-  
15 toric and architectural values shall be conducted in accord-  
16 ance with criteria found by the Secretary to be comparable  
17 to those used in establishing the national register main-  
18 tained by the Secretary of the Interior under other provisions  
19 of law; and the results of each such survey shall be made  
20 available to the Secretary of the Interior. A grant under this  
21 subsection shall not exceed two-thirds of the cost of the sur-  
22 vey for which it is made, and shall be made to the appro-  
23 priate agency or entity specified in paragraphs (1) through  
24 (10) of subsection (a) or, if there is no such agency or en-  
25 tity which is qualified and willing to receive the grant and

1 provide for its utilization in accordance with this subsection,  
2 directly to the city, other municipality, or county involved.

3 “(i) As used in this section—

4 “(1) The term ‘metropolitan area’ means a standard  
5 metropolitan statistical area, as established by the Bureau of  
6 the Budget, subject, however, to such modifications or exten-  
7 sions as the Secretary deems to be appropriate for the pur-  
8 poses of this section.

9 “(2) The term ‘region’ includes (A) all or part of the  
10 area of jurisdiction of one or more units of general local  
11 government, and (B) one or more metropolitan areas.

12 “(3) The term ‘district’ includes all or part of the area  
13 of jurisdiction of (A) one or more counties, and (B) one or  
14 more other units of general local government, but does not  
15 include any portion of a metropolitan area.

16 “(4) The term ‘comprehensive planning’ includes the  
17 following:

18 “(A) preparation, as a guide for governmental  
19 policies and action, of general plans with respect to  
20 (i) the pattern and intensity of land use, (ii) the pro-  
21 vision of public facilities (including transportation fa-  
22 cilities) and other government services, and (iii) the  
23 effective development and utilization of human and  
24 natural resources;

1           “(B) long-range physical and fiscal plans for such  
2       action;

3           “(C) programing of capital improvements and  
4       other major expenditures, based on a determination of  
5       relative urgency, together with definitive financing plans  
6       for such expenditures in the earlier years of the program;

7           “(D) coordination of all related plans and activities  
8       of the State and local governments and agencies con-  
9       cerned; and

10          “(E) preparation of regulatory and administrative  
11       measures in support of the foregoing.

12   Comprehensive planning for districts shall not include plan-  
13   ning aimed at encouraging establishments to relocate from  
14   one area to another: *Provided*, That this limitation shall  
15   not be construed to prohibit planning aimed at encouraging  
16   the expansion of an existing business entity through the  
17   establishment of a new branch, affiliate, or subsidiary of  
18   such entity, if the establishment of such branch, affiliate,  
19   or subsidiary will not result in an increase in unemployment  
20   in any area where such entity conducts business operations  
21   and if there is no reasonable cause to believe that such  
22   branch, affiliate, or subsidiary is being established with the  
23   intention of closing down the operations of the existing  
24   business entity in any such area.

25          “(5) The term ‘State planning agencies’ includes official

1 State planning agencies and (in States where no such plan-  
2 ning agency exists) agencies or instrumentalities of State  
3 government designated by the Governor of the State and  
4 acceptable to the Secretary.

5 “(6) The terms ‘metropolitan planning agencies’,  
6 ‘regional planning agencies’, and ‘district planning agencies’  
7 means official metropolitan, regional, and district planning  
8 agencies, or other agencies and instrumentalities designated  
9 by the Governor (or Governors in the case of interstate  
10 planning), and acceptable to the Secretary, empowered  
11 under State or local law or interstate compact to perform  
12 metropolitan, regional, or district planning, respectively:  
13 *Provided*, That such agencies and instrumentalities shall,  
14 to the greatest practicable extent, be composed of or respon-  
15 sible to the elected officials of the unit or units of general  
16 local government for whose jurisdictions they are empowered  
17 to engage in planning.”

18 PLANNED AREAWIDE DEVELOPMENT

19 SEC. 602. (a) The heading of title II of the Demon-  
20 stration Cities and Metropolitan Development Act of 1966  
21 is amended to read as follows: “TITLE II—PLANNED  
22 AREAWIDE DEVELOPMENT”.

23 (b) Section 201 of such Act is amended to read as  
24 follows:

1           “FINDINGS AND DECLARATION OF PURPOSE

2           “SEC. 201. (a) The Congress hereby finds that the  
3   welfare of the Nation and of its people is directly dependent  
4   upon the sound and orderly development and the effective  
5   organization and functioning of our State and local govern-  
6   ments.

7           “It further finds that it is essential that our State and  
8   local governments prepare, keep current, and carry out com-  
9   prehensive plans and programs for their orderly physical  
10   development with a view to meeting efficiently all their  
11   economic and social needs.

12          “It further finds that our State and local governments  
13   are especially handicapped in this task by the complexity  
14   and scope of governmental services required, the multiplicity  
15   of political jurisdictions and agencies involved, and the inade-  
16   quacy of the operational and administrative arrangements  
17   available for cooperation among them.

18          “It further finds that present requirements for areawide  
19   planning and programing in connection with various Federal  
20   programs have materially assisted in the solution of areawide  
21   problems, but that greater coordination of Federal programs  
22   and additional participation and cooperation are needed from  
23   the States and localities in perfecting and carrying out such  
24   efforts.

25          “(b) It is the purpose of this title to provide through

1 greater coordination of Federal programs and through sup-  
2 plementary grants for certain federally assisted development  
3 projects, additional encouragement and assistance to States  
4 and localities for making comprehensive areawide planning  
5 and programing effective.”

6 (c) Section 202 of such Act is amended by striking out  
7 “metropolitan”, each place it appears, and inserting in lieu  
8 thereof “areawide”.

9 (d) (1) Section 205 of such Act is amended by striking  
10 out “metropolitan development”, each place it appears, and  
11 inserting in lieu thereof “areawide development”.

12 (2) Such section is further amended by striking out  
13 “metropolitan areas” and “metropolitan area” and inserting  
14 in lieu thereof “areas” and “area”, respectively.

15 (3) Such section is further amended by striking out  
16 “metropolitanwide” each place it appears, and inserting in  
17 lieu thereof “areawide”.

18 (4) Such section is further amended by striking out  
19 “metropolitan planning”, each place it appears, and insert-  
20 ing in lieu thereof “areawide planning”.

21 (5) Such section is further amended by inserting “where  
22 appropriate,” after “(B)” in subsection (c) (1).

23 (6) Such section is further amended by striking out in  
24 subsection (f) the following: “within the metropolitanwide  
25 area”.

1 (e) (1) Paragraphs (1) and (2) of section 208 of  
 2 such Act are amended by striking out "Metropolitan" and  
 3 inserting in lieu thereof "Areawide".

4 (2) Paragraph (7) of such section is amended—

5 (A) by striking out "or metropolitan or regional"  
 6 and inserting in lieu thereof ", metropolitan, regional,  
 7 or district"; and

8 (B) by striking out in the parenthetical phrase the  
 9 word "metropolitan".

10 (f) Section 206 (b) of such Act is amended by striking  
 11 out the second sentence and inserting in lieu thereof the  
 12 following: "Any amounts appropriated under this section  
 13 shall remain available until expended, and any amounts  
 14 authorized for any fiscal year under this section but not  
 15 appropriated may be appropriated for any succeeding fiscal  
 16 year commencing prior to July 1, 1970."

17 ADVANCE ACQUISITION OF LAND

18 SEC. 603. (a) Section 701 of the Housing and Urban  
 19 Development Act of 1965 is amended by striking out in  
 20 clause (3) thereof "in connection with the future construc-  
 21 tion of public works and facilities." and inserting in lieu  
 22 thereof "in the future for public purposes."

1       (b) Section 704 of such Act is amended to read as  
2 follows:

3       “SEC. 704. (a) In order to encourage and assist the  
4 timely acquisition of land planned to be utilized in the future  
5 for public purposes, the Secretary is authorized to make  
6 grants to States and local public bodies and agencies to assist  
7 in financing the acquisition of a fee simple estate or other  
8 interest in such land.

9       “(b) The amount of any grant made under this section  
10 shall not exceed the aggregate amount of reasonable interest  
11 charges on the loans or other financial obligations incurred to  
12 finance the acquisition of such land for a period not in excess  
13 of the lesser of (1) five years from the date of acquisition of  
14 such land or (2) the period of time between the date on  
15 which the land was acquired and the date its use began for  
16 the purpose for which it was acquired: *Provided*, That where  
17 all or any portion of the cost of such land is not financed  
18 through borrowings, the amount of the grant shall be com-  
19 puted on the basis of the aggregate amount of reasonable in-  
20 terest charges that the Secretary determines would have  
21 been required.

1       “(c) No grant shall be made under this section unless  
2 the Secretary determines that the land will be utilized for a  
3 public purpose within a reasonable period of time and that  
4 such utilization will contribute to economy, efficiency, and  
5 the comprehensively planned development of the area.

6       “(d) No land acquired with assistance under this sec-  
7 tion shall, without approval of the Secretary, be diverted  
8 from the purpose originally approved. The Secretary shall  
9 approve no such diversion unless he finds that the diversion  
10 is in accord with the then applicable comprehensive plan for  
11 the area. In cases of a diversion of land to other than a pub-  
12 lic purpose, the Secretary may require repayment of the  
13 grant, or substitution of land of approximately equal fair  
14 market value, whichever he deems appropriate. An interim  
15 use of the land for a public or private purpose in accordance  
16 with standards prescribed by the Secretary, or approved by  
17 him, shall not constitute a diversion within the meaning of  
18 this subsection.

19       “(e) Notwithstanding any other provision of law, no  
20 project for which land is acquired with assistance under  
21 this section shall, solely as a result of such advance acqui-  
22 sition, be considered ineligible for the purpose of any other  
23 Federal loan or grant program, and the amount of the pur-  
24 chase price paid for the land by the recipient of a grant

1 under this section may be considered an eligible cost for the  
 2 purpose of such other Federal loan or grant program.”

3 EXTENSION OF INTERIM PLANNING REQUIREMENTS IN  
 4 WATER AND SEWER FACILITIES PROGRAM

5 SEC. 604. Section 702 (c) of the Housing and Urban  
 6 Development Act of 1965 is amended by striking out “July  
 7 1, 1968” and inserting in lieu thereof “October 1, 1969”.

8 AUTHORIZATIONS FOR THE WATER AND SEWER FACILITIES,  
 9 NEIGHBORHOOD FACILITIES, AND ADVANCE ACQUISITION OF LAND PROGRAMS

11 SEC. 605. Section 708 (b) of the Housing and Urban  
 12 Development Act of 1965 is amended by striking out “July  
 13 1, 1969” and inserting in lieu thereof “July 1, 1970”.

14 OPEN-SPACE LAND PROGRAM

15 SEC. 606. (a) Section 702 (b) of the Housing Act of  
 16 1961 is amended to read as follows: “There are authorized  
 17 to be appropriated, for the purpose of making grants under  
 18 this title, not to exceed \$310,000,000 prior to July 1, 1969,  
 19 which amount shall be increased by such additional sums  
 20 in fiscal year 1970 and subsequent fiscal years as are necessary. Any amounts appropriated under this section shall  
 21 remain available until expended.”

23 (b) Section 708 (b) of such Act is amended by striking  
 24 out “\$50,000” and inserting in lieu thereof “\$125,000”.

1 AUTHORIZE THE MAKING OF FEASIBILITY STUDIES IN THE  
2 PUBLIC WORKS PLANNING ADVANCES PROGRAM

3 SEC. 607. Section 702 (a) of the Housing Act of 1954  
4 is amended by inserting after "to aid in financing the cost of"  
5 the following: "feasibility studies,".

6 TITLE VII—URBAN MASS TRANSPORTATION

7 GRANT AUTHORIZATIONS

8 SEC. 701. (a) Section 4 (b) of the Urban Mass Trans-  
9 portation Act of 1964 is amended by (1) striking out the  
10 word "and" where it first appears in the first sentence, and  
11 (2) inserting before the period at the end of the first sen-  
12 tence "; and not to exceed an additional \$190,000,000 for  
13 fiscal year 1970".

14 (b) Section 6 (c) of such Act is amended by (1) strik-  
15 ing out "\$50,000,000" and inserting in lieu thereof "\$56,-  
16 000,000", and (2) inserting at the end thereof the follow-  
17 ing: "On or after July 1, 1969, the Secretary may make  
18 available to finance projects under this section such additional  
19 sums out of the grant authorization provided in section 4 (b)  
20 as he deems appropriate."

21 DEFINITION OF MASS TRANSPORTATION

22 SEC. 702. Section 12 (c) (5) of the Urban Mass Trans-  
23 portation Act of 1964 is amended to read as follows:

24 " (5) the term 'mass transportation' means trans-  
25 portation by bus, rail, or other conveyance, either pub-

1       licly or privately owned, which provides to the public  
2       general or special service (but not including school buses  
3       or charter or sightseeing service) on a regular and con-  
4       tinuing basis.”

5   EXTENSION OF EMERGENCY PROGRAM UNDER THE URBAN  
6                   MASS TRANSPORTATION ACT

7       SEC. 703. Section 5 of the Urban Mass Transportation  
8   Act of 1964 is amended by striking out “November 1, 1968”  
9   and inserting in lieu thereof “October 1, 1969”.

10   TITLE VIII—SECONDARY MORTGAGE MARKET  
11                   PURPOSES

12       SEC. 801. The purposes of this title include the partition  
13   of the Federal National Mortgage Association as heretofore  
14   existing into two separate and distinct corporations, each of  
15   which shall have continuity and corporate succession as a  
16   separated portion of the previously existing corporation. One  
17   of such corporations, to be known as Federal National Mort-  
18   gage Association, will be a Government-sponsored private  
19   corporation, will retain the assets and liabilities of the pre-  
20   viously existing corporation accounted for under section 304  
21   of the Federal National Mortgage Association Charter Act,  
22   and will continue to operate the secondary market operations  
23   authorized by such section 304. The other, to be known as  
24   Government National Mortgage Association, will remain in  
25   the Government, will retain the assets and liabilities of the

1 previously existing corporation accounted for under sections  
 2 305 and 306 of such Act, and will continue to operate the  
 3 special assistance functions and management and liquidating  
 4 functions authorized by such sections 305 and 306.

5 AMENDMENTS TO THE FEDERAL NATIONAL MORTGAGE

6 ASSOCIATION CHARTER ACT

7 SEC. 802. (a) The heading of title III of the National  
 8 Housing Act is amended by striking out “FEDERAL NA-  
 9 TIONAL MORTGAGE ASSOCIATION” and inserting in  
 10 lieu thereof “NATIONAL MORTGAGE ASSOCIATIONS”.

11 (b) Section 301 of such Act is amended—

12 (1) by striking out “in the Federal Government a”;

13 (2) by striking out “facility for” and inserting in  
 14 lieu thereof “facilities for”;

15 (3) by striking out “of such facility” and inserting  
 16 in lieu thereof “thereof”;

17 (4) by striking out “facility to” and inserting in  
 18 lieu thereof “facilities to”; and

19 (5) by striking out “the existing mortgage port-  
 20 folio of the Federal National Mortgage Association” and  
 21 inserting in lieu thereof “federally owned mortgage  
 22 portfolios”.

23 (c) Section 302 (a) of such Act is amended—

24 (1) by inserting “(1)” immediately following  
 25 “(a)”;

1           (2) by striking out “(hereinafter referred to as  
2       the ‘Association’)”; and

3           (3) by adding at the end thereof the following  
4       new paragraph:

5       “(2) On the effective date established pursuant to sec-  
6       tion 807 of the Housing and Urban Development Act of  
7       1968, the body corporate described in the foregoing para-  
8       graph shall cease to exist in that form and is hereby parti-  
9       tioned into two separate and distinct bodies corporate, each  
10      of which shall have continuity and corporate succession as a  
11      separated portion of the previously existing body corporate,  
12      as follows:

13       “(A) One of such separated portions shall be a body  
14      corporate without capital stock to be known as Government  
15      National Mortgage Association (hereinafter referred to as  
16      the Association), which shall be in the Department of  
17      Housing and Urban Development and which shall retain  
18      the assets and liabilities acquired and incurred under sections  
19      305 and 306 prior to such effective date, including any and  
20      all liabilities incurred pursuant to section 302 (c). The Asso-  
21      ciation shall have succession until dissolved by Act of Con-  
22      gress. It shall maintain its principal office in the District of  
23      Columbia and shall be deemed, for purposes of venue in civil  
24      actions, to be a resident thereof. Agencies or offices may be  
25      established by the Association in such other place or places

1 as it may deem necessary or appropriate in the conduct of  
2 its business.

3 “(B) The other such separated portion shall be a body  
4 corporate to be known as Federal National Mortgage Asso-  
5 ciation (hereinafter referred to as the corporation), which  
6 shall retain the assets and liabilities acquired and incurred  
7 under sections 303 and 304 prior to such effective date. The  
8 corporation shall have succession until dissolved by Act of  
9 Congress. It shall maintain its principal office in the District  
10 of Columbia and shall be deemed, for purposes of venue  
11 in civil actions, to be a resident thereof.”.

12 (d) Section 302 (b) of such Act is amended—

13 (1) by striking out “the Association is authorized”  
14 and inserting in lieu thereof “each of the bodies corporate  
15 named in subsection (a) (2) is authorized”;

16 (2) by striking out “lend (under section 304) on  
17 the security of,”;

18 (3) by inserting immediately before the colon  
19 “; and the corporation is authorized to lend on the  
20 security of any such mortgages and to purchase, sell,  
21 or otherwise deal in any securities guaranteed by the  
22 Association under section 306 (g)”; and

23 (4) by striking out “no mortgage may be pur-  
24 chased” and inserting in lieu thereof “the Association  
25 may not purchase any mortgage”.

1 (e) Section 302 (c) (1) of such Act is amended by  
2 striking out “, consistent with section 307,”.

3 (f) Section 302 (c) (2) (C) of such Act is amended to  
4 read as follows:

5 “(C) The Department of Housing and Urban  
6 Development.”.

7 (g) Section 302 (c) (2) of such Act is amended by  
8 striking out “incurred by the Federal National Mortgage”  
9 and inserting in lieu thereof “incurred by the”.

10 (h) The heading of section 303 of such Act is amended  
11 to read as follows: “CAPITALIZATION—FEDERAL NATIONAL  
12 MORTGAGE ASSOCIATION”.

13 (i) Section 303 (a) of such Act is amended—

14 (1) by striking out “nonvoting common stock” and  
15 inserting in lieu thereof “common stock, without par  
16 value, which shall be vested with all voting rights, each  
17 share being entitled to one vote with rights of cumula-  
18 tive voting at all elections of directors”;

19 (2) by striking out “nonvoting preferred stock” and  
20 inserting in lieu thereof “nonvoting preferred stock, with  
21 a par value of \$100 per share,”;

22 (3) by striking out the second and third sentences  
23 thereof and inserting in lieu thereof “The free transfera-  
24 bility of the common stock at all times to any person,  
25 firm, corporation, or other entity shall not be restricted

1       except that, as to the corporation, it shall be transfer-  
2       able only on the books of the corporation.”;

3           (4) by striking out “of the capital surplus and the  
4       general surplus accounts”;

5           (5) by striking out “retire” and inserting in lieu  
6       thereof “retire, at par,”; and

7           (6) by striking out “the Association shall deem  
8       feasible” and inserting in lieu thereof “possible subse-  
9       quent to the effective date established pursuant to section  
10      807 of the Housing and Urban Development Act of  
11      1968”.

12      (j) Section 303 (b) of such Act is amended—

13           (1) by striking out “for its services” and inserting  
14       in lieu thereof ”, which may be regarded as elements of  
15       pricing,”; and

16           (2) by striking out the last sentence thereof.

17      (k) Section 303 (c) of such Act is amended—

18           (1) by striking out “(only in denominations of  
19       \$100 or multiples thereof) ”;

20           (2) by inserting immediately after the first sen-  
21       tence thereof “In addition to the shares of common stock  
22       issued under the foregoing sentence, the corporation may  
23       issue additional shares in return for appropriate pay-  
24       ments into capital or capital and surplus. The corpora-  
25       tion shall at all times require each servicer of its mort-

gages to own a minimum amount of common stock of the corporation, measured by its stated value. Such minimum amount shall be not less than 2 per centum nor more than 4 per centum, as determined from time to time by the corporation with the approval of the Secretary of Housing and Urban Development, of the aggregate outstanding principal balances of all mortgages of the corporation which have been purchased subsequent to the effective date established pursuant to section 807 of the Housing and Urban Development Act of 1968 and which are then serviced by such servicer for the corporation.”; and

(3) by striking out “the general surplus account of the Association shall not be reduced through the payment of dividends applicable to such common stock which exceed in the aggregate 5 per centum of the par value of the outstanding common stock of the Association” and inserting in lieu thereof “the aggregate amount of cash dividends paid on account of any share of such stock shall not exceed any rate which may be determined from time to time by the Secretary of Housing and Urban Development to be a fair rate of return after consideration of the current earnings and capital condition of the corporation”.

1       (1) Section 303 (d) of such Act is amended by striking  
2 out “\$225,000,000” and inserting in lieu thereof “\$225,-  
3 000,000; but no such stock may be issued subsequent to the  
4 effective date established pursuant to section 807 of the  
5 Housing and Urban Development Act of 1968”.

6       (m) Section 303 (g) of such Act is repealed.

7       (n) The heading of section 304 of such Act is amended  
8 to read as follows: “SECONDARY MARKET OPERATIONS—FED-  
9 ERAL NATIONAL MORTGAGE ASSOCIATION”.

10       (o) Section 304 (a) (1) of such Act is amended by  
11 striking out “and the Association shall not purchase any  
12 mortgage insured or guaranteed prior to the effective date of  
13 the Housing Act of 1954”.

14       (p) Section 304 (b) of such Act is amended by strik-  
15 ing out “earnings, and in” and inserting in lieu thereof  
16 “earnings unless a greater ratio shall be fixed at any time  
17 or from time to time by the Secretary of Housing and Urban  
18 Development. In”.

19       (q) Section 304 (c) of such Act is amended by striking  
20 out “(1) all of the preferred stock of the Association held  
21 by the Secretary of the Treasury has been retired, or (2)”.

22       (r) Sections 303 and 304 of such Act, as amended by  
23 the foregoing subsections of this section, are further  
24 amended—

25               (1) by striking out “Association” each place it ap-

1       pears and inserting in lieu thereof, in each such place,  
2       “corporation”; and

3       (2) by striking out “Association’s” each place it  
4       appears and inserting in lieu thereof, in each such place,  
5       “corporation’s”.

6       (s) The heading of section 305 of such Act is amended  
7       to read as follows: “SPECIAL ASSISTANCE FUNCTIONS—  
8       GOVERNMENT NATIONAL MORTGAGE ASSOCIATION”.

9       (t) The heading of section 306 of such Act is amended  
10      to read as follows: “MANAGEMENT AND LIQUIDATING  
11      FUNCTIONS—GOVERNMENT NATIONAL MORTGAGE ASSOCIA-  
12      TION”.

13      (u) Subsections (a) and (b) of section 307 of such  
14      Act are repealed.

15      (v) Section 307 (c) of such Act is amended by striking  
16      out “board of directors of the Association” and inserting in  
17      lieu thereof “Secretary of Housing and Urban Development”.

18      (w) The heading of section 308 of such Act is amended  
19      to read as follows:

20                               “MANAGEMENT”.

21      (x) Section 308 of such Act is amended—

22              (1) by inserting “(a)” immediately following  
23              “308”;

24              (2) by striking out the first two sentences thereof  
25              and inserting in lieu thereof “All the powers and duties

1 of the Government National Mortgage Association shall  
2 be vested in the Secretary of Housing and Urban De-  
3 velopment and the Association shall be administered un-  
4 der the direction of the Secretary.”;

5 (3) by striking out “the board shall determine” and  
6 inserting in lieu thereof “the Secretary shall determine”;

7 (4) by striking out “Association. The chairman of  
8 the board” and inserting in lieu thereof “Association, and  
9 shall have power to adopt, amend, and repeal bylaws  
10 governing the performance of the powers and duties  
11 granted to or imposed upon it by law. The Secretary”;

12 (5) by striking out “board of directors,” and insert-  
13 ing in lieu thereof “Secretary,”;

14 (6) by striking out the last sentence thereof; and

15 (7) by adding at the end thereof the following new  
16 subsection:

17 “(b) The Federal National Mortgage Association shall  
18 have a board of directors which shall consist of not less than  
19 nine nor more than fifteen persons, one-third of whom shall  
20 be appointed annually by the Secretary, and the remainder  
21 of whom shall be elected annually by the common stock-  
22 holders. The board shall at all times have as members  
23 appointed by the Secretary at least one person from the home  
24 building industry and at least one person from the real  
25 estate industry. Each member of the board of directors shall

1 be appointed or elected for a term ending on the date of  
2 the next annual meeting of the stockholders, except that any  
3 such member may be removed from office by the Secre-  
4 tary for good cause. Any elective seat on the board which  
5 becomes vacant after the annual election of the directors  
6 shall be filled by the board, but only for the unexpired  
7 portion of the term. Any appointive seat which becomes  
8 vacant shall be filled by appointment of the Secretary, but  
9 only for the unexpired portion of the term. Within the  
10 limitations of law and regulation, the board shall deter-  
11 mine the general policies which shall govern the opera-  
12 tions of the corporation, and shall have power to adopt,  
13 amend, and repeal bylaws governing the performance of  
14 the powers and duties granted to or imposed upon it by law.  
15 The board of directors shall select and effect the appoint-  
16 ment of qualified persons to fill the offices of president and  
17 vice president, and such other offices as may be provided for  
18 in the bylaws. Any member of the board who is a full-time  
19 officer or employee of the Federal Government shall not,  
20 as such member, receive compensation for his services.”.

21 (y) Section 309 (a) of such Act is amended—

22 (1) by striking out “The Association” and insert-  
23 ing in lieu thereof “Each of the bodies corporate named  
24 in section 302 (a) (2)”;

1           (2) by striking out “by its board of directors, to  
2       adopt, amend, and repeal bylaws governing the per-  
3       formance of the powers and duties granted to or imposed  
4       upon it by law;”;

5           (3) by striking out “conduct its business” and in-  
6       serting in lieu thereof “conduct its business without re-  
7       gard to any qualification or similar statute”;

8           (4) by striking out “the Association may deem”  
9       and inserting in lieu thereof “it may deem”; and

10          (5) by striking out “the purposes of the Associa-  
11       tion” and inserting in lieu thereof “its purposes”.

12       (z) Section 309 (c) of such Act is amended—

13           (1) by striking out “(1)”;

14           (2) by striking out “The Association” and insert-  
15       ing in lieu thereof “(1) The Government National  
16       Mortgage Association”;

17           (3) by striking out “, and (2) the Association  
18       shall, with respect to its secondary market operations  
19       under section 304 after the cutoff date referred to in  
20       section 303 (d) of this title, pay annually to the Secre-  
21       tary of the Treasury, for covering into miscellaneous  
22       receipts, an amount equivalent to the amount of Federal  
23       income taxes for which it would be subject if it were not  
24       exempt from such taxes with respect to such secondary  
25       market operations”; and

1           (4) by adding at the end thereof the following new  
2 paragraph:

3       “(2) The Federal National Mortgage Association, in-  
4 cluding its franchise, capital, reserves, surplus, mortgages or  
5 other security holdings, and income, shall be exempt from  
6 all taxation now or hereafter imposed by any State, terri-  
7 tory, possession, Commonwealth, or dependency of the  
8 United States, or by the District of Columbia, or by any  
9 county, municipality, or local taxing authority, except that  
10 any real property of the corporation shall be subject to State,  
11 territorial, county, municipal, or local taxation to the same  
12 extent as other real property is taxed.”

13       (aa) Section 309 (d) of such Act is amended—

14           (1) by inserting “(1)” immediately following  
15 “(d)”;

16           (2) by striking out “Chairman of the Board” and  
17 inserting in lieu thereof “Secretary of Housing and  
18 Urban Development”;

19           (3) by striking out “agents,” and inserting in lieu  
20 thereof “agents of the Government National Mortgage  
21 Association,”; and

22           (4) by adding at the end thereof the following  
23 new paragraph:

24       “(2) The board of directors of the Federal National

1 Mortgage Association shall have the power to select and  
2 appoint or employ such officers, attorneys, employees, and  
3 agents, to vest them with such powers and duties, and to fix  
4 and to cause the corporation to pay such compensation to  
5 them for their services, as it may determine; and any such  
6 action shall be without regard to the Federal civil service  
7 and classification laws. Appointments, promotions, and sep-  
8 arations so made shall be based on merit and efficiency, and  
9 no political test or qualification shall be permitted or given  
10 consideration. Each officer and employee of the corporation  
11 who is employed by the corporation prior to the termination  
12 of the transitional period referred to in section 809 (b) of  
13 the Housing and Urban Development Act of 1968 and who  
14 on the day previous to the beginning of such employment  
15 will have been subject to the civil service retirement law  
16 (subch. III of ch. 83 of title 5, United States Code),  
17 shall, so long as his employment by the corporation con-  
18 tinues without a break in continuity of service, continue  
19 to be subject to such law; and for the purpose of such law  
20 his employment by the corporation without a break in con-  
21 tinuity of service shall be deemed to be employment by the  
22 Government of the United States. The corporation shall con-  
23 tribute to the Civil Service Retirement and Disability Fund  
24 a sum as provided by section 8334 (a) of title 5, United  
25 States Code, except that such sum shall be determined by

1 applying to the total basic pay (as defined in 5 U.S.C.  
2 8331 (3) and except as hereinafter provided) paid to the  
3 employees of the corporation who are covered by the civil  
4 service retirement law, the per centum rate determined an-  
5 nually by the United States Civil Service Commission to be  
6 the excess of the total normal cost per centum rate of the  
7 civil service retirement system over the employee deduction  
8 rate specified in section 8334 (a) of title 5, United States  
9 Code. The corporation shall also pay into the Civil Service  
10 Retirement and Disability Fund such portion of the cost of  
11 administration of the fund as is determined by the United  
12 States Civil Service Commission to be attributable to its  
13 employees. Notwithstanding the foregoing provisions, there  
14 shall not be considered for the purposes of the civil service  
15 retirement law that portion of the basic pay in any one year  
16 of any officer or employee of the corporation which exceeds  
17 the basic pay provided for in section 5312 of title 5, United  
18 States Code, on the last day of such year. Except as provided  
19 in this subsection, the corporation shall not be subject to  
20 the provisions of title 5, United States Code.”.

21 (bb) Section 309 (e) of such Act is amended—

22 (1) by striking out “body corporate created by  
23 section 302” and inserting in lieu thereof “bodies cor-  
24 porate named in section 302 (a) (2)”;  
25

(2) by inserting “, ‘Government National Mort-

1       gage Association’,” immediately following “‘Federal  
2       National Mortgage Association’ ”; and

3               (3) by striking out the second sentence and insert-  
4       ing in lieu thereof “Violations of the foregoing sentence  
5       may be enjoined by any court of general jurisdiction at  
6       the suit of the proper body corporate. In any such suit,  
7       the plaintiff may recover any actual damages flowing  
8       from such violation, and, in addition, shall be entitled to  
9       punitive damages (regardless of the existence or non-  
10      existence of actual damages) of not exceeding \$100 for  
11      each day during which such violation is committed or  
12      repeated.”.

13      (cc) Section 309 (g) of such Act is amended to read as  
14      follows:

15      “(g) The Federal Reserve banks are authorized and  
16      directed to act as depositaries, custodians, and fiscal agents  
17      for each of the bodies corporate named in section 302 (a)  
18      (2), for its own account or as fiduciary, and such banks shall  
19      be reimbursed for such services in such manner as may be  
20      agreed upon; and each of such bodies corporate may itself act  
21      in such capacities, for its own account or as fiduciary, and for  
22      the account of others.”.

23      (dd) Section 309 of such Act is amended by adding  
24      thereto the following new subsection:

25      “(h) The Secretary of Housing and Urban Develop-

1 ment shall have general regulatory power over the Federal  
2 National Mortgage Association and shall make such rules  
3 and regulations as shall be necessary and proper to insure  
4 that the purposes of this title are accomplished. No stock,  
5 obligation, security, or other instrument shall be issued by  
6 the corporation without the prior approval of the Secretary.  
7 The Secretary may require that a reasonable portion of  
8 the corporation's mortgage purchases be related to the  
9 national goal of providing adequate housing for low and  
10 moderate income families, but with reasonable economic  
11 return to the corporation. The Secretary may examine and  
12 audit the books and financial transactions of the corporation,  
13 and he may require the corporation to make such reports  
14 on its activities as he deems advisable.”.

15 (ee) Section 311 of such Act is amended—

16 (1) by striking out “the Association” and insert-  
17 ing in lieu thereof “either of the bodies corporate named  
18 in section 302 (a) (2)”; and

19 (2) by adding at the end thereof “All stock, obliga-  
20 tions, securities, participations, or other instruments  
21 issued pursuant to this title shall, to the same extent  
22 as securities which are direct obligations of or obliga-  
23 tions guaranteed as to principal or interest by the United  
24 States, be deemed to be exempt securities within the  
25 meaning of laws administered by the Securities and

1       Exchange Commission; but all such issuances shall be  
2       made only with the approval of the Secretary of Hous-  
3       ing and Urban Development.”.

4                                   PARTICIPATIONS

5       SEC. 803. Section 302 (c) (5) of the Federal National  
6       Mortgage Association Charter Act is amended by inserting  
7       at the end thereof the following: “In the event that the  
8       insufficiency required by the trustee is on account of principal  
9       maturities of outstanding beneficial interests of participations  
10      authorized to be issued pursuant to paragraph (4) of this  
11      subsection, or pursuant hereto, the trustee is authorized to  
12      elect to issue additional beneficial interests or participations  
13      for refinancing purposes in lieu of requiring any trustor or  
14      trustors to make payments to the trustee from appropriated  
15      funds or other sources. Each such issue of beneficial in-  
16      terests or participations shall be in an amount determined by  
17      the trustee but not in excess of the aggregate amount which  
18      the trustee would otherwise require the trustor or trustors  
19      to pay from appropriated funds or other sources, and may be  
20      issued without regard to the provisions of paragraph (4)  
21      of this subsection. All refinancing issues of beneficial in-  
22      terests or participations shall be deemed to have been issued  
23      pursuant to the authority contained in the appropriation Act  
24      or Acts under which the beneficial interests or participations  
25      were originally issued.”.

## MORTGAGE-BACKED SECURITIES

SEC. 804. (a) Section 304 of the Federal National Mortgage Association Charter Act is amended by adding at the end thereof the following new subsection:

“(d) To provide a greater degree of liquidity to the mortgage investment market and an additional means of financing its operations under this section, the corporation is authorized to set aside any mortgages held by it under this section, and, upon approval of the Secretary of the Treasury, to issue and sell securities based upon the mortgages so set aside. Securities issued under this subsection may be in the form of debt obligations or trust certificates of beneficial interest, or both. Securities issued under this subsection shall have such maturities and bear such rate or rates of interest as may be determined by the corporation with the approval of the Secretary of the Treasury. Securities issued by the corporation under this subsection shall, to the same extent as securities which are direct obligations of or obligations guaranteed as to principal and interest by the United States, be deemed to be exempt securities within the meaning of laws administered by the Securities and Exchange Commission. Mortgages set aside pursuant to this subsection shall at all times be adequate to enable the corporation to make timely principal and interest payments on the securities issued and sold pursuant to this subsection.”.

1       (b) Section 306 of such Act is amended by adding at  
2 the end thereof the following new subsection:

3       “(g) The Association is authorized, upon such terms and  
4 conditions as it may deem appropriate, to guarantee the  
5 timely payment of principal of and interest on such trust  
6 certificates or other securities as shall (1) be issued by the  
7 Federal National Mortgage Association under section 304  
8 (d), or by any other issuer approved for the purposes of this  
9 subsection by the Association, and (2) be based on and  
10 backed by a trust or pool composed of mortgages which are  
11 insured under the National Housing Act or title V of the  
12 Housing Act of 1949, or which are insured or guaranteed  
13 under the Servicemen’s Readjustment Act of 1944 or chap-  
14 ter 37 of title 38, United States Code. The Association  
15 shall collect from the issuer a reasonable fee for any guaranty  
16 under this subsection and shall make such charges as it may  
17 determine to be reasonable for the analysis of any trust or  
18 other security arrangement proposed by the issuer. In the  
19 event the issuer is unable to make any payment of principal  
20 of or interest on any security guaranteed under this sub-  
21 section, the Association shall make such payment as and  
22 when due in cash, and thereupon shall be subrogated fully  
23 to the rights satisfied by such payment. Any Federal, State,  
24 or other law to the contrary notwithstanding, the Association  
25 is hereby empowered, in connection with any guaranty under

1 this subsection, whether before or after any default, to pro-  
2 vide by contract with the issuer for the extinguishment, upon  
3 default by the issuer, of any redemption, equitable, legal, or  
4 other right, title, or interest of the issuer in any mortgage  
5 or mortgages constituting the trust or pool against which the  
6 guaranteed securities are issued; and with respect to any  
7 issue of guaranteed securities, in the event of default and  
8 pursuant otherwise to the terms of the contract, the mort-  
9 gages that constitute such trust or pool shall become the  
10 absolute property of the Association subject only to the un-  
11 satisfied rights of the holders of the securities based on and  
12 backed by such trust or pool. The full faith and credit of the  
13 United States is pledged to the payment of all amounts  
14 which may be required to be paid under any guaranty under  
15 this subsection. There shall be excluded from the total  
16 amounts set forth in subsection (c) the amounts of any  
17 mortgages acquired by the Association as a result of its op-  
18 erations under this subsection.”.

19 SUBORDINATED AND CONVERTIBLE OBLIGATIONS

20 SEC. 805. Section 304 of the Federal National Mort-  
21 gage Association Charter Act is amended by adding thereto  
22 (after subsection (d) as added by section 804 of this Act)  
23 the following new subsection:

24 “(e) For the purposes of this section, the corporation  
25 is authorized to issue, upon the approval of the Secretary

1 of the Treasury, obligations which are subordinated to any  
2 or all other obligations of the corporation, including sub-  
3 sequent obligations. The obligations issued under this sub-  
4 section shall have such maturities and bear such rate or  
5 rates of interest as may be determined by the corporation  
6 with the approval of the Secretary of the Treasury and may  
7 be made redeemable at the option of the corporation before  
8 maturity in such manner as may be stipulated in such  
9 obligations. Any of such obligations may be made convert-  
10 ible into shares of common stock in such manner, at such  
11 price or prices, and at such time or times as may be stipulated  
12 therein. The total principal amount of such subordinated  
13 obligations which may be outstanding at any one time shall  
14 not exceed two times the sum of (1) the capital of the cor-  
15 poration represented by its outstanding common stock and  
16 (2) its surplus and undistributed earnings at such time. The  
17 outstanding total principal amount of such obligations which  
18 are entirely subordinated to the obligations of the corpora-  
19 tion issued or to be issued under subsection (b) shall be  
20 deemed to be capital of the corporation for the purpose of  
21 determining the aggregate amount of obligations issued  
22 under subsection (b) which may be outstanding at any  
23 one time. Obligations issued by the corporation under this  
24 subsection shall, to the same extent as securities which are  
25 direct obligations of or obligations guaranteed as to principal

1 or interest by the United States, be deemed to be exempt  
2 securities within the meaning of laws administered by the  
3 Securities and Exchange Commission. The corporation shall  
4 insert appropriate language in all of its obligations issued  
5 under this subsection clearly indicating that such obliga-  
6 tions, together with the interest thereon, are not guaranteed  
7 by the United States and do not constitute a debt or obliga-  
8 tion of the United States or of any agency or instrumen-  
9 tality thereof other than the corporation. The corporation is  
10 authorized to purchase in the open market any of its obli-  
11 gations outstanding under this subsection at any time and at  
12 any price.”.

13 AMENDMENTS TO OTHER LAWS

14 SEC. 806. (a) Section 306 (b) of the Housing Act of  
15 1959 is amended by striking out “Federal National Mort-  
16 gage Association pursuant” and inserting in lieu thereof  
17 “Government National Mortgage Association pursuant”.

18 (b) Section 312 (d) of the Housing Act of 1964 is  
19 amended by striking out “Federal” and inserting in lieu  
20 thereof “Government”.

21 (c) Section 5 (b) of the Department of Housing and  
22 Urban Development Act is amended—

23 (1) by striking out “The Federal” and inserting  
24 in lieu thereof “The Government”; and

25 (2) by striking out “, and the position of Presi-

1       dent of said Association is hereby allocated among the  
2       positions referred to in section 7 (c) hereof”.

3       (d) Section 7 (b) of the Department of Housing and  
4       Urban Development Act is repealed.

5       (e) Section 101 of the Government Corporation Control  
6       Act is amended by striking out “Federal National Mortgage  
7       Association” and inserting in lieu thereof “Government Na-  
8       tional Mortgage Association”.

9       (f) Section 13 (4) (F) of the Public Buildings Act  
10      of 1959 is amended by striking out “Federal” and inserting  
11      in lieu thereof “Government”.

12      (g) Section 6 (b) of the Participation Sales Act of  
13      1966 is amended by striking out “secondary market opera-  
14      tions carried on by the Federal” and inserting in lieu thereof  
15      “the Government”.

16      (h) Section 1820 (e) of title 38, United States Code, is  
17      amended by striking out “Federal National” in three places  
18      and inserting in lieu thereof, in each such place, “Govern-  
19      ment National”.

20      (i) Section 709 of title 18, United States Code, is  
21      amended by striking out “Federal National Mortgage As-  
22      sociation” each place it appears and inserting in lieu thereof,  
23      in each such place, “Government National Mortgage As-  
24      sociation”.

25      (j) Section 5136 of the Revised Statutes is amended

1 by inserting “or the Government National Mortgage Asso-  
2 ciation” immediately following “Federal National Mortgage  
3 Association”.

4 (k) Section 11 (h) of the Federal Home Loan Bank  
5 Act is amended by inserting “or the Government National  
6 Mortgage Association, in the stock of the Federal National  
7 Mortgage Association” immediately following “Federal Na-  
8 tional Mortgage Association”.

9 (l) Section 16 of the Federal Home Loan Bank Act  
10 is amended by inserting “or the Government National Mort-  
11 gage Association” immediately following “Federal National  
12 Mortgage Association”.

13 (m) Section 5 (c) of the Home Owners’ Loan Act of  
14 1933 is amended by inserting “or the Government National  
15 Mortgage Association,” immediately following “Federal Na-  
16 tional Mortgage Association” and by inserting “or the stock  
17 of the Federal National Mortgage Association” immediately  
18 after “any other agency of the United States”.

19 (n) Section 8 (8) (E) of the Federal Credit Union  
20 Act is amended by inserting “or the Government National  
21 Mortgage Association” immediately following “Federal Na-  
22 tional Mortgage Association”.

23 EFFECTIVE DATE

24 SEC. 807. The amendments made by this title shall be  
25 effective from and after a date, no more than one hundred

1 and twenty days following the date of enactment of this  
2 Act, as established by the Secretary of Housing and Urban  
3 Development. Notice of the establishment of such effective  
4 date shall be published in the Federal Register at least thirty  
5 days prior thereto.

6 SAVINGS PROVISIONS

7 SEC. 808. (a) No cause of action by or against the  
8 Federal National Mortgage Association existing prior to the  
9 effective date established pursuant to section 807 shall abate  
10 by reason of this enactment. Any such cause of action may  
11 thereafter be asserted by or against the appropriate corpo-  
12 ration.

13 (b) No suit, action, or other proceeding commenced  
14 by or against the Federal National Mortgage Association,  
15 or any officer thereof in his official capacity, prior to the  
16 effective date established pursuant to section 807 shall abate  
17 by reason of this enactment. A court may at any time there-  
18 after during the pendency of any such litigation, on its own  
19 motion or that of any party, order that the same may be  
20 maintained by or against the appropriate corporation or the  
21 appropriate corresponding officer thereof.

22 TRANSITIONAL PROVISIONS

23 SEC. 809. (a) On the effective date established pursuant  
24 to section 807 of this Act, each share of outstanding non-  
25 voting common stock, with a par value of \$100 per share,

1 of the Federal National Mortgage Association shall be  
2 changed into and shall become one share of voting common  
3 stock, without par value, of such corporation.

4 (b) (1) The provisions of section 308 (b) of the Federal  
5 National Mortgage Association Charter Act (as added by  
6 section 802 (x) (7) of this Act) shall be applicable only  
7 to the extent that its provisions do not conflict with this  
8 subsection.

9 (2) For a transitional period after the effective date  
10 established pursuant to section 807 of this Act, the board of  
11 directors of the Federal National Mortgage Association shall  
12 consist of nine persons. For a term expiring on the date of  
13 the first annual meeting of the corporation's stockholders, all  
14 members of the board shall be appointed by the Secretary  
15 of Housing and Urban Development. For a term beginning  
16 on such date, seven members of the board shall be appointed  
17 by the Secretary, and two members shall be elected by the  
18 common stockholders. For subsequent terms beginning prior  
19 to the termination of the transitional period, five members  
20 shall be appointed by the Secretary, and four members shall  
21 be elected by the common stockholders. For each term be-  
22 ginning prior to the termination of the transitional period,  
23 the Secretary shall appoint as a member of the board the  
24 president of the corporation.

1       (3) The transitional period referred to in paragraph  
2       (2) shall come to an end at such time as the board of di-  
3       rectors shall find, with the approval of the Secretary, that  
4       not less than one-third of the corporation's common stock  
5       is owned by persons or institutions in the mortgage lending,  
6       homebuilding, real estate, or related businesses; but in no  
7       event shall it end sooner than May 1, 1970, nor later than  
8       May 1, 1973.

9       (c) From the effective date established pursuant to sec-  
10      tion 807 and until the retirement of the last of the outstand-  
11      ing shares of its preferred stock, the Federal National Mort-  
12      gage Association shall be deemed to be a wholly owned  
13      corporation for the purposes of the Government Corporation  
14      Control Act.

15      (d) Those persons who are the officers and employees  
16      of the Federal National Mortgage Association immediately  
17      prior to the effective date established pursuant to section  
18      807 shall become the officers and employees of the Govern-  
19      ment National Mortgage Association on such date. The  
20      Federal National Mortgage Association and the Government  
21      National Mortgage Association shall provide by contract for  
22      the conditions and methods under which and by which the  
23      Federal National Mortgage Association during the transi-  
24      tional period may employ those individuals who are em-  
25      ployees of the Government National Mortgage Association

1 on such effective date; and may provide by contract for the  
2 operation by either of such corporations of any of the func-  
3 tions of the other. The Secretary of Housing and Urban  
4 Development shall make every reasonable effort to place in  
5 other comparable Federal positions any individuals who are  
6 career or career-conditional employees of the Government  
7 National Mortgage Association on such effective date and  
8 who are subsequently during the transitional period neither  
9 employed by the Federal National Mortgage Association nor  
10 retained by the Government National Mortgage Association.

## 11 TITLE IX—NATIONAL HOUSING PARTNERSHIPS

### 12 STATEMENT OF PURPOSE

13 SEC. 901. The Congress finds that the volume of  
14 housing being produced for families and individuals of low  
15 or moderate income must be increased to meet the national  
16 goal of a decent home and a suitable living environment for  
17 every American family, and declares that it is the policy of  
18 the United States to encourage the widest possible partici-  
19 pation by private enterprise in the provision of housing for  
20 low or moderate income families. The Congress has there-  
21 fore determined that one or more private organizations should  
22 be created to encourage maximum participation by private  
23 investors in programs and projects to provide low and mod-  
24 erate income housing.

## CREATION OF CORPORATIONS

SEC. 902. (a) There is hereby authorized to be created a private corporation for profit (hereinafter in this title referred to as the "corporation"). The corporation will not be an agency or establishment of the United States Government. The corporation shall be subject to the provisions of this title and, to the extent consistent with this title, to the District of Columbia Business Corporation Act (D.C. Code, sec. 29-901 et seq.).

(b) Whenever the President finds it in the national interest to do so, he may cause the creation of an additional corporation or additional corporations to carry out the purposes of this title. All the provisions of this title shall thereupon become applicable to each such corporation, and to the limited partnership formed by it pursuant to section 907 of this title.

(c) Nothing in this title shall be construed to preclude private persons from creating other corporations and organizing other partnerships, joint ventures, or associations for the purposes set forth in this title as the purposes of the corporation and the partnership described in section 907 of this title.

## PROCESS OF ORGANIZATION

SEC. 903. (a) The President of the United States shall appoint, by and with the advice and consent of the Senate, incorporators of the corporation, one of whom shall be desig-

1 nated by the President to serve as chairman. The incorpora-  
2 tors shall serve as the initial board of directors until the first  
3 annual meeting of stockholders or until their successors are  
4 elected and have qualified.

5 (b) The incorporators shall take whatever actions are  
6 necessary or appropriate to establish the corporation, includ-  
7 ing the filing of articles of incorporation as approved by the  
8 President.

9 (c) The incorporators shall also arrange for an initial  
10 offering of shares of stock in the corporation and of interests  
11 in the partnership described in section 907 of this title. If the  
12 incorporators deem it advisable in order to carry out the pur-  
13 poses of this title, the initial offering may be made upon  
14 terms which require the purchase of other securities of the  
15 corporation or of interests in such partnership.

16 DIRECTORS

17 SEC. 904. The corporation shall have a board of di-  
18 rectors (hereinafter in this section referred to as the  
19 "board"), consisting of fifteen members. Three members of  
20 the board shall be appointed by the President of the United  
21 States, by and with the advice and consent of the Senate,  
22 effective the date on which the other members are elected,  
23 and for terms of three years or until their successors have  
24 been appointed and have qualified, except that the first three  
25 members of the board so appointed shall continue in office

1 for terms of one, two, and three years, respectively, and any  
2 member so appointed to fill a vacancy shall be appointed  
3 only for the unexpired term of the director whom he suc-  
4 ceeds. Twelve members of the board shall be elected by the  
5 stockholders.

6 FINANCING THE CORPORATION

7 SEC. 905. The corporation shall have the power to  
8 create and issue the number of shares stated in its articles  
9 of incorporation. Such shares may be divided into one or  
10 more classes, any or all of which classes may consist of  
11 shares with par value or shares without par value, with such  
12 designations, preferences, voting powers, special or relative  
13 rights and such limitations, restrictions, or qualifications  
14 thereof as shall be stated in the articles of incorporation.  
15 The articles of incorporation may limit or deny the voting  
16 power of the shares of any class.

17 PURPOSES AND POWERS OF THE CORPORATION

18 SEC. 906. (a) In order to achieve the objectives and  
19 to carry out the purposes of this title, the corporation is  
20 authorized to—

21 (1) plan, initiate, and carry out, pursuant to Fed-  
22 eral programs or otherwise, the building or rehabilita-  
23 tion of housing and related facilities primarily for the  
24 benefit of families and individuals of low or moderate  
25 income;

(2) buy, own, manage, lease, or otherwise acquire or dispose of property in connection with the developments, projects, or undertakings referred to in clause (1) of this subsection (a) ; and

(3) provide such funds as may be necessary to accomplish the developments, projects, or undertakings referred to in clause (1) of this subsection (a) .

(b) Included in the activities authorized to the corporation for the accomplishment of the purposes indicated in subsection (a) of this section are, among others not specifically named—

(1) to enter into partnerships, limited partnerships, joint ventures, and other associations with individuals, corporations, and private and governmental agencies, organizations, and institutions;

(2) to act as manager or general partner of any such partnership, venture, or association;

(3) to conduct or contract for research and studies related to the development, demonstration, and evaluation of improved techniques and methods of constructing, rehabilitating, and maintaining housing;

(4) to provide technical assistance to nonprofit corporations, limited dividend corporations, and others with respect to the planning, financing, construction,

1 rehabilitation, maintenance, and management of housing  
2 for low and moderate income families and individuals;

3 (5) to make loans or grants, including grants of  
4 interests in housing and related facilities, to nonprofit  
5 corporations, limited dividend corporations, and others,  
6 in carrying out its activities under subsection (a) of this  
7 section; and

8 (6) to hire or accept the voluntary services of con-  
9 sultants, experts, advisory boards, and panels to aid the  
10 corporation in carrying out the purposes of this title.

11 (c) To carry out the foregoing purposes and engage in  
12 the foregoing activities, the corporation shall have the usual  
13 powers conferred upon a stock corporation by the District of  
14 Columbia Business Corporation Act.

15 NATIONAL HOUSING PARTNERSHIP

16 SEC. 907. (a) The corporation is authorized to arrange  
17 for the formation, as a separate organization, of a limited  
18 partnership (hereinafter in this title referred to as the "part-  
19 nership") under the District of Columbia Uniform Limited  
20 Partnership Act (D.C. Code, sec. 41-401 et seq.) for the  
21 purpose of engaging in any of the activities authorized for  
22 the corporation under section 906 of this title, and to enter  
23 into a partnership agreement governing the affairs of such  
24 limited partnership.

25 (b) The partnership shall be subject to the provisions;

1 to the extent consistent with this title, of (1) the District of  
2 Columbia Uniform Limited Partnership Act and (2) those  
3 provisions of the District of Columbia Uniform Partnership  
4 Act (D.C. Code, sec. 41-301 et seq.) made applicable by  
5 section 6 (2) of that Act (D.C. Code, sec 41-305 (2) ). Not-  
6 withstanding any inconsistency between the provisions of  
7 such Acts, or of any other law, and the provisions of this  
8 section, the partnership organized pursuant to this section  
9 shall be deemed to have the legal status of a limited partner-  
10 ship.

11 (c) The partnership is authorized to enter into partner-  
12 ships, limited partnerships, or joint ventures organized under  
13 applicable State or local law for the purpose of engaging in  
14 low and moderate income housing developments, projects, or  
15 undertakings in particular localities.

16 (d) The corporation shall be the general partner in the  
17 partnership. The capital of the partnership and the contri-  
18 butions of the partners shall be in such amounts and at such  
19 times as are set forth in or pursuant to the partnership  
20 agreement.

21 (e) The partnership agreement shall include provi-  
22 sions designed to assure that (1) the partnership shall par-  
23 ticipate in low and moderate income housing developments,  
24 projects, or undertakings in a manner designed to encourage  
25 the participation therein of local interests, and (2) in any

1 such development, project, or undertaking the partnership  
2 shall not subscribe to more than 25 per centum (including  
3 equity investments made in services or property) of the  
4 aggregate initial equity investment unless, in the judgment  
5 of the corporation as general partner, the balance of the  
6 required equity investment is not readily obtainable from  
7 other responsible investors residing or doing business in the  
8 local community.

9 (f) The partnership agreement may without limita-  
10 tion (1) permit each of the stockholders of the Corporation  
11 to become a member of the partnership as a limited partner,  
12 (2) authorize the inclusion of other limited partners in ad-  
13 dition to the stockholders of the corporation, (3) provide  
14 that the assignee of the partnership interest of a limited  
15 partner of the partnership who is also a stockholder of the  
16 corporation may not become a substituted limited partner  
17 unless he also acquired the assignor's stock of the corpora-  
18 tion, (4) include provisions requiring that the corporation  
19 as a general partner approve the substitution or addition  
20 of a member of the partnership.

21 (g) A corporation which is a limited partner in the  
22 partnership shall not become liable as a general partner by  
23 reason of the fact that (1) such corporation is a holder of  
24 shares of voting stock of the corporation constituting not  
25 more than 5 per centum of the total number of outstanding

1 shares of such stock and exercises any of the rights (including  
2 voting rights) of a holder of such shares, and/or (2) a per-  
3 son who is an officer or director of such corporation (or of  
4 another corporation which controls, or is subject to the con-  
5 trol of, or is under common control with, such corporation)  
6 is a director of the corporation and performs the duties of  
7 that office. The interest of a limited partner in the partnership  
8 shall not be treated as a stock interest in the corporation,  
9 notwithstanding that such interest of a limited partner may  
10 be proportionate to his stock interest in the corporation.

11 (h) The certificate of the partnership and any amend-  
12 ment thereof required by the District of Columbia Uniform  
13 Limited Partnership Act shall be executed and acknowledged  
14 by the corporation as member and by each other member  
15 of the partnership or his attorney-in-fact duly authorized by  
16 power of attorney in writing. The corporation may execute  
17 and acknowledge the certificate and any amendment thereof  
18 as attorney-in-fact for any member, member to be substi-  
19 tuted or added, or assigning member, by whom the certificate  
20 or amendment is required to be executed and acknowledged  
21 and who has appointed the corporation as such attorney.

22 REPORT TO CONGRESS AND RECORDS

23 SEC. 908. (a) The corporation shall submit an annual  
24 report to the President for transmittal to the Congress within

1 six months after the end of its fiscal year. The report shall  
2 include a comprehensive and detailed report of the opera-  
3 tions, activities, and financial condition of the corporation  
4 and the partnership under this title.

5 (b) The accounts of the corporation and of the part-  
6 nership shall be audited annually in accordance with generally  
7 accepted auditing standards by independent certified public  
8 accountants or independent licensed public accountants certi-  
9 fied or licensed by a regulatory authority of a State or other  
10 political subdivision of the United States.

11 ANTITRUST LAWS

12 SEC. 909. Nothing contained herein shall affect the ap-  
13 plicability of the Federal antitrust laws to the activities of the  
14 corporation and the partnership created under this Act and  
15 of the persons participating therein or in partnerships, limited  
16 partnerships, or joint ventures with either of them.

17 RIGHT TO REPEAL, ALTER, OR AMEND

18 SEC. 910. The right to repeal, alter, or amend this title  
19 at any time is expressly reserved.

20 AMENDMENT TO BANKING LAWS

21 SEC. 911. Paragraph "Seventh" of section 5136 of the  
22 Revised Statutes, as amended (12 U.S.C. 24), is amended  
23 by adding at the end thereof the following: "Notwithstand-  
24 ing any other provision in this paragraph, the association  
25 may purchase for its own account shares of stock issued by

1 a corporation authorized to be created pursuant to title IX  
2 of the Housing and Urban Development Act of 1968, and  
3 may make investments in a partnership, limited partnership,  
4 or joint venture formed pursuant to section 907 (a) or  
5 907 (c) of that title.”

## 6 TITLE X—RURAL HOUSING

### 7 HOUSING FOR LOW AND MODERATE INCOME PERSONS AND 8 FAMILIES

9 SEC. 1001. Title V of the Housing Act of 1949 is  
10 amended by adding at the end thereof the following new  
11 section:

#### 12 “LOANS TO PROVIDE OCCUPANT-OWNED, RENTAL, AND CO- 13 OPERATIVE HOUSING FOR LOW AND MODERATE INCOME 14 PERSONS AND FAMILIES

15 “SEC. 521. (a) Notwithstanding the provisions of sec-  
16 tions 502, 517 (a), and 515, loans to persons of low or  
17 moderate income under section 502 or 517 (a) (1), and  
18 loans under section 515 to provide rental or cooperative  
19 housing and related facilities for persons and families of  
20 low or moderate income or elderly persons and elderly  
21 families, shall bear interest at a rate prescribed by the  
22 Secretary at not less than a rate determined by the Secre-  
23 tary of the Treasury taking into consideration the current  
24 average market yield on outstanding marketable obligations  
25 of the United States with remaining periods to maturity

1 comparable to the average maturities of such loans, adjusted  
2 to the nearest one-eighth of 1 per centum, less not to exceed  
3 the difference between the adjusted rate determined by the  
4 Secretary of the Treasury and 1 per centum per annum:  
5 *Provided*, That such a loan may be made only when the  
6 Secretary determines that the needs of the applicant for  
7 necessary housing cannot be met with financial assistance  
8 from other sources including assistance under section 235  
9 or 236 of the National Housing Act.

10 “(b) Housing and related facilities provided with loans  
11 described in subsection (a) shall be located in rural areas;  
12 and applicants eligible for such loans under section 502 or  
13 517 (a) (1), or for occupancy of housing provided with  
14 such loans under section 515, shall include otherwise quali-  
15 fied nonrural residents who will become rural residents.

16 “(c) There shall be reimbursed to the Rural Housing  
17 Insurance Fund by annual appropriations the amounts by  
18 which nonprincipal payments made from the fund during  
19 each fiscal year to the holders of insured loans described in  
20 subsection (a) exceed interest due from the borrowers dur-  
21 ing each year; and the Secretary from time to time may  
22 issue notes to the Secretary of the Treasury under section  
23 517 (h) to obtain amounts equal to such unreimbursed excess  
24 payments, pending the annual reimbursement by appro-  
25 priation.”

## 1                   HOUSING FOR RURAL TRAINEES

2           SEC. 1002. Title V of the Housing Act of 1949 is  
3 amended by adding after section 521 (as added by section  
4 1001 of this Act) the following new section:

## 5                   “HOUSING FOR RURAL TRAINEES

6           “SEC. 522. (a) Upon the application of any State or  
7 political subdivision thereof, or any public or private non-  
8 profit organization, the Secretary is authorized, after con-  
9 sultation with the Secretary of Labor, the Secretary of  
10 Health, Education, and Welfare, the Secretary of Housing  
11 and Urban Development, and the Director of the Office of  
12 Economic Opportunity, and after the Secretary determines  
13 that the housing and related facilities cannot reasonably be  
14 provided in any other way, to provide financial and technical  
15 assistance for the establishment, in rural areas, of housing  
16 and related facilities for trainees and their families who are  
17 residents of a rural area and have a rural background, while  
18 such trainees are enrolled and participating in training  
19 courses designed to improve their employment capability.  
20 The selection of training sites and location of housing shall  
21 be made only after consideration of a labor area survey  
22 and full coordination among all Government agencies having  
23 primary responsibility for administering related programs.  
24           “(b) Housing and related facilities assisted under this  
25 section shall be safe and sanitary, constructed in the most eco-

1 nomical manner, and of modest design, giving due consid-  
2 eration to the purposes to be served and the needs of the  
3 occupants, and may, in the discretion of the Secretary, in-  
4 clude mobile family quarters. Design and location shall be  
5 such as to facilitate, as feasible, the use of such housing and  
6 related facilities for other purposes when no longer needed for  
7 the primary purpose.

8 “(c) The applicant shall contribute the necessary land,  
9 or funds to acquire such land, from its own resources, includ-  
10 ing land acquired by donation or from funds repayable under  
11 subsection (e) or borrowed from other sources.

12 “(d) No financial assistance shall be made available  
13 under this section unless, to the extent and for the periods re-  
14 quired by the Secretary, the applicant agrees that—

15 “(1) such housing will be maintained at all times  
16 in a safe and sanitary condition in accordance with stand-  
17 ards prescribed by State or local law, or, in the absence  
18 of such standards, with requirements prescribed by the  
19 Secretary;

20 “(2) priority shall be given at all times in grant-  
21 ing occupancy of such housing and facilities to the  
22 trainees and their families described in subsection (a);  
23 and

24 “(3) rentals charged them shall not exceed amounts  
25 approved by the Secretary after considering the portion

1 of the actual total family income which the family can  
2 afford to pay for rent while meeting its other immedi-  
3 ate needs during occupancy.

4 “(e) The Secretary may make advances pursuant to  
5 any contract for financial assistance under this section at such  
6 times and in such manner as may be specified in the contract.  
7 Such advances for the purchase of land shall be repayable  
8 with interest and within a period not to exceed thirty-three  
9 years and may be made upon such security, if any, as the  
10 Secretary requires. Advances for other purposes may be  
11 made repayable with or without interest or nonrepayable, as  
12 determined by the Secretary on the basis of the anticipated  
13 income and cost of operation of the housing and related facili-  
14 ties, and the ability of each applicant to finance such facilities.  
15 Any advances shall be limited to cover the capital costs of  
16 constructing such facilities, plus interest on borrowings to  
17 cover such costs.

18 “(f) Should housing and related facilities assisted pur-  
19 suant to a contract under this section be sold to an ineligible  
20 transferee or diverted to a use other than its primary purpose  
21 within a period specified in the contract, all advances made  
22 under such contract shall be repaid to the Secretary, up to the  
23 amount of the sales price or the fair value of the property as  
24 determined by the Secretary, whichever is higher, with inter-

1 est from the date of the sale or diversion. If no suitable alter-  
2 nate use of the property is available, as determined by the  
3 Secretary, after the purpose of this section can no longer be  
4 served, the property shall be returned to its original condition  
5 by the recipient of the assistance.

6 “ (g) Interest charged on advances made under this sec-  
7 tion shall be at a rate, prescribed by the Secretary, which  
8 shall be not less than a rate determined by the Secretary of  
9 the Treasury taking into consideration the current average  
10 market yield on outstanding marketable obligations of the  
11 United States with remaining periods to maturity comparable  
12 to the average maturities of such loans, adjusted to the near-  
13 est one-eighth of 1 per centum, less not to exceed the differ-  
14 ence between the adjusted rate determined by the Secretary  
15 of the Treasury and 1 per centum per annum, as determined  
16 by the Secretary.

17 “ (h) The Secretary shall prescribe regulations to insure  
18 that Federal funds expended under this section are not  
19 wasted or dissipated.

20 “ (i) As used in this section: (1) the term ‘related  
21 facilities’ shall include any necessary community rooms or  
22 buildings, infirmaries, utilities, access roads, water and sewer  
23 services, and the minimum fixed or movable equipment de-  
24 termined by the Secretary to be necessary to make the  
25 housing reasonably habitable by trainees and their families;

1 and (2) the term 'trainee' means any person receiving train-  
 2 ing under any federally assisted training program.

3 " (j) There are authorized to be appropriated such sums  
 4 as may be necessary to carry out this section."

#### 5 APPROPRIATIONS

6 SEC. 1003. Section 513 of the Housing Act of 1949 is  
 7 amended by—

8 (1) striking out "and (e)" and inserting in lieu  
 9 thereof "(e)"; and

10 (2) inserting before the period at the end thereof  
 11 the following: "; and (f) such sums as may be required  
 12 by the Secretary to administer the provisions of sections  
 13 235 and 236 of the National Housing Act".

#### 14 PURCHASE OF LAND FOR BUILDING SITES

15 SEC. 1004. Section 514 (f) (2) of the Housing Act of  
 16 1949 is amended by changing the semicolon to a comma and  
 17 adding the following at the end:

18 " (C) land necessary for an adequate site;".

#### 19 TITLE XI—MISCELLANEOUS

##### 20 MODEL CITIES

21 SEC. 1101. (a) Section 111 (b) of the Demonstration  
 22 Cities and Metropolitan Development Act of 1966 is  
 23 amended by—

24 (1) striking out the word "and" the third time it  
 25 appears; and

1           (2) inserting before the period at the end thereof  
2        “, and \$1,000,000,000 for each of the fiscal years end-  
3        ing on June 30, 1970 and June 30, 1971”.

4        (b) Section 111 (c) of such Act is amended to read as  
5 follows:

6        “(c) Any amounts appropriated under this section shall  
7 remain available until expended, and any amounts author-  
8 ized for any fiscal year under this section but not appropri-  
9 ated may be appropriated for any succeeding fiscal year  
10 commencing prior to July 1, 1971.”

11        URBAN RENEWAL DEMONSTRATION GRANT PROGRAM

12        SEC. 1102. (a) Section 314 (a) of the Housing Act of  
13 1954 is amended by—

14           (1) striking out “public bodies, including cities and  
15 other political subdivisions, to assist them” and inserting  
16 in lieu thereof “to assist”; and

17           (2) rewriting the second sentence to read as fol-  
18 lows: “No such grant shall exceed the cost, as deter-  
19 mined or estimated by the Secretary, of such activities  
20 or undertakings, including the cost of writing and pub-  
21 lishing the reports on such activities and undertakings.”

22        (b) Section 314 (c) of such Act is amended by striking  
23 out “\$10,000,000” and inserting in lieu thereof “\$20,-  
24 000,000.”

1 AUTHORIZATION FOR URBAN INFORMATION AND TECHNI-  
2 CAL ASSISTANCE SERVICES PROGRAM

3 SEC. 1103. Section 906 of the Demonstration Cities and  
4 Metropolitan Development Act of 1966 is amended to read  
5 as follows: "There are authorized to be appropriated such  
6 funds as are necessary to carry out the purposes of this title.  
7 All funds so appropriated shall remain available until  
8 expended."

9 ADVANCES IN TECHNOLOGY IN HOUSING AND URBAN  
10 DEVELOPMENT

11 SEC. 1104. (a) Section 1010 (d) of the Demonstration  
12 Cities and Metropolitan Development Act of 1966 is  
13 amended by inserting before the period at the end of the  
14 first sentence the following: ", which amounts shall be in-  
15 creased in subsequent fiscal years by such sums as may be  
16 necessary".

17 (b) Section 1010 (c) of such Act is amended by strik-  
18 ing out "two years" in the second sentence and inserting in  
19 lieu thereof "four years".

20 INTEREST RATE ON COLLEGE HOUSING LOANS

21 SEC. 1105. (a) Effective with respect to loans for proj-  
22 ects for which funds are reserved after June 30, 1968, sec-  
23 tion 401 (c) of the Housing Act of 1950 is amended by  
24 striking out all that follows the phrase "which shall be not

1 more than the” and inserting in lieu thereof “rate deter-  
2 mined by the Secretary of the Treasury taking into con-  
3 sideration the current average market yield on outstanding  
4 marketable obligations of the United States with remaining  
5 periods to maturity comparable to the average maturities  
6 of such loans, adjusted to the nearest one-eighth of 1 per  
7 centum, less not to exceed a rate of 1 per centum per annum  
8 as determined by the Secretary of Housing and Urban  
9 Development.”

10 (b) Effective with respect to notes or other obligations  
11 financing loan contracts for which funds are reserved after  
12 June 30, 1968, the second sentence of section 401 (e) of  
13 such Act is amended by striking out all that follows the  
14 phrase “which shall be not more than the” and inserting in  
15 lieu thereof “rate determined by the Secretary of the Treas-  
16 ury taking into consideration the current average market  
17 yield on outstanding marketable obligations of the United  
18 States with remaining periods to maturity comparable to the  
19 average maturities of such loans, adjusted to the nearest one-  
20 eighth of 1 per centum.”

21 **FEDERAL-STATE TRAINING PROGRAMS**

22 **SEC. 1106.** (a) Title VIII of the Housing Act of 1964  
23 is amended—

24 (1) by inserting after “urban centers,” in section  
25 801 (b) the following: “and with business firms and

1 associations, labor unions, and other interested associa-  
 2 tions and organizations,";

3 (2) by striking out "technical and professional  
 4 people" in sections 801 (b) (1) and 802 (a) (1) and  
 5 inserting in lieu thereof "technical, professional, and  
 6 other persons with the capacity to master and employ  
 7 such skills"; and

8 (3) by inserting after "which has responsibility  
 9 for community development" in sections 801 (b) (1)  
 10 and 802 (a) (1) the following: " , or by a private non-  
 11 profit organization which is conducting or has responsi-  
 12 bility for housing and community development pro-  
 13 grams".

14 (b) Section 805 of such Act is amended by inserting  
 15 "Guam, American Samoa, the Trust Territory of the Pacific  
 16 Islands," after "the Commonwealth of Puerto Rico,".

17 ADDITIONAL ASSISTANT SECRETARY OF HOUSING AND

18 URBAN DEVELOPMENT

19 SEC. 1107. (a) The first sentence of section 4 (a) of  
 20 the Department of Housing and Urban Development Act is  
 21 amended by striking out "four" and inserting in lieu thereof  
 22 "five".

23 (b) Paragraph (87) of section 5315 of title 5, United  
 24 States Code, is amended by striking out "(4)" and inserting  
 25 in lieu thereof "(5)".

## INTERNATIONAL HOUSING

SEC. 1108. Section 604 of the Housing Act of 1957 is amended to read as follows:

“SEC. 604. (a) The Secretary of Housing and Urban Development may exchange data relating to housing and urban planning and development with other nations and assemble such data from other nations, through participation in international conferences and other means, where such exchange or assembly is deemed by him to be beneficial in carrying out his responsibilities under the Department of Housing and Urban Development Act or other legislation. In carrying out his responsibilities under this subsection the Secretary may—

“(1) pay the expenses of participation in activities conducted under authority of this section including, but not limited to, the compensation, travel expense, and per diem in lieu of subsistence, of persons serving in an advisory capacity while away from their homes or regular places of business in connection with attendance at international meetings and conferences, or other travel for the purpose of exchange or assembly of data relating to housing and urban planning and development; but such travel expenses shall not exceed those authorized for regular officers and employees traveling in connection with said activities; and

1           “(2) accept from international organizations, for-  
2        eign countries, and private nonprofit foundations, funds,  
3        services, facilities, materials, and other donations to be  
4        utilized jointly in carrying out activities under this  
5        section.

6        “(b) International programs and activities carried out  
7        by the Secretary under the authority provided in subsection  
8        (a) shall be subject to the approval of the Secretary of  
9        State for the purpose of assuring that such authority shall  
10       be exercised in a manner consistent with the foreign policy  
11       of the United States.”

12       LOW-RENT PUBLIC HOUSING—CORPORATE STATUS

13       SEC. 1109. (a) The first sentence of section 3 of the  
14       United States Housing Act of 1937 is amended by striking  
15       “a body corporate of perpetual duration to be known as”.

16       (b) Section 17 of such Act is repealed. The capital stock  
17       referred to in such section shall be retired, and the sum of  
18       \$1,000,000 represented by such stock shall be returned to  
19       the Treasury of the United States.

20       (c) Such Act is amended by adding a new section 17  
21       as follows:

22       “SEC. 17. In the performance of, and with respect to,  
23       functions, powers, and duties under this Act, the Secretary  
24       shall have (in addition to any authority otherwise vested in  
25       him) the functions, powers, and duties set forth in subsec-

1 tions (a), (b), and (e) of section 402 of the Housing  
2 Act of 1950.”

3 (d) Section 101 of the Government Corporation Con-  
4 trol Act is amended by striking out “Federal Public Hous-  
5 ing Authority (or United States Housing Authority) and  
6 including public housing projects financed through appropri-  
7 ated funds and operations thereof;”.

8 ELIGIBILITY FOR RENT SUPPLEMENT PAYMENTS

9 SEC. 1110. Notwithstanding any other provision of law  
10 respecting the date after which a mortgage must have been  
11 approved for mortgage insurance under section 221 (d) (3),  
12 of the National Housing Act, the Secretary of Housing and  
13 Urban Development is authorized to make, and contract to  
14 make, rent supplement payments under the provisions of  
15 section 101 of the Housing and Urban Development Act of  
16 1965 to the owners of housing projects known as the 114th  
17 Street rehabilitation project and the 114th Street rehabili-  
18 tation project numbered 2, in New York City, New York,  
19 (project numbers 012-33501 and 012-33512).

20 CONSOLIDATION OF LOW-RENT PUBLIC HOUSING PROJECTS

21 IN THE DISTRICT OF COLUMBIA

22 SEC. 1111. All projects now operated and maintained  
23 by the National Capital Housing Authority pursuant to title  
24 I of the District of Columbia Alley Dwelling Act are deemed  
25 to be low-rent housing projects and may be consolidated, pur-

1 suant to section 15 (6) of the United States Housing Act of  
2 1937, into any contract of annual contributions covering proj-  
3 ects maintained and operated pursuant to title II of the Alley  
4 Dwelling Act.

#### 5 EARTHQUAKE STUDY

6 SEC. 1112. Section 5 of the Southeast Hurricane Dis-  
7 aster Relief Act of 1965 is amended by striking out "three  
8 years after the appropriation of funds for this study" and  
9 inserting in lieu thereof "June 30, 1969".

#### 10 TECHNICAL AMENDMENTS

11 SEC. 1113. (a) Section 110 (c) of the Housing Act of  
12 1949 is amended by striking "paragraphs (7), (8), and  
13 (9)" in the second unnumbered paragraph following the  
14 numbered paragraphs and inserting in lieu thereof "para-  
15 graphs (7), (8), (9), and (10)".

16 (b) Section 110 (d) of the Housing Act of 1949 is  
17 amended by deleting "clauses (2), (3)" and inserting in  
18 lieu thereof "clauses (2), (3), (7)".

19 (c) Section 110 (e) of the Housing Act of 1949 is  
20 amended by striking out "and (9)" in clause (i) and insert-  
21 ing in lieu thereof "(9), and (10)".

22 (d) Section 1101 (c) (3) of the National Housing Act  
23 is amended by inserting "from the beginning of amortiza-  
24 tion of the mortgage" immediately after "twenty-five years".

25 (e) Section 213 (o) of the National Housing Act is

1 amended by adding at the end thereof four new sentences  
2 as follows: “Moneys in the Cooperative Management Hous-  
3 ing Insurance Fund not needed for current operations of  
4 the fund shall be deposited with the Treasurer of the United  
5 States to the credit of the Cooperative Management Hous-  
6 ing Insurance Fund or invested in bonds or other obliga-  
7 tions of, or in bonds or other obligations guaranteed as to  
8 principal and interest by, the United States. The Secretary  
9 may, with the approval of the Secretary of the Treasury,  
10 purchase in the open market debentures which are the  
11 obligations of the Cooperative Management Housing Insur-  
12 ance Fund. Such purchases shall be made at a price which  
13 will provide an investment yield of not less than the yield  
14 obtainable from other investments authorized by this sub-  
15 section. Debentures so purchased shall be canceled and not  
16 reissued.”

17 (f) Section 810 (e) of the National Housing Act is  
18 amended by—

19 (1) striking “private corporation, association, co-  
20 operative society, or trust” in the first sentence and  
21 inserting in lieu thereof “mortgagor approved by the  
22 Secretary”, and

23 (2) striking “corporation, association, cooperative  
24 society, or trust” in the third and fourth sentences and  
25 inserting in lieu thereof “mortgagor”.

# A BILL

---

To assist in the provision of housing for low and moderate income families, and to extend and amend laws relating to housing and urban development.

---

By Mr. SPARKMAN

---

FEBRUARY 26, 1968

Read twice and referred to the Committee on  
Banking and Currency

- COSPONSORS. Sens. Mondale, Percy, and Clark were added as cosponsors of S. 2871, to amend the National School Lunch Act. p. S2068
- HOUSING. Sen. Williams submitted an amendment which he intends to propose to S. 029, to assist in the provision of housing for low- and moderate-income families. p. S2068
- FARM PROGRAM. Sen. Monroney praised the President's farm message and urged Congress "to give immediate attention to these proposals." pp. S2077-8
- AWARDS. Sen. Mansfield stated that Bertha C. Olsen, Chief of the Technical Service Branch of the School Lunch Division, C & MS, and Coit A. Suneson, a research agronomist with the Cereals Research Division, ARS, received honorary degrees on Founder's Day from Montana State University. pp. S2079-80  
Sen. Carlson cited four Kans. farmers who were awarded certificates for 35 years of voluntary reporting on their local crop and livestock conditions (p. S209).
- TRAINING. Sen. Harris inserted an address supporting "the need to redevelop rural America through the creation of better job opportunities, better educational facilities, and better housing and health facilities." pp. S2080-1
- FARMERS HOME ADMINISTRATION. Sen. Fulbright inserted information on the status of loan and grant applications for water and sewer projects in Ark. pp. S2081-4
- MARKET NEWS. Sen. Monroney inserted a resolution passed by the Okla. Legislature asking that Secretary Freeman reconsider and rescind the order closing the Tulsa office of the Market News Service. p. S2094
- POTATOES. Sen. Muskie inserted an article pointing out that Maine's potato farmer has "quickly seized the opportunity of converting part of his acreage to sugar beets, and how this decision is paying off." pp. S2094-5
- LATINAMERICA. Sen. Brewster inserted a speech revealing "the human side of the emergence of an economically sound, socially stable, and politically mature state" in Latin America. pp. S2096-8

EXTENSION OF REMARKS

- VETERANS' BENEFITS. Rep. Howard commended President Johnson's signing of an Executive Order to create new job opportunities and education for Vietnam veterans. p. E1433
- EMPLOYMENT. Rep. Bingham inserted an article summarizing Rep. Ryan's statement in which he criticized the Administration's "failures in preventing racial discrimination in employment..." p. E1437
- FIRE SAFETY. Rep. Miller, Calif., inserted the President's remarks upon signing the Fire Research and Safety Act. p. E1456

23. FOREIGN AID. Rep. Rosenthal inserted AID Administrator Gaud's testimony before the House Foreign Affairs on foreign aid authorization legislation. pp. E1468-9
24. CENSUS. Rep. Ashbrook stated that "there is still a very real threat that for the 1970 census the American people will be asked questions which have nothing to do with the population of the United States." p. E1471

BILLS INTRODUCED

25. LOANS. H. R. 15562 by Rep. Matsunaga, (see Digest No. 28, item 41), would extend from June 30, 1968 to June 30, 1970 FHA authority for leasehold loans in Hawaii.
26. HOLIDAYS. H. R. 15709 by Rep. Barrett, to provide for uniform annual observances of certain legal public holidays on Mondays; to Judiciary Committee.
27. LUMBER. H. R. 15715 by Rep. Teague, Tex., to provide for the grading by the Department of Commerce of all soft-wood lumber and all plywood sold in interstate or foreign commerce; to Interstate and Foreign Commerce Committee.
28. WILDLIFE. H. R. 15717 by Rep. Wyatt, to declare and determine the policy of the Congress with respect to the primary authority of the several States to control, regulate, and manage fish and wildlife within their territorial boundaries; to Merchant Marine and Fisheries Committee.
- H. Con. Res. 667 by Rep. Conyers,
29. PROGRAM ANALYSIS./ creating the Joint Select Committee on Government Program Analysis and Evaluation; to Rules Committee.

PRINTED HEARINGS RECEIVED BY THIS OFFICE

30. LOANS. S. 2714, FHA emergency loans to farmers who have suffered losses as result of national disaster. S. Agriculture and Forestry Committee.
31. PACKERS AND STOCKYARDS. S. 1149 and H. R. 10673, management and regulation of stockyards. S. Agriculture and Forestry Committee.
32. ATOMIC ENERGY. Licensing and regulation of nuclear reactors. Part 2. Jt. Committee on Atomic Energy.
33. TRANSPORTATION. S. 927, discriminatory taxation of common carriers. S. Commerce Committee.
34. BALANCE OF PAYMENTS. Administration's balance-of-payments proposals. Part 1. H. Ways and Means Committee.
35. RESEARCH. S. 2598 and H. R. 5404, to amend the National Science Foundation Act of 1950 to make changes and improvements in the organization, etc. S. Labor and Public Welfare Committee.
36. EDUCATION. H. R. 8525, Vocational Education Improvement Act Amendments of 1967. Part 2. H. Education and Labor Committee.

90TH CONGRESS  
2D SESSION

# S. 3029

---

IN THE SENATE OF THE UNITED STATES

MARCH 4, 1968

Referred to the Committee on Banking and Currency and ordered to be printed

---

## AMENDMENT

Intended to be proposed by Mr. WILLIAMS of New Jersey to S. 3029, a bill to assist in the provision of housing for low- and moderate-income families, and to extend and amend laws relating to housing and urban development. viz: On page 154, add the following new title:

1 TITLE XII

2 SEC. 1201. This title may be cited as "The Interstate  
3 Land Sales Full Disclosure Act".

4 DEFINITIONS

5 SEC. 1202. For the purposes of this Act, the term—

6 (1) "Secretary" means the Secretary of the De-  
7 partment of Housing and Urban Development;

8 (2) "person" means an individual, any unincor-

1       porated organization, partnership, association, corpora-  
2       tion, trust, or estate;

3           (3) “subdivision” and “subdivided lands” means  
4       any land which is divided or proposed to be divided  
5       into twenty-five or more lots, parcels, units or interests,  
6       whether contiguous or not, for the purpose of offer,  
7       sale, or lease as part of a common promotional plan;

8           (4) “developer” means any person (i) who, hav-  
9       ing an interest in land, causes it, directly or indirectly,  
10      to be divided into a subdivision, or who acquires an  
11      interest in a subdivision, (ii) who, directly or indirectly,  
12      sells or leases, or offers to sell or lease, or advertises for  
13      sale or lease any interest, lot, or parcel in such sub-  
14      division, and (iii) who is directly or indirectly con-  
15      trolled by, or under direct or indirect common control,  
16      with any of the foregoing;

17          (5) “agent” means any person who represents, or  
18      acts for or on behalf of, a developer in selling or leas-  
19      ing, or offering to sell or lease, any interest, lot, or  
20      parcel in a subdivision; but shall not include an attorney  
21      at law whose representation of another person consists  
22      solely of rendering legal services;

23          (6) “blanket encumbrance” means a trust deed,  
24      mortgage, or any other lien or encumbrance, including  
25      an option or contract to sell or trust agreement, affect-

1     ing a subdivision or affecting more than one lot or  
2     parcel offered within a subdivision; except that such  
3     term shall not include any lien or other encumbrance  
4     arising as the result of the imposition of any tax or  
5     assessment by any public authority;

6           (7) "interstate commerce" means trade or com-  
7     merce among the several States, or between the Dis-  
8     trict of Columbia, Commonwealth of Puerto Rico, the  
9     Canal Zone, the Virgin Islands, or any possession of  
10    the United States or between any foreign country and  
11    any State of the United States, the District of Columbia,  
12    the Commonwealth of Puerto Rico, the Canal Zone,  
13    the Virgin Islands, or any possession of the United  
14    States".

15           (8) "investors" means actual and prospective pur-  
16    chasers or lessees of any interest, lot, or parcel in any  
17    subdivision;

18           (9) "prospectus" means a written brochure or cir-  
19    cular meeting the requirements of section 8 of this Act;

20           (10) "offer" includes every inducement, sollicita-  
21    tion, or attempt to encourage a person to acquire an  
22    interest in a subdivision;

23           (11) "sale" or "sell" means any contract of sale  
24    or disposition for value of an interest in a subdivision.

## 1 EXEMPTIONS

2 SEC. 1203. (a) The provisions of this Act shall not  
3 apply to—

4 (1) the sale or lease of real estate not pursuant to  
5 a common promotional plan to offer or sell 25 or more  
6 parcels of subdivided land;

7 (2) the sale or lease of any improved land on which  
8 there is a residential, commercial, or industrial build-  
9 ing, or to the sale or lease of land under a contract ob-  
10 ligating the seller to erect a dwelling thereon within a  
11 period of two years;

12 (3) the sale of real estate under or pursuant to  
13 court order;

14 (4) the sale of evidences of indebtedness secured  
15 by a mortgage or deed of trust on real estate;

16 (5) the sale of securities issued by a real estate in-  
17 vestment trust and subject to any State or Federal  
18 statute;

19 (6) offers to sell or dispositions by any government  
20 or government agency;

21 (7) offers to sell and dispositions of cemetery lots  
22 or interests;

23 (8) any interest, lot, or parcel which is a part of  
24 a subdivision within, and offered and sold only to per-  
25 sons resident within, a single State or territory, where

1 the developer of such subdivision is a person resident  
2 and doing business within, or, if a corporation, incor-  
3 porated by and doing business within, such State or  
4 territory.

5 (b) The Secretary may from time to time by its rules  
6 and regulations, and subject to such terms and conditions  
7 as may be prescribed therein, exempt from the provisions  
8 of this Act any interests in a subdivision, if he finds that the  
9 enforcement of this Act with respect to such interests is  
10 not necessary in the public interest and for the protection  
11 of purchasers by reason of the small amount involved or the  
12 limited character of the public offering; but no interests  
13 shall be exempted under this subsection where the aggregate  
14 amount at which the lots, parcels, or interests within the  
15 subdivision are to be sold or leased exceeds \$300,000.

16 PROHIBITIONS RELATING TO THE SALE OR LEASE OF  
17 INTEREST IN SUBDIVISIONS

18 SEC. 1204. (a) It shall be unlawful for any developer or  
19 agent, directly or indirectly, to make use of any means or  
20 instruments of transportation or communication in interstate  
21 commerce, or of the mails, to sell or lease, or offer to sell or  
22 lease any interest, lot, or parcel in any subdivision unless a  
23 registration statement with respect to such interests, lots,  
24 or parcels is in effect in accordance with section 7 of this Act.

25 (b) While a registration is in effect with respect thereto

1 it shall be unlawful for any developer or agent, directly or  
2 indirectly, to make use of any means or instruments of trans-  
3 portation or communication in interstate commerce, or of the  
4 mails, to sell or lease, or offer to sell or lease, any interest,  
5 lot, or parcel in a subdivision unless a prospectus is furnished  
6 by such developer or agent to the investor sufficiently before  
7 any contract or agreement for the sale or lease of such  
8 interest, lot, or parcel becomes binding on the purchaser to  
9 afford him a reasonable opportunity to examine it; but in no  
10 event shall the time be less than forty-eight hours.

11 REGISTRATION OF INTERESTS IN SUBDIVISIONS AND

12 SIGNING OF REGISTRATION STATEMENT

13 SEC. 1205. (a) Any interest, lot, or parcel in a subdi-  
14 vision may be registered with the Secretary under the terms  
15 and conditions hereinafter provided, by filing a registration  
16 statement in triplicate, at least one of which shall be signed by  
17 each developer, its principal executive officer or officers, and  
18 the majority of its board of directors or persons performing  
19 similar functions (or, if there is no board of directors or  
20 persons performing similar functions, by the majority of the  
21 persons or board having the power of management of the  
22 developer). Signatures of all such persons when written on  
23 the said registration statements shall be presumed to have  
24 been so written by authority of the person whose signature is

1 so affixed and the burden of proof, in the event such author-  
2 ity shall be denied shall be upon the party denying the same.  
3 The affixing of any signature without the authority of the  
4 purported signer shall constitute a violation of this Act. A  
5 registration statement shall be deemed effective only as to the  
6 interests, lots, or parcels specified therein as proposed to be  
7 offered.

8 (b) At the time of filing a registration statement the  
9 developer shall pay to the Secretary a fee of one-fiftieth of  
10 1 per centum of the maximum aggregate price at which such  
11 lots, parcels, or interests are proposed to be offered, but in no  
12 case shall the fee be more than \$1,000.

13 (c) The filing with the Secretary of a registration  
14 statement, or of an amendment to a registration statement,  
15 shall be deemed to have taken place upon the receipt there-  
16 of, but the filing of a registration statement shall not be  
17 deemed to have taken place unless it is accompanied by pay-  
18 ment of the fee required by subsection (b).

19 (d) The information contained in or filed with any reg-  
20 istration statement shall be made available to the public under  
21 such regulations as the Secretary may prescribe and copies  
22 thereof, photostatic or otherwise, shall be furnished to every  
23 applicant at such reasonable charge as the Secretary may  
24 prescribe.

## 1 INFORMATION REQUIRED IN REGISTRATION STATEMENT

2 SEC. 1206. (a) The registration statement shall contain  
3 the information and be accompanied by the documents speci-  
4 fied hereinafter in this section—

5 (1) the name and address of each person having an  
6 interest in the subdivision and, the extent of such inter-  
7 ests and the purchase price thereof;

8 (2) a legal description of, and a statement of the  
9 total area included in, the subdivision, together with a  
10 map showing the division proposed and the dimensions  
11 of the interests, lots, or parcels to be registered, the  
12 topography of the subdivision, and its relation to existing  
13 streets and roads;

14 (3) a statement of the condition of the title to the  
15 land comprising the subdivision, including all encum-  
16 brances thereon;

17 (4) a statement of the terms and conditions, in-  
18 cluding the selling price or rent at which it is proposed  
19 to dispose of the interests in the subdivision;

20 (5) a statement of the present condition of access  
21 to, and sewage disposal facilities and public utilities (in-  
22 cluding water, electricity, gas, and telephone facilities)  
23 in, the subdivision and the proximity of the subdivision  
24 to cities, towns, or villages, and of improvements to be

1 installed by the developer and his schedule for com-  
2 pletion;

3 (6) in the case of any subdivision or portion thereof  
4 against which there exists a blanket encumbrance, a  
5 statement of the consequences for an individual investor  
6 of a failure by the person or persons bound to fulfill  
7 obligations under the instrument or instruments creating  
8 such encumbrance and the steps, if any, taken to protect  
9 the investor in such eventuality;

10 (7) (a) copy of its articles of incorporation, with  
11 all amendments thereto and of its existing bylaws or  
12 instruments corresponding thereto, whatever the name,  
13 if the developer be a corporation; (b) copy of all in-  
14 struments by which the trust is created or declared, if  
15 the developer is a trust; (c) a copy of its articles of  
16 partnership or association and all other papers pertain-  
17 ing to its organization, if the developer is a partnership,  
18 unincorporated association, joint stock company, or any  
19 other form or organization, or if the purported holder of  
20 legal title is a person other than developer, copies of the  
21 above documents for such person;

22 (8) copies of the deed or other instrument estab-  
23 lishing title to the subdivision in the developer or other

1 person and copies of any instrument creating a lien or  
2 encumbrance upon the title of developer or other per-  
3 son and copies of any instrument creating a lien or en-  
4 cumbrance upon the title of developer or other person;

5 (9) a copy of the opinion or opinions of counsel  
6 in respect to the title to the subdivision of developer  
7 or other person, or a copy of the title insurance policy  
8 guaranteeing such title;

9 (10) copies of all forms of conveyance to be used  
10 in selling interests, lots, or parcels to investors;

11 (11) copies of instruments creating easements or  
12 restrictions or other encumbrance;

13 (12) such certified or uncertified financial state-  
14 ments as the Secretary may by rule or regulation re-  
15 quire; and

16 (13) such other information and such other doc-  
17 uments as the Secretary may by rules or regulations  
18 require as being necessary or appropriate for the pro-  
19 tection of investors.

20 (b) If any engineer, or appraiser, or any person whose  
21 profession gives authority to a statement made by him, is  
22 named as having prepared or certified any part of the regis-  
23 tration statement, or is named as having prepared or certi-  
24 fied a report or valuation for use in connection with the regis-  
25 tration statement, the written consent of such person shall

1 be filed with the registration statement. If any such person  
2 is named as having prepared or certified a report or valua-  
3 tion (other than a public official document or statement)  
4 which is used in connection with the registration statement,  
5 but is not named as having prepared or certified such report  
6 or valuation for use in connection with the registration state-  
7 ment, the written consent of such person shall be filed with  
8 the registration statement unless the Secretary dispenses  
9 with such filing as impracticable or as involving undue hard-  
10 ship on the person filing the registration statement.

11 TAKING EFFECT OF REGISTRATION STATEMENTS AND  
12 AMENDMENTS THERETO

13 SEC. 1207. (a) Except as hereinafter provided, the  
14 effective date of a registration statement shall be the thirtieth  
15 day after the filing thereof or such earlier date as the Secre-  
16 tary may determine, having due regard to the public interest  
17 and the protection of investors. If any amendment to any  
18 such statement is filed prior to the effective date of such state-  
19 ment, the registration statement shall be deemed to have  
20 been filed when such amendment was filed; except that an  
21 amendment filed with the consent of the Secretary, prior  
22 to the effective date of the registration statement, or filed  
23 pursuant to an order of the Secretary, shall be treated as  
24 a part of the registration statement. When the subdivider

1 registers additional lands to be offered for disposition, he  
2 may consolidate the subsequent registration with any earlier  
3 registration offering subdivided land for disposition under  
4 the same promotional plan. At the time of consolidation,  
5 the subdivider shall include in the consolidated registration  
6 statement any material changes in the information contained  
7 in the earlier registration statement.

8       (b) If it appears to the Secretary that a registration  
9 statement is on its face incomplete or inaccurate in any ma-  
10 terial respect, the Secretary may, after notice by personal  
11 service or the sending of confirmed telegraphic notice not  
12 later than ten days after the filing of the registration state-  
13 ment, and opportunity for hearing (at a time fixed by the  
14 Secretary) within twenty days after such notice by per-  
15 sonal service or the sending of such telegraphic notice, issue  
16 an order prior to the effective date of registration refusing  
17 to permit such statement to become effective until it has been  
18 amended in accordance with such order. When such state-  
19 ment has been amended in accordance with such order the  
20 Secretary shall so declare and the registration shall become  
21 effective at the time provided in subsection (a) or upon  
22 the date of such declaration, whichever date is the later.

23       (c) If, at any time subsequent to the effective date of  
24 registration, a change shall occur affecting any material fact  
25 required to be stated in the registration statement or which

1 makes any such fact misleading, the developer shall promptly  
2 file an amendment thereto. An amendment filed after the  
3 effective date of the registration statement, if such amend-  
4 ment, upon its face, appears to the Secretary not to be  
5 incomplete or inaccurate in any material respect, shall be-  
6 come effective on such date as the Secretary may deter-  
7 mine, having due regard to the public interest and the  
8 protection of investors. Upon receipt of any such amend-  
9 ment, the Secretary may, if he determines such action to  
10 be necessary or appropriate in the public interest or for the  
11 protection of investors, suspend the registration until the  
12 amendment becomes effective.

13 (d) If it appears to the Secretary at any time that  
14 the registration statement includes any untrue statement of  
15 a material fact or omits to state any material fact required  
16 to be stated therein or necessary to make the statements  
17 therein not misleading, the Secretary may, after notice  
18 by personal service or the sending of confirmed telegraphic  
19 notice, and after opportunity for hearing (at a time fixed  
20 by the Secretary) within fifteen days after such notice  
21 by personal service or the sending of such telegraphic notice,  
22 issue a stop order suspending the effectiveness of the reg-  
23 istration statement. When such statement has been amended  
24 in accordance with such stop order the Secretary shall so

1 declare and thereupon the stop order shall cease to be  
2 effective.

3 (e) The Secretary is hereby empowered to make an  
4 examination in any case in order to determine whether a  
5 stop order should issue under subsection (d). In making  
6 such examination the Secretary or any officer or officers  
7 designated by him shall have access to and may demand the  
8 production of any books and papers of, and may administer  
9 oaths and affirmations to and examine, the developer, any  
10 agents, or any other person, in respect of any matter relevant  
11 to the examination. If the developer or any agents shall fail  
12 to cooperate, or shall obstruct or refuse to permit the making  
13 of an examination, such conduct shall be proper ground for  
14 the issuance of a stop order.

15 (f) Any notice required under this section shall be sent  
16 to or served on the developer.

17 INFORMATION REQUIRED IN PROSPECTUS

18 SEC. 1208. (a) A prospectus relating to interests, lots,  
19 or parcels in a subdivision shall contain the information con-  
20 tained in the registration statement, but need not include the  
21 documents referred to in paragraphs (6) to (11), inclu-  
22 sive, of section 6 of this Act and shall contain such further  
23 information as may be contained in amendments filed pursu-  
24 ant to and declared effective under section 7 (c) of this Act.  
25 A prospectus shall also contain such other information as

1 the Secretary may by rules or regulations require as being  
2 necessary or appropriate in the public interest or for the  
3 protection of investors.

4 (b) The prospectus shall not be used for any promo-  
5 tional purposes before registration becomes effective and  
6 then only if it is used in its entirety. No person may adver-  
7 tise or represent that the Secretary approves or recommends  
8 the subdivided lands or sale thereof. No portion of the  
9 prospectus shall be underscored, italicized, or printed in  
10 larger or bolder type than the balance of the statement  
11 unless the Secretary requires or permits it.

12 COOPERATION WITH STATE AUTHORITIES

13 SEC. 1209. (a) In enforcing this Act the Secretary  
14 shall cooperate with State authorities charged with the  
15 responsibility of regulating the sale of interests in subdivi-  
16 sions which are also subject to this Act and may accept for  
17 filing under section 5 of this Act and declare effective as a  
18 registration statement, if he finds such action to be appro-  
19 priate in the public interest or for the protection of investors,  
20 material filed and found acceptable by such authorities.

21 (b) Nothing in this title shall affect the jurisdiction  
22 of the real estate commission (or any agency or office per-  
23 forming like functions) of any State or territory of the  
24 United States, or the District of Columbia, over any sub-  
25 division or any person.

1 CIVIL LIABILITIES ON ACCOUNT OF FALSE REGISTRATION  
2 STATEMENT

3 SEC. 1210. (a) In case any part of the registration  
4 statement, when such part became effective, contained an  
5 untrue statement of a material fact or omitted to state a  
6 material fact required to be stated therein or necessary to  
7 make the statements therein not misleading, any person  
8 acquiring such interest, lot, or parcel in a subdivision (unless  
9 it is proved that at the time of such acquisition he knew  
10 of such untruth or omission) may, either at law or in  
11 equity, in any court of competent jurisdiction, sue—

12 (1) every person who signed the registration state-  
13 ment;

14 (2) every person who was a director of (or person  
15 performing similar functions) or partner in, the devel-  
16 oper at the time of the filing of the part of the regis-  
17 tration statement with respect to which his liability is  
18 asserted;

19 (3) every person who, with his consent, is named  
20 in the registration statement as being or about to become  
21 a director, person performing similar functions, or  
22 partner; and

23 (4) every engineer, or appraiser, or any person  
24 whose profession gives authority to a statement made by  
25 him, who has with his consent been named as having

1 prepared or certified any part of the registration state-  
2 ment, or as having prepared or certified any report or  
3 valuation which is used in connection with the registra-  
4 tion statement, with respect to the statement in such  
5 registration statement, report, or valuation, which pur-  
6 ports to have been prepared or certified by him.

7 (b) Notwithstanding the provisions of subsection (a)  
8 no person, other than the developer shall be liable as pro-  
9 vided therein who shall sustain the burden of proof—

10 (1) that before the effective date of the part of the  
11 registration statement with respect to which his liability  
12 is asserted (A) he had resigned from or had taken such  
13 steps as are permitted by law to resign from, or ceased  
14 or refused to act in, every office, capacity, or relationship  
15 in which he was described in the registration state-  
16 ment as acting or agreeing to act, and (B) he had  
17 advised the Secretary and the developer in writing  
18 that he had taken such action and that he would not be  
19 responsible for such part of the registration statement; or

20 (2) that if such part of the registration statement  
21 became effective without his knowledge, upon becoming  
22 aware of such fact he forthwith acted and advised the  
23 Secretary, in accordance with paragraph (1), and in  
24 addition, gave reasonable public notice that such part

1 of the registration statement had become effective with-  
2 out his knowledge; or

3 (3) that (A) as regards any part of the registra-  
4 tion statement not purporting to be made on the author-  
5 ity of an expert, and not purporting to be a copy of or  
6 extract from a report or valuation of an expert, and not  
7 purporting to be made on the authority of a public  
8 official document or statement, he had, after reason-  
9 able investigation, reasonable ground to believe and did  
10 believe, at the time such part of the registration state-  
11 ment became effective, that the statements therein were  
12 true and that there was no omission to state a material  
13 fact required to be stated therein or necessary to make  
14 the statements therein not misleading; and (B) as re-  
15 gards any part of the registration statement purporting  
16 to be made upon his authority as an expert or purport-  
17 ing to be a copy of or extract from a report or valua-  
18 tion of himself as an expert, (i) he had, after reason-  
19 able investigation, reasonable ground to believe and did  
20 believe, at the time such part of the registration state-  
21 ment became effective, that the statements therein were  
22 true and that there was no omission to state a material  
23 fact required to be stated therein or necessary to make  
24 the statements therein not misleading, or (ii) such part  
25 of the registration statement did not fairly represent his

statement as an expert or was not a fair copy of or extract from his report or valuation as an expert; and (C) as regards any part of the registration statement purported to be made on the authority of an expert (other than himself) or purporting to be a copy of or extract from a report or valuation of an expert (other than himself), he had no reasonable ground to believe and did not believe, at the time such part of the registration statement became effective, that the statements herein were untrue or that there was an omission to state a material fact required to be stated therein or necessary to make the statements therein not misleading, or that such part of the registration statement did not fairly represent the statement of the expert or was not a fair copy of or extract from the report or valuation of the expert. The Secretary shall for the purposes of this subsection by rules and regulations define and prescribe the means reasonably designed to prevent such transactions, practices or courses of business as are fraudulent and deceptive; and (D) as regards any part of the registration statement purporting to be a statement made by an official person or purporting to be a copy of or extract from a public official document, he had no reasonable ground to believe and did not believe, at the time such part of the registration statement became effective, that

1 the statements therein were untrue, or that there was an  
2 omission to state a material fact required to be stated  
3 therein or necessary to make the statements therein not  
4 misleading, or that such part of the registration state-  
5 ment did not fairly represent the statement made by the  
6 official person or was not a fair copy of or extract from  
7 the public official document.

8 (c) In determining, for the purpose of paragraph (3)  
9 of subsection (b) of this section, what constitutes reason-  
10 able investigation and reasonable ground for belief, the  
11 standard of reasonableness shall be that required of a prudent  
12 man in the management of his own property.

13 (d) The suit authorized under subsection (a) may be  
14 to recover such damages as shall represent the difference be-  
15 tween the amount paid for the interest, lot, or parcel (not  
16 exceeding the price at which it was offered to the public)  
17 and (1) the value thereof as of the time such suit was  
18 brought, or (2) the price at which such interest, lot, or  
19 parcel shall have been disposed of in the market before suit,  
20 or (3) the price at which such interest, lot, or parcel shall  
21 have been disposed of after suit but before judgment if such  
22 damages shall be less than the damages representing the  
23 difference between the amount paid for the interest, lot, or  
24 parcel in a subdivision (not exceeding the price at which  
25 it was offered to the public) and the value thereof as of the

1 time such suit was brought: *Provided*, That if the defendant  
2 proves that any portion or all of such damages represents  
3 other than the depreciation in value of such interest, lot, or  
4 parcel resulting from such part of the registration statement,  
5 with respect to which his liability is asserted, not being true  
6 or omitting to state a material fact required to be stated  
7 therein or necessary to make the statements therein not mis-  
8 leading, such portion of or all such damages shall not be re-  
9 coverable. In any suit under this or any other section of this  
10 title the court may, in its discretion, require an undertaking  
11 for the payment of the costs of such suit, including reason-  
12 able attorney's fees, and if judgment shall be rendered  
13 against a party litigant, upon the motion of the other party  
14 litigant, such costs may be assessed in favor of such party  
15 litigant (whether or not such undertaking has been re-  
16 quired) if the court believes the suit or the defense to have  
17 been without merit, in an amount sufficient to reimburse him  
18 for the reasonable expenses incurred by him, in connection  
19 with such suit, such costs to be taxed in the manner usually  
20 provided for taxing of costs in the court in which the suit  
21 was heard.

22 (e) All or any one or more of the persons specified  
23 in subsection (a) shall be jointly and severally liable, and  
24 every person who becomes liable to make any payment  
25 under this section may recover contribution as in cases of

1 contract from any person who, if sued separately, would  
2 have been liable to make the same payment, unless the  
3 person who has become liable was, and the other was not,  
4 guilty of fraudulent misrepresentation.

5 (f) In no case shall the amount recoverable under this  
6 section exceed the price at which the interest, lot, or parcel  
7 was offered to the public.

8 CIVIL LIABILITIES ARISING IN CONNECTION WITH  
9 PROSPECTUSES AND COMMUNICATIONS

10 SEC. 1211. Any developer or agent who—

11 (1) offers, sells, or leases an interest, lot, or parcel  
12 in a subdivision in violation of section 4 of this Act, or

13 (2) offers, sells, or leases an interest, lot, or parcel  
14 in a subdivision by the use of any means or instruments  
15 of transportation or communication in interstate com-  
16 merce or of the mails, by means of a prospectus or other  
17 communication, written or oral, which includes an un-  
18 true statement of a material fact or omits to state a  
19 material fact necessary in order to make the statements,  
20 in the light of the circumstances under which they were  
21 made, not misleading (the purchaser not knowing of  
22 such untruth or omission), and who shall not sustain  
23 the burden of proof that he did not know, and in the  
24 exercise of reasonable care could not have known, of  
25 such untruth or omission, shall be liable to the person

1 purchasing such interest from him, who may sue either  
2 at law or in equity in any court of competent juris-  
3 diction, to recover the consideration paid for such  
4 interest with interest thereon, less the amount of any  
5 income received thereon, upon the tender of such in-  
6 terest, or for damages if he no longer owns such interest.

7 INELIGIBILITY OF CERTAIN PERSONS

8 SEC. 1212. (a) It shall be unlawful for any person to  
9 act as developer or agent who within ten years has been  
10 convicted of any felony, misdemeanor, or is subject to a stop  
11 order, or permanent injunction involving the purchase or  
12 sale of any interest in land, or arising out of such person's  
13 conduct as a developer, or agent, involving embezzlement,  
14 fraudulent conversion, or misappropriation of funds, secu-  
15 rities, or interests in land, or involving the violation of sec-  
16 tion 1341, 1342, or 1343 of title 18, United States Code,  
17 or who has been found by the Secretary to have willfully  
18 violated any provision of any Act which he administers or  
19 who has been found to have been a cause of such violation.

20 (b) Any person who is ineligible, by reason of sub-  
21 section (a), to act as developer or agent, may file with the  
22 Secretary an application for an exemption from the provi-  
23 sions of that subsection. The Secretary shall by order  
24 grant such application, either unconditionally or on an  
25 appropriate temporary or other conditional basis, if it is

1 established that the prohibitions of subsection (a), as ap-  
2 plied to such person, are unduly or disproportionately severe  
3 or that the conduct of such person has been such as not to  
4 make it against the public interest or protection of investors  
5 to grant such application.

6 COURT REVIEW OF ORDERS

7 SEC. 1213. (a) Any person aggrieved by an order of the  
8 Secretary may obtain a review of such order in the court  
9 of appeals of the United States, within any circuit wherein  
10 such person resides or has his principal place of business,  
11 or in the United States Court of Appeals for the District of  
12 Columbia, by filing in such court, within sixty days after  
13 the entry of such order, a written petition praying that the  
14 order of the Secretary be modified or be set aside in whole  
15 or in part. A copy of such petition shall be forthwith trans-  
16 mitted by the clerk of the court to the Secretary, and  
17 thereupon the Secretary shall file in the court the record  
18 upon which the order complained of was entered, as pro-  
19 vided in section 2112 of title 28, United States Code. No  
20 objection to the order of the Secretary shall be considered  
21 by the court unless such objection shall have been urged  
22 before the Secretary. The finding of the Secretary as to  
23 the facts, if supported by evidence, shall be conclusive.  
24 If either party shall apply to the court for leave to adduce  
25 additional evidence, and shall show to the satisfaction of the

1 court that such additional evidence is material and that there  
2 were reasonable grounds for failure to adduce such evidence  
3 in the hearing before the Secretary, the court may order  
4 such additional evidence to be taken before the Secretary  
5 and to be adduced upon the hearing in such manner and upon  
6 such terms and conditions as to the court may seem proper.  
7 The Secretary may modify his findings as to the facts by  
8 reason of the additional evidence so taken, and he shall file  
9 such modified or new findings, which, if supported by evi-  
10 dence, shall be conclusive, and his recommendation, if any,  
11 for the modification or setting aside of the original order.  
12 The jurisdiction of the court shall be exclusive and its judg-  
13 ment and decree, affirming, modifying, or setting aside, in  
14 whole or in part, any order of the Secretary, shall be final,  
15 subject to review by the Supreme Court of the United States  
16 upon certiorari or certification as provided in sections 239  
17 and 240 of the Judicial Code as amended (28 U.S.C.  
18 346-347).

19 (b) The commencement of proceedings under subsec-  
20 tion (a) shall not, unless specifically ordered by the court,  
21 operate as a stay of the Secretary's order.

22 LIMITATION OF ACTIONS

23 SEC. 1214. No action shall be maintained to enforce any  
24 liability created under section 10 or 11 (2) unless brought  
25 within three years after the discovery of the untrue state-

1 ment or the omission, or after such discovery should have  
2 been made by the exercise of reasonable diligence, or, if the  
3 action is to enforce a liability created under section 11 (1),  
4 unless brought within three years after the violation upon  
5 which it is based. In no event shall any such action be  
6 brought to enforce a liability created under section 10 more  
7 than five years after the sale of all the interests, lots, or  
8 parcels which are the subject of a particular offering (other  
9 than any as to which the offering has been withdrawn), or  
10 under section 11 (2) more than five years after the sale.

11                                   CONTRARY STIPULATIONS VOID

12       SEC. 1215. Any condition, stipulation, or provision  
13 binding any person acquiring any interest, lot, or parcel in a  
14 subdivision to waive compliance with any provision of this  
15 title or of the rules and regulations of the Secretary shall  
16 be void.

17                                   ADDITIONAL REMEDIES

18       SEC. 1216. The rights and remedies provided by this Act  
19 shall be in addition to any and all other rights and remedies  
20 that may exist at law or in equity.

21                                   FRAUDULENT INTERSTATE TRANSACTIONS

22       SEC. 1217. It shall be unlawful for any developer or  
23 agent in the offer or sale or lease of any interests, lots, or  
24 parcels in any subdivision by the use of any means or instru-

1 ments of transportation or communication in interstate com-  
2 merce or by the use of the mails, directly or indirectly—

3 (a) to employ any device, scheme, or artifice to  
4 defraud, or

5 (b) to make any untrue statement of a material  
6 fact or to omit to state a material fact necessary in order  
7 to make the statements made, in the light of the cir-  
8 cumstances under which they were made, not mislead-  
9 ing, or

10 (c) to engage in any transaction, practice, or  
11 course of business which operates or would operate as  
12 a fraud or deceit upon the investor.

13 INVESTIGATIONS, INJUNCTIONS, AND PROSECUTION OF  
14 OFFENSES

15 SEC. 1218. (a) Whenever it shall appear to the Secre-  
16 tary that any person is engaged or about to engage in any  
17 acts or practices which constitute or will constitute a viola-  
18 tion of the provisions of this Act, or of any rule or regula-  
19 tion prescribed thereunder, he may, in his discretion, bring  
20 an action in any district court of the United States, or the  
21 United States District Court for the District of Columbia to  
22 enjoin such acts or practices, and upon a proper showing a  
23 permanent or temporary injunction or restraining order shall  
24 be granted without bond. The Secretary may transmit such

1 evidence as may be available concerning such acts or  
2 practices to the Attorney General who may, in his dis-  
3 cretion, institute the appropriate criminal proceedings under  
4 this Act.

5       (b) The Secretary may, in his discretion, make such  
6 investigations as he deems necessary to determine whether  
7 any person has violated or is about to violate any provision  
8 of this title or any rule or regulation thereunder, and may  
9 require or permit any person to file with it a statement in  
10 writing, under oath or otherwise as the Secretary shall  
11 determine, as to all the facts and circumstances concern-  
12 ing the matter to be investigated. The Secretary is author-  
13 ized, in his discretion, to publish information concerning  
14 any such violations, and to investigate any facts, conditions,  
15 practices, or matters which he may deem necessary or proper  
16 to aid in the enforcement of the provisions of this title, in  
17 the prescribing of rules and regulations thereunder, or in  
18 securing information to serve as a basis for recommending  
19 further legislation concerning the matters to which this title  
20 relates.

21       (c) For the purpose of any such investigation, or any  
22 other proceeding under this title, any member of the Depart-  
23 ment of Housing and Urban Development or any officer  
24 designated by the Secretary is empowered to administer  
25 oaths and affirmations, subpoena witnesses, compel their

1 attendance, take evidence, and require the production of any  
2 books, papers, correspondence, memorandums, or other rec-  
3 ords which the Secretary deems relevant or material to the  
4 inquiry. Such attendance of witnesses and the production of  
5 any such records may be required from any place in the  
6 United States or any State at any designated place of  
7 hearing.

8 (d) In case of contumacy by, or refusal to obey a  
9 subpoena issued to, any person, the Secretary may invoke  
10 the aid of any court of the United States within the juris-  
11 diction of which such investigation or proceeding is carried  
12 on, or where such person resides or carries on business, in  
13 requiring the attendance and testimony of witnesses and the  
14 production of books, papers, correspondence, memorandums,  
15 and other records. And such court may issue an order  
16 requiring such person to appear before the Secretary or  
17 member or officer designated by the Secretary, there to  
18 produce records, if so ordered, or to give testimony touching  
19 the matter under investigation or in question; and any fail-  
20 ure to obey such order of the court may be punished by such  
21 court as a contempt thereof. All process in any such case  
22 may be served in the judicial district whereof such person  
23 is an inhabitant or wherever he may be found. Any per-  
24 son who shall, without just cause, fail or refuse to attend and  
25 testify or to answer any lawful inquiry or to produce books,

1 papers, correspondence, memorandums, and other records,  
2 if in his power to do so, in obedience to the subpoena of the  
3 Secretary, shall be guilty of a misdemeanor and, upon con-  
4 viction, shall be subject to a fine of not more than \$1,000 or  
5 to imprisonment for a term of not more than one year, or  
6 both.

7 (e) No person shall be excused from attending and  
8 testifying or from producing books, papers, contracts, agree-  
9 ments, and other records and documents before the Sec-  
10 retary, or in obedience to the subpoena of the Secretary  
11 or any member thereof or any officer designated by him, or  
12 in any cause or proceeding instituted by the Secretary, on  
13 the ground that the testimony or evidence, documentary or  
14 otherwise, required of him may tend to incriminate him or  
15 subject him to a penalty or forfeiture; but no individual  
16 shall be prosecuted or subject to any penalty or forfeiture  
17 for or on account of any transaction, matter, or thing con-  
18 cerning which he is compelled, after having claimed his  
19 privilege against self-incrimination, to testify or produce evi-  
20 dence, documentary or otherwise, except that such indi-  
21 vidual so testifying shall not be exempt from prosecution  
22 and punishment for perjury committed in so testifying.

23 HEARINGS BY SECRETARY

24 SEC. 1219. All hearings shall be public and may be held  
25 before the Secretary or an officer or officers of the Secretary

1 designated by him and appropriate records thereof shall be  
2 kept.

### 3 UNLAWFUL REPRESENTATIONS

4 SEC. 1220. Neither the fact that the registration state-  
5 ment for interests, lots, or parcels in a subdivision has been  
6 filed or is in effect nor the fact that a stop order is not in  
7 effect with respect thereto shall be deemed a finding by the  
8 Secretary that the registration statement is true and accurate  
9 on its face or that it does not contain an untrue statement of  
10 fact or omit to state a material fact, or be held to mean the  
11 Secretary has in any way passed upon the merits of, or  
12 given approval to, such interests, lots, or parcels. It shall be  
13 unlawful to make, or cause to be made, to any prospective  
14 purchaser any representation contrary to the foregoing pro-  
15 visions of this section.

### 16 PENALTIES

17 SEC. 1221. Any person who willfully violates any of the  
18 provisions of this title, or the rules and regulations promul-  
19 gated thereunder, or any person who willfully, in a registra-  
20 tion statement filed under this title, makes any untrue state-  
21 ment of a material fact or omits to state any material fact  
22 required to be stated therein or necessary to make the state-  
23 ments therein not misleading, shall upon conviction be fined  
24 not more than \$5,000 or imprisoned not more than five  
25 years, or both.

## 1                    RULES, REGULATIONS, AND ORDERS

2            SEC. 1222. The Secretary shall have authority from  
3 time to time to make, issue, amend, and rescind such rules  
4 and regulations and such orders as are necessary or appro-  
5 priate to the exercise of the functions and powers conferred  
6 upon the Secretary elsewhere in this Act. For the pur-  
7 pose of his rules and regulations the Secretary may classify  
8 persons and matters within his jurisdiction and prescribe  
9 different requirements for different classes of persons or  
10 matters.

## 11                    JURISDICTION OF OFFENSES AND SUITS

12            SEC. 1223. (a) The district courts of the United States,  
13 the United States courts of any territory, and the United  
14 States District Court for the District of Columbia shall have  
15 jurisdiction of offenses and violations under this title and  
16 under the rules and regulations promulgated by the Secretary  
17 in respect thereto, and concurrent with State and terri-  
18 torial courts, of all suits in equity and actions at law  
19 brought to enforce any liability or duty created by this title.  
20 Any such suit or action may be brought in the district  
21 wherein the defendant is found or is an inhabitant or trans-  
22 acts business, or in the district where the offer or sale took  
23 place, if the defendant participated therein, and process in  
24 such cases may be served in any other district of which the  
25 defendant is an inhabitant or wherever the defendant may be

1 found. Judgments and decrees so rendered shall be subject  
2 to review as provided in sections 128 and 240 of the Judicial  
3 Code, as amended (28 U.S.C. 225, 347). No case arising  
4 under this title and brought in any State court of competent  
5 jurisdiction shall be removed to any court of the United  
6 States. No costs shall be assessed for or against the Sec-  
7 retary in any proceeding under this title brought by or  
8 against it in the Supreme Court or such other courts.

**Amdt. No. 600**

90TH CONGRESS  
2d Session

**S. 3029**

---

## **AMENDMENT**

---

Intended to be proposed by Mr. WILLIAMS of New Jersey to S. 3029, a bill to assist in the provision of housing for low- and moderate-income families, and to extend and amend laws relating to housing and urban development.

---

MARCH 4, 1968

Referred to the Committee on Banking and Currency

HIGHLIGHTS: Rep. Sullivan introduced and discussed administration's food stamp bill.

### HOUSE

1. FARM INCOME. Rep. Dole stated "America's agricultural economy is in trouble" and made recommendations "to improve farm income." p..H1843
2. SUGAR. Rep. Long, La., deplored the "imbalance in domestic sugar quotas," expressed his intention to introduce legislation to correct the situation, and inserted tables presenting the "mainland sugarcane farmer in crisis." pp. H1846-9

3. CONSERVATION. Rep. Hicks urged approval of the President's safe drinking water proposal (p. H1834), Rep. Harsha commended the President's request to extend the Solid Waste Act (p. H1866), and Rep. Cohelan praised the President's appeal for establishment of a Redwood National Park in Calif. (p. H1869).
4. FLOOD CONTROL. Rep. Monagan stated that urban renewal undertaken in flood-prone areas must be accompanied by "flood protection bulwarks" and inserted an editorial about a shopping center in Danbury, Conn., built in a former flood-prone area. pp. H1868-9
5. EXECUTIVE COMMUNICATIONS. Received from this Dept. a report of agreements signed under Public Law 480 in Jan. and Feb. 1968 for use of foreign currencies. p. H1874  
Received from OEP a copy of the statistical supplement, stockpile report to the Congress, for the period ending Dec. 31, 1967. p. H1874  
Received from GAO a report "of review of the community action program in the Los Angeles area under the Economic Opportunity Act." p. H1874  
Received from Interior the following draft bills: To provide for cooperation between Interior and the States with respect to the regulation of surface mining operations and the reclamation of surface-mined areas; to Interior and Insular Affairs Committee. To establish the Potomac National River in Md., Va., and W. Va.; to Interior and Insular Affairs Committee. To amend the Federal Water Pollution Control Act, relating to the construction of waste treatment works and to the conduct of water pollution control research; to Public Works Committee. "To amend the Federal Water Pollution Control Act"; to Public Works Committee. p. H1874  
Received from Federal Power Commission "a statement of the views of the Commission relative to Federal acquisition of the Mystic Lake hydroelectric project which the Montana Power Co. owns and operates under a Federal Power Act license. p. H1874  
Received from HEW a draft bill, "Safe Drinking Water Act of 1968"; to Interstate and Foreign Commerce Committee. p. H1874

SENATE

6. SOLID WASTE. Received from HEW a draft bill "to protect the public health by extending for 1 year the provisions on research and assistance for State and interstate planning for solid waste disposal"; to the Committee on Public Works. p. S2627
7. COSPONSORS. Sens. Magnuson, Bennett, Moss, and Spong were added as cosponsors of S. 2951, to determine policy with respect to the authority of the States to control fish and wildlife within their territorial boundaries. p. S2628
8. HOUSING. Sen. Proxmire submitted an amendment to S. 3029, "the omnibus housing bill", to require that the President prepare a specific 10-year housing program for submission to the Congress. pp. S2628-9  
Sen. Proxmire inserted Sen. Sparkman's speech before the Annual Convention of the National Housing Conference. He also inserted the text of the resolutions adopted by the membership, one section of which deals with rural housing. pp. S2637-56

## AMENDMENTS

Intended to be proposed by Mr. HARTKE to S. 3029, a bill to assist in the provision of housing for low and moderate income families, and to extend and amend laws relating to housing and urban development, viz:

1       On page 42, line 9, strike out "INSURANCE OPER-  
2   ATIONS".

3       On page 42, between lines 9 and 10, insert the fol-  
4   lowing:

5               "PART A—INSURANCE OPERATIONS".

6       On page 59, after line 23, insert the following:

7               "PART B—DIRECT LOANS

8   "ASSISTANCE FOR PERSONS UNABLE TO OBTAIN REQUISITE

9   FUNDS FOR HOME FINANCING FROM OTHER SOURCES

10       "SEC. 320. (a) The Secretary of Housing and Urban  
11   Development (hereinafter referred to as the 'Secretary') is

1 authorized to make loans to individuals and families for the  
2 purchase, construction, or rehabilitation of dwellings to be  
3 occupied by such individuals or families as homes, if the  
4 Secretary determines that the individual or family applying  
5 for the loan is unable to secure the necessary funds from other  
6 sources upon reasonable terms and conditions notwithstanding  
7 the fact that—

8 “(1) the inability of such individual or family to  
9 obtain such funds is not due to a temporary shortage  
10 of mortgage funds for the purchase or construction of  
11 homes;

12 “(2) the property with respect to which the loan  
13 is made is an acceptable risk; and

14 “(3) such individual or family meets such require-  
15 ments with respect to credit as may be applicable in  
16 the case of mortgagors under mortgages insured pursuant  
17 to section 203 of the National Housing Act.

18 “(b) Any loan under this section shall be made on such  
19 terms and conditions as may be prescribed by the Secretary,  
20 subject to the following limitations:

21 “(1) The term of the loan shall not exceed thirty  
22 years, or, in the case of rehabilitation, three-fourths of  
23 the remaining economic life of the structure after re-  
24 habilitation.

25 “(2) The loan shall bear interest at such rate as

1 the Secretary determines to be appropriate but not to  
2 exceed 6 per centum of the amount of the principal out-  
3 standing at any time, and the Secretary may prescribe  
4 such other charges as he deems necessary, including  
5 service charges and appraisal, inspection, and other  
6 fees.

7 “(3) The amount of the loan shall not exceed the  
8 principal obligation of a mortgage which could be insured  
9 under section 203 of the National Housing Act, or, in  
10 the case of rehabilitation, the amount of a loan which  
11 could be made under section 312(c) (4) (A) of the  
12 Housing Act of 1964.

13 “(4) The loan shall be adequately secured as de-  
14 termined by the Secretary.

15 “(c) The Secretary may enter into appropriate arrange-  
16 ments with public or private agencies or organizations to  
17 service loans made under this section.

18 “(d) In order to finance loans under this section there is  
19 hereby authorized to be appropriated not to exceed \$25,000,-  
20 000. Sums so appropriated and all receipts arising in connec-  
21 tion with such loans shall be deposited in a revolving fund  
22 which is hereby established in the Treasury of the United  
23 States. Moneys in the fund shall be available to the Secretary  
24 in the exercise of his functions under this section, including  
25 reimbursement or payment for services or facilities provided

1 in connection with such loans by public or private agencies or  
2 organizations. Moneys in the fund not needed for current  
3 operations under this section shall be deposited with the  
4 Treasurer of the United States to the credit of the fund, or  
5 invested in bonds or other obligations of, or guaranteed by,  
6 the United States.

7 “(e) In the performance of, and with respect to, the  
8 functions, powers, and duties vested in him by this section,  
9 the Secretary shall have (in addition to any authority other-  
10 wise vested in him) the functions, powers, and duties set  
11 forth in section 402 of the Housing Act of 1950 (except  
12 subsection (c) (2)).

13 “(f) The provisions of this section shall be administered  
14 by the Secretary through the Federal Housing Adminis-  
15 tration.”

## AMENDMENT

Intended to be proposed by Mr. JAVITS to S. 3029, a bill to assist in the provision of housing for low and moderate income families, and to extend and demand laws relating to housing and urban development, viz: At the end of the bill add a new section as follows:

1        SEC. —. (a) Subsection (a) of section 1811 of title  
2    38, United States Code, is amended—

3            (1) by striking out in the first sentence “or in small  
4        cities and towns not near large metropolitan areas” and  
5        inserting in lieu thereof “in small cities and towns not  
6        near large metropolitan areas, or in any urban area  
7        (defined without regard to political or other boundaries)  
8        having high concentrations or proportions of unemployed  
9        or low-income persons”; and

1           (2) by striking out in the second sentence “and  
2       such small cities and towns” and inserting in lieu thereof  
3       “, such small cities and towns, and such urban areas”.

4       (b) The first sentence of subsection (b) of such section  
5   1811 is amended to read as follows: “Whenever the Admin-  
6   istrator finds that private capital is not generally available  
7   in any rural area, small city or town, or urban area having  
8   high concentrations or proportions of unemployed or low-  
9   income persons for the financing of loans guaranteed under  
10   section 1810 of this title, he shall designate such rural area,  
11   small city or town, or urban area as a ‘housing credit short-  
12   age area’.”

APRIL 19 (legislative day, APRIL 17), 1968

Referred to the Committee on Banking and Currency  
and ordered to be printed

huge populated areas in South Vietnam, releasing thousands of prisoners from jails, enrolling them in their armed forces, drafting thousands of youngsters wherever they found them, seizing tons of rice and collecting taxes.

President Johnson owes it to the country to go before the Congress before expanding and escalating the war instead of following the proven bad advice of his generals.

It may be the intention of President Johnson to call to the White House a few chairmen and ranking majority and minority members of the Senate and House Committees on Appropriations, Armed Services, and of the Senate Foreign Relations and House Foreign Affairs Committees and inform what is called the leadership of our direful situation in waging a major ground war in Southeast Asia and the need for escalating and expanding it instead of disengaging seeking to test the good faith of Hanoi by announcing an unconditional halt of bombing of North Vietnam.

This is not sufficient. The American people are entitled to know. It is sad to report it but we are at the crossroads, one way leading toward an armistice and eventually peace, the other surely leading toward giving in to the generals and a land invasion of North Vietnam comparable to the Inchon landing and bringing on a confrontation on battlefields with huge ground forces of Communist China.

President Johnson, with his background as a great legislator, should have recalled to him that Edmund Burke, England's greatest paliammentarian, said:

War never leaves where it found a nation.

It would be well, too, for President Johnson to bear in mind that Sallust, the great Roman historian, centuries before the birth of our Saviour, wrote:

It is always easy to begin a war, but very difficult to stop one; since its beginning and end are not under the control of the same man.

Also, at a time when the Joint Chiefs of Staff have signed a promise to the President that Khe Sanh will not be overrun, President Johnson, as Commander in Chief of our Armed Forces, would do well to recall that Martin Luther said:

War is the greatest plague that can afflict humanity. It destroys states. It destroys families. Any scourge is preferable to it."

In addition, as a teacher of American history, President Johnson should recall that Benjamin Franklin, who at 81 was the oldest member of our Constitutional Convention, wrote:

There never was a good war or a bad peace.

Carl Schurz, a penniless immigrant, who had fought in the unsuccessful revolt against the imperial despot in Germany in 1848, later became a general officer in the Union Army in the War Between the States and then afterward a Member of Congress said:

Our country, right or wrong. When right, to be kept right; when wrong, to be put right.

It is unsatisfactory that our President consult only with "Senate leadership and House leadership" so-called. He should go before the American people and before 100 Members of the Senate of the United

States and all Members of the House of Representatives. He owes it to the American people and to himself to do this before committing an additional 100,000 or 200,000 of the flower of American manhood to combat in South Vietnam, a small area 10,000 miles distant from our Nation and of no strategic or economic importance whatever to the defense of our country.

#### COMMITTEE MEETINGS DURING SENATE SESSION

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the Committee on Foreign Relations and the Subcommittee on Housing and Urban Affairs of the Committee on Banking and Currency be authorized to meet during the session of the Senate today.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

#### PRIVILEGE OF THE FLOOR

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that a member of the staff of the Senator from California [Mr. KUCHEL], Mr. John E. "Duke" Merriam, be given the privilege of the floor today during the consideration of the gold cover measure.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

#### ORDER OF BUSINESS

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

#### EXECUTIVE COMMUNICATIONS, ETC.

The ACTING PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

##### REPORT ON REAPPORTIONMENT OF AN APPROPRIATION

A letter from the Director, Bureau of the Budget, Executive Office of the President, reporting, pursuant to law, that the appropriation to the Department of Health, Education, and Welfare under the "Limitation on salaries and expenses (trust fund)," Social Security Administration, for the fiscal year 1968 had been apportioned on a basis indicating a need for a supplemental estimate of appropriations; to the Committee on Appropriations.

##### REPORT OF COMPTROLLER GENERAL

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on internal audit activities in the Department of Defense, dated March 8, 1968 (with an accompanying report); to the Committee on Government Operations.

##### REPORT OF CLAIMS SETTLED BY AGENCY FOR INTERNATIONAL DEVELOPMENT

A letter from the Director, Congressional Liaison, Agency for International Development, Department of State, transmitting, pursuant to law, a report of claims settled by the Agency during the period January 1,

1967 through December 31, 1967 (with an accompanying report); to the Committee on the Judiciary.

#### PROPOSED EXTENSION OF SOLID WASTE DISPOSAL ACT

A letter from the Acting Secretary, Department of Health, Education, and Welfare, transmitting a draft of proposed legislation to protect the public health by extending for 1 year the provisions on research and assistance for State and interstate planning for solid waste disposal, and for other purposes; to the Committee on Public Works.

#### BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JORDAN of Idaho:

S. 3138. A bill for the relief of Jose Luis Gorostiza;

S. 3139. A bill for the relief of Juan Cruz Zubizarreta;

S. 3140. A bill for the relief of Tiburcio Tellechea;

S. 3141. A bill for the relief of Pablo Jayo; and

S. 3142. A bill for the relief of Lucio Irazoqui; to the Committee on the Judiciary.

By Mr. HOLLAND:

S. 3143. A bill to amend the Commodity Exchange Act, as amended, to make frozen concentrated orange juice subject to the provisions of such act; to the Committee on Agriculture and Forestry.

By Mr. MAGNUSON:

S. 3144. A bill to amend the Marine Resources and Engineering Development Act of 1966 and the National Sea Grant College and Program Act of 1966 in order to provide financing for programs under such acts; to the Committee on Commerce.

(See the remarks of Mr. MAGNUSON when he introduced the above bill, which appears under a separate heading.)

By Mr. COTTON:

S. 3145. A bill to impose a duty of 10 cents per pound on fresh or frozen blueberries imported into the United States; to the Committee on Finance.

By Mr. HILL:

S. 3146. A bill to protect the public health by amending the Federal Food, Drug, and Cosmetic Act to provide for the U.S. Compendium of Drugs which lists all prescription drugs under their generic names together with reliable, complete, and readily accessible prescribing information and includes brand names, suppliers, and a price information supplement, and to provide for distribution of the compendium to physicians and others, and for other purposes; and

S. 3147. A bill to amend the Public Health Service Act so as to help secure safe community water supplies, and for other purposes; to the Committee on Labor and Public Welfare.

#### S. 3144—INTRODUCTION OF BILL RELATING TO MARINE RESOURCES FUND

Mr. MAGNUSON. Mr. President, I am today introducing a bill, for appropriate reference, to amend the Marine Resources and Engineering Development Act and title II of that act, the National Sea Grant College and Program Act.

The bill would amend this legislation in two particulars.

First, it would earmark portions of the Federal revenue from Outer Continental Shelf oil leases for exploration and mapping of the marine environment. Second, it would earmark funds for enlarging the sea grant college program.

This proposed legislation is predicated on my conviction that we should reinvest at least part of the revenues the Government obtains from the Continental Shelf and Outer Continental Shelf in programs that will expand the resources that provide these revenues. This is the practical and sensible thing to do; it is sound in business and equally sound in government.

The bill would create a marine resources fund of which \$25 million would be made available annually for appropriation for marine exploration and mapping.

They would thus assist in locating new oil, gas, and mineral deposits which would further stimulate industry to invest in their development.

Such a program will produce major results and benefits, increase not only our knowledge of the waters that surround our continent but of our latent wealth in marine resources. It will provide new incentives to marine and offshore industries.

One of the great needs in the field of ocean exploration is scientific and technological manpower.

The sea grant program, if adequately financed, has a tremendous potential for providing the specialized manpower that will be needed in the years ahead and particularly to reap maximum benefits from ocean exploration.

The bill I have introduced today provides a firm basis for funding this program.

The oceans and the lands beneath them are already producing great wealth. Reinvesting a portion of this wealth in the oceans will produce a greater wealth of resources to the benefit of our Nation and mankind.

The ACTING PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 3144) to amend the Marine Resources and Engineering Development Act of 1966 and the National Sea Grant College and Program Act of 1966 in order to provide financing for programs under such acts, introduced by Mr. MAGNUSON, was received, read twice by its title, and referred to the Committee on Commerce.

#### ADDITIONAL COSPONSORS OF BILL, JOINT RESOLUTION, AND CONCURRENT RESOLUTION

Mr. BIBLE. Mr. President, I ask unanimous consent that, at its next printing, the names of the Senator from Washington [Mr. MAGNUSON], the Senators from Utah [Mr. BENNETT and Mr. MOSS] and the Senator from Virginia [Mr. SPONG] be added as cosponsors of my bill (S. 2951) to determine the policy of the Congress with respect to the authority of the several States to control and regulate fish and wildlife within their territorial boundaries.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BYRD of West Virginia. Mr. President, on behalf of the senior Senator from North Carolina [Mr. ERVIN] I ask unanimous consent that, at its next printing, the names of the Senator from

Arizona [Mr. FANNIN] and the Senator from Colorado [Mr. ALLOTT] be added as cosponsors of the joint resolution (S.J. Res. 150) to designate the month of May 1968 as "National Arthritis Month."

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. MILLER. Mr. President, on behalf of the Senator from Oregon [Mr. HATFIELD] I ask unanimous consent that at its next printing, the name of the Senator from Indiana [Mr. HARTKE] be added as a cosponsor to the concurrent resolution (S. Con. Res. 63) relating to the extension of the ground war in Vietnam.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

#### PROVISION OF HOUSING FOR LOW- AND MODERATE-INCOME FAMILIES—AMENDMENTS

AMENDMENT NO. 607

Mr. HARTKE submitted amendments, intended to be proposed by him, to the bill (S. 3029) to assist in the provision of housing for low- and moderate-income families, and to extend and amend laws relating to housing and urban development, which were referred to the Committee on Banking and Currency, and ordered to be printed.

#### THE ELIMINATION OF RESERVE REQUIREMENTS—AMENDMENTS

AMENDMENT NO. 608

Mr. FANNIN submitted amendments, intended to be proposed by him, to the bill (H.R. 14743) to eliminate the reserve requirements for Federal Reserve notes and for U.S. notes and Treasury notes of 1890, which were ordered to lie on the table and to be printed.

(See reference to the above amendment when submitted by Mr. FANNIN, which appears under a separate heading.)

AMENDMENT NO. 609

Mr. ALLOTT submitted amendments, intended to be proposed by him, to House bill 14743, supra, which were ordered to lie on the table and to be printed.

AMENDMENT NO. 610

Mr. DOMINICK submitted an amendment, intended to be proposed by him, to House bill 14743, supra, which was ordered to lie on the table and to be printed.

(See reference to the above amendment when submitted by Mr. DOMINICK, which appears under a separate heading.)

AMENDMENT NO. 611

Mr. MILLER. Mr. President, I submit an amendment, intended to be proposed by me, to House bill 14743, supra, and I ask unanimous consent that the amendment be printed in the RECORD.

The ACTING PRESIDENT pro tempore. The amendment will be received, printed, and will lie on the table; and, without objection, the amendment will be printed in the RECORD.

The amendment (No. 611) is as follows:

Add the following section at the end of the bill:

"Except for increased costs (military and other) of the Vietnam war, other emergency defense needs, and increased interest on the public debt that may exceed estimates set forth therefor in the budget for 1969 (H. Doc. 225), net aggregate expenditure of Federal funds (as shown on page 542 of H. Doc. 225, Part 1) during the fiscal year ending June 30, 1969, shall not exceed \$139,400,000,000; *Provided*, That action to enact a ten per cent income tax surcharge shall be taken within thirty days from date of enactment of this Act."

AMENDMENT NO. 612

Mr. CHURCH proposed an amendment to House bill 14743, supra, which was ordered to be printed.

(See reference to the above amendment when proposed by Mr. CHURCH, which appears under a separate heading.)

#### PROVISION OF HOUSING FOR LOW- AND MODERATE-INCOME FAMILIES—AMENDMENTS

AMENDMENT NO. 613

Mr. PROXMIRE. Mr. President, I was delighted by the President's recent decision to recommend a 10-year housing program to realize the goal set forth in the Housing Act of 1949—"a decent home and a suitable living environment" for every family.

Despite the fact that this goal was declared in 1949, we are still as far away from achieving it as ever. If we are to eliminate slums and substandard housing units and construct the decent, safe, and sanitary housing units required, we must have a long-range and realistic plan for realizing the goal. As I understand it, this is the aim of the President's proposed program for the construction of 6 million federally assisted housing units for low- and moderate-income families over a 10-year period.

Mr. President, I believe this 10-year program must be given sufficient statutory recognition to insure that it is an actual working goal and not just a statement of desire. I am, therefore, submitting an amendment to S. 3029, the administration's omnibus housing bill, to require that the President prepare a specific 10-year housing program for submission to the Congress. The proposed 10-year program would be contained in a formal report to be made to Congress next January. The program would show the number of federally assisted housing units to be constructed each year under each of the various programs. The plan would also show the annual appropriations required by the Federal Government.

Each year thereafter the President would submit a revised annual report to Congress. In this report, he would compare the actual progress obtained measured against the goals of the plan. If for any reason the goals of the plan are not being attained, the President would be required to specify the reasons and outline the actions necessary for bringing the plan back on schedule.

An annual report will serve to focus the attention of Congress and the execu-

tive branch upon our long-term housing program. It would have the same function and the same status as the President's Economic Report. It would make more firm the commitment of our Nation to a decent, safe and sanitary home for every family.

Mr. President, the proposed 10-year program and the submission of an annual report are merely standard business techniques which any hard-headed business manager would use in managing the affairs of his corporation. Many of the most successful corporations in our dynamic private economy have 10- or even 20-year capital improvement programs. The board of directors of these corporations are not satisfied with haphazard or slipshod programs subject to sudden spurts of activity. The most successful corporations require precise quantitative goals and hold those in charge responsible for meeting these goals. These are the same techniques which Secretary McNamara has used to revolutionize management in the Pentagon.

Mr. President, I believe Congress should use these same techniques in holding the executive branch accountable for its actions. I particularly believe the congressional committees of Congress can exercise more effective administrative oversight of their respective departments if they have a specific long-range plan against which to measure the agencies annual activities.

Mr. President, I ask unanimous consent that this amendment be printed in the RECORD.

The ACTING PRESIDENT pro tempore. The amendment will be received, printed, and appropriately referred; and, without objection, the amendment will be printed in the RECORD.

The amendment (No. 613) was referred to the Committee on Banking and Currency, as follows:

On page 145, after line 18, insert the following:

**"TITLE XI—TEN-YEAR HOUSING PROGRAM**

**"DECLARATION OF PURPOSE**

"SEC. 1101. The Congress finds and declares that the national commitment to the goal of 'a decent home and a suitable living environment for every American family', as set forth in section 2 of the Housing Act of 1949, can be fulfilled in a ten-year period by the effective utilization, in accordance with a definite plan, of the available resources and capabilities existing in the public and private sectors of the economy. It is the purpose of this title to provide for the development of such a plan and to require periodic reporting with respect to the execution thereof.

**"REPORT OUTLINING PLAN**

"SEC. 1102. Not later than January 15, 1969, the President shall make a report to the Congress setting forth a plan, to be carried out over a period of ten years (June 30, 1968, to June 30, 1978), for the elimination of all substandard housing and the realization of the goal referred to in section 1101. Such plan shall—

"(1) indicate the number of new or rehabilitated housing units which it is anticipated will be provided, with or without Government assistance, during each fiscal year of the ten-year period, in order to achieve the objectives of the plan, showing the number of such units which it is anticipated will be provided under each of the various Federal programs designed to assist in the provision of housing:

"(2) indicate the reduction in the number of occupied substandard housing units which it is anticipated will occur during each fiscal year of the ten-year period in order to achieve the objectives of the plan;

"(3) provide an estimate of the cost of carrying out the plan for each of the various Federal programs and for each fiscal year during the ten-year period to the extent that such costs will be reflected in the Federal budget;

"(4) make recommendations with respect to any legislative action which is necessary or desirable to achieve the objectives of the plan; and

"(5) provide such other pertinent data, estimates, and recommendations as the President deems advisable.

**"PERIODIC REPORTS**

"SEC. 1103. On January 15, 1970, and on each succeeding year through 1978, the President shall submit to the Congress a report which shall—

"(1) compare the results achieved during the preceding fiscal year for the completion of new or rehabilitated housing units and the reduction in occupied substandard housing with the objectives established for such year under the plan;

"(2) if the comparison provided under clause (1) shows a failure to achieve the objectives set for such year, indicate (A) the reasons for such failure; (B) the steps being taken to achieve the objectives of the plan during each of the remaining fiscal years of the ten-year period; and (C) any necessary revision in the objectives established under the plan for each such year;

"(3) project residential mortgage market needs and prospects for the coming calendar year, including an estimate of the requirements with respect to the availability, need, and flow of mortgage funds during such period, in order to achieve the objectives of the plan;

"(4) provide an analysis of the monetary and fiscal policies of the Government for the coming calendar year required to achieve the objectives of the plan and the impact upon the domestic economy of achieving the plan's objectives for such period;

"(5) make recommendations with respect to any additional legislative action which is necessary or desirable to achieve the objectives of the plan; and

"(6) provide such other pertinent data, estimates, and recommendations as the President deems advisable.

**"FINAL REPORT**

"SEC. 1104. On January 15, 1979, the President shall submit to the Congress a final report showing in detail the extent to which the objectives of the plan have been realized. If such objectives have not been achieved, such report shall contain an analysis of the reasons therefor, together with such recommendations as the President deems advisable for achieving such objectives at the earliest possible date."

On page 145, line 19, strike out "XI" and insert "XII".

Redesignate succeeding sections accordingly.

**NOTICE OF HEARINGS ON OMBUDSMAN PILOT PROJECT BILL**

Mr. LONG of Missouri. Mr. President, on March 27 and 28, the Senate Subcommittee on Administrative Practice and Procedure will hold public hearings in St. Louis, Mo., on S. 3123, a bill to establish a 2-year pilot project of the office of administrative ombudsman.

The hearings will be held in courtroom No. 2, U.S. Court and Customs House, 1114 Market Street, and will begin at 10 a.m. on both days.

**RAIL-WATER COOPERATION IN AGRICULTURAL MARKETING**

Mr. DIRKSEN. Mr. President, the University of Illinois has long been noted as an institution to which we can all look for new and constructive ideas helpful to the economy. Without our great State universities as a seedbed for new ideas, our country would, indeed, be poorer both materially and spiritually. It is no surprise therefore to see the 10th Agricultural Industries Forum at Urbana produce some constructive new suggestions for better cooperation between rail and water services. I would like to share with Senators the paper entitled "Impact of Rail-Water Cooperation on Agricultural Marketing," delivered by A. L. Mechling, executive vice president of the A. L. Mechling Barge Line Co. of Joliet, Ill., and ask unanimous consent that it be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

**IMPACT OF RAIL-WATER COOPERATION ON AGRICULTURAL MARKETING**

(Remarks of F. A. Mechling, executive vice president, A. L. Mechling Barge Lines, Inc., at the 10th Agricultural Industries Forum, University of Illinois, Urbana, Ill., January 31, 1968)

All discussions of grain transportation rates of the future must take into account the enormous expansion of grain production expected in the next few years. In the middle of 1967, the President's National Advisory Commission on Food and Fiber reported that the world food deficit in the next decade could well become too large for the capabilities of the major grain exporting countries. The world's population is now at 3 billion. By 1980 it is expected to reach 4.3 billion, an increase of more than a third in only 12 years.

Today's U.S. production is about 165 million tons of grain, of which about 38 million tons is exported. Production is expected to reach 273 to 289 million tons by 1980, with about 80 million tons exported. Large as such exports sound by present standards, far more may be required to help meet urgent world needs.

I stress this background because, when we talk about trends in rates, we also have to think about where we are going to get the funds to purchase greatly expanded capacity. Every rate has to answer the question: will it provide the earnings necessary to buy the freight cars, barges and trucks needed to do the job? There is considerable concern about the question of future capacity. Obviously, in the long run, more trucks, more freight cars and more barges are urgently needed. But mere expansion is not enough. There is also the problem of off-setting rising costs of wages and materials and a strong inflationary trend. The maintenance of present economical rates on agricultural products and any hope of future rate reductions can only come from higher productivity. This in turn is a function of better technology and improved methods of operation. Our objective must be to extract the maximum efficiency from the transport system as a whole.

Increasingly, I think, more productive operations require adopting a "systems" approach to transportation, coordinating the best efficiencies of the major modes. For a variety of historic reasons, little attention has been given to improving the coordination of water and rail. This could turn out to be a major weapon in combatting the inexorable march of rising costs.

I am not primarily concerned today with current intermodal controversies, but rather with how to start building a structure for

the future so that the transportation industry, working together as a system, can be organized in the most efficient way to handle the mountainous tasks ahead. We can no longer afford old modal blinders. We must find a way to adopt a much more objective approach to traffic routing so that we can determine, not the best private advantage of the trucking companies, the barge companies, or the railroad companies, but how the best efficiencies of all three can be fitted together, in the interest of the most economical utilization of transport resources. Transportation costs have become so large a part of total costs that there is legitimate public concern about the overall efficiency of the transportation industry. Thus, if we do not promote intermodal coordination on our own terms, it is probable that the Government will do it for us on terms we may not like. In my judgment, we will find that fitting together the best efficiencies of the different modes will also mean improvement in earnings for everybody.

Anyone studying grain rate changes in the past 10 years cannot help but be impressed by the fact that the stage is being set for coordination of service between the different modes. The complex grain rate structures and extra services once so effective in tying grain transportation to one mode are being supplemented by "bare bones" transportation rates. This change has been called a trend to "a la carte" transportation. The rate covers just what the shipper wants and no more.

Stripping transportation service on grain to the "bare bones" and charging extra for extra services as desired gives shippers a new opportunity to assemble rail, barge and truck services as their interests dictate.

Equally important as an encouragement to coordination of service is the trend to higher volumes in the handling of grain. Where once elevators were 5 to 7 miles apart to accommodate the range of a horse drawn wagon, they now are further apart to accommodate truck ranges and draw from much larger areas. This means larger volumes of grain are available for movement from major interior terminals and the advantages of lower unit cost in the terminal-to-terminal handling of larger volumes can be achieved.

A major reason for taking a new look at water and rail coordination is the breakthrough to more economical operations that has taken place on the rivers in the 1960's. More powerful towboats, larger barges, larger tows of barges, and more efficient hull designs have been put into service. The dramatic result is that, despite increases in the costs of labor and materials, barge rates have been held to the level of 40 years ago. Few industries in the country can show that kind of improved productivity.

There is a temporary cloud hanging over this trend to greater efficiency among the river carriers. An obsolete section of the 1940 Interstate Commerce Act inadvertently stands as a bar to permitting the accumulation of large economical tows of 40 or more barges. The statute has been interpreted to forbid mixing regulated commodities such as iron and steel and unregulated commodities such as grain in a single tow. Without authority to mix the two types of movements, the present efficient tows would have to be split and artificial cost increases would result. Last year, Senator Warren G. Magnuson, Chairman of the Senate Commerce Committee, and Senator Vance Hartke, of Indiana, introduced a bill to modernize the section. No new exemptions would be sought, merely confirmation of the right to handle traffic already exempted by Congress in the most efficient manner.

Vigorous support came from every industry using water transportation—agriculture, manufacturing industry, coal, chemicals, fertilizers. Labor supported us. Port groups were very helpful. Various state industrial development departments supported us.

The Department of Agriculture endorsed the bill, as did the Department of Transportation. The Senate Commerce Committee unanimously endorsed it. In the House Interstate and Foreign Commerce Committee, however, although no one spoke against the merits of the bill, the river transportation measure, late last year, was tied tightly to a very broad measure for exempting railroads from regulations on bulk commodities. The House Committee apparently could not see its way to passing on the merits of the river transportation issue separately.

I will not argue the question of deregulation of the railroads here. The major public policy question involved is a relatively simple one. Barge lines and truck lines are small companies; railroads typically are very large enterprises and the merger trend is making them even larger. Any large enterprise can swamp a small, efficient competitor by abusing its economic power. A public referee is required to see that the public interest in maintaining competition is protected. In the so-called unregulated segment of the economy, the referee function is performed by the anti-trust enforcement agencies and the courts under laws such as the Sherman, Clayton and Robinson-Patman Acts and the Federal Trade Commission Act. In surface transportation, the Interstate Commerce Commission performs the referee function. So the dispute boils down to whether the referee function would be better performed for transportation by the Justice Department and the Federal Trade Commission or by the ICC.

If this argument gets too highly complicated in this session, those who benefit from low cost water carrier service must persuade Congress that two issues should be separated and that the mixing-rule bill should be passed on its own merits. It is unthinkable that Congress would be a party to cancelling out recent technological advances in river transportation and preventing future improvements in the economy of barge operations.

It seems to me that the railroads and the water carriers have a common interest in meeting the future transport needs of the country efficiently. We believe the time has come, particularly in the transportation of agricultural commodities, to create a much better climate of cooperation with rail service than has existed in the past. We plan to help develop that improved climate in every way that reason and good will can be useful.

There has been a long tradition of hostility between rail and barge service. What grounds have we for believing that the climate can be materially changed?

In the short run of a year or two, it probably can't be changed much, but beyond that I feel much more optimistic. We hear a great deal about a "gentleman's agreement" among the railroads not to work with water carriers. If there is one, I doubt very much that it can stand up against a clear showing that water-rail cooperation on particular traffic is in the best interests of particular railroads, in the best interests of shippers and farmers and, also, in the national interest in economical utilization of transport resources.

Perhaps one of the troubles has been that both railroads and water carriers have become so used to hostility that they take it for granted. We have very seldom talked about the mutual business and public advantages of cooperation. The barge lines propose to do so.

Over the last 10 years, within 100 miles of river ports, the truck lines have developed a highly efficient gathering operation to river elevators of great benefit to farmers and shippers. Additional substantial economies could be achieved and the benefits of low cost water transportation extended further inland if the same kind of business relationship could be developed with railroads as has worked so well with trucks.

I am not proposing that all grain should take the shortest route to water. There is obviously a range where all-rail and rail-water advantages are equal and beyond that where all-rail service is preferable.

I am proposing that we discuss rates on what the barge industry is beginning to call a "willing partner" basis. Let us assume the existence of a railroad as willing as a truck line to enter into a business arrangement with a water carrier. What sort of a proposition might be developed that would be good business for the railroad, good business for the farmer and shipper and good business for the water carrier?

An interesting mileage rate was established in the Western Trunk Lines tariff last year between interior points in Iowa and some Mississippi River ports which illustrates the potential. A low rate on corn for export of 36¢ a cwt or \$7.20 a ton was published to Houston from such origins as Des Moines. This compared with a rate of 52¢ a cwt or \$10.40 a ton for approximately the same distance between Des Moines and New Orleans, an equally attractive export market. After some litigation, a rate of 15½¢ a cwt was established between Des Moines and Muscatine, Iowa and other ports on the Mississippi River. A connection with the barges became possible providing service to New Orleans via Muscatine at competitive rates.

Consider the impact on access of interior grain to the export market and to alternative domestic markets if more "willing partner" rates of that kind were offered. Certainly the interest of the farmer and the shipper are on the side of achieving alternative ways of reaching their markets. Where an alternative exists, they should not lock themselves into a single route.

Consider, also, the impact of applying to a connecting service some of the new rail economies of terminal-to-terminal volume movements. A unit train shuttling between major interior terminals and large river terminals could, under some circumstances, with good volume, produce profitable transportation at nine or 10 cents a cwt for 300 miles. This might make possible rail-water grain service to the Gulf from interior points of about \$5 a ton or 25 to 26 cents a cwt, compared to the present \$10.40 a ton or 52 cents a cwt. I do not suggest that any of these figures are necessarily figures which hard bargaining, and strong shipper interest would eventually develop. But the potential is there for substantial savings. If net savings do not result, an alternative route to market may be just as valuable in making sure that the interior farmer has the full benefits of competition from alternative routes, particularly in a period of generally rising freight rates.

Would a railroad's participation in such operations be in its own business interest?

First, I suggest that given the pressing need for additional capital of all railroads, it is extremely important that it make the most intensive use possible of its new equipment. I suggest a shuttle movement to river port, properly organized with all the requirements for rapid turn-around normal in "bare bones" transportation situations, could well result in much better utilization of equipment. The average freight car is loaded only 16.2 times a year. If it could be loaded twice a week or 104 times a year in a dedicated service, its earnings potential could be much greater. Twice a week may not be possible in a seasonal business, but the trend to the establishment of large terminals where grain is held for favorable prices suggests that higher utilization could be achieved and, therefore, better earnings.

Second, a connecting railroad could share in the economies of low cost water transportation. Its earnings from a rail-water movement could be much higher than its divisions from an all-rail rate.

Third, as the merger movement continues, certain railroads, particularly smaller railroads, but even some large railroads, are

His forebears settled in the Big Thicket in 1832. While holding down multifarious non-paying jobs ranging from Sunday School superintendent to Indian Affairs Commission chairman, he elevated himself by his bootstraps from cotton picker to affluence in oil, cattle and real estate, got elected four times liberal mayor in conservative Liberty, Texas, and leads a ceaseless battle for preservation of his ancestral homeland. Almost single-handedly, Dempsie—as he is called by everyone in the Thicket—forced the feasibility study to completion. The task extended over three years during which time his motives were constantly impugned by opponents of the park proposal.

With backing from conservation groups, the study—containing a recommendation for a state park—was finally presented to Governor John Connally in March, 1965. No action was taken. The following year the State Parks and Wildlife Commission did approve creation of a 15,000-acre chain of parks in the Thicket. Nothing came of this.

Having foreseen the probability of a stalemate, a handful of courageous propark Thicketites met in a small church in Saratoga in November, 1964, and formed the Big Thicket Association—to press the park fight at federal level if necessary. Under stewardship of indefatigable Dempsie Henley, hundreds of people—many from outside Texas—now subscribe the \$5 annual fee for membership to assist in the struggle. The association has purchased the abandoned Saratoga school properties and converted them into permanent headquarters and a potential museum. The organization has been so successful in re-educating Thicketites on the importance and true purposes of the proposed park that nearly 5,000 people attended the last annual get-together.

One result of the association's activities has been a new survey of the area by the US Department of Interior. Their report recommends a multi-county, nine-area "chain of pearls" totalling 35,000 acres. Each of the nine units has been selected for a special purpose and all would be connected by a special scenic road system.

A national outcry ensued that the park should be on the order of 200,000 acres. Texas Senator Ralph Yarborough in compromise introduced a bill calling for 75,000 acres.

Meanwhile, the Big Thicket Association pads in and out of court with what they describe as "almost the regularity of a goose going barefooted" to protect the public interest from illegal operations such as "log-legging" on public lands and improper sales of timber on public rights-of-way. The association currently fights a delaying action to save the Loblolly Unit in the chain of pearls. This 548-acre stand of virgin pine and hardwood lies only 57 miles from downtown Houston.

Now land speculators have moved in to feast on the results of the recent national publicity for the Big Thicket. One of them has subdivided an area ardently desired in the park for its orchids, pitcher plants and other rare vegetation.

And finally the Federal Government in a classic example of Washington confusion may well have tendered the *coupe de grace*. At the same time the Department of Interior prepared its latest feasibility study for a park in the Thicket, the Department of Agriculture professed plans that, if carried through, will everlastingly destroy the Thicket as a botanical wonderland. Through their recently commissioned Southeast Texas Resource Conservation and Development Project, Department of Agriculture verged on draining all the counties in the Thicket. The Big Thicket Association learned this in the nick of time, persuading the Commissioners Court of Hardin County to halt the key project which blocked the drainage for the time being.

Thus the combination of forces working toward destruction of the Big Thicket appears well nigh overwhelming. But a ray of hope for preservation suddenly flashes from an unexpected direction. Certain lumber companies have lately indicated a developing sentiment favoring the park idea after all. Several have rather enthusiastically cooperated in recent reexaminations by the Department of Interior to update its park feasibility survey of 1965. Perhaps the magnificent natural cathedrals within the Big Thicket have finally reached the hearts of industrial bishops.

#### SENATOR SPARKMAN'S EXCELLENT SPEECH TO NATIONAL HOUSING CONFERENCE

Mr. PROXMIRE. Mr. President, for many years, the National Housing Conference has been the focal point for public interest in programs for housing, urban renewal, and overall community development. Its membership consists of representatives of public interest organizations, local officials, labor officials, and business and professional groups which share the common goal of supporting progressive legislation in this field. It has functioned as a clearinghouse for information and support of these programs over the years, and has played a leading role in securing enactments of the many measures for Federal assistance to housing and community development which have passed the Congress over the past three decades.

The National Housing Conference recently held its 37th annual convention in Washington. Its sessions were addressed by leading Members of Congress, of local government, and of the Federal administration, including the Vice President of the United States.

One of the speakers at the annual convention of the National Housing Conference was the distinguished Senator from Alabama [Mr. SPARKMAN], chairman of the Subcommittee on Housing and Urban Affairs. All of us who know Senator SPARKMAN and his preeminence in the field of housing recognize the significance of his opinion in this field. I believe that Members of Congress and others would benefit from reading his remarks delivered before the convention, so I ask unanimous consent that they be printed at this point in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

ADDRESS BY HON. JOHN SPARKMAN, OF ALABAMA, BEFORE THE 37TH ANNUAL CONVENTION OF THE NATIONAL HOUSING CONFERENCE, WASHINGTON, D.C.

I am pleased to speak once again at the Annual Meeting of the National Housing Conference.

Your meeting is well timed. We are about to embark on consideration of a big housing bill for 1968.

On Washington's birthday, the President sent his Housing Message to Congress on "The Crisis of the Cities." He painted a gloomy picture of American cities on the brink of disaster overwhelmed with staggering human and physical problems. He said there is no time to lose. He urged immediate action and outlined a plan of operation calling for new programs involving billions of Federal dollars.

The housing bill to implement the Presi-

dent's message came to Congress early last week. From the size of the bill and the tremendous dollar commitment that the Congress has been asked to approve, we see a rough road ahead.

We will need your support and the help of all of those interested in housing and urban problems to get the bill passed and signed into law.

I note that the Housing Subcommittee has scheduled your President, Nat Keith, as a witness this coming Friday. We will be glad to hear from him.

I should like to say a few words about the President's bill, but first I believe that a little background is in order.

Our Housing Subcommittee just published a pamphlet called "Congress and American Housing." It contains a listing and a brief description of housing legislation passed by the Congress since 1892.

It is interesting to look back over the many housing laws passed by Congress. Would you believe that over 200 housing bills have become law during this period of time?

The first significant housing legislation was passed in the early thirties and, since that time, very few years have gone by without a housing bill becoming law.

Now with all of these laws, most of which liberalized Federal assistance programs, it is natural to ask—Why the crisis of the cities? What went wrong? Were the laws unresponsive to the problem? Was it because of poor administration? Or was the problem caused by other factors over which we had no control?

Obviously there is no simple answer. We were dealing with complex social and physical problems which were developing faster than they were being solved.

Many changes—social, economic and political—have occurred in this nation in the last 30 years which brought about dramatic upheavals in the living patterns of the American people.

Powerful forces that no one could have foreseen moved rapidly to break down relatively sound and stable neighborhoods within most of our cities. Not the least of these was the unprecedented migration of our people from rural to urban and from urban to suburban areas. Our prosperity speeded up the migration process and, in many respects, contributed to the erosion of the cities.

As the affluent citizen moved to the suburbs, he was replaced by newly arrived rural residents who were not equipped, either by training or financially, to maintain the property. The results were rapid decay of the centers of the cities.

In response to these swift changes, I am afraid our Federal assistance came too little and too late.

Our most successful programs under the Federal Home Loan Bank System, the Federal Housing Administration and the Federal National Mortgage Association started out well but later became oriented to the higher income families in suburbia, and we were never able to redirect them to our greatest problem—the cities.

Our other big programs, public housing and urban renewal, were successful in doing the job they were originally intended to do. But they were slow-moving and inflexible and no match for the fast-moving forces of erosion spreading over the inner core of most of our cities.

Our smaller programs, code enforcement, urban planning, workable program, open space, and others, contributed in a small way but were impotent against the rising tide of deterioration.

Now I want to make it clear that I am not criticizing these programs. For the most part, they were successful in helping to provide better housing for the American people. On any kind of absolute scale, U.S. families are

the best housed in the world—and far better housed in 1968 than in 1938.

We have come a long way since President Roosevelt's famous statement in 1937 of one-third of a nation ill-housed. Actually, it was worse than that. According to the 1940 Census, 49 percent of our people were ill-housed. Today, we have no up-to-date figures, but it is probably somewhere between 10 and 15 percent.

However, our problem today is the wide disparity in housing conditions amongst our people and the heavy concentrations of the ill-housed in the inner city. We also have concentration of the poorly housed in our small towns and rural areas.

These are conditions which are serious and are like canker sores threatening to spread and sap the very strength and vitality of our nation. This cannot be tolerated in a nation that has the resources and the capacity to do better.

I must admit that our progress has been disappointing and I believe that part of the frustration comes from the failure of expectations. We did expect great things from the Housing Act of 1949 and we welcomed the 1954 changes to broaden urban renewal to cover rehabilitation and conservation.

Likewise, the 1961 Housing Act, with its 221(d)(3) program, and the Housing Acts of 1964, 1965, and 1966 with their 3 percent interest rate programs, the rent supplement and model cities programs all gave rise to hope and, I suppose, a false sense of security.

I bring up this past history for the purpose of reflecting on what we have done, on mistakes we may have made, and what we have learned from them as we tool up again for an all-out attack on city problems in 1968.

One thing we have learned is the necessity for a balanced program between providing pure shelter and a good living environment. During the 1950s, I believe that too much of our energies went towards slum clearance and city rebuilding with inadequate attention to homebuilding and the provision of shelter for the displaced and the low and moderate income families.

During the past few years, the pendulum has begun to swing back towards a greater concern about housing, for example, the 221(d)(3) program, the rent supplement program, turnkey public housing and the current emphasis on homeownership, credit assistance and the FHA's involvement in high risk insurance.

I have felt that, unless we can find a way of supplying more good housing at reasonable prices, all of our efforts on urban renewal and model cities will be in vain.

I am very pleased that the emphasis of the President's 1968 housing proposals is on more housing for low and moderate income families. I believe that we can meet his 6 million unit housing goal but it may require some readjustment of our Federal spending priorities.

Our more balanced approach towards the housing problems of the cities involves a reconsideration of the urban renewal program.

The slow-moving project technique is not the answer to the current restlessness and demands of our city people. They do not want to wait 10 years or longer for solutions to their problems. This has been recognized in the President's proposal to make urban renewal more flexible through the neighborhood development program.

As I understand it, the city would have considerable flexibility of using Federal funds to develop small pieces of large project areas when ready. By funding these smaller undertakings on a program basis rather than a project basis, a more efficient use would be made of the urban renewal funds and definite progress could be made related to the city's overall plan for city rebuilding.

Closely related to the shortcomings of the urban renewal program has been deficiencies in the housing rehabilitation and code enforcement programs. These programs were authorized in 1954 but, unfortunately, were more theoretical than practical.

The difficulty was basically a false premise that housing improvements could be legislated in a vacuum without regard to related economic and social influences.

I have heard favorable reports on the success of the Federally-assisted concentrated code enforcement program initiated 2 years ago. With proper handling, this can be an effective tool to help hold the line and stop the serious decay before it begins.

Rehabilitation, however, is still missing an important ingredient which, I am hopeful, the 1968 legislation will supply. That is the development of a technique and an industry to carry out rehabilitation on a volume basis.

This is the only way by which rehabilitation can become successful and I believe that all ingredients for such a program are present in the legislative proposals now before us.

I believe that the rehabilitation program will benefit from a provision in the bill which would authorize the establishment of a National Housing Partnership. This is one of the most important features of the 1968 proposal. The purpose, as you know, is to involve the might and resources of American industry to help solve the city problems. Rehabilitation would be a prime challenge under such a program.

There is one item that eludes us all, that is, the cost of housing. It seems to go higher by the month and sometimes I wonder whether our Federal subsidy is being lost down the drain of rising costs.

Every other major production item in our economy has survived rising labor and material costs only through increased production efficiency. These efficiencies have come about primarily as a result of tremendous expenditures for research and development. Housing has never had this opportunity.

However, a major breakthrough occurred last year when the Congress appropriated \$10 million for research and development. This year the budget request is for \$20 million and I am hopeful that this is the beginning of a fully financed intensive effort to conduct the research needed to put the housing program on a more efficient basis.

One of the items of cost is land and here again we need to find ways of housing our people without recourse to exorbitant land costs.

The President is proposing a new program for new community development financed through FHA insurance of land development bonds. According to the Administration, the net effect of this would be to relieve some of the pressure on land in and around existing large cities and hopefully develop well-planned communities with good and reasonably housing for all.

The other element of cost which also has risen to alarming levels is the cost of mortgage credit.

You all are aware of the issue facing the Congress to remove the FHA statutory interest rate ceiling of 6 percent.

I regret that it is necessary to permit higher interest rates on government-insured mortgages, but I believe that under the current circumstances there is no alternative.

The practice of charging discounts as part of FHA financing is a vicious thing. In some of our programs, the section 213 cooperative program, for example, lenders are asking 12 points and, unless FNMA will buy the mortgages, these points must be paid.

Up until recently, I opposed removing the ceiling because I believed that the money managers of our economy would be able to turn back the rising money rates. Theoretically, a well-managed monetary system could control the supply of capital without resort

to complete dependence upon interest rates. This, of course, would mean the flexible use of both monetary and fiscal policies and limited money management controls.

Unfortunately, the way things have worked out over the past several years, the practical facts are that money has become very expensive and, if we want housing, we have no alternatives but to succumb to the facts and pay the going price.

Now this leads me to another feature of our new housing bill—interest rate subsidies.

Last year our Committee approved the principle of interest rate subsidy in two programs—homeownership for lower income families and college housing. This year, the President has come up with another interest subsidy program—rental housing for low and moderate income families. Here he would convert the 221(d)(3) and 202 low interest, Federally supported programs into a privately financed interest subsidy program.

We would then have three basic subsidy programs—the rent supplement program, the interest subsidy program, and the public housing program. The first two would carry market rates of interest with subsidies of varying amounts coming from the Federal government to the lender over the life of the mortgage. The third, public housing, would carry, as you know, the lowest rate because of the tax benefit to the bond holder.

There are many considerations to this new financing device which need to be studied. It has the advantage of flexibility because the subsidy would vary according to the going private interest rate at the time of mortgage origination. But it has the disadvantage of building high interest rates into the system because there would be no incentive for the sponsor to get a lower rate as long as Uncle Sam pays the bill.

Also there is no provision for rewriting the mortgage to a lower rate in case interest rates drop substantially during the 40-year life of the mortgage loan.

There is one more comment that I want to make about our 1968 housing effort.

Some people believe that the only answer to slums and city problems is money. They point the finger at Washington and the Congress and denounce them for failing to appropriate huge sums of money to save our cities.

Those of you who are familiar with my stand on housing know how persistently I work for Federal assistance for housing. However, I disagree strongly with the attitude of some who constantly look to the mote in the eyes of Congress rather than to the beam in their own eyes.

All of the money in the Federal Treasury would not solve the problems of our cities. I believe that these problems will only be solved when our nation and all of us are willing to utilize to the fullest extent possible all of our available resources.

Let me tell you what I mean.

One of America's proudest boasts is the efficiency of its private enterprise system. This efficiency has been developed and perfected generally by big business and industrial complexes with their tremendous concentration of skills, financial resources and managerial talent. The cities of our nation are crying out for help from such businesses and I hope that they respond. This is one resource of our nation that needs to be tapped if we are to solve the problems of the cities.

Another resource related to this is the financial might of our big banks and savings institutions. These groups must reconsider their positions and be prepared to make credit available where needed at rates consistent with the needs of the community.

We have been hearing a great deal about financial institutions stating publicly their willingness to finance city development.

However, the experience to date is disappointing.

Up to now we have not found the answer for this industry to carry its load in the job facing us. I am hopeful that several provisions in our 1968 legislation will help but, in any event, unless this resource is more fully available, I would be pessimistic of our success.

The last resource that I feel is a "must" if we are to succeed in this endeavor is the goodwill and personal interest of the residents of these areas. Self interest is the strongest motivation for action and somehow we have to tap this self interest in the upgrading and rebuilding of the run-down areas.

This reasoning was the basis for the new homeownership program for lower income people in our bill, S. 2700. It is also the basis for our support for the formation of neighborhood nonprofit groups and self-help provisions in the proposed legislation.

Goodwill cannot be bought and it is really not a Federal function to culture it, but it is extremely vital to our success, and I hope that our local people recognize its importance.

There are other resources, of course, which need to be tapped if the Federal dollar is to be effective. The measure of our success will be the extent to which this is done.

Let us hope that when someone speaks to the National Housing Conference thirty years from now there will be no need for apologies on the failure of voluminous housing laws to make our cities pleasant and enjoyable places in which to live.

I have enjoyed talking with you.

Mr. PROXMIRE. Mr. President, the resolutions adopted at the annual convention of the National Housing Conference represent an important contribution from all segments of the housing and urban development fields. I believe it would be helpful for Members of Congress and others to read the resolutions in order to have a better understanding of the problems plaguing our cities and the solutions recommended by this group of outstanding professional and civic leaders.

Mr. President, I ask unanimous consent that the resolutions be printed in the RECORD.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

RESOLUTIONS ADOPTED BY THE MEMBERSHIP OF THE NATIONAL HOUSING CONFERENCE, AT THE ANNUAL BUSINESS MEETING, MARCH 3, 1968, WASHINGTON, D.C.<sup>1</sup>

(By David L. Krooth, chairman, resolutions committee)

#### CHAPTER A. GENERAL STATEMENT OF OBJECTIVES

NHC calls for the establishment of a national goal to eliminate all slums and substandard housing in the next 20 years and to build enough housing to replace them during that period. We must also build sufficient housing to provide for the one-third increase which will occur in our population during that period.

It is not enough to build new housing. In addition, the supply of existing homes must be brought up to a decent living standard. At the same time, there must be an intensification of social programs for the improvement of the quality of American life. While we recognize that the Vietnam con-

flict is a major economic cost, we must also continue to protect our home-fronts. The need for decent, safe and sanitary housing is at the heart of the crisis in our cities. We must take vigorous and immediate action to provide good homes in good neighborhoods in order to avoid the ever-increasing demonstrations and violence in our cities and to respond to the hope and aspirations of the ill-housed.

To initiate a program now at a rate necessary to accomplish our 20-year goals, NHC urges adequate measures to redress the imbalance and restore strength and vigor to residential building. We must bring construction up to the level commensurate with the housing needs of the people and with the requirements of a healthy expanding economy. A decent home in a good neighborhood for every American should become a reality.

Last summer the Nation experienced widespread urban riots. The crisis in our cities has finally replaced the complacency of our affluent society with a demand for action on a scale commensurate with the need. The scope and severity of the housing problems of our ghettos have been increasing constantly. So have the human suffering and disillusionment caused by those problems. In these Resolutions, NHC presents the measures which we deem essential to solve these problems and alleviate the crisis in our cities.

#### CHAPTER B. MESSAGE OF THE PRESIDENT OF THE UNITED STATES ON THE CRISIS IN OUR CITIES

1. On Washington's birthday, President Johnson sent his message to Congress on "The Crisis of the Cities." The message contains the President's most comprehensive and far-reaching recommendations on housing, model cities, and urban renewal. The message conveys a new emphasis and a new sense of urgency concerning the action necessary to meet the crisis in our cities. The message is an inspired call for action by the Congress and by all segments of America. NHC applauds the leadership of the President and supports his recommendations on the measures described below. We strongly urge Congress to take prompt action to adopt the Housing and Urban Development Act of 1968, with the amendment and additions which we are recommending in these Resolutions.

2. We quote some excerpts from the President's message<sup>2</sup> presenting a clear and emphatic description of the crisis in our cities: "For several decades, now, the tide has run against the growth, strength and vitality of our cities. Today, America's cities are in crisis. This clear and urgent warning rises from the decay of decades—and is amplified by the harsh realities of the present. \*\*\*

"We see the results dramatically in the great urban centers where millions live amid decaying buildings—with streets clogged with traffic; with air and water polluted by the soot and waste of industry which finds it much less expensive to move outside the city than to modernize within it; with crime rates rising so rapidly each year that more and more miles of city streets become unsafe after dark; with increasingly inadequate public services and a smaller and smaller tax base from which to raise the funds to improve them.

"If the promise of the American city is to be recaptured—if our cities are to be saved from the blight of obsolescence and despair—we must now firmly set the course that America will travel. There is no time to lose. \*\*\*

"No single statement or message can embrace the solutions to the city's problems. No single program can attack them. No one can say how long it will take, or how much of

our fortune will eventually be committed. For the problems we are dealing with are stubborn, entrenched and slow to yield. \*\*\*

"Today, however, I want to speak of programs designed especially for our cities—of shelter for its citizens and plans for its revitalization. This message, too, is for men and their families. For our lives are profoundly affected by the environment in which we live, the city in which we work and reside, the home in which we relax and renew our strength. \* \* \*

#### I. The major recommendations in the President's message, summarized

1. A total of 26 million new homes and apartments should be built over the next 10 years. Of these, 6 million will be for families of low and moderate incomes at the average rate of 600,000 annually.

2. The proposed Housing and Urban Development Act of 1968 will provide for the first 5 years of this 10-year program. During the initial 5 years, it authorizes the construction and rehabilitation of 2.35 million housing units for those of low and moderate incomes. It contains \$2.34 billion of contract authority for this purpose.

3. Under this legislation, 300,000 housing units will be started with federal assistance during fiscal year 1969. These are identified as being for the poor, the elderly, the handicapped, the displaced and families with moderate incomes.

4. A new program would enable lower income families to buy or repair their own homes. During fiscal 1969, it would authorize 100,000 housing units to be built or repaired. The message indicates that the broad outlines of this program have been set forth in S. 2700, the Sparkman Bill reported by the Senate Banking and Currency Committee last year. There would be private financing of the mortgages at market rates of interest. Families would pay a specified percentage of their income for mortgage payments, with the Government paying the difference in the form of an interest subsidy. The Federal Government would pay all but 1% of the interest on the mortgage, if necessary, based upon the income of the homebuyer. The specified percentage of income for mortgage payments—excluding maintenance, repairs and utility costs of housing—would be 20%.

5. During fiscal year 1969, there would be 40,000 housing units started for moderate income families under a supplement to the 221(d)(3) program which would be added as Section 236 of the National Housing Act. It would involve private capital financing at market interest rates instead of FNMA special assistance purchases of mortgages at below market interest rates. The Government would provide an interest subsidy just as it contemplated under the new home ownership program. In place of the present effective interest rate of 3%, the Government's interest subsidy would make up the difference between the market rate of interest and a rate which could be as low as 1%, depending on the income of the family.

6. The 75,000 public housing units would be started during fiscal 1969, with emphasis on the "turnkey" program.

7. The rent supplement program would be increased by an authorization of 72,500 units. The President contemplates 35,000 units would be started under this program in fiscal 1969. Congress provided only \$10 million to pay rent supplements in fiscal 1968, but the President is requesting \$65 million for fiscal 1969.

8. \$7.5 million would be provided as loans and grants to nonprofit sponsors of housing for needed technical assistance and skills.

9. The model cities program would be greatly increased. It is recommended that \$2.5 billion be made available for supplementary grants over the next 3 years. Of this amount, there would be \$500 million for fiscal 1969 and \$1 billion each for the next 2 fiscal years. Also, the President recommends \$500

<sup>1</sup> Except as it relates to some new legislative proposals recently made by the President of the United States, this report of the Committee on Legislative Policy was approved by the NHC Board of Directors.

<sup>2</sup> For brevity in this and other quotations, paragraphs from the message are sometimes combined and there are omissions which are shown by asterisks. Also, underscoring is deleted.

million as an additional appropriation for fiscal 1969 for urban renewal solely related to the model cities program. Thus, the total authorization for the model cities program would be \$1 billion for fiscal 1969.

10. To give communities sufficient lead time for planning urban renewal projects, the President recommends an appropriation now of \$1.4 billion for fiscal 1970.

11. The secondary market operations of FNMA would be transferred to private ownership. This change is not to affect the Government's special assistance to selected types of mortgages which are not readily accepted in the private market. This Government operation would be handled by an agency known as the Government National Mortgage Association.

12. The Secretary of HUD would be authorized to increase FHA interest rate ceilings to reflect the rates in the financial market. The President has already made a similar recommendation for an increase in the interest rates on home loans to veterans.

13. HUD would be authorized to insure mortgage bonds that are secured by pools of FHA-insured and VA-guaranteed mortgages held by private institutions.

14. The insurance crisis in riot areas would be met by chartering a National Insurance Development Corporation within HUD which would reinsure risks assumed by the insurance industry.

15. The formation of privately-funded partnerships would be authorized so as to enlist private capital and American industry in undertaking housing for low and moderate income families.

16. The authorization for urban mass transportation would be increased from the \$140 million now authorized to \$190 million in fiscal 1969; also, \$230 million is to be authorized for fiscal 1970 so cities can begin now to plan their mass transit programs. A proposed reorganization plan would transfer from HUD to the Department of Transportation the major urban transit grants, loans, and related research functions.

17. An appropriation of \$20 million is requested for urban technology and research.

18. For planning the growth of our urban areas, \$55 million is requested for fiscal 1969, with \$10 million for area-wide incentive grants.

## II. Bills to effectuate President's program

The President has recommended a Housing and Urban Development Act of 1968 to effectuate the foregoing and other proposals. This bill has been introduced by Senator Sparkman as S. 3029 and by Congressman Patman as H.R. 15624, which bill is hereafter referred to as the Housing Bill of 1968. The President also recommended a separate National Insurance Development Corporation Act of 1968 to implement his proposals on meeting the insurance crisis of our cities. The latter bill has been introduced by Senator Sparkman as S. 3028 and by Congressman Patman as H.R. 15625, which bill is hereafter referred to as the Insurance Development Bill of 1968.

## CHAPTER C. NHC GOALS TO ACHIEVE HOUSING WE NEED

1. While the President recommends an average national goal of 2,600,000 new housing units annually during the next ten years, NHC urges that the annual goal should also include rehabilitated housing. Accordingly, NHC recommends 3,000,000 units annually of new and rehabilitated housing units. NHC agrees with the President that 2,000,000 units should be built annually for those above the low and moderate income groups who do not need federal assistance. Instead of 600,000 units annually for low and moderate income housing, NHC recommends a goal of 1,000,000 units annually for these income groups. This would include new and rehabilitated housing.

2. Legislation should be adopted requiring the Secretary of HUD to report to Congress each year on:

a. The volume of housing put under contract and the volume completed for the low and moderate income groups during the preceding year through new construction and rehabilitation.

b. His recommendations of the actions necessary in the coming year to achieve an annual goal of 1,000,000 new and rehabilitated units for these income groups.

In this manner, Congress would be informed each year as to the deficit in housing production for these groups and the recommendations of the Secretary concerning the measures necessary to eliminate this deficit and to meet the goal during the coming year. The Secretary should also report on the compliance with the new legislative requirement that residential urban renewal areas include sufficient standard housing to result in marked progress in serving the poor or disadvantaged people living in slum and blighted areas. NHC endorses the provisions of the Reuss-Ashley-Moorhead Bill H.R. 12142, which contain the substance of this and other past recommendations of NHC, except that we now recommend a revision of the annual housing goal to accord with the present need for 1,000,000 new and rehabilitated dwellings for low and moderate income groups.

## CHAPTER D. NECESSARY AUTHORIZATIONS TO BEGIN ACHIEVING OUR HOUSING GOALS AND ALLEVIATING THE CRISIS IN OUR CITIES

We need the following authorizations and programs to initiate adequate action toward meeting our 20-year goals.

### I. Urban renewal

NHC recommends an annual rate of \$3 billion for urban renewal grants for a 5-year period. This increase takes into account:

1. The increased need for urban renewal funds as part of the model cities program.

2. The expansion of the rehabilitation program which requires write-downs in value, in order to permit successful rehabilitation at low enough carrying charges.

3. The continuing importance of urban renewal to permit central business districts to achieve their great potential for increased employment opportunities.

4. The long accumulated backlog of unfilled requests.

5. The anticipated applications for new urban renewal programs. An increased urban renewal authorization will have a limited budgetary impact during the next several years. Because of the long lead time for urban renewal projects, it would take almost four years before actual appropriations would be required for the proposed increased rate of urban renewal grants. NHC supports the President's recommendation to give communities more lead time for planning urban renewal programs by making an appropriation of \$1.4 billion now for fiscal 1970. We suggest that this same principle should be applied to all future urban renewal and other authorizations recommended in these Resolutions.

### II. Model cities

NHC recommends supplemental grants for model cities of \$1 billion a year for a 5-year period. We also recommend that \$50 million in model-city planning funds be made available annually for a 5-year period. Many cities that applied for model cities grants could not be approved because of lack of funds. NHC urges that the model cities program be made available to all qualified cities which apply; and that additional funds be made available to the cities which received inadequate grants.

### III. Public housing

NHC recommends an increase in public housing to an average rate of 200,000 units annually for a 5-year period. Initially, the annual rate should be 150,000 units, but it should be accelerated each year until it reaches 250,000 units in the fourth and fifth years. This authorization should include all

forms of public housing programs, including the conventional type, turnkey and leasing.

### IV. Rent supplements

NHC recommends a rent supplement program at an average annual rate of 100,000 units for a 5-year period. Initially, the annual rate should be 75,000 units, but it should be accelerated each year until it reaches 125,000 units in the fourth and fifth years. We again urge that appropriation acts authorize rent supplement contracts for the full amounts provided in the basic housing legislation.

### V. Rental and cooperative housing for moderate income families under 221(d)(3)

NHC recommends that the 221(d)(3) program and the new supplement to it through interest subsidies be increased to an average annual rate of 300,000 units for a 5-year period. Initially, the annual rate should be 225,000 units, but it should be accelerated each year until it reaches 375,000 units in the fourth and fifth years. This program provides rental and cooperative housing for those whose incomes are above the maximum set for admission to public housing, but below the amount needed to obtain standard private housing financed without federal assistance. The President recommends that the new supplement to the 221(d)(3) program provide for private mortgage financing at a market interest rate, with an interest subsidy under which the Government would make up the difference between the market rate of interest and a minimum of 1 percent.

### VI. Home ownership for low- and moderate-income families

NHC endorses the proposal in the President's message to help low income families achieve home ownership. The Government would pay all but a minimum of 1% interest on the privately-financed mortgage, depending upon the income of the homebuyer. Under the new home ownership program, NHC recommends a 5-year program at an average annual rate of 200,000 units for a 5-year period. Initially the annual rate should be 150,000 units but it should be accelerated each year until it reaches 250,000 units in the fourth and fifth years.

### VII. Housing for the elderly

The Section 202 program and the new supplement to it through interest subsidies under the Housing Bill of 1968 should provide an average of 30,000 housing units for the elderly each year for the next 5 years.

### VIII. College housing

NHC recommends a 5-year authorization of \$1 billion annually of loans at below market interest rates for the college housing program.

### IX. Mass transit grants

NHC recommends additional mass transit grants of \$750 million per year for a 5-year period.

### X. Water, sewer, and community facilities and improvements

NHC recommends a 5-year authorization of \$2 billion annually for grants to local governments for basic water and sewer facilities and other types of public improvements and community facilities. Of the \$2 billion, \$250 million should be available annually for the open space program.

### XI. FNMA special assistance

NHC recommends that the revolving fund for FNMA special assistance be increased by \$3 billion in order to implement and carry out the programs recommended in these resolutions. We further urge that the full balance of the FNMA special assistance funds be made available and utilized for the purchase of FHA-insured mortgages on cooperative housing under Section 213, housing in urban renewal areas under Section 220, non-profit housing for the elderly and other programs eligible for special assistance.

### *XII. Budget impact of housing goals*

1. The annual budget impact of the programs to achieve the foregoing housing goals will be relatively modest during the proposed 5-year period. Too many people feel that the burden on the Federal Budget is represented by the total production cost of the housing involved. Yet, on the housing program for the low and moderate income groups, there is a relatively small cost each year in relation to the large dollar volume of housing produced and the large number of families served. During each year under the contracts on the housing covered by the 5-year program proposed by the President, the total annual cost would be only \$2.34 billion after all that housing is completed and occupied. This is the amount of contract authority recommended by the President and included in the Housing Bill of 1968. It covers the new home ownership program, the new supplement to the 221(d)(3) program, the rent supplement program, and the low-rent public housing program. NHC has recommended increases in these housing programs above the levels recommended by the President and included in the Housing Bill of 1968.

2. The \$2.34 billion relates solely to the housing programs for the proposed 5-year period. Additional appropriations are required for the other programs including: model cities; urban renewal; water, sewer and community facilities; and mass transit. These housing and other programs are necessary to meet the crisis of the cities and they require expenditures in the amounts which NHC is recommending. They should be given the money they need to do the job that must be done. The amount of these federal appropriations and authorizations represents a proper allocation of our national resources to assure that the human needs of our people are met—which includes their need for a good home in a good neighborhood. By providing these authorizations, the Nation will be giving these programs the high priority which they deserve in the Budget.

3. Increases in all of these programs will stimulate economic activity and result in increased federal tax payments. Consequently, the Treasury will receive added income which will substantially offset the federal expenditures for housing and urban assistance.

### *XIII. Initial authorizations to be accelerated*

In the initial year, the foregoing recommended authorizations for various housing programs do not total the 1-million unit goal of housing for low income and moderate income families. We recognize it will take time to build up the rate of annual production to this goal. Accordingly, the proposed authorizations start at 600,000 units in the first year and accelerate each year thereafter until they reach 1 million units in the fourth and fifth years for those of lower and moderate incomes. This allows time to increase the capacity of private and public agencies, labor and industry to achieve a production rate which would fulfill our goals. We are pleased that the housing programs in the Housing Bill of 1968 provide for annual authorizations at an accelerating rate in succeeding years during the initial 5-year period.

### *XIV. New programs as supplements to existing programs*

1. While NHC supports new programs to meet urgent needs, NHC reaffirms its continuing support of existing programs which have proven their success. This includes the conventional public housing program and the program under Section 221(d)(3) which the President recommends should be expanded under a different financing formula.

2. New programs should be recognized as supplements. They are not substitutes for the existing programs which have borne the brunt of the effort to meet the housing

needs of the disadvantaged. We reject the implication that existing programs—such as conventional public housing—have allegedly failed and that we must turn to new ones because of those failures. As described below, these programs have suffered from inadequate authorizations of funds for necessary social services, maintenance and renovation—conditions which are now being remedied partially. We are adding new programs to expand the volume of housing and broaden the participation in meeting urgent needs.

It takes time to bring new programs into effective operation. Existing programs are already functioning. They can and should be expanded so that they can continue to do the ever-increasing job that must be done.

### *CHAPTER E. MODEL CITIES AND METROPOLITAN PLANNING*

#### *1. Comprehensive and concentrated attack on neighborhood decay*

NHC reaffirms its endorsement of the model cities program to launch massive local programs for the upgrading of entire neighborhoods through the concentrated and coordinated use of all available federal aids and local private and governmental resources, including the supplementary federal grants for such model cities. We urge acceleration in authorizing disbursement and release of funds under the present program. In his message, the President stated:

"The Model Cities program gave us the tools to carry forward the nation's first comprehensive concentrated attack on neighborhood decay. It was developed by some of the country's foremost planners, industrialists, and urban experts. The program is simple in outline—to encourage the city to develop and carry out a total strategy to meet the human and physical problems left in the rubble of a neighborhood's decay. That strategy, which Model Cities spurs through special grants, is to bring to a dying area health care services, as well as houses; better schools and education, as well as repaved streets and improved mass transit; opportunities for work, as well as open space for recreation."

We are pleased to note that the Housing Bill of 1968 provides for an increased authorization of \$1 billion for each of the fiscal years 1970 and 1971 for supplemental grants. Of these funds, any amount authorized in any fiscal year, but not appropriated, may be appropriated for any succeeding fiscal year commencing prior to July 1, 1971. NHC recommends a 5-year program of supplemental grants for the model cities program at the rate of \$1 billion a year. We also recommend that at least \$50 million in model cities planning funds be made available annually for a 5-year period.

#### *II. Federal and local coordination*

To achieve the objectives of this program, full coordination is required between all of the participating constituents within HUD and all of the other participating agencies of the federal and local government. Each of them must effectively use all of its powers and devotion in doing its share of the total job.

#### *III. Increased authorization to enable all qualified cities to participate*

NHC seriously questions the policy which discriminates against cities of equal capacities and equal commitment to accomplish the laudable objectives of the law. There are many cities which can meet the requirements of the model cities program and which are vitally interested in availing themselves of this imaginative approach. Yet, these cities are denied participation because the program was to be limited to 60 to 70 cities as a demonstration—actually the initial group included 63 cities. NHC urges that the model cities program be made available to all qualified cities which apply. As

recommended above, adequate funds should be authorized for the model cities program to enable participation by all qualified cities; also, to provide the additional funds needed by the cities which are now participating in the model cities program.

#### *IV. Expansion of other programs necessary for goals of model cities*

The model cities program cannot achieve its goals and provide necessary housing:

1. Unless urban renewal activities are greatly expanded.

2. Unless adequate grant funds are available for water, sewer, and neighborhood facilities, and for open-space and urban beautification.

3. Unless there is a sufficient increase in the supply of adequate low and moderate income housing in the model cities. To avoid serious relocation problems, new housing and related community facilities should be developed extensively on vacant land or other sites not involving substantial residential displacement. Such housing should not be limited to what will be developed in the model neighborhood area or the city itself.

In order to meet the foregoing needs, increased authorizations and programs are necessary as recommended in these Resolutions.

### *V. Metropolitan planning*

NHC endorses the President's recommendation that \$55 million be appropriated for fiscal 1969 as supplemental grants for the orderly growth of our urban areas. These are needed to achieve more effective coordinated metropolitan area planning and program development. In addition, NHC supports the President's request for a \$10 million authorization for a program of area-wide incentive grants in fiscal 1969. These grants would stimulate the development of sound plans and programs to accommodate the vast expansion in population which will occur in these areas over the coming decades.

At the same time, we again point out that the requirements for public facilities of all types—which will be needed in support of the impending sharp expansion in urban population—will greatly exceed present funding of the federally-aided programs. Substantial increases in these authorizations are essential in view of the severe limitations on local governmental financial resources.

### *CHAPTER F. URBAN RENEWAL PROGRAM*

#### *1. Major importance of urban renewal*

NHC agrees with the President's statement concerning the major importance of the urban renewal program:

"Urban Renewal is the weapon that deals primarily with the physical side of removing blight. An essential component of the Model Cities Program, it is a major instrument of reform in its own right."

"Last year, nearly 900 American communities were reclaiming inner city land under urban renewal."

#### *II. Advance appropriations to give cities more lead time*

As previously stated, we support the President's recommendation for appropriations now of the funds for fiscal 1970 in order to give communities more lead time for planning their urban renewal programs. We recommend that this also be done for future fiscal years. Further, to effectuate the stated objective of the message to overtake the decay of our cities and make urban renewal more immediately responsive to urban needs, NHC recommends an annual rate of \$3 billion for urban renewal grants for a 5-year period instead of \$1.4 billion recommended by the President for only fiscal 1970.

#### *III. New neighborhood development program*

The President's message further recommends legislation which would permit detailed planning and execution to proceed segment by segment in an urban renewal area. Under existing law, neither demolition nor rehabilitation can begin on any portion of

the renewal area until the renewal process is ready to begin throughout the entire area. NHC supports the new proposal which would enable cities to start work quickly on the most pressing problems.

#### IV. Amendments recommended to urban renewal laws

NHC also recommends amendments to the urban renewal laws, as described below:

1. On capital grants for urban renewal, code enforcement, and other comparable programs, there should be an increase in the federal grant to  $\frac{3}{4}$  from the present  $\frac{2}{3}$  which is paid to larger cities. The  $\frac{3}{4}$  grants are now made only to smaller cities, but they are equally needed by larger cities. Further, where the community elects to finance survey and planning costs at its own expense, the project capital grants should be increased to  $\frac{5}{6}$  from  $\frac{3}{4}$ . Pooling of all such grants shall be permitted for all urban renewal projects in the city.

2. A successful rehabilitation program must include a large expansion of the acquisition of residential properties and their sale for rehabilitation purposes. Adequate funds should be made available for grants to write-down the resale price, subject to requirement that the properties be rehabilitated so as to provide housing which low and moderate income families can afford. Further, there are now restrictions on the participation of local public agencies in the purchase and sale or lease of properties suitable for rehabilitation; these should be removed.

3. Loan and grant contracts should be authorized for the purpose of assisting the rehabilitation of scattered properties in residential neighborhoods designated for conservation, rehabilitation, or intensive code enforcement by an approved community renewal program. The cost of any new public improvements serving the rehabilitation properties should be recognized for appropriate grant-in-aid credits.

4. Local public agencies should be authorized to make sales of industrial and commercial land for later development to non-profit industrial development corporations or properly constituted public bodies on the same basis as is now authorized under economic development laws.

5. There should be a broadening of the existing statutory provisions for recognition of real property tax losses by the locality in an urban renewal area as a local grant-in-aid credit. Such losses should be computed from the date of acquisition of the property to the completion of the redevelopment in accordance with the urban renewal plan for the project.

6. Where there is a project in execution, tax-abatement—provided by the municipality to a private nonprofit or cooperative housing development for the purpose of achieving lower rents and facilitating relocation—should count as a noncash local grant-in-aid to the project.

7. Title I should be amended to provide that gross project costs shall include the fair market value and demolition cost of any substandard building which the local public agency determines should be eliminated, irrespective of whether the local public agency acquires the fee to the property on which such building is located.

8. All renewal programs should include adequate programs—by public agencies, including local housing authorities—for meeting the needs of low-income and elderly families. Where community renewal programs do not contain adequate programs for low-income or elderly families, funds should be made available for necessary studies to formulate such programs, irrespective of the size of the city.

9. NHC supports the objectives of the special urban renewal provisions for central business districts which were introduced in the 88th Congress by Senator Clark and the then Congressman Rains. These would permit

waiver of residential requirements in renewing central business districts; recognize that employment, commercial, industrial, and cultural functions of central business districts are of vital importance to community growth and revitalization; and require HUD to accept 100% of site improvements and supporting facilities as part of the gross project cost and as a local grant-in-aid.

10. NHC supports the amendments in the Housing Bill of 1968 which allows urban renewal project funds to be used for the restoration of acquired properties of historic or architectural value.

11. NHC favors an amendment to the urban renewal law allowing any public facility to be eligible for non-cash grant-in-aid credit if the development of the facility was occasioned by the urban renewal program and if it is located in a community having more than one urban renewal project; such communities would also have a workable program and a community renewal program.

12. NHC recommends that there should be no limit to the amount of grants to a particular urban renewal demonstration project, under Section 314, so the Federal Government in special cases could pay up to 100% of the cost of the demonstration program.

13. NHC recommends that non-cash grant-in-aid credits be extended to cover air rights involved in the development costs for 221(d)(3) projects for low and moderate income families.

14. NHC recommends that 75% grants under the urban renewal program should be available for the reclamation of otherwise unbuildable land which is located within metropolitan areas. Often there are large available areas of land which are not suitable for building because of problems which can be corrected by appropriate expenditures of public funds, such as the draining of swamps and meadowlands. Such land constitutes a below-ground slum which can be eliminated to make land available which would be suitable for development of residential and other purposes. This will provide convenient sites for housing and other community facilities needed by those now living within the overcrowded areas of central cities.

15. Where state or local law requires abutting property owners to pay a portion of the cost of street repairs, Federal urban renewal grants should be made to cover the owner's share when there is a showing of need.

#### CHAPTER G. HOUSING PROGRAMS TO MEET NEEDS DURING NEXT 20 YEARS

##### 1. Low-rent public housing

1. The President's message recommends the start of 75,000 public housing units during fiscal 1969. The message then states that: "The job is to turn authorization to action—by accelerating the processing of applications, by moving quickly from commitment to construction, and by involving private industry fully under the new Turnkey concept."

NHC agrees that acceleration is urgently needed in processing applications and moving quickly to start construction. Such acceleration should include conventional public housing as well as turnkey public housing. For the public housing program, the Housing Bill of 1968 provides for increases in the amount of \$100 million annually prior to July 1, 1969, which amount may be increased by \$150 million on July 1 in each of the years 1969 and 1970 and by \$200 million on July 1 in each of the years 1971 and 1972. There is a need to increase the authorizations for public housing to an average annual rate of 200,000 units for a 5-year period. Initially, the annual rate should be 150,000 units, but it should be accelerated each year until it reaches 250,000 units in the fourth and fifth years. This should include public housing of the conventional type, along with turnkey housing and leasing programs. When housing authorities can

develop conventional public housing projects promptly and meet other appropriate requirements applicable to the projects, they should receive commitments and funds for such projects and not be required to use the turnkey method.

2. We endorse the following provisions in the Housing Bill of 1968:

a. The increase in the authorization for annual contribution contracts for the low rent public housing program by \$100 million on the date of enactment, and by \$150 million on July 1 in each of the years 1969 and 1970, and by \$200 million on July 1 in each of the years 1971 and 1972. NHC recommends increases in these proposed authorizations to achieve public housing at an average rate of 200,000 units annually for a 5-year period.

b. The revision of the existing ceiling on HUD borrowing from the Treasury for low-rent housing loans. The Bill would provide that the \$1.5 billion ceiling would apply only to federal loans which the Secretary estimates will actually be disbursed, and not to federal commitments which are not expected to result in actual outlays.

3. We should perfect the existing housing programs in light of our experience. In the conventional public housing program, this requires the following new federal aids to meet conditions that have been too long neglected:

a. Federal assistance for improved tenant services. We are pleased to note the President's recommendation of \$20 million program for this purpose. The message states: "With these funds, we can enable those who live in public housing to take better advantage of job, health and educational opportunities. We can help and encourage them to become involved, personally and responsibly, in the day-to-day problems of the projects where they live."

This \$20 million authorization in the Housing Bill of 1968 should provide social and community services that are urgently needed for families living in public housing; also, training of public housing residents for employment in the project. Local housing authorities should be authorized to contract with social service agencies to provide such services.

b. Additional authorizations of federal annual contributions to enable the conservation and preservation of existing public housing projects through their renovation and upgrading.

c. Additional annual contributions should be provided to meet all costs except those which low income families can afford as rentals. This should include not only the debt service, but also adequate maintenance, conservation and operation of public housing, and the additional services described above. The present needs and costs are higher than those which prevailed when the original annual contribution contracts were signed. If the annual contributions are not raised, local housing authorities would be forced to increase rents and income limits, which would jeopardize the continued achievement of the purpose of this program to serve low income families; also, they would defer necessary maintenance and repairs, which would jeopardize the physical condition and long-term life of the property.

The present annual contributions were computed to assure their adequacy to meet debt service, but without provision for the increased later costs of maintenance and operation; or the need for the additional services described above. There has been criticism of conventional public housing because of its failure to provide social services and because of its lack of conservation through renovation. Correction of these conditions should remove the cause of this criticism and produce a better living environment in public housing.

4. NHC recommends amendment of the United States Housing Act to emphasize the

importance of good public housing design to the low-income family and to the local community. We agree with the President that: "Our concern must be not only with the quantity of new public housing, but with its quality as well." We are pleased to note that at the President's direction, the Secretary of HUD has been working with leading architects and planners to achieve higher design standards for public housing developments. New projects can be pleasant places to live, meeting the needs of human beings for comfort and convenience.

5. While we believe the proposal for private management of turnkey housing is of dubious merit, we favor trying this new approach to determine whether it will produce benefits or improve techniques in the management of public housing and the achievement of the program's social objectives. The proposal should be recognized as a pilot and experimental program to be determined by local housing authorities. Meanwhile, NHC reaffirms the wisdom of continuing the present tested management operations through local authorities. They have long experience in handling the operations and problems and social aspects of public housing management. Moreover, they are clearly motivated by the public interest in managing public housing to serve low income families.

6. NHC is impressed by the early evidence of widespread community acceptance of the new provision in the 1965 Act authorizing the use of suitable private housing for low income families through lease or other arrangements between local authorities and the owners and operators of private housing. NHC recommends federal aid to housing authorities which enter into agreements with private developers for the public housing use of portions of new private housing developments.

7. We again commend HUD for its flexibility in using existing legislative tools to develop a program which will enable low income families to live in the same projects as families of moderate incomes assisted under Section 221(d)(3) instead of isolating families of each income group. Under this program, the low income family can continue in occupancy when its income increases, but would no longer receive public housing subsidies; instead, it would get the benefit of a below market interest rate. When the family becomes self-supporting, it would pay the full market rate of interest.

8. Federal and state laws should be amended to enable local authorities to rent available private housing outside central cities for low-rent housing purposes.

9. NHC recommends the following perfecting amendments to the basic low-rent public housing legislation:

a. Authorization to HUD to make federal capital grants to cover the full amount of land and site development costs in excess of the reuse value of the improved land for new low-rent public housing projects which are not located in urban renewal areas.

b. Revision of the annual subsidy formula to permit annual contributions equal to full debt service on permanent financing, with residual receipts being used either for project rehabilitation and improvement or accelerated amortization. At any time after completion of a public housing project, provision should be made for re-opening development cost, if necessary:

(1) to make additional loans for needed rehabilitation or improvements, with annual contributions correspondingly increased; or

(2) to make grants for such other purposes as may be necessary.

c. While the present law provides for disposition of public housing to residents, it covers only detached or semi-detached construction. We endorse the proposed amendment in the Housing Bill of 1968 which

would enable disposition of any public housing property which is sufficiently separable for ownership by the residents. In addition, we recommend an amendment which would authorize sale of an entire project to a cooperative with a membership which would be limited to those who would reside in the project. In broadening the authorization for disposition of public housing, the amendment should require a finding that such disposition would not adversely affect the low rent program of the public housing agency involved. The proposed NHC amendment would make it possible for residents of public housing to achieve cooperative home ownership and to produce better and more stable communities. Instead of requiring over-income families to move out of public housing, they should be given the opportunity to acquire ownership by paying a higher monthly charge which they can afford, based upon a percentage of their increased earnings. This amendment will give public housing tenants an incentive to better themselves. As to public-housing tenants whose incomes have not increased, they can either be:

(1) relocated in other public housing projects, with their moving expenses paid, or

(2) permitted to remain in the project as public-housing tenants receiving the benefit of annual contributions so long as they qualify as low-income families. When vacancies occur, they would be filled with over-income tenants from other public housing projects who desire to become cooperative homeowners.

d. Increase the present statutory limits on construction costs per rental room from \$2,500 to \$3,000 and increase the additional allowance for high-cost areas from \$250 to \$500; and provide that the only monetary limitation to be applied in project development shall be the statutory room cost. In other words, administrative limitations should not be imposed as is now the case. This would enable local authorities to meet the great needs for large housing units to serve large families.

e. Repeal the provision in the U.S. Housing Act of 1937, as amended, which requires a 20% gap between the lowest private and the upper public-housing limits for admission. Also, permit low-income individuals—in addition to low-income families—to be eligible for occupancy in low rent public housing.

f. Necessary changes in the requirements for participation in low-rent public housing to enable a municipality to construct such housing for those of low-income who will later migrate to the municipality for employment in industries located there or in service activities. This would include new towns or municipalities outside of central cities. It would facilitate dispersal of population and reduction of the concentration of low-income families in central cities.

g. In new and existing low-rent housing projects, there is a great opportunity to provide social impetus and vitality not only to those living in the development, but also the neighborhood. The need is both for physical community facilities on a large scale and for skilled and dedicated personnel to operate them imaginatively. A program was authorized by the 1965 Act for  $\frac{2}{3}$  federal grants to assist communities in developing neighborhood facilities of all types, with preference to those in neighborhoods involving the anti-poverty program. While this affords a new opportunity to obtain needed physical facilities, the law should be amended to provide for necessary social and counselling services in low-rent housing projects and neighborhoods. Where funds or services cannot otherwise be obtained from other agencies, local authorities should be permitted to use project funds for this purpose. Adequate funds for social and counselling services should be included in the project budget.

h. Neither the new leasing program for use of privately-owned housing for public housing purposes, nor the rent-supplement program for those of public-housing incomes require a local financial contribution in the form of exemption from local real estate taxes. Conventional public housing projects are, therefore, in a disadvantageous position from the standpoint of local governmental acceptance, since they require tax exemption with a payment of 10% of shelter rents in lieu of taxes. To bring such public housing projects in line with the tax payments on these other programs, NHC recommends that local housing authorities be permitted to make payments in lieu of taxes equal to full taxes. Federal annual contributions should be increased accordingly to cover this payment of a full tax equivalent.

i. The special subsidy for housing elderly and displaced persons is now available only in the event of a deficit operation. NHC recommends that this subsidy be made available generally in an amount equal to the difference between the rent paid per month and the average cost of operation.

j. NHC recommends that the documentation required to qualify initially for the leasing program eliminate the unnecessary requirement for development of detailed hypothetical data as to the extent of the potential supply of units.

k. In the 1965 Act there was a repeal as to future projects of Section 10(c) of the United States Housing Act of 1937, which requires that annual contributions to a public housing agency be reduced by any amounts by which the receipts of the agency exceed its expenditures. As a matter of fairness and to meet the needs of public housing agencies, NHC recommends that this repeal should also apply to public housing projects existing at the time of the 1965 Act, as well as future projects.

## II. The rent supplement program

1. After pointing out that the rent supplement program holds so much promise for the poor families of America, the President's message states:

"Rent Supplements is a free-enterprise program, strongly endorsed by the home building, real estate, and insurance industries which have responded enthusiastically to this new approach to low-income housing. It contains incentives for escape from poverty, while creating modest, but decent shelter for those in poverty. If we are to match our concern for the cities with our commitments, this program must be adequately funded."

2. The President recommended \$65 million in authority for the rent supplement program for fiscal 1969. He pointed out that last year the rent supplement program had been underfunded by the Congress which had granted only \$10 million of the \$40 million requested in annual payment authority. The Housing Bill of 1968 would make available an additional \$40 million in contract authority for rent supplement payments in fiscal year 1970, and an additional \$100 million in each of the fiscal years 1971, 1972 and 1973. NHC recommends increases in these proposed authorizations for the rent supplement program to achieve an average annual rate of 100,000 units for a 5-year period. Initially, the annual rate should be 75,000 units, but it should be accelerated each year until it reaches 125,000 units in the fourth and fifth years.

3. Construction cost limitations have been established in the rent supplement program which are unworkable in many high cost cities that face the greatest need for this program. NHC recommends that there be sufficient increases in these cost limitations to make it possible to build rent supplement projects within these cities. Construction costs have been going up without a corresponding increase in the construction cost limitations of the rent supplement program. Only through an increase in construction cost

allowances can the rent supplement program fulfill its purpose of serving low-income families in these cities, near the places of employment and public transportation.

4. Counselling and social services should be made available to residents of housing aided by rent supplements. Such services should be allowable housing costs in computing rent supplement payments.

5. In the basic rent supplement program, which involves loans at a market rate of interest and which is designed to serve families who are eligible for public housing, there is a grave question whether these projects will achieve the objective of successful integration of different income groups. Only 10% of the rent supplement program is authorized for use in the program involving loans at a below market interest rate. This part of the program will successfully achieve integration of different income groups in a housing development. NHC urges an amendment to the rent supplement program so that at least one-half of the total authorization is made available for projects: (1) which are financed at below market interest rates—including housing for the elderly; or (2) which combine in one project rent supplement programs for low income families and interest subsidy programs for moderate income families.

6. The present law limits rent supplements to lower income families who are living in substandard housing. NHC recommends that the law be amended to include overcrowded conditions as a substandard housing condition; and to permit any low-income family to be eligible for housing aided by rent supplements so long as the family qualifies as to low income, even though the family does not live in substandard housing. This would meet the needs of newly-formed families and those who are spending too much of their low income for housing.

7. The rent supplement legislation imposes too great a burden on low-income families by requiring them to pay rents equal to 25% of their annual income since rent supplements will pay only the difference between such a rental payment and the fair market rental. To eliminate this hardship, NHC recommends that this rent-paying requirement be reduced to 20% of family income, which would be consistent with the long-established policies under other federally-aided programs.

8. The standards under the rent supplement program should be upgraded to produce better-designed housing which will more adequately meet the needs of families, with attention to their comfort and convenience. The limit of one-bathroom-per-dwelling unit should be removed, as this denies adequate sanitary facilities for larger families.

9. There should be a repeal of the requirement for a workable program of local government approval before rent supplements can be used in a locality.

10. Rent supplements should be made available for moderate-income projects developed under state-aided programs, which provide below market financing to nonprofit, cooperative, or limited dividend organizations.

11. NHC urges the establishment of an additional rent supplement program for nonprofit mortgagors who own buildings which are not financed under Section 221(d)(3). When the buildings meet code standards, rent supplements should be available so that the housing can serve low-income families. Present rent supplement requirements for rehabilitation are often unworkable because they cost too much. Rehabilitation to meet code requirements should be acceptable. This will stimulate rehabilitation and provide standard housing quickly for many more low and moderate income families.

12. Local housing authorities should be eligible as sponsors under the rent supplement program, Section 221(d)(3) below market

interest rate program or interest subsidy program, and elderly housing program under Section 202.

### III. Housing for families receiving public assistance and others with very low incomes—also, code enforcement

1. Four million American families are receiving all or part of their income from public assistance programs. Many of these families are ill-housed, primarily because welfare grants, in most cities are inadequate to pay the cost of standard housing. NHC urges the enactment of legislation patterned after that previously introduced by Representative Widnall which would establish and enforce minimum standards for housing occupied by recipients of public assistance. In addition, such legislation should require that public-assistance shelter allowances cover the full charge for decent housing and that the Federal Government bear the entire additional cost above the present inadequate allowances for shelter.

2. NHC recommends Federal grants to housing authorities or other public agencies—as described in Chapter H—to bring housing up to minimum code standards and to make it available for families of low income, including those who are receiving public assistance.

3. NHC recommends that the Federal grants for code enforcement should equal 75%, irrespective of the size of the city. At present the larger cities only receive a two-thirds grant, while cities under 50,000 receive a 75% grant. The larger cities need the 75% grant just as much as the smaller cities. NHC urges an acceleration of concentrated code enforcement in deteriorating areas, together with necessary public improvements to arrest their decline. The costs of code enforcement programs—both for determining Federal grants and local grant-in-aid credits—should include all costs incurred for repair or installation of streets, sidewalks, street lighting, trees, parks, open areas, recreational facilities, and other necessary improvements.

### IV. Housing for those of moderate incomes

1. The President's message states:

"A program to provide housing for families with incomes too high to qualify for public housing, but too low to afford standard housing began in 1961. This is a below market interest rate program known as '221(d)(3)'. It serves families earning between \$4,000 and \$8,000 a year. After 5 years of testing, we are ready now to move this program into full production. But first we must improve it.

"I recommend legislation to strengthen the financial tools under which the moderate income rental housing program operates.

"Under this legislation, capital financing would be shifted to the private sector, and the Government would increase its support by providing assistance to reduce rents to levels moderate income families can afford. Now the Government provides financial support for loans at 3 percent interest. Under this new arrangement, the private sector would make loans at market rates. The Government would make up the difference between the market rate of interest and 1 percent. The loans would remain in private hands."

2. As a supplement to the 221(d)(3) program, the Housing Bill of 1968 adds Section 236 which authorizes contracts for interest assistance payments—subject to approval in appropriation acts—in the amount of \$75 million annually prior to July 1, 1969, which amount may be increased by \$100 million on July 1, 1969, by \$125 million on July 1, 1970, by \$150 million on July 1, 1971, and by \$150 million on July 1, 1972. A tremendous unmet need exists for housing to serve moderate income families who cannot afford standard private housing without federal assistance. There is a long accumulated backlog of unfilled requests and anticipated

applications for additional projects to serve this income group. NHC recommends an increase in the authorization for the 221(d)(3) program and the new supplement to it through interest subsidies, which would provide an average of 300,000 housing units annually for a 5-year period. Initially, the annual rate should be 225,000 units, but it should be accelerated each year until it reaches 375,000 units in the fourth and fifth years.

3. NHC opposes the proposal to increase from 20% to 25% the percentage of family income that must be paid for total housing expenses—including mortgage payments, real estate taxes, utilities, heat, and the estimated cost of maintenance and repair. The proposed interest subsidy would pay only the excess of total housing expense above the amount which represents 25% of family income. During 1966, the statistics show that a median of 19.6% of income was spent for total housing expense under the FHA 203 program. NHC recommends that the present 20% requirement under Section 221(d)(3) be retained in the interest subsidy programs under 236 so that families will not be required to spend a disproportionate amount of their earnings for housing. This is necessary to assure that families will have enough income remaining to pay for food, clothing and other requirements for a decent standard of living.

4. In the 300,000 housing starts for low and moderate income groups proposed by the President's message for fiscal 1969, a total of 38,000 units are expected under the existing 221(d)(3) program at below market interest rates. The funds for these starts under 221(d)(3) are already authorized and available. Accordingly, the Housing Bill of 1968 does not amend the provisions of Section 221(d)(3) as to the continuing below market interest rate program, but supplements it with a new Section 236 authorizing interest subsidies. Under 236, there will be private financing at market rates and interest subsidies to reduce the interest paid by the family to a minimum of 1%, depending upon its income. Besides the 221(d)(3) housing which is to be financed with the FNMA funds now available, NHC recommends that FNMA special assistance funds should be made available and used for 221(d)(3) housing under the below market interest rate program at any time that alternative financing with interest subsidies is not available under the proposed new Section 236.

5. NHC also recommends that Section 221(d)(3) and the proposed Section 236 be amended to remove the 10% limit on the number of units in a project which may be occupied by moderate-income individuals as distinguished from families. All moderate-income individuals would then be treated in the same manner as those who are elderly or handicapped.

6. The President recommends legislation to provide needed technical assistance and skills to nonprofit sponsors of housing programs. His message states:

"Through grants, loans, and technical assistance, this program will help small private nonprofit organizations in our cities. These organizations will then be able to draw quickly upon architects, engineers and financial experts to speed the construction of low income housing."

NHC endorses the proposed authorization in the Housing Bill of 1968 to make seed capital advances to nonprofit and cooperative organizations to facilitate housing for low and moderate income groups.

7. FHA should remove impediments to the development of housing in high-cost areas, including both high-rise and low-rise buildings. The present cost limits are unworkable for many such areas. The practical effect of present FHA cost limits is to force most of the 221(d)(3) housing into outlying areas, rather than encouraging its construction within the cities

where employment and public transportation are available. While FHA allows its present cost limits to be increased if there is partial tax abatement, such tax abatement is often not available because of restrictions in state and local laws. Moreover, many cities face the problems of inadequate revenues and they are reluctant to grant tax abatement. Tax abatement on 221(d)(3) or 236 housing should not be required since it is not required under the programs for public-housing leasing of privately-owned housing or for rent supplements. Increasing these cost limits would help meet the housing needs of large families.

8. FHA should relax regulations and directives which would preclude legitimate nonprofit sponsors from participating in the 221(d)(3) or 236 programs because of burdensome financial requirements.

9. There should be amendment of the FNMA limitation on the unit cost of mortgages purchasable under its special assistance program for 221(d)(3) mortgages. The amendment should extend the urban-renewal-area exception which is applicable to other multifamily housing. This is necessary due to the higher housing costs which generally prevail in urban renewal areas.

#### V. New program for homeownership for low- and moderate-income families

1. The President's message recommends a new program to enable lower income families to buy or repair their own homes. The message states:

"Home ownership is a cherished dream and achievement of most Americans. But it has always been out of reach of the nation's low-income families. Owning a home can increase responsibility and stake out a man's place in his community. The man who owns a home has something to be proud of and good reason to protect and preserve it. With the exception of the pilot program I began last year, low-income families have been able to get Federal help in securing shelter only as tenants who pay rent.

"Today I propose a program to extend the benefits of home ownership to the nation's needy families.

"Under this program, the broad outline of which has already been set forth in S. 2700, low-income families will be able to buy modest homes financed and built by the private sector. These families will devote what they can reasonably afford—a specified percentage of their income—to mortgage payments, with the Government paying the difference in the form of an interest subsidy. Under this interest subsidy, the Federal Government would pay all but 1 percent of the interest on the mortgage, depending on the income of the homebuyer."

2. NHC endorses and supports this program and the provisions to implement it contained in the Housing Bill of 1968. We strongly recommend the interest subsidy proposed by the President which would achieve an effective interest rate ranging from 1% upward, depending upon the income of the family. We urge that this formula be substituted for the one in S. 2700 where the interest subsidy would produce an effective interest rate of 3%. A lower interest rate is necessary to provide home ownership for lower income families who can only afford a 1% interest rate.

3. For the new home ownership program recommended by the President, the Housing Bill of 1968 authorizes contracts for interest assistance payments—subject to approval in appropriation acts—in the amount of \$75 million annually prior to July 1, 1969, which amount may be increased by \$100 million on July 1, 1969, by \$125 million on July 1, 1970, by \$150 million on July 1, 1971, and by \$150 million on July 1, 1972. NHC recommends increases in these proposed authorizations for the new home ownership program to

achieve an average annual rate of 200,000 units for a 5-year period. Initially, NHC recommends that the annual rate should be 150,000 units but it should be accelerated each year until it reaches 250,000 units in the fourth and fifth years.

4. Under the interest-subsidy provision of the Housing Bill of 1968 which is designed to bring individual and cooperative homeownership to families of low and moderate incomes, the subsidy benefits are limited to the initial owner of a house or the initial member-occupant of a cooperative dwelling unit. This limitation will prevent the program from meeting the continuing need for housing low and moderate income families because it prevents the particular house or dwelling unit involved from being available to subsequent families with such incomes. We recommend that this provision be amended so that when the owner or cooperative member sells his dwelling to a purchaser meeting the income limits applicable to this program, the purchaser will also be eligible to obtain an interest subsidy on the dwelling involved. This amendment should also extend to all subsequent eligible purchasers.

5. NHC opposes the provision in the Housing Bill of 1968 to require families to spend 20% of their income for mortgage payments—including insurance and real estate taxes—under the new homeownership program for low and moderate income families. The proposed interest subsidy would pay only the excess of the mortgage payment above the amount which represents 20% of family income. During 1966, the statistics show that a median of 15.5% of income was spent for such mortgage payments, as distinguished from total housing expense, under the FHA 203 program. NHC recommends a requirement that 15% of income be spent for mortgage payments under the new program for homeownership by low and moderate income families. This is necessary to assure that families will have enough income remaining to pay for food, clothing and other requirements for a decent standard of living.

6. NHC supports the provisions of the Housing Bill of 1968 making FHA-insured financing available to families of low and moderate income who cannot now qualify for mortgage insurance under regular FHA programs because of their credit histories or irregular credit patterns, but who HUD finds are "reasonably satisfactory credit risks" and capable of homeownership. The Bill contemplates that such families would receive counselling and assistance in budget and debt management. NHC believes that this program is long overdue since the present FHA requirements for credit approvals have proven too stringent for families of lower incomes. NHC recommends that these provisions be extended to include the cooperative home ownership program for low and moderate income families, as the same credit clearance problems have arisen in that program as in other homeownership programs.

7. NHC approves the use of the interest subsidy program in cooperatives, since this will make it possible to reach lower income groups because of the economic savings and advantages of cooperatives. These are illustrated by the following savings:

(a) Lower closing costs with one closing on an entire project of many dwellings, rather than one for each dwelling.

(b) Lower transfer costs since it is unnecessary on a cooperative sale to incur the costs of title examinations and transfers, brokers fees, refinancing and other charges.

(c) Lower construction costs which cooperatives have achieved through the economies of large scale building when many housing units are presold before construction starts.

8. NHC endorses the amendment in the Housing Bill of 1968 which would make financing and interest subsidies available for the conversion of existing rental housing into

cooperative or other home ownership. At present, such financing is available only when there will be rehabilitation of the property to the extent of at least 20% of the mortgage proceeds. NHC recommends that even though an existing property does not require rehabilitation, it should be eligible for such financing. Such 221(d)(3) financing will add to the housing supply and make home ownership available for moderate income families. Due to its lower cost, it should be possible to convert such existing housing to serve a lower income group by refinancing it at a below market interest rate and by operating it on a cooperative or other home ownership basis.

#### VI. Cooperative housing

1. In urban areas where multifamily housing predominates, cooperatives provide an important means of achieving homeownership. This provides better communities where the control and responsibility rests with the people who have a stake and pride in their own housing development. The cooperative program has been successful for moderate income families assisted under Section 221(d)(3) where financing is provided at a 3% interest rate, just as it has been successful for middle income families assisted under Section 213 at market rates of interest. NHC fully concurs in the Congressional mandates to encourage such cooperative ownership.

2. The need and demand for cooperative housing at a below market interest rate greatly exceeds the amount of funds available. The below-market program of 221(d)(3) has demonstrated its success in meeting the housing needs of lower income families who cannot be served by private enterprise without the aid of a subsidy. Cooperative housing represents about one-third of the accumulated backlog of projects awaiting funds under the 221(d)(3) program of below market interest rates. This backlog of need would be met by the increased authorizations recommended above for the 221(d)(3) program and for the 236 program and the new homeownership program, which would provide interest subsidies for the consumers to reduce the market rate on privately-financed mortgages. The effective interest rate would be reduced to 1%, depending upon the need of the family.

3. Ten years ago Congress established a revolving fund of \$225 million for the purchase by FNMA of cooperative mortgages insured by FHA under Section 213. This financing has made it possible for middle-income consumers to join together to help themselves get good housing through their cooperatives. While there have been extensive mortgage purchases from the cooperative revolving fund, much of the money has been returned, so it now has an uncommitted balance of about \$100 million. The Administration has impounded this fund and no further FNMA commitments can now be issued. NHC strongly recommends that the balance in the cooperative revolving fund be made immediately available for the purchase of mortgages on cooperative projects. The 213 program meets an important need among those middle-income families and individuals who can only afford the lower monthly charges achievable through cooperative economies and financing.

4. The Housing Bill of 1968 contains an appropriate and workable appraisal formula for cooperatives in the new homeownership program. It recognizes the need for such an appraisal formula which is based upon a property which is operated on a nonprofit basis and seeks to produce only enough income to cover its costs and debt service. The same formula should be made applicable to cooperative housing under Section 213 to assure the adequacy of the amount of financing to enable the acquisition of an existing property for a consumer cooperative.

5. As recommended elsewhere in these Resolutions and subject to the conditions stated

herein, NHC urges the disposition of public housing and Federally-owned housing to co-operatives whose members will reside in such housing and enjoy the benefits of mutual ownership.

6. NHC cites with approval the tried and tested programs which have been in operation for years and enabled lower income families to achieve cooperative ownership of multifamily housing. We urge HUD and its constituent agencies to use fully all available legislative tools under existing programs to achieve the values and objectives of co-operative home ownership by people with low or moderate incomes. This should include the following:

(a) Encouragement of cooperative housing projects in all parts of the country under all available programs. NHC commends FHA for the recent issuance of a circular to impress upon all Insuring Offices that it is the policy of HUD to encourage home ownership through the cooperative approach and to offer all possible assistance in the development of cooperative housing projects.

(b) In the disposition of housing acquired by HUD and its constituent agencies, a priority should be afforded to the residents so they will have the opportunity to acquire the properties through their cooperative. The recent FHA circular advised insuring offices that many acquired multi-family housing projects are particularly suitable for cooperatives and that negotiated sales would be made. This was successfully done by FHA recently in a pilot case.

(c) In the disposition of property by urban renewal agencies, there should be a recognition in the disposition plan that it is important to achieve cooperative ownership of multifamily housing in urban renewal areas. Accordingly, part of these areas should be considered for the development of housing to be so owned by the people. In making a disposition for this purpose, there should be a disposition condition that those who acquire the property agree to develop it for housing that will involve cooperative ownership.

#### VII. Multifamily housing in urban areas

1. To achieve success in the model cities program and to meet the housing needs of urban areas, it is necessary to reach a high volume of private development of multifamily housing. The President's message emphasizes the importance of harnessing the productive power of America to rebuild the urban slum which the President identifies as "the most pressing of our unfilled needs in our society." To help achieve this objective, the President proposes that the Congress authorize the formation of privately-funded partnerships that will join private capital with business skills. The message states:

"The objective of these partnerships will be to attract capital from American industry and put that capital to work. Their exclusive purpose will be to generate a substantial additional volume of low and moderate income housing. They will use the best private management talent, planning techniques and advanced methods of construction. They will probe for the savings inherent in the latest technology and in economies of scale."

NHC approves of the proposal to enlist the private capital and talents of American industry in the production of low and moderate income housing.

2. Besides initiating new methods of stimulating private enterprise to participate in the housing program, it is necessary to perfect existing programs and remove obstacles which discourage private initiative in undertaking housing developments. One major obstacle is described below together with our recommendation for its removal.

3. Many investors or sponsors are reluctant to undertake multifamily projects in urban areas because of the current FHA require-

ment that they provide a guarantee against operating deficits until the projects become self-supporting. In many urban renewal areas, experience has demonstrated that a project will not become self-supporting until the area has been redeveloped on a major scale and becomes established as an attractive community. FHA does not determine the need and extent of the operating-deficit guarantee until the time immediately prior to the issuance of its commitment for mortgage insurance. By that time, the investor or sponsor has spent so much money on the project that it cannot afford to withdraw. Eligible investors and sponsors are therefore reluctant to initiate multifamily housing projects because of the uncertainties concerning the guarantees that may be required.

4. In 1961, a law was passed providing that if there were losses during the first two years of operation of a multifamily housing project, FHA was authorized to increase the mortgage by an amount equal to the operating losses. However, this does not solve the problem described above, because investors or sponsors are required to give a guarantee in advance. Moreover, they have no assurance that the operating losses will be added to the mortgage at a later date, since this is entirely discretionary with the FHA and the financing institution. To avoid this and other problems, NHC recommends an amendment to the law to authorize the inclusion in the original mortgage of the estimated amount of the operating losses for the initial two year period. Although this amount would be included in the mortgage, there would be a requirement that any mortgage funds not needed to meet such losses would be used to reduce the mortgage; also, the investors should not receive any returns on their investment during the period when operating deficits are being met from mortgage proceeds.

#### VIII. Housing for the elderly

1. The Section 202 program and the new supplement to it through interest subsidies under the Housing Bill of 1968 should provide an average of 30,000 housing units for the elderly each year for the next 5 years.

2. The present policies under Section 221 (d) (3) should be modified to permit the construction of housing projects exclusively for the elderly, rather than limiting such financing to projects which also serve other age groups. In this respect we are pleased to note the provisions of the Housing Bill of 1968 which authorize the refinancing of projects for the elderly or handicapped and put them on the same favorable basis as 221(d) (3) projects. The Bill also authorizes interest subsidies to be made on elderly projects to be insured under the new Section 236.

3. In accordance with the statutory authority for loans equal to the total development costs, HUD should eliminate the requirements in the 202 program that an approved sponsor must make an investment to cover the cost of preliminary expenses, facilities, furnishings, equipment and working capital. Such costs should be included in the loan. It should not be necessary for a non-profit sponsor to make a monetary contribution. Its contribution consists of its devotion of time, ingenuity, and energy in initiating, and developing projects—all without compensation and motivated by public service.

4. The Section 202 cost limits should be increased so housing can be built within the cities where they are needed to serve the elderly. In view of land costs, this should include high-rise buildings. The program should include rehabilitation as well as new construction. Tax abatement should not be required since it is often unavailable because of restrictions in state and local laws. Moreover, many cities are facing problems of inadequate tax revenues and are reluctant to grant tax abatements. Section 202 housing for the elderly should be permitted to pay full taxes, as is permitted in leasing private-

ly-owned housing for public housing purposes and in the rent supplement program. Nursing facilities should be eligible for financing in housing for the elderly.

5. There is a need for special programs to provide federal grants for the following purposes in housing for the elderly:

(a) to assist in training professional personnel to manage elderly housing projects;

(b) to meet the capital costs of housing-related facilities, such as senior activity centers, health maintenance units, dining rooms, hobby and craft rooms, and counselling centers; and

(c) to provide working capital and seed capital to states and localities, and to national nonprofit organizations such as church groups, labor unions, fraternal and cooperative-servicing organizations.

6. NHC urges that housing for the elderly be included in all planning under the model cities program.

#### IX. College housing

1. NHC recommends a 5-year authorization of \$1 billion annually for loans at below-market-interest rates for college housing.

2. Since passage of the National Defense Education Act of 1958, our Nation has increasingly recognized its dependence upon higher education for its security, welfare, and continued prosperity. To meet the demands made upon them by the expanding number of students and by required increases in faculties, additional housing must be provided for students and faculty.

3. Congress recognized the appropriateness of meeting these needs nearly twenty years ago. In the Housing Act of 1950, it initiated low-interest loans for housing and educational facilities for students and faculties. Since 1961 there have been authorizations for loan increases at the rate of \$300 million each year. This increase is wholly inadequate to meet current needs. The study conducted under the auspices of the American Council on Education has indicated that approximately \$1.5 billion per year will be needed for college housing for the next ten years. Recognizing that a portion of this amount may be derived from non-federal sources, the Council recommended that Congress authorize a minimum of \$1 billion a year for the next ten years in the form of long-term, low interest loans for the construction of housing facilities.

4. The Housing Bill of 1968 proposes an increase in the interest rate on college loans from 3% to a rate equal to the current average market yield on comparable maturities of U.S. obligations—with discretion in HUD to make a reduction of not more than 1% below this average yield. This means that the interest rate on college loans would be substantially increased above 3%. NHC is opposed to this increase in the interest rate on college housing loans. We believe that these loans should continue to be made at the same 3% interest rate that Congress previously approved. As an alternative, we would endorse the interest subsidy provision of S. 2700 to keep the effective interest rate at 3% on loans for college housing.

#### CHAPTER H. NEW AND EXPANDED PROGRAMS FOR LONG-TERM AND INTERIM REHABILITATION

##### I. The need for rehabilitation

Everyone recognizes the importance of saving existing neighborhoods through rehabilitation and other conservation measures. The Model Cities Program relies upon rehabilitation as a major means of accomplishing its objectives. It is sound policy to improve our present housing supply and conserve neighborhoods, rather than allow them to deteriorate until they require greater costs in demolition and reconstruction. Yet no substantial progress has been achieved through rehabilitation. There is general agreement that we lack adequate tools for an effective rehabilitation program. We rec-

commend a rehabilitation program which includes both:

1. *Long-term rehabilitation* which would save and improve existing neighborhoods, where feasible, through upgrading of suitable structures and other conservation measures; and

2. *Interim rehabilitation* which would quickly improve the housing in slum and ghetto areas to eliminate hazards to health and safety.

There is a need for both long-term rehabilitation of suitable buildings, and interim rehabilitation for buildings not suitable for long-term rehabilitation but still needed now for continuing use until later clearance. Such interim rehabilitation would eliminate conditions which are hazardous to the health or safety of the residents.

#### II. Central coordinating Federal and local agencies

There should be central coordinating Federal and local agencies to channel and utilize all Federal and local aids for the rehabilitation program in the neighborhood. At the Federal level there would be a HUD unit and at the local level an agency responsible to the municipal government. There should be Federal grants for a total coordinated plan for rehabilitation of the neighborhood and for carrying out the rehabilitation program contemplated by the plan—including long-term and interim rehabilitation. The local agency should enlist the participation of cooperative and nonprofit organizations and local housing authorities. The local agency would also act on behalf of eligible home owners in the area in obtaining:

1. Rehabilitation grants for them;
2. Below market interest rate loans or market interest rate loans for their rehabilitation work; and
3. Contracts to perform the rehabilitation work, subject to supervision by the local agency.

#### III. Long-term rehabilitation

In the long-term rehabilitation program, we must modify present programs and devise new ones which will achieve the volume of rehabilitation necessary for a successful program in model city neighborhoods and for the improvements of other deteriorated areas. This requires more favorable and realistic financing terms and the development of advanced technological methods for effective application. Local public agencies engaged in urban renewal and local housing authorities should purchase slum buildings and obtain adequate subsidies to write down the re-sale price of the buildings to be rehabilitated. The amount of the write-down should be whatever is needed to achieve monthly charges, after rehabilitation, which will be within the financial reach of the low income and moderate income families to be served. This urban renewal program and the write-down of slum properties would be undertaken in combination with the following programs to provide necessary financing for the rehabilitation:

1. Public housing and rent supplement programs should be available for rehabilitated housing to serve those of low income. This would also include public housing leasing.
2. More realistic FHA-insured financing should be made available under the below market interest rate programs of 221(d) (3) or 221(h)—and the new interest subsidy programs—to serve those of moderate incomes; and market interest rate financing to serve those who do not qualify under the income limits for moderate-income groups.
3. Federal rehabilitation loans for 20 years under Section 312 at 3% interest. We are pleased to note that the proposed Housing Bill of 1968 would amend Section 312 to create a revolving fund, with such appropriations in each fiscal year as may be necessary to carry out the program. In addition,

the Bill would extend the program from its present expiration date of October 1, 1969 to June 30, 1973. Section 312 should be amended, however, to broaden the category of eligible borrowers to include public bodies, cooperatives and nonprofit corporations. At present, borrowers are restricted to owners or tenants.

4. Section 515, for Federal rehabilitation grants to eligible occupants who own their own homes in the rehabilitation neighborhood, should be amended to increase the maximum grant for long-term rehabilitation. Instead of the increase to \$2,500 proposed in the Housing Bill of 1968, NHC recommends an increase to \$5,000.

5. Where state or local governments allow tax abatement to encourage rehabilitation, there should be a Federal grant to reimburse them for 75% of the tax losses. This Federal grant should be subject to the limitations in the state or local law, but in no event should the Federal grant exceed 75% of the cost of the rehabilitation work. These Federal grants should also apply to cities and local governments allowing tax abatements for 221(d) (3) housing programs.

6. The foregoing rehabilitation grants and the Section 312 loans should be available both inside and outside urban renewal areas when a rehabilitation program is being undertaken in the neighborhood.

7. Relocation assistance and payments should be available to anyone displaced as a result of a rehabilitation program.

#### IV. FHA rehabilitation programs

In the FHA programs for long-term rehabilitation, more realistic and workable financing terms and allowances are required. These include the following:

1. The formulas for determining mortgage amounts must recognize the actual cost of acquiring and rehabilitating properties that are structurally sound.
2. There should be a contingency allowance built into the mortgage financing as has been recently done by FHA. In rehabilitation, the contractor is often not aware of potential structural, electrical, or plumbing problems until he breaks into the walls and ascertains actual conditions. The new FHA policy would provide financing to cover such extra costs due to unforeseen conditions or other contingencies.
3. The FHA requirements for rehabilitation should not require a specified percentage of mortgage proceeds to be used for rehabilitation, so long as property is brought up to code standards.
4. In projects where the property is owned or controlled by the proposed mortgagor, cost savings may be achieved by stripping down the building and tearing out the interior walls before making estimates or getting bids for the rehabilitation work. In such cases, FHA should recognize the cost of gutting the building since this increases the value of the property for rehabilitation because conditions are known and unforeseen contingencies are minimized.
5. To reduce the monthly charges to the level which moderate-income families can afford, it is necessary to eliminate present requirements for short amortization periods on rehabilitation projects. Where the rehabilitation project property is in a central city, there is likely to be an increment in land value from which to repay the loan, even though demolition occurs well in advance of the remaining estimated life of the improvements. Thus, the property may later become part of a model city neighborhood or urban development area. At present, the statute limits the mortgages to a maturity not exceeding three-quarters of the remaining economic life of the building improvements. This limitation should be repealed. FHA should be authorized to permit up to forty-year maturities where appropriate.
6. Large-scale rehabilitation will require urban renewal or other subsidies to write-

down the cost of properties to be rehabilitated. This is necessary to produce monthly charges which are within the financial reach of the lower income families to be served.

#### V. Conservation of public and other rental housing

The rehabilitation program should include the conservation of existing public housing, which is discussed elsewhere in these Resolutions. It should also include rehabilitation of existing rental housing, such as the projects built under Section 608 or other FHA programs.

#### VI. Interim rehabilitation

Interim rehabilitation would provide the minimum rehabilitation necessary to achieve prompt improvement of housing conditions in slum and ghetto areas. Interim rehabilitation may be a first step in the total process of permanent development of the area under the urban renewal or model cities program. Public acquisition of properties for interim rehabilitation may be an early acquisition of part of the property that may later be involved in such a permanent program for the neighborhood.

There should be a fast program of interim rehabilitation to correct those housing conditions which directly affect health and safety. The people now living in substandard housing should not be expected to wait until permanent neighborhood improvement programs are developed. We need legislation now which will provide grants and loans which can be rapidly disbursed to eliminate health and safety hazards, without regard to the useful life of the buildings. The program would include:

1. Federal code enforcement grants for interim rehabilitation.
2. Federal interim rehabilitation grants of not to exceed \$2,500 to low-and-moderate income owners of homes in the slum and ghetto areas.
3. Federal grants to local public agencies to acquire slum buildings which are in violation of housing codes, and for interim rehabilitation to eliminate hazards. Through Federal grants there should be necessary write-downs to achieve monthly charges on the rehabilitated housing which the low-and-moderate income group can afford.
4. As already stated, Section 312 should be amended to permit Federal loans to public agencies, cooperatives or nonprofit corporations to permit them to achieve interim rehabilitation and the correction of hazards in buildings they own or acquire.
5. Section 312 should be further amended to provide loans to public bodies or agencies which take possession or control of any property—through receivership or otherwise—which violates code requirements or local laws concerning health or safety and where the owner of the property has failed to correct such violations within a period prescribed by local law. The loan should be made on the condition that it will be repaid from the income derived from the rehabilitated property, with appropriate liens or other rights that will be enforceable against the property.
6. Relocation assistance and payments should be available to anyone displaced from housing as a result of an interim rehabilitation program. Federal grants should be available for this purpose.
7. The 221(h) program under the 1966 Act—which was initiated by Congresswoman Sullivan—provides 3% loans to nonprofit organizations for rehabilitation of substandard housing for sale to low-income purchasers. This program is being incorporated into the interest subsidy program for homeownership under the Housing Bill of 1968.
8. Legislation along the lines proposed by Senator Clark of Pennsylvania should be enacted to provide standby financing of necessary improvements to homes occupied and owned by low-income elderly couples or in-

dividuals in urban renewal areas. Under this bill, interest and amortization on FHA-insured loans for these purposes would be deferred until the death of the owner or earlier sale of the property.

9. The objective of the foregoing federal grants and loans for interim rehabilitation is to provide whatever assistance is needed to achieve monthly charges, after interim rehabilitation, which will be within the financial reach of the low income and moderate income residents. The emergency upgrading of structures under the interim rehabilitation program should not involve increases in rents beyond the reach of the present tenants.

#### CHAPTER I. INTERIM ASSISTANCE PROGRAMS IN SLUM AND GHETTO AREAS

##### I. Need for interim action to alleviate slum conditions

The President and commissions appointed by him have recognized that our number one domestic priority should be a program to solve the problems of slum and ghetto areas, including bad housing and inadequate community services. Besides the long-term programs which NHC recommends in this report to solve these problems, we need a concentrated and coordinated program to take immediate and interim action to alleviate these harmful conditions. Just as the model cities program provides for centralized and coordinated federal and local action, we need a parallel program to revitalize and rehabilitate slum and ghetto areas through interim action. Instead of the present multiplicity of federal and local agencies, there should be a centralized coordinating responsibility in a HUD unit and in a local agency responsible to the municipal government to obtain and use all available federal and local aids in achieving interim revitalization and rehabilitation.

##### II. Proposed new program for interim assistance in slum areas

1. We need the kind of interim assistance program which the Senate Committee on Banking and Currency has recommended in the Sparkman Bill, S. 2700, as follows (subject to the amendments described hereafter):

"... The Secretary of Housing and Urban Development would be authorized to make grants to a city, other municipality, or county to assist it in taking interim steps to alleviate harmful conditions in any slum or blighted area of the community which is planned for substantial clearance in the near future, but which needs some immediate public action until permanent action can be taken.

"The Committee has been concerned for some time about the plight of residents and property owners in slum or blighted areas which are planned for substantial clearance in the near future. Since immediate alternative housing is often not available, Federal assistance is necessary to provide a more livable environment during the remaining period of use before clearance. The Committee regards this provision as a stopgap measure for areas where it is clear that concentrated code enforcement is impractical because it would reduce the supply of housing or compel property owners to make uneconomic repairs.

"This assistance should enable communities to undertake such immediate short-term actions as (1) repairing serious deficiencies in the street, sidewalks, parks, playgrounds, publicly-owned utilities and public buildings located in the area to the extent needed to maintain or restore the basic livability of the area until permanent action can be taken (no new construction or major capital improvements would be permitted); (2) the improvement of private properties to the extent needed to eliminate the most immediate dangers to public health and safety; (3) the demolition of structures determined to be structurally unsound or unfit for human habitation which constitute a public nuisance and serious hazard to the public health

and safety; (4) the establishment of temporary public playgrounds on vacant land within the area; and (5) the improvement of garbage and trash collection, street cleaning, and similar activities through the employment of otherwise unemployed or underemployed residents of the area.

"Grants could not exceed two-thirds of the cost of planning and carrying out the interim program, except the three-fourths grants could be made to any community with a population of 50,000 or less according to the most recent decennial census. A community would have to have a workable program for community improvement to qualify for assistance, and relocation assistance and payments would be available to anyone displaced as a result of an interim program."

2. NHC recommends that all cities be eligible for a three-quarters grant for the cost of planning and carrying out the interim program instead of limiting the larger grants to the smaller cities. The foregoing program should be amended to make clear that the planned clearance need not occur "in the near future" because this would unduly restrict the interim assistance program. The legislation should apply to any area where there is a plan for clearance at a later date.

3. The Senate Bill S. 2700 should be clarified so the interim assistance includes interim rehabilitation of housing to protect the health and safety of residents. Also, it should be amended to eliminate the restriction—described in clause (2)—that repairs can be made only to private properties. Such interim rehabilitation is not new construction or a major capital improvement. It is a temporary upgrading of the housing which would bring it up to a minimum standard of decency and liveability.

#### CHAPTER J. NEW TOWNS AND NEW COMMUNITIES

1. There is an urgent need for a program to develop New Towns and New Communities, which are planned communities designed to help meet the needs of the expanding metropolitan area and to provide an orderly dispersal of population and relief of city congestion. With the passage of the 1966 Housing Act, Congress recognized the need for a program to develop New Towns. While this legislation was a vital step in the right direction, it was only an experimental program. New legislation is now necessary to establish the New Towns program on a permanent basis.

2. In his message, the President proposes the New Communities Act of 1968, which is a title in the Housing Bill of 1968. The President describes the need and purposes of the new communities program as follows:

"Over the next decade, 40 million more Americans will live in cities. Where and how will they live? By crowding further into our dense cities? In new layers or sprawling suburbia? In jerry-built strip cities along new highways? Revitalizing our city cores and improving our expanding metropolitan areas will go far toward sheltering that new generation.

But there is another way as well, which we should encourage and support. It is the new community, freshly planned and built. These can truly be the communities of tomorrow—constructed either at the edge of the city or farther out. We have already seen their birth. Here in the nation's capital, on surplus land once owned by the Government, a new community within the city is springing up.

In other areas, other communities are being built on farm and meadow land. The concept of the new community is that of a balanced and beautiful community—not only a place to live, but a place to work as well. It will be largely self-contained, with light industry, shops, schools, hospitals, homes, apartments, and open spaces. New communities should not be built in any set pattern. They should vary with the needs of the people they serve and

the landscapes of which they are a part. Challenge and hard work await the founders of America's new communities:

Careful plans must be laid.

Large parcels of land must be acquired.

Large investments in site preparation, roads and services must be made before a single home can be built and sold.

The development period is long, and return on investment is slow.

But there is also a great opportunity for, as well as a challenge to, private enterprise.

The job is one for the private developer. But he will need the help of his Government at every level. In America—where the question is not so much the standard of living, but the quality of life—these new communities are worth the help the Government can give.

I propose the New Communities Act of 1968. For the lender and developer, this Act will provide a major new financing method. A Federally-guaranteed "cash flow" debenture will protect the investment of private backers of new communities at competitive rates of return. At the same time, it will free the developer from the necessity to make large payments on his debts, until cash returns flow from the sale of developed land for housing, shops and industrial sites. For the local and State government, the Act will offer incentives to channel jointly financed programs for public facilities into the creation of new communities. The incentives will take the form of an increased Federal share in these programs.

3. NHC endorses the President's proposal for the new communities program, but we recommend the amendments or implementation described below.

4. The New Communities Act should be amended to include public agencies or authorities instead of limiting the FHA insurance to private developers. NHC believes that a public authority represents the most effective instrumentality to undertake necessary land acquisition and carry out the development of a New Town.

5. Since there will be a substantial waiting period before the developer will collect money from sales or leases of land, we agree that payments of principal on the loan—evidenced by income debentures—should be made only to the extent possible from cash flow received from land disposition. Likewise, interest should be treated as a developmental cost up to the estimated time when sufficient monies would be recovered to pay interest on the loan. At that estimated time, the payments of interest and principal would be made on the debentures to the extent that cash flow permitted. Necessary federal guarantees and aids must be provided to assure the marketability of the debentures. Until they are acceptable in the market, FNMA should purchase them with special assistance funds.

6. Loans should be made on a long-term basis. We are pleased to note that the proposed Bill removes the unworkable 7-year loan limit in the present law.

7. To achieve its objectives, the program under the New Communities Bill should recognize that it is necessary to:

(a) Buy land at low cost and keep it available for resales or leases at low prices.

(b) Achieve integration—both economic and racial.

(c) Minimize transportation needs by assuring employment for its residents within the New Town and with some employment in nearby areas; and by providing housing in the New Town for lower-income service and domestic help.

(d) Achieve a physical layout which provides for separation of pedestrian and automobile traffic, safety of children, convenient playgrounds and other advanced planning.

By internally relating homes, employment, and recreation, automobile use can be reduced to shorter trips at non-peak road densities. There is a need for a governmental

unit in the locality which would have all the governmental powers, functions and responsibilities of the New Town. NHC believes that the foregoing requirements should be stipulated as conditions to FHA insurance under the New Communities Act.

8. In its large program of land acquisition, the Bureau of Public Roads should purchase excess land beyond the amount needed for the roads themselves. Since roadbuilding programs result in the displacement of people from their homes, there should be recognition of the duty and responsibility of the Bureau to acquire land that is suitable for residential development and make it available to rehouse such displaced families. Whenever federal highway programs displace large numbers of people, the Bureau should fulfill this relocation responsibility, both inside and outside of Communities. At large road interchanges, this program should include the acquisition of additional land for the development of New Communities where they are needed to rehouse displaced families and to meet the needs of our growing population. Such land can generally be acquired by the Bureau at low cost at the time the land is being acquired for new road systems.

#### CHAPTER K. RURAL HOUSING, RENEWAL AND PLANNING FOR MULTI-COUNTY AREAS

1. NHC has long recommended a program of rural housing and rural renewal which will make available to rural areas the same kinds of financial assistance as are provided for urban housing and urban renewal. We endorse the provisions of the Housing Bill of 1968 which make certain housing assistance equally available to rural areas.

2. Thus, the new interest subsidy programs would be available in both urban and rural areas. This includes the new home ownership program and the rental and cooperative program under FHA to provide housing for low and moderate income persons and families. However, insofar as the administration of these programs in rural areas is concerned, the Secretary of HUD would assign to the Secretary of Agriculture necessary authority, along with appropriate transfer of funds, for the implementation of the programs as agreed upon by the two Secretaries.

3. In addition, NHC supports Title X of the Housing Bill of 1968 which provides that where the foregoing assistance is not available, the Secretary of Agriculture may make direct and insured loans in rural areas—in places not exceeding 5,500 population—to provide housing for low and moderate income persons and families. This includes loans for rental or cooperative housing. Interest will be at a rate set by the Secretary of Agriculture after considering the cost of money to the Treasury and the payment ability of the applicants. The interest rate may not be less than 1 percent. An interest supplement necessary to market the insured loans will be paid from the Rural Housing Insurance Fund and reimbursed by annual appropriations. Eligibility for these loans will be broadened to include persons not previously residing in rural areas who have low or moderate incomes and who are employed in rural areas.

4. NHC recommends adoption of the provisions of Title VI of the Housing Bill of 1968 which would authorize HUD to make planning grants to assist district planning agencies for rural and other non-metropolitan areas. A grant authorization of \$20 million would be provided in fiscal year 1969. The Secretary of Agriculture would be given certain functions as to planning grants for districts, including a requirement that he be consulted before any such grant is made.

5. NHC recommends the following amendments to the Housing Bill of 1968 relating to rural housing:

(a) To provide rent supplements in rural areas similar to those for urban areas.

(b) To increase by \$50 million a direct-loan fund in the Farmers Home Administration to supplement the mortgage insurance program and to keep interest rates from going too high.

(c) To give the Secretary of HUD authority to waive rules and regulations of HUD programs so very small cities and towns can get an equitable share of HUD programs.

(d) To expand the low-interest loan program under the Aiken-Poage Water and Sewer Act to include predominantly rural areas and to cover community facilities such as police and fire facilities, street lighting and community centers.

(e) To provide a new program of grants and 3% loans for rural low-income families and individuals for housing repair and rebuilding and for self-help housing.

(f) To provide a small experimental program of aid to rural areas and small towns for public, cooperative, or nonprofit transportation systems.

(g) To provide that only the new farm home and the immediate lot—not exceeding one acre—need be encumbered in home mortgages under the Farmers Home Administration.

(h) To provide for an experimental and demonstration housing program in Farmers Home Administration similar to the present HUD program; such authorization should be used to develop self-help housing in rural areas.

(i) To increase the mortgage term to 40 years for most rural housing loans.

(j) To double appropriations for the Farmers Home Administration.

6. Besides Congressional actions, there is a need for more effective executive actions and better coordination of Agriculture and HUD, and for consultation with industry and public interest groups. Such actions should be taken to assure that federal housing, community facility and planning aids for rural areas are equivalent to those available in cities and metropolitan areas.

7. NHC recommends and urges the Secretary of Agriculture to stimulate and encourage programs under new and existing cooperative housing provisions to alleviate the housing ills in rural areas.

#### CHAPTER L. FINANCING NURSING HOMES AND FACILITIES FOR GROUP MEDICAL PRACTICE

1. There is a continuing desperate need for hundreds of thousands of nursing home beds, especially among the low-income elderly. This need has increased by demands generated through Medicare. Since local housing authorities have long experience in building low-rent housing for the elderly, they are well qualified to develop nursing homes for low-income persons. They should be authorized to coordinate programs of housing and nursing homes facilities for the low-income group. This can be done effectively by amending the U.S. Housing Act of 1937, to authorize annual contribution contracts with local housing authorities for nursing home facilities. Likewise, Section 202 should be amended to permit the inclusion of nursing facilities in housing projects for the elderly. In this way, elderly persons who need nursing facilities would not have to leave the community in which they are living.

2. NHC endorses the proposed amendment in the Housing Bill of 1968 to permit the cost of major items of equipment used in the operating of a nursing home to be included in the FHA-insured mortgage; also, to permit supplementary loans for the installation of such equipment in nursing homes previously constructed.

3. The 1966 Act included a program of FHA insurance for facilities used for group medical practice. NHC reaffirms its support of this program and urges its use to encourage the development of nonprofit cooperatives whose members will obtain the benefits of bona fide group medical practice at a reason-

able cost. The program should operate in both urban and rural areas.

4. NHC endorses the amendment to the Housing Bill of 1968 to permit mortgage amortization to commence after completion of construction of group practice facilities rather than at the time the mortgage is executed.

5. NHC supports the Patman Bill, H.R. 10188, which would remove obstacles that impede the broader development of group health plans and which would make financing available for group health programs providing hospitalization, out-patient and preventive care.

#### CHAPTER M. PUBLIC AND COMMUNITY FACILITIES INCLUDING WATER, SEWER, AND NEIGHBORHOOD FACILITIES

1. The Housing Bill of 1968 contains no new authorization of funds for water, sewer, neighborhood facilities and advance acquisition of land programs. It does provide that any funds already authorized and not yet appropriated will remain available until July 1, 1970. With respect to the open space land program, the Bill would convert the present authority to enter into contracts not in excess of \$310 million to a regular authorization for appropriations not in excess of \$310 million prior to July 1, 1969. For subsequent fiscal years that amount would be increased by such additional sums as are necessary, with any amounts appropriated to remain available until expended.

2. NHC recommends a 5-year authorization of \$2 billion annually for grants to local governments for basic water and sewer facilities and other types of public improvements and community facilities. Of the \$2 billion, \$250 million should be made available annually for the open space land program. The public improvements and community facilities should include those authorized by the 1965 Act such as neighborhood and public facilities, particularly in slum and ghetto areas. It should also include the acquisition of land to provide parks and recreational facilities in urban areas, so that they are closely accessible to the people who need them most.

3. There is a great and continuing need for the foregoing Federal public facilities grants to assist in overcoming serious backlogs in replacing substandard or obsolete facilities—especially in the central cities—eliminating water pollution and meeting the unprecedented demands for additional facilities and services generated by population expansion. These needs cut across whole metropolitan areas and involve central cities, new suburbs and the new communities still to come. This essential expansion in Federal aid could be a potent influence in resolving the present chaotic conditions created by the multiplicity of local governmental jurisdictions in most metropolitan areas. This multiplicity has led to suburban sprawl, land misuse, land speculation, and frequent failure of metropolitan area and regional planning as an effective tool for the control of new developments. Such a program could provide important leverage to establish coordinated local governmental approaches to control programs of area and region-wide significance. At the same time, it could foster decentralization of local governmental functions of strictly local application.

4. NHC believes that the foregoing grants should be generally restricted to communities that are simultaneously providing adequate housing for low and moderate income families, where the need for such housing exists.

5. As recommended in these Resolutions on other comparable programs, federal grants to larger cities for public and community facilities should be increased to  $\frac{3}{4}$  from the present  $\frac{2}{3}$ , since their need is as grave as that of small cities. For neighborhood centers, parks and recreational facilities in slum and ghetto areas, the federal grant should be 100%. Moreover, there should be annual fed-

eral grants to provide for the staff and operating expenses of such facilities. The neighborhood facilities centers in such areas should be permitted to include swimming pools—either indoor or outdoor—and gymnasiums.

6. NHC again recommends that the regional plan requirement for municipal water, sewer and other grants be waived in those instances where the improvements have no regional implications and where no regional planning mechanism exists.

#### CHAPTER N. URBAN MASS TRANSPORTATION

1. The President's message points out the urgent need to modernize, expand and reorganize the urban transportation systems. The message states:

"In the modern city the arteries of transportation are worn and blocked. The traffic jam has become the symbol of the curse of congestion. It was only a few years ago, however, that we recognized this as a national problem. We must step up this effort. In the year ahead, we expect to increase our grants to cities from \$140 million to \$190 million. I recommend that the Congress provide \$230 million for fiscal 1970 so cities can begin now to plan the improvement of their mass transit systems and service to the people."

2. We support the President's recommendations for an advance appropriation for fiscal 1970 in order to give cities more lead time for planning their mass transit programs. We recommend such advance appropriations for future fiscal years and for other urban programs to enable advance planning.

3. NHC recommends that the program of mass transit grants be increased to \$750 million per year for the next 5 years. The expansion of the program is necessary to achieve the housing and urban development goals recommended in these Resolutions.

4. NHC supports the President's proposal for a reorganization plan involving a reallocation of functions on mass transit as between the Department of Transportation and HUD.

#### CHAPTER O. URBAN TECHNICAL ASSISTANCE, RESEARCH, AND TRAINING

##### 1. The President's message

The President's message urges a program of research and technology for the cities. The message states:

"Federally-sponsored research has helped us guard the peace, cure disease, and send men into space. Yet, we have neglected to target its power on the urban condition. Although 70 percent of our people live in urban areas, less than one-tenth of one percent of the Government's research budget has been devoted to housing and city problems. We must:

"Learn how to apply modern technology to the construction of new low-income homes and the rehabilitation of old ones.

"Test these ideas in practice, and make them available to builders and sponsors.

"Look deep into the fiscal structure of the cities—their housing and building codes, zoning, and tax policies.

"Learn how best the federal government can work with state and local governments—and how states and local governments can improve their own operations.

"Evaluate our city programs, so we can assess our priorities.

"Last year, I sought the first major appropriations for urban research: \$20 million. Congress appropriated only half that amount. I once again propose a \$20 million appropriation for urban technology and research. This will assist the universities and private institutions of America to carry out the studies so crucially needed. These funds, along with those from other Government agencies, will also help launch the new Urban Institute, which I recently recommended. This is a private non-profit research corporation formed to create a bank of talent to analyze the entire range of city problems."

#### II. Research and technology for the cities

NHC supports the President's program of research and technology for the cities, including this request for a \$20 million appropriation. It also supports the request for an additional Assistant Secretary. It was previously indicated that this new Assistant Secretary would head an office for Equipment, Research, Technology, and Engineering. Presumably, such an Assistant Secretary would function in a manner proven successful in other governmental agencies. HUD should also serve as an information source for state and local governments and private industry. NHC supports the establishment of an Institute of Urban Development as a separate and distinct organization which would engage in seeking solutions to future urban problems and requirements.

#### III. Urban information and technical assistance

The 1966 Act recognized the need to assist the states to make available information and data on urban needs and assistance programs and activities; also, to provide technical assistance to small communities seeking to solve their urban problems. It provides for a federal grant of 50% of the cost of an Urban Information and Technical Assistance program. NHC supports Section 1103 of the Housing Bill of 1968 which would authorize an appropriation of such funds as are necessary to carry out the purposes of this program. When such funds are appropriated, they would continue available until expended. In the past, the appropriations have been only half of the amount needed and requested. NHC recommends an appropriation of \$5.3 million annually for this program.

#### IV. Grants for training and fellowships

1. The shortage of trained professional and sub-professional personnel in the broad field of community development has long presented a serious problem in achieving effective action programs. Unless corrected, this problem will become increasingly acute as the dimensions and pace of community development activities increases.

2. The Housing Act of 1964 contained a two-part program intended to combat the shortage. The first part authorized \$10 million, without fiscal year limitation, for matching grants to states. These grants were to be used by the states to assist in organizing, developing, or expanding programs to provide special training in skills needed by those persons employed or to be employed by governmental bodies responsible for community development and to support research required for housing programs and needs. The second part of the program contained an authorization for the appropriation of \$500,000 annually for a three year period beginning on July 1, 1964 to provide fellowships for graduate training of professional city planning and urban housing specialists.

3. These were important first steps in meeting this problem. NHC feels, however, that the amounts heretofore authorized for this program are clearly inadequate to do the job. It therefore recommends:

(a) That \$1 million a year be authorized for training under a 5-year program.

(b) That the fellowships be increased to \$2 million a year for 5 years.

(c) That additional funds be provided for the training of sub-professionals and professionals in the broad field of community development.

This would be done through the Institute of Urban Development proposed by the President. The grant ratios should be equal to those provided in Title I of the Higher Education Act of 1965. NHC also recommends that research and training funds be made available directly to local communities without any requirement for a local matching share.

4. NHC supports Section 1106 of the Housing Act of 1968 which would expand the training program to permit grants to states for the training of persons who would be employed by organizations in the field of housing and community development.

#### CHAPTER P. PROVIDING NECESSARY MORTGAGE FUNDS AT REASONABLE INTEREST RATES

1. Adequate mortgage financing at reasonable rates is necessary to restore strength and vigor to residential building in order to achieve production at the rate necessary to accomplish our 20-year goals. The housing industry has been subject to fits and starts as a result of recurring tight money conditions and increases in interest rates. Housing has borne the greatest brunt and suffered the greatest damage as a result of these conditions.

2. When interest rates rise, many people who need homes can no longer afford them—even though they could have afforded them previously when interest rates were at more reasonable levels. The increases in interest rates have been a significant factor in increasing the cost of living. The price indexes have shown continuing increases in the cost of housing. While fiscal controls were supposed to stop inflation, they have contributed to inflation by creating tight money and increasing interest rates and the cost of living.

3. With the general increase in interest rates, the present statutory ceiling of 6% is no longer competitive for FHA-insured or VA-guaranteed mortgages. Consequently, these mortgages are selling at substantial discounts, with serious injury to the consumer and homebuilder. Many housing projects are not built due to these conditions. To insure that home financing remains competitive with alternative long-term investment opportunities, the President has recommended that Congress authorize the Secretary of HUD to adjust the FHA interest rate ceilings. In his message, he stated:

"To assure a steady flow of funds into homebuilding, I recommend that the Congress authorize the Secretary of Housing and Urban Development to adjust the FHA interest rate ceilings to reflect the economic realities of the financial markets. I have already recommended a similar adjustment on the interest rates for home loans to veterans."

Although NHC is opposed to increases in interest rates, we believe it is necessary to adopt the proposed amendment to lift the 6% interest ceiling, so that the Secretary can fix an interest rate which will be more competitive and which will attract necessary financing for housing; provided, however, that this authority shall be limited to a two-year period. This increase would cover all programs with financing at market rates of interest, including those where the interest rate ceilings range from 5¼% to 5¾%. In the enactment of such legislation, Congress should obtain an assurance from the Administration that the interest rates would be increased by the minimum amount necessary. Thus, at the present time, we believe that the interest rate should not be increased above 6½%. If necessary, the Government should be prepared to support the market at the interest rate if such mortgages are not accepted in the market place at that rate plus a reasonable service charge. Once interest rates are raised, it will be difficult to reduce them. Accordingly, the Administration should endeavor to hold the line on interest rates at a reasonable level in the FHA-insured and VA-guaranteed financing programs for housing.

4. The Housing Bill of 1968 should be amended to require the appointment of a Commission of outstanding experts to make a comprehensive study with recommendations on the measures necessary:

(a) To assure the availability of an adequate supply of mortgage financing to pro-

duce the volume of housing required to meet the goals set forth in these Resolutions;

(b) To assure that such financing will be available at reasonable interest rates and charges; and

(c) To avoid recurrent crises in home building due to tight money conditions and increasing interest rates.

The report of the Commission should be made within one year, so as to enable the President, Congress and the Secretary of HUD to take necessary action before the end of the 2-year authorization for the increase in interest rates above present statutory ceilings.

5. In his message, the President proposes legislation to transfer the secondary market operation of the Federal National Mortgage Association to completely private ownership. The President's message makes it clear that this change will not affect the Government's special assistance to special types of mortgages which are not readily accepted in the private market.

6. NHC is seriously concerned about the effect of the proposed transfer of FNMA to private ownership. The public interest is vitally involved in the operation of a secondary market for FHA-insured and VA-guaranteed mortgages. The prices at which mortgages are purchased should not be determined by those who may be motivated by producing a better return for stockholders' dividends or for retiring the FNMA stock now owned by the Government. Mortgages should be purchased at reasonable prices in order to help protect the consumer against unreasonable increases in interest rates and to maintain a stable homebuilding industry. We believe that FNMA has performed an important service under its present system of ownership and operation. Its decisions have been influenced by the public interest and the welfare of the economy. We recommend against the transfer of FNMA to private ownership. We are in favor of continuing the present FNMA organization and operations in the secondary market as this will best protect the consumer and the public interest by maintaining interest rates at more reasonable levels.

7. NHC agrees with the President's proposal to attract additional funds to the housing market by insuring mortgage bonds that are secured by pools of FHA-insured and VA-guaranteed mortgages. In his message, the President describes this proposal: "Some private institutional and individual investors have shunned investments in home mortgages because they could realize nearly comparable rates of return in other investments, and avoid the bookkeeping and paper work associated with hundreds of individual mortgages."

"These pools of savings—in large institutional pension funds, private trusts, and occasionally in individual estates—can be attracted to residential finance. It will take a new, marketable financial investment, with competitive yields and security. Such a bond-type obligation can be created to cover federally-insured mortgages held by private mortgage bankers or trusts."

"To enhance the attractiveness of such an obligation to investors, and thus attract additional funds to the housing market, I recommend that the Congress authorize the Department of Housing and Urban Development to insure mortgage bonds that are secured by pools of FHA-insured and VA-guaranteed mortgages."

The program to insure such mortgage bonds should be made applicable to FNMA so that it could use this method of substituting private investments in the FHA-insured and VA-guaranteed mortgages which it holds as a result of its secondary market purchases. If FNMA were retained in its present form rather than being transferred to completely private ownership, this method of selling insured bonds secured by a

pool of mortgages would enable FNMA to recapture funds which should offset its investments in the mortgages under its secondary market operation.

8. Even under the new concept of the Budget, NHC believes that expenditures to purchase mortgages should be offset by funds realized through the liquidation or sale of such mortgages—either through individual sales of mortgages or through sales of bonds secured by a pool of such mortgages purchased by FNMA in the secondary market operation. Likewise, NHC believes that the sale of FNMA participations in mortgages should be reflected in the Budget as an offset to the expenditures for the purchase of such mortgages with special assistance funds. Only the differential in interest rates between the rate on the pooled mortgages and the rate on the bonds or participation certificates should be reflected as a net expenditure in the Budget.

9. Through the years, Congress has authorized FNMA special assistance funds for the purchase of mortgages on projects which accomplish desirable social objectives or otherwise promote the public interest. NHC recommends that the FNMA special assistance program be fully utilized for the purchase of such mortgages. This is a way to provide financing at reasonable interest rates and charges for projects which promote the public and consumers' interest. Thus, we urge that the following actions be taken on special assistance programs:

(a) The full balance of the FNMA cooperative Revolving Fund authorized in 1955 should be made available for the purchase of FHA-insured mortgages under Section 213. This financing has made it possible for middle income consumers to join together to help themselves get good housing through their cooperatives. This program reaches families who can only afford housing at the lower monthly charges achievable with cooperative economies and financing.

(b) The full balance of FNMA special assistance funds should be made available for the purchase of mortgages on projects located in urban renewal areas, nonprofit housing for the elderly and other moderate income housing.

(c) The full balance of FNMA special assistance funds should be made available for the purchase of insured mortgages on homes under Program 14.

(d) The Administration should implement the authorization for FNMA to participate with private lenders in construction financing for projects on which FNMA is authorized to utilize special assistance funds to purchase mortgages. The Administration has not implemented this law which was passed in 1966. NHC recommends that this be done as one of the measures needed to stimulate and expedite the building of housing for lower income families.

10. The Administration has impounded large amounts of special assistance authorizations, even though these authorizations were grossly inadequate to meet current needs. The failure to use Congressional authorizations has contributed to the denial of homes which are urgently needed by people of moderate incomes.

11. In addition to the immediate release and use of all the foregoing FNMA special assistance funds now authorized by law, NHC recommends that the revolving fund for FNMA special assistance should be increased by \$3 billion to provide the funds required for mortgage purchases on the foregoing housing programs and on the new and expanded programs described elsewhere in these Resolutions. Thus, special assistance funds should be available:

(a) To purchase FHA-insured mortgages under the new programs to be added to the National Housing Act as Sections 235, 236 and 237; and to purchase the cash flow debentures under the New Communities Pro-

gram; such special assistance funds should be available to buy these FHA insured mortgages and debentures in case they are not readily accepted in the financial market;

(b) To continue purchases of mortgages under the below market interest rate program of Section 221(d)(3) at any time that alternative financing with interest subsidies is not available under the new proposed Section 236; and

(c) To purchase FHA-insured mortgages or VA-guaranteed mortgages if they cannot be sold in the private market at an interest rate fixed by HUD as reasonable, without excessive discounts; such FNMA authorization to purchase these mortgages is necessary to hold the line as to reasonable interest rates and to avoid excessive charges.

#### CHAPTER Q. MEETING THE INSURANCE CRISIS OF OUR CITIES

1. The President recommends a program to meet the insurance crisis of our cities. The following excerpts from his message describe the proposed program:

"Insurance protection is a basic necessity for the property owner. But for the resident of the city's inner core and the local businessman who serves him, protection has long been difficult to obtain. The problem has been heightened by civil disorder or its threat. \* \* \*

"Last August I established a Special Panel to seek the solutions to this problem. \* \* \* The Panel recommended a comprehensive program of mutually supporting actions by the insurance industry, the States, and the Federal Government. My advisers and I have reviewed the Panel's proposals carefully. We believe they are sound."

"Accordingly, I call upon the insurance industry to take the lead in establishing plans in all States to assure all property owners fair access to insurance. These plans will end the practice of 'red lining' neighborhoods and eliminate other restrictive activities. They will encourage property improvement and loss prevention by responsible owners."

"I call upon the States to cooperate with the industry and, where necessary, to organize insurance pools and take other steps to cover urban core properties. These measures will assure that all responsible property owners can obtain insurance, and provide a method of spreading equitably throughout the insurance industry risks that no single insurer would otherwise accept."

"I recommend that the Congress establish a cooperative Federal-State-Industry program by chartering a National Insurance Development Corporation within the Department of Housing and Urban Development. \* \* \* The Corporation will perform a number of vital functions in support of the actions of private industry and the States to assure adequate property insurance in all areas of our nation's cities."

"Through the sale of reinsurance against the risk of civil disorders, the Corporation will marshal the resources of the insurance industry and add to this the backing of the states and the Federal Government. Without this reinsurance, many insurers and State insurance regulators do not believe the industry can move forward to provide adequate property insurance in urban areas."

"This program will assist the insurance industry and the States to offer adequate property insurance for the inner cities. Through reinsurance, the program can help the States provide for the contingency of any large emergency losses. \* \* \*

"Insurance is vital to rebuilding our cities. It is a cornerstone of credit. It can provide a powerful incentive for homeowners and businessmen to rehabilitate their own property and thereby improve the community."

2. NHC recommends approval of the President's proposal and the Insurance Development Bill of 1968 which would effectuate it.

CHAPTER B. PROGRAMS AND POLICIES FOR GENERAL APPLICATION TO HOUSING

*I. Equal opportunity for housing*

1. Throughout its entire life, NHC has been committed to equal opportunity for all American families to secure good housing in good neighborhoods. It again reaffirms this position. While recognizing the slow but significant progress that has been achieved in recent years, it deplores the fact that this opportunity is still denied to millions of American families throughout every section of the land because of their race, color, creed or national origin, or because of the myth which exists as to their desire, or ability to pay for and maintain good homes. To overcome this denial of opportunity and to dissipate these myths, a great challenge is facing the nation.

2. NHC has long supported the principle of a competitive housing market open to free bargaining by all American families without regard to racial or ethnic background. Many localities have been limited in achieving this objective, however, because of inadequate supplies of low and moderate cost living accommodations and by the congestion of many minority group families in limited sections of the community. To provide an adequate supply of housing, it is necessary to raise production to a minimum of 3,000,000 dwelling units per year.

3. We urge the President and the Congress of the United States to take all steps toward providing an equal opportunity for housing. This includes the adoption of such provisions as may be required in Title IV of the Civil Rights Act of 1968 to effectuate fully the foregoing open-housing objective of achieving equal opportunity for all American families to secure housing. We urge the Administration to take all necessary additional actions to achieve this equal opportunity objective.

*II. Relocation*

1. NHC has long recognized the need for coordinated relocation payments and practices within the various programs of the Federal Government. We have, therefore, given strong support to the Uniform Relocation Bill pending before Congress.

2. When homeowners or tenants are being displaced for urban renewal or other governmental action, there should be a Federal grant to provide adequate payments as equitable compensation to pay not only their moving expenses, but also to help them obtain decent homes elsewhere.

3. When a small business is being displaced through urban renewal or other governmental action, affirmative action should be taken to assist its relocation either within the urban renewal area or elsewhere. If it is to be relocated within the urban renewal area, there should be a policy to establish a rental for the small business which it can afford. In order to achieve this, an appropriate write-down should be made in the disposition of property under the urban renewal program. While it is recognized that there are allowances under the present legislation to cover the cost of relocation by a business which is displaced through urban renewal, we recommend this additional action to better assure the continuance of a small business that is being displaced. NHC also recommends the full implementation and use of the 1965 amendments to the Small Business Act for businesses which are being displaced by urban renewal or other governmental actions.

*III. Uniform system for computation of incomes by HUD*

1. At the present time, the methods of computing incomes differ in HUD, although the constituent agencies are administering comparable housing programs involving income limits. For years, public housing has allowed appropriate deductions or exemptions in computing the family income, such as:

(a) Deductions from the income of a secondary wage earner which recognize that there are expenses in earning such wages, so they do not represent a full increment to family income;

(b) Deductions for amounts paid for the care of children or sick or incapacitated family members when these are necessary to permit the wage earner to be employed; and

(c) Limited deductions for minors or dependent adults.

2. Although these deductions or exemptions are allowed in the public housing program, they are not recognized in the FHA program involving rent supplements or below market interest rates under 221(d)(3). NHC recommends that similar deductions and exemptions be allowed by FHA in computing family income in these programs. In the Housing Bill of 1968 relating to the new home ownership program, a deduction of \$200 from family income is allowed for each minor child and the earnings of all minor children are excluded from family income.

3. HUD should have a uniform system for computing incomes which would be used by all constituent agencies administering housing programs which involve income limits. To be fair and equitable, these should allow for appropriate deductions and exemptions of the character described above.

*IV. Rehabilitation in slum areas not intended as containment program*

Rehabilitation programs for slum areas are not intended to be containment programs which would restrict present residents so that they must continue to live there. They should have an opportunity to move into other areas. The NHC goals contemplate the development of new and rehabilitated housing in other areas which would be available for the low and moderate income families now living in slum and ghetto areas. To help assure the achievement of this objective, we recommend the enactment of legislation providing that no program of subsidy, aid, or assistance by any agency of HUD—including sewer and water facility grants, open space grants, community facilities grants, urban renewal programs, model cities programs, mass transit grants, and FH insurance—may be carried on within any jurisdiction if a reasonable share of housing will not be available for low and moderate income families. Such legislation would help assure the development of balanced programs of housing in new areas into which the residents of slum and ghetto areas could move.

*V. Adequacy of housing to be provided for low- and moderate-income families*

Federally-assisted housing programs are intended to provide adequate space and facilities and otherwise meet proper standards for low and moderate income families. To meet the needs of larger families, more housing units must be built of larger size and with more bedrooms. To meet the sanitary needs of larger families, there must be a repeal of the administrative limit of one-bathroom-per-dwelling unit in the rent supplement program. In climates with summers of much heat or humidity, air conditioning should be permitted. Provision should be made for the recreational needs of housing communities for low and moderate income families, including swimming pools. This will provide children with an opportunity to engage in wholesome and constructive activities instead of destructive ones. The foregoing measures to improve the quality of life in Federally-assisted projects will accomplish the objective described by the President in his message where he urged higher design standards in public housing developments so that "new projects can be pleasant places to live, reflecting the needs of human beings, with attention to comfort and convenience."

*VI. Uniform system on tax exemption and tax abatement*

1. In some HUD programs there is no requirement for tax exemption or tax abate-

ment. This is true in the new leasing program for the use of privately-owned housing for public housing purposes. It is also true in the rent supplement program for those of public housing incomes. Yet, conventional public housing projects are required to have tax exemptions with a payment of 10% shelter rent in lieu of taxes. We previously recommended that conventional public housing projects be brought in line with those other publicly assisted programs which serve low income families. This would be done by permitting a payment in lieu of taxes which would be equivalent to full taxes.

2. There should be a more practical and consistent policy concerning the requirement for tax abatement on privately-owned projects assisted with below-market-interest rates or interest subsidies. Tax abatement should not be required on these projects, even as a means of offsetting the higher costs that prevail in some cities. Such tax abatement is often unavailable because of restrictions in state and local laws; moreover, the cities often face serious problems of inadequate tax revenues and are unwilling to grant tax abatement. Cost limits should be made realistic so that these private housing programs can function in high cost areas without requiring tax abatement.

*VII. Disposition of federally owned housing projects*

1. FHA has acquired ownership of rental housing projects upon which defaults have occurred. When requested, FHA should either lease these projects to local housing authorities for public housing or make negotiated sales of these projects for cooperative ownership by low income or moderate income families. Also, sales may be made to public agencies or nonprofit or other properly motivated organizations which will use them to provide housing for low or moderate income groups. The housing should be sold at a price and with a mortgage term and interest rate—on the purchase money mortgage accepted by FHA—which would enable the property to serve these income groups at monthly charges which they can afford. When necessary, financing should be made available to rehabilitate these properties. Such properties should be eligible for rent supplements and interest subsidies. These recommendations also apply to other federally-owned housing.

2. FHA has also acquired ownership of single-family homes on which defaults have occurred. In the disposition of this housing, FHA should meet the needs of those of low and moderate incomes. The housing should be sold to them at a price and with a mortgage term and interest rate—on the purchase-money mortgage accepted by FHA—which would be within the financial reach of the low and moderate income purchasers. Priorities should be established for sales which would accomplish this purpose, rather than granting priority to cash sales or sales involving conventional loans, as these generally involve purchasers with incomes above those at the low and moderate level. Legislation should be enacted if it is necessary to establish disposition policies in accordance with the foregoing principles.

*VIII. Opposition to "block grants"*

NHC reaffirms its policy position opposing untied federal block grants and favoring federal grants tied to program objectives. While there are untied supplemental grants in the model cities program which we support, they differ from the proposed "block grants" to the States because:

1. Supplemental grants in the model cities program are provided as a means of giving cities an incentive to develop programs for the improvement of entire neighborhoods.

2. In contrast to the proposed "block grants" which would go to the States, model cities grants go to the cities.

**IX. Federal controls on interstate sales of real estate**

1. NHC supports the previous legislation introduced by Senator Harrison Williams of New Jersey which would provide for a full and fair disclosure of the nature of interests in real estate sold through the mails and by communications in interstate commerce. This proposed legislation would prevent fraud and misrepresentation in the sale of such real estate.

2. In hearings before the Senate Subcommittee on Frauds and Misrepresentations Affecting the Elderly, it has been shown that there are increasing instances of deception and fraud upon the unwary public. The Williams measure would provide effective protection of the public from being bilked into buying lots which are located in uninhabitable deserts, swamps or other undesirable areas.

**X. Acceptance and accumulation of applications for programs**

HUD has discouraged the submission of new applications in programs where a backlog of unsatisfied applications exists. NHC is strongly opposed to this discouragement of applications for HUD assistance. Even when there is an unsatisfied backlog of applications, HUD should continue to accept applications. There is no better way by which HUD can learn the needs and demands for programs which it administers, so that it can document and support requests for necessary Congressional authorizations and appropriations.

**XI. Construction work for unemployed in ghetto areas**

Increased construction volume will require substantial increases in the work force. The large pool of untrained unemployed within the ghetto is a large source of additional manpower. There should, therefore, be a massive program to accelerate the training of unskilled groups and to broaden their opportunities for employment in the construction industry.

**XII. Support for international programs for housing**

1. NHC is aware of the critical housing problems elsewhere in the world, particularly in the developing countries. We urge continuation and expansion of our Government's foreign aid programs for housing in the developing countries, particularly cooperative housing to provide ownership by moderate income families as contemplated by the Humphrey Amendment to the Foreign Assistance Act.

2. Further, we urge our Government to support efforts: (a) to elevate the importance of housing in the economic development process by supporting efforts to establish, within the framework of the United Nations, a specialized international agency dedicated to solving the housing problems of the developing countries; and (b) to increase U.S. financial support to U.S. universities and other institutions for research and training programs to help solve these housing problems and supply the trained personnel so badly needed.

3. NHC applauds the leadership provided by the United States in the adoption of a resolution by the United Nations Social Development Commission giving emphasis to a demonstration program for the improvement of squatter areas; also, the resolution calling for a study to establish an International Housing Year.

**XIII. Extension of FHA authorizations**

The FHA authorizations should be extended beyond their present expiration date of October 1, 1969.

**XIV. Appropriations requested by administration**

NHC strongly recommends Congressional approval of the budgetary requests of the Administration for HUD programs. These

funds are urgently needed to meet the critical problems of our urban areas and the shortage of adequate housing for persons of low and moderate incomes. We further recommend the additional appropriations described elsewhere in these Resolutions.

**CHAPTER 5. NEED FOR EFFECTIVE INSTITUTIONS, ADMINISTRATION AND FEDERAL-LOCAL RELATIONS**

1. In itself, the enactment of adequate legislation will not achieve the goals set forth in these Resolutions; nor will it meet the needs of the American people or the crises in our cities. Laws are not self-executing. It is necessary that the legislation include a mandate which will assure the establishment of effective institutions, administration, and federal-local relations. NHC recommends that legislation be enacted which would require the following actions by HUD to assure the effective execution of laws relating to the programs under HUD's jurisdiction.

2. HUD should redefine its role to concentrate on major policies and on constructive leadership in executing federal laws and to grant greater local autonomy to local governments and agencies in undertaking and operating projects involving HUD aid. NHC believes this HUD role would constitute creative federalism. The expenditure of federal monies should be subject to broad federal guidelines. Through the years, there has been a continuing increase in the burden and detail of HUD controls over local operations in the conduct of HUD-aided programs. All HUD controls should be eliminated which are not required by federal law. We will never achieve the volume and expedition required in programs authorized by the Congress unless there is a decentralization of responsibility to the local agencies involved. The local agencies can properly be held to account for their responsibilities under programs. There is no reason to assume that there is any less integrity and competence in local officials than in federal officials.

3. HUD should accelerate processing, production and decision-making by federal and local officials and by participants in all HUD programs, including the establishment of time schedules for all actions required. There should be a time limit for submission of applications by local agencies and a time limit for HUD action in approving or rejecting applications. However, qualified applications should not be rejected because of technical or insubstantial reasons, lack of money or lack of a priority status according to a schedule established by HUD; likewise, applications should not be rejected in order to remove them from the pending work load. On the contrary, there should be a HUD policy to encourage the filing of applications and the accumulation of a shelf of projects which would be ready to go if and when adequate funds become available. All qualified applications should be accepted and processed and held in a state of readiness so that Congress can be currently informed as to the backlog and demand for HUD programs.

4. After applications have been approved and allocations made, there should be a time limit for contracting and execution. With respect to requirements for HUD approval after a contract or commitment is issued, there should be a recognition that HUD has a certain period within which to act; and, failing such action on matters requiring HUD's approval, the proposal to HUD shall thereby be accepted and considered approved.

5. HUD should act promptly in making allocations and commitments of all authorizations and funds made available by Congress. Such allocations and commitments should be based upon:

(a) The requests that are received within a designated time which meet the applicable statutory requirements; and

(b) The respective needs of the communities involved.

There should be no impounding or holdback of funds. The money should be allocated and committed as quickly as possible. All monies should be made available based upon the qualified requests that are received within a prescribed time limit. The guideline should be the need for the program in the community involved.

6. HUD should simplify its regulations and conditions attached to HUD aid and eliminate the detailed controls over project development and operations. Such controls are overly burdensome, costly, and time-consuming. They discourage initiative and innovation. They are inconsistent with the achievement of the goals recommended in this report.

7. HUD should eliminate conflicting policies and requirements among its different units, as applied to comparable programs. For example, the methods of determining incomes under the Public Housing Program administered by HAA are different from those under the rent supplement and below-market-interest-rate programs administered by FHA. Some of these inconsistencies are due to administrative regulations while others may be due to provisions in existing laws.

8. HUD should consult with representative groups of local public agencies and private participants in each of its programs to identify problems which impede their progress and to develop workable solutions. For this purpose, HUD should establish:

(a) A federal-local committee on public housing and urban renewal; such a committee functioned effectively for years until it was discontinued.

(b) A federal-city committee on the model cities program.

(c) Like committees of representatives from the participants in each program; thus, there should be a restoration of the committee of representatives of cooperatives participating in FHA programs.

Each such committee would meet periodically to give HUD first-hand experience concerning the operations of the HUD-aided program involved. Such consultation should result in quick and realistic action in eliminating obstacles and solving problems. Otherwise, such obstacles and problems are long-neglected, often because they are not known or because HUD does not get proposals for solutions from those directly engaged in the program.

9. In the proposed legislation, Congress should require a report from HUD within six months (a) on the actions taken by HUD to comply with the legislation; and (b) on any changes required in existing laws to achieve the stated objectives.

**TRIBUTE**

Ernest J. Bohn

Lawyer, housing and planning official, state legislator, city councilman, author of the first state enabling legislation in the nation for low-rent public housing, a founder and first president of the National Association of Housing and Redevelopment Officials, advisor to Presidents, Governors and Mayors, and counsel to the world court of public opinion in behalf of the underprivileged—Ernest J. Bohn is returning his commission as Director of the Cleveland Metropolitan Housing Authority after more than a third of a century of selfless public service.

When Ernie Bohn first rallied the people, nation-wide, who were concerned with slum sickness that threatened the life of cities, their numbers were so few that they tell of caucusing in a telephone booth. Now, his co-workers are legion wherever man seeks social, economic and political equality. When he conceived low-rent public housing as a basic tool for social progress, Ernie Bohn rejected the concept of institutional living in projects, and built communities of homes called "estates". He has devoted his working life to creating physical and social environ-

ments where people live with dignity, and where democracy and freedom flourish.

Members of the National Housing Conference, assembled for their 37th Annual Meeting, honor Ernest J. Bohn for his countless contributions to the welfare of his city, state and nation, and respectfully suggest that his counsel is more essential to the people's welfare now, than ever before.

By honoring Ernest J. Bohn, members of the National Housing Conference reaffirm their dedication to the goals for America which he has articulated so clearly and for which he has fought so long, and pledge their continuing enlistment under his dynamic leadership.

*Walter Mayes Simmons*

Walter M. Simmons, executive director and secretary of the Memphis Housing Authority since 1938, died after a long illness on February 22, 1968. The greatest monument to his thirty years of service, is the rebirth of his beloved City of Memphis. Thousands of Memphis families live in good homes in good neighborhoods because Walter Simmons never faltered in his efforts to create communities where his less fortunate neighbors could live with dignity. As Chairman of the Memphis and Shelby County Planning Commission, he set a constant goal of making no little plans. As director of the urban renewal program in his city he carried out those plans, added hundreds of millions of dollars in physical values to Memphis, while helping to create one of the most viable, and exciting, cities in the nation.

Walter Simmons is missed by his colleagues from coast to coast. His loyalty to the National Housing Conference, and his efforts to strengthen the hand of this organization on the national front, are major reasons that members of NHC are able to meet for their 37th Annual Meeting on March 3, 1968. By official action of its membership, the National Housing Conference extends its deepest sympathy to Walter's family on their great loss. Walter was one of NHC's most effective members, whose name will long be cherished. In his honor the membership of the National Housing rededicate themselves to a continuation and expansion of the housing and urban development programs and concepts that he sponsored and administered so brilliantly.

*Honorable Brent Spence*

Elected to the House of Representatives from Kentucky in 1930, Brent Spence served his district, state and nation for thirty-three years as a champion of all people, particularly those who today are termed the disadvantaged. He served on the House Committee on Banking and Currency, and fought for passage of every housing and urban development law that has been written into national law. He was Chairman of the Banking Committee for 18 years, and was author in the House of Representatives of the Housing Act of 1949 which stated as national policy that every American family is entitled to a decent home in a decent living environment.

In September of 1967 the nation was saddened by the death of Brent Spence at the age of 92. While members of the National Housing Conference mourn his loss, they rejoice that for more than thirty years they were permitted to serve under his inspired leadership and to assist him in achieving legislative action that brought good housing to millions of American families.

Assembled for their 37th Annual Meeting, members of the National Housing Conference extend their deepest sympathy to members of his family.

By Resolution of the Membership of the National Housing Conference, Washington, D.C., March 3, 1968.

## THE SHORTAGE OF AIRPORT FACILITIES

Mr. FANNIN. Mr. President, much is being said and written about the critical shortage of airport facilities against a background of a growing volume of commercial and general aviation.

Recently, Mr. Cyrus S. Collins of American Airlines reported on this subject in a paper entitled, "Challenges Facing the Air Transportation Industry." This report was made to the Southwest Transportation Seminar at Tempe, Ariz.

Because this is a problem which demands a solution I would like to call it to the attention of the Senate and ask unanimous consent that this speech be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD: CHALLENGES FACING THE AIR TRANSPORTATION INDUSTRY

(By Cyrus S. Collins, vice president, public affairs, American Airlines, Inc., before Southwest Transportation Seminar, Tempe, Ariz., February 2, 1968)

Dr. Duriez, fellow panelists, and guests, I am delighted to be here and honored to participate in this seminar, representing the airline industry.

The airlines are the youngest segment of scheduled transportation. We are also the fastest growing, and with expenditures last year of just over \$2 billion for new plant and equipment, we have taken over the industry lead as measured by quantity of new investment. The airlines now account for about 3% of total U.S. private investment. As we approach economic maturity, and can no longer absorb constantly increasing labor and material costs without reflecting these increases in our fare structure, we have much to learn from the experience of other segments of the transportation industry, and in particular, the railroads. For that reason, too, I welcome the opportunity to be here today.

Before I comment on our chief areas of concern for 1968, let me draw a couple of interesting comparisons from the history of transportation right here in Arizona. I understand that the first scheduled transportation in this area began in 1857 when the San Antonio and San Diego Stage Company started operations. One of their advertisements stated, "Passengers and mail are forwarded in New Coaches drawn by six mules over the entire length of our line, except from San Diego to Yuma, a distance of 180 miles, which we cross on mule back."

The fare from San Diego to Tucson was \$125 and it included the guarantee that an armed escort would accompany the stage coaches through the Indian country.

We have made some improvements in speed and comfort and effected certain economies, including elimination of the armed escort, and can offer the same trip today for \$27.60.

Transportation in the southwest became big business shortly before the Civil War. The Overland Mail Company connected the western terminus of the Missouri Pacific Railroad at Tipton, Missouri with San Francisco. The company had 100 heavy Concord coaches, 1000 horses, 500 mules and 750 employees. Its government contract required the line to make the 2750-mile trip in 25 days, and I understand they had a splendid record of schedule performance and usually made the trip in only 23 days. Lack of competition often permits a conservative scheduling policy, but this was good performance.

But the Overland Mail operation did not succeed in attracting sufficient traffic to show

a profit from passenger revenues, so the Federal Government subsidized the mail service. It was quite a subsidy, and had to be, because the cost of delivering mail from coast to coast averaged about \$65 per letter.

You would be surprised at the number of people who think that the Post Office still subsidizes the airlines for the carriage of mail. Actually, in our view, the pendulum has swung a little too far in the other direction. At the old 8-cent air mail rate the Post Office kept 7.3 cents and gave the airlines .7 cents. At the new 10-cent rate the Post Office keeps 9.4 cents and the airlines receive only .6 cents. And when first class mail moves today aboard an airliner, the Post Office keeps 5.85 cents of the cost of the new 6-cent stamp, and we get 0.15 cents.

Instead of receiving, we seem to be on the giving end, and that's part of our problem.

Rapid growth has been the story of recent airline success, but it is also the root of two of our most pressing problems, both of them calling for careful consideration in the formulation of federal policies for the immediate future.

These two problems, which I will discuss briefly today, in the context of our seminar subject, are:

First, the profit squeeze; and

Second, the growing congestion at our larger hub airports and on the surrounding airways.

There is nothing new about the concept of a profit squeeze, either in the economy at large or in the transportation business, which has had its fair share of this problem at various periods in the past.

What makes the squeeze on the airlines today a matter of rather special concern is a combination of two factors. It is developing against a background of an extraordinary growth which has seen our industry almost double in size every five years, with future growth projected at a corresponding pace, despite the larger base. The second factor, resulting from the first, is our industry's truly awesome projected requirement for new capital.

During the ten-year period 1957 to 1966 the average annual growth rate in passenger traffic of the major U.S. airlines was 12.5%. For the next five years through 1971 the average annual growth rate is forecast to be 13.8%. And cargo traffic is growing even faster. The average annual growth for the 10 years through 1966 was 19.2%, and the industry anticipates an annual growth rate of 21% for the next 5-year period.

To accommodate this growth the 12 major U.S. airlines are planning to spend \$10.5 billion in the next 5 years. Ground support equipment will be a significant part of this total. Of the \$10.5 billion, \$1.7 billion or 16.2% will go for ground support equipment such as new reservations systems, baggage handling facilities, cargo handling facilities, and additional equipment required to handle the Boeing 747's and the new jumbo Trijet aircraft.

Capital expenditures this year alone will grow to a new high—\$2.7 billion dollars, of which more than \$400 million will be for ground support equipment. A substantial amount of the planned capital expenditures for each of the next five years will go for advance deposits for aircraft to be delivered in subsequent years. We are already making advance payments for the Boeing 747 in installments over a three year period with 50% of the purchase price met six months prior to delivery. There are presently 100 747's on order by the 12 major carriers. The carriers must deposit \$1 billion in progress payments on 747's alone prior to delivery. The money of course will not earn any return for the carriers before the 1970's.

We paid \$5 to \$7 million for each 727 or 707. The new jumbo Trijets will cost \$15 or \$16 million, and the 747's come to over \$20 million per plane.

The cost of all flight equipment in service at the beginning of 1967 was about \$5.5 billion. With the present program for the next 5 years, the airlines have committed themselves to an investment nearly 200% of the value of the entire fleet at the beginning of 1967. Yet the projected industry growth rate on which the equipment purchases are planned is not out of line with the last five years of history, and with the higher unit cost of new aircraft.

So, you may ask, what are we worried about?

Quite simply, our revenues, although climbing rapidly are not keeping pace with our expenses. The reason is clear.

The simplicity and efficiency of the turbine engine, and the genius of the engineers who designed today's jet aircraft have enabled us to reduce unit costs, which we call costs per revenue and available seat mile, despite the upward spiral in the costs of the wages we pay and the materials we buy. This lowering of unit costs has permitted us to make actual decreases in passenger fares and freight rates.

Measured against a 1957-1959 base of 100, the average cost of all items in the consumer price index was 117.1 for 1967. Services, reflecting higher labor costs, were up even more, and public transportation as a whole was up to 133. Air fares for domestic trunk carriers measured against the same base, were 98.7, and our air cargo rates were 94.4. These lower fares have stimulated traffic, but there are clear signs that we have gone about as far as we can go, because unfortunately our ability to continue to pass on to our passengers the benefits of lower unit costs has come to an end. Our unit cost levels have bottomed out. The fleet conversion to jet aircraft is almost completed, and the new generation of jumbo jets and SST's in a mix with existing fleets does not promise any dramatic change in this pattern.

Much attention has been given to the recent favorable earnings record of the trunk airlines and yet in only one of the last 12 years have the carriers as a group exceeded the CAB's allowable fair rate of return of 10.5% on total investment. With an ever increasing investment base, American's 1967 earnings reflect an actual dollar decline from 1966, and we will be happily surprised if this year's results are as good as 1967's. Since we must maintain a satisfactory rate of earnings to protect our credit rating and our ability to sell securities or make new borrowings to meet our capital requirements, it is easy to see the cause for our increasing concern.

We believe the industry and the CAB will have to face up to the problem of inadequate return on investment caused by low fare yield before this year is out.

The second problem, that of congestion on the airports and airways, is receiving increasing attention, not only from us, but from the Administration, the Congress, and the airport operators, who are directly concerned and who have more power than they perhaps realize to find solutions.

It may, in a sense, be somewhat anomalous to talk about airport and airways congestion here in the southwest, where it is not yet a problem. And yet, the situation is so threatening to our industry, and in such need of careful examination in the determination of federal policy, that it seems to me to be appropriate for discussion at this seminar. It has furthermore been the object of some highly pertinent and thoughtful pronouncements by the new Department of Transportation. This policy statement deserves careful attention; I will comment on it in greater detail after describing the nature of the problem.

It is increasingly apparent that demand for airport runway use is exceeding supply. This excess of demand over supply is leading

to serious operating delays, most of them at the 23 largest hub airports. Two years ago, the Federal Aviation Administration estimated that these delays were costing the airlines some \$40 million a year. The added cost to the individual passengers who are delayed is harder to calculate, but it is obviously high and getting higher.

Congestion and delays are not limited to the ground. They occur in the air as aircraft are stacked in holding patterns, some of them far removed from the airport. These patterns often stretch back so far as to interfere with traffic patterns in distant cities, and it is not unusual for a congested pattern in New York to delay the departure of an aircraft from a city as far away as Chicago.

It is often assumed that the growth of airline traffic is the principal cause of this congestion. It is indeed one of the causes, but when we examine the total growth record in air transportation we can readily see the significance of another cause: the even more impressive growth rate of private flying, usually referred to in our industry as "general aviation".

Today the private aircraft fleet for outnumbers the airline fleet, and is growing considerably faster.

In 1956 the airline fleet totaled 1881 aircraft. The private fleet totaled 63,000. Today there are about 2400 airline aircraft, but the private fleet has risen to over 100,000. Looking ahead 10 years we estimate that the airline fleet will total about 3500 planes, while the private aircraft total will reach 180,000.

The private fleet is not only larger, but is far exceeding the airlines in flight hours. The airlines flew 3,800,000 hours in 1956. Private flying totaled over 10,000,000 hours, or 73% of the total. The private flying percentage has risen to 78.5% today, and is not expected to diminish in the next ten years in spite of the impressive growth of the airlines.

This rapid growth in private flying is also reflected in percentage of use at our leading airports. At these airports, those with FAA control service, the airline percentage of total use has dropped from about one-third in the early fifties to 20% today. It is projected to drop further, to only 12% ten years from now.

One reason for this trend is the use of larger aircraft by the airlines. Much of our growth is being accommodated without a proportionate growth in the number of operations. The average number of seats on each airline plane operating out of New York was 52 ten years ago. It is now over 90, and will reach 111 by 1970, and 156 by 1975.

Those of you who travel frequently on the airlines probably think of Friday as a bad day to fly. Delays are worse on Fridays, and much publicity was given to the famous black Friday in New York a few years ago, when weather and congestion combined to grind our operations nearly to a halt. It is true that airlines carry more passengers on Fridays, but this affects only the volume inside the terminal buildings. In terms of total operations, the airlines fly only one percent more schedules on Fridays than on Mondays, Tuesdays, Wednesdays and Thursdays. So the congestion on the runways is not due to increased airline operation, but rather to the perfectly natural inclination of the private flier to come and go on his own business at the same peak hours our passengers chose to arrive and depart on theirs.

Private flying gives us concern under two other headings. One is safety. This is a direct effect of differing operating standards. Although some corporate aircraft in the private fleet and most of the air taxis are flown by professional pilots whose training and whose records approach airline standards, there is still a dangerous difference in minimum standards. A 17-year old boy, who is not permitted to drive to or from the airport, can land his own plane at LaGuardia or O'Hare at night or during the hours of peak airline use. Seventeen year old boys have not presented us with a large problem, and I use the ex-

ample only as an illustration of the differing minimum standards and their obvious relationship to safety.

Airlines require full instrument flying capability, complete navigation systems, with transponders for positive air traffic control. We have two pilots in the cockpit, both with air transport and instrument ratings for all-weather operation. The minimum requirement for private flying in the same locations under visual flight rules is a radio and a single pilot with a private license.

Airline pilots receive recurrent training on a continuing basis. They must obtain an FAA rating for every new type of equipment flown and must pass semiannual proficiency checks. The private pilot is not required to undergo any training beyond that needed for his private license.

The physical exam for private pilots is less rigorous than that required for a truck driver operating across state lines.

It seems obvious to us that standards for private flying in and out of airports serving large numbers of airline jets must be upgraded to approximate as closely as possible the standards of the airlines.

The last of our problems with private flying relates to the costs of operating airports and the nation's airways.

Most hub airport costs are almost totally underwritten by the landing charges paid by the airlines and passed on to the passenger as a part of the cost of his ticket. The small private plane pays an insignificant minimum landing charge, usually less than \$10. Yet the private plane takes as much or more time on the runway than does the airline plane, which pays landing fees many times higher.

Similarly, the airline passenger, paying a 5% tax on his ticket, is paying his share of the cost of the nation's airways. The private pilot pays only a small gasoline tax which produces only about one percent of the annual cost of operating the airways.

Clearly the private pilot is getting a free ride. We would have no objection to that, nor would the public using the airlines, if it were not for the congestion, related expense, and added delay—and the safety hazard—that results from private use of the large hub airports at peak hours.

It is far less expensive to build small airports to accommodate private aviation than to invest the half billion dollars required for new airline jetports. A well-equipped private airport can be built for one-twentieth of the cost and on less than one-twentieth of the land required for the airline jetport.

Construction of new satellite private airports is essential, and there are many existing facilities that can be upgraded or used in their present state by private fliers. But only by restrictions placed on airport use by the airport operators, or by higher safety standards, or by user charges reflecting the true cost of use—time on the runway, or preferably by all three, can this problem be resolved.

We do not feel it is fair to our passengers, the people who cannot afford to own their own planes, to ask them to subsidize those who can.

Fortunately the new Department of Transportation is focusing on the problem. I referred a few minutes ago to an extremely significant policy statement on this subject. It was contained in a speech made last November by the Assistant Secretary of Transportation, Cecil Mackey. I quote:

"As with any scarce resources, airport capacity and airspace capacity must be allocated in a way which takes into account the productivity of the users in the light of our overall transportation objectives. This means that allocative techniques must be established that yield the greatest return on our investment.

"Normally in our private enterprise economy, this process, which is in effect a rationing process, is carried out by the price

system. But here, in air transportation, where the Federal Government controls the airspace system, and governmental units of one kind or another own and operate many of the airports, the price system is only marginally applicable. Instead, public policy at each level must establish the necessary combinations of pricing and regulatory techniques that will ration the resources so as to gain the greatest possible use.

"In the case of airports, there has been virtually no use of regulation to relieve congestion or increase efficiency. Where charges have been imposed, generally in the form of landing fees, the objective has been simply to 'pay' for the facilities. The notion of rationing; i.e., the deliberate manipulation of charges and other devices to increase capacity, improve productivity, relieve congestion or achieve greater efficiency, has literally played no significant part in our provision of air transportation facilities.

"All too often local authorities have not been willing to take the steps which in our economy are normally considered quite logical to solve either their financial problems or their congestion problems. Frequently aviation has simply not been assigned a very high priority at the State or local level nor has there been a willingness to levy charges on all users consistent with the facilities and services offered or desired.

"The Department of Transportation recognizes that the problems associated with aviation growth cannot be solved simply by unlimited additions of concrete and electronic gear. The problem is basically that of allocating scarce resources and must be dealt with in those terms. This is the approach that we will be taking. We will encourage both private and public authorities to use their initiative and imagination in dealing with those aspects of the problem which can best be handled at the local level."

The concept of establishing user priorities, of allocating scarce resources in the public interest may appear basic and self-evident, but it reflects a thinking almost totally absent from the aviation scene during the years of helter-skelter growth. It is an example of simple logic and a perceptive approach that must emerge as we undertake a systems study of our problems. The systems concept was implicit in the creation of the new Department of Transportation, and we welcome it as we look to continued progress in the development of federal transportation policy.

A few weeks ago Bob Bedingfield, the *New York Times*' able transportation writer, started a feature article as follows:

"The transportation industry, coming out of a year of constantly rising wage and material costs and facing another with even steeper increase in sight, views 1968 somewhat as an uncommonly intelligent turkey might view the month of November."

We know what he means. But despite the problems I have outlined and several others I have not had time to mention, we expect to survive November 1968 and many future Novembers as well.

Thank you.

#### THE FINANCIAL STATEMENT OF SENATOR MOSS

Mr. MOSS. Mr. President, in accordance with a practice I adopted several years ago, and have followed faithfully, I am again making public disclosure of my income and assets. The fact that the U.S. Senate will shortly consider the report and resolution on ethics has not in any way triggered this disclosure. I simply feel that this is an appropriate time to do the job.

Since I have practically no income beyond my Senate salary, and my assets

are very modest, some of my colleagues may wonder why I am making this information public. I am doing so because I feel that all public officials owe it to their constituents to report to them, at regular intervals, their full income and assets, and I do not want to be in a position of calling on others to make a disclosure which I have not made myself.

My total income for 1967 was \$34,922. Thirty thousand of this was my salary, and the additional \$4,922 came from honorariums for speeches, consulting fees, stock dividends, and royalties on my book "The Water Crisis."

My total assets at this time are \$43,704.20, which includes the equity on my homes in Salt Lake City and in Chevy Chase, Md., my saving and building association accounts, two Utah building lots and my family car.

My liabilities total \$56,481.18, consisting mostly of the mortgages on my two homes, and loans connected with the purchase and renovation of the Salt Lake home.

All amounts are approximate. My wife has no additional income or earnings.

Following is a complete listing of my income and assets for the calendar year 1967:

#### Financial statement, Mar. 15, 1968

(All amounts approximate)

ASSETS	
Savings, Oriental Building Association	\$2,504.20
Checking account, Riggs National Bank	1,000.00
Lot in Holladay, Utah	750.00
Lot in Salt Lake City, Utah	8,000.00
1965 Ford Mustang	1,200.00
5 shares stock, Standard Oil Co. of California	250.00
Equity in home in Salt Lake City	10,000.00
Equity in home in Chevy Chase, Md.	20,000.00
Total	43,704.20
LIABILITIES	
Mortgage on Salt Lake City home	21,000.00
Mortgage on Chevy Chase home	19,239.00
Personal note due in 1971	10,000.00
Loans on insurance policies	6,242.18
Total	56,481.18
INCOME	
All income for 1967, including \$30,000 salary, honorariums, consulting fees, stock dividends, book royalties, etc.	34,922.40

#### WHAT WHITE AMERICA MUST DO

Mr. HARTKE. Mr. President an editorial in the just-out Saturday Review issue dated March 16 is devoted to the urgent problems of the cities. The article, titled "What White America Must Do," is written by the magazine's special consultant on urban affairs and author of the book, "Cities in a Race With Time," Jeanne R. Rowe.

Mr. President, I ask unanimous consent that this penetrating discussion, dealing with the problem of our "race with time" before another so-called long hot summer, may be inserted in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

#### WHAT WHITE AMERICA MUST DO

(EDITOR'S NOTE.—Jeanne R. Lowe, author of "Cities in a Race With Time," is special consultant on urban affairs to SR.)

On the whole, the massive report by the National Advisory Commission on Civil Disorders is a brave and basic document—far better than progressive Americans, white or black, had expected. It even drew a hopeful response from Black Power spokesmen. Yet the aftereffect of reading the commission's historic indictment of white racism as the "fundamental" cause of Negro rioting, and its detailed (too familiar) description and (bigger but still familiar) prescriptions for steps to alter ghetto conditions is a terrible letdown. Where do we go from here?

The crucial question remains unanswered: What can be done to prevent recurrent rioting and even open rebellion? The commission's proposals provide a blueprint for comprehensive action on causes. But they do not tell us what should be done now to reduce the possibilities of bloodshed in the cities this summer. Nor does the report detail the causes of or prescribe cures for the underlying erosive factor of racism.

A timebomb is ticking in the cities. Tensions, resentment, and militancy grow among Negroes who are cynical about a national government that has cut back such essential programs as the youth Job Corps and training, and about local governments that have done nothing since last summer except beef up their police arsenals. The commission has handed the country a laundry list of unexceptionable programs so massive and manifold that action on all but a few before summertime is clearly impossible.

We can do virtually nothing between now and June to win the war on poverty, or to undo the multiple burdens of discrimination and segregation detailed by the commission. What is possible, and what must be done, is to buy a little time by giving substance to the faith that the majority of Negroes still have in this country through a major demonstration of our commitment to new national priorities and full equality.

We must take immediate dramatic steps, backed up by the most effective legislative programs, to close the credibility gap that steadily pushes black America further away from white America and breeds violence.

Whitney Young of the Urban League is right in declaring that the Negro problem has been studied to death and that the time has come, instead, to study the problems of white America. For as Swedish social economist Gunnar Myrdal found so clearly some twenty years ago in his study of the Negro in America, "the Negro problem is predominantly the white man's problem," and, "All our attempts to reach scientific explanations of why the Negroes are what they are and why they live as they do regularly led to determinants on the white side of the race line."

For generations, Myrdal wrote in *An American Dilemma*, the majority of Negroes, although subordinated and suffering the consequences of the failure of America to live up to its creed of equality, justice for all, and the essential dignity of man, were "under the spell of the national suggestion." The summer-time riots indicate that the new, young, urbanized and more educated Negro has fallen out of the spell; he has lost faith.

What can America do now—between now and June? To begin with, we can certainly stop debating spending priorities between Vietnam versus the cities, and a tax increase versus inflation, as though these were the only alternatives. Doubtless a tax increase will be needed, but within the proposed current federal budget the Administration and Congress can cut back major nonessential, nondefense spending and divert billions into crash programs for cities. This shifting of funds and priorities will demonstrate to black

11. HEW. Both Houses received the annual report of HEW for fiscal 1967. pp. H3867, S5619
12. PERSONNEL. Both Houses received from Transportation a proposed bill to authorize the payment of expenses of preparing and transporting to his home or place of interment the remains of a Federal employee who dies while performing official duties in Alaska or Hawaii; to Government Operations Committees. pp. S5619, H3867
13. COUNTY COMMITTEES. The committee report on S. 1028, to extend certain benefits to former employees of county committees, contains the following:

"The purpose of this legislation is to facilitate the hiring of qualified personnel in positions in the Department of Agriculture by removing certain impediments to the recruitment of experienced county committee employees of the Agricultural Stabilization and Conservation Service (ASCS)."

"Enactment of S. 1028 will provide for desirable changes in the conditions under which ASCS personnel may enter into Federal employment with the Department of Agriculture, as follows:

"(1) The Department of Agriculture will be enabled to place the employee in a civil service position at a salary step which is comparable to, but does not exceed, his prior county salary rate.

"(2) The employee's annual and sick leave will be transferred to the new position in the Department of Agriculture.

"(3) The employee's former county committee employment service will be creditable for leave earning purposes and reduction-in-force purposes in the new position in the Department of Agriculture."
14. CREDIT UNIONS. The committee report on H. R. 14907, to amend the Federal Credit Union Act, states that the amended version of the bill would: (1) extend the maturity of loans made on a secured basis from 5 to 10 years, (2) permit credit unions to make investments into State-chartered central credit unions, (3) enable Federal credit unions to purchase from any liquidating credit union notes of that credit union even though the member whose note was being sold would not become a member of the purchasing credit union, (4) provide that credit unions may facilitate members' purchases of health and accident insurance on credit union loans and include the cost of this insurance in the loan repayment schedule with no fee charged for this activity, (5) allow the board to delegate the borrowing authority to the executive committee, (6) increase the unsecured loan limit to 2½% of unimpaired capital and surplus, (7) provide for two additional audits plus the annual examination, and (8) make it clear that only a majority vote of the board is necessary for removal of a member of the supervisory committee.
15. HOUSING. The Banking and Currency Committee reported an original bill S. 3497, to assist in the provision of housing for low- and moderate-income families and to extend and amend laws relating to housing and urban development (S. Rept. 1123). p. S5619

SENATE

16. SUPPLEMENTAL APPROPRIATIONS. H. J. Res. 1268, making supplemental appropriations for fiscal year 1968 for highways and certain claims, was ordered to lie on the table. p. S5570
17. FOOD STAMPS; FORESTRY; COMMODITY EXCHANGES; LOANS; WATERSHEDS. The Agriculture and Forestry Committee voted to report (but did not actually report) without amendment S. 3068, authorizing \$245 million for the Food Stamp Act for fiscal year 1969; S. 2837, authorizing establishment of the Cradle of Forestry in America in the Pisgah National Forest, N.C.; S. 3143, making frozen concentrated orange juice subject to the provisions of the Commodity Exchange Act; S. J. Res. 168, authorizing temporary emergency funds for the Farmers Home Administration; and H. R. 15822, authorizing establishment of the Robert S. Kerr Memorial Arboretum and Nature Center in the Ouachita National Forest, Okla.; and with amendment S. 2276, permitting Secretary of Agriculture to contract for works of improvement under the Watershed Protection and Flood Prevention Act upon request of local organizations. pp. D435-6
18. FARM PROGRAM. The "Daily Digest" states the Agriculture and Forestry Committee "announced that it had agreed to act this year on the extension of the Food and Agriculture Act of 1965 (P.L. 89-321), and that it plans to hold hearings on a bill, to be introduced by Senator Ellender, embodying amendments to this act proposed during recent hearings." p. D436
19. POVERTY; BUILDINGS. Sen. Byrd, W. Va., inserted an SCLC statement that participants in the Poor People's Campaign might "hang around" this Department. p. S5498 (May 14)
20. FARMERS HOME ADMINISTRATION. Sen. Scott was added as a cosponsor of S. 3165, to amend the Consolidated Farmers Home Administration Act to provide for loans to public bodies which, upon sale by the Farmers Home Administration, shall bear taxable interest. p. S5621
21. ARTS AND HUMANITIES. Sen. Pell commended President Johnson's interest in arts and humanities and inserted the President's remarks at the dedication of the Smithsonian Institution's National Collection of Fine Arts. pp. S5629-30
22. AWARDS; FARM PROGRAM. Sen. Ellender commended the "Department's growth and increased responsibility" and inserted his speech made at the USDA Honor Awards Ceremony May 14. pp. S5636-7
23. ELECTRIFICATION. Sen. Metcalf quoted a welfare administrator who wrote, "Utility charges...is an area where poor people suffer the most," and inserted an article from Electrical World. pp. S5649-51
24. HORSES. Sen. Hansen inserted material regarding the problems arising over the fate of the wild horse herd in the Pryor Mountain area of Wyo. and Mont. pp. S5652-3

Mr. SPARKMAN, from the Committee on Banking and Currency,  
submitted the following

### REPORT

together with

### INDIVIDUAL AND ADDITIONAL VIEWS

[To accompany S. 3497]

The Committee on Banking and Currency, having considered the same, report favorably a committee bill (S. 3497) to assist in the provision of housing for low and moderate income families, and to extend and amend laws relating to housing and urban development, and recommend that the bill do pass.

### Introduction

The committee bill reported herewith represents a 2-year effort on the part of the committee to establish and bring about a program that will help provide homeownership for lower income families. In addition the committee bill will help lower income families to obtain rental and cooperative housing and will provide ways and means of assisting our Nation's cities with the problems they are currently facing.

During the first session of the 90th Congress, the Subcommittee on Housing and Urban affairs held hearings during July and August to consider some 41 bills and amendments relating to various housing and urban development programs and other matters dealing with mortgage

credit. Following these hearings, the subcommittee met in executive session on at least eight different occasions in order to consider all these matters. In addition to these executive sessions, the subcommittee met informally with representatives of the executive branch of the Government to discuss various aspects of several proposals which were under consideration. At the conclusion of the executive sessions, a committee bill (S. 2700) was drafted and reported to the Senate on November 28, 1967. The Congress, however, adjourned before this bill could be considered by the Senate.

On February 26, 1968, the President sent his message on housing and cities to the Congress. This message was followed by the administration's proposals designed to meet the housing and city problems which now face this Nation. These proposals were introduced as Senate bills S. 3028 (containing provision for the establishment of an urban insurance program) and S. 3029 (containing provisions relating to housing and urban development). These bills were referred to the Senate Banking and Currency Committee. Following this referral, the Subcommittee on Housing and Urban Affairs held hearing on March 5 through 7, 11 through 15, 18 through 22, 1968, to consider S. 3028, S. 3029, and some 25 bills and amendments<sup>1</sup> pertaining to housing, urban development, mortgage credit matters, urban insurance and land sales. Following the hearings, the committee met in executive session on seven occasions (Apr. 8 through 10, 18, and 23 through 25) to consider all of these matters. At the conclusion of the executive sessions, a committee bill was drafted and reported to the Senate.

The President's housing and cities message to the Congress proposed a program of Federal assistance for the construction and rehabilitation of 6 million housing units over a 10-year period for the low and moderate income families of this country. The committee believes that these goals can be attained and the programs and authorizations for appropriations contained in the committee bill are designed to be a 3-year start toward achieving the goals outlined by the President.

The President's proposed Housing and Urban Development Act of 1968 contained most of the provisions that were included in the committee bill, S. 2700, reported during the first session of the 90th Congress particularly the basic provisions of homeownership contained in Title I of S. 2700. Therefore, the committee used S. 2700 as the basis for drafting the committee bill. Thus, the committee has, after long and deliberate consideration in two sessions of Congress, developed a bill that is aimed toward meeting the housing and urban development problems presently confronting this Nation.

One of the main emphases of the committee bill is the establishment of programs which are aimed toward helping lower income families of this Nation achieve homeownership.

With enactment of the National Housing Act of 1934, the United States Housing Act of 1937, the Housing Acts of 1949, of 1954, 1961, the Housing and Urban Development Act of 1965 and the Demonstration Cities and Metropolitan Development Act of 1965, plus other

<sup>1</sup> S. 2228, S. 2229, S. 2343, S. 2376, S. 2466, S. 2498, S. 2508, S. 2625, S. 2631, S. 2680, S. 2681, S. 2800, S. 2801, S. 2802, amendment No. 600 to S. 3029, amendment No. 607 to S. 3029, amendment No. 613 to S. 3029, S. 3110, S. 3128, S. 3129, S. 3130, S. 3131 and S. 3255.

measures, the committee has provided many tools with which the American people have been able to obtain decent, safe, and adequate housing. These Acts have also provided ways and means by which our cities, towns and communities have been able and are now able to fight blight, slums and urban decay.

It must be remembered, however, that these acts taken as a whole, were never intended to be the complete answer—the sole solution—to our National housing problems nor to the multiplicity of problems we now find facing our cities. At best, these acts were intended to encourage and contribute to private and public efforts and initiative toward helping our people to achieve the goal expressed in the policy of the Housing Act of 1949, which is “a decent home and suitable living environment for every American family.”

Under these acts, a great deal has been achieved. Literally hundreds of thousands of families have been able to obtain homes commensurate with their needs and at prices they are able to pay. Numerous cities, towns and communities have been helped to rid themselves of their worst slums and blight and have thus become better places in which to work, play, worship and live. One of the most notable achievements has been the development of a mortgage insurance system with a government guarantee and a back-up secondary mortgage market, the results of which have largely been responsible for the rising homeownership among the American people so that today more than two-thirds own their own homes.

From time to time serious gaps have been noted in these acts. As time went on it was realized that many programs provided by these measures have not reached down far enough to help those who need housing the most also, urban development programs were sometimes found lacking in the type of Federal support and assistance that was needed at the local level to meet the fast changing housing and urban development problems of the cities. Each time these gaps have been found or recognized, steps have been taken to close them with either new or amended legislation.

The committee wishes to make it clear, however, that while much success has been achieved over the last 35 years, this Nation still has a long way to go in meeting total housing and urban development needs.

The housing needs of the American people and the needs of the Nation's cities, towns, and communities are not something that can be defined, once and for all time, at any given period. These are ever-increasing needs largely resulting from the rising expectation of the low and moderate income American family and must be faced almost on a day-by-day basis. What appeared to be a satisfactory solution to yesterday's problem will be unacceptable today. On the reverse side of the coin, it must be realized by all concerned that these are needs that cannot be met on an overnight basis; fiscal and physical capabilities are just not at hand to bring about an immediate solution to all these problems.

It is believed that the committee bill reported herewith offers programs of basic ways and means by which we can continue to meet the nation's growing housing and urban development problems.

## Committee Deliberations

As has already been stated, the committee commenced working on this committee bill during the first session of the 90th Congress. During the second session of the 90th Congress, emphasis was placed on perfecting the homeownership ideas adopted by the committee last year and further emphasis was placed on the establishment of such new programs and amendments to existing law that would help stimulate and encourage local action aimed toward alleviating problems with which our cities are now faced.

The subject of lower income housing is not a new one for the committee. Over the years, the committee has considered various ways and means of helping lower income families to obtain decent and adequate housing commensurate with their needs. Although the committee has at various times in the past approved proposals aimed at helping lower income families with their housing needs—the majority of these programs has fallen into the category of rental housing (such as the sec. 221(d)(3) below-market interest rate program and the rent supplement housing program) rather than homeownership.

This being the case, the committee felt that in order to give American families the widest choice in selecting the type of housing in which they desire to live, as well as achieving a balance in existing programs, emphasis should be placed on developing programs which would give lower income families a better opportunity of becoming homeowners. The committee also considered ways and means of making private rental and cooperative housing available to lower income families more commensurate with rents that they can afford to pay.

The committee believes that the proposals it has adopted and has presented to the Senate in the committee bill represent an effective method of achieving these objectives.

Although a great deal of the committee's time was spent last year as well as this year in developing the homeownership programs, the committee also carefully considered other proposals establishing new programs and amendments to existing law that would assist in the development and redevelopment of our American cities. The committee is impressed by the urgency of the problems that now face our American cities. The committee bill, therefore, proposes several new programs and amendments to speed up and expand existing programs with which to meet these problems. In this connection, the committee considered a stepped-up authorization for urban renewal and additional operating funds for carrying out the model cities program. The committee believes that these new authorizations, as well as increased authorizations for other urban development programs provided in the bill will play a large part in continuing to help meet the housing and urban development needs presently confronting the country.

In addition to the items mentioned above, the committee bill contains a wide variety of amendments to programs under the jurisdiction of the Department of Housing and Urban Development and the Department of Agriculture.

The bill contains a title which proposes to establish an urban insurance program; it contains a title which proposes to establish a flood insurance program, and it contains a title which proposes to establish

guidelines for the interstate sale of land. In addition, the bill contains a title which would partition the FNMA into two associations: one association would be the new Federal National Mortgage Association (FNMA) which is to become a private rather than Government-operated association; the second would be the new Government National Mortgage Association (GNMA) which will continue to be the functioning arm of the Federal Government for the purchase of a special type of Government-supported mortgages. The bill also contains a title which proposes to establish national housing partnerships. It is hoped that the partnerships will attract the financial support and technical competence of private enterprise in providing for the housing needs of low and moderate income families.

The committee recognizes that the most urgent need for housing today lies with lower income families. The committee also recognizes that under today's price structure for housing, such families are unable to afford housing which is produced by private enterprise. Thus the committee has provided in this bill several new programs and amendments to existing law that are aimed toward meeting the housing needs of lower income families.

A detailed explanation of all of the titles as well as the sections of the committee bill follows.

## EXPLANATION OF THE BILL

### SHORT TITLE

Section 1 of the bill cites this bill as the "Housing and Urban Development Act of 1968."

### DECLARATION OF POLICY

Section 2 of the bill reaffirms the national goal as set forth in section 2 of the Housing Act of 1949 of "a decent home and suitable living environment for every American family." In addition, the Congress finds that this goal has not been fully realized for many of the Nation's lower income families and states this is a matter of grave national concern. The Congress further declares that the programs authorized by this act are designed to give the highest priority toward meeting the housing needs of those families for which the national goal has not become a reality. In addition, the Congress declares that in carrying out the programs contained in this bill the fullest practical utilization of the resources and capabilities of private enterprise and of individual self-help techniques should be employed.

### EMPLOYMENT OPPORTUNITIES FOR LOWER INCOME PERSONS IN CONNECTION WITH ASSISTED PROJECTS

Section 3 of the bill provides that in administering programs authorized by section 221(d)(3), and the proposed new sections 235 and 236 of the National Housing Act; the low-rent public housing program of the U.S. Housing Act of 1937; and section 101 of the Housing and Urban Development Act of 1965, the Secretary of HUD shall require, to the greatest extent feasible, opportunities for employment arising in connection with construction or rehabilitation of housing assisted under such programs be given to lower income persons residing in the area of such housing.

## Title I—Lower Income Housing

### HOMEOWNERSHIP FOR LOWER INCOME FAMILIES

Section 101 of the bill establishes a homeownership assistance program for lower income families in a new section 235 of the National Housing Act. This program is closely patterned after one the committee approved last year in reporting out S. 2700 and which was included in modified form in the administration bill this year. The committee has made additional changes which it believes will further orient the program toward lower income families with as immediate an impact as possible consistent with long-range plans.

The homeownership assistance would be provided in the form of periodic payments to the mortgagee which would serve to reduce interest costs on a market rate home mortgage or a cooperator's share of a cooperative association's mortgage. In addition, the provisions of the present section 221(h) of the National Housing Act would be incorporated into the new section, and the nonprofit organization sponsoring the project, as well as the individual lower income purchasers, would be eligible to receive the benefits of assistance payments.

Until this time Federal housing assistance for lower income families has been directed almost entirely to rental housing. The only single-family assistance program at present is the FHA section 221(h) program enacted in 1966. This is a limited, experimental program which authorizes insured mortgages at 3 percent interest to nonprofit organizations for the acquisition and rehabilitation of substandard homes for subsequent resale, with 3 percent mortgages, to lower income families. In the short time this program has been in operation it has demonstrated that there is considerable interest and potential in improving living conditions for lower income families through homeownership.

The new section 235 would incorporate this program for lower income families, along with the assistance provided for new or rehabilitated single-family homes, condominium, and cooperative units. The committee expects that the section 221(h) program would be continued, however, until the new section 235 becomes fully operational and adequately funded, but the sale of any individual units held by a nonprofit mortgagor under section 221(h) could be financed under the new program.

Unlike the 221(h) program, which depends on direct Federal lending from the special assistance funds of FNMA to support its 3-percent mortgages, this program will rely on the private mortgage market to finance it. Because of the limited availability of special assistance funds, this is necessary if any volume of new homes is to be achieved under this program. To attract private mortgage money these mortgages must bear an interest rate commensurate with the cost of mortgage money in the market.

A basic provision of the law would limit eligibility for assistance for the purchase of dwellings under the program to lower income families whose incomes are not in excess of 70 percent of the limits prescribed by the Secretary of HUD for occupants of projects in the same area financed with below-market interest rate mortgages insured under section 221(d)(3) of the National Housing Act. However, the committee recognized the desirability of more flexibility in income limits. Accordingly, it has provided that up to 20 percent of the periodic assistance payments authorized to be contracted to be made pursuant to appropriation acts could be used on behalf of families with somewhat higher incomes, within limits prescribed by the Secretary. These limits, dependent on family size, would be determined on the general basis of the cost in the area, of standard new single-family homes of modest but adequate construction.

The 20-percent limitation will apply only with respect to the amount of contracts entered into for assistance payments. The extent to which such contracts involve families having incomes in excess of

the 70-percent limitation and would therefore be charged against the 20-percent portion of the authorized contract authority would be determined at the time the contracts are entered into on the basis of the income of the families at that time. Subsequent changes in the income of families receiving the benefit of assistance payments would have no effect on the extent to which the 20-percent portion is used.

For purposes of determining whether a family is within the income limits, \$300 would be deducted from family income for each minor person who is a member of the immediate family and living in the household and any income earned by such minor would be excluded from family income. The \$300 allowance for minors however could not be used to qualify a family whose gross income exceeds the income limits prescribed by the Secretary for that area.

Although the statute is silent on defining income, the committee is aware of the necessity for the Secretary to establish procedures to assure that fair standards and rules are followed within HUD for determining income (after allowable deductions) for eligibility of low or moderate income families or mortgagors under HUD's various programs. These procedures would apply to those who receive the benefit of subsidies or below-market interest rates to enable them to obtain occupancy, homeownership, or cooperative housing membership.

### *How the Subsidy Works*

To bring the monthly payments under the market-rate mortgage down to a level which a lower income family could afford, the Secretary would make periodic assistance payments on behalf of the homeowner to the mortgagee in an amount necessary to make up the difference between 20 percent of the family's monthly income and the required monthly payment under the mortgage for principal, interest, taxes, insurance, and mortgage insurance premium. In no case, however, could the payment exceed the difference between the required payment under the mortgage for principal, interest, and mortgage insurance premium and the payment that would be required for principal and interest if the mortgage bore an interest rate of 1 percent. The maximum assistance payment would thus be greater than that approved by the committee in S. 2700, which was based on the section 221(d)(3) BMIR rate (3 percent). The committee feels that this level of subsidy will more adequately assist families in the income range to be served by the program.

The amount of the subsidy would vary according to the income of the homeowner. This enables the assistance to be based on the homeowner's need, and enables the program to help a broad range of lower income families. For most of the Nation, families with incomes in the general range of \$3,000 to \$7,000 will be able to buy homes under this program and, thus, benefit by it. The income of most of these families is expected to rise above the level it was at when they purchased their home. Therefore, the bill provides for the family's income to be recertified at least every 2 years and appropriate adjustments to be made in the assistance payment to reflect any changes. Many assisted homeowners can thus be expected to be able ultimately to afford the full monthly payment under their mortgages.

At all times, in calculating the income of the homeowner on which the 20-percent computation will be made, there will be deducted \$300 for each minor child who is a member of the homeowner's immediate family and living with him. Also, income of minors will not be included in the homeowner's income for this computation.

The following table shows the probable range of assistance payments for various income levels and mortgage amounts, assuming a 6¾-percent, 35-year mortgage with a one-half-of-1-percent mortgage insurance premium.

ESTIMATED MONTHLY ASSISTANCE PAYMENTS UNDER SEC. 235, BY MORTGAGE AMOUNT AND HOMEOWNER'S ANNUAL INCOME BASED ON 6¾-PERCENT 35-YEAR MORTGAGE WITH ½-PERCENT MORTGAGE INSURANCE PREMIUM

Adjusted annual income <sup>1</sup>	20 percent of monthly income	Mortgage amount						
		\$8,000	\$10,000	\$12,000	\$14,000	\$15,000	\$17,500	\$20,000
\$3,000.....	\$50	\$17. 63	\$32. 84	\$45. 72	( <sup>2</sup> )	( <sup>2</sup> )	( <sup>2</sup> )	( <sup>2</sup> )
\$3,600.....	60	7. 63	22. 84	39. 66	\$53. 34	\$57. 15	( <sup>2</sup> )	( <sup>2</sup> )
\$4,200.....	70		12. 84	29. 66	46. 52	54. 85	\$66. 68	( <sup>2</sup> )
\$4,800.....	80		( <sup>3</sup> )	19. 66	36. 52	44. 85	66. 27	\$76. 20
\$5,400.....	90			9. 66	26. 52	34. 85	56. 27	76. 20
\$6,000.....	100				16. 52	24. 85	46. 27	67. 52
\$6,600.....	110				6. 52	14. 85	36. 27	57. 52
\$7,200.....	120					( <sup>3</sup> )	26. 27	47. 52
\$7,800.....	130						16. 27	37. 52
Monthly payment due the mortgagee.....		67. 83	82. 84	99. 66	116. 52	124. 85	146. 27	167. 52
Maximum subsidy.....		30. 48	38. 10	45. 72	53. 34	57. 15	66. 68	76. 20

<sup>1</sup> Total income of 1 family less \$300 for each minor child and any income earned by a minor child.

<sup>2</sup> Cost to buyer would exceed 25 percent of his monthly income in addition to assistance payments in order to meet payments on this mortgage amount.

<sup>3</sup> Less than \$5.

Source: Department of Housing and Urban Development.

The amount of estimated monthly assistance payment, for example, for a \$14,000 mortgage would be \$46.52 for a family with an annual income of \$4,200, and \$26.52 for a family with a \$5,400 income. No entry is made for the amount of the assistance payment if it appears inadequate to enable the family to afford the mortgage payment. Thus, it is not expected that a family with a \$3,000 annual income would purchase a home under this program requiring a mortgage of \$14,000. The exact cutoff points used for purposes of this table are merely illustrative, however, and not absolute. The committee does expect, however, that the Secretary will establish guidelines to assure that no mortgagor will be approved under this section for assistance in buying a home which is extravagantly designed or is clearly too expensive or large for the present or future needs of his family.

### *Eligible Property and Mortgage Terms*

Mortgage limits would be determined on the general basis of the cost, in the area, of standard, new, single-family homes of modest but adequate construction. In keeping with this principle, the amount of the mortgage could not exceed \$15,000 (\$17,500 in high-cost areas). In recognition of the need of larger families for more room, however, these limits would be increased to \$17,500 and \$20,000, respectively, for families with five or more members. The same limits would apply to cooperative and condominium units. The Secretary would be required

to prescribe regulations to assure that the consideration paid for homes under this new program is not increased above the home's appraised value. This would prevent the price of the unit from being unnecessarily increased because of the availability of the assistance.

In order to achieve the substantial increase in the number of dwellings available to lower income families that is sorely needed, assistance under this new program will generally be limited to new or substantially rehabilitated units. The existing supply of good, low-cost housing is entirely inadequate and shows little tendency to improve without the impetus a program such as this can give it. As under FHA's regular home mortgage program (sec. 203), homebuilders could plan the housing and have it approved by FHA prior to the beginning of construction, thereby enabling the builder to obtain construction financing on the basis of FHA conditional mortgage insurance commitments. An exception is made in recognition of the need for immediate housing that confronts a displaced family (one displaced from an urban renewal area, displaced as the result of governmental action, or displaced as the result of a major disaster). Such a family would qualify for assistance in the purchase of an existing home. Families with five or more children could also receive assistance to purchase an existing home, as would those moving from public housing.

Furthermore the committee recognizes, that there is an urgent need for the program to have an immediate impact. New construction and rehabilitation will take time. Initially, therefore, the committee has provided for limited eligibility of existing dwelling units in order to get the program underway immediately upon enactment. Twenty-five percent of the amount of contracts made before July 1, 1969, could apply to existing housing, with this decreasing to 15 percent of the amount of contracts made in the following year and 10 percent in the third year.

The committee expects that, in areas where the housing market is tight and added demand for existing housing could inflate prices, this exception will not be utilized.

Also authorized for assistance under this new section are those families acquiring their dwelling unit in a rental project receiving rent supplement assistance or one covered by a mortgage under the new section 236 of the National Housing Act (proposed by sec. 201 of the bill). The prohibition against existing housing naturally would not apply in these cases, but the other requirements on maximum income for eligibility and maximum mortgage amount would apply.

For families acquiring units in condominium and cooperative projects, the construction or substantial rehabilitation of the project would have to have been completed no more than 2 years prior to the filing of the application for assistance payments with respect to the family, and the unit would have had to have had no previous occupant other than the family for whom the application is made. However, the above exceptions for existing housing would apply in these cases as for single-family homes.

Mortgages with respect to which assistance would be made under this section would generally meet the requirements of either section 221(d)(2) sales housing for low and moderate income families; sec-

tion 234 condominium housing; section 213 cooperative housing; or the provisions of section 221(h) incorporated into this section. In addition, families eligible for insurance under the above sections (except sec. 213), but who must obtain insurance under section 237 (proposed by sec. 102 of the bill) because of their credit or income ratings, would also be eligible for assistance payments under this section. The downpayment requirements for purchasers of single-family homes and condominium units would be modified to only require a \$200 downpayment for a family with an income within 70 percent of the 221(d) (3) limit. For eligible families above those limits, there would be required at least a 3-percent downpayment.

For cooperative members receiving assistance, the payment would be based on their proportionate share of the obligations under the project mortgage and using the same formula as for individual mortgages. The assistance payment in all cases, whether an individual mortgage or a project mortgage, would cease when the family for whom the assistance payment is being made ceases to occupy the home, condominium unit, or cooperative unit.

The provisions of section 221(h), as incorporated into section 235, would be modified to reduce the minimum required number of single-family dwellings covered by the blanket mortgage of the nonprofit sponsor from five to four, and to authorize the blanket mortgage to cover four or more units in a multifamily structure under a condominium ownership plan. Also the income levels would be the same as those authorized for other purchasers under section 235, instead of the present limit to low-income purchasers.

The nonprofit organization during rehabilitation would pay interest, on the advances made, at the market interest rate, as is done at present under 221(h). If there are any units still under the nonprofit organization's blanket mortgage when it is time to endorse finally the mortgage for FHA insurance, the mortgagor would make monthly payments of principal and interest as if the mortgage bore a 1-percent interest rate, with the difference between this payment and the required payment for principal, interest, and mortgage insurance premium under its market rate mortgage being paid to the mortgagee by the Government.

Mortgages insured under section 235 would be the obligation of the new Special Risk Insurance Fund (proposed by sec. 104 of the bill).

### *Counseling*

Since many of the families who would be assisted have had little experience in the proper care of a home and the budgeting of income to meet regular monthly payments on a mortgage, this section would authorize appropriate counseling, either directly by HUD or by contract with public or private agencies, to assist these families in meeting their new responsibilities. Appropriations would be authorized for this purpose.

The committee expects that this counseling will not be necessary where similar counseling is available from other sources, such as through organizations assisted by the Office of Economic Opportunity or pursuant to other programs.

*Scope*

This section would provide authority to enter into assistance payment contracts, as approved in appropriation acts, in the amount of \$75 million annually in fiscal year 1969. This amount would be increased by \$100 million in fiscal year 1970, and by \$125 million in fiscal year 1971. This would be enough to enable nearly one-half million families to become homeowners over the next 3 years.

Assistance under this new section 235 would be available in both urban and rural areas. However, insofar as the administration of this section in rural areas is concerned, the Secretary is expected to assign to the Secretary of Agriculture necessary authority, along with appropriate transfer of funds, for the implementation thereof as agreed upon by the two Secretaries. Section 513 of the Housing Act of 1949 would be amended by section 1003 of the bill to authorize appropriations to pay for Agriculture's administrative expenses in connection with any such assignment.

Other provisions of section 101 of the bill would: (1) Increase the mortgage limits on single-family dwellings under section 221(d)(2) of the National Housing Act to correspond to the limits provided in the new section 235; (2) permit a mortgagor under section 221(d)(2) (and, therefore, also one eligible under sec. 235) to contribute the value of his labor to the acquisition cost of his dwelling; (3) authorize the Secretary to reimburse the mortgagee for his expenses in handling a 235 mortgage; and (4) make the labor standards of section 212 of the National Housing Act applicable to blanket mortgages held by nonprofit organizations insured under section 235 to the same extent as now applicable to such mortgages insured under section 221(h) of such act.

**CREDIT ASSISTANCE**

Section 102 of the bill would authorize, through a new section 237 of the National Housing Act, FHA mortgage insurance for those families of lower income who cannot qualify for mortgage insurance under existing FHA housing programs because of their credit histories or irregular income patterns, but who the Secretary of HUD finds are reasonably satisfactory credit risks and capable of homeownership with the assistance of budget, debt management, and related counseling.

Mortgages insured under this program would have to meet the basic requirements under one of the various FHA home mortgage programs (including the new programs authorized by sec. 235, proposed by sec. 101 of this bill, and by sec. 221(i), proposed by sec. 105 of this bill). The credit and income requirements of the particular section would not apply, however, and the principal obligation of the mortgage could not exceed \$15,000 (\$17,500 in high-cost areas). However, the lower mortgage limits prescribed under subsections (h) and (i) of section 203 would govern, when mortgage insurance is sought pursuant to them.

Insurance would not be authorized under section 237 unless the monthly mortgage payments for principal and interest, including payments for local real estate taxes, could be paid with 25 percent or less of the mortgagor's average monthly income, computed over the

previous year or the previous 3 years, whichever is higher. The interest rates and mortgage insurance premiums would be the same as those under the existing programs.

The purpose of section 102 is to provide assistance to families of modest means who aspire to purchase homes but cannot obtain mortgage financing because of flaws in their credit histories or instability in their earning records. The Secretary would be required to search behind these flaws to determine whether delinquent accounts were ultimately paid or involved extenuating circumstances, or whether irregular employment and income patterns were due to such factors as seasonal employment, with income otherwise at levels of eligibility over the previous 2 years. Consideration would be given to any other factors which would indicate that the families could maintain homeownership.

An important element in this program is the counseling, either directly or by contract with public or private organizations, the Secretary would provide mortgagors and to prospective homeowners who lack sufficient funds to supply a downpayment. While many families who would be eligible for mortgage insurance under this section have strong aspirations to become homeowners, their experience in handling large financial responsibilities may be meager. Through counseling, these families can be helped to use their resources efficiently in meeting homeownership responsibilities.

Preference under the new program would be given to families living in public housing and especially those required to leave because their incomes have risen beyond the maximum prescribed by the local housing authority, as well as those eligible for public housing residence who have been displaced from federally assisted urban renewal areas.

The proposed program would be essentially experimental, and there would be no change in FHA insurance of home mortgages at or below the maximum mortgage limits prescribed by this section. Those who now qualify would continue to qualify, and only those who would have been rejected in the past as poor credit risks would have their mortgages insured under the new section 237.

In authorizing this new program, it is not the intention of the committee to have local FHA directors use the new section 237 program as an excuse for careless underwriting practices, arbitrarily placing all marginal applicants into the special risk fund without concern for the real worthiness of the case. Contrariwise, the committee believes that the FHA should sharpen its underwriting tools and improve its ability to judge the true merits of various applicants for insurance, particularly those of low and moderate income. In general, the committee believes that existing FHA rules for credit approval should be made more realistic and workable for low and moderate income families. The credit requirements are often applied too stringently in reviewing credit histories. Thus, the credit report of a prospective purchaser or cooperative member may indicate that at some time in the past he had difficulties in meeting certain obligations, which frequently occurs among lower income families. Yet, this should not be a bar to homeownership or cooperative membership if it can be demonstrated that the person had a good record in meeting comparable monthly charges for housing during recent years.

The principal balance of all mortgages insured under section 237 and outstanding at any one time would be limited to \$200 million, enough initially to finance about 15,000 homes. There are large numbers of families in the lower income brackets whose living conditions would be substantially improved through homeownership which many can afford if only helped to allocate their resources properly. This program would generate the experience necessary to help these families help themselves.

As with the new homeownership program proposed in section 101 of the bill, mortgages insured under this section would be the obligation of the new special risk insurance fund (proposed by sec. 104 of the bill).

#### RELAXATION OF MORTGAGE INSURANCE REQUIREMENTS IN CERTAIN URBAN NEIGHBORHOODS

Section 103 of the bill would amend section 223 of the National Housing Act, by adding a new subsection (e), to give FHA more flexible authority in providing financing for the repair, rehabilitation, construction, or purchase of property located in older, declining urban areas. Under the amendment, FHA would be able to accept for insurance mortgages on properties which may not, because of the area in which they are located, be able to meet all of the normal eligibility requirements. Acceptance of these mortgages would be permitted where FHA is able to establish that the area is reasonably viable, giving consideration to the need for providing adequate housing for families of low and moderate income in the area, and that the property is an acceptable risk in view of such consideration.

Under a 1966 amendment to section 203 of the National Housing Act, the Secretary of HUD is authorized to insure mortgages for one- to four-family properties located in an area where rioting or other disorders have occurred or are threatened, without regard to economic soundness, provided the properties are an acceptable risk, giving consideration to the need for providing adequate housing for families of low and moderate income in that area. This provision, waiving the economic soundness requirement, enabled the FHA to insure mortgages on housing in some of the older, declining urban areas, but it has not provided the flexibility required to finance all of the types of housing needed in all such areas.

The provision of adequate housing in these areas involves the repair, rehabilitation, and construction of a variety of housing types. The FHA section 203 home mortgage program, as amended in 1966, only provides financing for one- to four-family housing and is limited to areas identified with riots or other disorders. This proposed amendment would permit the FHA to expand the use of its various other housing programs in these areas. It would also expand the areas, in which exception would be made, to all older, declining areas without regard to riots or disorders.

Section 103 would permit FHA to waive any other statutory limitation on such items as loan to value, size of dwelling unit, or maximum mortgage amount, if such limitation would prevent the insurance of an otherwise acceptable risk to carry out the purpose of this sec-

tion. However, the labor standards of section 212 of the National Housing Act would continue in effect and could not be waived. In addition to one- to four-family sales units, financing could be provided for rental or cooperative projects and for individual ownership of apartments in a condominium project.

Because of high risks involved in insuring mortgages in such areas, mortgages insured pursuant to this new authority would be the obligation of the new special risk insurance fund (proposed under sec. 104 of this bill).

This amendment is being proposed as a substitute for section 203(1), the provision added in 1966, and, therefore, includes repeal of the 1966 provision since it would no longer be needed.

#### SPECIAL RISK INSURANCE FUND

Section 104 of the bill would establish, through a new section 238 of the National Housing Act, a "Special Risk Insurance Fund," which would not be intended to be actuarially sound and out of which claims would be paid on mortgages insured under the new sections 235—homeownership assistance (proposed by sec. 101 of the bill); 236—assistance for rental and cooperative housing (proposed by sec. 201 of the bill); and 237—credit assistance (proposed by sec. 102 of the bill); as well as those mortgages insured pursuant to the authority contained in the amendment to section 223—properties in older, declining urban areas (proposed by sec. 103 of the bill).

The fund would be established with a \$5 million advance from the general insurance fund, which would be repayable at such time and at such interest rates as the Secretary of HUD deemed appropriate. Since these programs cannot be expected to be operated on an actuarially sound basis if the insurance premium charge is to be set at a reasonable level, appropriations to the fund would be authorized to cover any losses sustained by the fund in carrying out the mortgage insurance obligations of these programs. The term losses, as used in this provision, is the same as presently appears in a similar authority under section 221(f) of the National Housing Act. In both instances, it is intended that the Secretary be able to obtain appropriations to cover anticipated or projected losses as well as actual losses, in order to provide adequate operating funds during the long period required to liquidate properties.

Insurance benefits would generally be similar to those authorized for mortgages insured under section 221 of the National Housing Act. Payments on claims would be made either in cash or debentures and could be in an amount equal to the unpaid principal balance of the loan plus any accrued interest and any advances made by the mortgagee with approval of the Secretary and under the provisions of the mortgage, where permitted in the regulations prescribed by the Secretary. Income such as insurance premiums and service charges in connection with the covered programs would be deposited in the new fund. Administrative expenses in connection with these programs and expenses incurred with respect to defaults would be charged to the fund.

The programs using this new fund would generally involve some form of subsidy for families of low and moderate income and those

families who are poor credit risks or who wish to buy property in areas where mortgage insurance would not normally be available. However, it is also intended for use under section 237 for families who would receive no subsidy but who would not otherwise be eligible for insurance because of inability to meet credit requirements. The regular FHA mortgage insurance reserves cannot be expected to absorb these several new programs without impairment. The establishment of a special insurance fund would be consistent with the intent to provide a subsidy element for these families by operating with supplemental appropriations, where necessary.

As the Secretary of HUD indicated in his testimony before this committee on July 17, 1967, experience suggested that: "much could be accomplished through a separate high-risk insurance fund established with clear congressional recognition that the fund would not be actuarially sound and would require appropriations. Our early appraisals of this proposal indicate that with relatively small appropriations to the proposed high-risk fund, and with some additional appropriations to counsel the families whose mortgages are insured under that fund, homeownership could be made possible for a substantial number of low-income families not now eligible for FHA mortgage insurance."

The committee believes that this statement, which was addressed primarily to a credit assistance proposal similar to that set out in section 102, carries equal weight with respect to the other three programs which would be included in the fund. It is naturally the hope of the committee that these programs will be capable of sustaining themselves, but the benefits to be gained from them far exceed what we believe to be the risks.

#### CONDOMINIUM AND COOPERATIVE OWNERSHIP FOR LOW AND MODERATE INCOME FAMILIES

Section 105 of the bill would amend section 221 of the National Housing Act, by adding new subsections (i) and (j), to provide another mechanism by which low and moderate income families could attain an ownership interest in their dwellings. It would do this by permitting section 221(d)(3) below-market interest rate rental projects to be converted to condominium or cooperative ownership.

Under the new subsection (i), a low or moderate income purchaser could purchase an individual family unit and an undivided interest in the common areas and facilities of the project at a price not in excess of the appraised value of the property. At least a 3-percent downpayment would be required, which could be applied in whole or in part toward closing costs.

The purchase could be financed with a mortgage, with a maximum term of 40 years, which bears an interest rate no less than the below-market interest rate in effect with respect to 221(d)(3) projects at the time the commitment to insure the mortgage is issued. The mortgage would contain a provision permitting the Secretary to increase the interest rate, up to the maximum permissible under section 221 at the time the mortgage commitment was issued, upon determination that the mortgagor's annual income had increased to an amount per-

mitting payment of a greater rate of interest. If the original mortgagor ceases to occupy the property, the rate would also increase to the highest rate permissible at the time of commitment, unless the property is sold to a nonprofit purchaser approved by the Secretary or to a low or moderate income purchaser whose income is within the limits established for occupancy in a below-market interest rate project insured under section 221(d)(3).

Under the new subsection (j), a cooperative, with membership open only to low and moderate income families meeting income limits prescribed for section 221(d)(3) below-market interest rate projects, could purchase the project for an amount not exceeding the appraised value of the property for continued use as a cooperative at the below-market interest rate in effect at the time the commitment to insure the mortgage is issued. However, occupants of the project at the time of conversion, whose incomes had increased over the applicable limits, could be allowed to become members of the cooperative under special terms set by the Secretary of HUD.

#### ASSISTANCE TO NONPROFIT SPONSORS OF LOW AND MODERATE INCOME HOUSING

Section 106 of the bill would authorize the Secretary of HUD to undertake a program of technical assistance, with respect to the construction, rehabilitation, and operation of low and moderate income housing to nonprofit sponsors of such housing. It would also authorize the Secretary to provide financial assistance, in the form of 80-percent interest-free loans, to cover certain preconstruction costs of nonprofit sponsors in connection with their low and moderate income housing undertakings under federally assisted programs, and would establish a revolving fund, entitled the low and moderate income sponsor fund, for this purpose, with an authorization for appropriations of \$7.5 million in fiscal year 1969 and \$10 million in fiscal year 1970.

Much of the Federal housing policy for low and moderate income families has been geared to the use of the nonprofit sponsor. However, despite the authority in the law to utilize nonprofit sponsors under many of the existing programs, the experience so far has not been satisfactory. Except in a few instances, nonprofit sponsors have been lacking in experience and technical capacity to develop housing. An effective program of technical assistance to nonprofit housing sponsors is essential if they are to play a vital role in the production of housing for low and moderate income families. Such a program would deal with problems of sponsor-builder relationship, principles of planning, financial responsibility, and allied matters, and would emphasize the human aspects of involvement with the community and development of management that is responsive to tenant needs. The assistance could be provided either directly or by contract with public or private organizations.

The provision of loans to cover certain preconstruction costs is essential if nonprofit organizations are to have a significant role in the expanded low and moderate income housing program. Current practice requires the sponsor to pay for market surveys, architectural and engineering needs, land options and acquisition, and other precon-

struction costs, before the Federal loan or insured financing can be obtained. These must be paid in advance and often create a hardship on the small nonprofit organization. The costs covered by these loans would be included in the final financing and would be returned to the revolving fund when the financing becomes available. However, the Secretary would be authorized to cancel any part or all of a loan that he determines cannot be recovered from the proceeds of the permanent financing. The Secretary would be required, prior to making a loan, to determine that the nonprofit organization meets such requirements with respect to financial responsibility and stability as he may prescribe.

The housing goals sought to be obtained under the new legislation proposed in sections 101 and 201 of the bill will rely in a good part on obtaining good nonprofit sponsorship. The new authority provided by this section for technical and financial assistance to nonprofit organizations, involved or interested in such sponsorship, will help to achieve that goal. The assistance authorized by this section would also be available to nonprofit sponsors under programs characterized as applying to low and moderate income families, such as the section 221(d)(3) BMIR program, the section 231 senior citizens housing program, and the section 515 rural housing program.

#### INSURANCE PROTECTION FOR HOMEOWNERS

Section 107 of the bill would authorize the Secretary of HUD, in cooperation with the private insurance industry, to develop a plan for the establishment of an insurance program to help homeowners meet their mortgage payments in times of personal economic adversity. In addition, this section of the bill requires the Secretary to report to the Congress within 6 months following the date of enactment of this act on his actions under this section and recommend to the Congress such legislation as he deems appropriate to authorize him to enter into agreements with insurance companies to provide home mortgage insurance protection for homeowners.

During last year's hearings and again this year, testimony was presented to the committee which indicated that any number of homeowners would be willing to purchase insurance policies that would protect them from defaults on their mortgages and subsequent foreclosure if such insurance protection could be provided on a reasonable cost basis. In addition, witnesses from the insurance industry indicated their willingness to help devise such a program provided the Federal Government was willing to participate with them in losses sustained through such a program. The committee therefore concluded that the feasibility of setting up such an insurance program should be looked into carefully by the Secretary of HUD in conjunction with various private insurance industry groups.

The committee considered limiting the Secretary's responsibility to report only on Government-assisted mortgages but finally agreed that a study should be made of the feasibility of preparing a plan of insurance for all mortgagors; but if, in the judgment of the Secretary, the only possible plan would apply to Government-assisted mortgages, the committee would consider as satisfactory a report covering only such mortgage.

The committee believes that in developing such a plan, the Secretary should bear in mind that insurance should be provided against such contingencies as foreclosure due to curtailment of income resulting from factors beyond the effective control of the homeowner including such elements as death, disability, illness, and unemployment. The committee also feels that such a program should be designed to be actuarially sound through the use of premiums, fees, extended or increased payment schedules, or other similar methods in conjunction with such Federal financial participation as may be necessary.

The committee further feels that in preparing his recommendation, the Secretary should consult with all other Federal agencies which insure or guarantee home mortgages in order that his recommendations may afford equal benefits to mortgagors participating in such programs.

#### NATIONAL ADVISORY COMMISSION ON LOWER INCOME HOUSING

Section 108 of the bill would establish a National Advisory Commission on Low-Income Housing which shall be composed of 21 members; four of whom would be appointed by the President of the Senate; four by the Speaker of the House, and 13 by the President (no more than three of whom shall be from the Federal Government). The Commission is directed to undertake a comprehensive study and investigation of practicable and effective ways of bringing decent, safe, and sanitary housing within the reach of low-income families, including the evaluation of existing housing programs designed to assist such families, and an exploration of new ways by which the resources and capabilities of the public and private sectors of the economy can be effectively utilized to fulfill more completely the objectives of the national goal of "a decent home and a suitable living environment for every American family," particularly as such goal relates to low-income families in urban and rural areas. The Commission is directed to organize and begin its functions at the earliest possible date and further directed to submit to the President and to the Congress an interim report with respect to its findings and recommendations not later than July 1, 1969, and a final report not later than July 1, 1970.

#### NATIONAL HOMEOWNERSHIP FOUNDATION

Section 109 of the bill would create a National Homeownership Foundation, the purpose of which is to provide technical and limited financial assistance to private and public organizations which desire to organize for the purpose of assisting in providing housing and homeownership opportunities for lower income families. The Foundation would consist of an 18-member Board, 15 of whom would be appointed by the President with the advice and consent of the Senate. The remaining three members would be the Secretary of Housing and Urban Development, the Secretary of Agriculture, and the Director of the Office of Economic Opportunity. This section also authorizes the appropriation of \$10 million to be used by the Foundation in carrying out its prescribed functions which are detailed below. The section also requires the Foundation to make an annual report to the

President and the Congress on its activities and findings, and the financial activities of the Foundation would be subject to GAO audit.

Although the provisions of the bill establishing the National Homeownership Foundation are contained in title I of this bill, it should be pointed out that homeownership is not the only purpose of the Foundation. The Foundation would have broad authority to provide assistance to improve housing conditions for lower income families and would extend beyond the federally assisted homeownership programs contained in this title.

The committee felt that one of its responsibilities was to encourage private sector involvement in all aspects of our Nation's housing problems. Testimony was presented to the committee during the hearings held in 1967 that the private sector is anxious to participate in the solution of our housing problems but that it finds it difficult to know how it can help. Therefore, the National Homeownership Foundation was authorized to provide a mechanism whereby the private sector can make such a contribution.

The committee recognizes that the availability of mortgage funds is the key to the success of all housing programs for the lower income family including homeownership.

The homeownership program established by section 101 of the bill is designed to use the established experience and knowledge of the FHA and the resources of private institutions to make the maximum amount of mortgage money available. If, however, the experience with these techniques results in an unsatisfactory supply of mortgage funds, the committee has indicated its agreement to study all new and innovative ways to obtain mortgage money through both public and private sources to make it possible to provide decent housing in the cost range lower income people can afford. The committee would welcome suggestions submitted by the Foundation to carry out this purpose.

One of the purposes of the Foundation would be to mobilize technical and financial assistance in the private sector and determine how it can be used to create better housing in America. The committee was impressed with the testimony from organizations such as the Interfaith, Interracial Council of the Clergy Project in Philadelphia, the Bicentennial Development and Improvement Corp. in St. Louis, Flanner Homes of Indianapolis, and the Springfield Foundation in the State of Maryland.

The committee feels that the success of the homeownership program will depend to a great extent on the success of local community organizations which undertake such programs. Therefore, it is expected that the Secretary will encourage and strongly support homeownership programs which are both initiated and actively supported within the affected neighborhood or area as well as involve widespread citizen participation in the planning and execution of the program. It is further expected that the Secretary will take the necessary administrative action to insure that such programs receive a reasonable share of the interest subsidy funds. Likewise, residents of the neighborhood or area should be given preference in buying the units which will be made available by such organization.

In order to encourage the increased development of organizations which would approach housing and homeownership programs for

lower income families on a private basis, the committee recommends the establishment of the National Homeownership Foundation. The Foundation could be a principal vehicle through which local community and neighborhood organizations would be able to undertake programs of housing and homeownership opportunities for families of lower income. The Foundation would encourage the establishment of such community-based organizations and would continue to play a vital role in standing ready to assist these organizations in the development and implementation of housing and homeownership programs.

The Foundation would be a Government-chartered, nonprofit corporation. Its 18-member Board of directors would emphasize private sector membership with representation from such fields as finance, business, organized labor, State and local public agencies, local nonprofit organizations actively involved in the fields of housing and community development, and the general public. Members of the Board would serve for 3-year staggered terms and would be appointed by the President with the advice and consent of the Senate. In order to facilitate cooperation with Federal agencies, the Board would also include as ex officio voting members the Secretary of Housing and Urban Development, the Secretary of Agriculture, and the Director of the Office of Economic Opportunity.

The Foundation would be required to submit to the President and to Congress an annual report on its activities. In addition, the committee felt that the Foundation should also advise Congress whenever in its judgment the general unavailability of money in the mortgage market is sufficiently serious to deter the Foundation from carrying out its objectives of expanding housing and homeownership opportunities for lower income families.

In order to avoid duplication of effort, the Foundation would be required to coordinate its activities with all Federal agencies involved in housing programs.

### *Functions*

The committee feels that if local community and neighborhood organizations are to be used successfully in helping to solve the problems of substandard and inadequate housing for lower income families, they should have technical and financial assistance available to them. Some limited assistance is now available through existing Federal programs. However, to meet the considerable needs of these organizations in a more coordinated fashion, the Foundation would be permitted to make technical and financial assistance available to them.

It is contemplated that the Foundation will not borrow money. However, to meet emergency situations, the Foundation is permitted to borrow, using for the principal and interest on this borrowing only donated funds and interest from the loans it has made.

The Foundation could provide technical assistance to the organizations in order to—

1. Encourage local public and private programs of housing and homeownership opportunities for lower income families.
2. Assist in establishing such programs, including the establishment of local development funds.
3. Assist these organizations in finding the proper personnel to implement successfully these programs.

4. Assist these organizations in obtaining financing and mortgage insurance for these programs.

5. Assist these organizations to establish a counseling service to help lower income families gain access to job training and manpower programs.

6. Arrange for (or provide on a limited basis) training for personnel.

7. Encourage research and innovation in the housing and homeownership field and establish an information program on housing opportunities.

8. Other similar services.

The committee also recognized that on a limited basis there was a need for financial assistance to assist these organizations. It was the feeling of the committee that the local organizations should use to the maximum extent feasible Federal programs but grants and loans would be available from the Foundation to fill unmet needs, to experiment, and to initiate new programs when not available from Federal sources. Such financial aid would be limited to—

1. Organizational and administrative expenses incurred in commencing the operation of a program, or in expanding an existing program, to the extent that the activities are related to providing homeownership and housing opportunities for lower income families.

2. Necessary preconstruction costs incurred for architectural assistance, land options, application fees, and similar items.

3. The costs of carrying out programs providing counseling and similar services to lower income families for whom housing is being provided in such areas as home management, budget management and home maintenance, in order to enable these families to achieve and afford adequate housing.

However, any application for a grant and loan must be submitted to the local governmental body for its recommendations and these recommendations to be considered by the Board of Directors before any award is made.

### *Financing*

This section of the bill would authorize an appropriation of \$10 million to carry out the activities of the Foundation. It was felt that the private sector could demonstrate its willingness to assist in providing housing and homeownership opportunities by making private contributions to the Foundation.

## **Title II—Rental Housing for Lower Income Families**

### **PART A—PRIVATE HOUSING**

#### **RENTAL AND COOPERATIVE HOUSING FOR LOWER INCOME FAMILIES**

Section 201 of the bill would add a new section 236 to the National Housing Act to establish an assistance program for rental and cooperative housing for lower income families. The assistance would be provided in the form of periodic payments to the mortgagee on behalf

of the mortgagor which would serve to reduce interest costs on a market rate project mortgage.

The interest reduction payments could reduce payments on the project mortgage from amounts that would be required on a market rate mortgage to amounts that would be required on a mortgage bearing an interest rate of 1 percent.

This new section 236, like the homeownership program proposed by section 101 of the bill, is an essential element in the 3-year program set out in this bill to provide Federal assistance for the construction or rehabilitation of 1.75 million units of lower income housing. It is derived from the below-market interest rate program authorized under section 221(d)(3) of the National Housing Act in 1961. That program was designed to provide rental and cooperative housing for families whose incomes were too high for public housing but too low for standard housing available on the market.

The 221(d)(3) program has been successful in providing much-needed rental and cooperative housing for these families. However, it, too, has the limitation, as does the 221(h) program of homeownership for low-income families, of depending on direct Federal lending from the special assistance funds of FNMA to support its 3 percent mortgages. The limited availability of these funds will not permit the production of the large volume of rental and cooperative housing for lower income families needed to meet the goals contemplated by this bill. It is therefore necessary to obtain financing from the private mortgage market. This would be done under the new section 236.

The new 236 program is intended to replace the 221(d)(3) BMIR program, as well as the program of direct 3 percent loans for the elderly and the handicapped authorized under section 202 of the Housing Act of 1959, but only after the new program is fully operational and adequately funded. It will be better able to serve lower income tenants because the rents attainable under it will be lower than those possible under the other two programs. This is possible because the mortgagor could make monthly payments for principal and interest under the mortgage as if it bore an interest rate of 1 percent. The difference between this amount and the monthly payment due under the mortgage, which will bear a market interest rate, for principal, interest, and mortgage insurance premium will be paid to the mortgage on behalf of the mortgagor by the Federal Government.

These interest reduction payments would reduce rentals to a basic rental charge, determined for each unit on the basis of operating the project with such payments, and a tenant or cooperative member would either pay the basic charge or such greater amount as represented 25 percent of his income, but not in excess of the fair market rental charge which would be determined on the basis of operating the project without any interest reduction payments. The interest reduction payments to the mortgagee would not vary, in order to avoid administrative complexities, but rental charges collected by the mortgagor in excess of the basic charges would be returned to the Secretary for deposit in a revolving fund for the purpose of making other interest reduction payments. In calculating family income, there would be deducted \$300 for each minor person who is a member of the immediate family and living in the household and any income earned by such minor.

Thus, like the homeownership program proposed in section 101 of the bill, this program will be able to provide housing for many lower income families for whom adequate housing is not now available at reasonably equivalent costs. This will be possible because of the identical 1 percent floors for subsidy purposes. Also, under the 236 program the effective amount of the subsidy would vary, because of the provision for recapture of the rental charges in excess of the basic rental charge collected by the mortgagor, in accordance with the income of the tenant or cooperative member and therefore his need for assistance. Incomes would be reexamined at least every 2 years and the rent charged the tenant adjusted accordingly.

The following table shows the range of rental reductions for various income levels, according to mortgage amount attributable to the unit.

ESTIMATED REDUCTION IN MONTHLY RENTAL UNDER SEC. 236, BY MORTGAGE AMOUNT AND TENANT'S ANNUAL INCOME BASED ON 6¾-PERCENT 40-YEAR MORTGAGE WITH ½-PERCENT MORTGAGE INSURANCE PREMIUM

Adjusted annual income <sup>1</sup>	25 percent of monthly income <sup>2</sup>	Mortgage amount					
		\$8,000	\$10,000	\$12,000	\$14,000	\$15,000	\$17,000

Basic rental charge.....		70.82	83.84	100.61	117.36	121.36	127.59
Fair market rental charge.....		102.27	123.15	147.79	172.40	180.33	194.42

<sup>1</sup> Total income of the family less \$300 for each minor child and any income earned by a minor child.

<sup>2</sup> Rounded.

<sup>3</sup> Cost to tenant would exceed 30 percent of his monthly income in order to meet basic rental on this mortgage amount.

<sup>4</sup> Less than \$5.

Source: Department of Housing and Urban Development.

The committee considered various limits on eligibility of tenants based on their incomes. One proposal would have provided for the Secretary to establish maximum family-income limits, depending on family size, on the general basis of the cost, in the area, of providing standard rental or cooperative housing of modest but adequate construction. It is the committee's belief that this would have resulted in income limits substantially similar to the income limits presently in effect for admission to 221(d)(3) below-market interest rate housing. These limits, while consistent with the objectives of the 221(d)(3) BMIR program, were considered to be too high to give adequate assurance that the housing provided under this new program would be sufficiently available to families at income levels of greatest need.

With these thoughts in mind, the committee has set a general ceiling for eligibility for subsidized admission to one of these projects at 70 percent of the limits prescribed by the Secretary for occupants of projects in the same area financed with 221(d)(3) BMIR mortgages. These limits will serve to assure that this new program will be more directly aimed at serving those lower income families the committee believes are most in need of housing. However, in recognition of the fact that many families with incomes above the 70-percent level, but still within

the limits prescribed for the 221(d)(3) BMIR program, also find it impossible to obtain adequate housing they can afford, there has been provided an exemption from this general provision.

The exemption would permit 20 percent of the total amount of interest-reduction payments, authorized to be contracted to be made pursuant to appropriation acts, to be made available for projects in which some, or all, of the units will be occupied by tenants with incomes above the 70-percent limit, but still unable to meet the fair market rental for the unit which they occupy. This means that at least 80 percent of the aggregate amount of contract authority available at any time pursuant to appropriation acts must be reserved on behalf of the tenants whose incomes are no more than 70 percent of the 221(d)(3) BMIR income limits. This limitation refers to the aggregate number of those tenants who will receive the benefits of reduced rentals under this section. It does not require that there be an 80 percent—20 percent distribution in each project. Compliance with this provision will be determined on the basis of the income of the tenants at the time of the initial rent-up of the projects.

It should be pointed out that there is no prohibition against tenants occupying these projects who are able to pay the fair market rental. Since there is no subsidy given to occupancy by them, such occupancy would not fall within the 20-percent exemption.

For purposes of determining whether a family is within the income limits, \$300 would be deducted from family income for each minor person who is a member of the immediate family and living in the household and any income earned by such minor would be excluded from family income. The \$300 allowance for minors, however, could not be used to qualify a family whose gross income exceeds the income limits prescribed by the Secretary for that area.

In view of the added administrative details that can be expected with respect to these mortgages, the Secretary would be authorized to reimburse the mortgagee for its expenses in handling the mortgage.

To qualify for mortgage insurance under this section, a mortgagor would have to be a nonprofit organization, a cooperative, or a limited-dividend entity of the types permitted under section 221(d)(3) of the National Housing Act. In addition, the mortgage limitations with respect to maximum mortgage amount and the amount of the mortgage attributable to each dwelling unit would be the same as those for mortgages insured under section 221(d)(3).

Mortgage insurance would also be available under this section to enable a cooperative or private nonprofit organization to purchase a project from a limited-dividend mortgagor. In such a case, the Secretary would be authorized to insure the purchaser's mortgage in an amount not exceeding the value of the property at the time of purchase, thereby making it possible for the cooperative or nonprofit organization to borrow, under a single mortgage, the funds needed to obtain ownership, while enabling the limited-dividend seller to realize a net amount out of the sales proceeds in many cases sufficient to recover its cash, land, and other investment and to retire the outstanding mortgage. This will be especially useful in connection with the goal of attracting large amounts of private-equity money into the provision of low and moderate income housing through the establishment of na-

tional partnerships (proposed by title IX of the bill). It will give the limited-dividend mortgagor a ready means of disposing of his project, thereby making his investment more liquid and attractive.

A project insured under this section could include such nondwelling facilities as the Secretary deemed adequate and appropriate to serve the occupants of the project and the surrounding neighborhood, as long as the project was predominantly residential and any nondwelling facilities contributed to the economic feasibility of the project, with due consideration being given to the possible effect of the project's commercial facilities on other business enterprises in the community. The regulations of the Secretary would require that any commercial facilities in the project be rented generally at not less than the prevailing rental in the community for similar facilities. The extra receipts, thus derived from these facilities, would be used to reduce the cost of operating the project and thereby reduce the basic rental charges needed to be established for the project.

Where a project was designed primarily for occupancy by elderly or handicapped families (as defined in section 202 of the Housing Act of 1959), it could include related facilities for use of such families, such as dining, work, recreation, and health facilities.

Individuals of lower income under 62 years of age would be eligible for occupancy in a project, as long as no more than 10 percent of the dwelling units in the project were so occupied. In addition, up to 20 percent of the units in any one project could be occupied by tenants receiving rent-supplement benefits under section 101 of the Housing and Urban Development Act of 1965. The rent supplement for each tenant would be that amount necessary to bring the amount the tenant is able to pay up to the basic rental charge for his unit.

With approval of the Secretary, a mortgagor could sell the individual dwelling units to lower income purchasers, including elderly or handicapped, and these purchasers could qualify for individual assistance payments under the provisions of the new section 235.

Because of the lower rentals achievable under this program, authority is provided to transfer to, or refinance under this section, below-market interest rate projects under section 221(d)(3) of the National Housing Act which have not been finally endorsed for insurance and projects under section 202 of the Housing Act of 1959 which are still in the development stage or have just been completed.

Mortgages insured under section 236 would be the obligation of the new Special Risk Insurance Fund (proposed by section 104 of the bill). In connection with rental or cooperative projects in which the mortgage is foreclosed and the property conveyed to the Secretary, the committee expects the Secretary (as he would also do in connection with rent supplement projects) to operate the project at rental rates adjusted in accordance with tenants' income and consistent with the objectives of the program.

To provide authorization to assist in the construction or rehabilitation of about 700,000 units of housing for lower income families over a 3-year period, this section would provide authority to enter into contracts for assistance payments, subject to approval in appropriation acts, in the amount of \$75 million annually prior to July 1, 1969. This amount may be increased by \$100 million on July 1, 1969, and by \$125 million on July 1, 1970.

As under the new section 235, assistance under this new section 236 would be available in both urban and rural areas. However, insofar as the administration of the section in rural areas is concerned, the Secretary will assign to the Secretary of Agriculture necessary authority, along with appropriate transfer of funds, for the implementation thereof as agreed upon by the two Secretaries. Appropriations would also be authorized, pursuant to section 1003 of the bill, to pay for Agriculture's administrative expenses in connection with any such assignment.

This section would also amend section 207 of the Appalachian Regional Development Act of 1965 to permit the loans and grants available under that section to nonprofit sponsors of 221(d)(3) housing in the Appalachian region to be also available to such sponsors under the new section 236.

#### RENT SUPPLEMENT PROGRAM

Section 202 of the bill would make available an additional \$40 million in contract authority for rent supplement payments in fiscal year 1970, and an additional \$100 million in contract authority in fiscal year 1971.

The final increment of \$45 million of contract authority authorization under the rent supplement program provided by the Housing and Urban Development Act of 1965 will become available July 1, 1968, bringing to \$150 million the cumulative authorization under that act. Through the current fiscal year, \$42 million of contract authority has been approved in appropriation acts, leaving \$108 million still available. The budget for fiscal year 1969 requests approval of \$65 million of contract authority. If this amount is approved, \$43 million of the original contract authority authorization will remain available at the end of fiscal year 1969.

The rent supplement program is rapidly acquiring momentum and proving its worth. By the end of fiscal year 1969, 384 rent supplement projects with nearly 27,000 supplemented units located throughout the country are expected to be ready for occupancy. The remaining 18,000 units provided under approved contract authority through fiscal year 1968 are expected to be ready for occupancy in fiscal year 1970. The budget request of \$65 million in approved contract authority for fiscal year 1969 would provide about 72,000 units of supplemented housing. The total of \$83 million anticipated for fiscal year 1970 would provide about 92,000 units. The requested \$100 million for the following year would provide about 110,000 additional units.

The committee feels that the rent supplement program has demonstrated that it is a strong and flexible instrument emphasizing private ownership, private financing, and private management. It has also been strongly endorsed by private industry. The need for a vastly expanded supply of housing for low-income families is well recognized and the administrative procedures for the rent supplement program are now efficiently organized for prompt action to help meet this need. The new contract authority requested is the minimum needed to meet the goal of producing 1.75 million units of lower income housing in the next 3 years, as contemplated by this bill.

Section 202 would also authorize rent supplement payments on behalf of qualified tenants to eligible housing owners of projects financed

under a State or local program which provided assistance through loans, loan insurance, or tax abatements, if the project is approved by the Secretary for rent supplement benefits prior to the completion of construction or rehabilitation.

Under present law, rent supplement payments are restricted to projects financed with mortgages insured under sections 221 (d) (3) or 231 of the National Housing Act or projects financed by a direct loan under section 202 of the Housing Act of 1959.

This provision would, in effect, provide for a joint Federal-State-local sharing of the costs of subsidizing rentals for low-income persons. Since it applies only to new construction or rehabilitation, it would be consistent with the purpose of the rent supplement legislation to provide additional housing units for persons of low income in privately sponsored projects.

The committee expects that adequate control over these projects will be maintained by the Secretary through appropriate provisions in the rent supplement contracts to insure conformity with the requirements of the rent supplement program. It also expects the Secretary to exercise his discretion in approving these projects for assistance to assure that the Federal assistance is not made available in connection with projects which receive State or local assistance of little significance is helping to reduce the cost of providing the housing.

## PART B—LOW-RENT PUBLIC HOUSING

### INCREASED LOW-RENT PUBLIC HOUSING AUTHORIZATION

Section 203 of the bill would increase the authorization for annual contributions contracts for the low-rent public housing program by \$100 million on the date of enactment of the Housing and Urban Development Act of 1968, to be added to the \$47 million coming available on July 1, 1968, and by \$150 million on July 1 in each of the years 1969 and 1970.

This increased contract authorization would provide approximately 375,000 low-rent dwelling units over the 3-year period for the public housing program, the basic federally assisted program for supplying housing to the lowest income members of our society. Under the program, there are now in operation about 680,000 units with another 55,000 units under construction or soon to be put under construction.

This authorization is a key element in the President's program of providing 6 million low and moderate income housing units over the next 10 years. Major emphasis under this new authorization will be placed on production under the turnkey method, with about half of the units expected to be so provided. Emphasis will also be placed on the leasing of units in existing housing as well as the outright acquisition (with or without rehabilitation) of existing housing. This new authorization will also provide funds to continue the extensive modernization program now being carried out for older existing public housing.

The turnkey method, with its emphasis on the involvement of private enterprise in the production of public housing, has substantially expanded the productive capability of the public housing program.

Under this method private developers who own, or have an option to buy, land or improved property can contract to build housing on the land, or rehabilitate the property, for eventual sale to a local housing agency. This is the reverse of the standard method under which the housing agency first acquires the property by purchase or eminent domain, has the construction plans and specifications prepared by its own architects, and then has the construction done by general contractors.

Under turnkey, a low-rent project can be constructed in less than half the time traditionally required for public housing. It frees the builder from complicated and cumbersome procedures and stimulates his initiative to develop imaginative and well-designed buildings at a lower cost. The Department of HUD reports that the response of developers and local housing agencies to the turnkey concept has been enthusiastic, as evidenced by the fact that the number of turnkey units in some stage of development increased from 13,000 on January 31, 1967, to over 44,000 by January 31, 1968, with additional units in the application stage. The turnkey concept has already been extended to enable private industry not only to build public housing developments, but also to manage them.

The increased use of existing housing, by way of leasing private accommodations and the acquisition, with or without rehabilitation, of existing housing, has also enhanced the public housing program's ability to provide housing for low-income families in a timely manner. The new leasing program has already produced, as of February 1, 1968, over 30,000 dwelling units under annual contributions contract, about 10,000 of which were occupied or available for occupancy by low-income families. On the same date there were 7,700 acquired units under management.

Applications for public housing, in terms of number of units, are being submitted by local housing agencies at an increasing rate, demonstrating that the demand for public housing units will be great and continuing during the next decade. HUD reports that the number of units in the status of application pending has grown from about 35,000 in February 1966, to 68,000 in February 1967, to 125,000 in February 1968. In addition, there are about 96,000 units in the status of program reservation, and the remaining authorization from the 1965 act will cover only about two-thirds of these. Applications for additional units are being submitted at an annual rate of about 140,000 units.

This authorization will further permit the Department of Housing and Urban Development to accelerate its efforts to provide homeownership opportunities for public housing tenants. Homeownership for the lowest income families on Indian reservations has been achieved through a combination of "sweat equity" in construction, self-maintenance, and public housing assistance. The "turnkey" method has made it possible to secure the participation of private developers in Indian self-help developments and also the production of such housing by a "community action" type organization involving apprenticeship and home maintenance training with Office of Economic Opportunity assistance.

HUD has also undertaken a major effort to shift this type of activity to other than Indian areas where self-help in construction is

possible, such as rural areas and smaller communities. Most recently, HUD has developed a further modification of this program for those situations where a significant amount of self-help in construction is not possible. This program would provide homeownership to those low-income families who can build up an equity through self-maintenance of their homes and through payments which they can afford as their incomes increase and which can be applied to reduce the debt on their homes.

Additionally, HUD has been promoting homeownership under the leased housing program by devising methods whereby private owners will be encouraged to provide lease-purchase rights to low-income families. Specific proposals of this type are now under consideration together with related proposals involving cooperative ownership.

This section also would modify the existing authorization for public housing loans. Under existing law, the Department of Housing and Urban Development is authorized to borrow \$1,500 million from the Treasury to be used for low-rent housing loans. This ceiling has had the effect of limiting the amount of Federal loan commitments as well as the amount of loans actually disbursed, which does not reflect the fact that loan commitments do not normally result in the disbursement of funds but are used by the local housing agency as a backup to borrow private funds. This section would revise the existing law so as to make it clear that the \$1,500 million ceiling would apply only to Federal loans which the Secretary estimates will actually be disbursed, and not to Federal commitments which are not expected to result in actual outlays. This would provide the same flexibility as is presently authorized with respect to urban renewal loan commitments under section 102(e) of the Housing Act of 1949.

#### UPGRADING MANAGEMENT AND SERVICES IN PUBLIC HOUSING PROJECTS

Section 204 of the bill would authorize the Secretary of Housing and Urban Development to enter into grant contracts with local housing authorities to assist them, where necessary, in upgrading their management activities and providing tenant services to families living in low-rent housing projects, and would authorize appropriations in an amount not to exceed \$20 million in fiscal year 1969, and an additional \$40 million in fiscal year 1970, for this purpose.

Local housing authorities desiring financial assistance under this authorization would be required to submit applications to the Secretary, and these would be reviewed and acted upon on a case basis. The Secretary would have to be satisfied that the activities and services are needed and are beyond those which the local authority has provided or can provide with project income.

Many local housing authorities have been providing some management-related services to their tenants. However, the extent to which services can be provided is limited by the relatively small amounts of money available from project revenue after other project expenditures have been satisfied, and these underfunded programs have not met the real needs of tenants in improving their economic status and adjusting to urban life. This is especially true in the larger cities where the need for tenant services is the greatest and most urgent. The need for addi-

tional services because of the constantly increasing number and concentration of lower income, multiproblem families in public housing has been brought to the committee's attention on several occasions during recent hearings on housing and urban development legislation.

This authorization would provide funds to permit local housing authorities to play a basic role in seeing that coordinated services are provided tenants so as to help them achieve increased self-sufficiency and improvement of their economic and social situation, and facilitate the efficient and effective use of Federal, State, and local community program resources. The funds would be used to fill gaps where needed services are not available to public housing residents. They would also serve as seed money to stimulate the development by the community of new programs which would broaden services to public housing tenants.

Among the services to be provided would be counseling and referral services to advise low-income families and individuals as to the resources for job training and placement, education, welfare, health, and other services in the community, and to refer them to agencies with the appropriate expertise were necessary. Many families are also in need of counseling on such matters as housekeeping and diet practice, money management, and child care.

The local housing authority would work with community agencies and organizations so as to bring their activities and services to public housing neighborhoods. The local authority in turn would provide services which are not being provided by public and private agencies in the community and which are directly related to meeting tenant needs and providing a wholesome living environment, such as organization of youth group activities, senior citizen clubs, and credit unions. These services would not duplicate activities and programs in the community provided under Office of Economic Opportunity or Department of Health, Education, and Welfare sponsorship or other Federal departments and agencies.

This authorization would also permit local housing authorities to participate in activities directly concerned with improved tenant-management relationships. These would include encouraging and assisting tenants with the establishment of resident organizations, involving residents in those aspects of management policies and practices which affect their daily lives, and planning with the tenants a program of community activities and services. Because of the committee's belief that tenant participation is essential to the proper provision of the services and the operation of the programs that would be funded under the amendment, it has provided that preference shall be given to programs providing for the maximum feasible participation of the tenants in the development and operation of the services and programs.

#### PURCHASE OF UNITS BY TENANTS

Section 205 of the bill would amend section 15(9) of the U.S. Housing Act of 1937 to broaden existing law to permit local housing authorities to sell *any* low-rent housing units to tenants if such units are suitable for individual ownership. Existing law permits tenants to purchase *only* detached or semidetached units. This would permit the sale to a public housing tenant of any property owned by a local

housing authority so long as the property sold has sufficient individual identity (including cooperative or condominium units) to make it suitable for sale to, and occupancy by, the public housing tenant.

#### PUBLIC HOUSING IN INDIAN AREAS

Section 206 of the bill would amend the U.S. Housing Act of 1937 so as to permit public housing assistance for Indian families without regard to the present limitation which does not permit public housing programs to include a site which is on a farm or is an appurtenance to a farm. The existing limitation has presented difficulties in connection with conventional low-rent housing and mutual-help housing programs for Indians. Problems have developed concerning the location of a particular housing site, the use to which adjacent land is put, and the means of livelihood of the Indian participants in these programs. In some cases, the present limitation has the effect of permitting the use of certain sites, and prohibiting others, in connection with the same project on an Indian reservation. This amendment is intended to apply to all Indian reservations, whether they be State or National.

### Title III—Federal Housing Administration Insurance Operations

#### RESPONSIBILITY OF FHA IN PROVIDING HOUSING

The committee recommends that the Congress give serious consideration to the administrative dilemma with which the FHA is faced in trying to carry out the sometimes conflicting mandates of the Congress in the operation of its insurance programs. On the one hand, the FHA is asked through the administration of its programs to achieve the very desirable social purposes of rehabilitating slums and blighted areas and to assist in the provision of housing for low and moderate income families who cannot obtain decent housing at prices they can afford. On the other hand, the FHA has been asked to administer these programs at no cost to the Government over and above the receipts which can be realized by the FHA from fees and mortgage insurance premiums paid by those receiving the benefits of the programs.

In the earlier days of the FHA, it was entirely possible to achieve the objectives of its major insurance programs consistent with the requirements of section 203 and section 207 that "no mortgage shall be accepted for insurance unless the Commissioner finds that the project with respect to which the mortgage is executed is economically sound."

This committee recognizes that the subsequent enactment of several insurance programs designed specifically to promote the construction or rehabilitation of housing to accomplish worthwhile social objectives has required the FHA to accept progressively greater insurance risks.

Among the newer programs, the section 220 program, which is intended to provide housing through the rehabilitation of substandard housing and construction of new housing in areas cleared of slums, has been particularly troublesome. Such housing, located in areas with uncertain futures, entails substantially more risks than that in neigh-

borhoods of established and stable values. These risks are especially acute during the early stages of the development, while the area is in a transition period and the stigmas resulting from former conditions are being overcome.

Early in the 220 program it was found that the usual test of estimated value on completion of a project gave only limited recognition to the ultimate value of a project—the value which could be reached only upon the successful completion and upgrading of an urban renewal area. This inhibited building in urban renewal areas because the FHA's estimates of value, upon which the mortgage amounts were based, were usually markedly below construction costs. With the high investment requirements occasioned by low ratios of loan to actual costs of production, few investors could be induced to undertake projects in areas of then uncertain futures with potentially long rent-up periods to achieve sustaining occupancy.

In order to encourage building in urban renewal areas, the statute was changed to permit estimated "replacement cost" rather than "estimated value" to be used for determining maximum mortgage amounts. In this program, also, the FHA was not required to apply the test of economic soundness. These changes were made to encourage building by private entrepreneurs and acceptance of greater risks by the FHA so that the objectives of urban renewal could be accomplished.

In the section 221 program, designed to assist private enterprise in providing housing for low and moderate income families and displaced families, and in the section 231 program, housing for the elderly, the concept of replacement cost was adopted for new multi-family construction.

In order to meet the program objectives of housing for military personnel, the FHA also accepts greater than usual risks, because conservative value estimates, which would take into consideration the transient characteristics of servicemen and the shifting of military housing requirements with changes in missions of military bases, simply would not provide the housing needed.

The committee also recognizes that, in those programs which permit mortgages based on 100 percent of replacement cost for non-profit mortgagors, the risk element substantially exceeds that found in more conservative programs. However, the committee considers that the risk is acceptable in view of the desirability of attracting the investment in housing of well-motivated charitable and eleemosynary organizations, both locally and nationally based.

Some of the major criticism directed at the FHA in the past has been on the basis of its conservatism. If it was to assume a position of leadership in the encouragement of loans for important social objectives, such as the rebuilding of the central cities, it required direction from the congressional policymakers. Such direction in the section 220 urban renewal program was clearly and unmistakably provided by the Congress. The statutory term "economic soundness" was not included as a requirement and "replacement cost" was substituted for "value" with the genuine expectation that the social values involved, especially financial assistance to beleaguered cities seeking a sound and viable tax base, would bring results justifying increased risks. Where there

is no requirement for a finding of economic soundness, it is clear that substantial risks are to be assumed in order to attain the declared objectives of the particular housing program. Where the congressional directive is to utilize replacement cost estimates in lieu of value, an even greater emphasis is placed on assuming additional insurance risks.

Another area where the risk is large is that of rehabilitation. The work that has been done in rehabilitation has demonstrated that it can help provide the disadvantaged with decent, safe, and sanitary housing, often at lower costs than possible with new construction. But many unknown factors, not present in new construction, may be encountered. No one, no matter how experienced, can accurately determine what hidden structural conditions may cause the actual cost of rehabilitation of a building to exceed greatly the most informed estimates made before rehabilitation begins.

Another factor increasing the risk to the FHA is that, in both the home and multifamily rehabilitation programs, mortgage amounts are based upon the estimated cost of repair and rehabilitation plus the estimated value of the property before repair and rehabilitation. This concept of relating the mortgage amount to cost of rehabilitation rather than value can produce mortgage amounts which exceed an appraiser's estimate of the value of property upon completion and thus entails greater risks than the economically sound 203 and 207 programs. However, this committee recognizes that these concepts are necessary to encourage the production of housing to meet the needs of the families intended to be aided and that preserving and upgrading the Nation's inventory of salvable housing is one of the better ways to achieve the goal of providing decent housing.

The committee considers that rehabilitation of existing housing will provide this country with one of its most effective tools for providing adequate housing. Although many new techniques are being developed for rehabilitation, there is much need for new, bold, and untried approaches to the problem of economical rehabilitation of existing housing. Much experimentation on an increasingly larger scale needs to be done. As in any experimentation, the committee recognizes that the risk of failure in untried methods of rehabilitation is great. However, the committee considers that the value of the experience to be gained by trying new techniques of rehabilitation is well worth the risk of economic loss to the FHA of an occasional experiment. No experiment should be considered to be a true loss if it has provided decent housing and the experience leads to better methods of rehabilitation.

This committee has been faced with two major questions which require study and resolution by the Congress. First, can the FHA operate within the present statutory language to accomplish the social objectives of the so-called high-risk programs, or is further broadening language needed? Second, operating even within the present statutory language, is there adequate protection for the soundness of the FHA reserve funds?

The reserve funds of the FHA, derived from its premium and other income, are reported to be short of the reserve requirements estimated by the FHA as being necessary for program obligations in the event of a serious and extended economic recession. The losses in recent

years, particularly in socially oriented programs, have been rising so that the gap between the available reserves and the reserve requirements will probably increase. Part of this problem can be attributed to the fact that some of the newer programs administered by FHA have had, and may possibly continue to have indefinitely, greater losses than the amounts of premium and fee receipts. For these programs, no reserves have been accumulated or can be confidently anticipated. Another part of the disparity between reserves and reserve requirements may be explained by the fact that, for all programs, including those with adequate premiums, the risks for all insured cases are highest in the early years following insurance, prior to receipt of principal premium collections. Most of the socially oriented programs are relatively new as compared to FHA's regular programs. In these programs, disparities between reserves and reserve requirements for entire programs will be evident for several years following any period of unusual increase in insurance activity. Thus, the greater the amount of new business put on the books, the greater the disparity will be between reserve requirement and actual reserves. Only after years of operation of a program does the actual accumulated reserve approach the estimated reserve requirements.

It is evident that some of the newer high-risk programs, such as those authorized by sections 101, 102, and 201 of this bill, will have higher claim ratios and hence a higher reserve requirement than typical for the older programs such as 203 and 207. This problem was first recognized in 1961 when the Congress, in establishing the section 221(d) (3) below-market interest rate program, authorized FHA to waive the mortgage insurance premium and to call upon the Treasury to make up losses in the insurance fund to compensate for actual losses experienced.

The committee in its deliberations this year considered the need for additional Treasury support to supplement (or replace) premium income on other socially desirable programs. As a result, it decided that, for the two new homeownership programs proposed by sections 101 and 102 and the new rental and cooperative program proposed by section 201, as well as for the new authority provided in section 103 to insure mortgages in order, declining neighborhoods, a special FHA insurance fund should be established with specific authorization for appropriations to make up any deficits.

The committee believes that this action is all that is necessary at this time. However, it will continue to study the problem in light of the establishment of the new special risk fund.

The committee expects FHA, within the framework of existing law and utilizing the new powers granted in this bill, to provide more effective direction to operating officials to have them accept greater but justifiable risks to help provide decent housing for the country's less privileged citizens. It also expects FHA to provide support in the form of training materials and supervisory assistance to the operating officials so that a minimum amount of time will elapse between the enactment of this bill and its implementation at the local level.

The committee heard testimony during the hearings which indicated that the FHA could be "geared up" to operate and start making commitments under the new programs and amendments contained in this

bill within 6 months after funds had been appropriated for the housing programs contained in the bill.

In this connection, the committee believes that the Secretary of HUD should submit to the committee a report at the end of 6 months after funds have been appropriated on the FHA commitments made to date and whether or not adequate mortgage credit is available for the programs established by this bill for the benefit of the lower income families.

#### MORTGAGE INSURANCE PREMIUMS FOR SERVICEMEN AND THEIR WIDOWS

Section 301 of the bill would amend section 222 of the National Housing Act to permit payment of FHA mortgage insurance premiums by the Secretary of Defense or the Secretary of Transportation (for the Coast Guard) in cases where a serviceman assumes a home mortgage previously insured under any other provision of the National Housing Act. Under present law, a serviceman may receive this benefit only when he purchases a home and places a new mortgage on it under the provisions of section 222.

Under this section, a serviceman would be able to receive the benefits of section 222 and, in many cases, also be able to take advantage of lower closing costs, since the closing costs charged when assuming an existing mortgage are usually lower than those charged when the purchaser must originate a new mortgage. Also, the existing mortgage may carry an interest rate more favorable than that obtainable by taking out a new loan.

In addition, this section would also direct the Secretary of Defense or the Secretary of Transportation to continue making the premium payments for a widow of a serviceman who dies in the service for two years after his death or until she sells the house, whichever occurs sooner. The Secretaries would be directed to notify promptly the widow of the increased cost she would have to bear upon the termination of the payment of the insurance premium at the end of the 2-year period.

#### SEASONAL HOMES

Section 302 of the bill authorizes the financing of new seasonal housing with mortgages insured by the Federal Housing Administration. The amount of a mortgage could not exceed \$15,000 and 75 percent of the appraised value of the property. The dwelling would not need to be designed for year-round occupancy, but it would be required to meet standards prescribed by the Secretary, and be located in an area where the Secretary finds it is not practicable to obtain conformity with many of the requirements essential to the insuring of mortgages on housing in built-up urban areas. The property with respect to which the mortgage is executed could be an acceptable risk rather than meet the FHA economic soundness requirements applicable under FHA's regular mortgage insurance programs. In determining whether the property is an acceptable risk, the Secretary would give consideration to the economic potential of the area in which the dwelling is located and the contribution that the housing will make toward improving the area. In addition, this section authorizes the Secretary to suspend the issuance of commitments for mortgage insur-

ance on seasonal homes in any area whenever he determines that: (1) There is a serious and unusual shortage of mortgage funds for residential construction in such an area; (2) that insuring such seasonal housing would materially and adversely affect the availability of mortgage funds for residential construction in such an area; and (3) such suspension would not have an adverse impact upon the balanced economic development of the area.

In carrying out this program, the Secretary would, of course, be governed by the provisions of present laws that are designed to prevent water pollution and other health hazards resulting from housing being built without adequate community water and sewerage services. The committee is aware that much of the housing to be financed under this program will be located in areas that are not presently served by public or community water and sewer systems. In order to avoid pollution of local water sources, it is expected that the Secretary will insist upon the installation of public or community systems in those instances where it is determined to be economically feasible. Any private systems installed would, of course, have to comply with the standards prescribed by the Secretary.

#### MODIFICATIONS IN TERMS OF INSURED MORTGAGES COVERING MULTIFAMILY PROJECTS

Section 303 of the bill would add a new section 239 to the National Housing Act to require that any request for the extension of time for curing a default on an FHA-insured multifamily mortgage, or a modification of the terms of such a mortgage, be approved by the Secretary of Housing and Urban Development in accordance with regulations prescribed by him. During the period of modification or extension any rents or other funds (such as security deposits) derived from the mortgaged property in excess of that needed to meet operating expenses would be required to be held in trust by the mortgagor and distributed only with the consent of the Secretary.

This section is designed to discourage distribution of rental income of multifamily projects to stockholders of a mortgagor corporation or individual owners where such income should be used to meet mortgage payments. Where it is thought that a mortgage property probably will not generate enough income to meet mortgage payments, there is a temptation for the owners to divert funds received from rentals to their own use and to allow the mortgage to go into default in order to recoup their investment in the project and even to show a profit in the investment.

Civil actions have generally proven inadequate as a means of discouraging such actions or of recovering all diverted funds. Section 303 would provide criminal penalties for such willful diversion of funds by a mortgagor or a stockholder, director, officer, or agent of the mortgagor during the period in which the time for curing a default has been extended or the terms of the mortgage modified. The maximum penalty would be a fine of not more than \$5,000 or imprisonment of not more than 3 years, or both.

The Secretary in his regulations could provide for granting consent to an extension or modification of a mortgage in any case or class of

cases without regard to the requirements of the regulations where he determined such action would not jeopardize the interests of the United States. However, in the case of such exempt mortgages, the knowing and willful use, or authorization of such use, of any part of the rents or other funds derived from the mortgaged property for any purpose other than to meet actual and necessary expenses (including amortization) while the mortgage is in default would carry a similar penalty.

#### CONDOMINIUMS

Section 304 of the bill would amend section 234(c) of the National Housing Act to provide the same downpayment requirements and maximum mortgage limitations for the FHA condominium program as are currently in effect under the regular section 203 home mortgage insurance program. This would be done by increasing the maximum mortgage limits from 75 to 80 percent of the appraised value of the property in excess of \$20,000. It would also amend section 234(f) to permit blanket mortgages to cover four or more family units instead of the present limitation to five or more units.

In addition, section 304 would further amend section 234(c) to authorize FHA insurance for the individual units in a condominium project with two to 11 dwelling units without requiring that the project be first covered by an FHA-insured project mortgage. Condominium ownership has proven to be a useful and flexible tool in providing homeownership opportunities and in the upgrading of deteriorated housing in older neighborhoods. This amendment would facilitate its usefulness by authorizing insurance for condominium units in small projects without the expense of an unnecessary project mortgage and dual title transfer.

#### INSURANCE OF LOANS FOR PURCHASE OF FEE SIMPLE TITLE FROM LESSORS

Section 305 of the bill would add a new section 240 to the National Housing Act to authorize FHA to insure loans made by private lending institutions to finance the purchase by homeowners of fee simple title to the property on which their homes are located.

In Hawaii and in other States some homeowners have only long-term leaseholds in the property on which their homes are located. Many of these homeowners would like to purchase the fee simple title but find it difficult to finance the purchase. Unless they are able to pay cash, it is usually necessary for them to refinance their existing home mortgages or place second mortgages on their homes, either of which entails additional expenses and frequently higher interest rates than on first mortgages.

FHA insurance of loans for the purchase of fee simple title, as authorized by this section, would provide a source of credit to homeowners at reasonable costs and obviate the need for refinancing of an existing mortgage. Loans insured under this section could not exceed the lesser of \$10,000 or an amount which, when added to any outstanding indebtedness related to the property, would create a total outstanding indebtedness not exceeding the amount of an insured first mortgage under section 203(b) which would be used to purchase the home if the entire property were being purchased. The term of the

loan could not exceed 20 years, and would bear interest at a rate not to exceed that which the Secretary of HUD finds necessary to meet market conditions; but in no event in excess of 6 percent. However, pursuant to the provisions of section 316, which would amend Public Law 90-301, recently passed by the Congress, the Secretary would be authorized up to October 1, 1969, to set the interest rate in excess of 6 percent if he deemed it necessary in order to meet the mortgage market.

This section would also amend section 5(c) of the Home Owners Loan Act of 1933 to permit Federal savings and loan associations to invest in these loans.

**EXTEND 221 (d) (2) SALES HOUSING PROGRAM FOR TWO-, THREE-, AND FOUR-FAMILY RESIDENCES TO ALL LOW AND MODERATE INCOME FAMILIES**

Section 306 of the bill would authorize mortgage insurance under section 221(d) (2) of the National Housing Act for the purchase by low or moderate income families of two-, three-, and four-family residences where one of the units is to be occupied by the mortgagor. Under present law, only families holding certificates of eligibility as displaced persons are eligible for mortgage insurance under section 221(d) (2) for such residences.

A large number of two- to four-family properties are available in older neighborhoods of many cities which could appropriately be rehabilitated or offered for sale to low and moderate income families under the favorable terms of section 221(d) (2). This amendment would augment the supply of housing available to such families. In addition, ownership of these properties by occupant families would provide a more stabilizing influence in arresting the decline of older neighborhoods than would absentee ownership.

**REMOVE DIVIDEND RESTRICTION FOR NONDWELLING FACILITIES IN SECTION 221 PROJECTS**

Section 307 of the bill would remove the requirement that mortgagors of section 221, market interest rate multifamily projects located in urban renewal areas waive the right to receive dividends on their equity investment in the portion of the project devoted to community and shopping facilities, where these facilities are designed to serve the needs of others than residents of the project. The dividend restriction would continue to be applicable with respect to the investment in such facilities for section 221 below-market interest rate projects in urban renewal areas.

Under present law, projects insured under section 221 of the National Housing Act may include commercial and community facilities adequate to serve the occupants of the project. If a 221 project is located in an urban renewal area, nondwelling facilities are permitted to the extent considered desirable and consistent with the urban renewal plan. This permits commercial and community facilities adequate in size to serve the neighborhood, rather than just the occupant of the project, and is consistent with the nondwelling facilities permissible for projects insured under section 220 of the National Housing Act. If these larger facilities are developed as a part of the project,

the mortgagor is required, under present law, to waive its right to receive dividends on the equity invested in the community and shopping facilities.

The amendment would encourage the construction of market-interest rate projects, the type of projects eligible for rent supplement benefits, with the type of nonresidential facilities that are needed to serve the urban renewal area in which the project is located. The non-dwelling facilities could include stores, doctors' offices and clinics, recreational, community, and other facilities. By including such non-dwelling facilities as part of the housing project, employment opportunities for project and neighborhood residents would be increased. Also, modern community and shopping facilities could be provided that are not available in the neighborhood.

Deleting the restriction on receipt of dividends would not affect the authority of the FHA to establish maximum rents and charges for commercial and community space in such projects. Also, the requirement that the FHA give due consideration to the possible effect of the project on other business enterprises in the community would remain in effect where the nondwelling facilities proposed were in excess of that considered adequate to serve the occupants of the project.

#### SUPPLEMENTAL LOAN PROGRAM FOR PROJECTS FINANCED WITH FHA INSURED MORTGAGES

Section 308 of the bill would add a new section 241 to the National Housing Act to permit the Secretary of HUD to insure supplemental loans to finance improvements, repairs, and additions to multifamily rental projects (including nursing homes and housing for the elderly) and group practice facilities financed with an FHA-insured mortgage. This financing would supplement existing insured mortgages and would be available without refinancing the existing mortgage. Similar authority is now contained in sections 213(j) with respect to cooperative housing and 220(h) with respect to properties in urban renewal areas.

The FHA-insured supplemental loans would be limited to 90 percent of the Secretary's estimate of the value of the required improvements, repairs, and additions, and to an amount which, when added to the outstanding balance of the existing mortgage, did not exceed the basic mortgage limitation of the program under which the project was financed. The loans would bear interest at such rate as the Secretary of HUD found necessary to meet market conditions, but not in excess of 6 percent. However, pursuant to Public Law 90-301, recently passed by the Congress, the Secretary would be authorized, up to October 1, 1969, to set the interest rate in excess of 6 percent if he deemed it necessary to meet the mortgage market. Construction financed by these loans would be governed by the labor standards provisions of section 212 of the National Housing Act applicable to the program under which the mortgage covering the project or facility is insured.

In connection with improvements to either a nursing home or a group practice facility, the supplemental loan proceeds would also be available for financing equipment to be used in operating the home or facility. These are the only two programs in which equipment items are

permitted to be financed with the proceeds of the basic mortgage under which the project is originally developed. (Sec. 315 of this bill contains an amendment adding this authority for nursing homes.)

The insurance on these loans would be the obligation of the general insurance fund, except for loans for cooperative projects insured under section 213 and loans for the new rental and cooperative projects insured under section 236 (proposed by sec. 201 of the bill). In the former case, the insurance would be the obligation of the cooperative management housing insurance fund, and, in the latter case, the obligation of the new special risk insurance fund (proposed by sec. 104 of the bill).

The committee believes that the need for providing a flexible program of supplemental financing, available to all FHA-financed projects, has amply been demonstrated. Experience gained through the operation of the nursing homes program has indicated that nursing homes, which were initially restricted in size and facilities by limitations imposed either by State authorities or by FHA at the time the projects were built, need to expand their space and facilities to meet changing conditions. Present FHA provisions offer no assistance for financing the expansion of a nursing home that has proven a need for larger facilities, unless this can be done as a part of a plan for the complete rehabilitation of the project and a refinancing of the existing mortgage. In many instances, a complete rehabilitation of the nursing home is not needed, while the refinancing of the existing mortgage could result in a higher interest rate for the total indebtedness. It is anticipated that similar problems will occur with the mortgage insurance program for group practice facilities as soon as more operating experience is gained under the program.

There is also a need for providing, through a supplemental loan, long-term financing for the major new items of equipment needed for placing in operation an addition to either a nursing home or a group practice facility. Nursing home and medical equipment is highly expensive. If a provision for its financing is not included in the long-term supplemental loan, short-term financing would have to be used with large monthly payments.

While the committee does not feel that the need for supplemental loan authority is as great for the other multifamily housing programs, as in the case of nursing homes and group practice facilities, instances have arisen in section 207 and 608 projects, and will probably arise in the future in rent supplement and other rental projects, where repairs or additional facilities may be needed and where the expense or refinancing could be avoided if supplemental loans were available.

#### HOME IMPROVEMENT LOANS—INCREASE IN MAXIMUM MATURITY, FINANCE CHARGE, AND LOAN AMOUNT

Section 309 of the bill would increase the present maximum dollar limitation on property improvement loans made by financial institutions insured under title I of the National Housing Act for single family and other properties from \$3,500 to \$5,000 and the maximum maturity limitation from 5 years and 32 days to 7 years and 32 days. The maximum finance charge on loans up to \$2,500 would be changed

from a discount of \$5 to \$5.50 per \$100 of original face amount, and for that portion of a loan above \$2,500 the discount permitted would be changed from \$4 to \$4.50 per \$100. The present maximum dollar limitation of \$15,000 and the maximum 7-year and 32-day maturity for title I loans for properties with two or more dwelling units would remain unchanged.

The \$3,500 limit has been in effect since 1956 and the increase in maximum loan amount to \$5,000 is needed to meet the increasing cost of home repair and modernization work. Extending the payment period to 7 years and 32 days will enable needed repairs to be made by homeowners who could not afford the monthly payments required by the shorter term. The increase in discount rate is required to meet money market conditions under which lenders no longer find title I lending as attractive as making similar loans at higher rates on an uninsured basis. From 1956 to 1966 the annual number of FHA title I loans decreased 52 percent, although during this same period the number of owner-occupied single family homes increased by 25 percent.

The new discount rates of \$5.50 and \$4.50 would be well under rates now charged for non-FHA insured property improvement loans. Lending institutions which have ceased making title I loans in favor of conventional loans are charging an average of \$6 to \$7 discount.

Currently, FHA has indicated the typical title I loan is for \$1,300, repayable in 42 months. The effective rate of interest paid by the borrower on such a loan is 9.23 percent per annum; the amount of such interest is \$226.32. By increasing the discount rate on the first \$2,500 to \$5.50, the effective rate of interest for the same loan would be 10.16 percent with the amount of interest being \$250.26. The increased yield would cost the typical borrower 57¢ a month.

It is estimated that the proposed increase in the amount of loan along with the higher yield will increase the number of loans insured annually from the present 450,000 to approximately 800,000 to 900,000. Increasing the maximum amount of the loan without increasing the yield to lenders would not, it is believed, increase title I business to any appreciable extent.

FHA helps the homeowner avoid incompetent and unreliable contractors by compiling and furnishing insured lenders a list of contractors who have conducted their activities improperly. When a homeowner complains that work is not done right, FHA has been successful in practically all cases in getting the contractor to correct it where the complaint is shown to be justified. In addition to FHA's administrative procedure for effectively dealing with the unreliable contractor, any alleged criminal irregularity on the part of a contractor or salesman is investigated by the FBI and appropriate action is taken by the Department of Justice. Many States have patterned their laws, to protect the consumer, after the regulations in effect for title I loans, so that the title I program has had a much broader effect than can be measured by the volume of business.

The committee recognizes that in order to make the title I program more effective and again popular with lenders, it is necessary to extend the term, increase the maximum amount, and provide for a higher yield on these loans. At the same time, the committee recalls the abuses

to which the title I program was subjected by unscrupulous salesmen and dealers in the early fifties, and it is also aware of many abuses which have arisen in the very recent past in conventional home improvement programs which have been established by lenders without any Government support. While the committee has agreed to the amendments to the title I program described above, it feels that the Secretary of HUD, through his administration of this program, must continue, and perhaps enforce to a greater degree, his regulations designed to prevent abuses in this program.

#### EXPERIMENTAL HOUSING PROGRAM

Section 310 of the bill would amend section 233 of the National Housing Act, the FHA experimental housing program, to make the program available for use in connection with all FHA programs. At present, section 233 is available only with respect to properties and projects meeting the requirements of one of the other sections of title II of the National Housing Act. The experimental housing program would now be authorized to be used in connection with land development projects or group practice facilities where the mortgages are insured under titles X and XI, respectively, which were enacted subsequent to section 233.

The FHA experimental housing program was added by the Housing Act of 1961. This program has enabled the FHA to underwrite and encourage a number of useful and highly successful experiments in new housing design and construction, in the rehabilitation of older housing, and in the use of different types of building materials. The pace of development of ideas for new and different housing has increased very rapidly during the past few months and the FHA is becoming increasingly involved in experimental projects. The construction and associated industries have begun to realize the extent of the housing problem faced by most of our major cities and are now seeking new techniques for resolving this problem.

The future use of the FHA section 233 program, however, would be limited unless a change is made in the requirements imposed by the Senate Committee on Banking and Currency in reporting on S. 1922, the bill which became the Housing Act of 1961. The committee report on this bill on May 19, 1961 (Rept. No. 281) contains the following statement on page 15 with respect to the experimental housing program:

The committee believes that mortgage insurance under this program should not be written in an aggregate amount which would result in estimated claims exceeding \$1 million.

The FHA, as well as the housing industry, has profited from the use of the experimental housing program. As of this date, the FHA has not received any insurance claims on mortgages insured under the program. However, a careful check on the extent of the insurance risk exposure has been maintained and it is estimated that the \$1 million limitation will soon be reached. Under the circumstances described above, the committee believes that the restrictions contained in the 1961 committee report should no longer be applicable.

#### TERM OF FHA INSURED MORTGAGES FOR LAND DEVELOPMENT

Section 311 of the bill would amend section 1002(d)(1) of the National Housing Act to extend the maximum maturity for land development project mortgages from 7 to 10 years and to give the Secretary discretion to extend the term for a longer period in case of unusual or unforeseen circumstances in order to avoid undue hardship to the mortgagor. This will provide the necessary flexibility for those occasional land development projects where a longer mortgage maturity may be needed, while still keeping the term of the mortgage within a reasonable period in relation to the type of land development normally financed under this program.

#### REHABILITATED MULTIFAMILY PROJECTS IN URBAN RENEWAL AREAS

Section 312 of the bill would amend sections 220 and 221 of the National Housing Act to permit FHA mortgage insurance under these sections to be made available for the purchase of multifamily structures which have been rehabilitated by a local public agency under the authority which would be provided by the proposed amendment (under sec. 504 of the bill) to section 110(c)(8) of the Housing Act of 1949. Mortgages to finance the purchase of the properties could also be insured under the new section 236 of the National Housing Act (proposed by sec. 201 of the bill).

Under the present law, FHA mortgage insurance for multifamily structures is available only in connection with properties which are newly constructed or substantially rehabilitated subsequent to the issuance of a commitment for mortgage insurance by FHA. This limitation, which would deny FHA mortgage insurance to multifamily properties rehabilitated under the proposed amendment to section 110(c)(8) of the Housing Act of 1949, would substantially impede the marketability of these rehabilitated properties.

There is no need to apply this standard FHA statutory limitation against insuring mortgages on existing multifamily properties, since the rehabilitation will be carried out by the local public agency pursuant to standards similar to FHA-financed rehabilitation and under requirements established by HUD in connection with the urban renewal program. Rehabilitation work performed by private contractors will also be subject to the same labor requirements as apply to FHA-financed work.

#### MISCELLANEOUS HOUSING INSURANCE

Section 313 of the bill would make five technical amendments to section 223 of the National Housing Act to permit refinancing of a FHA mortgage insured under any section or title of the National Housing Act as well as insurance of an FHA mortgage assigned to the Secretary or executed in connection with a sale of an acquired property under any section or title of the act. Under present law this authority is limited to specific sections enumerated in section 223, and must be amended each time a new section is added to the National Housing Act. It would also permit payment in cash of an insurance claim, instead of just debentures, in connection with a mortgage assigned to the Secretary or a mortgage executed in connection with the sale of an ac-

quired property. This latter amendment would make this provision consistent with the rest of the FHA program.

Section 313 would also amend section 223(d) to permit an insured project loan covering a 2-year operating loss to bear interest at the current rate in effect at the time of its insurance, instead of at the time of the original mortgage loan. It would also establish the debenture interest rate applicable to the insurance settlement on such loan at the rate in effect at the time the commitment to insure the loan was issued or the date the loan was endorsed for insurance, whichever rate is the highest.

Under the present provision, the loan covering the 2-year operating loss is limited to the interest rate of the original mortgage and the debentures issued in an insurance settlement on such loan bear interest at the same rate as those issued in connection with the original loan.

With the recent increase in interest rates, lenders have become extremely reluctant to grant a loan to cover a 2-year operating loss on a project where this additional loan is limited to the interest rate of the original loan. This amendment is necessary in order to make mortgage money available for this type of loan. These loans serve the essential function of providing a project that has experienced losses during the first 2 years of operation an opportunity to readjust its books and pay off the loss over the remaining term of the mortgage. This loan can mean the difference between success or failure for a project that has achieved a sustaining level of occupancy, but has accumulated an operating loss during its early years.

#### SUPPLEMENTARY LOANS FOR COOPERATIVE HOUSING PURCHASED FROM THE FEDERAL GOVERNMENT

Section 314 of the bill would amend section 213(j) of the National Housing Act to authorize mortgage insurance for supplementary loans to housing cooperatives which purchased wartime housing, covered by an uninsured mortgage for part of the purchase price, from the Federal Government. Where the mortgage on the property is dated more than 20 years prior to the date of the commitment to insure and the loan is for major rehabilitation or modernization, as determined by the Secretary, the loan may have a maturity date not more than 10 years in excess of the remaining term on the uninsured mortgage.

These supplementary loans could be made for the same purposes as supplementary loans made to cooperatives with mortgages insured under section 213—improvements or repairs to the property; community facilities necessary to serve the occupants; and financing for resales of memberships. The same terms would apply as to regular 213 cooperatives, except for the amendment with respect to the maturity of the loan.

The uninsured mortgages on these properties are now held by FNMA under its management and liquidating operation and carry interest rates far below those currently available. These cooperatives are unable to obtain conventional loans for the purposes for which a supplementary loan could be made without refinancing the mortgages so as to give the lender a first lien. FHA insurance of supplementary loans would provide financing for these desirable purposes without necessitating the refinancing of the entire mortgage at an unfavorable interest rate.

## EQUIPMENT IN NURSING HOMES

Section 315 of the bill would amend section 232 of the National Housing Act to permit the cost of major items of equipment needed to operate a nursing home to be included in the insured mortgage. Similar authority is presently provided for group practice facilities under title XI of the National Housing Act.

Major items of equipment such as hospital-type beds and other necessary hospital-type equipment and expensive X-ray and therapy equipment are essential items to the operation of a nursing home. Under present provisions, these items are financed independently of the FHA-insured mortgage under separate, short-term loans which bear interest at high rates. Because of the vital need for having the equipment to operate the project, a mortgagor encountering any difficulty in meeting loan payments is inclined to be more concerned with making payments on the short-term loans covering equipment items than in meeting mortgage payments, because the equipment will be removed if the loans are not maintained in a current status. This operates to the disadvantage of the mortgagee and the FHA because it may result in default under the mortgage which might not have occurred if the mortgagor had been able to finance the various equipment items under the blanket FHA insured mortgage with the advantage of the longer term and lower financing charges incident to the FHA mortgage financing.

Financing the equipment items under the blanket FHA insured mortgage would be desirable in another way. Under present provisions, the FHA has been faced with the problem of taking over nursing homes in which the equipment is not covered by the FHA-insured mortgage and is subject to chattel mortgages or conditional sales contracts. This has necessitated the FHA either paying off the existing loan on equipment located in the project at the time it takes over the project or buying new equipment to replace that taken over by the finance company.

The committee wishes to emphasize that this provision would apply only to costly, major items of equipment which are necessary to the continued operation of a nursing home, and not to such items as normal housekeeping equipment and items of furniture.

## FLEXIBLE INTEREST RATES FOR CERTAIN FHA INSURANCE PROGRAMS

Section 316 of the bill would amend Public Law 90-301 to permit the Secretary of Housing and Urban Development to establish a maximum interest rate, for three new mortgage insurance programs authorized by this bill, at the level which he believes necessary to meet market conditions. Public Law 90-301 provided authority to the Secretary, until October 1, 1969, to establish the interest rate ceilings on certain FHA insurance programs at such rates as he believes necessary to meet market conditions, without regard to the statutory ceilings applicable to those programs. This amendment, which would apply to the new programs of insurance for loans to acquire fee simple title by lessors (proposed under sec. 305) and the new program for supplemental loans for multifamily projects (proposed by sec. 308), as well as to the

authorization for mortgage insurance for nonprofit organizations under the new section 235(j) (1) (proposed in sec. 101), would be consistent with the intent of the Congress in passing Public Law 90-301.

#### SALE OF REHABILITATIVE UNITS IN MULTIFAMILY STRUCTURES

Section 317 would expand the category of rehabilitated units eligible under the section 221(h) program for sale to low-income families with mortgages bearing a below-market interest rate (presently 3 percent). Under present law, the blanket mortgage to the nonprofit sponsor must cover five or more single-family dwellings of detached, semidetached, or row construction. This section would reduce the minimum number of units to four and also make eligible, under a condominium ownership plan, projects involving four or more one-family units in a multifamily structure.

Under the section 221(h) program only deteriorating or substandard housing is eligible for rehabilitation and sale to low-income families. In many neighborhoods, however, such housing consists predominately of multifamily rather than single-family structures. The committee believes that this amendment would more effectively carry out the purpose of the section 221(h) program.

#### FHA INTEREST RATE CEILINGS

The committee considered a provision which would have removed statutory interest rate ceilings for FHA-insured mortgages and which would have authorized the Secretary of HUD to set interest rates at levels he found necessary to meet the mortgage market. Such a provision would also have operated to remove the present interest rate limitations on VA-guaranteed loans which are tied by statute to the rate for FHA insured home mortgages under section 203(b) of the National Housing Act.

Instead, the committee reported out similar legislation in connection with the recently enacted Public Law 90-301 which authorizes only a temporary waiver of statutory interest rate ceilings until October 1, 1969.

The committee felt that opportunity should be given for a comprehensive study of the entire subject of the availability of mortgage credit and interest rates before final action was taken. It authorized, therefore, appointment of a Commission to study these matters and report to the President and the Congress by April 1, 1969, in ample time for recommendations to be acted on with respect to the temporary waiver of the statutory ceilings. In case it is decided not to continue the Secretary's discretion in setting interest rates to meet the mortgage market, a provision was approved making the statutory ceiling for all FHA programs uniform by raising to 6 percent those ceilings presently below that figure.

The committee wishes to make it clear that if the Secretary's temporary authority is allowed to expire on October 1, 1969, any commitments to insure mortgages issued by FHA or Veterans' Administration prior to that date may be honored after that date at the same interest rate in effect at the time the commitments for insurance were issued.

## Title IV—Guarantees for Financing New Community Land Development

The purpose of this title is to aid private entrepreneurs in building well-planned new communities. These new communities can provide a new kind of urban living, one which offers a major alternative to the runaway, sprawled growth that threatens to overwhelm our metropolitan regions with costly and inefficient development. With support from this program, some of our urban growth can be channeled into wholly new communities that can provide homes, jobs, schools, and the best advantages for raising children; all in convenient proximity to each other.

Development of these communities would also provide needed additions to the general housing supply; provide opportunities for innovation in technology and land use planning; enlarge housing, employment, and investment opportunities; and encourage a diversified local homebuilding industry.

The title authorizes the Secretary of Housing and Urban Development to guarantee the bonds, debentures, notes, or other obligations issued by new community developers to help finance approved new community development projects. In making such guarantees the Secretary would take into account: (1) The large initial capital investment required, (2) the extended period before initial returns can be expected, (3) the irregular pattern of cash returns characteristic of such investment, and (4) the financial interests of the United States.

These guarantees should overcome the two major obstacles currently preventing greater private effort in this field. Because of their scale, new community development projects require large capital investments to acquire the necessary land and to install the basic facilities needed to ready the land for later development. For a large project, this capital requirement can call for borrowing at any one time of up to about \$50 million and raising such sums for this relatively new type of investment opportunity has proven extremely difficult. After the initial investment is made, there is an extended period during which planning and installation of site improvements is carried on. During this period, also, large expenditures for debt service, for general overhead, and for State and local taxes are required. These expenses (most of which must be incurred before building sites can be sold to generate income) can create insurmountable strains on the developer's financing.

The proposed guarantee program would go a long way toward resolving these difficulties by opening up to new community developers new sources of private capital willing to invest large amounts on favorable terms. With the security of Federal guarantees, large private investors (including those not interested in the usual mortgage investment field) would be willing to provide financing geared to the realities of internal cash flow in new community development projects. Terms for payment of principal and interest, for example, could take account of the time lag between initial expenditure and the start of cash returns from sales. Such financing would enable a developer to get through that critical initial period during which there is no return on investment. In the long run, of course, the development of a

soundly-conceived new community would produce the returns necessary to pay off the loans.

Accordingly, the guaranteed bonds, debentures, or notes could be issued in amounts large enough and for periods long enough to permit the financing of an entire new community. This is not to say that the obligations should in all cases be issued in such amounts. On the contrary, whenever a very large new community will be built in two or more major stages and where the completion of a major stage would in itself result in a site suitable for a self-sufficient, well-balanced community, an opportunity is presented, without diminishing the benefits of large-scale, well-balanced development, to test the market in stages and to minimize financial risks both to the developer and to the guarantee fund. Such opportunities should be taken.

Federal guarantees would cover the principal obligation on loans in an amount not to exceed the lesser of (1) 80 percent of the Secretary's estimate of the value of the property on completion of the land development or (2) the sum of 75 percent of the Secretary's estimate of the value of the land before development plus 90 percent of his estimate of the actual cost of such development. The bonds, debentures, notes, or other obligations of the developer would be taxable and would have interest, maturity, and repayment provisions satisfactory to the Secretary. The principal obligations guaranteed with respect to a single project could not exceed \$50 million, and the aggregate of outstanding principal obligations guaranteed under the title could at no time exceed \$500 million.

The maximum guaranteed loan amount is based in part on the Secretary's estimate of the "actual cost" of land development and in part on his estimate of the "value" of the land before development. The distinction between cost and value reflects awareness of the fact that much, and sometimes all, of the land that will underlie the new community will in many cases have been acquired well in advance of the application for the guarantee of development loans. It is neither practical nor fair to disregard substantial increases of value after land acquisition that took place well in advance of the application.

However, the committee is also aware that land valuation is not a precise science. Accordingly, to safeguard against excessive loans based on excessive land valuations, the bill would provide that only 75 percent of the estimated value of the land, as contrasted with 90 percent of the estimated cost of the site improvements, will be counted in calculating the maximum borrowings eligible for guarantee. Further, the committee intends that the greatest care be exercised by the Department of Housing and Urban Development in the valuation of land in carrying out this title.

In making an estimate of value to the greatest extent possible, reliance should be placed on recent actual prices in arm's length sales transactions of the land involved or of nearby comparable land. Also, while it is reasonable to disregard, as unrepresentative of present values, transactions made at considerably earlier periods when local land values were much lower, it is equally important that unusually high prices paid for remaining parcels needed to round out a site, or resulting from the guarantee application becoming known to sellers, be considered as unrepresentative of values of the site as a whole.

Similarly, while it is reasonable to take into account rising sales prices resulting from the influx or expected influx of population or of commerce or industry into the area, it is definitely not the intention of the committee that the valuation take into account the increased values resulting from the guarantee expected to be issued under this title, and the development made possible by that guarantee, as distinct from normal growth that would have been expected in any event.

The committee expects that land valuations under section 405(a) (4) (B) will be fully supported by all reasonably available data; and that in all cases, where land valuations exceed actual prices paid by the developer or paid in the latest arm's length transactions, the reasons for the valuation will be fully explained and documented.

It should also be noted that, in calculating the actual costs of land development for the purpose of determining the maximum guaranteed loan, the Secretary is authorized to include a reasonable allowance for profit on construction work if the new community development firm does the actual work itself or where there is other identity of interest between the new community developer and a construction contractor. This allowance should be based on normal practices of the marketplace.

To cover any liabilities incurred as a result of guarantees made under this title, a revolving fund would be established comprised of: (1) Fees and charges the Secretary would be authorized to collect; (2) recoveries under subrogation rights and other receipts obtained in connection with the guarantees; and (3) such appropriations as may be required for program operations, nonadministrative expenses, and making any payments under the guarantee. The full faith and credit of the United States would be pledged to payment of the guarantees. On or before January 1, 1970, the Secretary would make a report to Congress on the level of fees and other charges which he estimates would be adequate to provide income sufficient for a self-supporting program.

To be eligible for assistance, a proposed new community development project must be economically feasible; have a financing plan satisfactory to the Secretary; and have an internal development plan which: (1) Has been found consistent with approved comprehensive planning being carried on for the area in which it is located, (2) has received all governmental approvals required by State or local law or by the Secretary, and (3) provides reasonable assurance that the development will contribute to good living conditions and will include a proper balance of housing for families of low and moderate income.

The requirement that there be included "a proper balance of housing for families of low and moderate income" contemplates that there will be a substantial, and not a token, supply of housing for persons of low and moderate income. This is essential in order to obtain the intended benefits of the new community legislation. One of these benefits is to provide to consumers of all income levels an increased choice as to the type of their living environment, including one in which homes, jobs, shopping, schools, and other facilities are all in convenient proximity to each other. It will not be necessary in all cases to provide all types of housing and industrial and commercial facilities on the land which is being newly developed, since there will be instances where the

new community development is adjacent to an existing community. It is intended, however, that there be a good balance taking into consideration the area as a whole.

The potential benefits of the program are enormous. It would better enable the private housing market to offer to consumers of all income levels the choice of a new type of living environment, one in which homes, jobs, and schools are all near each other. Creation of such communities would be a major alternative to the ugly development that now threatens to overwhelm so much of our metropolitan regions. The program could also be used to help revitalize smaller communities which are some distance from metropolitan centers, giving them the basic advantages of new communities. This would help to strengthen regional economies and to stem the out-migration of people from our predominantly rural areas.

The program would also offer substantial assistance to the Nation's housing industry by releasing new sources of investment funds, meeting the land supply needs of builders, and creating opportunities for more efficient and economical housing and community development operations. Of particular importance is the fact that the development of new communities would provide a continuing supply of housing sites for small builders, who are presently experiencing difficulties in obtaining raw land and in financing basic improvements.

Small builders are often unable to compete with large subdivision developers in obtaining building lots needed by them for an orderly and efficient production schedule. While they will not have the resources to initiate the development of an entire new community, their participation in building within the community will be needed. This is so because the variety of construction types within the community will normally require a variety of special skills, including those of the small builder. Section 409 provides that the Secretary shall adopt such requirements as he deems necessary to assure that new community construction assisted under the title will encourage the maintenance of a diversified local homebuilding industry and broad participation by builders, particularly small builders.

Along with these benefits, new communities can offer a number of other important advantages, including a way to conserve more of the rapidly disappearing open lands in urban areas; a means of reducing the costs of needed public facilities, such as water and sewer trunklines (which are now helping to escalate local taxes); an opportunity to introduce new technologies and new ways of city building; and a positive way to encourage desirable metropolitan growth and to meet the needs and aspirations of those citizens who prefer to live in smaller cities.

To encourage localities to use Federal-aid programs in support of privately sponsored new communities, the title also includes a program of incentive grants. Under this program a community constructing certain federally assisted facilities to serve a new community development is eligible, in addition to the basic grant, to a supplementary grant covering an additional 20 percent of actual construction costs. The incentive grant benefits, however, would be limited to those new community projects which will make available a substantial number of housing units for low and moderate income persons. Also in no case

would the total Federal contribution to the cost of such community facilities exceed 80 percent of the total cost of the facility. The Federal programs which would be eligible for the additional grant assistance are the basic water and sewer and the open-space land programs of the Department of Housing and Urban Development and the water and waste disposal facilities program of the Farmers' Home Administration. Appropriations, not to exceed \$5 million for fiscal year 1969, and not to exceed \$25 million for fiscal year 1970, would be authorized for this program. These incentive grants should encourage local governments to supplement, where appropriate, the improvements made by the private developer. In administering this title, the Department of Housing and Urban Development should consult with the Department of the Interior to assure itself that each new community assisted under the title is so designed as to meet the requirements of Federal and State law then in effect respecting water pollution.

Other Federal programs, such as the section 701 urban planning assistance program, the public facility loans program, and the public works planning advance program would also be available, without any supplemental aid, for localities wishing to use them in support of new community development. Some minor amendments are proposed in these programs in order to permit their appropriate utilization.

In summary, this title's new community program would provide another choice in housing and community living for the additional 43 million Americans (including those of low and moderate income) that will be living in urban areas within the next 12 years. It would do this by giving support to the public-private partnership that has traditionally been called upon to achieve the Nation's objectives in housing, renewal, and urban development.

## **Title V—Urban Renewal**

### **NEIGHBORHOOD DEVELOPMENT PROGRAM**

Section 501 of the bill would add a new part B to title I of the Housing Act of 1949, which would authorize the Secretary of HUD to provide financial assistance to local public agencies to assist them in carrying out "Neighborhood Development Programs." A neighborhood development program would consist of urban renewal project undertakings and activities in one or more urban renewal areas that are planned and carried out on the basis of annual increments. The requirements governing these undertakings and activities would be similar to those governing the provision of Federal financial assistance for regular urban renewal projects now provided for under title I.

Under the existing urban renewal program, a community determines the boundaries of an area needing urban renewal. Then it applies for survey and planning funds to prepare a detailed plan for renewal of the area. Upon approval of the plan, Federal loans and grants become available to carry out the renewal activities set forth in the plan. This system has worked effectively in areas for which it is possible to prepare an urban renewal plan with assurance that the activities taking place over the several years following preparation of the plan can be expected to fit into that plan without serious change.

In recent years, many cities have found that it is not always best to deal with blight in terms of complete treatment of small areas one at a time. These communities have large residential areas with relatively evenly distributed deterioration and blight. The present urban renewal program, with its requirement for detailed and complete planning, is not structured to deal with these problems in the most effective manner.

A key element of the new neighborhood development program is its focus on the staging and timing of activities in order to achieve systematic accomplishments. The program will permit annual renewal activities that will result in net achievements in and of themselves. Under this system, there need be no real lag between the decision that an area is in serious physical condition and the beginning of actual activities to correct these conditions. It will permit more rapid and effective rehabilitation and development activities to take place on the basis of a broad plan specifying major land uses, density of development, and the public facilities proposed for the area.

Plans governing the physical activities would be flexible, and changed circumstances or needs would not require the scrapping of prematurely prepared detailed plans. Under this approach, rehabilitation activities can proceed along with public improvements, and detailed planning and scheduling of subsequent activities would proceed simultaneously with actual development in the area.

Under the neighborhood development program, the contract for loan or capital grant for the annual increment of a program could cover activities in several contiguous or noncontiguous urban renewal areas, and the funding would be based on the amount of loan and grant funds needed to carry out the activities planned during a 12-month period in each of the urban renewal areas contained in the community's program. Thus, it has the advantage of utilizing urban renewal funds to meet current activities, in contrast to the procedure under the present program of reserving funds several years in advance of needs. There would be no obligation to fund beyond the immediate 12-month period for which a contract has been entered into, but, if funds were available and a community's program was acceptable to the Secretary, the community could anticipate receiving financial assistance based on its needs for subsequent annual increments of its program. It would also be possible to reserve the funds estimated to be needed for the succeeding year when the contract for the present year is entered into.

Although there would be a computation of project cost at the end of each 12-month period, financial settlement at the end of the period may not be possible because of the inability in that period to dispose of all the land acquired during the year or to complete or place under contract all public improvements planned for that year. In such cases, any loans outstanding would be continued until all moneys due to be received under the contract for that year would be received, or, in the alternative, the carried over financial items may be merged with the financing for a subsequent increment. If the proceeds from land sold by the public agency and land retained by it for use in accordance with the urban renewal plan exceed the total project cost for any annual period, the local agency would be required to pay to the Secre-

tary two-thirds of the excess, or three-fourths in the case of a program on that grant basis.

Local grants-in-aid would generally be calculated as they are under the present urban renewal program. However, the determination of their eligibility would be based on whether their construction started no more than 3 years (under sec. 110(d)) prior to the authorization by the Secretary of the first contract for financial assistance under a community's program which includes the urban renewal area which is benefited by the public improvement or facility for which credit is claimed; or 7 years (under sec. 112(b) relating to colleges and hospitals) prior to the date of authorization by the Secretary of the first contract for financial assistance under the program which includes the urban renewal area which is benefited by the expenditures for which credit is claimed. A noncash grant-in-aid would only be eligible for inclusion in computing the gross project cost of a program for any 12-month period, if its construction has commenced and only to the extent of the amount actually expended or obligated by contract.

In addition, there would be a provision to prevent pooling of excess noncash grant-in-aid credits from a neighborhood development program with other urban renewal projects being carried out by a community. However, any excess grant-in-aid credit from regular urban renewal projects could be pooled for the benefit of a neighborhood development program. Also noncash credits which are in excess of what is needed for any annual increment would be available to be applied toward the local share of the cost of subsequent annual increments.

As for presently authorized urban renewal projects, a workable program for community improvement would have to be in existence (at the date of authorization of a contract for financial assistance for each annual increment); the present relocation requirements would apply to each annual increment, and the local approval and public hearing requirements would have to be met. Since planning and project execution activities in most cases would be taking place simultaneously especially in the early years of a program, the Secretary would be authorized to permit the urban renewal plan to cover one or more of the urban renewal areas embraced by a program and to allow the plan to meet such requirements as to scope and content as he deems appropriate, taking into consideration the degree of detail needed in the plan to carry out properly and expeditiously the activities and undertakings proposed in any annual increment.

This new program does not imply the elimination of the present urban renewal approach. It will remain available to localities wishing to use it. The present approach will still be essential for those projects where significant changes in land use require assurance that the project is planned and undertaken as a single enterprise.

The new program will provide communities with a means of more closely tying in their renewal activities with their capital improvement programing and the annual allocation of their budgeted resources to meet their most pressing needs. It will enable them to deal better with the large areas that must be handled as a totality so that needed public improvements can be installed early throughout the area while planning proceeds.

Families displaced from one portion of the area can be relocated into good housing provided for them in another part of the area. Many of these areas will be neighborhoods covered under the model cities program and the added flexibility provided by this approach should enable closer coordination of that program with the urban renewal program.

#### INCREASED AUTHORIZATION

Section 502 of the bill would increase the amount of grant funds available for urban renewal and other title I activities by \$1.4 billion on July 1, 1969. An increase of \$350 million in the amount of funds available for urban renewal projects in model cities areas is also provided.

The title I authorization covers urban renewal projects, urban renewal demonstration programs, code enforcement programs, demolition grants, relocation grants, rehabilitation grants, community renewal programs, and the neighborhood development program proposed in section 501. This latter increase would be available on the date of enactment of this bill.

This authorization, which would enable the present pattern of advance funding to continue, is essential to meet the existing and prospective demands for title I assistance throughout the Nation. The backlog of urban renewal applications on hand at the end of the last fiscal year included grant requests in excess of \$1.75 billion. The number of applications eligible for positive action was somewhat reduced by the imposition of more stringent requirements to meet program objectives by giving priority consideration to those projects which advance national goals responsive to the urgent needs of our cities. These goals are—

1. The conservation and expansion of the housing supply for low and moderate income families.
2. The development of new employment opportunities.
3. The renewal of areas with critical and urgent needs.

Nevertheless, it is now estimated that the backlog at the end of the current fiscal year will be approximately \$1.7 billion. Furthermore, based on the number of new communities to adopt workable programs for community improvement and their general practice of applying for urban renewal assistance, it is estimated that approximately 60 such communities will apply annually for title I grants.

This increased authorization, along with the increase in funds available for renewal activities in model cities areas, will enable greater efforts to be made to stop the insidious blight which is overwhelming the older neighborhoods of our cities. It will also permit increased efforts to preserve and increase the supply of low and moderate income housing, in accordance with the 10-year goal to eradicate substandard housing in the Nation.

#### REHABILITATION GRANTS

Section 503 would amend section 115 of the Housing Act of 1949 to increase the rehabilitation grant that can be made to low-income homeowners from \$1,500 to \$2,500 and make a technical amendment to authorize the payment of funds to otherwise qualified recipients for

rehabilitation work on their "real property" used for dwelling purposes.

The proposed increase in the maximum grant from \$1,500 to \$2,500 will materially serve to diminish the hardships for low-income homeowners, many of whom are elderly, who would be unable otherwise to undertake or complete rehabilitation of their property. Moreover, it will further contribute to a higher level of rehabilitation accomplishment and with it greater neighborhood stability in urban renewal and concentrated code enforcement projects areas. This assistance has been very useful in helping these homeowners retain their homes, when displacement would have been the only other alternative. However, the cost of rehabilitation has been such that \$1,500 has proven to be too low in many areas. The \$2,500 limit should better enable them to meet current costs for the types of rehabilitation usually required.

The substitution of the term "real property", for the term "structure" now contained in section 115, will also permit the use of grant funds for required rehabilitation relating to aspects of the property other than the dwelling structure itself, such as unsafe walks or driveways, or fences and other structures related to the dwelling, but excluding landscaping not essential to the continued occupancy of the structure.

This section would also expand the scope of the section 115 rehabilitation grant program so as to permit its use with respect to property which is in an area which the local governing body certified to the Secretary of Housing and Urban Development contains a substantial number of structures in need of repairs and improvements and which is scheduled for rehabilitation or concentrated code enforcement within a reasonable period of time. The repairs and improvements to the property would have to be consistent with the plan for rehabilitation or concentrated code enforcement. The present provision limits such grants to urban renewal and concentrated code enforcement areas.

Grants under the expanded authority could be made, through the utilization of local public agencies where feasible, to otherwise qualified owner-occupants to cover the costs of repairs and improvements necessary to make their dwellings conform to public standards for decent, safe, and sanitary housing. Grants could only be made, however, if there is a workable program in effect in the locality.

This authorization would provide needed assistance to low-income homeowners who live in blighted and deteriorating areas which are planned for rehabilitation or concentrated code enforcement in the near future, but who otherwise would be required to await financial assistance until rehabilitation and code enforcement activities can be undertaken. Provision of financial assistance at an earlier date will both alleviate hardship for the low-income homeowner and facilitate the execution of the planned urban renewal and concentrated code enforcement projects.

#### REHABILITATION IN URBAN RENEWAL AREAS

Section 504 of the bill would amend section 110(c)(8) of the Housing Act of 1949 to remove the present limitations on the acquisition and rehabilitation of residential properties by a local urban renewal

agency. Under present law a local public agency carrying out an urban renewal project may only acquire and rehabilitate, for demonstration purposes, structures containing no more than 100 units or 5 percent of the total residential units in the urban renewal area, whichever is less.

This authority, which was added by the Housing Act of 1961, has permitted local agencies to acquire a limited number of properties, and rehabilitate the property to show other property owners how their properties can be brought up to the standards of the urban renewal plan for the area. Once the property has served this purpose, it is sold by the local agency at its fair market value for private use.

To the extent that this authority has been used for demonstration purposes, it has been successful and useful. However, it has pointed up a further need in those urban renewal projects where substantial numbers of residential properties are capable of being rehabilitated, but the owners are either unwilling or unable to rehabilitate the properties themselves. This most often occurs with multifamily structures. In these cases, the local public agency has no choice but to acquire the properties and then attempt to find someone willing to purchase them and undertake the rehabilitation. Frequently such purchasers cannot be found and the property must be demolished.

Too often salvable properties are removed at a greater total cost to the Federal Government and the local public agency then would occur if the local agency were able to rehabilitate the property and then sell it for its market value. The proposed new authority should help to prevent this from occurring, and thereby preserve many otherwise useful residential properties. Permitting the local public agency to undertake rehabilitation on a larger scale should also bring about more efficient rehabilitation by allowing a large number of units to be worked on together under one contract, thereby hopefully reducing the cost of rehabilitation.

To permit purchasers of multifamily property, rehabilitated pursuant to this authority, to obtain FHA mortgage financing, section 312 of the bill would amend sections 220 and 221 of the National Housing Act to make such properties eligible as explained under section 312. Mortgages insured under the new section 236 of the National Housing Act (proposed by sec. 201 of this bill) could also be placed on these properties. These amendments should significantly assist in the provision of more adequate housing for families of low and moderate income.

#### DISPOSITION OF PROPERTY FOR LOW AND MODERATE INCOME HOUSING

Section 505 of the bill would amend section 107(a) of the Housing Act of 1949 to make it clear that urban renewal land may be disposed of for low as well as moderate income housing purposes and to permit this disposition to be done by lease as well as by sale. It would also permit land to be sold to a mortgagor qualified under the new FHA 236 program (proposed to be added by sec. 201 of the bill) and to nonprofit organizations under the new FHA 235(j)(1) program (proposed to be added by sec. 101 of the bill), as well as those organizations under FHA's 221(h) program, which will rehabilitate the property and sell it to low or moderate income families or individuals.

These amendments will make more useful the present provisions of this section by giving greater scope to its authorization to sell urban renewal project land at a lower price to encourage the provision of low and moderate income housing. This authority has been an important instrument in encouraging the provision of such housing in urban renewal areas. It will be even more important now when used in conjunction with the new neighborhood development program.

#### GRANTS FOR LOW AND MODERATE INCOME HOUSING IN OPEN LAND PROJECTS

Section 506 of the bill would amend section 103(a)(1) of the Housing Act of 1949 to permit grants to be made for urban renewal open land projects (which now only qualify for loans) in an amount not to exceed two-thirds of the difference between the proceeds from any land disposed of at its value for low or moderate income housing (pursuant to the provisions of sec. 107 of the act) and the proceeds which would have been realized if the land had been disposed of at its fair value without regard to the special provisions of section 107.

This provision supplements other provisions of this bill designed to achieve a substantial increase in the volume of low and moderate income housing. Obtaining sites for such housing developments is becoming increasingly difficult in many of our urban areas. This amendment will encourage local public agencies to make land within urban renewal open land projects available for the development of low and moderate income housing. At the present time, without Federal grant assistance, there is no incentive to the local public agency to sell the land at the lower price frequently needed if the land is to be used for low and moderate income housing purposes.

This amendment would place a local public agency, selling land within an open land project for low and moderate income housing purposes, on the same footing as a local public agency selling land for such purposes within other types of urban renewal projects. In these other projects, the difference in land receipts increases the projects cost by that much. This increase is shared two-thirds by the Federal Government and one-third by the local agency. Since no grants are presently permitted for open land projects, there is no way this difference can be shared. By authorizing a Federal grant for two-thirds of this difference, parity is established in this important area.

#### URBAN RENEWAL LOAN CONTRACTS

Section 507 of the bill would amend section 102(c) of the Housing Act of 1949 to permit a local public agency, with consent of the Secretary of HUD, to borrow funds to finance project undertakings on the private market at an interest rate in excess of the Federal lending rate set out in its loan contract with the Government. The full difference between the interest cost on the private market and the interest cost at which the local public agency could have borrowed from the Federal Government under its loan contract would be made up by a supplemental grant from the Government. A local public agency following this procedure, and thereby amending its loan contract for this purpose, would not be governed by the provisions of section 110(g) of

such act which require all loan contracts (originally executed prior to September 2, 1964) on their first amendment after that date to have incorporated in them a provision for periodic revision of the Federal lending rate.

This amendment is necessary to assure that local public agencies (whose loan contracts were executed prior to September 2, 1964, and have not been amended to provide for periodic revision of the interest rate) continue to secure their loan funds from private sources. Recent experience in the sale of preliminary loan notes indicates that interest rates on the private market may exceed the interest rates specified in the loan contracts of these local agencies, most of which were entered into prior to the present high interest rates. If that occurs, they would be precluded from borrowing on the private market and would have to seek their loan funds from the Federal Government. This eventuality would have an undesirable budgetary impact in terms of unanticipated loan disbursements and would place a severe strain on the limited urban renewal borrowing authorization for loans and advances. It is anticipated that the need for this authority would gradually disappear as these older contracts are completed or are amended for some other purpose, at which time section 110(g) would necessitate inclusion of a provision for the periodic revision of the interest rate (now every 6 months).

While the committee agrees that this amendment will be helpful in local urban renewal undertakings and has included this provision in the bill, the committee believes that LPA's, when borrowing in the private market, should obtain loans at the lowest cost possible. The committee, therefore, expects the Secretary to promulgate such rules and regulations as are necessary to assure that LPA loans are at the lowest interest rates available so that the Federal subsidy will be held to a minimum.

#### PROJECT COMPLETION PRIOR TO DISPOSITION OF CERTAIN PROPERTY

Section 508 of the bill would amend section 106 of the Housing Act of 1949 to add a new subsection (i) which would permit the Secretary of HUD to allow an urban renewal project to be closed out where: (1) Not more than 5 percent of the total acquired land remains to be disposed; (2) the local public agency does not expect to be able, due to circumstances beyond its control, to dispose of that land in the near future; (3) all other project activities are completed; and (4) the local public agency has agreed to dispose of or retain such land in the future for uses in accordance with the urban renewal plan. It would also amend section 110(f) of that act to include in the amount of land proceeds, for the purpose of computing net project cost, an amount equal to the value of this land not yet disposed.

In a number of instances, HUD reports that its experience has been that final closeouts of urban renewal projects have encountered substantial delays because of the problem of disposing of residual land (slivers), usually occasioned by minor but necessary plan adjustments, such as the realignment of a highway or other minor boundary adjustment. These delays have resulted not only in increased project costs, and therefore increased Federal grants (because of continuing

carrying charges and related local administrative costs), but additional administrative costs to the Federal Government as well. In order to stop these costs from running, this amendment would permit the value of the land to be included as part of land proceeds in the computation of net project cost and the final Federal grant made accordingly.

#### DEMOLITION GRANTS

Section 509 would expand the demolition grant program, authorized under section 116 of the Housing Act of 1949, to permit grants for the demolition of structures that constitute harborages or potential harborages for rats. Such grants are presently available to assist in demolishing only those structures which are structurally unsound or unfit for human habitation.

The present demolition program has been of great assistance to many cities in clearing out structures which are unsound and unfit for human habitation. These structures are often abandoned and if left standing can help to blight a whole block or neighborhood. Another serious problem involves structures, usually abandoned, which harbor rats or have a definite potential for rat harorage. Under present law, nonresidential structures in this category, which are not structurally unsound, cannot be demolished with assistance under this program.

While this amendment would permit the demolition with Federal assistance of a structure of this nature, whether residential or nonresidential, the committee feels that it should not be used on major structures such as large factories. This demolition could be carried out, as under the present program, on a planned-neighborhood basis or as part of a systematic rodent control program being undertaken in the neighborhood, and might well involve structures such as sheds and garages. It would be subject, however, to all the other present requirements of section 116. The committee expects the Secretary of HUD in administering this new authority to only approve the demolition of nonresidential buildings, which are considered to be rat harborages or potential rat harborages, when these nonresidential buildings are in close proximity to residential areas which would be affected by any rats that may be harbored in the buildings. The committee believes that this expansion of the demolition grant program will materially assist communities in carrying out their comprehensive rodent control programs.

#### AIR RIGHTS SITES IN URBAN RENEWAL AREAS

Section 510 would amend section 110 of the Housing Act of 1949 to authorize the carrying out of air-rights urban renewal projects, and the construction of necessary foundations and platforms, for the development of educational facilities. Under present law, these activities may be assisted only when they are for the provision of low or moderate income housing, or, if the site is unsuitable for such housing, for industrial development. As in the case of industrial development, an air-rights project, as well as the construction of foundations and platforms for any urban renewal project at project expense, could only be used for educational facilities if it was unsuitable for low

or moderate income housing purposes. The use of such sites for educational facilities could alleviate the difficulties being experienced by many communities in securing suitable locations for new schools.

#### INTERIM ASSISTANCE FOR BLIGHTED AREAS

Section 511 adds a new section 118 to title I of the Housing Act of 1949, under which the Secretary of Housing and Urban Development would be authorized to make grants to a city, other municipality, or county to assist it in taking interim steps to alleviate harmful conditions in any slum or blighted area of the community which is planned for substantial clearance, rehabilitation, or federally assisted code enforcement in the near future, but which needs some immediate public action until permanent action can be taken.

The committee has been concerned for some time about the plight of residents and property owners in slum or blighted areas which are planned for clearance, rehabilitation, or code enforcement. It is essential that there be a quicker response to the needs of the residents of these areas. The period between the announcement of planned community action and the time when work begins can be crucial to the viability of these areas. It is during this interim period that the supply of credit in the neighborhood ends, when there are no community improvements, and when further deterioration sets in. This section would permit the community to implement some of the needed public improvements to provide a suitable living environment.

This program would enable communities to undertake such immediate short-term actions as: (1) Repairing serious deficiencies in the streets, sidewalks, parks, playgrounds, publicly owned utilities, and public buildings located in the area to the extent needed to maintain or restore the basic livability of the area until permanent action can be taken (no new construction or major capital improvements would be permitted); (2) the improvement of private properties to the extent needed to eliminate the most immediate dangers to the public health and safety; (3) the demolition of structures deemed unsound or unfit for human habitation and which are a public nuisance and a serious health and safety hazard; (4) establishment of temporary public playgrounds on vacant land such as those lots which have been cleared of unsound structures; and (5) improvement of such public services in the area as garbage and trash collection and street cleaning.

The committee has also included a provision requiring the Secretary to encourage, wherever feasible, the employment of otherwise unemployed or underemployed residents of an assisted area in carrying out the activities and undertakings assisted under the section. In the types of areas in which this program will be undertaken, there exist not only problems of severe physical deterioration, but also numerous human and social problems, including inadequate employment of those living there. The committee believes that these residents should be given an opportunity to be employed in carrying out the federally assisted activities in the area and desires that the Secretary encourage this wherever feasible. The committee also recognizes that this type of employment would generally be of a temporary character and would not solve the employment problems of these residents. It therefore

also desires that the Secretary develop procedures, in consultation with the relevant Federal agencies, to assure effective utilization of Federal manpower and training programs in order to increase the general employability of the residents used in carrying out the assisted activities. The combination of these manpower and training programs and the employment provided under this program can hopefully lead to full-time permanent employment of these residents.

Grants could not exceed two-thirds of the cost of planning and carrying out an interim assistance program, except that three-fourths grants could be made to any community with a population of 50,000 or less according to the most recent decennial census. A community would have to have a workable program for community improvement to qualify for assistance, and relocation assistance and payments would be available to anyone displaced as the result of an interim assistance program. The contracts which the Secretary could enter into to make grants under this new authority could not exceed \$20 million in any fiscal year.

#### REHABILITATION LOANS

Section 512 would amend the rehabilitation loan program under section 312 of the Housing Act of 1964 so as to continue it until October 1, 1970. The program would also be expanded to permit its use outside urban renewal and code enforcement areas with respect to owner-occupied residential property in need of rehabilitation and in violation of local minimum housing codes. The property would have to be located in an area which the local governing body certified to the Secretary of HUD contains a substantial number of structures in need of rehabilitation and which is scheduled for rehabilitation or concentrated code enforcement within a reasonable time. The rehabilitation of the property would have to be consistent with the plan for rehabilitation or code enforcement. Loans could only be made if there is a workable program in effect in the locality.

This authorization, in conjunction with similar authorization for rehabilitation grants (proposed in section 503), would provide needed assistance to homeowners who live in blighted and deteriorating areas which are planned for rehabilitation or concentrated code enforcement in the near future. These homeowners should not be required to await financial assistance until rehabilitation and code enforcement activities can be undertaken. The period between announcement of planned community action and the time when work begins can be crucial to homeowners in these areas whose properties need rehabilitation. Provision of financial assistance at an earlier date will alleviate the hardship for the homeowner and should facilitate the execution of the planned rehabilitation and code enforcement projects.

#### LOW AND MODERATE INCOME HOUSING IN RESIDENTIAL URBAN RENEWAL AREAS

Section 513 would repeal the present requirement of section 105(f) of the Housing Act of 1949 that each urban renewal project which is to be redeveloped for predominantly residential uses must include a substantial number (interpreted as 20 percent or more of the units)

of standard housing units of low and moderate cost. It would substitute a requirement that a majority (over 50 percent) of the housing units provided in all urban renewal areas to be redeveloped for such residential uses and which receive Federal recognition after the date of enactment shall be standard housing units for low or moderate income families or individuals. This would permit the Secretary of HUD to apply the more stringent percentage on an aggregate basis, rather than on a project-by-project basis.

This amendment reflects the committee's concern that the present emphasis in urban renewal on the provision of housing for persons of low or moderate income be continued and reinforced, in view of the urgent need for housing at these levels. While the committee has noted with approval the priority which the Department of Housing and Urban Development has recently established for projects providing such housing, a stronger legislative mandate appears desirable. The existing statutory requirement that a substantial number of standard housing units at this level be included in each urban renewal project redeveloped for predominantly residential uses, with "substantial number" administratively defined to mean at least 20 percent of the units, inadequately reflects both current program requirements and the national need for such housing. The substitute provision, requiring a majority of the housing units provided in such areas to be standard units for low or moderate income families or individuals, is more clearly addressed to the urgency of this need. In order to avoid imposing the new requirement retroactively to some projects previously approved for planning, it would apply only to urban renewal areas receiving Federal recognition after its enactment into law.

#### NEIGHBORHOOD DEVELOPMENT ORGANIZATIONS

The committee considered a proposal to fund the operation of neighborhood development organizations through the Department of Housing and Urban Development for the purpose of promoting citizen involvement at the neighborhood level in determining the housing and urban development needs of the neighborhood and coordinating the efforts of the neighborhood residents with those of other public and private bodies in improving the neighborhood. It was decided that the most appropriate place to encourage such organizations would be in those areas in which a comprehensive model cities program was being carried out with assistance under the 1966 legislation. With this in mind, the committee does not believe that any further legislative authority is needed. The authority for supplementary grants to model cities agencies is broad enough to permit those agencies to use part of the supplementary grants made to them for the purpose of providing general operating support to a neighborhood development organization. We expect the Department of Housing and Urban Development to be sympathetic to the proposals of model cities agencies to so use supplementary grant funds, since financial assistance to this type of organization should be most helpful in effecting the statutory objective of widespread citizen involvement in model city demonstration programs.

## PREDOMINANTLY RESIDENTIAL URBAN RENEWAL PROJECTS

The committee considered an amendment which would have further restricted the use of Federal urban renewal funds for nonresidential projects. The amendment would have required that at least 65 percent of future urban renewal funds would be available for projects which are developed for predominantly residential uses. The committee rejected the amendment principally because of concern that such a rigid requirement would adversely affect the use of urban renewal in small cities of the Nation where nonresidential development is vital to the economic life of the community.

However, the committee subscribes to the direction and emphasis which the amendment implies. It is this kind of goal to which the Department should aspire.

The committee notes and approves the reorientation in the urban renewal program which has taken place under LPA letter 418 and which has resulted in more funds being allocated to projects predominantly residential in their reuse. The committee also approves the current policy of providing for a greater percentage of housing for low and moderate income families in urban renewal areas. The committee expects the Department to continue to give emphasis to predominantly residential projects which result in housing units for low and moderate income families. However, the committee feels that in the application of this policy, the Department should have enough flexibility to insure that this policy will not work to the disadvantage of communities in which nonresidential projects are essential to maintain adequate economic viability and to achieve a proper program balance.

## Title VI—Urban Planning and Facilities

### COMPREHENSIVE PLANNING

Section 601 of the bill would rewrite section 701 of the Housing Act of 1954, which authorizes assistance to States, localities, and other areas for comprehensive development planning. In addition to various technical and perfecting amendments, the changes include:

#### *Special Planning Assistance for District Planning Outside Metropolitan Areas*

A new category of assistance would be authorized for "district" planning in rural and other areas outside of metropolitan areas. The 701 program up to the present time has been oriented toward the planning and development problems of urban areas. Although much of the assisted planning has covered small town and semirural areas, and, for example, problems related to agricultural land uses have been considered where appropriate, grant assistance has not been available to assist planning for the coordinated development of resources and services in areas consisting of small towns and agricultural and other nonurban uses.

The new district planning would help preserve and better utilize the great human and economic investment in these areas. All too often, these areas have stagnated when a little foresight and planning

would permit establishment of viable and expanding communities. To reflect this change, the section 701 statement of purpose would be broadened to include reference to the planning problems resulting from outmigration from, and lack of coordinated development of, resources and services in rural areas. In addition, the present regional planning authority in section 701 would be revised to authorize separate planning programs for "regions," defined as including at least one metropolitan area, plus all or part of at least one other general-purpose unit of government; and for "districts," defined as including all or part of at least one county and of at least one other general-purpose unit of government, but not including any part of a metropolitan area.

Except for establishment of this specific statutory definition, there would be no change in the regional planning provisions of section 701. Up to two-thirds grants (or three-fourths grants in specified areas having special economic handicaps) would continue to be authorized both directly to regional planning bodies and to State planning bodies for assistance to regional planning.

With respect to planning for the newly defined districts, up to two-thirds (or three-fourths for areas with economic handicaps) grants would be authorized to be made, through State planning agencies, for assistance to district planning agencies. The district agency would have to be authorized, by or under State or local statutes or interstate compact, to carry on comprehensive planning for the district.

The assisted planning could be for the entire district or for towns or other appropriate areas within the district. Such planning could be carried out by the district planning agency itself or by the State planning agency acting for the district agency. Grants to States would be specifically authorized for the purpose of providing technical and other assistance for both interstate and intrastate planning agencies (including district and regional agencies).

The Secretary of Agriculture would have special statutory responsibilities with reference to the new district planning program. He would be authorized to provide technical assistance, with or without reimbursement, in connection with the establishment of the districts and the carrying out of such planning. The Secretary of Housing and Urban Development would, in turn, be required to consult with the Secretary of Agriculture before approval of any district planning grants made either through the State planning agency or directly to a district council of governments (authorized by an amendment to subsection (g)).

Conforming amendments would remove references to comprehensive planning as being for urban areas and needs.

*Demonstration Projects for Planning Metropolitan or Regional Systems of Public Facilities and Services*

Section 701(b) would be amended to make available, from section 701 appropriations, an additional \$10 million for studies, research, and demonstration projects. This subsection now authorizes the Secretary to expend up to 5 percent of the section 701 appropriations for projects for the development and improvement of comprehensive plan-

ning techniques and methods and the advancement of the purposes of the section.

It is intended that this \$10 million be used for demonstration projects in planning entire systems of public facilities and services. While the portion of the metropolitan area or the region which must be served by the entire system planned may vary with the type of public facility or service involved (i.e., water, sewer, solid waste disposal, library, etc.), the particular system being planned should serve all or so substantial a portion of the metropolitan area or the region as is necessary to obtain the intended cost and quality benefits of broad systematic planning.

The use of such large-scale facilities and services (and the resulting increased availability of special equipment and techniques) makes possible very important savings both in their installation and operation. It has, therefore, been one of the objectives of comprehensive planning, as assisted under section 701, to encourage metropolitan and other areas to provide needed facilities and services in this fashion, either through an agency having areawide responsibilities or through effective areawide cooperative arrangements. Generally, however, the 701 program has not assisted in the detailed studies and investigations (including, for example, systems analysis, cost-benefit evaluations, and other preliminary planning and engineering studies) needed fully to define the feasibility, scope, character, cost, and advantages of such systems. The proposed demonstration projects would provide valuable experience and further development in these new planning techniques and methods.

The assistance would be provided to agencies now eligible to receive planning grants under section 701 and would be limited to the same two-thirds (or three-quarters) grant ratio usually available under the section 701 program.

### *Comprehensive Planning Definition*

The definition of comprehensive planning would be revised to make specific reference to planning for the provision of governmental services (as well as for public facilities) and for the development and utilization of human and natural resources. However, comprehensive district planning could not include planning directed at encouraging industries to relocate from another area into the district.

### *Housing Elements as Part of Comprehensive Planning*

A new provision of the section 701 law would require all comprehensive planning to include specific planning for housing needs and required facilities, land use, zoning, and other relevant devices necessary to meet future population expansion stemming from existing and future migration growth.

This provision would require the section 701 comprehensive planning to include a housing element as part of the preparation of comprehensive land use plans. It does not, and the section 701 program cannot, control or direct the actions of local planning organizations, but this provision may perhaps influence localities in the direction of considering and helping to meet broad regional housing needs as part of local planning and land use.

### *Economic Development District Planning*

The present authority for three-quarters grants for planning in redevelopment areas would be brought up to date by providing such three-quarters grants also for planning in economic development districts designated under the Public Works and Economic Development Act of 1965. Because of the Department of Commerce's interest in assisted planning activities in economic development districts, the committee has inserted a requirement that the Secretary of HUD consult with the Secretary of Commerce before approving any planning grant which includes any part of an economic development district.

### *Indian Reservation Planning*

The present authority for Indian reservation planning would be revised to permit such grants to be made directly to tribal planning councils or other tribal bodies in all cases. Such grants may now be made directly to a tribal body only where no State agency is "empowered" to provide such planning.

### *Definition of Metropolitan, Regional, and District Planning Agencies*

The definition of these planning agencies would require that, to the greatest extent practicable, they be composed of or responsible to the elected officials of the unit or units of general local government for whose jurisdictions they are empowered to plan. A unit of general local government could include one established on an areawide basis. This requirement would not apply when State law provided otherwise.

### *Use of Private Consultants*

The committee has added to the preamble of section 701 a statement respecting the use of private consultants by State and local governments. This has been done to make it clear that the committee expects HUD to permit the judicious use of private planning consultants by State and local governments, where these governments deem it appropriate, in carrying out planning activities assisted under section 701. This action, however, is not meant to deny HUD the right to require a planning agency to have a reasonable percentage of the assisted work carried out by a professional staff in order to assure the continued effectiveness of the planning.

### *Councils of Government*

Regional and district councils of government, as well as those organized on a metropolitan basis, would be eligible for grants under section 701(g). These organizations, which are made up principally of the councilmen and similarly elected local officials of the municipalities and counties within these areas, can utilize these grants for undertaking studies, collecting data, developing areawide plans and programs, and engaging in other activities relating to the development of the area.

*New Communities*

Planning grants would be authorized to official governmental planning agencies for areas where rapid urbanization is expected to result on land developed, or to be developed, as a new community approved under the provisions of title IV of this bill. This is the same authority presently available with respect to new communities assisted under title X of the National Housing Act.

*New Authorizations*

Subsection (b) would be amended to provide for increased authorizations for carrying out this program. The present authorization of \$230 million is to be increased to \$265 million through fiscal year 1969, including \$20 million which may be used only for district planning grants. For fiscal year 1970 this authorization would be increased by an additional \$125 million. \$10 million of the amount available in fiscal year 1970 may be used only for district planning.

With this program, Congress has recognized the value of comprehensive planning as a basic prerequisite for the provision of a suitable living environment for every American family, that this planning is a responsibility of State and local governments, and that these governments require financial assistance to establish and support adequate planning organizations. Many of the resulting benefits—in terms of the savings and efficiencies from planned development—accrue to the Federal Government which annually invests millions of dollars, through its assistance programs, in urban facilities and activities.

The growth and interest in the urban planning assistance program reflects the expansion and intensity of usage of comprehensive planning at the State, metropolitan, and small-city level. From its inception in 1954, the 701 program has had a major role in establishing comprehensive planning as an accepted process for guiding and coordinating urban development. The number of different small communities receiving grants under the program has risen from 242 at the end of 1956 to 6,200 as of June 30, 1967. Metropolitan areas and urban regions receiving grants over the same period of time have increased from 23 to 247. Assistance for statewide planning was authorized by an amendment in 1959; by June 30, 1967, some 44 States had received grants for this purpose. Since authority was provided in 1965, grants to 27 councils of government have been made.

*Regional Commissions*

Planning grants would be authorized to the various regional commissions established under the Public Works and Economic Development Act of 1965 for comprehensive planning for the regions established under that act, or to State agencies or instrumentalities participating in such planning. This is identical to the present authorization in the law for such grants to the Appalachian Regional Commission.

## PLANNED AREAWIDE DEVELOPMENT

Section 602 of the bill would change the heading of title II of the Demonstration Cities and Metropolitan Development Act of 1966 from "Planned Metropolitan Development" to "Planned Areawide Development". In keeping with this change, it would permit the supplementary incentive grants, now authorized for certain federally assisted projects in metropolitan areas, to be made for such projects when carried out in any areas of the type for which metropolitan, regional, or district planning grants could be made under section 701 of the Housing Act of 1954 (as proposed to be amended by sec. 601 of this bill). To accommodate this program to the circumstances of the new rural planning districts (which could be established under sec. 601 of this bill) a requirement now in the law relating to such land use controls as zoning and subdivision regulations would be modified by stating that it would be applied where appropriate. In addition, this section would provide that any of the \$75 million authorized for supplemental grants but not appropriated for fiscal years 1967 and 1968 may be appropriated through fiscal year 1970.

Under the provisions of section 205 of the 1966 act, supplementary grants of up to 20 percent of the project cost, but not in excess of 80 percent when added to the regular Federal grant, may be made by the Secretary of HUD where it has been demonstrated to his satisfaction that: (1) Areawide comprehensive planning and programing provide an adequate basis for the location and scheduling of public facilities and land development and uses of areawide or interjurisdictional public significance; (2) adequate areawide arrangements exist to carry out such planned and coordinated development; and (3) public facility projects (whether federally aided or not) and land development or uses having a major impact on the development of the area are, in fact, being carried out in accord with comprehensive planning. Also, the applicant for the grant must demonstrate that it (or the unit of general local government where it is different body) is adequately assuring that public facility and other local projects are being and will continue to be carried out in accord with areawide planning and programing.

The projects for which supplementary grants may be made are—

(1) Grants for basic water and sewer facilities; administered by the Department of Housing and Urban Development under the Housing and Urban Development Act of 1965;

(2) Grants for the construction of libraries, administered by the Department of Health, Education, and Welfare under title II of the Library Services and Construction Act;

(3) Grants for the construction and modernization of hospitals and other medical facilities, administered by the Department of Health, Education, and Welfare under the Public Health Services Act (Hill-Burton Act);

(4) Grants for construction of sewage-treatment works, administered by the Department of Interior under the Federal Water Pollution Control Act;

(5) Grants for highway construction (Federal-aid primary and secondary systems and urban extensions, but not the Inter-

state System) administered by the Department of Transportation;

(6) Grants for airport development, administered by the Department of Transportation under the Federal Airport Act;

(7) Grants for urban mass transportation facilities and equipment, administered by the Department of Housing and Urban Development under the Urban Mass Transportation Act of 1964;

(8) Grants for acquisition and development of open space, for beautification and improvement, or for historic preservation, administered by the Department of Housing and Urban Development under the Housing Act of 1961;

(9) Grants for the acquisition and development of lands and waters for recreation purposes, administered by the Department of the Interior under the Land and Water Conservation Fund Act of 1965; and

(10) Grants for public works and facilities in redevelopment areas, administered by the Department of Commerce under the Public Works and Economic Development Act of 1965 (but only if they involve works or facilities of a type which the Secretary of Housing and Urban Development determines to be eligible under items (1) through (9)).

Communities are faced with overwhelming problems of growth. This continuing growth has strained to its limits the fiscal capacity of these communities, many of them rural in character only a few years ago. Growth has meant abrupt increases in taxes to pay for new transportation facilities, parks, hospitals, sewers, waterlines, and other public facilities. It is estimated that State and local governments will need to spend on the order of \$280 billion for public facility capital outlays over the next 8 years. Additional billions of dollars will be invested by private entrepreneurs for new housing, shopping centers, industrial buildings, and related urban development.

The areawide development grants will provide additional financial aid to the States and their communities. However, the real significance of this proposed continuation and expansion of the supplementary grant program is not so much the actual volume of financing provided, as the leverage it exercises to foster and reward the kind of well-planned and coordinated growth that maximizes and protects these capital outlays—by Federal, State, and local governments, as well as private enterprise.

#### ADVANCE ACQUISITION OF LAND

Section 603 of the bill would amend section 701 and rewrite section 704 of the Housing and Urban Development Act of 1965 to provide basic authority for a more efficient and effective program of Federal assistance to localities for the advance acquisition of land expected to be needed for public purposes. The changes made by this section would include the following:

(1) It would change the definition of eligible land from "land planned to be utilized in connection with the future construction of public works or facilities" to "land planned to be utilized in the future for public purposes".

(2) Require that the proposed use of the land be undertaken within 5 years except the Secretary could go beyond the 5-year

period if, due to unusual circumstances, he deems a longer period necessary and if he advised the Banking and Currency Committees of the Congress of this action.

(3) It would give the Secretary, as an alternative to his authority to require repayment of the Federal assistance if timely utilization is not made of the land or if it is diverted to other uses, authority to require substitution of equivalent land.

(4) It would provide for equivalent grant assistance, where land acquisitions are carried out without resort to borrowing. The amount of the grant would be based on the amount of reasonable interest charges the Secretary determines would have been required if the funds had been borrowed.

(5) It would permit the cost of land acquired under this provision to be considered as an eligible project cost for the purpose of any other Federal loan or grant program which provides assistance for land acquisition, and provide that assistance under this section will not render a project ineligible for other Federal assistance programs.

(6) It would clarify the permitted use of acquired land pending its intended utilization.

(7) It would clarify the authority of States to participate in the program.

The advantages of acquisition of land in advance of anticipated future needs have been recognized and, to some extent, realized by local governments in recent years. Such programs are particularly useful in efforts to control the urban sprawl which complicates the acquisition of lands needed for public purposes. They have also enabled local governments to secure lower prices for needed land through purchases made before extensive private improvement of the site. This approach recognizes that the value of desirable land needed for public purposes is likely to be greatly enhanced in the foreseeable future.

The committee considered an amendment which would have eliminated the present requirement in law that land acquired with assistance under this program be utilized for the purpose for which it was acquired within 5 years in favor of a requirement that such land would be put to its intended use within a reasonable period of time as determined by the Secretary of HUD. The committee does not believe that it is appropriate at this time to remove the 5-year limitation. However, it recognizes that there may be unusual circumstances that justify holding land beyond a 5-year period. These circumstances would most often arise in those types of cases where, because of a situation beyond its control, a community was unable to start construction of a building within the 5-year period, as it had planned. Occasionally, a community might have a very strong justification for planning to hold off utilizing the land until sometime after the general 5-year period and to refuse assistance to it would tend to jeopardize its ability to carry out a well thought out development program.

In the case of such unusual circumstances, the Secretary would be authorized to permit a holding period longer than 5 years if he determines it is in the public interest, but he would be required to make a prompt report to the Banking and Currency Committees of the Senate and the House of Representatives with respect to each determination.

This authority to make exemptions will be most useful, we understand, to those communities who have hesitated to use this program because of the concern that some unforeseen circumstance might arise which would prevent them from carrying out a planned development of the land within the 5-year period and thereby put them in jeopardy of being required to repay the grant. It should be noted, however, in all cases, 5 years would continue to be the maximum period for which interest assistance would be granted.

Limitations imposed on some Federal programs render projects having received other Federal assistance ineligible for additional assistance, or render the cost of land acquired with other Federal assistance ineligible as a project cost for such programs. These limitations are inconsistent with the purposes of this section and constitute unnecessary barriers to the realization of the benefits incident to the timely acquisition of land in advance of need. Consequently, the revised section 704 would provide that interest grants under this program would render neither the project, nor the cost of land, ineligible for assistance under other Federal programs.

The committee proposal recognizes that a comprehensive program of assistance for advance acquisition of land must take into account the financial capabilities and limitations of the participating localities. Many find it more appropriate at given times to use nonborrowed funds in carrying out advance acquisition programs. Accordingly, the revision provides for equivalent grant assistance for acquisition carried out without resort to borrowings. The grant would be based on the amount of reasonable interest charges the Secretary determines would have been required if the funds had been borrowed.

#### EXTENSION OF INTERIM PLANNING REQUIREMENTS IN WATER AND SEWER FACILITIES PROGRAM

Section 604 of the bill would amend section 702(c) of the Housing and Urban Development Act of 1965 by changing the date, before which a program for an areawide water and sewer system must be under preparation rather than completed from July 1, 1968, to October 1, 1969.

Section 702 of the Housing and Urban Development Act of 1965 requires the Secretary, before approving an application for a basic water or sewer facility grant, to find that the proposed project is consistent with a program for a unified or officially coordinated areawide water or sewer facilities system as part of the comprehensively planned development of the area. A special provision in section 702(c), however, permits approval of an urgently needed project during an interim period, prior to July 1, 1968, where the program for a coordinated areawide system is not completed but is under active preparation. To come under this special provision, the Secretary must find that the proposed project can reasonably be expected to be required as part of the program being developed.

Development of a comprehensive plan is a difficult and time-consuming process, especially in complicated multijurisdictional metropolitan areas. The shortage of planning personnel and—in some cases—necessity for State legislative action can all serve to delay the development of the requisite plans. Many engineering, land use, and

other decisions must be made, and there sometimes needs to be co-ordinated effort among several jurisdictions of local government. The 30-month time period which has been available to develop plans under existing law has proven to be too short.

The committee has been informed that failure to extend the deadline date of July 1, 1968, will require disapproval of projects for water and sewer facility grants in a large number of communities that will be unable to meet the full planning requirements by this cutoff date. At minimum, it is estimated that up to 50-60 percent of all urban areas will be disqualified for grants after that date. Because of the urgent need for water and sewer facilities in many of these areas, the committee believes that they should be given another 15 months to comply with the full requirements.

The additional 15 months for the interim requirements will provide the much needed time for communities to reach the level of planning needed to meet the intent of the full requirements.

#### INCREASED AUTHORIZATIONS FOR THE WATER AND SEWER FACILITIES, NEIGHBORHOOD FACILITIES, AND ADVANCE ACQUISITION OF LAND PROGRAMS

Section 605 of the bill would provide that any funds authorized but not appropriated for grants for the basic water and sewer facilities, neighborhood facilities, and the advance acquisition of land programs will remain available for appropriation through fiscal 1970. The present authorization for these programs expires with fiscal year 1969.

In addition there would be authorized to be appropriated for fiscal year 1970 not to exceed \$115 million for grants under the section 702 basic water and sewer facilities program.

Continued urbanization and industrialization have created an unprecedented demand for basic water and sewer facilities and Federal assistance to meet this demand. The demand for neighborhood facilities to help communities provide proper centers for the provision of needed health, recreational, social, and similar community services in low and moderate income neighborhoods has also increased. The demand for grants under the advance acquisition program is expected to increase sharply with the modifications proposed in section 603 of the bill.

To help meet these needs, the unused authorization for appropriations that would otherwise expire on June 30, 1969, would remain available through June 30, 1970. This would provide \$400 million, when the \$115 million in additional authorization is added in, for the water and sewer program, \$101 million for the neighborhood facilities program, and \$95 million for the advance land acquisition program that could be appropriated for fiscal year 1970, if the budget requests for fiscal year 1969 are fully funded.

#### OPEN-SPACE LAND PROGRAM

Section 606 of the bill would convert the funding provision for grants under the open-space land program from authority to enter into contracts to a regular authorization for appropriations. It would

increase the authorization for such grants by \$150 million on July 1, 1969. The amount of grant funds that may be used during any fiscal year for studies and the publishing of information would be increased from \$50,000 to \$125,000, and the present sublimitations for grants for open-space land in built-up areas and for urban beautification and improvement would be eliminated.

Extension of this program is essential if the Federal Government is to continue to provide a decisive impetus to State and local open-space programs. The importance of the Federal open-space land program extends far beyond the amounts approved for assistance in acquiring and developing 237,000 acres of land through fiscal year 1967. It has encouraged State and local governments to plan and execute local programs that might not otherwise have been undertaken. As an indication of this, 17 States have approved bond issues for open-space purposes totaling more than \$1.25 billion since 1960. Local governments have also approved bond issues or otherwise spent millions of dollars in recent years for open-space projects.

Continuation of the program will allow a further benefit to taxpayers by facilitating the purchase of open-space land substantially in advance of intense pressures for urbanization. Early acquisition is an important factor in reducing program costs, particularly as the Department of HUD is encouraging the purchase of open-space land closer to urban development.

At the beginning of fiscal year 1968, applications for \$169 million were on hand. Requests for an additional \$123.5 million are anticipated during the current year. As more local communities establish open-space programs, requests for assistance will accelerate. Continuation of the program is therefore essential.

An increase in the amount of grant funds that can be used for studies and publications from \$50,000 to \$125,000 will provide invaluable assistance in developing criteria and providing information on new techniques and concepts to assure the most efficient and economical ways to conserve open-space land. To give more flexibility in funding the several components of the open-space land program, the language of the proposed authorization eliminates the present sublimitations, except studies.

#### AUTHORIZE THE MAKING OF FEASIBILITY STUDIES IN THE PUBLIC WORKS PLANNING ADVANCES PROGRAM

Section 607 of the bill would clarify the authority of the Secretary of HUD under section 702 of the Housing Act of 1954 to make advances for the conduct of feasibility studies regarding specific public works, the planning of which may be assisted under section 702.

Feasibility studies are engineering evaluations to determine whether a proposed public works project can be developed within existing technical and economic limitations. It may include such facets as site examination, field surveys, preliminary sketches and plans, soil tests, and cost and economic analyses. Such studies are often more vital than specific plans and specifications, because they help a community consider a projected public facilities project in terms of specifics regarding costs and problems to be encountered. In effect, they help a

community to make decisions regarding major and expensive undertakings before commitments are irrevocably made.

The public works planning advance program is used primarily by small communities; more than 48 percent of past advances have been to communities with populations under 5,500, and more than 86 percent to communities with populations under 50,000. Such communities often have little revenue flexibility and no funds for financing the type of planning required by feasibility studies. Without such a study it is very difficult for a small community to understand the exact nature of a proposed project and to gain the popular support needed to raise the necessary funds. Also, projects undertaken without such preliminary investigations may result in irrevocable errors, which cannot be corrected in final designs.

Although section 702 attests to the importance placed on advance planning for public works, it does not explicitly state that advances for feasibility studies are authorized. The proposed amendment would eliminate any possible ambiguity in the present statute and expressly allow advances for such studies.

## **Title VII—Urban Mass Transportation**

### **GRANT AUTHORIZATIONS**

Section 701 of the bill would increase the authority for appropriations by \$190 million for fiscal year 1970 for the urban mass transportation program. The amount of funds which may be used for research, development and demonstrations under section 6 of the Urban Mass Transportation Act of 1964 would be increased by \$6 million on July 1, 1968.

The present fund authorization expires June 30, 1969. It is anticipated that practically the entire authorization will have been appropriated by that time. The need for continued support for mass transportation systems is clear. A recent survey of urban mass transportation capital program plans in 11 major metropolitan areas with about 43 percent of the population of all SMSA's revealed an aggregate 10-year projection of approximately \$10.9 billion in capital financing needs. In nearly every metropolitan area surveyed, transit planning officials pointed to the need for increased Federal aid.

The first capital grants under the program were made in February 1965. Since that time, the rate of new applications has risen from approximately \$100 million in 1966 and \$200 million in 1967 to nearly \$300 million. New large-scale transit development and improvement programs are being announced more frequently than in the past, and requests for Federal assistance may reach \$600 million in fiscal year 1970. Funding through fiscal year 1970 is therefore essential.

Section 6 of the Act provides for a program of research, development, and demonstration projects in all phases of urban mass transportation which will assist in the reduction of urban transportation needs, the improvement of mass transportation service, or the contribution of such service toward meeting total urban transportation needs at minimum cost. A \$25 million program for research, development, test and evaluation of new systems of urban transportation is

proposed, based on the preliminary findings of the new system study program authorized by the Congress in 1966, and will lay the groundwork for implementation of the program to be recommended in the report on that study.

To allow for the \$25 million research, development, and demonstration program level in 1969, the present sublimitation of \$50 million for the section 6 programs would be increased to \$56 million on July 1, 1968. This increase would provide \$23.5 million in unused authorization under section 6. The balance of this program will be funded under the \$3 million authorized annually by section 11 of the act for grants to public and private nonprofit institutions of higher learning for theoretical and practical research, and for training persons for research and employment, in urban transportation.

On or after July 1, 1969, the Secretary would be authorized to use for research, development, and demonstration activities such sums as he deems appropriate out of the grant funds available under the general grant authorization contained in section 4(b) of the 1964 act.

#### DEFINITION OF MASS TRANSPORTATION

Section 702 of the bill would broaden the statutory definition of "mass transportation" in section 12(c) (5) of the Urban Mass Transportation Act of 1964. The purpose of the broadened definition would be to allow greater flexibility in developing and applying new concepts and systems in urban mass transportation programs. The existing definition of "mass transportation" applies to all of the programs in the Urban Mass Transportation Act of 1964 and requires that such transportation serve the "general public" and operate "over prescribed routes." In the light of recent and pending advances in the field of mass transportation research and technology this definition has become unduly restrictive. It would be replaced by a requirement that the transportation provide to the public general or special service (excluding schoolbuses or sightseeing or charter service) on a regular and continuing basis.

The committee does not believe that as a result of this change in definition there should develop a diversion of emphasis away from normal capital grants in projects operating over prescribed routes, and the committee prefers that wherever possible established carriers should be used.

Section 6(b) of the 1964 act directs the Secretary to "undertake a project to study and prepare a program of research, development, and demonstration of new systems of urban transportation". Under this project a number of new concepts and innovations which have a high potential for eventual improvement of urban mass transportation are being developed, but the present restrictive definition does not allow the Secretary to assist State and local governments in utilizing them. For example, the "prescribed route" clause would restrict the Secretary from giving assistance to projects such as a computer-aided "small bus" system, which ultimately could pickup passengers at their door and deliver them at their desired destinations while picking up and dropping off other passengers going in the same general direction. The computerized routing in this type of operation would not be "prescribed" but would depend upon where passengers wanted

to be picked up and dropped off. Many of the dual mode systems would also be excluded. These are systems capable of operating over two different types of rights-of-way, one an exclusive right-of-way such as a railroad track or other fixed guideway automatically controlled and the other the local street network controlled by individual driver-passengers. Particularly in the case of the small dual mode systems, the street portions of the travel would not be over "prescribed" routes.

There are also a number of instances where it may be beneficial and in the public interest to provide capital grant assistance to mass transportation service which would serve only a specific portion of the public rather than the "general" public. For example, special service from ghettos to specific places of employment, limited to those riders who work there and coordinated to shift changes, or special service from elderly housing developments to hospitals and clinics. These services might require additional buses which the transit system involved could not afford to provide without Federal aid. Under the present law Federal assistance for such programs is not available.

#### EXTENSION OF THE EMERGENCY PROVISION OF THE URBAN MASS TRANSPORTATION PROGRAM

Section 703 of the bill would extend the emergency provisions of the mass transportation program until July 1, 1970.

The present provisions of section 5 of the Urban Mass Transportation Act of 1964 expire on November 1, 1968. It is proposed to extend the expiration date until July 1, 1970.

Section 5 authorizes 50 percent Federal grants for mass transportation facilities and equipment in urban areas not yet able to meet full areawide comprehensive planning and programing requirements. These emergency grants are in place of two-thirds Federal grants available when all comprehensive planning requirements are met.

Unless this interim program is continued, many areas will be cut off from receiving mass transportation assistance. Some of these are large metropolitan areas (such as Denver, Detroit and New York City), where areawide planning is particularly complex and time consuming. Others are smaller in size but have only recently commenced the required planning. These areas, which cannot yet fulfill the complete areawide comprehensive planning and programing requirements of the urban mass transit program, should not be denied the assistance available under the emergency program.

It is important to note that this program, though it waives the stricter planning requirements, retains provisions to assure that planning is underway and that there is a basis for judging whether a proposed transportation project will be consistent with subsequent completed plans. The lesser planning requirements minimize any possible risk of aiding projects that will not conform to locally decided urban development and transportation objectives.

#### NONFEDERAL SHARE OF NET PROJECT COST

Section 704 of the bill amends both section 4(a) (long-range program, two-thirds grant) and section 5 (emergency program, 50-percent grant) of the Urban Mass Transportation Act of 1964 to permit

any public or private transit company to provide up to 50 percent of the local share of the net project cost of a mass transportation project. This payment could be made out of undistributed cash surpluses, replacement, or depreciation funds or reserves available in cash, or new capital.

The purpose of this amendment is to clarify and implement the declaration contained in section 4(a) of the Urban Mass Transportation Act of 1964, as amended, that programs authorized by the act shall encourage to the maximum extent feasible the participation of private enterprise. It specifies that 50 per centum of the non-Federal share of the net project may be provided from other than public sources. Transit system funds, however, which are used for this purpose may be provided only from undistributed cash surpluses, replacement or depreciation funds or reserves available in cash, or new capital. They may not be provided from revenues, including the proceeds of indebtedness payable out of future revenues, that are otherwise needed or would otherwise be used to meet operating costs of the system. This restriction applies to public, as well as private, transit system funds.

An exception to the 50-percent limitation to finance the non-Federal share of net project cost is provided for in situations where the State or local public body or agency applying for assistance is fiscally unable to put up any portion of the local share. In such cases of fiscal inability, up to the full amount of the non-Federal share may be provided by local public or private transit systems. However, fiscal inability of the applicant must be clearly demonstrated with data satisfactory to the Secretary which affirmatively and clearly demonstrates that the applicant is in fact financially unable to provide the local share and such information will be available to the public prior to the Secretary making the determination. Obviously a mere certification by the applicant will not of itself be sufficient. Also, the applicant State or local public body or agency must be actively engaged in the preparation and effectuation of a unified or officially coordinated urban transportation system as part of the comprehensively planned development of the urban area.

Net project cost is defined in the basic law as that portion of the cost of a project to be assisted which cannot be reasonably financed from revenues, not more than two-thirds (or 50 percent in the case of emergency grants) of which may be paid by a Federal grant.

The committee expects the Secretary to avoid unreasonable profits to private companies through this proposed change in the law. Where private companies are involved, the Secretary, in both the establishment of net project cost and in determining the amount of the Federal grant, should have available to him a full disclosure of assets, liabilities and projected revenues of the system operations so that private capital may be attracted to this program without adding an extra burden to the Federal Treasury.

### **Title VIII—Secondary Mortgage Market**

This title would make changes in the statutory provisions affecting the Federal National Mortgage Association and its functions in the secondary mortgage market. The principal change would be the fulfillment of congressional intent expressed 14 years ago in section

303(g) of the Federal National Mortgage Association Charter Act, "to transfer to the owners of the outstanding common stock of the association the assets and liabilities of the association in connection with, and the control and management of, the secondary market operations of the association under section 304 of this title in order that such operations may thereafter be carried out by a privately owned and privately financed corporation."

The Committee feels that FNMA's secondary market operation has proven economically sound and capable of being financed solely from private sources. The current Federal capital contribution to FNMA, represented by outstanding preferred stock held by Treasury, totals about \$142 million, and would be retired as soon as possible after the effective date of the title. The common stock, of which about \$127 million is presently outstanding, would be changed from nonvoting to voting and from \$100 par value to no par value and would be freely transferable. After a transitional period of 2 to 5 years, the common stockholders would control the board of directors.

The privately owned corporation would be given new financing mechanisms which could be used, in connection with existing methods, for the retirement of the Treasury-held preferred stock and the financing of its operations. The committee expects that the privately owned corporation, with its improved financing methods, will add a significant impetus to the flow of funds in the secondary market and the availability of credit in the home mortgage market.

The present Federal National Mortgage Association would be partitioned, on an effective date to be established by the Secretary of the Department of Housing and Urban Development but not later than 120 days after enactment, into two separate corporations. The special assistance and management and liquidating functions would remain in the Department of Housing and Urban Development and be operated through a corporation to be known as Government National Mortgage Association (GNMA) and would remain substantially unchanged. The other corporation, which will become entirely privately owned and which will operate the secondary market operations, would be known as Federal National Mortgage Association (FNMA). The new FNMA would be a "Government-sponsored private corporation," regulated by the Secretary of the Department of Housing and Urban Development, and would have a status analogous to that of the Federal land banks and the Federal home loan banks.

The new FNMA's secondary market dealings would continue to be limited to mortgages insured or guaranteed by FHA or the Veterans' Administration, or by the Farmers Home Administration under title V of the Housing Act of 1949, but present restrictions against buying mortgages in excess of par and against buying mortgages offered by, or covering property held by, State and local instrumentalities would be removed. In addition, the purchase authority of FNMA would be expanded to include certain mortgage-backed securities guaranteed by GNMA (as authorized by this title) so that, if necessary, FNMA could act to supplement the secondary market for such securities. The committee feels that if such securities become well enough established so that many private issuers are issuing them, they could constitute a significant factor in attracting investment funds to the field of mortgage investment.

## FINANCING OF SECONDARY MARKET OPERATIONS

## A. BORROWING

Existing forms of obligations would be retained (debentures and short-term discount notes), but the Secretary would be given power to increase and thereby make flexible the debt-to-capital ratio for FNMA, now fixed by statute at 15 to 1. This flexibility would be particularly helpful in times when FNMA's net purchasing rate greatly exceeds the rate by which its capital is increasing, and where in the judgment of the Secretary FNMA's financial strength was adequate to justify increasing the ratio.

Two other forms of borrowing authority would be provided. First, FNMA could also issue and market subordinated obligations, in a manner similar to the current issuances of "capital notes" by banking institutions. These obligations would probably be issued on a long-term basis, perhaps 15 to 25 years, and could include provisions for their convertibility into common stock. These obligations would be subordinated to all the obligations of the corporation outstanding and to be outstanding. For this reason, the amount raised by these issues would be considered to represent capital for the purposes of the debt-to-capital ratio. FNMA would be authorized to issue such subordinated obligations up to twice the sum of its capital, surplus, and retained earnings. These obligations could be issued to assist in financing the retirement of the preferred stock or the operations of FNMA.

Secondly, FNMA would be authorized to issue and market securities backed by earmarked pools of portfolio mortgages, and this authority would not be subject to any ratio limitation. Of course, such securities and obligations could not be issued in greater principal amount than the aggregate principal amount of the mortgages pooled, all of which would be Government guaranteed or insured. GNMA would be authorized to guarantee the payment of principal and interest on any such securities issued by FNMA. GNMA could also guarantee similar securities issued by other private issuers approved by it for this purpose, so long as the securities are backed by mortgages or loans guaranteed or insured by FHA or the Veterans' Administration, or by the Farmers Home Administration under title V of the Housing Act of 1949, and set aside or subjected to a trust in a manner similar to that established by FNMA. GNMA would be authorized to collect at the time of the guarantee a reasonable guarantee fee and other charges. In the event of the necessity of any payment under the guarantee, GNMA would become subrogated to the rights satisfied by the payment.

Similar authority for FNMA was provided in S. 2700 approved by the Committee last year and the proposal has continued to receive strong endorsement in hearings this year. The committee believes that these securities could have greater liquidity than the mortgages backing them and can be expected to attract sources of investment funds which do not ordinarily invest in the mortgage market, such as pension funds and retirement funds.

The present authority for FNMA to borrow from the Treasury would be retained, even after all of the preferred stock has been retired.

Use of this "backstop" authority by FNMA after retirement of the preferred stock is not anticipated, however, except in case of emergency. This authority has been used in the past solely as a "line of credit," but this routine use would not be continued after retirement of the preferred stock. The existence of this backstop authority, which is similar to that of the Federal home loan banks, would tend to enhance the corporation's credit standing and would constitute Government recognition of the significance of the corporation's operations to the national interest aspects of the mortgage financing industry.

#### B. COMMON STOCK

FNMA would be authorized to issue common stock in addition to that now required to be issued in connection with its purchasing and lending activities. For the purpose of encouraging the users of FNMA's services to develop and maintain their interest in and control of the corporation, each servicer of mortgages for FNMA would be required to own at all times a minimum amount of FNMA common stock. This minimum amount would be not more than 2 percent of the outstanding principal balances of all mortgages owned by FNMA and serviced by the servicer, but this requirement would not apply with respect to mortgages purchased by FNMA before the effective date of this bill. The present 5-percent dividend limitation applicable to the common stock would be repealed, and cash dividends could not exceed a rate determined by the Secretary of HUD to be a fair rate of return.

### CONTROL OF FNMA

#### A. TRANSITIONAL PERIOD

The bill would provide for a 2- to 5-year transitional period during which direct control over the activities of FNMA would be transferred from the Secretary of HUD to the common stockholders. During this transitional period, the board would consist of nine members. The Secretary of HUD would appoint all nine members for the first year. For the second year, he would appoint seven members, and the stockholders would elect two. For the remainder of the period, he would appoint five members and the stockholders would elect four. The president of the corporation would be appointed during the transitional period by the President of the United States, subject to confirmation by the Senate, and the Secretary would be required to include him as one of his appointees to the board of directors.

The transitional period would end at such time as one-third of the common stock is owned by persons or institutions in the mortgage lending, home building, real estate, or related businesses, but not sooner than May 1, 1970, nor later than May 1, 1973.

#### B. POST-TRANSITIONAL PERIOD

After the transitional period, the board of directors of FNMA would consist of 15 members, one-third of whom would be appointed by the Secretary and the remainder of whom would be elected by the stockholders. The appointments and elections would be for 1-year

terms only. The Secretary would be required to appoint, as members of the board, one person each from the home building, real estate, and mortgage lending industries. All directors would be removable by the President of the United States, but only for good cause shown. The board would have full power and responsibility for the policies of the corporation, subject only to the provisions of laws passed by Congress and regulations of the Secretary.

The Secretary would have general regulatory powers over FNMA to assure that the purposes of the charter act are served. The issuance of all securities or obligations by FNMA would have to receive the prior approval of the Secretary. Through this and other authority, the Secretary would participate in the decision making process as to the level of mortgage purchases at various times. In addition, the Secretary could require that a reasonable portion of FNMA's mortgage purchases be related to housing for low and moderate income families, but with reasonable economic return. These mortgages could involve, for example, those insured under the proposed section 235 homeownership program and the proposed section 236 rental and cooperative housing program, or those insured under the proposed section 237 credit assistance program. These mortgages would bear interest at the market rate.

It is the intent of the committee that the regulatory powers of the Secretary will not extend to FNMA's internal affairs, such as personnel, salary, and other usual corporate matters, except where the exercise of such powers is necessary to protect the financial interests of the Federal Government or as otherwise necessary to assure that the purposes of the FNMA Charter Acts are carried out.

Audit of the corporation could be performed by the Secretary of HUD. In addition, before all of the preferred stock is retired, FNMA would be considered to be a wholly owned corporation for the purposes of the Government Corporation Control Act and would be subject to audit by the General Accounting Office. After retirement of the preferred stock, GAO examination of the financial transactions of FNMA would continue so long as there are outstanding any of FNMA's obligations which are guaranteed by GNMA. This provision is included so that the contingent liability of the Government in connection with the GNMA guaranty could be protected.

The committee feels that adequate safeguards have been provided to assure that the privately owned FNMA will continue the secondary mortgage market operations in a manner consistent with the best interests of the public. Control over the board of directors could not be transferred before May 1, 1973, until at least one-third of the common stock of the corporation was owned by persons or institutions whose self-interest (as members of industries concerned with housing and housing credit) is consistent with the national interest that there be an adequate flow of residential mortgage credit. This proportion is likely to be maintained and then increased since common stock must be purchased in connection with lending, purchasing, and servicing activities. Moreover, one-third of the board would be appointed by the Secretary and all would be removable for good cause by the President of the United States. Finally, the Secretary's regulatory power over FNMA would be sufficient to protect against abuses of the public interest.

## PARTICIPATION CERTIFICATES

The bill also provides that GNMA, which would continue the function of trustee under trusts created for sales of participation certificates, could issue such certificates for refinancing purposes. These certificates, issued to refinance certificates already approved in appropriation acts, would not be subject to the requirement of further approval in appropriation acts.

This amendment would permit the cost to the Government to be reduced through increased flexibility in management of the trusts. For instance, when original issues are sold with maturities shorter than the maturities of the pooled obligations, the early maturities could be refinanced by a sale of "rollover" certificates. Any appropriation for insufficiencies accompanying the original authorization would apply as well to any rollover sale as to the original sale.

## SPECIAL ASSISTANCE AUTHORIZATION

This title would also provide for an increase of \$500 million in special assistance authority to become available on July 1, 1969. GNMA would use this authority, under the direction of the President, to continue purchases of mortgages underwritten by the Government which require special assistance. The present revolving authority would be increased by \$525 million on July 1, 1968 under existing law.

Although there would be no new statutory requirement on the use of these funds by the President, the committee approved the additional funds primarily for the use by GNMA in the purchase of section 221(d)(3) below-market interest rate mortgages. One purpose of the new section 236 program is to develop a new rental program for lower income families as a replacement for the existing section 221(d)(3) BMIR program. However, the committee recognizes the necessity for a smooth transition from the older program to the new program without a lapse of authority which could do damage to the President's plan for stepped-up activity in the field of new construction for housing for lower income families. The committee is mindful of the practical difficulties of getting a new program rolling; that is, the long lead time it takes to prepare regulations, allocate the funds, educate the local sponsors and builders and finally produce specific projects to receive the benefits of the new subsidy program. The section 221(d)(3) BMIR has hurdled all of these obstacles and it is now a going program. The committee wants to assure that it will continue to be a going and effective program until the new section 236 program has reached the same degree of efficiency. The additional special assistance fund of \$500 million would be used to provide the backup support for the program necessary to carry out this objective. It is understood, of course, that the President could use these funds as needed, along with the present special assistance funds to support the new sections 235, 236, and 237 programs of housing for lower income families.

## Title IX—National Housing Partnerships

This title would authorize the creation of federally chartered privately funded corporations to mobilize private investment and the

application of business skills in the job of creating low and moderate income housing in substantial volume. Such a corporation in turn would form a partnership, as its vehicle for participating in developments, projects, or undertakings for the provision of housing primarily for families of low or moderate income, pursuant to Federal programs or otherwise.

#### NEED FOR NATIONAL PARTNERSHIPS

The President has proposed a program of 6 million low and moderate income housing units to be produced over the next decade, a tenfold increase over the previous decade. To achieve this urgently needed increase in the production of housing for low and moderate income families, it will be necessary not only to provide public subsidy, but to create additional new private institutions designed to give nationwide impetus to the production of such housing.

Although the housing industry is one of the very largest in the country, there is no single existing entity which accounts for more than one-third of 1 percent of the market, and there are few firms that carry on their activities on a national scale. The proposed National Housing Partnerships would provide a dynamic input for low and moderate income housing that is now lacking. National in scope, they would be devoted to the single purpose of producing low and moderate income housing and, therefore, would concentrate on succeeding in this one field. Such national organizations could recruit first-class management and technical staff who will make their careers in low and moderate income housing and would provide a needed source of equity capital. With nationwide market power in the low and moderate income housing field, to be supported by housing assistance payments on behalf of low-income occupants under other provisions of this bill, the Partnerships could realize some of the economies of scale that are inherent in volume construction and purchasing.

#### STRUCTURE OF A NATIONAL HOUSING PARTNERSHIP

This federally chartered privately funded corporation would be organized under the District of Columbia Business Corporation Act. Such a corporation in turn would form a partnership organized under this title and under the District of Columbia Uniform Limited Partnership Act. The federally chartered Corporation would serve as the general partner and managing agent of the National Partnership and each of the stockholders, as well as others, could be limited partners. The Corporation would provide the staff and expertise for the partnership in connection with the organization and planning of specific local project undertakings in which the National Partnership would have an interest. The Corporation would receive a fee for such services.

Of the funds of each large investor under the proposal, it is contemplated that not more than 5 percent would be invested in the Corporation's stock and the balance in the partnership. As limited partners they would have no liability for the debts of the partnership beyond their investment in the partnership.

The partnership arrangement makes it possible to assure an adequate return to investors. Under existing Internal Revenue Service regulations and rulings, partnership losses for tax purposes flow to the individual partners. In the case of new housing units financed on a 10-percent equity—90-percent debt basis, the annual accelerated depreciation of the building cost results in substantial book losses during the initial 10 years after the project is built. Assuming the member of the partnership is in relatively high income tax bracket, his share of the depreciation losses, plus cash income from project operations would provide an after-tax return on his investment which would compare favorably with the return which most industrial firms realize on their equity capital.

#### ROLE OF NATIONAL HOUSING PARTNERSHIPS

The National Housing Partnerships to be organized pursuant to this title would not enjoy a monopoly or special competitive advantages over existing organizations. The title provides for the creation of as many partnerships as may be necessary and specifically provides that others are free to establish enterprises similar in scope to the partnerships. The partnerships will be receiving no benefits from the Federal Government which are not presently available to limited profit corporations and associations. Partnerships would supplement and support local enterprise by forming partnership ventures with local builders and investors for the purpose of building low and moderate income housing projects in communities throughout the Nation. Such undertakings would normally be controlled and managed by local interests, with the partnership's interest being that of a limited partner which would not exceed 25 percent of the aggregate equity investment for the project, except where the balance is not readily obtainable from investors in the local community. When necessary, the partnership or the Corporation would serve as the general partner in such a local venture.

### **Title X—Rural Housing**

#### HOUSING FOR LOW AND MODERATE INCOME PERSONS AND FAMILIES

Section 1001 of the bill would amend title V of the Housing Act of 1949 by adding a new section 521 authorizing direct and insured loans in rural areas (places not exceeding 5,500 population) to low and moderate income persons and families and to provide rental or cooperative housing for such persons and families, where assistance is not available under sections 235 and 236 of the National Housing Act (added by secs. 101 and 201 of the bill). Interest will be at a rate which will be set by the Secretary of Agriculture after considering the cost of money to the Treasury and the payment ability of the applicants. The interest rate may not in any event be less than 1 percent per annum. An interest supplement necessary to market the insured loans will be paid from, and reimbursed by annual appropriations to, the rural housing insurance fund. Eligibility for these

loans will be broadened to include persons not previously residing in rural areas. This provision regarding nonrural residents will be administered so as to restrict it to persons of low or moderate income who are employed in rural areas.

#### HOUSING FOR RURAL TRAINEES

Section 1002 of the bill would authorize financial and technical assistance to provide, in rural areas, housing and related facilities for rural trainees (and their families) enrolled in federally assisted training courses to improve their employment capability. The Secretary of Agriculture could use this authority only after he determined that such housing and facilities could not be reasonably provided in any other way. The Secretary would be required to consult first with the Secretaries of Labor; Health, Education, and Welfare; Housing and Urban Development, and the Director of the Office of Economic Opportunity before providing this assistance. Training and housing sites would be selected only after consideration of a labor area survey and full coordination among all Federal, State, and local government agencies administering related programs. However, the committee feels that the Secretary should not approve any assistance under this section unless he is satisfied that the location has an economically viable future. In addition, the committee believes that, if feasible, trainees should be used to construct the housing but that prior to approving an advance under this section, the Secretary should make sure that the proposed housing will not unfairly compete with existing housing in the area nor with newly constructed housing built for the private market.

Related facilities would include, in addition to other service facilities, rooms and buildings for training purposes. Advances for land purchase would be repayable within periods not longer than 33 years and will bear interest. Other advances would be nonrepayable, or repayable with or without interest, depending on the applicant's payment ability, from project net income and any other available sources. Any interest charged on advances will be at a rate prescribed by the Secretary of Agriculture after considering the cost of money to the Treasury and the payment ability of the applicants. In no event would the rate be less than 1 percent per annum.

#### APPROPRIATIONS

Since necessary authority under sections 235 and 236 of the National Housing Act (added by secs. 101 and 201 of the bill) will be assigned to the Secretary of Agriculture as he and the Secretary of Housing and Urban Development agree, section 1003 of the bill would authorize appropriations to the Secretary of Agriculture for the cost of such administration.

#### PURCHASE OF LAND FOR BUILDING SITES

Section 1004 of the bill would broaden the eligible purposes of domestic farm labor housing loans to include the purchase of necessary land for building sites.

## Title XI—National Insurance Development Corporation

### BACKGROUND

The availability of essential property insurance in urban areas is a problem which has long been under study by the Senate. The Senate Select Committee on Small Business, under the chairmanship of Senator George A. Smathers of Florida, held extensive hearings on the insurance problems of small business in April 1967. As a result of these hearings, Senator Smathers introduced a bill, S. 1484, which was designed to assure the availability of crime protection insurance to small business.

In September 1967 the Small Business Subcommittee of the Senate Banking and Currency Committee, chaired by Senator Tom McIntyre of New Hampshire, held hearings on S. 1484. Shortly thereafter the subcommittee favorably recommended the bill, with amendments, to the full committee.

The insurance problems of urban property owners was also given extensive study by the President's National Advisory Panel on Insurance in Riot-Affected Areas. The Panel spent several months of intensive factfinding and study on the problems of the availability of essential property insurance to all types of property owners in our urban areas. The findings and recommendations of the Panel were published in its report in January 1968.

The facts developed during the various hearings point out the insurance crisis in our cities. The deterioration of many inner city areas is threatening the economic and social health of the cities as a whole. This deterioration has, in too many cases, caused the owners of well-maintained properties and businesses to be unable to obtain adequate property insurance against fire, crime, and other perils because of the general location of the property in a high-risk area or because of its proximity to dilapidated or hazardous structures.

In the run-down, blighted areas of some cities, private insurance companies have determined, in many instances, that it is not economically feasible to provide insurance protection. This determination has led to the practice of "red lining" entire neighborhoods, which results in an almost automatic denial of insurance for reasons of location alone, regardless of the condition of the property. Without insurance coverage against the perils of fire and crime, banks and other lenders cannot and will not extend credit for the purchase and improvement of real property or for the financing of business inventories. Thus, without insurance, property deteriorates and business, particularly small business, stagnates within the affected area. This in turn affects adjoining areas. The result of all of this is that the deterioration and stagnation within the area tends to accelerate and the area of blight tends to expand.

Recent civil disorders in many urban areas have aggravated even further the property insurance problem. Property insurance companies generally purchase reinsurance against abnormally high losses from various perils. The unusually large losses on riot and civil commotion coverage recently paid by the property insurance industry have raised the serious question of whether the same reinsurance arrange-

ments will continue to be available. Without this reinsurance, underwriters say that they cannot continue to provide riot and civil commotion protection in the various lines of property insurance, and may seek to cancel policies currently in force or refuse to renew them when they expire.

If the present availability of property insurance decreases further, and faster, the job even of arresting the deterioration of these inner city areas will become more difficult. But arresting this deterioration is not the primary objective. It is more important that the deterioration be *reserved* and a positive program to rehabilitate the affected areas be implemented.

The problem of rehabilitating our inner city areas is receiving a great deal of attention from virtually every segment of society. Private industry is being encouraged to invest time and money in these areas. The Government through the Department of Housing and Urban Development—and other agencies, has many programs designed to help solve the problems.

Many of the efforts being made may be classified under two concrete objectives—to see that all buildings in these areas are clean, safe, and functional and to improve their economic makeup so that they will be self-sustaining and profitable. To attain these objectives it will be necessary to foster increased construction and repair in the area and to foster the expansion of existing businesses and the establishment of new businesses. Adequate property insurance is essential to both of these endeavors.

Thus, if we are to prevent further deterioration in these areas, we must assure that essential property insurance availability *increases*.

The committee believes that the program that would be authorized by this title will cause the increase in the availability of property insurance which is necessary if we are to transform our inner city areas into viable, healthy, growing communities.

#### SUMMARY OF THE PROGRAM

The title would establish the National Insurance Development Corporation in the Department of HUD. The NIDC would provide reinsurance to insurance companies for losses paid by them resulting from riots or civil disorders. By providing this reinsurance, NIDC will enable the insurance industry to continue to provide the necessary property insurance it is now providing to property owners in urban areas. Reinsurance losses would be shared among the insurance companies (through a loss retention and reinsurance premiums paid to NIDC), the States, and NIDC.

The NIDC would also encourage the private property insurance industry, in cooperation with State insurance authorities, to develop statewide plans to assure all property owners fair access to property insurance. These would be known as "Fair Access to Insurance Requirements Plans" (FAIR plans). Minimum criteria would be provided in the bill for the FAIR plans. Although minimum criteria would be established, the State insurance authority would have the responsibility of determining the scope of the plans beyond the established minimum, working out the details of the operation of the plan,

implementing the plan, and overseeing its operation. An insurance company obtaining reinsurance from NIDC would have to agree to participate in the State plans.

NIDC and the State insurance authority would maintain surveillance over the effectiveness of the FAIR plans in increasing insurance availability. If it is determined that the FAIR plan is not obtaining the desired results, additional programs may be required as a condition to continued NIDC reinsurance in the State.

#### DETAILED ANALYSIS OF THE TITLE

Section 1101 of the bill would provide that the title may be cited as the "National Insurance Development Corporation Act of 1968."

#### FINDINGS AND DECLARATION OF PURPOSE

Section 1102(a) of the bill would set forth congressional findings that the inadequacy of the supply of private investment and credit in inner-city areas resulting from an unavailability of property insurance is accelerating the deterioration of such areas and is threatening the economic well-being of cities; recent civil disorders have caused abnormally high losses for the property insurance industry, and the unavailability of reinsurance for such losses resulting from the unpredictability of such losses makes adequate fire, crime, and other insurance coverage even more difficult to obtain; and the national interest demands urgent action to assure continued availability of property insurance.

Section 1102(b) of the bill would state that it is the purpose of the title to assist State insurance authorities and the private insurance industry in the development of statewide programs to increase the availability of necessary property insurance coverage against fire, crime, and other perils for property meeting reasonable underwriting standards, and to provide Federal reinsurance for extraordinary property insurance losses resulting from civil disorder, with appropriate State sharing.

#### AMENDMENT OF THE NATIONAL HOUSING ACT

Section 1103 of the bill would amend the National Housing Act by adding a new title XII, to authorize the establishment of the National Insurance Development Corporation.

The provisions of the proposed new title are discussed in detail below.

#### CREATION AND DISSOLUTION OF NATIONAL INSURANCE DEVELOPMENT CORPORATION

Section 1201 of the proposed new title would create within the Department of Housing and Urban Development, under the authority of the Secretary, the National Insurance Development Corporation. The powers of the Corporation would terminate on April 30, 1973, except to the extent necessary to continue reinsurance until April 30, 1976, and to complete the liquidation and termination of the Corporation in accordance with a plan submitted to Congress for approval on or about April 30, 1976.

## EXECUTIVE DIRECTOR

Section 1202 of the proposed new title would provide that, subject to the provisions of section 1201(a) with respect to the authority of the Secretary of HUD, the Corporation would be managed by an Executive Director to be appointed by the President by and with the advice and consent of the Senate. The Executive Director would be prohibited from serving as an officer or director of an insurance company or holding stock in any insurance company while he is Executive Director.

## ADVISORY BOARD, MEETINGS, DUTIES, COMPENSATION, AND EXPENSES

Section 1203(a) of the proposed new title would establish a 19-member Advisory Board appointed by the Secretary, who would also designate a Chairman and a Vice Chairman. No more than six members of the Board would be from the Federal Government, not less than four would be representatives of the private insurance industry, and not less than four would be representatives of State insurance authorities. The remaining members of the Board would be made up of members from various segments of society, so that all interests affected by the insurance program might be represented.

In determining the makeup of the Board, it would seem advisable to place representatives of the reinsurance industry and the insurance agency industry on the Board so that the Corporation might obtain advice on these important areas.

Section 1203(b) of the proposed new title would provide for the Board to meet at least four times yearly and to hold special meetings at the call of the Chairman or any three members of the Board.

Section 1203(c) of the proposed new title would provide that the Board shall review the general policies of the Corporation, advising the Secretary and the Corporation with respect thereto, and perform other functions specified in the title.

The committee believes that it has provided for maximum efficiency in the management of the Corporation. By vesting the advisory board with the general advisory authority contained in this section, and the many specific areas of advisory authority contained in other sections, the committee believes that it has achieved two desirable results. It has guaranteed as many affected interests as possible that their representatives will be afforded maximum opportunity to advise and be consulted on actions taken or proposed by the Corporation. At the same time, the Corporation is afforded the opportunity to obtain expert advice in carrying out its programs.

The committee is certain that the Corporation will make maximum use of the opportunity to obtain advice from the advisory board and will give full weight to that advice when determining the proper course on the various decisions which will be required.

Section 1203(d) of the proposed new title would provide that non-Federal board members would be compensated at a rate fixed by the Corporation, and would also receive travel expenses incurred in performing their duties.

## DEFINITIONS

Section 1204 of the proposed new title would define: (1) "Environmental hazard" to mean insurance hazards beyond the control of the property owner; (2) "essential property insurance" to mean insurance against direct loss to property as defined and limited in standard fire and extended coverage policies, as approved by the State insurance authority, and insurance for such types, classes, and locations of property against the perils of vandalism, malicious mischief, burglary, or theft, as the Corporation shall designate, but such insurance could not include automobile insurance or such types of manufacturing risks excluded by the State insurance authority; (3) "inspection facility" to mean the rating bureau or other person designated by the State insurance authority to perform inspections under the plans set forth in part A; (4) "insurer" to include insurance companies authorized to engage in the insurance business under State law; (5) "pool" to mean a pool or association of insurance companies formed to make property insurance more readily available; (6) "losses resulting from riots or civil disorders" to mean losses resulting from riots or civil disorders under policies for standard lines of property insurance for which reinsurance is offered, as determined under regulations of the Corporation; (7) "property owner" to mean any person having an insurable interest in real or personal, or mixed real and personal, property; (8) "person" to include any individual or group of individuals, corporation, partnership, association, or any organized group of persons; (9) "reinsured losses" to mean losses on reinsurance claims and expenses incurred in connection therewith; (10) "standard line of property insurance" to include fire and extended coverage, vandalism and malicious mischief, other allied lines of fire insurance, burglary, and theft, those portions of multiple peril policies covering similar perils to the foregoing, inland marine, glass, boiler and machinery, ocean marine, aircraft physical damage, and such other lines as the Corporation may designate; (11) "State" to mean the several States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, and the Trust Territory of the Pacific; (12) "urban area" to include any municipality or political subdivision of a State subject to population limits and such additional areas as are designated by the State insurance authority; and (13) "year" as a calendar year, fiscal year, or other period of 12 months as designated by the Corporation. The Corporation would be authorized to define any technical or trade term.

It has been pointed out that there has recently been a pattern of losses resulting from intentionally caused fire or other property damage which may or may not be connected in time or place to riots or group activity, but which could be determined to be a form of civil disorder. It is the view of the committee that losses of this nature should be considered by the Corporation when it issues regulations delineating the precise scope of "losses resulting from riots or civil disorders."

It should be noted that the Corporation has discretion as to whether to include certain types of coverage in the term "essential property insurance." The committee recognizes that there are specialized prob-

lems connected with many specific coverages which do not generally apply. However, it cannot be emphasized too much that the primary objective of this title is to increase the availability of the types of property insurance which are necessary to the owners of homes and businesses in urban areas. Accordingly, it is expected that the NIDC will include as many of these optional lines in the term "essential property insurance" as it can, having due regard for the specialized problems which may be involved with these lines.

## PART A—STATEWIDE PLANS TO ASSURE FAIR ACCESS TO INSURANCE REQUIREMENTS

### FAIR PLANS

Section 1211(a) of the proposed new title would require every insurer reinsured by the Corporation to cooperate with the State insurance authority in each State in which it acquires reinsurance, in establishing and carrying out statewide plans to assure fair access to insurance requirements (FAIR plans).

Section 1211(b) of the proposed new title would provide that these plans, which must be approved by the State insurance authority or authorized by State law, are to be administered under the supervision of the State insurance authority, and designed to make essential property insurance more readily available in urban areas. Such plans may vary from State to State because of local conditions, but all plans must include provisions that—

(1) No insurance risk shall be written at a surcharged rate or be denied "essential property insurance" unless there is first an inspection of the property by an inspection facility, without cost to the owner of the property, and a determination made that the risk is not insurable at the applicable premium rate;

(2) Inspections under the plan may be requested (in writing or otherwise) by a property owner (any one with an insurable interest) his representative, or by an insurer, agent, broker, or other producer;

(3) The owner of the building need not be present during an inspection for a tenant seeking insurance to obtain an inspection;

(4) A copy of the inspection report will be promptly sent to an insurer after an inspection;

(5) The insurer will promptly process the application for insurance after the inspection report is received and will promptly return to the inspection facility a copy of the inspection report and a copy of an action report setting forth the amount of coverage the insurer agrees to write. If the insurer agrees to write the coverage with a surcharge, if any is authorized, it must also state the improvements that must be made to the property before it will provide coverage at an unsurcharged rate; if the insurer agrees to provide coverage on condition that certain improvements are made, it must state what improvements are required, as well as the amount of coverage it agrees to write, and if the insurer declines the risk it must clearly state the specific reasons;

(6) An insurer declining a risk, or agreeing to provide coverage only if the property is improved, will promptly send a copy

of the inspection and action reports to the property owner who requested the insurance and the State insurance authority. At the time the insurer sends these reports to the property owner, it must also explain clearly his right to appeal the decision of the insurer to the State insurance authority;

(7) All policies under the plan will be written promptly and will be separately coded for compilation and study purposes;

(8) The inspection facility will submit periodic reports on the operation of the plan to the State insurance authority and to the Corporation. This report would set forth by individual insurer the number of risks inspected under the plan, the number of risks accepted, the number of risks conditionally accepted and reinspections made, the number of risks declined, and other information;

(9) Each insurer participating in the plan must give a policyholder sufficient notice prior to cancellation or nonrenewal to allow the policyholder to seek a new policy under the plan and will explain to the policyholder the procedures for obtaining insurance through the plan; and

(10) A cooperative and continuing public education program will be undertaken by the participating insurers, agents, and brokers to assure that the plan receives adequate public attention.

At this point the committee wishes to emphasize that the title is not designed to replace or alter the existing structure of the insurance industry or its regulation by the individual States. It is designed to utilize the existing structure of the industry and the State insurance regulatory agencies to the maximum extent. It would specifically provide that the statewide FAIR plans shall be administered by the State insurance authority. Although minimum criteria are provided in the bill, the State insurance authority would have the responsibility of determining the scope of the plans beyond the established minimum, working out the details of the operation of the plan, implementing the plan, and overseeing its operation.

The statewide FAIR plans represent a substantial expansion of the urban area plans developed by the insurance industry and State insurance authorities to induce greater writing of insurance in urban core areas and which now operate in 13 States. Urban area plans generally cover only residential properties in limited geographical areas, offer only fire and extended coverage insurance, and have procedural inadequacies. Experience with urban area plans demonstrates their promise, and the FAIR plan is designed to fulfill that promise and secure for all property owners equitable access to basic lines of property insurance.

#### ALL-INDUSTRY PLACEMENT FACILITY

Section 1212 of the proposed new title would require all plans to include an all-industry placement facility, doing business with every insurer in the State participating in the plan. This facility would help agents and brokers place insurance up to the full insurable value of a property, except to the extent that deductibles, percentage participation clauses, and other underwriting devices might be employed to meet special problems of insurability. The facility would seek to place this business equitably among the companies with which it is doing business.

## INDUSTRY COOPERATION

Section 1213 of the proposed new title would require every insurer participating in a plan to file a statement pledging its full participation and cooperation in carrying out the plan with the State insurance authority and with the Corporation. It would prohibit an insurance company from discouraging in any way its agents and brokers from submitting applications for insurance through a plan.

## PLAN EVALUATION

Section 1214(a) of the proposed new title would provide for the State insurance authority to transmit copies of a plan, and any amendments, to the Corporation and to advise it concerning the operation of the plan, and the need to adopt other programs to make essential property insurance more readily available.

Section 1214(b) of the proposed new title would authorize the Corporation, after full consultation with the advisory board, to modify the criteria for plans if it finds, on the basis of experience, such action is necessary or desirable to carry out the purposes of the title. The Corporation would also be authorized to waive compliance with one or more of the plan criteria upon certification by the State insurance authority that compliance is unnecessary or inadvisable under local conditions or State law.

This provision is consistent with the objective of providing maximum flexibility in order to meet different circumstances; it allows changes in the event the existing program is not operating efficiently and it allows modification or change of general requirements which may, for special reasons, be inadvisable under given circumstances.

## PART B—REINSURANCE COVERAGE

## REINSURANCE OF LOSSES FROM RIOTS OR CIVIL DISORDERS

Section 1221(a) of the proposed new title would authorize the Corporation to offer to any insurer or pool, subject to the conditions set forth in section 1223, reinsurance against property losses resulting from riots or civil disorders. Reinsurance would be offered on fire and extended coverage, vandalism and malicious mischief, other allied lines of fire insurance, burglary and theft, and those portions of multiple-peril policies covering perils similar to the foregoing. Reinsurance would be offered on all of these lines, taken together. Companies acquiring reinsurance on all such lines would be eligible to purchase reinsurance on any other individual standard line of property insurance.

Section 1221(b) of the proposed new title would provide that reinsurance coverage may be provided immediately following enactment of the title by means of a written binder which is to expire at the end of a 90-day period or upon the effective date of the reinsurance contract between an insurer and Corporation, whichever is earlier.

Section 1221(c) of the proposed new title would provide that no reinsurance will be offered to an insurer in a State after the expiration of the binder referred to in subsection (b) unless the insurer is participating in that State's plan as described in part A.

## REINSURANCE AGREEMENTS AND PREMIUMS

Section 1222(a) of the proposed new title would authorize the Corporation, during the first year following enactment of the title, to enter into reinsurance contracts in consideration of payment of such premium or other charge which the Corporation deems adequate to obtain an aggregate fund in excess of the estimated amount of insured riot losses during 1967, assuming a substantial proportion of property insurance written will be reinsured. Thereafter, the Corporation may increase or decrease such premiums for reinsurance if it is found, after full consultation with the advisory board and the National Association of Insurance Commissioners, that such action is necessary or appropriate.

Section 1222(b) of the proposed new title would provide that the reinsurance offered shall reimburse an insurer for its total proved and approved claims for losses resulting from riots or civil disorders during the term of the reinsurance contracts, in excess of the amount of the insurer's retention of such losses as provided in the reinsurance contract. The typical insurance company retention of loss arrangement is expected to involve two features: (1) An initial retention of losses, equal to a percentage of premiums earned in a State on lines reinsured, plus (2) the assumption of an additional percentage of total losses, above and beyond the initial retention. For illustrative purposes, the first percentage might be assumed to be 3 percent. Assuming that premiums earned in the State on reinsured lines amounted to \$100 million, the insurers' initial retention would be \$3 million (\$100 million times 3 percent). If the second percentage is assumed to be 10 percent, and the total insured claims from riots and civil disorders by companies doing business in the State in a calendar year amounted to \$45 million, the additional insurers' retention of losses would amount to \$4.2 million (\$45 million less the \$3 million initial retention times 10 percent). Thus, the private insurers' retention of riot losses from their own resources would be \$7.2 million.

Section 1222(c) of the proposed new title would authorize the Corporation to include such terms and conditions in reinsurance contracts as are necessary to carry out the purposes of the title, but that such terms and conditions shall be uniform throughout the country. Nevertheless, to take account of the significant variations between the needs of insurers, the Corporation, in its discretion, may permit insurers to select from different specified levels of retention of losses, provided that the premium rates adequately reflect each level so retained by each insurer, and further provided that the premium rate for any given retention is uniform for all insurers throughout the country.

Section 1222(d) of the proposed new title would provide that reinsurance contracts will be for a term expiring on April 30, 1969, and on April 30 each year thereafter and shall be entered into within 90 days of the effective date of this title or within 90 days prior to April 30 each year thereafter, or within 90 days after an insurer is authorized to write insurance in a State which it was not so authorized to write in the preceding year.

## CONDITIONS OF REINSURANCE

Section 1223(a) of the proposed new title would set forth various conditions under which the Corporation will terminate existing reinsurance and will not offer new coverage on policies written after the termination date.

Paragraph (1) would provide that reinsurance will not be offered in any State if the State itself, its political subdivisions, or a governmental corporation or fund established pursuant to State law, does not assume a portion of the responsibility for assisting the Corporation to reinsure against losses resulting from riots or civil disorders, within 1 year after the effective date of the act, or if the appropriate State legislative body has not met in regular session during that year by the close of its next regular session. The State would not be called on to reimburse the Corporation until the reinsured losses paid by the Corporation in a calendar year are in excess of the total reinsurance premiums received in the State during the year, plus the excess of reinsurance premiums received in the State over reinsured losses paid by the Corporation during the preceding period measured from the most recent calendar year in which the State had reimbursed the Corporation for reinsured losses. After the Corporation has paid such amount of reinsured losses in a calendar year, the State would reimburse the Corporation for its additional reinsured losses in that State during the year, in an amount up to 5 percent of the aggregate property insurance premiums earned in the State during the preceding calendar year on those lines of insurance reinsured by the Corporation in the State. Under the foregoing formula, State sharing would not be required unless losses in a State exceeded the sum of (1) the premiums paid by the insurance industry for reinsurance in that State (premiums paid in the year in which the losses occurred plus premiums paid in previous years in excess of reinsured losses paid), and (2) the companies' retained losses. Assuming that the premiums earned in the State on reinsured lines amounted to \$100 million and that the premiums for Federal reinsurance would be 2 percent of such earned premiums, the first amount would be \$2 million. If the second amount of retained losses by the companies were \$7.2 million, the total would be \$9.2 million. Since total riot losses this amount, in this example (i.e., \$45 million), the State's share would be \$5 million (\$100 million times 5 percent). There would remain to be paid \$30.3 million (\$45 million less \$9.2 million less \$5 million). This amount would be paid by the Corporation, from premiums received from companies for reinsurance in other States.

Paragraph (2) would provide that reinsurance will cease to be available on new policies written in a State after 30 days following the Corporation's notification to the insurer that the Corporation, after consultation with the State insurance authority, finds that a suitable program, in addition to the plan set forth in part A, is required to make essential property insurance more readily available in the State without regard to environmental hazards, and that such program has not been adopted. This paragraph, however, would not become effective until 2 years after the effective date of this act, or at such earlier date as the Corporation, after consultation with the State insurance authority may determine.

Paragraph (3) would provide that reinsurance will cease to be available on policies written in a State after 30 days following notification to the insurer that the Corporation or the State insurance authority finds that the insurer is not fully participating in the plan in the State, in an existing pool, or in any other existing program found by the Corporation to aid in making essential property insurance more readily available in the State. The Corporation could not make such a finding unless it has requested and considered the views of the State insurance authority, or the State authority has failed to respond to a written request for such views within a reasonable period of time.

Paragraph (4) would provide that reinsurance will not be available on new policies written by an insurer following a merger, acquisition, consolidation, or reorganization involving an insurer with reinsurance on one or more lines of insurance and an insurer with or without such reinsurance unless the surviving company meets the criteria of eligibility for reinsurance other than as provided in section 1222(d) and promptly pays any reinsurance premiums due.

Paragraph (5) would provide that reinsurance will terminate upon cancellation by the insurer.

Section 1223(b) of the proposed new title would provide that if reinsurance is terminated or canceled under this section coverage may continue for policies written during the time reinsurance was in force upon payment of an appropriate premium or other charge.

#### FINANCING THE REINSURANCE PROGRAM

The financing arrangement envisions a reinsurance program which can be self-supporting, drawing on reinsurance premiums paid by insurance companies and payments by the States to cover losses from riots and civil disorders which exceed the losses retained by the insurance companies. If riot losses throughout the Nation resulted in reinsurance claims in excess of the aggregate amount of reinsurance premiums received by the Corporation, the excess would be paid from funds borrowed by the Secretary from the Treasury, to be repaid from future reinsurance premiums. In the event that there is a need to borrow from the Treasury, the authorization in section 520(b) of the National Housing Act for mortgage insurance would be employed. This existing authorization for the Secretary to borrow funds for payment of mortgage insurance claims would be modified so that it could also be used for payment of claims under the reinsurance program. The similar financial requirements of these insurance programs makes this appropriate. The reinsurance program, like the mortgage insurance program, must provide an assurance of prompt payment of claims. In both cases the amount of claims cannot be determined in advance and in normal situations premiums are expected to be sufficient to pay anticipated losses.

#### RECOVERY OF PREMIUMS: STATUTE OF LIMITATIONS

Section 1224 of the proposed new title would authorize the Corporation to recover any unpaid premiums for reinsurance. It imposes a 5-year statute of limitations on the recovery by an insurer of excess

premiums paid to the Corporation or the recovery by the Corporation for reinsurance premiums due to it; and provides that if an insurer has filed false documents with the Corporation with the intent to evade payment of the appropriate premium the 5-year period will not begin until the Corporation discovers the deception.

## PART C—PROVISIONS OF GENERAL APPLICABILITY

### CLAIMS AND JUDICIAL REVIEW

Section 1231 of the proposed new title would authorize the Corporation to adjust and pay claims for proved and approved losses covered by reinsurance and authorizes any claimant, upon disallowance of a claim, to institute an action, within 1 year after the receipt of the notice of disallowance in the U.S. district court for the district in which the insured property was situated. Jurisdiction would be conferred on the district court without regard to the amount in controversy.

### FISCAL INTERMEDIARIES AND SERVICING AGENTS

Section 1232(a) of the proposed new title would authorize the Corporation to enter into contracts with any insurer or private organization for performance of any or all of the following functions: (1) Estimating or determining reinsurance claim payment amounts; (2) receiving funds from the Corporation and disbursing and accounting for them in making reinsurance claim payments; (3) auditing the records of any insurer to assure proper payments; (4) establishing the basis of liability for reinsurance; and (5) otherwise furthering the purposes of the act as provided in the contract.

Section 1232(b) of the proposed new title would provide that surety bonds may be required from the insurer or organization or any of its officers or employees participating in carrying out the contract in amounts deemed appropriate by the Corporation. No individual designated to certify payments and no officer in the Federal Government disbursing funds in accordance with a proper certification of payments would be liable with respect to such payments in the absence of gross negligence or intent to defraud the United States.

### NATIONAL INSURANCE DEVELOPMENT FUND

Section 1233(a) of the proposed new title would authorize a national insurance development fund to be used by the Corporation to carry out the programs authorized under the new title. The fund will be available without fiscal year limitation to: (1) Pay reinsurance claims under the reinsurance coverages provided in part B; (2) pay the administrative expenses of the Corporation; and (3) repay, with interest, sums which may be borrowed from the Secretary of the Treasury under section 520(b) of the National Housing Act.

Section 1233(b) of the proposed new title would provide that the fund is to be credited with: (1) Reinsurance premiums paid by insurers in connection with the reinsurance coverages provided under part B; (2) amounts advanced to the fund from appropriations to maintain the fund in a condition adequate to meet its liabilities; (3)

interest on investments of the fund; (4) receipts from other sources which may be deposited in the fund; and (5) funds which may be borrowed under section 520(b) and deposited in the fund.

Section 1233(c) of the proposed new title would authorize the Secretary, after determination that fund moneys exceed current needs, to invest such amounts as he deems advisable through the Secretary of the Treasury, in obligations issued or guaranteed by the United States.

#### RECORDS, ANNUAL STATEMENTS, AND AUDITS

Section 1234(a) of the proposed new title would require any insurer acquiring reinsurance from the Corporation to furnish the Corporation with summaries and analyses of information in their records in such form as the Corporation, in cooperation with the State insurance authority, shall prescribe by rules and regulations. The Corporation would be required to use State insurance authority examination reports and facilities to the maximum extent feasible.

Section 1234(b) of the proposed new title would require every insurer acquiring insurance to file with the Corporation a copy of the annual statement, or any amendment thereto, that it files with the State insurance authority of its domiciliary State, at the time it files the statement or amendment with the insurance authority.

Section 1234(c) of the proposed new title would require insurers or other persons executing contracts with the Corporation under sections 1222 or 1232 to keep such reasonable records as will facilitate an effective audit of liability for reinsurance payments by the Corporation.

Section 1234(d) of the proposed new title would authorize the Corporation and the Comptroller General of the United States, or their designees to have access to the books and records of an insurer or other person for the purpose of conducting an audit pertinent to the costs of any program undertaken for, or services rendered to, the Corporation. To the maximum extent feasible, such audits are to be conducted in cooperation with State insurance authorities and through use of their examining facilities.

#### STUDY OF REINSURANCE AND OTHER PROGRAMS

Section 1235 of the proposed new title would authorize and direct the Corporation to conduct studies to help assure an adequate supply of burglary and theft and other property insurance in urban areas, and to help assure the adequate availability of surety bonds for construction contractors in urban areas. The Corporation is required to submit the results of its study, together with appropriate recommendations, to the Secretary for transmittal to the President and the Congress no later than 1 year after the effective date of the title.

Section 1236 of the proposed new title would authorize the Corporation, in cooperation with State insurance authorities and the private insurance industry, to undertake studies of (1) the operation of the plans under part (A); (2) the extent to which essential property insurance is unavailable in urban areas; (3) the market for private reinsurance; and (4) loss-prevention methods and procedures, insurance marketing methods, and underwriting techniques.

## GENERAL POWERS OF THE CORPORATION

Section 1237 of the proposed new title would set forth the following general corporate powers of the Corporation; to have a corporate seal; to sue and be sued (with all suits of a civil nature in which the Corporation is a party deemed to arise under the laws of the United States); to enter into and perform contracts, leases, and other agreements without competitive bidding; to employ a staff; to issue such rules and regulations as the Executive Director deems necessary or appropriate to carry out the title, after full consultation with the Advisory Board, and after notice, and hearing if granted, as required by the Administrative Procedure Act; and to exercise all powers specifically granted by the title and such incidental powers as are necessary to carry it out.

## SERVICES AND FACILITIES OF OTHER AGENCIES—UTILIZATION OF PERSONNEL, SERVICES, FACILITIES, AND INFORMATION

Section 1238 of the proposed new title would authorize the Corporation, with the consent of the agency concerned, to utilize the personnel and information of any agency of the Federal Government on a reimbursable basis and to obtain without reimbursement data relating to matters within the jurisdiction of the Corporation from any agency having custody of such data without reimbursement, to the extent permitted by law.

## ADVANCE PAYMENTS AND FINALITY OF CERTAIN FINANCIAL TRANSACTIONS

Section 1239(a) of the proposed new title would provide that any financial transaction of the Corporation relating to reinsurance under the title shall be final and conclusive on all officers of the United States.

Section 1239(b) of the proposed new title would authorize the Corporation to make payments in advance or by way of reimbursement, and in such installments and on such conditions as the Corporation may determine.

## TAXATION

Section 1240(a) of the proposed new title would exempt the Corporation from taxation by any local or State government and the Federal Government, except on real property acquired as a result of reinsurance. Real property may be taxed by a State or political subdivision thereof to the same extent, according to the value of the property, as other real property is taxed.

Section 1240(b) of the proposed new title would provide that any measures undertaken by a State to meet or fund its obligations for reinsured losses under section 1223(a) (1) of the title shall not be the subject of any retaliatory or fiscal imposition by any other State.

## ANNUAL REPORT

Section 1241 of the proposed new title would require the Secretary to include a report on the operation of the Corporation in his annual report.

## APPROPRIATIONS

Section 1242 of the proposed new title would authorize such appropriations as may be necessary to carry out the title.

## FINANCING

Section 1104 of the bill would amend section 520(b) of the National Housing Act to authorize payments by the Secretary for property losses reinsured under title XII of the act.

## GOVERNMENT CORPORATION CONTROL ACT

Section 1105 of the bill would define the National Insurance Development Corporation as a wholly owned Government corporation under the Government Corporation Control Act.

## COMPENSATION OF EXECUTIVE DIRECTOR

Section 1106 of the bill would provide for compensation of the Executive Director of the National Insurance Development Corporation at the rate prescribed for level IV of the Federal executive salary schedule.

## CLARIFYING AMENDMENTS TO ACTS REFERRING TO DISASTERS

Section 1107 would amend provisions of existing laws relating to Federal assistance for disaster relief so as to make it clear that such assistance can be provided in the case of disasters resulting from riots or civil disorders. This legislation is needed to help the innocent victims of violence.

The Disaster Relief Act of 1950 would be amended so as to specifically include riots and civil disorders within the definition of "major disaster." Pursuant to Presidential determination, this would make riot-torn communities eligible for the Federal disaster assistance under the 1950 act and the Disaster Relief Act of 1966. Under these programs, communities could receive Federal emergency assistance, such as the provision of temporary or emergency housing and the use of Federal equipment, supplies, facilities, and personnel. Borrowers under the REA loan program or HUD loan programs could have their loans refinanced where such action is necessary because of damage or destruction of the property. Applications for public housing and public facilities assistance would be accorded priority treatment, and the community could be eligible for Federal grants to cover part of the cost of restoring certain kinds of public facilities.

In addition to these basic disaster relief statutes, the section would amend several other programs which provide disaster assistance. These would include section 7(b)(1) of the Small Business Act which authorizes small business loans for disaster victims; section 101(c) of the Housing and Urban Development Act of 1965 which makes low-income disaster victims eligible for admission to rent supplement housing projects; section 111 of the Housing Act of 1949, which authorizes the waiver of a number of urban renewal program requirements in

the case of assistance for disaster areas; and section 203(h) of the National Housing Act, which authorizes the provision of FHA section 203 mortgage insurance on loans up to \$12,000 at 100 percent of the appraised value of the property to individuals whose homes have been damaged by a disaster and require reconstruction.

The amendments which would be made by this section, in several instances, would merely make express the authority which the agencies now have to take the action contemplated. The committee wishes to emphasize that the amendments made by this section are *not* intended to replace or supplant the necessity for property insurance coverage on property located in the affected areas. These amendments are intended to *supplement* such insurance by making available additional financial aid if it is still necessary after the property owners have received the benefit of the property insurance coverage which they have.

## **Title XII—National Flood Insurance Act of 1968**

Title XII of the bill would authorize a national program under which flood insurance can be made available to occupants of flood-prone areas through the cooperative efforts of the Federal Government and the private insurance industry. The program would be administered by the Department of Housing and Urban Development. Other Government agencies would cooperate with the Department with respect to gathering data necessary for establishing actuarial premium rates.

The facilities of the private insurance industry would be fully utilized in carrying out the program. Private insurance companies could either assume a portion of the risk in carrying out the program or could participate on a nonrisk basis. Risk-sharing companies would commit risk capital to an industry pool of companies which would absorb a share of the losses and expenses of the program. The Federal Government would make premium equalization payments to the pool to cover losses and also would provide reinsurance coverage to the pool for excessively high losses. Insurance companies in the pool would pay a premium to the Government for this reinsurance coverage in years of low-flood losses. Other non-risk-bearing insurance companies would participate in the program as fiscal agents of the pool.

A most important public purpose which the program will serve will be to encourage State and local governments to adopt and enforce appropriate land use provisions to restrict the future development of land which is exposed to flood hazard.

This title is identical to the flood insurance legislation (S. 1985) that was passed by the Senate on September 14, 1967. This legislation was subsequently amended and passed by the House on November 1, 1967. Both the House and the Senate insisted upon their versions of the legislation, and conferees were appointed by both Houses. A conference committee meeting between the two Houses on the legislation was not scheduled.

## NEED FOR A FLOOD INSURANCE PROGRAM

Heavy losses over the years from hurricanes in the coastal areas and from storms in inland areas of the Nation dramatize the lack of insurance protection against flood damage. Insurance protection against the risk of destruction caused by tornadoes and other natural catastrophes is generally available, but it is not available against the risk of flood loss.

Communities along the seacoast or in a river basin become completely immobilized following a major flood. Usually, they must depend on the Federal Government and voluntary relief agencies to provide various forms of assistance. Some State and local governments have limited programs to assist a flood-stricken area, but disaster relief from all of these sources is inadequate to provide for the necessary restoration of heavily damaged areas. These facts underline the need for a program which will make insurance against flood damage available, encourage persons to become aware of the risk of occupying the flood plains, and reduce the mounting Federal expenditures for disaster relief assistance.

## DESCRIPTION OF THE BILL

The Secretary of Housing and Urban Development will establish a program of flood insurance, as a joint venture between the Federal Government and the private insurance industry. The bill permits as an alternative, but only if necessary, an all-Federal program with or without participation by companies, agents, or brokers as fiscal agents.

*Coverage*

A priority will be afforded during the early stages of the program to making insurance available for one- to four-family residential properties. Later, flood insurance can be expanded to cover other types and classes of properties (such as business, agricultural, and other properties), when feasible.

A priority will also be given to making insurance available in States or areas which evidence a positive interest in the program, and which give assurances that, by June 30, 1970, appropriate permanent land use and control measures consistent with land management and use criteria specified by the Secretary will be adopted.

The committee believes that it would not be logical as a matter of public policy to permit insurance to be made available in localities which did not, on their own initiative, or on the initiative of State or other authorities, take appropriate steps to assure that their citizens would not develop property where it is subject to known severe flood hazards.

The objectives of land-use criteria are to: (1) Restrict the development of proposed construction in areas threatened by flood hazards, (2) assist in reducing damage caused by floods, and (3) otherwise improve the long-range land management and use of flood-prone areas. The committee wishes to point out that these criteria must be applied reasonably.

After consultation with the insurance industry and the State insurance commissioners, the Secretary will determine the terms and conditions of insurability for properties eligible for flood insurance coverage. These matters will be covered in regulations. Insurance for existing one- to four-family residential properties at rates below actuarial cost will be limited to \$15,000 liability per dwelling unit, and \$30,000 for any single structure. Liability for personal property would be limited to \$5,000 per dwelling unit. Any other existing properties which will be made eligible for insurance under the program in the future could be insured for up to \$30,000 of coverage per structure at rates below actuarial cost.

These limitations will, in general, only be applicable to insurance involving premium rates below actuarial cost, and the bill permits insurance at full actuarial cost to be sold for coverage in excess of the \$15,000 per single dwelling unit and \$30,000 per single structure, but not, in any case, to exceed twice these specified figures. Thus, for example, an existing single-family residential unit valued at \$32,000 might be eligible for up to \$15,000 in "subsidized" insurance, and insurance at the full cost rate between \$15,000 and \$30,000.

### *Insurance Premium Rates*

Necessary rate studies and investigations will be carried out through utilization of the services of the Army Corps of Engineers, the Geological Survey, the Soil Conservation Service, the Coast and Geodetic Survey, TVA, and other Federal departments and agencies, to estimate risk premium rates (actuarial rates) for flood insurance. The Secretary will also estimate rates (at less than the risk premium rates if necessary) which will be reasonable and will encourage persons to purchase flood insurance. These studies and investigations will be designed to accumulate necessary information in addition to the data which the Department now has with respect to flood insurance as a result of the flood insurance study. Estimates of rates will include applicable operating costs and operating allowances (administrative costs of selling and servicing insurance, and the profit and contingencies, respectively). Based on these estimates and determinations of reasonable rates which can be charged to property owners, the Secretary will prescribe chargeable premium rates for eligible properties (at less than the risk premium rates, if necessary), and the terms and conditions applicable to such rates.

In prescribing rates, the respective risks involved would be considered, in terms of location, type of structure, flood-proofing or similar measures, and other criteria. Rates will be stated so as to reflect the differences between estimated risk premium rates and the rates charged when they are below these rates.

Property constructed or substantially improved, after identification of the area in which it is located as a flood hazard area, could only be insured at the risk premium rate (actuarial cost) estimated for the property in such area.

Any Federal "subsidy" which will accrue under the insurance program to the benefit of property owners now occupying the flood plain is defensible only as part of an interim solution to long-range readjust-

ments in land use. Because such assistance should not prejudice these needed long-range adjustments, the case for temporary partial subsidization of the cost of flood premiums for existing properties in high-hazard zones is not at all valid for new properties in the same zones.

Actuarial premium rates must be established before insurance is offered. To meet the objectives of actuarial soundness, the Secretary will compile and analyze flood frequency data in individual flood plain areas and establish rates based on a consideration of the risk involved and accepted actuarial principles with respect to the types and classes of property for which flood insurance coverage will be available. This will be done on an area-by-area basis, since flood damage risks vary from one area to another.

### *Duplication of Benefits*

The committee bill is designed to encourage individuals to pay at least part of the cost of providing insurance to protect them against flood disasters, and thereby to reduce the need for special disaster relief measures. To this end, the bill contains provisions to prevent any duplication of Federal disaster benefits with respect to portions of property loss covered under flood insurance policies. Other provisions are designed to encourage persons most likely to suffer future damage from flood either to purchase flood insurance made available to them within a reasonable period of time, or, with certain exceptions, be precluded from further Federal disaster assistance in the event of future floods.

### *Federal Financial Participation in the Program*

Any program of insurance against the risk of flood losses must have assurance that funds will be made available to meet abnormally high losses that may occur in any single year. The bill therefore creates the national flood insurance fund in the Treasury of the United States which would become the instrumentality through which the Federal Government's share of the cost of the insurance program will be provided. To finance this fund, all authority which was available to the Housing and Home Finance Administrator by section 15(e) of the Federal Flood Insurance Act of 1956 is vested in the Secretary. Under this provision, the Secretary may issue notes or other obligations to the Secretary of the Treasury in the aggregate of \$500 million to carry out the Federal responsibilities under the program. These are: (1) Making premium equalization payments to the insurance pool, to compensate for losses attributable to the difference between the actuarially correct premium and the premium actually charged the policyholder; and (2) providing a Federal program of excess loss reinsurance, to assist the industry in meeting losses in years of higher than normal claims.

Borrowed Treasury funds will be deposited in the flood insurance fund authorized under the bill. Appropriated funds necessary to maintain the fund in an operative condition will also be deposited in the fund, as will reinsurance premiums paid by the insurance pool.

Subsidy payments and reinsurance claims will be paid from the fund. The fund will also become the fiscal means through which Treasury borrowings would be repaid, and available moneys would be used for this purpose (supplemented by moneys appropriated to the fund).

This financing mechanism for carrying out the program is essential to its operation, because it will be necessary to carry out commitments which the U.S. Government will be required to make, and to meet liabilities it assumes for payment of a share of claims and expenses under contracts with an insurance industry pool. Under the bill, the Secretary will enter into agreements with a flood insurance pool, and will make periodic premium equalization payments and, when necessary, provide reinsurance to the pool. The exact amount of payments will be unknown until the flood damage occurs, the claims are made, adjusted, and certified. At such times the insurance pool, under agreement with the Government, will have already made payment of these claims. The pool therefore must have available the Government's share of liabilities under the program without delay.

### *Limitations*

The face amount of flood insurance policies outstanding at any one time under the committee bill could not exceed \$2.5 billion. This is roughly equivalent to coverage of 150,000 to 175,000 dwellings at about \$14,000 per dwelling unit, and will be sufficient to carry the program for several years before the limitation will have to be reviewed by the Congress.

In addition, the bill provides that flood insurance could not be issued for property declared to be in violation of State or local laws, regulations, or ordinances intended to discourage or otherwise restrict land development or occupancy in flood-prone areas.

### ORGANIZATION AND ADMINISTRATION OF THE FLOOD INSURANCE PROGRAM

The Secretary is authorized to carry out the flood insurance program through a pool organized by the insurance industry or through a Government program with or without industry aid, or through both administrative means.

### INDUSTRY PROGRAM WITH FEDERAL FINANCIAL ASSISTANCE

#### *Insurance Company Pool*

The Secretary will encourage private insurance companies to join together in a pool to sell and service flood insurance coverage under the program. These companies will participate financially in underwriting the risks assumed, and in profits or losses realized or sustained.

The Secretary will enter into an agreement with any such pool and the agreement will form the basis of the relationship between the Government and the industry. In general, the agreement will require assurance from the industry: (1) Regarding continuity of coverage by insuring companies; (2) that companies meeting minimum standards will not be excluded; and (3) with respect to cooperation with other companies, agents, and brokers who wish to sell and service flood insurance on a non-risk-sharing basis.

### *Premium Equalization Payments*

Subsidy payments would be made to the pool to compensate for losses after they occur. These payments would reflect the difference between below-cost premium rates, and actual cost premium rates. The payment formula is prescribed in the bill.

### *Reinsurance*

The Secretary is authorized to provide a reinsurance program for the insurance industry pool. This program would be designed to insure that the industry and the Federal Government share in bearing the losses under the flood insurance program consistent with the objectives of the legislation.

The program will be carried out under an excess loss reinsurance agreement, requiring payment of reinsurance premiums by the pool. Reinsurance payments to the pool by the Government will be made when a stop-loss limit on claims on the pool is exceeded. Before the stop-loss limit is reached, the pool will call upon the risk capital pledged by risk-participating members.

The legislation contains a provision which would prohibit profits to insurance companies from the pools in the event the cumulative premiums collected by the Government for reinsurance were insufficient to pay cumulative reinsurance claims. However, such restrictions would be removed after any period of 5 years, or when the Government's deficits were eliminated, whichever is sooner.

### GOVERNMENT PROGRAM

#### *Federal Operation of the Program*

The bill provides a backstop in the event the pool cannot carry out the joint Federal-private program effectively. The Secretary of HUD would be required to make a report to Congress with supporting findings and recommendations 90 days, during which time Congress is in session, prior to implementing the all-Federal program. Then the Secretary would be empowered to establish a totally Federal program or a federally financed program using insurance companies, agents, and brokers to sell and service policies.

### OPERATION OF THE FLOOD INSURANCE PROGRAM

The committee is convinced on the basis of the Secretary's report and from testimony received at its hearings from the insurance industry and governmental witnesses that a joint insurance industry-government venture is the best approach for providing flood insurance at reasonable cost to our Nation's citizens. In addition, the committee hopes that as more experience is gained in this area the program will become self-sustaining.

#### *Insurance Industry Pool*

The insurance pool authorized by this bill will be an association of private insurance carriers formed to make flood insurance available.

It will be open to all qualified companies licensed to write property insurance under the laws of the separate States who meet minimum requirements prescribed under the bill. Relations between the Government and the insurance pool will be governed by an agreement which will set forth in detail the conditions of operation.

Participation in the pool by private companies can take the form of risk capital participation. Some companies can elect to operate as fiscal agents for risk-taking members of the pool. The significance of this arrangement is that small companies with limited capital resources will not be prevented from participating.

### *Operation of the Pool*

Participating member companies of the pool, either as risk bearers or as fiscal agents, will sell and service policies in much the same way as they now sell insurance against fire and other perils. Their relationship with the pool will be governed by an agreement, the conditions of which will be subject to approval by the Secretary of Housing and Urban Development. As fiscal agents they will be paid fees for selling and servicing of policies. As risk bearers, they will share in the aggregate profits or losses of the pool's operation for a particular accounting period. Risk-bearing member companies will be jointly liable for the payment of claims by insolvent members.

The Government-pool relationship will be governed by an agreement setting forth financial and other arrangements.

### *Financial Arrangements With Government*

Testimony of witnesses at the hearings developed the fact that, for a number of months, discussions had been going on between the Department of Housing and Urban Development and the industry as to the financial arrangements which could be made for operating the proposed joint flood insurance program. An understanding has been reached on the broad features of expenses, losses, and profits.

Among the broad features of the financial arrangements which have been discussed, one key feature is that the Government and the industry will both share in expenses and losses of the insurance operation. The basis for this sharing will be the same as the sharing in the risk.

The sharing in risk will be measured by the relationship between chargeable premiums—that is the premiums which policyholders pay—and the estimated risk premiums—that is, the premium needed to cover the actuarial risk plus operating costs and allowances. The Government will assume that proportion of the risk represented by the difference between these policyholder-paid premiums collected and the estimated (actuarial) premium amounts for all policies written and in force under the program.

As the program develops, it can be expected that the industry's risk and share of losses will become greater. This is because existing properties will be substantially improved or replaced by new properties, and therefore, more and more of the chargeable premiums will become full cost premiums. At some time in the future, therefore it is possible for the chargeable premiums to equal the estimated premiums.

At that time, the Government will have no liability for expenses or losses, except with respect to reinsurance that may be needed against catastrophic losses. This feature of the proposed arrangement seems to the committee to be desirable from the standpoint of the Federal Government, the private insurance industry, and the public as a whole.

### **Title XIII—Interstate Land Sales**

This title, which may be cited as the "Interstate Land Sales Full Disclosure Act," would give to the Secretary of Housing and Urban Development the authority to require full disclosure in the sale or lease of certain undeveloped land in interstate commerce or through the mails. The necessity for this legislation was made very apparent during hearings held by the Special Committee on Aging in 1964 and by the Securities Subcommittee of this committee in 1966 and 1967.

Evidence of abuse in the sale of undeveloped land by promoters was presented at the hearings. For example, many people, including our Nation's senior citizens, have purchased property in response to false and misleading promises regarding the nature of the land and the type of community in which it would be located. As a result, they have suffered financial losses, which in many instances amounted to their entire life savings. The Post Office Department has reported that between 1962 and 1966 such losses totaled more than \$50 million.

The sale of undeveloped subdivided land in resort and retirement areas has become a major business. Naturally, it has attracted some get rich quick promoters who make glowing promises of fully developed "dream communities." There have been far too many cases where all of the pertinent information is not disclosed, such as, the availability of convenient access and utilities.

The great majority of the sellers of undeveloped land to the public are responsible. They attempt to fully inform the prospective purchaser about what he is buying. However, the public and the responsible developers suffer from those developers who do not disclose all the material facts to the prospective purchaser. The proposal of the committee would authorize the Secretary of Housing and Urban Development to require such disclosure. By so doing, the public is protected as is the responsible developer.

Under present law, there is no effective means by which full and accurate information can be required. Once a misrepresentation has been proved, a developer can be stopped or required to correct his misrepresentation. However, this is no relief to the innocent purchaser who may already have been harmed.

This title would meet this problem by prohibiting the sale of land covered by it until there had been filed with the Secretary a statement of record listing certain required information about the ownership of the land, the state of its title, its physical nature, the availability of roads and utilities, and other matters. If the Secretary determined that the statement was incomplete or inaccurate, he could keep it from becoming effective until the developer filed the necessary information.

Pertinent extracts from the statement of record would then have to be included in a property report, approved by HUD, which would have to be furnished to a purchaser before a sale is consummated. This

property report would be required to contain that information concerning the land being sold which was determined most important to apprise fully a prospective buyer of what he would be purchasing. Failure to furnish the property report beforehand would give the purchaser the right to revoke the agreement at his option.

These requirements mean that the seller of undeveloped land covered by this title would be required to inform the purchaser not only of the desirable aspects but also of any undesirable aspects. The purchaser will then be better able to make an intelligent decision. This proposal does not authorize the Federal Government to pass upon the quality of what is being sold or upon such questions as land value, land use, or zoning. Its purpose is to give the purchaser the information necessary to make his own determination of the quality of what is being sold.

Failure to comply with the provisions of the act would subject an offender to confinement in prison of up to 5 years, or a \$5,000 fine, or both. Much broader civil remedies than are now available are also provided. Under existing law, it is very difficult for a purchaser to recover damages as a result of misrepresentations from out-of-State developers. In such cases, in order to get meaningful relief, he must file suit in the State in which the developer is located. In many cases, this is a practical impossibility for aggrieved purchasers. This title would provide relief by authorizing a suit for damages in any State or Federal court for the district in which the defendant may be found or in which the transaction took place. In addition, the Secretary of the Department of Housing and Urban Development is authorized to seek an injunction in a U.S. district court against any developer the Secretary can show is violating, or about to violate, the law.

The provisions of this title would cover any transaction involving undeveloped land which is subdivided into 50 or more lots and which is proposed to be sold or leased as part of a common promotional plan. There are several exemptions, including transactions involving cemetery lots and subdivisions in which all the lots are to be 5 acres or larger in size. In addition, sales to persons purchasing the land for the purpose of constructing buildings or for the purpose of reselling the land to others who intend to construct buildings are exempt. These and the other exemptions are meant to avoid covering situations in which the problems sought to be corrected do not normally occur.

Before a developer may sell land covered under the bill, the statement of record must be found by the Secretary to meet the content and accuracy requirements of the law. Provision is made for hearings by the Secretary or his designee. Any aggrieved developer may insist upon a hearing and seek an adjudication on the merits by the Secretary. Appeals may be taken from the Secretary's findings to the U.S. court of appeals.

The committee believes that because of the nature of the business and its interstate character, innocent purchasers can be effectively protected only through Federal action. A number of States have enacted legislation to deal with abuses within their States. However, many others have not. In any event, States are simply unable, because of jurisdictional problems, to protect their own citizens against out-of-

State promoters. This is especially true in those cases involving the mails and other forms of interstate communication.

Your committee does not intend to interfere with or to impede State efforts to regulate the sale of undeveloped land subject to their jurisdiction. The bill provides specifically that nothing in it shall affect the jurisdiction of any State real estate commission and it directs the Secretary to cooperate with appropriate State authorities. The Secretary may accept for filing, as a statement of record, material filed with and found acceptable by such authorities. Also, any remedies a purchaser may have under existing State laws would be preserved. Furthermore, the committee expects the Secretary to utilize the discretion given him to exempt sales of lots in subdivisions which would technically be covered but which are intrastate or almost entirely intrastate in nature—such cases as where interstate sales are very few in number and mainly coincidental. Such a situation could arise, for example, where a few out-of-State purchasers buy lots in a subdivision which is only being offered for sale within the State of the land's location or in nearby communities.

A more detailed section-by-section analysis of the provisions of this title follow.

#### SHORT TITLE

Section 1301 provides that the title may be cited as "The Interstate Land Sales Full Disclosure Act."

#### DEFINITIONS

Section 1302 defines: (1) "Secretary" to mean the Secretary of Housing and Urban Development; (2) "person" to mean an individual, or an unincorporated organization, partnership, association, corporation, trust, or estate; (3) "subdivision" to mean any land which is divided or proposed to be divided into 50 or more lots, whether contiguous or not, for sale or lease as part of a common promotional plan, and creates a presumption of a common promotional plan where land, which is contiguous or is known, designated, or advertised as a common unit or by a common name, is offered for sale or lease by a developer, or group of developers acting in concert, without regard to the number of lots covered by each individual offering; (4) "developer" to mean any person who sells or leases, or offers or advertises to sell or lease, any lots in a subdivision; (5) "agent" to mean any person who represents or acts for or on behalf of a developer in selling, leasing, or offering to sell or lease, any lot or lots in a subdivision; (6) "blanket encumbrance" to mean a trust deed, mortgage, other lien or encumbrance affecting a subdivision or more than one lot in a subdivision, excluding any lien or encumbrance resulting from the imposition of a tax assessment by any public authority; (7) "interstate commerce" to mean trade or commerce among the several States; (8) "State" as the several States, the District of Columbia, the Commonwealth of Puerto Rico and the territories and possessions of the United States; (9) "purchaser" to mean an actual or prospective purchaser or lessee of any lot in a subdivision; and (10) "offer" as any inducement, solicitation, or attempt to encourage a person to acquire a lot in a subdivision.

## EXEMPTIONS

Subsection (a) of section 1303 provides that, unless the method of disposition is adopted to evade the provisions of the Act, it shall not apply to the: (1) Sale or lease of real estate not pursuant to a common promotional plan to offer or sell 50 or more lots in a subdivision; (2) sale or lease of lots in a subdivision, all of which are 5 acres or more in size; (3) sale or lease of improved land on which there is a residential, commercial, or industrial building or land under a contract requiring that the seller erect such a building on the property within 2 years; (4) sale or lease of real estate pursuant to a court order; (5) sale of evidences of indebtedness secured by a mortgage or deed of trust on real estate; (6) sale of securities issued by a real estate investment trust; (7) sale or lease of real estate by any government or government agency; (8) sale or lease of cemetery lots; and (9) sale or lease of lots to any person who acquires them to engage in the business of constructing residential, commercial, or industrial buildings or for resale or lease to persons engaged in such business. With respect to this last exemption (9) it is not the intent of the committee to have the exemption apply to sales of land to those not normally engaged in the business of dealing in land for the purpose of supplying building lots to builders. The committee expects the Secretary to administer the law to include within the protections of the legislation sales of small amounts of land to casual investors.

Subsection (b) provides that the Secretary may exempt subdivisions or lots within a subdivision from any of the provisions of the act, if he finds that coverage of the subdivision or lots is not necessary to the public interest and for the protection of purchasers due to the small amount involved or the limited character of the offering.

PROHIBITIONS RELATING TO THE SALE OR LEASE OF LOTS IN  
SUBDIVISIONS

Subsection (a) of section 1304 makes it unlawful for any developer or agent, directly or indirectly, to use any means or instruments of transportation or communication in interstate commerce or the mails: (1) To sell or lease any lot in any subdivision unless a statement of record covering the lot is in effect pursuant to section 1307 and a printed property report in accordance with section 1308 is furnished the purchaser before he signs the contract or agreement for sale or lease; and (2) in selling, leasing, or offering to sell or lease any lot in a subdivision to employ any device, scheme, or artifice to defraud; to obtain money or property by misrepresenting any information included in the statement of record, property report, or any other information pertinent to the lot on which the purchaser relies; or to engage in any transaction, practice, or course of business which operates or would operate as a fraud or deceit on a purchaser.

Subsection (b) provides that a purchaser may void a contract or agreement for sale or lease of a lot covered by the act if he was not given a copy of the property report before or at the time of his signing it. It further provides that, where a purchaser receives the property report within 48 hours of his signing the contract or agreement, he may revoke it within 48 hours, and the contract or agreement shall so pro-

vide. However, this latter provision shall not apply in the case of a purchaser who: (1) Has read the report and inspected the lot in advance of signing the contract or agreement; and (2) acknowledges such by his signature.

#### REGISTRATION OF SUBDIVISIONS

Subsection (a) of section 1305 provides that a subdivision may be registered by filing a statement of record with the Secretary meeting the requirements of the act and the rules and regulations prescribed by the Secretary. The registration would be deemed effective only with respect to those lots specified.

Subsection (b) provides for payment to the Secretary by the developer of a registration fee, not in excess of \$1,000, in accord with a schedule to be fixed by regulations of the Secretary.

Subsection (c) provides that the filing of a statement of record or an amendment takes place on its receipt accompanied by payment of the fee provided in subsection (b).

Subsection (d) requires that information contained in or filed with a statement of record be available to the public under regulations prescribed by the Secretary, with copies to be furnished at a reasonable charge.

#### INFORMATION REQUIRED IN STATEMENT OF RECORD

Section 1306 provides that the statement of record shall contain information and be accompanied by documents specified as follows: (1) The name and address of each person having a substantial interest in the lots in the subdivision covered by the statement and the extent of the interest (not meant to include owners of lots not to be offered to the public or shareholders of the developer, except substantial holders, officers, and directors); (2) a legal description of the subdivision, a statement of its total area and topography, and a map showing the division proposed and the dimensions of the lots and their relation to existing streets and roads; (3) a statement of the condition of title to the land, including a statement of encumbrances; (4) a statement of the general terms and conditions, including the range of selling prices or rents at which the land is to be disposed of; (5) a statement of the present condition of access to the subdivision, the availability of sewage-disposal facilities and other public utilities (including water, electricity, gas, and telephone), the proximity in miles to nearby municipalities, and the nature of any improvements to be installed by the developer together with his estimated schedule for completion; (6) where there is a blanket encumbrance affecting the subdivision or any portion of it, a statement of the consequence to an individual purchaser if there is failure to meet the obligation and the steps taken, if any, to protect the purchaser if there is such a failure; (7) a copy of the articles of incorporation or other organizational documents of the developer, or, if the purported holder of legal title is a person other than the developer, copies of these documents for that person; (8) copies of the instrument establishing title in the developer or other person and copies of any instrument creating a lien or encumbrance upon the title, or copies of the opinion or opinions of counsel on the title, or copies of the title insurance policy guaranteeing

the title; (9) copies of all forms of conveyance to be used in selling or leasing lots to purchasers; (10) copies of instruments creating easements or other restrictions; (11) such certified or uncertified financial statements as required by the Secretary; and (12) other information, documents, and certifications as required by the Secretary as being reasonably necessary or appropriate for the protection of purchasers.

#### TAKING EFFECT OF STATEMENTS OF RECORD AND AMENDMENTS THERETO

Subsection (a) of section 1307 provides that a statement of record, or any amendment, shall take effect on the 30th day after filing or at an earlier date if the Secretary so determines. If an amendment is filed prior to the effective date, the statement shall be deemed to have been filed when the amendment was filed, unless it was filed with consent of the Secretary or pursuant to his order. In such case, the amendment would be treated as having been filed as of the date of the filing of the statement of record. When additional lands are offered for disposition, a developer may consolidate the statement with any prior statement of record offering subdivided land under the same promotional plan. The consolidated statement must include any material changes in the information contained in the earlier statement.

Subsection (b) provides that the Secretary must advise the developer within a reasonable time after filing and prior to the effective date if the statement or any amendment appears on its face to be incomplete or inaccurate in any material respect. The notification suspends the effective date until 30 days after the developer files such additional information as the Secretary requires. On receipt of notification, the developer may request a hearing which must be held within 20 days of the Secretary's receipt of the request. An appeal may be made from the decision handed down at this hearing as prescribed in section 1311.

Subsection (c) requires the developer to file an amendment to a statement if any change occurs subsequent to its effective date which affects any material fact required to be contained in the statement. On receipt of the amendment, the Secretary may suspend the statement of record until the amendment becomes effective, if he determines suspension to be necessary or appropriate in the public interest or for protection of purchasers.

Subsection (d) permits the Secretary to suspend a statement of record if it appears to him that it includes an untrue statement of a material fact or omits to state a material fact required to be stated or necessary to make the statement not misleading. An order suspending the statement may be issued by the Secretary after notice by personal service, or the sending of confirmed telegraphic notice, and opportunity for a hearing within 15 days of notice. When the statement is amended in accordance with the order, the Secretary shall so declare and the order shall cease to be effective.

Subsection (e) empowers the Secretary to make an examination to determine whether an order should issue under subsection (d). For such purpose, the Secretary or his designee shall have access to and may demand production of books and papers of the developer, any agent, or any other person in respect to any matter relevant to the ex-

amination. If the developer or his agents fail to cooperate, the Secretary may by order suspend the statement of record.

Subsection (f) permits any notice required under this section to be sent to or served on the developer or his authorized agent.

#### INFORMATION REQUIRED IN PROPERTY REPORT

Subsection (a) of section 1308 provides that a property report shall contain any information in the statement of record and amendments to it that the Secretary deems necessary, as well as any other information prescribed under rules and regulations of the Secretary as necessary or appropriate. The property report need not include the documents referred to in paragraphs (7) to (11) of section 1306.

Subsection (b) requires that the property report not be used for any promotional purposes before the statement of record becomes effective and then only if used in its entirety. It prohibits any person from advertising or representing that the Secretary approves or recommends the subdivision. It further provides that no portion of the property report may be underscored, italicized, or printed in larger or bolder type than the rest of the statement unless required or permitted by the Secretary.

#### COOPERATION WITH STATE AUTHORITIES

Subsection (a) of section 1309 provides that the Secretary shall cooperate with State authorities responsible for regulating the sale of lots in subdivisions subject to the act. It permits the Secretary to accept for filing under, and declare effective as a statement of record, material filed with and found acceptable by such authorities.

Subsection (b) provides that nothing in the act shall affect the jurisdiction of any State real estate commission.

#### CIVIL LIABILITIES

Subsection (a) of section 1310 permits a person who has acquired from a developer or his agent a lot covered by a statement of record which, when it became effective, contained an untrue statement of a material fact or omitted to state a material fact required to be stated and which was uncorrected at the time of acquisition, to sue the developer, unless it is proved that the purchaser knew of the untruth or omission at the time of acquisition.

Subsection (b) provides for suit against a developer or agent who sells or leases a lot: (1) In violation of section 4 (requiring a statement of record and a property report) or (2) by use of a property report containing an untrue statement of a material fact or omitting to state a material fact required to be stated.

Subsection (c) provides that a person suing under subsection (a) or (b) may recover damages measured by the difference between the amount paid for the lot and the cost of improvements to it and the lesser of the value of the lot together with improvements at the time suit was brought, or the price at which the lot was sold in a bona fide transaction either before suit was brought or after suit was brought but before judgment. The court may require an undertaking for the payment of costs, including attorney's fees. Costs for reasonable

expenses may be assessed against a party litigant if the court believes the suit or the defense was without merit. The assessment may reimburse for reasonable expenses.

Subsection (d) provides for contribution from any person who, if sued separately, would have been liable to make the same payment.

Subsection (e) provides that the amount recoverable under this section may not exceed the sum of the purchase price of the lot, the cost of improvements to it, and reasonable court costs.

#### COURT REVIEW OF ORDERS

Subsection (a) of section 1311 permits any person aggrieved by an order or determination of the Secretary, which was issued after a hearing, to obtain review in the U.S. court of appeals for the circuit in which the person resides or has his principal place of business or in the U.S. Court of Appeals for the District of Columbia. A written petition must be filed within 60 days of the entry of the order or determination. A copy of the petition must be transmitted to the Secretary, who must file with the court the record on which the order or determination was based. The court will not consider an objection unless it was first urged before the Secretary. His findings as to the facts shall be conclusive, if supported by evidence. On a proper showing by either party, the court may order additional evidence to be taken before the Secretary in a manner and on such terms and conditions as the court prescribes. The Secretary may modify his findings as to the facts based on additional evidence taken. The jurisdiction of the court shall be exclusive and its judgment and decree subject to review by the Supreme Court.

Subsection (b) provides that commencement of proceedings under subsection (a) will not stay the Secretary's order unless specifically ordered by the court.

#### LIMITATION OF ACTIONS

Section 1312 would bar the bringing of an action to enforce any liability created under section 1310(a) or (b)(2) unless it is brought within 1 year after discovery of the untrue statement or the omission or after the discovery should have been made. If the action is to enforce a liability established under section 1310(b)(1), it must be brought within 2 years after the violation upon which it is based. No action under the act may be brought more than 3 years after the sale or lease of the property.

#### CONTRARY STIPULATIONS VOID

Section 1313 provides that any condition, stipulation, or provision requiring a person to waive compliance with the act, or rules and regulations of the Secretary issued pursuant to it, shall be void.

#### ADDITIONAL REMEDIES

Section 1314 provides that rights and remedies under the act are in addition to other rights and remedies at law or equity.

## INVESTIGATIONS, INJUNCTIONS, AND PROSECUTION OF OFFENSES

Subsection (a) of section 1315 authorizes the Secretary, whenever it appears to him that a person is engaged or about to engage in acts or practices which violate the act or any rule or regulation prescribed pursuant to it, to bring an action in any U.S. District Court or the U.S. District Court for the District of Columbia to enjoin the prohibited acts or practices. Upon a proper showing, a permanent or temporary injunction or restraining order will be granted without bond. The Secretary is further authorized to transmit evidence concerning prohibited acts or practices to the Attorney General who may institute criminal proceedings.

Subsection (b) authorizes the Secretary to make investigations to determine if any person has violated or is about to violate the act or rules or regulations prescribed pursuant to it. The Secretary may require or permit a person to file a written statement, under oath or otherwise, as to all the facts and circumstances of the matter to be investigated. The Secretary may publish information concerning violations of the act. He may also investigate facts, conditions, practices, or matters he deems necessary or proper to aid in enforcement of the act, in prescribing rules and regulations, or in securing information to serve as a basis for recommending further legislation.

Subsection (c) empowers the Secretary or his designee to administer oaths and affirmations, subpoena witnesses, compel their attendance, take evidence, and require the production of any books, papers, correspondence, memorandums or other records relevant or material to an investigation or proceeding under the act. Attendance of witnesses and production of records may be required from any place in the United States or any State at any designated hearing place.

Subsection (d) provides that, in case of contumacy or refusal to answer a subpoena, the Secretary may invoke the aid of any court of the United States within whose jurisdiction the investigation or proceeding is carried on, or where the person whose cooperation is being sought resides or carries on business. The court may issue an order requiring the person to appear before the Secretary and produce records or to testify. Failure to obey the court order may be punished as contempt. Process may be served in the person's judicial district or wherever he may be found. Any person who without cause fails to attend, testify, or answer any lawful inquiry or to produce books, records, correspondence, memorandums and other records and documents subpoenaed, if in his power to do so, will be guilty of a misdemeanor and subject to a \$1,000 fine or imprisonment of up to 1 year, or both.

Subsection (e) provides that no person shall be excused from attending and testifying or producing the materials subpoenaed in any case or proceeding instituted by the Secretary on the ground that the testimony or evidence may tend to incriminate or subject him to a penalty or forfeiture. No such individual, however, shall be prosecuted or subjected to penalty or forfeiture if, after claiming his privilege against incrimination, he is compelled to testify or produce evidence, documentary or otherwise, except as to any perjury committed in so testifying.

## ADMINISTRATION

Subsection (a) of section 1316 vests authority and responsibility for administering the Act in the Secretary of Housing and Urban Development and gives him authority to delegate any functions, duties and powers under the act to employees of the Department or to boards of such employees. The persons to whom delegations are made as to hearing functions, duties, and powers are to be appointed and serve the Department in compliance with sections 3105, 3344, 5362, and 7521 of title 5 of the United States Code. This subsection also authorizes the Secretary to prescribe rights of appeal from decisions of the hearing examiners.

Subsection (b) requires that hearings be public and appropriate records be kept.

## UNLAWFUL REPRESENTATIONS

Section 1317 provides that the fact that a statement of record has been filed or is in effect does not constitute a finding by the Secretary that it is true and accurate on its face or that the Secretary has passed on the merits of or approved a subdivision. It makes it unlawful to make or cause any representation to be made to a prospective purchaser to the contrary to this.

## PENALTIES

Section 1318 establishes penalties for any person who willfully violates the provisions of the act, or rules and regulations issued pursuant to it, or who willfully makes an untrue statement of a material fact in a statement of record or property report or omits to state a material fact required to be included. It prescribes a fine of not more than \$5,000 or imprisonment for not more than 5 years, or both.

## RULES, REGULATIONS, AND ORDERS

Section 1319 authorizes the Secretary to make, issue, amend, and rescind rules, regulations and orders necessary or appropriate to the exercise of his functions and powers under the act. It permits the Secretary to classify persons and matters within his jurisdiction and prescribe different requirements for different classes of persons or matters.

## JURISDICTION OF OFFENSES AND SUITS

Section 1320 provides that the U.S. district courts and the U.S. District Court for the District of Columbia shall have jurisdiction of offenses and violations under the act and the rules and regulations prescribed pursuant to it. It provides these courts concurrent jurisdiction with State courts for all suits in equity or at law to enforce liabilities or duties created by this act. Suits may be brought in the district where the defendant is found, is an inhabitant, or transacts business, or where the offer or sale took place if the defendant participated in it. Process may be served in any other district where the defendant is an inhabitant or may be found. It prohibits removal of cases brought in State courts of competent jurisdiction to any court of

the United States, except when the United States or any officer or employee of the United States, in his official capacity, is a party. It also prohibits assessment of costs for or against the Secretary in any proceeding under the act.

#### APPROPRIATIONS

Section 1321 would authorize the appropriation of such funds as are needed to carry out the purposes of the act.

#### EFFECTIVE DATE

Section 1322 provides that the act shall be effective 180 days after enactment.

### **Title XIV—Ten-year Housing Program**

#### DECLARATION OF PURPOSE

Section 1401 of the bill declares that the national commitment made in the Housing Act of 1949 to the goal of "a decent home and a suitable living environment for every American family" can best be attained through a definite plan providing for the effective utilization of available resources and capabilities existing in both the public and private sectors of the economy over a fixed period of 10 years.

This statement and finding by Congress would be in furtherance of the policy declared in 1949 and would bring it more into current focus by stressing the need for housing goals in the immediate future as well as for a plan by which they may be brought to public realization. Such a legislative pronouncement would also be in line with the recent proposal by the President to construct 6 million federally assisted housing units for low and moderate income families over the next 10 years.

#### REPORT OUTLINING PLAN

Section 1402 of the bill would require the President to make a report to Congress on or before January 15, 1969, setting forth a 10-year plan covering the period June 30, 1968, to June 30, 1978. This plan would contain the number of units anticipated in both the Government-assisted and the conventional markets for each of the 10 years, together with a statement of what reduction in substandard units is expected, an estimate of costs in the various Federal programs for legislative action. The report would also include an estimate of residential mortgage market needs, including availability and flow of mortgage funds, for the coming year, and such other data and recommendations as are deemed pertinent.

#### PERIODIC REPORTS

Section 1403 of the bill would require annual reports by the President on January 15 of each year, which reports would compare the results for the previous year with the goals set forth in the plan for that year. These annual reports would be required to give reasons for not meeting objectives, if that be the case, and would also set forth

any revised objectives as would be necessary, together with an estimate of the availability and flow of mortgage funds. The annual reports would also provide an analysis of the monetary and fiscal policies for the coming calendar year required to carry out the objectives of the plan, and could contain such further legislative recommendations as deemed appropriate by the President.

#### FINAL REPORT

Section 1404 of the bill would provide for a final report by the President on January 15, 1979, showing in detail the success or failure of the plan and an analysis of the reasons therefor.

The committee believes that there should be unification toward national housing objectives among the several departments and agencies of the Federal Government. While the Department of Housing and Urban Development is primarily involved in this subject, both the Department of Agriculture and the Veterans' Administration have direct contact with the public regarding it. The operations of the Federal Reserve Board respecting the flow of credit and the volume of borrowings permitted through the Federal Home Loan Bank Board, as well as the marketing and purchasing prices and policies of the Federal National Mortgage Association should not be determined or conducted without a view toward achieving some minimum volume of housing production consistent with the need for both housing and general economic stability.

It is the view of the committee that the stating in definite terms of annual minimum housing goals with this added requirement of giving specific reasons in case they are not met, can do much toward achievement of the volume and stability of housing production that is so essential to the orderly growth of the country.

### Title XV—Miscellaneous

#### MODEL CITIES

Section 1501 of the bill would authorize appropriation of \$12 million for planning grants and technical assistance for comprehensive model cities programs in fiscal year 1969. It would also authorize appropriation of \$1 billion for fiscal year 1970 for supplementary grants and for other purposes under the model cities program. It would further provide that any amounts authorized for the model cities program but not appropriated may be appropriated in any succeeding fiscal year.

The model cities legislation, enacted in 1966, provided authorizations for appropriation for planning and technical assistance grants for fiscal years 1967 and 1968. These funds are expended through technical assistance and 80 percent planning grants in advance of financial assistance to approved model city programs. Planning grants are designed to assist cities in their planning and preparation for comprehensive programs. The committee feels that in the interest of continuity and advance planning, this authorization should be continued at the same level for an additional year so that the program may continue without interruption.

The current authorization of \$500 million for supplemental grants, relocation grants, technical assistance and 80 percent grants for administrative expenses expires at the end of fiscal year 1969. In order to assure the availability of sufficient funds for the action programs of the model cities, this section authorizes the appropriation of \$1 billion for fiscal year 1970. This authorization will provide the grant funds needed for the model cities' program and affirm the continuing Federal commitment to support the efforts of the participating cities to eliminate the social and physical deterioration which they have recognized but cannot cure without increased Federal assistance.

#### URBAN RENEWAL DEMONSTRATION GRANT PROGRAM

Section 1502 of the bill would amend section 314 of the Housing Act of 1954 which provides for Federal grant assistance for developing, testing, and reporting methods and techniques and carrying out demonstrations and other activities for the prevention of slums and urban blight. This amendment would expand the program provided under section 314 by permitting grants to be made to nonprofit organizations as well as to public bodies; by increasing the maximum level of Federal assistance for a demonstration project from two-thirds to 90 percent; and by increasing the amount of funds available to the program from \$10 million to \$20 million. It also provides that when a demonstration project is to be carried out by a nonprofit organization, the activities and undertakings assisted under section 314 are not to be inconsistent with the program of the interested local public agency for the locality directly involved. The committee believes that a nonprofit group receiving a grant should coordinate its plans with the local authorities.

The committee feels that the urban renewal demonstration program has proved invaluable in providing a means for exploring new approaches in dealing with the problems of slums and urban blight. By providing funds which can be focused on a particular aspect of the problem or on a particular new approach, it has been possible to achieve new insights which a local urban renewal agency could not normally achieve as part of its regular activities of dealing with these problems.

As the achievements of this program indicate, it is a necessary element in the Federal Government's arsenal of weapons to deal with the problems of slum and blight. However, the flexibility of the program has been limited by the present requirements that grants may only be made to public bodies and that the grant cannot exceed two-thirds of the cost of carrying out the demonstration.

Although the committee considered an increase in the maximum level of Federal assistance from two-thirds to 100 percent of the cost of a demonstration project, it feels that an increase in this level to 90 percent will best contribute to the most effective utilization of this program by the participating nonprofit organizations and public bodies.

The present authorization is expected to be exhausted by the middle of fiscal year 1969. Yet, the renewal program is becoming more complex as additional private, as well as public, resources are devoted to

slum prevention and elimination. As new problems are identified, new approaches must be devised to meet them. The increase in authorization would enable this program to continue to meet these needs.

#### AUTHORIZATION FOR URBAN INFORMATION AND TECHNICAL ASSISTANCE SERVICES PROGRAM

Section 1503 of the bill would authorize appropriation of not to exceed \$5 million for fiscal year 1969 and not to exceed \$15 million for the fiscal year ending June 30, 1970, to carry out the purposes of the title IX program. Under this program matching grants are made to States to help them provide urban information and technical assistance services to communities of less than 100,000 persons. This program was authorized in the Demonstration Cities and Metropolitan Development Act of 1966.

The present authorization for the program expires with the current fiscal year. The committee feels that the continuation of the title IX program would make a substantial contribution to encouraging State involvement in urban affairs by helping the States to provide the advisory and information services which small communities need but so often cannot afford.

This program can provide a network of compatible and coordinated State urban information systems which would facilitate information exchanges at various levels of government. It can also harness information collection and retrieval technology so that data that has been collected can be used for solving similar problems.

#### ADVANCES IN TECHNOLOGY IN HOUSING AND URBAN DEVELOPMENT

Section 1504 of the bill authorizes the appropriation of such amounts as may be necessary to continue the advances in technology in housing and urban development programs authorized by section 1010 of the Demonstration Cities and Metropolitan Development Act of 1966. The present authorization expires at the end of this fiscal year.

This section would also permit the letting of research contracts for periods of up to 4 years instead of the present authorized 2-year period.

This program is designed to test and demonstrate new and improved techniques and methods of applying technological advances to housing construction, rehabilitation, and maintenance and to urban development activities. It directs the Secretary of HUD to encourage and promote acceptance and application of modern techniques by all segments of the housing industry. It does not involve basic research. Rather, it is intended to encourage application of existing advances in technology created by private research and development efforts so as to assist industry in reducing the costs and improving the quality of housing construction.

Authorization of appropriations in such amounts as required will permit the program to be responsive to the need to test, demonstrate, and encourage the use of continuing technological advances. In addition, in order to accomplish effectively the program's goals, the Secretary would be given discretion to enter into contracts for up to a 4-year period. In many cases, 2 years is not adequate to test fully and demonstrate a new advance in technology.

## COLLEGE HOUSING

Section 1505 of the bill would amend title IV of the Housing Act of 1950 by adding to the existing college housing direct loan program a new program to provide additional Federal assistance for college housing and related facilities through a program of annual debt service grants. The new grant program would be used to reduce the borrower's annual debt service payments on private market loans to the average annual debt service that would have been required if the loan was based on the rate charged on loans under the direct loan program. This Federal rate is presently 3 percent. The combination of the direct loan program, supplemented by the maximum program level in authorized annual debt service grants, should provide Federal financial assistance for annual construction that is several times as large as the direct loan program alone.

Annual grants to an educational institution with respect to any project could be made over a fixed period up to 40 years. The total amount of annual grants contracted to be made could not exceed \$10 million and this amount would be increased by an additional \$10 million on July 1, 1969.

The committee has found that there is a need for vast increases in student housing to meet future enrollment increases; to alleviate overcrowding resulting from past enrollments; to make a dent on the deferred rehabilitation and replacement of inadequate existing housing; and to assure that no worthy student is denied admission because housing space is not available. It appears, however, that the majority of higher educational institutions, and especially the public institutions which cannot resist expansion without decreasing public education expectations, cannot provide housing at reasonable cost to most students if they have to bear the total cost of private market borrowing. The availability of adequate financial assistance will alleviate this problem and should generate effective action by colleges and universities which have been discouraged because direct Federal loans are meeting only a fraction of the demand. This problem has been aggravated because private market interest rates have increased substantially.

The lack of adequate housing may be the bottleneck in meeting our growing higher educational needs, since the relative expansion capacity of academic facilities cannot be fully utilized without available student housing at the lowest possible cost to users of the housing facilities. The combined program of direct loans plus annual grants should go far in helping to meet the need for student housing, dining facilities, student centers or unions, and related service facilities. The need may be even greater than anticipated when returning Vietnam veterans take advantage of their GI educational benefits.

The new program of annual grants, which would be made on the basis of the same maximum development cost as for direct loans, would be used primarily to reduce the net borrowing cost for those institutions that can make long-term loans in the private market at a reasonable cost. Direct loans would generally be made to those institutions which cannot borrow all or part of their funds in the private market at reasonable interest rates. Thus, it is possible that an insti-

tution could receive a direct loan for part of its borrowing needs to cover late maturities on which no private market bids are made, and could receive annual grants applicable only to its private market loan for the shorter maturities. It is anticipated that the annual Federal grants to reduce net interest costs, coupled with the advantages inherent in the Federal tax exemption privilege enjoyed by public institutions, will enhance the security of these borrowers so that many which have not had favorable market acceptability in the past will be able to make long-term loans at lower net interest rates.

The new grant program is subject to the restriction now applicable to direct loans to the effect that the related "construction will be undertaken in an economical manner, and that it is not or will not be of elaborate or extravagant design or materials." This will preclude financial assistance in the future, as it has in the past, for the minority of student housing which exceeds this limitation.

While the committee believes that this additional method of financing the college housing program will be very helpful, it further believes that colleges, when borrowing in the private market, should obtain loans at the lowest cost possible. The committee therefore expects the Secretary of HUD to promulgate such rules and regulations as are necessary to assure that colleges are obtaining loans at the lowest interest rates available so that the Federal subsidy will be held to a minimum.

#### FEDERAL-STATE TRAINING PROGRAMS

Section 1506 of the bill would provide for extending the program of matching grants authorized under title VIII of the Housing Act of 1964 to permit grants to States for the training of subprofessional and technical personnel as well as professional persons and would permit persons employed or in training to be employed by private nonprofit organizations involved in housing and community development programs to be eligible for this training assistance. The programs which would be authorized for assistance under this amendment could be carried out by the State in cooperation with business firms, labor unions, and other interested organizations as well as universities and urban centers.

The amendment would also allow grant assistance to be extended to Guam, American Samoa, and the Trust Territory of the Pacific in order to further meet the needs of these areas for trained and capable housing and community development technical and professional personnel.

These changes could enable the States to undertake training programs of a broader scope to deal with the ever-present problem of insufficient personnel available to administer and work in programs relating to community development and housing. With the added emphasis, set out in this bill, on attacking the problem in these areas confronting the Nation, all the personnel, for employment by both public and nonprofit bodies, that can be trained will be needed.

#### ADDITIONAL ASSISTANT SECRETARY OF HOUSING AND URBAN DEVELOPMENT

Section 1507 of the bill would authorize the appointment of an additional Assistant Secretary in the Department of Housing and Urban

Development. Although the Secretary could utilize this position in carrying out any of the statutory responsibilities of the Department, this Assistant Secretary would serve as the Secretary's principal assistant in providing leadership in organizing an effective, Government-wide, urban-oriented research and development program to foster innovation in the field of housing and urban affairs. He would also provide engineering and technical advice to the Office of the Secretary and to other assistant secretaries, as appropriate, and he would plan, organize, and administer the departmental research and development program.

The addition of this Assistant Secretary position in the Department's organization would be in accord with the increased importance of research and development in the Department since it was established in 1965.

#### INTERNATIONAL HOUSING

Section 1508 of the bill would rewrite section 604 of the Housing Act of 1957 to clarify the authority of the Secretary of HUD to exchange data relating to housing and urban development with other countries, or assemble such data where the data would be beneficial in carrying out his responsibilities. This authority does not exclude or limit in any way the authority of other departments and agencies of the U.S. Government to exchange and assemble data and carry out all other activities of the same type and in the same manner as authorized by this amendment.

The section would also clarify the Department's authority to employ private persons to participate in the various intergovernmental or international meetings that the Department attends or sponsors. In addition, the section would provide express authority for the Department to accept funds or other donations from international organizations, foreign countries and private foundations in connection with activities carried on by the Department under section 604, and which benefit such organizations. For example, a conference sponsored by the Department may involve administrative expenses which should properly be shared by those private foundations which participate in such activities. The intent of the amendment is not to provide for subsidizing the Department's activities, but to facilitate proper cost sharing.

#### LOW-RENT PUBLIC HOUSING—CORPORATE STATUS

Section 1509 of the bill would repeal obsolete provisions of the U.S. Housing Act of 1937 and amend the Government Corporation Control Act to delete reference to the Federal Public Housing Authority (and U.S. Housing Authority). When the U.S. Housing Act of 1937 was first enacted, there was established a special corporation known as the U.S. Housing Authority to perform the Federal low-rent housing functions. The Authority was capitalized with \$1 million of capital stock provided by the Treasury. Under the Department of Housing and Urban Development Act, all functions of the corporation were vested in the Secretary of the Department. The corporate status, capital stock, and the \$1 million provided by the Treasury now serve no purpose. This section would accordingly repeal the provisions concerning corporate status and return the \$1 million to the Treasury.

Saving provisions provide for continued auditing by the General Accounting Office of separate accounts maintained with respect to the functions under the 1937 act.

#### ELIGIBILITY FOR RENT SUPPLEMENT PAYMENTS

Section 1510 of the bill would extend eligibility to participate in the rent supplement program, under section 101 of the Housing and Urban Development Act of 1965, to two projects located in Harlem in New York City. The projects are presently receiving supplement payments on an experimental basis for a short fixed term as part of a joint undertaking by the Office of Economic Opportunity, the New York City Rent and Rehabilitation Administration, and the Department of Housing and Urban Development to show how a combination of improved housing, job training, and social services would work to increase the income producing capacity of low-income tenants living in the area. The projects (which were a single project at the time) were approved for mortgage insurance under the section 221(d)(3) below-market interest rate program on April 15, 1965, shortly before enactment of the Housing and Urban Development Act of 1965, on August 10, 1965, and therefore are presently ineligible for rent supplement assistance.

The projects involved are located on 114th Street between Seventh and Eighth Avenues, and include 37 old-law tenement buildings which are being extensively rehabilitated to provide good housing for approximately 1,600 individuals in 450 family units. The rehabilitation is expected to be completed on all units this June (1968).

Limitations in its statutory authority restrict the OEO supplement payments to a short term which will end in the early part of fiscal year 1970. These payments range from \$20 to \$60 a month.

Many of the low-income residents of these projects will not experience the improvement in income needed to dispense with rent supplement payments within the brief period permitted under the present supplement arrangement. Unless the benefits of the rent supplement program are applied to these projects, many of the low-income residents will be forced to move out when the present short-term assistance expires. The objective of the undertaking would be seriously impaired if regular rent supplement coverage is not made available after the short-term assistance ends.

The committee believes that these two projects are exceptional cases and understands that there are no similar cases which would need such specific treatment in the future.

#### CONSOLIDATIONS OF LOW-RENT PUBLIC HOUSING PROJECTS IN THE DISTRICT OF COLUMBIA

Section 1511 of the bill would allow the National Capital Housing Authority in Washington, D.C., to consolidate, pursuant to section 15(6) of the United States Housing Act of 1937, into its annual contributions contract for its 8,423 units of low-rent housing under title II of the District of Columbia Alley Dwelling Act, the operating income and operating expense accounts for its 72 units of low-rent housing under title I of such act.

Title I governs low-rent public housing provided prior to the enactment of the United States Housing Act of 1937, whereas title II governs low-rent public housing on the same basis as projects established in other cities pursuant to the 1937 act.

The proposed consolidation would enable the NCHA to merge its title I operating accounts with its title II accounts. Since there is no capital debt applicable to the title I projects there would be no increase in the fixed annual contribution for which the Government is obligated under the annual contributions contract applicable to the title II projects.

This consolidation would allow the NCHA to draw upon its general reserves to meet the needs of the title I units. There are no reserves available to NCHA for these units because, under the previous method of funding this program, all receipts in excess of annual operating expenses were covered into the Treasury as miscellaneous receipts. Without such reserves, NCHA has to depend upon its annual operating income from these units to fund any major repairs or modernization work that the units might need. At the present time, the 72 title I units are in fact being managed and operated as part of the total low-rent housing supply of NCHA; the financial impact of consolidation would hardly be noticeable; almost three-fourths of all the title I expenses are already in fact being determined in the same way as if the projects were consolidated; and consolidation would lead to substantial administrative savings resulting from the elimination of separate accounting procedures for these projects.

The result of the proposed consolidation would be analogous to the situation which exists in many other communities where the local authorities are operating permanent PWA or Lanham Act (World War II) projects which were federally built and paid for and which are being operated under consolidated contracts by the local authorities.

#### URBAN RENEWAL PROJECT IN GARDEN CITY, MICH.

Section 1512 of the bill would require that the costs in connection with the construction of the Florence Primary School located within the Cherry Hill urban renewal project (Michigan R-46) in Garden City be counted as a local grant-in-aid to the project without regard to the date of commencement of construction. Through an inadvertence on the part of both the city and the Federal Government, the contract for a loan and capital grant for the Cherry Hill project was authorized 4 days too late to qualify the school for credit. This fact was not discovered until the project was completed, and local and Federal officials had believed all along that the school was eligible for credit. The committee feels that this is a very exceptional case.

#### URBAN RENEWAL PROJECT IN SACRAMENTO, CALIF.

Section 1513 of the bill would require that costs in connection with the construction of a storm drainage system located within the Capitol Mall Riverfront urban renewal project (California R-67) in Sacramento, Calif., be counted as a local grant-in-aid to the project without

regard to the date of commencement of construction. The Redevelopment Agency of Sacramento filed a timely urban renewal application and under ordinary circumstances the expenditures made for the construction of the storm drainage system could have been counted as a local grant-in-aid. However, because of California's "proposition 14," the Department of HUD (then the Housing and Home Finance Agency) withheld approval of all California applications until proposition 14 was declared unconstitutional by the State supreme court. By the time this was done, the 3-year statutory requirement for counting this expenditure as a local grant-in-aid had expired. Since the approval of this particular application was held up by Federal officials, the committee believes that this is an exceptional case and that Sacramento should be allowed credit for the construction of the storm drainage system.

#### SELF-HELP STUDIES

Section 1514 of the bill would amend section 207 of the Housing Act of 1961, which authorizes grants for the purpose of developing and demonstrating new or improved means of providing housing for low-income persons and families, to make it clear that such grants may be made for the purpose of studying self-help by low-income persons in constructing, rehabilitating, and maintaining housing for themselves and the methods of selecting, involving, and directing such persons in self-help activities.

The Secretary of Housing and Urban Development would be directed to make a report to Congress, within 1 year after the date of enactment of this act, setting forth the results of the self-help studies and demonstrations carried out under section 207 together with such recommendations as he deems appropriate.

#### EARTHQUAKE STUDY

Section 1515 of the bill would amend section 5 of the Southeast Hurricane Disaster Relief Act of 1965 by extending the date the Secretary of HUD is required to report his findings and recommendations on earthquake insurance from October 31, 1968, to June 30, 1969.

An extension of time for this study would allow the Secretary to present a more complete and conclusive report to the Congress. In conducting studies such as this, it is necessary to collect and analyze great quantities of raw data and the number of qualified professionals available for such work is very limited.

#### TECHNICAL AMENDMENTS

Section 1516(a) amends section 110(c) of the Housing Act of 1949 to make it clear that urban renewal project funds can be used for "the restoration of acquired properties of historical or architectural value."

Section 1516(b) amends section 110(d) of the Housing Act of 1949 to make it clear that grant-in-aid credit can be given for expenditures by a public body for the construction of foundations and platforms on air rights sites in urban renewal projects to the same extent that such work could now be done with project funds.

Section 1516(c) amends section 110(e) of the Housing Act of 1949 to make it clear that the restoration of historic properties can be carried out as an urban renewal project cost for those projects approved for three-fourths Federal grant assistance on a limited project cost basis. This clarification would naturally permit such expenditures to be included in existing, uncompleted projects, as well as those projects started after enactment of the bill.

Section 1516(d) amends section 1101(c) (3) of the National Housing Act to permit amortization of the mortgage term under the medical group practice facilities program to commence after completion of construction of the facility rather than at the time the mortgage is executed.

Section 1516(e) amends section 213(o) of the National Housing Act to clarify the authority of the Secretary to invest all moneys, not currently needed for the operation of the cooperative management housing insurance fund, in Government bonds or obligations, or in the purchase on the open market of debentures which are the obligation of the fund.

Section 1516(f) amends section 810(e) of the National Housing Act to permit an individual, who is approved by the Secretary, to be a mortgagor under the FHA section 810 housing program for military personnel or employees or personnel of NASA or AEC research or development installations.

#### HOME OWNERS' LOAN ACT OF 1933

Section 1517(a) (1) of the bill would authorize Federal savings and loan associations to invest in time deposits or certificates of deposit in banks insured by the Federal Deposit Insurance Corporation under regulations issued by the Federal Home Loan Bank Board. When the basic statute which authorizes the chartering of Federal savings and loan associations was drafted more than 30 years ago, time deposits were not in general use in the country as a whole. Therefore, at that time, there was no reason to provide Federal associations with authority to make such investments. Recently, time deposits issued by banks have become attractive short-term investments and the committee sees no reasons to deny Federal savings and loan associations the authority to take advantage of this investment opportunity.

Section 1517(a) (2) of the bill would amend that part of section 5(c) of the Home Owners' Loan Act of 1933 permitting a Federal savings and loan association to invest not over 1 percent of its assets in loans guaranteed by the President under section 224 of the Foreign Assistance Act of 1961, as amended. Such guarantees are authorized on loans which may be either for certain types of housing or for credit institutions engaged directly or indirectly in financing home mortgages. Section 221 of the Foreign Assistance Act of 1961 authorizes loan guarantees for housing projects and for other purposes in any friendly less-developed country.

The present section of this bill would not increase the 1 percent limitation now in section 5(c) of the Home Owners' Loan Act of 1933 but would add authority permitting such 1 percent to be used for

investments in housing project loans having the benefit of any guarantee under section 221 of the Foreign Assistance Act of 1961. The amendment would provide statutory authority for loans by Federal savings and loan associations to aid in the fostering of homeownership not only in Latin American countries but also in other developing nations which may have equal need for such aid.

Section 1517(b) of the bill would amend that provision of section 5(c) of the Home Owners' Loan Act of 1933 which authorizes a Federal savings and loan association to make loans for "property alteration, repair or improvement" without conforming to the first-lien requirements of the act. The amendment would remove any doubt that such loans may be made for the construction of new buildings related to residential use of the property, such as, for example, vacation homes. The existing 20 percent of assets limitation and the \$5,000 loan limitation would remain unchanged.

Section 1517(c) of the bill would amend the Home Owners' Loan Act to authorize a Federal savings and loan association to invest in loans to federally supervised financial institutions secured by investments in which the association has any statutory authority to invest directly. Under existing law, Federal savings and loan associations may purchase Government obligations but they may not lend on the security of such obligations. This amendment would permit any Federal association to use its excess cash to make loans to federally supervised financial institutions on the security of Government obligations.

#### FEDERAL HOME LOAN BANK ACT

Section 1518 of the bill would amend section 12 of the Federal Home Loan Bank Act to authorize any Federal home loan bank to acquire loans guaranteed under section 224 of the Foreign Assistance Act of 1961 or housing project loans guaranteed under section 221 of that act and to sell participations therein to any member of a Federal home loan bank desiring to participate in such investments. The authority granted by this section of the bill would be subject to regulation by the Federal Home Loan Bank Board.

Under existing law, a Federal savings and loan association is authorized to invest not over 1 percent of its assets in loans guaranteed under section 224 of the Foreign Assistance Act of 1961. Such loans relate to housing projects in Latin America and may be either for certain types of housing or for credit institutions engaged directly or indirectly in financing home mortgages. This authority would be expanded by section 1517(a)(2) of the Housing and Urban Development Act of 1968 to permit such associations, within the 1 percent limitation, to acquire and hold investments in housing project loans guaranteed under section 221 of the Foreign Assistance Act of 1961 in developing nations throughout the world.

For administrative reasons the minimum loan guaranteed under these programs is \$1 million, a loan too large for many savings and loan associations to make independently. The purpose of this provision of the bill is to permit a Federal home loan bank to make or purchase a loan eligible for investment by a Federal savings and loan association and guaranteed under the Foreign Assistance Act of 1961 and sell

participations therein to any member of a bank, thus permitting small associations to participate in these guaranteed loan programs.

This amendment would not affect the right of any association to invest independently in such guaranteed loans without utilizing the facilities of a Federal home loan bank.

#### FEDERAL RESERVE ACT

Section 1519 of the bill amends section 24 of the Federal Reserve Act to authorize construction loans up to 36 months in length as an exception to the limitation on real estate loans. (Under existing law, such construction loans may not exceed 24 months.)

## SECTION-BY-SECTION SUMMARY

*Section 1.*—Provides that the bill shall be cited as the “Housing and Urban Development Act of 1968.”

*Section 2.*—States the declaration of policy of the bill.

*Section 3.*—Provides that in administering programs authorized by sections 221(d)(3), 235, and 236 of the National Housing Act; the low-rent public housing program of the U.S. Housing Act of 1937; and section 101 of the Housing and Urban Development Act of 1965, the Secretary of the Housing and Urban Development shall require, to the greatest extent feasible, opportunities for employment arising in connection with construction or rehabilitation of housing assisted under such programs be given to lower income persons residing in the area of such housing.

### TITLE I—LOWER INCOME HOUSING

#### HOMEOWNERSHIP FOR LOWER INCOME FAMILIES

*Section 101.*—Adds a new section 235 to title II of the National Housing Act to establish a mortgage insurance program based on an interest rate subsidy to provide homeownership for lower income families. The interest rate subsidy payment which would be paid by the Secretary of the Housing and Urban Development to the mortgagee could not exceed the lesser of: (a) The difference between the monthly payment for principal, interest, and mortgage insurance premium for a market rate mortgage, and the amount the monthly payment would be for principal and interest with a 1-percent mortgage, or (b) the difference between 20 percent of the mortgagor's monthly income and the monthly payment under the mortgage. The subsidy payment would be available to a purchaser having an income not in excess of 70 percent of the limits prescribed for eligibility to occupy projects financed under the FHA section 221(d)(3) below-market interest rate program, except that 20 percent of the contract funds could be used to assist families with incomes above these limits. For each minor child in the household, \$300 would be deducted from family income. The interest subsidy payment would decrease as the homeowner's income rises.

The subsidy payment could only be made with respect to new or rehabilitated housing meeting the requirements of the FHA section 221(d)(2) sales housing program, the 234 condominium program, the 213 cooperative program, or section 221(h) as incorporated into the new section with some modifications. However, during the first 3 years after enactment assistance payments could be made with respect to existing housing as follows: 25 percent of the contract funds authorized by appropriation acts in the first year; 15 percent of the contract funds authorized in the second year; 10 percent of the contract funds authorized in the third year. In addition, payments could be made with respect to existing housing for displaced families, families with five

or more minors, or families living in public housing, as well as for families who purchase dwelling units released from the project mortgage for a 236 project or a rent supplement project. The maximum mortgage under the program would be \$15,000 (\$17,500 in high-cost areas), but each limit would be increased by \$2,500 for families of five or more persons. The section 221(d)(2) mortgage ceilings would be raised to the same level. Counseling services are authorized.

This section also authorizes contract authority subject to appropriations acts to finance the program in the following manner: \$75 million annually prior to July 1, 1969, which amount may be increased by \$100 million on July 1, 1969, and by an additional \$125 million on July 1, 1970.

#### CREDIT ASSISTANCE

*Section 102.*—Adds a new section 237 to title II of the National Housing Act to authorize mortgage insurance for families of low and moderate income who cannot qualify for mortgage insurance under existing FHA programs because of their credit histories or irregular income patterns, but who the Secretary finds are “reasonably satisfactory” credit risks and capable of homeownership with the assistance of budget, debt management, and related counseling provided by the Secretary. Mortgage insurance under this program would have to meet the requirements (other than credit and income requirements) under certain existing FHA single-family sales programs, except that the principal obligation of the mortgage could not exceed \$15,000 (\$17,500 in high-cost areas) and the mortgagor could not undertake a mortgage which, in combination with local real estate taxes, required monthly payments for principal and interest which exceeds 25 percent of the mortgagor’s income. The amount of insurance under this section is limited to \$200 million outstanding at any one time.

#### RELAXATION OF MORTGAGE INSURANCE REQUIREMENTS IN CERTAIN URBAN NEIGHBORHOODS

*Section 103.*—Amends section 223 of the National Housing Act by adding a new subsection (e) to give FHA a more flexible authority in providing financing for the repair, rehabilitation, construction, or purchase of properties located in older, declining urban areas by authorizing FHA to accept for insurance mortgages on properties which may not, because of the areas in which they are located, be able to meet all the normal eligibility requirements for insurance. Permits such mortgages to be accepted for insurance where FHA is able to establish that the areas are reasonably viable, giving consideration to the need for providing adequate housing for families of low and moderate income in such areas and that the properties are an acceptable risk in view of such consideration.

#### SPECIAL RISK INSURANCE FUND

*Section 104.*—Adds a new section 238 to title II of the National Housing Act to establish a “Special Risk Insurance Fund,” which fund is not intended to be actuarially sound and out of which claims would be paid on mortgages insured under sections 101 (home-

ownership assistance), 102 (credit assistance), 103 (properties in older, declining urban areas) and 201 (rental and cooperative housing for lower income families) of this bill. Payments on claims would be made in cash or debentures. Income such as insurance premiums and service charges in connection with these programs would be deposited in the new fund. Authorizes \$5 million advance from general insurance fund to establish new fund, which is repayable and authorizes appropriations when necessary to supplement and maintain adequacy of the new fund.

#### CONDOMINIUM AND COOPERATIVE OWNERSHIP FOR LOW AND MODERATE INCOME FAMILIES

*Section 105.*—Amends section 221 of the National Housing Act by adding new subsections (i) and (j) to permit section 221(d)(3) below-market interest rate rental projects: (1) To be converted to condominium ownership; or (2) to be converted to cooperative ownership. Families purchasing condominium or cooperative units would be generally required to meet income limits established for occupancy under the 221(d)(3) below-market interest rate program.

#### ASSISTANCE TO NONPROFIT SPONSORS FOR LOW AND MODERATE INCOME HOUSING

*Section 106.*—Establishes a new program within HUD under which the Secretary may provide technical assistance to nonprofit sponsors of low and moderate income housing. Also authorizes the Secretary to make non-interest-bearing loans to nonprofit organizations for financing up to 80 percent of preconstruction costs in connection with federally assisted low and moderate income housing projects. These loans could cover such preconstruction items as architectural fees, land options, and engineering surveys. A revolving fund would be established, with \$7.5 million authorized the first year and \$10 million the second year.

#### INSURANCE PROTECTION FOR HOMEOWNERS

*Section 107.*—Authorizes the Secretary of HUD, in cooperation with the private insurance industry, to develop a plan for establishing an insurance program to enable homeowners to meet their monthly mortgage payments in time of personal economic adversity. Also directs the Secretary to make a report on his actions along with his recommendation for establishing such a program within 6 months following enactment of this act.

#### NATIONAL ADVISORY COMMISSION ON LOW-INCOME HOUSING

*Section 108.*—Establishes a National Advisory Commission on Low-Income Housing to undertake a comprehensive study and investigation of the resources and capabilities in the public and private sectors of the economy which may be used to fulfill more completely the objectives of the national goal of "a decent home and suitable living environment for every American family," particularly as such goal relates to low-income families. The Commission is directed to submit

to the President and the Congress an interim report with respect to its findings and recommendations not later than July 1, 1969, and a final report not later than July 1, 1970.

#### NATIONAL HOMEOWNERSHIP FOUNDATION

*Section 109.*—Creates a National Homeownership Foundation, the purpose of which would be to provide technical and limited financial assistance to public and private organizations which have as their purpose providing increased homeownership and housing opportunities for lower income families. The Foundation, which would be a Government-chartered nonprofit private corporation, would be administered by a Board consisting of 18 members, 15 of whom would be appointed by the President with the advice and consent of the Senate. The remaining three members would be the Secretary of Housing and Urban Development, Secretary of Agriculture, and the Director of the Office of Economic Opportunity. The Foundation would also be authorized an appropriation of \$10 million to be used in carrying out its prescribed functions.

### TITLE II—RENTAL HOUSING FOR LOWER INCOME FAMILIES

#### PART A—PRIVATE HOUSING

##### RENTAL AND COOPERATIVE HOUSING FOR LOWER INCOME FAMILIES

*Section 201.*—Adds a new section 236 to title II of the National Housing Act to provide rental and cooperative housing for lower income families. Mortgages insured under section 236 would carry a market interest rate, but the Secretary of HUD would pay to the mortgagee on behalf of the mortgagor an amount equal to the difference between the monthly payment for principal, interest, and mortgage insurance premium at the market rate and the monthly payment for principal and interest at 1 percent. Occupants, however, would pay 25 percent of their income as rent up to the full market rental. The sponsor would reimburse the Secretary for that part of rent receipts in excess of the amount which would be required under 1-percent financing, and this amount could be used to make other interest reduction payments. Occupancy of assisted projects would be available only to tenants whose incomes are not in excess of 70 percent of the limits prescribed for eligibility under the section 221(d)(3) below-market interest rate program, except that 20 percent of contract funds could be used with respect to families with incomes above these limits. For each minor child in the household, \$300 would be deducted from family income. Section 221(d)(3) BMIR mortgages (prior to final endorsement) and section 202 housing for the elderly mortgages (up to, or a reasonable time thereafter, project completion) could be refinanced under this program.

Contracts for interest reduction payments subject to approval in appropriations acts would be authorized in the following amounts: \$75 million annually prior to July 1, 1969, which amount may be increased by \$100 million on July 1, 1969, and by \$125 million on July 1, 1970.

## RENT SUPPLEMENT PROGRAM

*Section 202.*—Amends section 101 of the Housing and Urban Development Act of 1965 to increase the appropriation authority for the rent supplement program by \$40 million for fiscal year 1970 and \$100 million for fiscal year 1971. Also authorizes State or locally assisted rent supplement benefits.

## PART B—LOW-RENT PUBLIC HOUSING

## INCREASED LOW-RENT PUBLIC HOUSING AUTHORIZATION

*Section 203.*—Amends section 10(e) of the U.S. Housing Act of 1937 to increase the annual contribution contract authority by \$100 million on enactment and by \$150 million for each of fiscal years 1970 and 1971.

## UPGRADING MANAGEMENT AND SERVICES IN PUBLIC HOUSING PROJECTS

*Section 204.*—Amends section 15 of the U.S. Housing Act of 1937 to authorize the Secretary of HUD to enter into grant contracts with local housing authorities to assist them in upgrading their management activities and to provide tenant services to families occupying public housing. Authorizes appropriation of \$20 million in fiscal year 1969 and \$40 million in fiscal year 1970 for such contracts.

## PURCHASE OF UNITS BY TENANTS

*Section 205.*—Amends section 15(9) of U.S. Housing Act of 1937 to broaden existing law to permit local housing authorities to sell *any* low-rent housing units to tenants if such units are suitable for individual ownership. (Existing law permits tenants to purchase *only* detached or semidetached units.)

## PUBLIC HOUSING IN INDIAN AREAS

*Section 206.*—Amends section 1 of U.S. Housing Act of 1937 to permit public housing assistance for Indian families living in rural farm areas. (Existing law limits public housing assistance to urban and rural nonfarm areas.)

## TITLE III—FEDERAL HOUSING ADMINISTRATION INSURANCE OPERATIONS

## MORTGAGE INSURANCE PREMIUMS FOR SERVICEMEN AND THEIR WIDOWS

*Section 301.*—Amends section 222 of the National Housing Act to permit payment of FHA insurance premium by the Secretaries of Defense and Transportation for servicemen who assume a mortgage previously insured under any other provision of the National Housing Act. Also requires Secretaries to continue premium payment after serviceman's death on behalf of his widow for a 2-year period or

until she sells the house, whichever is sooner. Also directs Secretaries to notify promptly the widow of the increase in costs she must bear at end of 2-year period.

#### SEASONAL HOMES

*Section 302.*—Adds a new section 203(m) to the National Housing Act to authorize FHA to insure mortgages on seasonal homes not exceeding \$15,000 and 75 percent of the appraised value on an acceptable risk basis, taking into consideration the economic potential of the area and the effect the insurance of such mortgages would have on the availability of mortgage credit in the area. Also requires proper steps to preserve natural resources of the area.

#### MODIFICATION IN TERMS OF INSURED MORTGAGES COVERING MULTIFAMILY PROJECTS

*Section 303.*—Adds a new section 239 to the National Housing Act to require the Secretary of HUD to approve a request for the extension of time for curing a default on any FHA multifamily mortgage or for a modification of the terms of such a mortgage only pursuant to regulations prescribed by him. Under such regulations, the mortgagor would have to agree to place in trust any income or funds derived from the project in excess of what is required to meet actual and necessary operating expenses. The Secretary could provide for granting such consent in any case or class of cases without regard to the requirements of the regulations where he determined such action would not jeopardize the interests of the United States. Any knowing and willful misdistribution of the rents or other income received during the period of extension or modification would subject the party to criminal penalty (\$5,000 or 3-year imprisonment, or both).

#### CONDOMINIUMS

*Section 304.*—Amends section 234 (c) and (f) of the National Housing Act to: (1) Provide the same downpayment and maximum mortgage limitations for FHA condominium programs as are provided for the regular single-family FHA section 203(b) program, (2) permit blanket mortgages to cover four or more units instead of the present limitation of five or more units, and (3) permit FHA insurance for individual units in a condominium project with two to 11 dwelling units without requiring that the project be first covered by an FHA-insured project mortgage.

#### INSURANCE OF LOANS FOR PURCHASE OF FEE SIMPLE TITLE FROM LESSORS

*Section 305(a).*—Adds a new section 240 to the National Housing Act to permit FHA to insure loans of homeowners financing the purchase of fee simple title to property on which their homes are located where the homeowners have only leasehold interests to the land.

*Section 305(b).*—Amends 5(c) of the Home Owners' Loan Act of 1933 to permit savings and loan associations to invest in the loans described above.

EXTEND SECTION 221(d)(2) SALES HOUSING PROGRAM FOR TWO-, THREE-,  
AND FOUR-FAMILY RESIDENCES TO ALL LOW AND MODERATE INCOME  
FAMILIES

*Section 306.*—Amends section 221(d)(2) of the National Housing Act to authorize mortgage insurance for two-, three-, and four-family residences to *all* low and moderate income families. (Existing law limits mortgage insurance *only* to displaced low and moderate income families.)

REMOVE DIVIDEND RESTRICTION FROM NONDWELLING FACILITIES IN SECTION  
221 PROJECTS

*Section 307.*—Amends section 221(f) of the National Housing Act to remove the requirement that mortgagors of multifamily projects insured under section 221 and located in urban renewal areas waive the rights to remove dividends on the equity investment of the project devoted to community and shopping facilities where these facilities are designed to serve the needs of others than residents of the project. (The restriction would not be removed in the case of sec. 221(d)(3) BMIR projects.)

SUPPLEMENTAL LOAN PROGRAM FOR PROJECTS FINANCED WITH FHA INSURED  
MORTGAGES

*Section 308.*—Adds a new section 223(f) to the National Housing Act to permit the Secretary of HUD to insure supplemental loans to finance improvements, repairs, and additions to multifamily rental projects (including nursing homes and housing for the elderly) and group practice facilities financed with an FHA insured mortgage. Such financing would supplement existing insured mortgages and would be available without refinancing the existing mortgage.

HOME IMPROVEMENT LOANS—INCREASE IN MAXIMUM MATURITY, FINANCE  
CHARGE, AND LOAN AMOUNT

*Section 309.*—Amends section 2(b) of the National Housing Act containing the title I home improvement program to: (1) Increase the maximum loan limitation from \$3,500 to \$5,000; (2) increase the maximum maturity from 5 years and 32 days to 7 years and 32 days; and (3) increase the maximum financing charge from \$5 to \$5.50 per \$100 on the first \$2,500 of the loan and from \$4 to \$4.50 per \$100 on the amount in excess of \$2,500.

EXPERIMENTAL HOUSING PROGRAM

*Section 310.*—Amends section 223 of the National Housing Act, the FHA experimental housing program, to make the program available for use in connection with all FHA programs.

TERM OF FHA MORTGAGES FOR LAND DEVELOPMENT

*Section 311.*—Amends section 1002(d)(1) of the National Housing Act to increase the maturity for FHA mortgages securing subdivision

development from 7 to 10 years with further authority placed in the Secretary of HUD to go beyond a 10-year maturity if he deems such longer term is necessary.

#### REHABILITATED MULTIFAMILY PROJECTS IN URBAN RENEWAL AREAS

*Section 312.*—Amends section 220(d)(3)(B)(ii) and 221(d)(3)(iii) of the National Housing Act to permit FHA insurance under sections 220 (urban renewal housing) and 221(d)(3) (low and moderate income families) for multifamily properties in urban renewal areas which have been rehabilitated by local agencies.

#### MISCELLANEOUS HOUSING INSURANCE

*Section 313.*—Amends section 223 of the National Housing Act to permit refinancing of FHA mortgages insured under any of the sections or the titles of the National Housing Act. In addition, this section would permit FHA mortgages assigned to the Secretary or executed in the sale of an acquired property to be insured under any section or title of that act. It also authorizes insurance of supplementary loans to cover excess of expenses over income for first 2 years of multifamily projects at the interest rate in effect at the time the supplementary loan is insured.

#### SUPPLEMENTARY LOANS FOR COOPERATIVE HOUSING PURCHASED FROM THE FEDERAL GOVERNMENT

*Section 314.*—Amends section 213(j) of the National Housing Act to authorize mortgage insurance for supplementary loans to housing cooperatives which purchased wartime housing from the Federal Government.

#### EQUIPMENT IN NURSING HOMES

*Section 315.*—Amends section 232 of the National Housing Act to permit the cost of major items of equipment necessary for the operation of a nursing home to be included in the FHA insured mortgage.

#### FLEXIBLE INTEREST RATES FOR CERTAIN FHA INSURANCE PROGRAMS

*Section 316.*—Amends section 3(a) of Public Law 90-301 to permit the Secretary of HUD, until October 1, 1969, to establish the interest rate for new mortgage insurance programs authorized by new sections 223(f), 235(j), and 240 of the National Housing Act (added by secs. 101, 314, and 305, respectively, of the bill) at such rate he believes necessary to meet the market.

#### SALE OF REHABILITATED UNITS IN MULTIFAMILY STRUCTURES

*Section 317.*—Amends section 221(h) of the National Housing Act to: (1) Permit the rehabilitation and sale of individual units (with a 3-percent mortgage) in a multifamily structure; and (2) permit the blanket mortgage to cover four or more units instead of the present limitation of five or more units.

#### TITLE IV—GUARANTEES FOR FINANCING NEW COMMUNITY LAND DEVELOPMENT

*Sections 401-416.*—Add a new title to be referred to as the “New Communities Act of 1968” to the housing laws to permit the Secretary of HUD to guarantee the bonds, debentures, notes, and other obligations issued by private new community developers to help finance the development of new community projects. This title would provide:

*Maximum guarantee:* Cannot exceed: (a) The lesser of 80 percent of the Secretary’s estimate of the value of the property upon completion of the land development, or (b) the sum of 75 percent of the Secretary’s estimate of the value of the land before development and 90 percent of his estimate of the actual cost of the land development.

*Guaranteed ceilings:* \$50 million for any single new development; \$500 million aggregate outstanding principal obligation at any one time.

*Revolving fund for guarantee:* Fees and charges collected by the Secretary will be deposited in a revolving fund to cover any liabilities under the guarantees. In addition, the full faith and credit of the United States is pledged to payment of the guarantees and appropriations to cover program operations and nonadministrative expenses and, if necessary, any guarantee payments are authorized.

*Small builders:* Requires HUD to adopt requirements encouraging small builders to participate in new community projects.

*Supplementary grants:* Authorizes supplemental grants to States and localities assisting new community development with basic water and sewer and open space projects. The additional grant is limited to 20 percent of cost of the facility and a substantial number of housing units for low and moderate income persons must be made available through such development project. (Total Federal grant cannot exceed 80 percent of facility cost.) Authorizes an appropriation of not to exceed \$5 million for supplemental grants for fiscal year 1969 and not to exceed \$25 million for fiscal year 1970.

Sections of this title also require cost certifications in connection with a land development project and authorize the General Accounting Office to audit the transactions of developers whose obligations are guaranteed pursuant to this title.

#### TITLE V—URBAN RENEWAL

*Section 501.*—Amends title I of the Housing Act of 1949 by adding a new subtitle heading to read. “Part A—Urban Renewal Projects, Demolition Programs and Code Enforcement Programs” and further amends that title by adding a new “Part B—Neighborhood Development Programs.” This new part B added to title I authorizes the Secretary of HUD to provide financial assistance to local public agencies on an annual basis to assist them in carrying out “neighborhood development programs.” A neighborhood development program would consist of urban renewal project undertakings and activities in one or more urban renewal areas that are planned and carried out on the basis of annual increments. The requirements governing such under-

takings and activities would be similar to those governing the provision of Federal financial assistance for regular urban renewal projects.

#### INCREASED AUTHORIZATION

*Section 502.*—Amends section 103(b) of the Housing Act of 1949 to increase the contract authority for urban renewal and other title I activities by \$1.4 billion on July 1, 1969. This section also authorizes an increase of \$350 million for urban renewal projects in model city areas.

#### REHABILITATION GRANTS

*Section 503.*—Amends section 115(a) of the Housing Act of 1949 to increase the rehabilitation grant that can be made to low-income homeowners from \$1,500 to \$2,500. This section also makes a technical amendment to change the term "structure" to "real property" in order to permit the use of grant funds for rehabilitation relating to aspects of the property other than the dwelling structure itself. Finally, this section authorizes rehabilitation grants in areas (other than urban renewal and code enforcement areas) which are scheduled for rehabilitation or concentrated code enforcement within a reasonable period of time.

#### REHABILITATION IN URBAN RENEWAL AREAS

*Section 504.*—Amends section 110(c) (8) of the Housing Act of 1949 to remove the present limitation on the acquisition and rehabilitation of residential properties by a local urban renewal agency. (Existing law permits the local agency to acquire and rehabilitate for demonstration purposes no more than 100 units or 5 percent of the total residential units in the urban renewal area, whichever is lesser.)

#### DISPOSITION OF PROPERTY FOR LOW AND MODERATE INCOME HOUSING

*Section 505.*—Amends section 107 of the Housing Act of 1949 to make it clear that land may be disposed of for low as well as moderate income housing purposes and to permit this disposition to be accomplished by lease as well as by sale. Would also permit land to be sold to a mortgagor qualified under section 236 of the National Housing Act (added by sec. 201 of this bill) and to nonprofit organizations eligible under section 221(h) or under 235(j) (1) of the National Housing Act (added by sec. 101 of this bill) which rehabilitate property and sell it to low or moderate income families.

#### GRANTS FOR LOW AND MODERATE INCOME HOUSING IN OPEN LAND PROJECTS

*Section 506.*—Amends section 103(a) (1) of the Housing Act of 1949 to permit grants to be made with respect to urban renewal open land projects (which now only qualify for loans) in an amount not to exceed two-thirds of the difference between the proceeds from any land disposed of at its value for low or moderate income housing

(under sec. 107 of such act) and the proceeds which would have been realized if the land had been disposed of at its fair value without regard to the special provisions of section 107.

#### URBAN RENEWAL LOAN CONTRACTS

*Section 507.*—Amends section 102(c) of the Housing Act of 1949 to permit a local public agency to borrow funds to finance project undertakings on the private market at an interest rate in excess of the Federal lending rate set out in its loan contract with the Government. The difference between the interest cost on the private market and the interest cost at which the LPA could have borrowed from the Federal Government under its loan contract would be made up by a supplemental grant from the Government.

#### PROJECT COMPLETION PRIOR TO DISPOSITION OF CERTAIN PROPERTY

*Section 508.*—Amends section 106 of the Housing Act of 1949 to permit the Secretary of HUD to allow an urban renewal project to be closed out where: (1) Not more than 5 percent of the total acquired land remains to be disposed; (2) the local public agency does not expect to be able, due to circumstances beyond its control, to dispose of that land in the near future; (3) all other project activities are completed; and (4) the local public agency has agreed to dispose of or retain such land in the future for uses in accordance with the urban renewal plan. This section would also amend section 110(f) of such act to include in the amount of land proceeds, for the purpose of computing net project cost, an amount equal to the value of the land not yet disposed of.

#### DEMOLITION GRANTS

*Section 509.*—Amends section 116(a) of the Housing Act of 1949 to authorize the Secretary of HUD to make grants for the demolition of nonresidential structures that are harborages or potential harborages of rats.

#### AIR RIGHTS IN URBAN RENEWAL AREAS

*Section 510.*—Amends section 110(c) of the Housing Act of 1949 to permit the carrying out of air rights urban renewal projects and the construction of necessary foundations and platforms to provide educational facilities. Under present law, these activities may be assisted only when they are for low and moderate income housing or for industrial development where the area is not suitable for low and moderate income housing.

#### INTERIM ASSISTANCE FOR BLIGHTED AREAS

*Section 511.*—Adds a new section 118 to title I of the Housing Act of 1949 to authorize the Secretary of HUD to contract to make grants, in an aggregate amount not to exceed \$20 million in any fiscal year, to cities and other municipalities or counties to assist in taking interim steps to alleviate harmful conditions in any slum and blighted area of

the community which is planned for substantial clearance, rehabilitation or federally assisted code enforcement in the near future but which needs some immediate short-term public action until permanent action can take place. Such interim assistance grants could not exceed two-thirds of the cost of planning and carrying out the interim program except that a three-fourths grant could be made to any community with a population of 50,000 or less. A workable program is a prerequisite of an interim assistance program. Also, relocation assistance and payments would be available to those displaced as a result of the interim program. This section also requires the Secretary of HUD, wherever feasible, to encourage the employment of unemployed or underemployed residents of the area in carrying out activities under this section.

#### REHABILITATION LOANS

*Section 512.*—Amends section 312 of the Housing Act of 1964 to: (1) Extend the rehabilitation loan program from October 1, 1969, to October 1, 1970, and (2) authorize such loans in areas, other than urban renewal and concentrated code enforcement areas, which are scheduled for rehabilitation or concentrated code enforcement within a reasonable period of time where the property is a owner-occupied residential structure and it is in violation of local housing or similar codes.

#### LOW AND MODERATE INCOME HOUSING IN RESIDENTIAL URBAN RENEWAL AREAS

*Section 513.*—Rewrites section 105(f) of the Housing Act of 1949 to require that a majority of the housing units provided in urban renewal projects which are to be redeveloped for predominantly residential uses and which receive Federal recognition after the effective date of this bill be standard housing units for low or moderate income families or individuals.

### TITLE VI—URBAN PLANNING AND FACILITIES

#### COMPREHENSIVE PLANNING

*Section 601.*—Rewrites section 701 of the Housing Act of 1954 (urban planning assistance). The principal change authorizes the Secretary of HUD to make planning grants to State planning agencies for assistance to district planning agencies for rural and other non-metropolitan areas. A grant authorization of \$20 million would be provided for such planning grants, to be increased by an additional \$10 million on July 1, 1969, both to come out of the regular increase. The Secretary of Agriculture would be given certain functions with respect to these district planning grants. The section also authorizes an additional \$10 million of the section 701 appropriations to be available for study, research, and demonstration projects covering such matters as the planning for entire systems of public facilities and services within metropolitan areas and other multijurisdictional regions. Other changes would authorize the Secretary to make planning grants directly to tribal planning councils or other bodies for planning on

Indian reservations and would require that metropolitan, regional, and district planning agencies, to the greatest extent practical, be composed of or responsible to elected officials of local governments. This section also authorizes grants under section 701(g) for regional and district councils of government as well as those organized on a metropolitan basis and a broadening of the definition of comprehensive planning for the provision of governmental services and for the development and utilization of human and natural resources. This section has added to the preamble of section 701 a statement to make it clear that the committee expects HUD to permit the judicious use of private planning consultants by State and local governments where these governments deem it appropriate in carrying out planning activities assisted under section 701. The section further authorizes grants to official governmental planning agencies for areas where rapid urbanization is expected to result on land developed or to be developed as a new community under title IV of the bill and to regional commissions established pursuant to the Public Works and Economic Development Act of 1965.

The bill also authorizes additional 701 planning funds amounting to \$35 million for fiscal year 1969 and \$125 million for fiscal year 1970.

#### PLANNED AREA-WIDE DEVELOPMENT

*Section 602.*—Amends title II of the Demonstration Cities and Metropolitan Development Act of 1966 by changing the heading of such title to "Planned Area-wide Development" and in keeping with this change in title amends the sections and subsections thereto to permit supplementary incentive grants authorized for certain federally assisted projects in metropolitan areas to be made for such projects being carried out in any multijurisdictional area such as the rural planning districts which are authorized by the amendments in section 601 of this bill. Also makes available for grant purposes through fiscal year 1970 any of the funds authorized for fiscal years 1967 and 1968, but which have not been appropriated.

#### ADVANCE ACQUISITION OF LAND

*Section 603.*—Amends section 701 and rewrites section 704 of the Housing and Urban Development Act of 1965 to provide basic authority for a more efficient and effective program of Federal assistance to localities for the advance acquisition of land expected to be needed for public purposes. The amendments and rewriting would:

- (1) Change the definition of eligible land;
- (2) Require that the proposed use of the land be undertaken within 5 years except the Secretary could go beyond the 5-year period if, due to unusual circumstances, he deems a longer period necessary and if he advised the Banking and Currency Committees of the Congress of this action;
- (3) Clarify the status of the land in the interim between acquisition and utilization for the approved purpose;

- (4) Permit the Secretary to approve the diversion of the land to another public purpose when in accord with comprehensive planning and give him discretion to require repayment of the grant or the substitution of land of equivalent value when the land is diverted to a nonpublic purpose;
- (5) Provide that assistance under this section will not render a project ineligible for other Federal assistance programs and that the cost of land acquired with this assistance will not be an ineligible project cost in such other programs;
- (6) Provide for grant assistance for imputed interest charges when an applicant uses other than borrowed funds to finance the acquisition of the land; and
- (7) Clarify the authority of States to participate in the program.

#### EXTENSION OF INTERIM PLANNING REQUIREMENTS IN WATER AND SEWER FACILITIES PROGRAM

*Section 604.*—Amends section 702(c) of the Housing and Urban Development Act of 1965 to extend interim planning requirements in the water and sewer facilities program from July 1, 1968, to October 1, 1969.

#### AUTHORIZATIONS FOR WATER AND SEWER FACILITIES, NEIGHBORHOOD FACILITIES, AND ADVANCE ACQUISITION OF LAND PROGRAMS

*Section 605.*—Amends section 708(a) of the Housing and Urban Development Act of 1965 to provide that any funds authorized but not appropriated for the basic water and sewer facilities, neighborhood facilities, and the advance acquisition of land programs will remain available for appropriation through fiscal year 1970. (Present authorization for these programs expires with fiscal year 1969.) In addition, this section authorizes an appropriation of \$115 million for fiscal year 1970 for grants for water and sewer projects.

#### OPEN SPACE LAND PROGRAM

*Section 606.*—Amends section 702(b) of the Housing Act of 1961 to convert the funding provision for contracts under the open space land program from contract authority to regular authorization for appropriation and authorizes the appropriation of the unused portion of contract authority. This section would also increase the appropriation authority by \$150 million in fiscal year 1970. This section would further increase the amount of grant funds which can be used annually for studies and publications from \$50,000 to \$125,000.

#### AUTHORIZE THE MAKING OF FEASIBILITY STUDIES IN THE PUBLIC WORKS PLANNING ADVANCES PROGRAM

*Section 607.*—Amends section 702(a) of the Housing Act of 1954 to clarify the authority of the Secretary of HUD to make advances for the conduct of feasibility studies regarding specific public works, the planning of which may be assisted under section 702.

## TITLE VII—URBAN MASS TRANSPORTATION

### GRANT AUTHORIZATIONS

*Section 701.*—Amends section 4(b) of the Urban Mass Transportation Act of 1964 to authorize an appropriation of \$190 million for fiscal year 1970. In addition, it would increase the amount of funds which may be used from the current authorization for research development and demonstration programs by \$6 million for fiscal year 1969 and would authorize the Secretary after fiscal year 1969 to use for research and demonstration activities such funds as he deems appropriate from those authorized in section 4(b) of the 1964 act.

### DEFINITION OF MASS TRANSPORTATION

*Section 702.*—Amends section 12(c) (5) of the Urban Mass Transportation Act of 1964 to broaden the statutory definition of “mass transportation.” The broadened definition would permit greater flexibility in developing and applying new concepts and systems in urban mass transportation programs.

### EXTENSION OF EMERGENCY PROGRAM UNDER THE URBAN MASS TRANSPORTATION ACT

*Section 703.*—Amends section 5 of the Urban Mass Transportation Act of 1964 to extend the emergency provisions of the mass transportation program from November 1, 1968, to July 1, 1970.

### NONFEDERAL SHARE OF NET PROJECT COST

*Section 704.*—Amends sections 4(a) and 5 of the Urban Mass Transportation Act of 1964 to permit private transit companies to furnish up to 50 percent of the local share of the net project cost of a mass transit project, or in cases of an applicant's (State or local public body) financial inability to put up any portion of the local share, private companies would be permitted to put up 100 percent of such share.

## TITLE VIII—SECONDARY MORTGAGE MARKET

### PURPOSES

*Section 801.*—States that the purpose of this title is to partition the Federal National Mortgage Association into two corporations: (1) Government National Mortgage Association (GNMA); and (2) Federal National Mortgage Association (FNMA).

### AMENDMENTS TO THE FEDERAL NATIONAL MORTGAGE ASSOCIATION CHARTER ACT

*Section 802.*—Amends the Federal National Mortgage Association Charter Act (title III) of the National Housing Act to establish—  
(a) *Government National Mortgage Association:*

Would operate existing special assistance and management and liquidating functions, and

Would be administered by Secretary of Housing and Urban Development (now under FNMA Board of Directors and a President).

(b) *Federal National Mortgage Association:*

*Purpose.*—Would operate a privately financed secondary mortgage market for government supported mortgages.

*Board of Directors.*—Would consist of 15 members of which five would be appointed annually by the Secretary of Housing and Urban Development. The remaining members would be elected by the stockholders. Of those members appointed by the Secretary, one shall be from the homebuilding industry, one from the real estate industry, and one from the mortgage lending industry.

*Powers of Secretary of Housing and Urban Development.*—Would have regulatory powers, including a requirement that a reasonable portion of mortgage purchases relate to low and moderate income housing; also issuance of securities would be subject to his approval.

*Treasury-held preferred stock.*—Would be retired as rapidly as possible after effective date.

*Common stock.*—Would continue to require mortgage sellers to purchase common stock; also each mortgage servicer would be required to hold up 2 percent of mortgages serviced in common stock.

#### PARTICIPATIONS

*Section 803.*—Amends section 302(c) of the Federal National Mortgage Association Charter Act to permit GNMA, as trustee under trusts created for sales of participation certificates, to issue such certificates for refinancing purposes without regard to the requirement of appropriation act authority. Any appropriation for insufficiencies accompanying the original authorization would apply as well to any "rollover" sale.

#### MORTGAGE-BACKED SECURITIES

*Section 804.*—Amends section 304 of such act to authorize the new Federal National Mortgage Association to issue securities backed by an earmarked pool of portfolio mortgages. This section would also authorize the Government National Mortgage Association to guarantee such securities as well as those issued by approved private issuers.

#### SUBORDINATED AND CONVERTIBLE OBLIGATIONS

*Section 805.*—Amends section 304 of such act to authorize the Federal National Mortgage Association to issue subordinated obligations up to twice its capital and surplus.

#### SPECIAL ASSISTANCE AUTHORIZATION

*Section 806.*—Amends section 305(c) of such act to authorize an additional \$500 million for the purchase of mortgages by the Government National Mortgage Association in its special assistance function.

## AMENDMENTS TO OTHER LAWS

*Section 807.*—Makes numerous changes in other laws necessitated by the establishment of the new Federal National Mortgage Association and the new Government National Mortgage Association.

## EFFECTIVE DATE

*Section 808.*—Provides that the partition of the existing Federal National Mortgage Association would become effective no more than 120 days following the enactment of this act.

## SAVINGS PROVISIONS

*Section 809.*—Preserves causes of action and legal proceedings existing or instituted by or against the Federal National Mortgage Association prior to the effective date so that such actions and proceedings will not abate.

## TRANSITIONAL PROVISIONS

*Section 810.*—Provides that the transitional period would begin on the "effective date" and terminate when at least one-third of the stock is owned by private investors in the homebuilding, mortgage lending, real estate, and related industries but no sooner than May 1, 1970, or later than May 1, 1973. During this period the President of the Federal National Mortgage Association will be appointed by the President of the United States with the advice and consent of the Senate and the Board of Directors would be limited to nine members. In the first year all nine members would be appointed by the Secretary of Housing and Urban Development, in the second year seven would be appointed by the Secretary and two would be elected by the stockholders, and in the third year and subsequent period, five members would be appointed by the Secretary and the remainder elected by the stockholders. One of the Secretary's appointees would have to be the President of FNMA.

## TITLE IX—NATIONAL HOUSING PARTNERSHIPS

*Sections 901-911.*—Authorizes the creation of National Housing Partnerships in order to encourage private investors to provide low and moderate income housing in substantial volume on a nationwide scale. Such a National Partnership would form partnership ventures with local investors for the construction of housing for low and moderate income families.

The title would authorize the creation of federally chartered privately funded corporations to be organized under the District of Columbia Business Corporation Act. Such a corporation in turn would form a partnership organized under this title and under the District of Columbia Uniform Limited Partnership Act. The federally chartered Corporation would serve as the general partner and managing agent of the National Partnership and each of the stockholders and others could be limited partners. The Corporation would provide the staff

and expertise for the Partnership in connection with the organization and planning of specific local project undertakings in which the National Partnership would have an interest.

## TITLE X—RURAL HOUSING

### HOUSING FOR LOW AND MODERATE INCOME PERSONS AND FAMILIES

*Section 1001.*—Adds a new section 521 to title V of the Housing Act of 1949 to authorize the Secretary of Agriculture to make direct and insured loans with interest-rate subsidies in rural areas to low and moderate income persons and families and to provide rental or co-operative housing for such persons and families where such persons and families are unable to obtain housing under sections 235 and 236 of the National Housing Act, proposed by sections 101 and 201 of this bill.

### HOUSING FOR RURAL TRAINEES

*Section 1002.*—Adds a new section 522 to title V of the Housing Act of 1949 to authorize financial and technical assistance to States or political subdivisions thereof, or any public or private nonprofit organization to provide, in rural areas, housing and related facilities for rural trainees (and their families) enrolled in federally assisted training courses to improve their employment capabilities when the Secretary determines that such housing and facilities could not be reasonably provided in any other way.

### APPROPRIATIONS

*Section 1003.*—Amends section 513 of the Housing Act of 1949 to authorize appropriations to the Secretary of Agriculture for the cost of carrying out his administrative functions under sections 235 and 236 of the National Housing Act.

### PURCHASE OF LAND FOR BUILDING SITES

*Section 1004.*—Amends section 514(f)(2) of the Housing Act of 1949 to broaden the eligibility purposes of domestic farm labor housing loans to include the purchase of necessary land for building sites.

## TITLE XI—NATIONAL INSURANCE DEVELOPMENT CORPORATION

### SHORT TITLE

*Section 1101.*—Adds new title to be referred to as “The National Insurance Development Corporation Act of 1968.”

### FINDINGS AND DECLARATION OF PURPOSE

*Section 1102.*—Includes a finding that the unavailability of property insurance in inner-city areas is accelerating the deterioration and threatening the economic well-being of cities. States that the purpose of the bill is to encourage the development of statewide programs to

increase the availability of property insurance and to provide Federal reinsurance with appropriate State sharing in reinsured losses due to civil disorders.

#### AMENDMENT OF THE NATIONAL HOUSING ACT

*Section 1103.*—Adds a new title XII to the National Housing Act to establish the National Insurance Development Corporation. The provisions of the proposed new title are summarized briefly below.

#### CREATION AND DISSOLUTION OF NATIONAL INSURANCE DEVELOPMENT

*Section 1201.*—Creates the National Insurance Development Corporation within the Department of Housing and Urban Development, under the authority of the Secretary.

#### EXECUTIVE DIRECTOR

*Section 1202.*—Provides that, subject to section 1201 the management of the Corporation shall be vested in an Executive Director appointed by the President, by and with the advice and consent of the Senate.

#### ADVISORY BOARD, MEETINGS, DUTIES, COMPENSATION, AND EXPENSES

*Section 1203.*—Establishes a 19-member Advisory Board appointed by the Secretary.

#### DEFINITIONS

*Section 1204.*—Contains definitions in this title.

#### PART A—STATEWIDE PLANS TO ASSURE FAIR ACCESS TO INSURANCE REQUIREMENTS

#### FAIR PLANS

*Section 1211.*—Requires every insurer reinsured by the Corporation to cooperate with the State insurance authority, in each State in which it acquires reinsurance, in establishing and carrying out statewide plans to assure fair access to insurance requirements ("FAIR" Plans). These plans, which must be approved by the State insurance authority or authorized by State law, are to be administered under the supervision of the State insurance authority and designed to make essential property insurance more readily available in, but not limited to, urban areas.

#### ALL INDUSTRY PLACEMENT FACILITY

*Section 1212.*—Requires all plans to include an all-industry placement facility, doing business with all participating insurers, to help agents and brokers to place insurance up to the full insurable value of a property.

## INDUSTRY COOPERATION

*Section 1213.*—Requires every participating insurer to pledge with the State insurance authority its full participation and cooperation of the plan and the need to form a pool or to adopt other programs to make essential property insurance more readily available.

## PLAN EVALUATION

*Section 1214.*—Provides for transmission of copies of plans and amendments by State insurance authorities to the Corporation and for these authorities to advise the Corporation with regard to the operation of the plan and the need to form a pool or to adopt other programs to make essential property insurance more readily available. The Corporation may modify plan criteria as may be necessary or desirable and upon certification by the State insurance authority waive compliance with one or more of the plan criteria.

## PART B—REINSURANCE COVERAGE

## REINSURANCE OF LOSSES FROM RIOTS OR CIVIL DISORDERS

*Section 1221.*—Authorizes the Corporation to offer riot or civil disorder property loss reinsurance to any insurer or pool of insurers in any one or more States. Reinsurance may be provided immediately upon enactment of the title for a 90-day period, but thereafter only if the insurer is participating in the State's plan under part A.

## REINSURANCE AGREEMENTS AND PREMIUMS

*Section 1222.*—Authorizes the Corporation to provide reinsurance, to reimburse the insurer for losses in excess of the insurer's retention, at premium rates adequate to provide premiums which will exceed in aggregate amount the insured riot losses in 1967, and provides that thereafter the Corporation may adjust reinsurance premium rates as may be necessary or appropriate after consultation with the Board and the National Association of Insurance Commissioners.

## CONDITIONS OF REINSURANCE

*Section 1223.*—Provides the conditions under which the Corporation will terminate existing reinsurance coverage and will not offer new coverage for insurance written after the termination date, including such conditions as State assumption of a share of reinsured losses, the adoption of additional programs such as pools, and insurer participation in State plans and programs.

## RECOVERY OF PREMIUMS: STATUTE OF LIMITATIONS

*Section 1224.*—Authorizes the Corporation to recover any unpaid premiums for reinsurance; imposes a 5-year statute of lim-

itations on the recovery by an insurer of excess premiums paid to the Corporation or the recovery by the Corporation of reinsurance premiums due to it.

## PART C—PROVISIONS OF GENERAL APPLICABILITY

### CLAIMS AND JUDICIAL REVIEW

*Section 1231.*—Authorizes the Corporation to adjust and pay claims for proved and approved losses, and allows a claimant to institute an action in the U.S. district court within 1 year after receipt of notice of disallowance of a claim.

### FISCAL INTERMEDIARIES AND SERVICING AGENTS

*Section 1232.*—Authorizes the Corporation to contract with any insurer, pool, or other person or organization for estimating or determining reinsurance claim payment amounts, receiving, disbursing, and accounting for reinsurance claim payments, auditing insurers' records to assure proper payments, establishing the basis of reinsurance liability, and otherwise assisting in carrying out the purposes of the title.

### NATIONAL INSURANCE DEVELOPMENT FUND

*Section 1233.*—Provides for the establishment of a national insurance development fund to be available to the Corporation without fiscal year limitation to pay reinsurance claims, to pay administrative expenses, and to repay with interest amounts borrowed under section 520(b) of the National Housing Act.

### RECORDS, ANNUAL STATEMENT, AND AUDITS

*Section 1234.*—Requires reinsured insurers to furnish the Corporation with annual statements and such data as may be necessary in carrying out this program and to keep records to facilitate an effective audit; authorizes the Corporation and the Comptroller General to conduct audits; and provides that the Corporation is to make use of State insurance authority examination reports and facilities to the maximum extent feasible in connection with these activities.

### STUDY OF REINSURANCE AND OTHER PROGRAMS

*Section 1235.*—Provides for the Corporation to study reinsurance and other means of assuring an adequate supply of burglary and theft and other property insurance in urban areas and the adequate availability of surety bonds for construction contractors in urban areas and to report to the President and the Congress within 1 year the results of its study and its recommendations.

### OTHER STUDIES

*Section 1236.*—Provides for the Corporation, in cooperation with State insurance authorities and the private insurance indus-

try, to study the operation of the FAIR plans, the extent of the unavailability of essential property insurance in urban areas, the market for private reinsurance, loss-prevention methods and procedures, insurance marketing methods, and underwriting techniques.

#### GENERAL POWERS OF CORPORATION

*Section 1237.*—Authorizes the Corporation to have a corporate seal, to sue and be sued (with all civil actions in which the Corporation is a party deemed to arise under the laws of the United States), to enter into and perform contracts, leases, and other agreements without competitive bidding; to employ a staff; to make necessary or appropriate rules and regulations; and to exercise all powers specifically granted by the title and such incidental powers as are necessary to carry out its purposes.

#### SERVICE AND FACILITIES OF OTHER AGENCIES—UTILIZATION OF PERSONNEL, SERVICES, FACILITIES, AND INFORMATION

*Section 1238.*—Authorizes the Corporation, with the consent of the agency concerned, to utilize the personnel and information of any agency of the Federal Government on a reimbursable basis and to obtain data relevant to matters within its jurisdiction from any Federal agency on a nonreimbursable basis to the extent permitted by law.

#### ADVANCE PAYMENTS AND FINALITY OF CERTAIN FINANCIAL TRANSACTIONS

*Section 1239.*—Provides that the Corporation's financial transactions relating to reinsurance shall be final and conclusive on all officers of the United States and that the Corporation may make reinsurance payments in advance or by way of reimbursement and in such installments and on such conditions as it may determine.

#### TAXATION

*Section 1240.*—Exempts the Corporation from local, State or Federal taxation and provides that any State undertaking measures in meeting its obligations for reinsured losses shall not be subject to retaliatory or fiscal imposition by any other State.

#### ANNUAL REPORT

*Section 1241.*—Requires the Secretary to include a report on the operations of the Corporation in his annual report.

#### APPROPRIATIONS

*Section 1242.*—Authorizes to be appropriated such sums as may be necessary to carry out this title.

## FINANCING

*Section 1104.*—Amends section 520(b) of the National Housing Act to authorize the Secretary to borrow funds necessary to pay for re-insured losses under title XII of the act.

## GOVERNMENT CORPORATION CONTROL ACT

*Section 1105.*—Defines the National Insurance Development Corporation as a wholly owned Government corporation under the Government Corporation Control Act.

## COMPENSATION OF EXECUTIVE DIRECTOR

*Section 1106.*—Provides for compensation of the Executive Director at the rate prescribed for level IV of the Federal Executive Salary Schedule.

## CLARIFYING AMENDMENTS TO ACTS REFERRING TO DISASTERS

*Section 1107.*—Would amend other acts to include “riot or civil disaster” in the definitions of “disaster” or “catastrophe.”

## TITLE XII—NATIONAL FLOOD INSURANCE ACT OF 1968

## SHORT TITLE

*Section 1201.*—Adds new title to be referred to as “National Flood Insurance Act of 1968.”

## FINDINGS AND DECLARATION OF PURPOSE

*Section 1202.*—States that a flood insurance program is feasible and can be initiated, and should complement and encourage measures to prevent flood damage; that if the program is commenced on a gradual basis, time and experience will enable it to be reappraised and expanded; that the program can be carried out most effectively through a cooperative effort on the part of the Federal Government and the private insurance industry; and that a critical ingredient of such a program will be the encouragement of State and local governments to adopt land use regulations to govern the development of land exposed to flood damage. Calls for the President to submit to the Congress, within 2 years, a unified national program for flood plain management, including any further proposals for the allocation of costs among beneficiaries of flood protection.

## AMENDMENTS TO THE FEDERAL FLOOD INSURANCE ACT OF 1956

*Section 1203(a).*—Amends section 15(e) of the Federal Flood Insurance Act of 1956. That section vested the Administrator of the Housing and Home Finance Agency with authority to borrow \$500 million in the aggregate (or greater sums if authorized by the President) from the Secretary of the Treasury. The amendment in section 1203(a) relates to the interest formula which is to apply to borrowed

funds. Under section 1210 of the bill, the borrowing authority would be made specifically available to the Secretary of Housing and Urban Development to carry out responsibilities which would be vested in him under the bill.

*Section 1203(b).*—Strikes out obsolete language from section 15(e) of the Federal Flood Insurance Act of 1956.

*Section 1203(c).*—Repeals all sections of the Federal Flood Insurance Act of 1956, except section 15(e), relating to Treasury borrowing authority.

#### DEFINITIONS

*Section 1204.*—Defines: (1) "flood" as having such meaning as prescribed in regulations of the Secretary, and including inundation from the overflow of streams, rivers, or other bodies of waters, and from tidal surges, abnormally high tidal water, tidal waves, hurricanes, and other severe storms or deluge; (2) "United States" and "State" as including the several States, the District of Columbia, the territories and possessions, and the Commonwealth of Puerto Rico; (3) "insurance company," "other insurers," "insurance agents and brokers," to include any organizations or individuals authorized to engage in the insurance business under the laws of any State; (4) "insurance adjustment organizations" to include any organizations or persons engaged in the business of adjusting loss claims arising under insurance policies issued by licensed insurance companies or other insurers; (5) "person" as any individual, group of individuals, corporation, partnership, association, or other organized group, including State and local governments and agencies; and (6) "Secretary" as the Secretary of Housing and Urban Development.

### CHAPTER I—THE NATIONAL FLOOD INSURANCE PROGRAM

#### BASIC AUTHORITY

*Section 1205(a).*—Authorizes the Secretary of Housing and Urban Development to establish and carry out a program to facilitate the purchase of flood insurance to provide against physical damage to real or personal property resulting from flood.

*Section 1205(b).*—Provides that this program shall be implemented, to the maximum extent practicable, through arrangements for financial participation and risk sharing by companies in the private insurance industry, and by other appropriate participation on a non-risk-sharing basis by insurance companies, agents, brokers, or adjustment organizations.

#### SCOPE OF PROGRAM AND PRIORITIES

*Section 1206(a).*—Authorizes the Secretary to make the flood insurance program available initially for one- to four-family residential properties.

*Section 1206(b).*—Authorizes the Secretary to extend coverage of the flood insurance program when, on the basis of studies and other information, he determines that extension would be feasible. Future coverage of the program could be extended to: (1) Other residential

properties, (2) business properties, (3) agricultural properties, (4) properties occupied by private nonprofit organizations, and (5) properties owned by State and local governments and agencies thereof.

*Section 1206(c).*—Provides that flood insurance will be made available in only those States or areas (or subdivisions of areas) which the Secretary determines had evidenced a positive interest in the flood insurance program, and had given satisfactory assurances that by June 30, 1970, permanent land use and control measures, consistent with criteria prescribed in section 1261, or for land management and use, have been adopted, and that application and enforcement of these measures would commence as soon as technical information on floodways and on controlling flood elevations was available.

This would not require the same land management and use measures for all areas, since these measures must meet the particular flood problems of each area.

#### NATURE AND LIMITATION OF INSURANCE COVERAGE

*Section 1207(a).*—Authorizes the Secretary, after consultation with the flood insurance advisory committee, and representatives of the State insurance commissioners, to provide by regulation for the general terms and conditions of insurability applicable to properties eligible for flood insurance. A representative organization of all State insurance authorities, such as the National Association of Insurance Commissioners, will be called upon for purposes of consulting State insurance authorities. These terms and conditions will include the types and locations of eligible properties; the nature and limits of insurable losses; the classification, limitation, and rejection of risks; and appropriate minimum premiums and loss-deductibles.

*Section 1207(b).*—Provides that insurance coverage for one- to four-family residential properties will be limited to \$15,000 aggregate liability for any dwelling unit and \$30,000 for any dwelling structure of from two to four units. Liability for personal property will be limited to \$5,000 for the contents of each dwelling unit. Both real property and contents will be subject to an appropriate loss-deductible clause. For any other properties which will become eligible for flood insurance coverage in the future (such as small business properties), the aggregate liability for any single structure will be \$30,000. These limits will apply to any insurance sold at premiums below full actuarial cost. Insurance coverage could be doubled under this section, but any excess over the limits specified will require the payment of premium rates at full cost.

#### ESTIMATES OF PREMIUM RATES

*Section 1208(a).*—Authorizes the Secretary, on the basis of studies and investigations, to estimate on an area, subdivision, or other appropriate basis: (1) Risk premium (full cost) rates for flood insurance, (2) the rate (at below full cost, if necessary) which would be reasonable, would encourage the purchase of flood insurance, and would be consistent with the purposes of the act, and (3) the extent to which federally assisted or other flood protection measures initiated after the effective date of the act affect the estimates of rates mentioned in (1) and (2). The Secretary will base estimates of risk premium rates on a

consideration of the risks involved and accepted actuarial principles. The rates will reflect applicable operating costs and allowances of participating private insurers, and, on a discretionary basis, non-developmental Federal administrative expenses which may be incurred in carrying out the flood insurance program.

*Section 1208(b).*—Provides that, in conducting the necessary rate studies and investigations, the Secretary shall, to the extent feasible, utilize the services, on a reimbursement basis, of the Army Corps of Engineers, the Geological Survey, the Soil Conservation Service, the Environmental Science Services Administration, the Tennessee Valley Authority, and other appropriate Federal departments and agencies.

*Section 1208(c).*—Requires the Secretary to give priority to those States or areas that have evidenced a positive interest in flood insurance, in making rate studies and investigations.

#### ESTABLISHMENT OF CHARGEABLE PREMIUM RATES

*Section 1209(a).*—Authorizes the Secretary, after consultation with the flood insurance advisory committee and representatives of the State insurance authorities, to establish chargeable premium rates and the areas, terms and conditions for the application of such rates. Rates will be determined on the basis of estimates made under section 1208 and other necessary information.

*Section 1209(b).*—Provides that, in prescribing chargeable rates, the Secretary shall be guided by a number of factors, including the consideration of the respective risks involved, the differences in risk due to land use measures, floodproofing, flood forecasting and similar measures. The Secretary would be authorized to prescribe chargeable rates at reasonable levels, lower than those at full cost where necessary, in order to encourage the purchase of flood insurance. In low-risk areas the chargeable rate for existing properties will be the same or close to the estimated full cost rate. The higher the flood risk for an area, the lower the chargeable rate would be, in relation to the estimated full-cost rate. Under this section, all chargeable rates will be stated so as to reflect their basis, including any differences from the estimated full-cost risk premium rates.

*Section 1209(c).*—Provides that after an area has been identified as being flood-prone and this information was published in the area, then newly constructed property or substantially improved property can be insured only at rates which are not less than the estimated (full cost) risk premium rate.

*Section 1209(d).*—Provides that where any chargeable premium rate is equal to the estimated risk premium rate (full cost) for the area, and if the rates include any amount for administrative expenses of the Federal Government in carrying out the flood insurance program (in the Secretary's discretion under section 1208), a sum equal to that amount is to be paid to the Secretary to be deposited in the insurance fund.

#### TREASURY BORROWING AUTHORITY

*Section 1210(a).*—Provides that the authority vested in the Housing and Home Finance Administrator by section 15(e) of the Federal Flood Insurance Act of 1956 (pertaining to the issue of notes or other

obligations to the Secretary of the Treasury) shall be vested in the Secretary.

*Section 1210(b).*—Requires that borrowed Treasury funds must be deposited in the national flood insurance fund established under section 1211.

#### NATIONAL FLOOD INSURANCE FUND

*Section 1211(a).*—Authorizes the Secretary to establish in the U.S. Treasury a national flood insurance fund. Premium equalization payments to the insurance pool, reinsurance claims of the pool, and repayments of borrowed moneys to the Secretary of the Treasury (available from appropriations or reinsurance premiums) will be charged to the fund. Administrative expenses of carrying out the program may also be paid out of the fund.

*Section 1211(b).*—Requires the fund to be credited with: (1) Borrowed Treasury funds, (2) reinsurance premiums payable by the insurance pool, (3) amounts advanced to the fund from appropriations in order to maintain it on adequate levels, (4) interest on the investment of surplus amounts in the fund, (5) administrative expenses included in chargeable premium rates and which have been paid to the Secretary, and (6) receipts from other operations incident to the insurance program; and, in the event the flood insurance program is carried out through the facilities of the Federal Government, the insurance premiums paid.

*Section 1211(c).*—Authorizes the Secretary of the Treasury to invest surplus moneys in the fund in obligations issued or guaranteed by the United States, if: (1) All outstanding obligations have been liquidated, and (2) any outstanding amounts that have been advanced to the fund from appropriations for reinsurance payments to the pool have been credited to that appropriation, with interest accrued at a rate based on the average current yield on outstanding marketable obligations of the United States of comparable maturities.

*Section 1211(d).*—Provides that the fund will be available to finance the operation of the flood insurance program if the Secretary finds that it should, in whole or in part, be carried out through the facilities of the Federal Government, including costs incurred in the adjustment and payment of loss claims and payment of applicable operating costs of private insurers if such companies are involved. Any premiums paid are to be deposited in the fund.

#### OPERATING COSTS AND ALLOWANCES

*Section 1212(a).*—Directs the Secretary to negotiate with appropriate representatives of the insurance industry, from time to time, for the purpose of prescribing a current schedule of operating costs applicable to risk-sharing and non-risk-sharing participants in the flood insurance program, and a current schedule of operating allowances (profits) applicable to risk-sharing insurers. These schedules will be prescribed in regulations.

*Section 1212(b).*—Specifies that operating costs include: (1) Expense reimbursements covering the expenses of selling and servicing the insurance, (2) reasonable compensation or commissions payable for

selling and servicing the insurance, (3) loss adjustment expenses, and (4) other expenses which the Secretary finds were incurred in selling or servicing the insurance. Operating allowances include amounts for profit and contingencies which the Secretary finds reasonable and necessary.

#### PAYMENT OF CLAIMS

*Section 1213.*—Authorizes the Secretary to prescribe regulations establishing methods for the adjustment and payment of claims for losses to property insured under the flood insurance program.

#### DISSEMINATION OF FLOOD INSURANCE INFORMATION

*Section 1214.*—Directs the Secretary to make information and data available to the public and to any State and local agency regarding: (1) The coverage and objectives of the flood insurance program, and (2) estimated and chargeable flood insurance premium rates, and the basis for the difference between such rates.

#### PROHIBITION AGAINST CERTAIN DUPLICATIONS OF BENEFITS

*Section 1215(a).*—Contains provisions which will prevent Federal disaster assistance from being made available to compensate for any loss to the extent it is covered by flood insurance. Also provides that no such assistance shall be made available to the extent losses of real or personal property could have been covered (at the maximum limits) if flood insurance was actually available more than 1 year prior to the loss. Authority is provided for the Secretary to prescribe, by regulations, an exception to this latter provision for low-income persons who might otherwise benefit from such assistance.

*Section 1215(b).*—Provides that "Federal disaster assistance" includes any Federal financial assistance made available to any person as a result of: (1) A major disaster, as determined by the President pursuant to "An Act to authorize Federal Assistance to State and local governments in major disasters, and for other purposes" (42 U.S.C. 1855-1855g); (2) a natural disaster, as determined by the Secretary of Agriculture pursuant to section 321 of the Consolidated Farmers Home Administration Act of 1961; (3) a disaster with respect to which loans may be made under section 7(b) of the Small Business Act.

*Section 1215(c).*—Makes the term "financial assistance" as used in section 10 of the Disaster Relief Act of 1966 (which directs that Federal assistance programs be administered to avoid duplication of benefits) include flood insurance.

#### STATE AND LOCAL LAND USE CONTROLS

*Section 1216.*—Provides that after June 30, 1970, no new flood insurance coverage (including renewals) will be provided in any area unless an appropriate public body had adopted permanent land use and control measures, with effective enforcement provisions, which the Secretary finds consistent with the comprehensive criteria for land management and use prescribed under section 1261.

## PROPERTIES IN VIOLATION OF STATE AND LOCAL LAW

*Section 1217.*—Prohibits any new flood insurance (including renewals) for property which violates State or local laws, regulations, or ordinances which are intended to discourage or otherwise restrict land development or occupancy in flood-prone areas.

## COORDINATION WITH OTHER PROGRAMS

*Section 1218.*—Directs the Secretary to consult with Federal, State, and local agencies having responsibilities for flood control, flood forecasting, and flood damage prevention, in order to assure mutual consistency between the programs of such agencies and the flood insurance program.

## ADVISORY COMMITTEE

*Section 1219(a).*—Directs the Secretary to appoint a flood insurance advisory committee. The purpose of the committee is to advise the Secretary with respect to the administration of this act and in the preparation of the regulations prescribed in the act.

*Section 1219(b).*—Provides that the committee shall consist of not more than 15 persons selected from: (1) The insurance industry, (2) State and local governments, (3) lending institutions, (4) the home-building industry, and (5) the general public.

*Section 1219(c).*—Provides that committee members, while attending conferences or meetings, will be compensated at a rate fixed by the Secretary not to exceed \$100 a day and to also receive travel and living expenses when serving away from their homes or regular places of business.

## INITIAL PROGRAM LIMITATIONS

*Section 1220.*—Provides that the face amount of flood insurance coverage outstanding and in force at any given time cannot exceed \$2.5 billion.

## REPORT TO THE PRESIDENT

*Section 1221.*—Directs the Secretary to include a report on the operations of the flood insurance program provided for under this act in his annual report to the President for submission to the Congress.

## CHAPTER II—ORGANIZATION AND ADMINISTRATION OF THE FLOOD INSURANCE PROGRAM

### ORGANIZATION AND ADMINISTRATION

*Section 1230.*—Directs the Secretary, after such consultation with representatives of the insurance industry as may be necessary, to implement the flood insurance program by providing for an industry program with Federal financial assistance. In the event this program proves unworkable, the Secretary is directed to provide for a Federal program with industry assistance.

## PART A—INDUSTRY PROGRAM WITH FEDERAL FINANCIAL ASSISTANCE

## INDUSTRY FLOOD INSURANCE POOL

*Section 1231(a).*—Authorizes the Secretary to encourage and assist private insurers to join together in a pool to provide flood insurance coverage and to participate financially in underwriting the risks assumed and in assuming responsibility for some proportion of claims for losses.

*Section 1231(b).*—Authorizes the Secretary to prescribe requirements for private insurers participating in the pool, including, but not limited to, minimum requirements for capital or surplus or assets.

## AGREEMENTS WITH FLOOD INSURANCE POOL

*Section 1232(a).*—Authorizes the Secretary to enter into agreements with any insurance pool as he deems necessary to carry out the purposes of this act.

*Section 1232(b).*—Provides that any agreement with a pool shall specify the terms and conditions under which: (1) Risk capital will be available for the adjustment and payment of claims, (2) the pool and its participants will participate in premiums received and profits or losses, (3) the maximum amount of profit which may be realized as established by the Secretary under section 1212, (4) operating costs prescribed under section 1212 and allowances are to be paid, and (5) premium equalization payments and reinsurance claims will be paid.

*Section 1232(c).*—States that the agreements will also contain such provisions as the Secretary finds necessary to assure that: (1) No qualified insurer wishing to participate in the pool will be excluded, (2) insurers participating in the pool will provide continuity of flood insurance coverage, and (3) other insurance companies, agents, and brokers will to the maximum extent practicable be permitted to cooperate with the pool as fiscal agents or otherwise on a non-risk-sharing basis. This section assures that no insurance companies shall be excluded from the program on the basis of considerations such as size.

## JUDICIAL REVIEW

*Section 1233.*—Authorizes private insurers participating in the pool to adjust and pay claims for losses and permits any claimant, upon disallowance of a claim, or upon the claimant's refusal to accept the amount allowed on a claim, to institute an action, within 1 year after notice of disallowance is mailed, in the U.S. district court for the district in which the insured property or the major portion of it was situated. Jurisdiction would be conferred on the district court without regard to the amount in controversy. Claimants could also avail themselves of legal remedies in State courts.

## PREMIUM EQUALIZATION PAYMENTS

*Section 1234(a).*—Directs the Secretary, on such terms and conditions as he shall provide, to make periodic payments to the pool in recognition of any reductions made in chargeable premium rates

under estimated risk premium rates in order to provide flood insurance on reasonable terms.

*Section 1234(b).*—Provides that payments for a share of the claims paid in a given period will be based on the aggregate amount of flood insurance retained by the pool after ceding reinsurance in accordance with section 1235.

Subject to the limiting terms and conditions of the basic agreement between the Secretary and the pool under section 1232, the Secretary is also authorized to make payments to the pool for a proportionate amount of applicable operating costs (including only administrative expenses) and allowances on the same ratio basis as used to determine the sharing of claim payments.

*Section 1234(c).*—Authorizes the Secretary to establish designated pay periods and the methods for determining the sum of premiums paid or payable during such periods.

#### REINSURANCE COVERAGE

*Section 1235(a).*—Authorizes the Secretary to take such action as may be necessary to make available reinsurance coverage to the insurance pool for excess losses.

*Section 1235(b).*—Authorizes entering into contracts, agreements or other arrangements to provide reinsurance, in consideration of premiums, fees, or other charges as the Secretary finds necessary to cover anticipated losses.

*Section 1235(c).*—Authorizes the Secretary to negotiate an excess loss agreement with the insurance industry pool whereby claims above a certain limit will be submitted to the Secretary on a portfolio basis, and paid by the Federal Government.

*Section 1235(d).*—Provides that reinsurance claims must be submitted on a portfolio basis, in accordance with terms and conditions as may be established by the Secretary.

*Section 1235(e).*—Provides that such pool shall make no distribution of earnings for a period of up to 5 years based on flood insurance premiums, unless the aggregate cumulative premiums, fees, or other charges established for excess loss reinsurance under subsection (b) and collected for deposit in the national flood insurance fund exceeds the aggregate cumulative expenses paid for reinsurance claims by such fund.

### PART B—GOVERNMENT PROGRAM

#### FEDERAL OPERATION OF THE PROGRAM

*Section 1240(a).*—Authorizes the Secretary, after consultation with representatives of the insurance industry if he makes a determination that the flood insurance program cannot be effectively carried on through the insurance pool, to take the necessary steps to operate the program through the facilities of the Federal Government, either by: (1) Utilizing insurance companies, other insurers, agents, brokers, and adjustment organizations as fiscal agents of the United States, (2) by utilizing employees of the Department of Housing and Urban Development or other Government employees (by arrangement with the

heads of other agencies), or (3) by a combination of alternatives (1) and (2) above.

*Section 1240(b).*—Provides that at least 90 days before an all-Federal program of insurance is entered into by the Secretary, during all of which time Congress shall be in session, he shall make a report to the Congress which will: (1) State the reasons for his determination that a program under the industry-Government option in part A cannot be carried out, (2) support such determination by pertinent findings, (3) indicate the extent to which he anticipates the industry will be utilized in the all-Federal program, and (4) make any other recommendations he deems advisable.

#### ADJUSTMENT AND PAYMENT OF CLAIMS

*Section 1241.*—Authorizes the Secretary to adjust and pay claims, and authorizes any claimant, upon disallowance of a claim, or upon refusal of the claimant to accept an amount allowed, to institute an action, within 1 year after notice of disallowance or partial disallowance, is mailed, in the U.S. district court for the district in which the insured property or the major portion of it was situated. Jurisdiction would be conferred on the district court without regard to the amount in controversy.

### PART C—PROVISIONS OF GENERAL APPLICABILITY

#### SERVICES BY INSURANCE INDUSTRY

*Section 1245(a).*—Provides legal authority for the Secretary to enter into the necessary arrangements with the insurance industry to implement the flood insurance program set forth in the act, including provisions for payment of applicable operating costs and allowances for such facilities and services.

*Section 1245(b).*—Exempts any such arrangements from any provisions of Federal law requiring competitive bids or requiring that contracts or purchases of supplies or services by the Federal Government be made only after advertisement is provided for a sufficient time to allow competitive proposals to be made.

#### USE OF INSURANCE POOLS, COMPANIES, OR OTHER PRIVATE ORGANIZATIONS FOR CERTAIN PAYMENTS

*Section 1246(a).*—Authorizes the Secretary to enter into contracts with any pool, insurance companies, or other private organizations he finds acceptable for use as fiscal intermediaries. Such intermediaries could (1) estimate and determine amounts of Federal payments, and (2) audit participating insurers, agents, brokers, or adjustment organizations, as may be necessary to assure that proper payments are made.

*Section 1246(b).*—Provides that any contract may contain provisions necessary to carry out the Secretary's responsibilities, under the provisions of the act.

*Section 1246(c).*—Provides that contracts authorized by this section would be exempted from any provisions of Federal law requiring competitive bidding or requiring that contracts or purchases of supplies

or services by the Federal Government be made only after advertisement is provided for a sufficient time to allow competitive proposals to be made.

*Section 1246(d).*—Requires a finding by the Secretary that the contracting party can perform its obligations efficiently and effectively before a contract can be entered into.

*Section 1246(e).*—Provides that the Secretary is authorized to require a surety bond from any organization performing responsibilities under the authority granted and any of its officers and employees. No individual designated to certify payments will be liable with respect to payments certified by him in the absence of gross negligence or intent to defraud the United States. No officer disbursing funds in accordance with a proper certification of payments would be liable with respect to such payments in the absence of gross negligence or intent to defraud the United States.

*Section 1246(f).*—Specifies that contracts will be automatically renewable from year to year in the absence of notice from either party as to termination, except that the Secretary may terminate a contract after reasonable notice if he determines that the other party has substantially failed in its obligations or in carrying them out in a manner inconsistent with the efficient and effective administration of the flood insurance program.

#### SETTLEMENT AND ARBITRATION

*Section 1247(a).*—Authorizes the Secretary to make final determination and settlement of any claims arising from the financial transactions which he is authorized to carry out under the act. The Secretary may, however, refer such disputes to arbitration.

*Section 1247(b).*—Specifies that this arbitration would only be advisory in nature.

#### RECORDS AND AUDIT

*Section 1248(a).*—Provides that any flood insurance pool receiving financial assistance under the program, and any pool, company, or other private organization which has entered into any contract, agreement, or other arrangement with the Secretary under parts B and C of chapter II, shall keep such records as the Secretary prescribes. Such records are to fully disclose the total costs of the programs undertaken or services rendered, so as to facilitate an effective audit.

*Section 1248(b).*—Provides that the Comptroller General and the Secretary (or their duly authorized representatives shall have access to any books, documents, papers, and records of the pool, insurance company or other private organizations, which are pertinent to the costs of the programs set forth in this act.

### CHAPTER III—COORDINATION OF FLOOD INSURANCE WITH LAND-MANAGEMENT PROGRAMS IN FLOOD-PRONE AREAS

#### IDENTIFICATION OF FLOOD-PRONE AREAS

*Section 1260.*—Authorizes the Secretary, utilizing the Army Corps of Engineers, the Geological Survey, the Soil Conservation Service,

the Environmental Science Services Administration, TVA, and other Federal departments and agencies, to identify and publish information within 5 years after the effective date of the act with respect to all flood plain areas, including coastal areas in the United States, which have special flood hazards. The Secretary is also required to establish within 15 years, flood risk zones in these areas and to make estimates with respect to the rates of probable flood-caused loss for the various flood risk zones for each area.

#### CRITERIA FOR LAND MANAGEMENT AND USE

*Section 1261(a).*—Authorizes the Secretary to carry out studies or investigations with regard to the adequacy of State and local measures in flood-prone areas, as to land management and use, flood control, flood zoning, and flood damage prevention.

*Section 1261(b).*—Provides that these studies and investigations deal with laws, regulations, or ordinances relating to encroachments and obstructions on stream channels and floodways, the orderly development and use of flood plains of rivers or streams, floodway encroachment lines or flood plain zoning, building codes, building permits, and subdivisions or other building restrictions.

*Section 1261(c).*—Provides that based on his studies and investigation, the Secretary is authorized to develop comprehensive criteria designed to encourage, where necessary, the adoption of permanent State or local measures which will lessen the exposure of property and facilities to flood losses, improve the long-range management and use of flood-prone areas, and inhibit, to the maximum extent feasible, unplanned and economically unjustifiable future development in such areas. The Secretary is also authorized to work closely with and provide any necessary technical assistance to State, interstate, and local governmental agencies to encourage the application of such criteria and the adoption and enforcement of such measures as may be necessary to help in reducing any unnecessary damages resulting from floods.

#### PURCHASE OF CERTAIN INSURED PROPERTIES

*Section 1262.*—Authorizes the Secretary to negotiate with owners of real property covered by flood insurance which are located in any flood-risk area, and damaged substantially beyond repair by flood, for the purchase of such property. The Secretary is then authorized to transfer such property to those State or local agencies agreeing to use the property for at least 40 years for those purposes as the Secretary may, by regulation, determine to be consistent with sound land use and management. This authority is voluntary and no property owner would be required to sell or lease his property to the Secretary.

### CHAPTER IV—APPROPRIATIONS AND MISCELLANEOUS PROVISIONS

#### STUDIES OF OTHER NATURAL DISASTERS

*Section 1270(a).*—Authorizes the Secretary to make studies to determine the extent to which insurance protection against earthquakes or other natural disasters is not available and the feasibility of making such protection available.

*Section 1270(b).*—Provides that studies under this section be made in cooperation with other Federal, State, or local agencies, and authorizes the Secretary to enter into agreements for the conduct of such studies with other Federal agencies, on a reimbursement basis, or with State and local agencies.

#### PAYMENTS

*Section 1271.*—Vests discretion in the Secretary to make payments under this program in advance of their actual need, or by way of reimbursement.

#### GOVERNMENT CORPORATION CONTROL ACT

*Section 1272.*—Makes the provisions of the Government Corporation Control Act applicable in the administration of the flood insurance program to the same extent as applicable to wholly owned Government corporations.

#### FINALITY OF CERTAIN FINANCIAL TRANSACTIONS

*Section 1273.*—Provides that any financial transaction under this act or payment received or made in connection therein shall be final and conclusive upon all officers of the Government.

#### ADMINISTRATIVE EXPENSES

*Section 1274.*—Provides that any administrative expenses of the Federal Government in carrying out the flood insurance program may be paid out of appropriated funds.

#### APPROPRIATIONS

*Section 1275(a).*—Authorizes the appropriations necessary to carry out the flood insurance program, including sums to cover administrative expenses and to reimburse the national flood insurance fund for premium equalization payments and reinsurance claims paid out of the fund.

*Section 1275(b).*—Provides that these funds shall be available without fiscal year limitation.

#### EFFECTIVE DATE

*Section 1276.*—Provides for the act to become effective 120 days following the date of enactment, except that the Secretary is authorized to extend the effective date up to 180 days after enactment if he finds conditions necessitate a long preparatory period.

#### TITLE XIII—INTERSTATE LAND SALES

##### SHORT TITLE

*Section 1301.*—Provides that this title may be cited as "The Interstate Land Sales Full Disclosure Act".

## DEFINITIONS

*Section 1302.*—Defines the terms contained in this title.

## EXEMPTIONS

*Section 1303(a).*—Provides for specific exemptions from the provisions of the act.

*Section 1303(b).*—Provides that the Secretary of HUD may make exemptions from any of the provisions of the act if he finds the coverage is not necessary in the public interest and for the protection of purchasers due to the small amount of the offering or its limited character.

## PROHIBITIONS RELATING TO THE SALE OR LEASE OF LOTS IN SUBDIVISIONS

*Section 1304(a).*—Makes it unlawful for any developer or agent engaged in interstate commerce (1) to sell or lease any lot unless a statement of record is in effect pursuant to section 1307 and a printed property report is furnished to each purchaser in accordance with section 1308; (2) to employ any device, scheme, or artifice to defraud; to obtain money or property by means of a misrepresentation with respect to information in the statement of record or the property report or any other information; or to engage in any transaction, practice, or course of business which operates or would operate as a fraud or deceit on the purchaser.

*Section 1304(b).*—Provides that a purchaser may revoke a contract or agreement of purchase if he is not given a copy of the property report before or at the time of his signing the contract. Where the purchaser does not receive the property report 48 hours before signing the contract, he may revoke it within 48 hours, unless the purchaser read the property report, and inspected the lot to be purchased before signing the contract and so stipulates in writing.

## REGISTRATION OF SUBDIVISIONS

*Section 1305(a).*—Provides that a subdivision may be registered by filing a statement of record with the Secretary meeting the requirements of the act and the rules and regulations prescribed by the Secretary.

*Section 1305(b).*—Provides for payment to the Secretary by the developer of a registration fee not in excess of \$1,000 in accordance with a schedule to be fixed by regulations of the Secretary.

*Section 1305(c).*—Provides that the filing of a statement of record or an amendment takes place on its receipt accompanied by payment of the fee provided in subsection (b).

*Section 1305(d).*—Requires that information contained in or filed with a statement of record be available to the public under regulations prescribed by the Secretary.

## INFORMATION REQUIRED IN STATEMENT OF RECORD

*Section 1306.*—Provides that the statement of record shall contain certain information and be accompanied by certain specified documents.

## TAKING EFFECT OF STATEMENTS OF RECORD OR AMENDMENTS THERETO

*Section 1307(a).*—Provides that a statement of record, or any amendment, shall take effect on the 30th day after filing or at an earlier date if the Secretary so determines. When additional lands are offered for disposition, a developer may consolidate the statement with any prior statement of record offering subdivided land under the same promotional plan.

*Section 1307(b).*—Provides that the Secretary advise the developer within a reasonable time if the statement is materially defective. Such notification suspends the effective date until 30 days after a corrective filing is made. The developer may, however, request a hearing which must be held within 20 days of the Secretary's receipt of the request.

*Section 1307(c).*—Requires the developer to file an amendment to a statement if any change occurs subsequent to its effective date which affects any material fact required to be contained in the statement.

*Section 1307(d).*—Permits the Secretary to suspend a statement of record if it appears to him that it includes an untrue statement of a material fact or omits to state a material fact required to be stated or necessary to make the statement not misleading.

*Section 1307(e).*—Empowers the Secretary to make an examination to determine whether an order should be issued under subsection (d) and allows him to have access to and demand production of any relative books and papers of the developer, his agent, or any other person when the matter is relevant to the examination.

*Section 1307(f).*—Permits any notice required under section 1307 to be sent to or served on the developer or his authorized agent.

## INFORMATION REQUIRED IN PROPERTY REPORT

*Section 1308(a).*—Provides that a property report shall contain any information in the statement of record that the Secretary deems necessary, as well as any other information prescribed under rules and regulations of the Secretary as necessary or appropriate.

*Section 1308(b).*—Requires that the property report not be used for any promotional purposes before the statement of record becomes effective and then only if used in its entirety. States that no person may advertise or represent that the Secretary approves or recommends the subdivision.

## COOPERATION WITH STATE AUTHORITIES

*Section 1309(a).*—Provides that the Secretary of Housing and Urban Development shall cooperate with State authorities responsible for regulating the sale of lots in subdivisions subject to the act. It permits the Secretary to accept for filing under, and declare effective as a statement of record, material filed with and found acceptable by such authorities.

*Section 1309(b).*—Provides that nothing in the act shall affect the jurisdiction of any State real estate commission.

## CIVIL LIABILITIES

*Section 1310.*—Provides for civil liabilities against a developer or agent who sells or leases lots in a subdivision in violation of the provisions of the act.

## COURT REVIEW OF ORDERS

*Section 1311(a).*—Permits any person aggrieved by an order or determination of the Secretary, which was issued after a hearing, to obtain review in the U.S. court of appeals for the circuit in which the person resides or has his principal place of business or in the U.S. Court of Appeals for the District of Columbia.

*Section 1311(b).*—Provides that commencement of proceedings under subsection (a) will not stay the Secretary's order unless specifically ordered by the court.

## LIMITATION OF ACTIONS

*Section 1312.*—Bars the bringing of an action to enforce any liability created under section 1310 (a) or (b) (2) unless it is brought within 1 year after discovery of the untrue statement or the omission or after the discovery should have been made. If the action is to enforce a liability established under section 1310(b) (1), it must be brought within 2 years after the violation upon which it is based. No action under the act may be brought more than 3 years after the sale or lease of the property.

## CONTRARY STIPULATIONS VOID

*Section 1313.*—Provides that any condition, stipulation, or provision requiring a person to waive compliance with the act, or rules and regulations of the Secretary pursuant to it, shall be void.

## ADDITIONAL REMEDIES

*Section 1314.*—Provides that rights and remedies under the act are in addition to other rights and remedies at law or equity.

## INVESTIGATIONS, INJUNCTIONS, AND PROSECUTION OF OFFENSES

*Section 1315(a).*—Authorizes the Secretary to file suit to prohibit violations of the act or any rule or regulation promulgated pursuant to the act in any U.S. district court or in the U.S. District Court for the District of Columbia. The Secretary is also authorized to transmit evidence concerning prohibited acts or practices to the Attorney General who may institute criminal proceedings.

*Section 1315(b).*—Authorizes the Secretary to initiate investigations to determine if any person has violated or is about to violate the act or rules or regulations prescribed pursuant to it.

*Section 1315(c).*—Empowers the Secretary or his designee to administer oaths and affirmations, subpoena witnesses, compel their attendance, take evidence, and require the production of any books, papers, correspondence, memorandums, or other records relevant or material to an investigation or proceeding under the act.

*Sections 1315 (d) and (e).*—Provide for enforcement of subpoenas issued by the Secretary in the U.S. district courts and for procedures concerning attendance and testifying at hearings prescribed by the Secretary.

#### ADMINISTRATION

*Section 1316(a).*—Vests authority and responsibility for administering the act in the Secretary of Housing and Urban Development and gives him authority to delegate any functions, duties, and powers under the act to employees of the Department or to boards of such employees in accordance with the provisions of sections 3105, 3344, 3562, and 7521 of title 5 of the United States Code.

*Section 1316(b).*—Requires that hearings be public and appropriate records be kept.

#### UNLAWFUL REPRESENTATIONS

*Section 1317.*—Provides that the fact that a statement of record has been filed or is in effect does not constitute a finding by the Secretary of Housing and Urban Development that it is true and accurate on its face or that the Secretary has passed on the merits or approved a subdivision.

#### PENALTIES

*Section 1318.*—Establishes penalties for any person who violates the provisions of the act or any rules any regulations issued pursuant to the provisions of the act. The maximum penalty is a fine of not more than \$5,000 or imprisonment for not more than 5 years, or both.

#### RULES, REGULATIONS, AND ORDERS

*Section 1319.*—Authorizes the Secretary of Housing and Urban Development to make, issue, amend, and rescind rules, regulations, and orders necessary or appropriate to the exercise of his functions and powers under the act.

#### JURISDICTION OF OFFENSES AND SUITS

*Section 1320.*—Provides that the U.S. district courts and the U.S. District Court for the District of Columbia shall have jurisdiction of offenses and violations under the act and the rules and regulations prescribed pursuant to it. It provides these courts concurrent jurisdiction with State courts for all suits in equity or at law to enforce liabilities or duties created by this act.

#### APPROPRIATIONS

*Section 1321.*—Authorizes appropriation to carry out the purposes of this act.

#### EFFECTIVE DATE

*Section 1322.*—Provides that the act shall be effective 180 days after enactment.

## TITLE XIV—TEN-YEAR HOUSING PROGRAM

*Sections 1401–1404.*—Adds new provisions to the housing laws requiring the President to submit a report, not later than January 15, 1969, containing a 10-year plan for the national housing needs, along with legislative recommendations for fulfilling these needs. In addition, these sections require annual reports to be made by the President on January 15, 1970, and on each succeeding year through 1978 showing the progress made under the plan and the reasons why, if any, the goals set forth in the plan have not been reached along with estimates of the need for the following year. This title also requires a final report to be submitted by January 15, 1979.

## TITLE XV—MISCELLANEOUS

### MODEL CITIES

*Section 1501.*—Amends section 111(a) of the Demonstration Cities and Metropolitan Development Act of 1966 to authorize an appropriation of \$1 billion for the model cities program for fiscal year 1970. In addition, this section adds an authorization of \$12 million for planning assistance and administrative expenses for the demonstration cities program to be made available for fiscal year 1969.

### URBAN RENEWAL DEMONSTRATION GRANT PROGRAM

*Section 1502.*—Amends section 314(a) of the Housing Act of 1954 to permit demonstration grants to be made to nonprofit organizations for carrying on demonstration projects and other activities for the prevention of slum and blight. (Existing law permits grants to public bodies only.) This section provides that such demonstration undertakings by nonprofit organizations must be consistent with any plans of a local public agency. This section also increases the percentage of the Federal grant from two-thirds of project cost to 90-percent of project cost. This section further increases the amount of capital grant funds available for demonstration projects from \$10 million to \$20 million.

### AUTHORIZATION FOR URBAN INFORMATION AND TECHNICAL ASSISTANCE SERVICES PROGRAM

*Section 1503.*—Amends section 906 of the Demonstration Cities and Metropolitan Development Act of 1966 to authorize an appropriation of \$5 million for fiscal year 1969 and \$15 million for fiscal year 1970 to carry out the purposes of the "Title IX Program" under which matching grants are made to States to help them provide urban information and technical assistance services to communities of less than 100,000 population.

### ADVANCES IN TECHNOLOGY IN HOUSING AND URBAN DEVELOPMENT

*Section 1504.*—Amends section 1010(d) of the Demonstration Cities and Metropolitan Act of 1966 to authorize the appropriation of such money as may be necessary to continue the advances in technology in

housing and urban development programs authorized under section 1010. This section would also permit the letting of research contracts for periods of up to 4 years instead of the present authorized 2-year period.

#### COLLEGE HOUSING

*Section 1505.*—Amends title IV of the Housing Act of 1950 by adding to the existing college housing 3 percent direct loan program a new program of annual grants to cover the difference between the average annual debt service an educational institution is required to pay on borrowings from private sources and the average annual debt service it would be required to pay under the 3-percent rate presently available under the direct-loan program. Annual grants with respect to any project could be contracted to be made for periods up to 40 years. The total amount of annual contracts contracted to be made for this interest rate subsidy could not exceed \$10 million and this amount would be increased by an additional \$10 million on July 1, 1969.

#### FEDERAL-STATE TRAINING PROGRAMS

*Section 1506.*—Amends sections 801, 802, and 805 of title VIII of the Housing Act of 1964 to expand the program to permit grants to States for the training of subprofessional as well as professional persons who will be employed by nonprofit organizations as well as public organizations in the field of housing and community development. This section would also allow grant assistance to be extended to Guam, American Samoa and the Trust Territory of the Pacific in order to meet the needs of these areas for training capable housing and community development technical and professional personnel.

#### ADDITIONAL ASSISTANT SECRETARY FOR HOUSING AND URBAN DEVELOPMENT

*Section 1507.*—Amends the first sentence of section 4(a) of the Department of Housing and Urban Development Act to increase the number of assistant secretaries for such department from five to six.

#### INTERNATIONAL HOUSING

*Section 1508.*—Rewrites section 604 of the Housing Act of 1957 to clarify authority of HUD to: (1) Exchange data on housing and urban development with foreign countries; (2) employ private citizens to participate in intergovernmental and international meetings sponsored or attended by HUD; and (3) accept funds and other donations from international organizations, foreign countries, and private foundations in connection with activities carried on under international housing programs.

#### • LOW-RENT PUBLIC HOUSING—CORPORATE STATUS

*Section 1509 (Technical).*—Amends sections 3 and 17 of the United States Housing Act of 1937 to repeal language which is now obsolete.

## ELIGIBILITY FOR RENT SUPPLEMENT PAYMENTS

*Section 1510.*—Extends eligibility to participate in the rent supplement program to two projects in New York City.

## CONSOLIDATION OF THE LOW-RENT PUBLIC HOUSING IN WASHINGTON, D.C.

*Section 1511.*—Allows the National Capital Housing Authority in Washington, D.C., to consolidate, pursuant to section 15(6) of the United States Housing Act of 1937, into its annual contributions contract for its 8,423 units of low-rent housing under title II of the District of Columbia Alley Dwelling Act, the operating income and operating expense accounts for its 72 units of low-rent housing under title I of such act.

## URBAN RENEWAL PROJECT IN GARDEN CITY, MICH.

*Section 1512.*—Makes local expenditures in connection with the construction of the Florence Primary School in Garden City, Mich., eligible as a local grant-in-aid to the Cherry Hill urban renewal project in Garden City, Mich.

## URBAN RENEWAL PROJECT IN SACRAMENTO, CALIF.

*Section 1513.*—Makes local expenditures in connection with the construction of a storm drainage stem eligible as a local grant-in-aid to the Capitol Mall Riverfront urban renewal project in Sacramento, Calif.

## SELF-HELP STUDIES

*Section 1514.*—Amends section 207 of the Housing Act of 1961 to permit the Secretary of HUD to include the study of self-help in construction, rehabilitation, and maintenance of housing for low-income persons and families in the low-income housing demonstration program. Also directs Secretary of HUD to make a report to Congress within 1 year after date of enactment of this act, setting forth the results of the self-help studies and demonstrations carried out under section 207 with such recommendations as he deems appropriate.

## EARTHQUAKE STUDY

*Section 1515.*—Amends section 5 of the Southeast Hurricane Disaster Relief Act of 1965 to extend the time the Secretary of HUD is required to report his findings and recommendations on earthquake insurance from October 31, 1968 to June 30, 1969.

## TECHNICAL AMENDMENTS

*Section 1516(a).*—Amends section 110(c) of the Housing Act of 1949 to make it clear that urban renewal project funds can be used for "the restoration of acquired properties of historical or architectural value."

*Section 1516(b).*—Amends section 110(d) of the Housing Act of 1949 to make it clear that grant-in-aid credit can be given for expendi-

tures by a public body for the construction of foundations and platforms on air rights sites in urban renewal projects to the same extent that such work could now be done with project funds.

*Section 1516(c).*—Amends section 110(e) of the Housing Act of 1949 to make it clear that the restoration of historic properties can be carried out as an urban renewal project cost for those projects approved for three-fourths Federal grant assistance on a limited project cost basis.

*Section 1516(d).*—Amends section 1101(c)(3) of the National Housing Act to permit amortization of the mortgage term under the medical group practice facilities program to commence after completion of construction of the facility rather than at the time the mortgage is executed.

*Section 1516(e).*—Amends section 213(o) of the National Housing Act to clarify the authority of the Secretary to invest all moneys, not currently needed for the operation of the cooperative management housing insurance fund, in Government bonds or obligations, or in the purchase on the open market of debentures which are the obligation of the fund.

*Section 1516(f).*—Amends section 810(e) of the National Housing Act to permit an individual, who is approved by the Secretary, to be a mortgagor under the FHA section 810 housing program for military personnel or employees or personnel of NASA or AEC research or development installations.

#### HOME OWNERS' LOAN ACT OF 1933

*Section 1517(a).*—Amends section 5(c) of the Home Owners' Loan Act of 1933 to authorize Federal savings and loan associations to invest in time deposits or certificates of deposit in banks insured by the FDIC under regulations issued by the Federal Home Loan Bank Board and also amends section 5(c) to broaden the authority of a Federal savings and loan association to invest up to 1 percent of its assets in loans guaranteed by the Agency for International Development to help finance housing projects or home financing institutions in developing nations outside of Latin America.

*Section 1517(b).*—Amends section 5(c) of the Home Owners' Loan Act of 1933 to permit a Federal savings and loan association to make loans for the construction of new structures related to residential use of the property under the existing exception applicable to property improvement loans.

*Section 1517(c).*—Amends section 5(c) of the Home Owners' Loan Act of 1933 to authorize a Federal savings and loan association to invest in loans to federally supervised financial institutions secured by investments in which the association has statutory authority to invest directly.

#### FEDERAL HOME LOAN BANK ACT

*Section 1518.*—Amends section 12 of the Federal Home Loan Bank Act to authorize Federal home loan banks, subject to regulations by the Federal Home Loan Bank Board, to purchase AID-guaranteed housing loans and to sell participations therein to any blank member.

## FEDERAL RESERVE ACT

*Section 1519.*—Amends section 24 of the Federal Reserve Act to authorize construction loans up to 36 months in length as an exception to the limitation on real estate loans. (Under existing law, such construction loans may not exceed 24 months.)

**Cordon Rule**

In the opinion of the committee, it is necessary to dispense with the requirements of subsection 4 of rule XXIX of the Standing Rules of the Senate in order to expedite the business of the Senate in connection with this report.

## Combined Views of Messrs. Bennett, Tower, and Hickenlooper

### INTRODUCTION

We have joined in the favorable reporting of this bill, the Housing and Urban Development Act of 1968, containing as it does many provisions with which we agree and consider to be constructive additions to, and improvements upon, this Nation's housing and urban-related programs, and others to which we have noted our serious objections during the committee's deliberations on the bill's contents.

Notwithstanding those objections that we have, the subject matter of the committee's efforts, legislation aimed toward fulfilling our country's total housing needs and bettering the living environment of every one of our citizens, is of obvious and overriding importance to every member of the Senate and the constituency that they represent and to our national well-being in general. We feel, therefore, that each member should be afforded the opportunity to inquire into every portion of the bill's contents and make his own individual decision as to its merits or nonmerits. The full exposure of the bill to the collective judgment of the Senate will, we hope, result in the passage of legislation that will provide workable solutions to the perplexing problems facing our country's cities today.

The problems of our cities and communities are many, but one of the greatest single needs is that of decent housing for our less privileged citizens. Tangible future progress in overcoming these housing needs will come about only when there is a maximum application of the skills and resources of our free enterprise system and of the entire private sector. The Federal Government cannot be expected to do the job alone and should not be expected to do so. The skills, the tools, and the resources for the job to be done are available but to a great degree are lying latent for lack of direction and incentive.

The Federal Government must refrain from preempting local business and, very importantly, each individual member of the community, must be encouraged and given the incentive to participate to the fullest. Every member of every family in every one of our cities, towns, and communities, no matter what his financial means or status, will, we feel, respond to the fullest if offered encouragement and, where necessary, a helping hand by the Government rather than being offered only the prospect of complete reliance on the Government.

Legislation must be formulated that will encourage every man to do his best for himself and thus enhance his dignity and self-respect, rather than encouraging the man to do his best to allow his Government to do for him. We must examine closely the path that some would ask us to trod in the name of need and urgency and strive to keep that which is the proper responsibility of the Government and that which is the proper responsibility of the local community, its government and its individual citizens in their proper perspective.

We cannot agree with those who maintain that America's cities are so sick that their only chance for improvement rests on total reliance on the Federal Government, and that they must go hat in hand to Washington for the solution of every ill, real or imagined. To the contrary, the strength and vitality available at the local level can and must be applied to the perplexing problems facing us today.

The bill we have reported is large in content and far-reaching in scope and potential cost, and it is this latter point that gives rise to our greatest reservations. It embodies most of the contents of the Housing and Urban Development Act of 1967 (S. 2700) which was previously reported out by the committee but which was not acted upon prior to the administration's introduction of its 1968 omnibus housing bill. A substantial portion of the bill's contents is devoted to several new programs for Government-assisted housing, both rental and occupant owned, for lower income families. We recognize that if our country's deteriorated neighborhoods are to be upgraded, and their inhabitants provided with decent housing, that a major emphasis and high priority must be assigned to such programs and more risks must be taken, all with the expectation that tangible progress will be forthcoming in the shortest possible time. But in the final analysis, the Government's role in housing activities must be kept in sharp focus.

#### THE GOVERNMENT'S ROLE IN HOUSING

The Federal Government performs an important function in the provision of our country's housing needs, but at the same time, it is to be recognized that such function should be reasonably limited and as precisely defined as possible. Heretofore, along with many of our Republican colleagues, we have expressed the feeling that the Government's role in housing should be that of reinforcement and backup assistance rather than assuming a position of ever-increasing execution and control. We reaffirm our position in this regard.

Past experience in Government housing involvement has shown that there is altogether too little recognition of just who really needs such Government assistance and is justified in receiving it. We now have in existence a Government-assisted housing program that was conceived and enacted purportedly to benefit families at the lower income levels, where assistance is truly needed and justified, but which by experience has tended to accommodate those at the higher end of income eligibility levels, in effect bypassing lower income families. Such a misdirection of program benefits would only be compounded by bending to the continual pressure to permit such eligibility levels to continue and thus enlarge the ranks of those housed to one degree or another with Government assistance beyond all reasonable proportions. We have commented on this program below.

A nation as great as ours with all its resources and capabilities, both in the private and public sectors, has within its means the ability to see that every family is decently housed, but direct Government assistance should be confined to those who are unable to house themselves through their own efforts and means on the private market. To allow otherwise will inevitably result in the undermining of individual responsibility and initiative, contrary to everything for which our form of government stands.

Likewise, the failure to allocate Government resources to those who truly need it will only serve to deprive deserving families of assistance that would otherwise be available.

It is our main concern, therefore, that Government-assisted housing programs, both existing and as would be created in this bill, should not be implemented in such a manner so as to encourage the subordination of individual initiative and responsibility to the Federal Government. Should such programs reach out for families with higher incomes approaching or exceeding the national average instead of benefitting the lower income families most in need of housing assistance today, then the committee's efforts will have missed the target of our concern.

#### PRODUCTION GOALS

We feel that Government-assisted housing should not be allowed to absorb so large a proportion of total possible production in any given year that it will unduly impair the production of private nonassisted housing, and this could be the possible aftermath of unrestrained direct Government involvement in this area. The private sector should not be placed in the position of having to compete with the Government.

The building industry's total productive potential is based on many diverse factors which fluctuate drastically from one period to another. Total housing production, both private and publicly assisted, must of necessity conform to circumstances prevailing at any given time. Any possible level of production depends, among other things, on the prevailing availability of mortgage credit, land, labor, materials, and, of course, the cost factors bearing on each. This pool of resources must be drawn upon by both private and publicly assisted housing, and what is allocated to one must draw away from the other.

The housing to be produced under all Government-assisted housing programs, both existing and as would be created under this bill, is intended to reach a level of 300,000 units during 1969, 400,000 units during 1970, and 500,000 units during 1971, or 1,200,000 units for the 3-year program envisioned by the committee. The administration proposed the construction of 6,000,000 such units over a 5-year period.

The 3-year program is extremely ambitious in itself in that only 1,321,900 private and publicly assisted units were constructed during 1967. It is estimated that the combined figure will increase to 1,430,000 units for 1968. The highest level reached in recent years was 1963 when 1,642,000 units were produced. The initial 1969 goal of 300,000 publicly assisted units compares to a figure of approximately 49,000 such units during fiscal 1966, 57,000 during fiscal 1967, and an estimated 128,000 during fiscal 1968. Thus, this housing comprised about 31½ percent of total production during 1966, 5 percent during 1967, and will increase to an estimated figure of slightly under 10 percent during 1968. If total production during 1969 reaches a level of 1,700,000 units as projected by the administration, then the goal of 300,000 publicly assisted units for that year would result in about 17 percent of total production. If the estimated total production for 1969 remained constant for 1970 and 1971, this percentage of total production made up of publicly assisted units would increase to 23 and 29 percent for these respective years.

In short, it is suggested that Government-assisted housing should increase from 31½ of total production during 1966 to 29 percent of 1971. This obviously reflects a substantially increasing Government involvement in housing, and the prospect for greater competition between the Government and the private sector. We question whether such a trend is supportable if this Nation is to remain one that is dominantly housed on the private market as it historically has been.

Likewise, we would caution that in its push for the fulfillment of its stated production goals, the Government would likely continue, and even increase, its present inclination to extend subsidies to more and more families not in true need of such assistance.

Foundation for our concern in this regard is provided by HUD Secretary Weaver's response to a question during the committee's hearings on why the administration sought the removal of the 70 percent of section 221 (d) (3) limitations for the new lower income homeownership and rental housing programs. He stated:

Let me say that the purpose in presenting this as it is now presented, rather than in following the 70% \* \* \*. The only difference from the program's objective is that by having the more liberal upper limits, you have the possibility of getting a greater volume quicker.

The Secretary is of the opinion that it is justified for Government-assisted housing programs to reach 25-26 percent of total housing production, as would of course be the case if the above mentioned goals are reached, and in order to reach such a goal he is apparently willing to dole out Government subsidies without being inhibited by any consideration of the higher incomes of the families so subsidized. We feel that this degree of liberality is unjustified and should be opposed.

#### FUTURE STUDY

The goal of a decent home and a suitable living environment for every American family, the lower income family in particular, proclaimed by the Congress in 1949 and reaffirmed by the committee will, in our opinion, only be realized when the housing needs of our country's lower income citizens are set apart and identified in such a way that the problem can be attacked in a frontal manner, rather than in a hodgepodge fashion that obscures the causative factors underlying the dilemma facing such families.

A deserving priority in this area must be established. The problems of those that truly need Government housing assistance should be provided an appropriate forum to insure that their needs, thoughts and attitudes are explored to the greatest detail possible. A colloquy must be entered into that reaches out to encompass every tangible factor bearing upon the problem at hand. This would include, among other things, the relative merit and effectiveness of existing programs, the ascertainment of need for new programs, mechanisms, and incentives, and, of course, a thorough explanation of just what is necessary to make possible the maximum involvement of the building industry and the private sector and the affected families themselves.

This bill will create the vehicle for this much-needed inquiry in the form of a National Advisory Commission on Lower Income Housing

(sec. 108) that will carry forward the committee's sharp focus on a national problem area that must not be allowed to drift into inertia and inaction.

#### NATIONAL HOUSING POLICY

The Congress in 1949 recognized the Nation's serious shortage of decent housing, particularly in blighted slum neighborhoods, and declared as "national housing policy" that there should be realized as soon as feasible "\* \* \* the goal of a decent home and a suitable living environment for every American family \* \* \*" and established as Government policy that "\* \* \* private enterprise shall be encouraged to serve as large a part of the total need as it can \* \* \*." The policy to be followed also called for Government housing assistance "\* \* \* to families with incomes so low that they are now being decently housed in new or existing housing \* \* \*."

In the ensuing years since this goal was asserted by the Congress in 1949, the deterioration of housing occupied by families at the lower income levels has by far outpaced the production of decent replacement housing. Government assistance has had a negligible impact on the neighborhoods where such assistance is most needed. Private enterprise has been unable to cope with the bureaucratic entanglements required if such assistance is to be implemented. By some estimates, there now exist in the United States some 5.8 million dwelling units of sub-standard condition, occupied for the most part by families of low income, and it is to the relief of this situation, and the income levels typified by the occupants of this housing, that we have sought to address ourselves to.

The committee has thus reaffirmed the national housing goal set forth in the 1949 Housing Act by prefacing this bill with a "declaration of policy" introduced by the minority calling for the highest priority and emphasis in Government-assisted housing programs for families with incomes so low that they could not otherwise decently house themselves, and requiring, to the greatest extent feasible, that lower income persons be given employment opportunities in conjunction with the construction of housing under such Government programs. This reflects our strong feeling that direct Government housing assistance is justified only when it benefits those of our citizens who demonstrate that they cannot afford decent housing on the private market. Likewise, these citizens must be given more of a chance for participation in the improvement of their living environment than has been the case in the past.

#### ELIGIBILITY FOR GOVERNMENT ASSISTANCE

Viewed in a national perspective, the income that can reasonably be characterized as "lower income" is difficult to define. There are many varying factors that must necessarily go into such a determination. Geographical variations in income have to be recognized. However, by recourse to figures compiled by various sources we feel that reasonable conclusions on this point can be made.

The Census Bureau, in its population survey of March 1967, showed

the following median income breakdown for the 48.9 million families in the United States for 1966:

Annual income	Families	Percentage of total
Under \$3,000.....	7,000,000	14
\$3,000 to \$5,000.....	6,800,000	14
\$5,000 to \$7,000.....	8,700,000	18
\$7,000 to \$10,000.....	11,900,000	24
\$10,000 and up.....	14,500,000	30
Total.....	48,900,000	100

Note: Median income of all families, \$7,400.

The above income breakdown shows that if Government-assisted housing programs are confined to families with annual incomes of \$5,000 and under, as we generally believe they should be, a maximum of 28 percent of our families would possibly be eligible for such assistance.

However, if families making up to \$7,000, or almost the national median income level, are allowed to receive such assistance, then it obviously is to be concluded that 46 percent of all American families, or almost half of all our families, are to be deemed potentially incapable of providing for their own housing needs without some degree of Government assistance. We cannot subscribe to any such conclusion. To the contrary, throughout the entire committee proceedings on both this bill and its predecessor, S. 2700, we have urged that the benefits of the Government-assisted homeownership and rental programs created by this bill be restricted to families at the true lower income levels, or under \$5,000, when the programs are implemented. To not do so would certainly circumvent the need that has been made abundantly apparent to the committee.

We feel that our viewpoint on the matter of income eligibility is supported by other factors as well. Testimony delivered to the committee during its hearings showed the quality of American housing by increments of income as follows:

Annual income	Standard units	Substandard units
Under \$4,000.....	13,558,060	6,333,843
\$4,000 to \$8,000.....	18,991,396	1,827,169
\$8,000 and over.....	12,000,715	312,683

This illustration would serve to show that 75 percent of substandard homes are occupied by families with income of \$4,000 or less.

Since it is generally conceded that most of this country's substandard dwelling units are located in the deteriorated slum neighborhoods of our major cities, some of which experienced riots during 1967 centered in such neighborhoods, it is significant that a survey of 20 such cities by the President's Commission on Civil Disorders showed the median family income in disturbance areas to be \$5,335 for white families and \$4,218 in the case of nonwhite families.

Thus, there is much to indicate that those families with incomes generally \$5,000 and under occupy most of the Nation's substandard housing. If Government assistance is to be utilized to replace such units with standard housing, this is the income range upon which Government assistance should be concentrated. If such assistance is not so restricted, the new lower income housing programs created in this bill will end up benefiting families who can reasonably be deemed capable of providing for their own housing needs to the detriment of those families who truly need such assistance.

#### ASSISTANCE FOR HOMEOWNERSHIP

The most singularly significant provision of this bill is its creation of a new program to assist lower income families to become homeowners (title I, sec. 101). The opportunity for many of these families to own their own homes and escape their status as rentpayers has long been beyond their reach, mainly because of their inability to match their financial means with the necessary purchase and carrying costs. Homeownership contributes to community stability and fosters pride and responsibility in the families that enjoy this most basic of all American traditions. We are in accord with the bill's aim to extend this opportunity to those of our country's lower income families whose possess the desire and potential to own their own homes, but lack sufficient immediate income and counseling to do so.

The opportunity for self-betterment for such families as are appropriately eligible for the program's benefits is at the same time an opportunity for the betterment of entire neighborhoods. There is also presented the opportunity for free enterprise to produce this desperately needed housing through the innovative mechanism created by the bill. We must, however, express our objections to those provisions of the program which we feel will tend to misdirect its benefits.

#### DETERMINATION OF ELIGIBILITY

While many of our Nation's families have incomes so low that they could not be expected to bear the responsibilities and obligations of homeownership, even with Government assistance, we feel that this new program should be so oriented as to reach down to the lowest income levels possible and benefit those in truly deserving circumstances. There is no affirmative safeguard contained in the bill in this regard. It is stated that the bill's eligibility formula will generally cover families with incomes from \$3,000 to \$7,000. We, of course, compare these incomes with the eligibility considerations we have noted above.

Additionally, we point out that the higher figure of \$7,000 can easily be exceeded in that initial program eligibility will be determined by a formula based upon the income eligibility limits presently prescribed for occupants of rental housing under section 221(d)(3) of the National Housing Act. The bill provides that family incomes are not to exceed 70 percent of the section 221(d)(3) income figures for initial eligibility purposes. Once this eligibility criteria is met, a family's income is allowed to exceed the initial eligibility figures, and as such

income increases the monthly subsidy is calculated to decrease. It is additionally provided that 20 percent of the assistance payments contracted for and appropriated will not be subject to the 70 percent limitation, and that \$300 can be deducted from a family's income for each family minor for eligibility purposes. After meeting initial eligibility requirements, the family's income could increase beyond these limits, and income would be recertified every 2 years to adjust the subsidy payment downward.

Without any allowance for the \$300 deduction for minors provision, we point out the following examples of family incomes eligible for program benefits under the bills formula.<sup>1</sup> For purposes of comparison, eligibility limits for rent supplement housing and section 221(h) rehabilitation sales housing for low-income purchasers are shown in parentheses.<sup>2</sup>

City and State	2 persons	3 and 4 persons	5 and 6 persons	7 persons or more
<b>Austin, Tex.:</b>				
70-percent limits.....	\$4,025	\$4,725	\$5,425	\$6,160
Full limits.....	5,750	6,750	7,750	8,800
	(3,200)	(3,400)	(3,800)	(3,800)
<b>Boston, Mass.:</b>				
70-percent limits.....	4,865	5,740	6,615	7,455
Full limits.....	6,950	8,200	9,450	10,650
	(3,600)	(3,800)	(4,100)	(4,400)
<b>Chicago, Ill.:</b>				
70-percent limits.....	5,215	6,125	7,035	7,980
Full limits.....	7,450	8,750	10,050	11,400
	(4,200)	(4,400-4,800)	(5,000-5,200)	(5,400)
<b>Los Angeles, Calif.:</b>				
70-percent limits.....	5,005	5,880	6,720	7,630
Full limits.....	7,150	8,400	9,600	10,900
	(3,600)	(4,400-4,700)	(5,000-5,300)	(5,600)
<b>Milwaukee, Wis.:</b>				
70-percent limits.....	4,760	5,600	6,440	7,280
Full limits.....	6,800	8,000	9,200	10,400
	(4,400)	(4,650-4,900)	(5,150-5,400)	(5,650)
<b>New York, N.Y.:</b>				
70-percent limits.....	5,215	6,125	7,035	7,980
Full limits.....	7,450	8,750	10,050	11,400
	(5,256)	(5,760)	(6,100)	(6,100)

As can be seen, the program will readily be available to families with incomes approaching, and in some cases, exceeding, \$7,000 under the 70-percent limitation, and as we have heretofore noted, some 46 percent of American families have annual incomes of \$7,000 and under. In those instances where the 70-percent limitation is waived, family incomes exceeding \$10,000 would be eligible, notwithstanding that approximately 70 percent of our Nation's families have annual incomes under \$10,000.

The comparable eligibility figures for the rent supplement and section 221(h) rehabilitation programs, which are based upon public housing admission ceilings, are shown in the above table because we by this program. The restricting of this program's benefits to families in need of assistance, and it is these families that should be benefited by this program. The restricting of this program's benefits to families with incomes not exceeding 70 percent of the section 221(d) (3) eligi-

<sup>1</sup> Maximum income limits for occupancy of sec. 221(d)(3) below-market interest rate housing (3 percent), April 1967.

<sup>2</sup> July 1967. Based on public housing admission ceilings.

bility limits would provide these families with a more than reasonable opportunity to better their living environment through homeownership.

However, even if the program's benefits are confined to families with incomes under \$7,000, this assistance will in some cases benefit families too near the national median income level to be justified, to say nothing of the absurdity of extending direct Government assistance to families with incomes in excess of \$7,000, and over \$10,000 in some instances, as would be possible under the bill. This broad program scope must also be viewed in context with the fact that family incomes can exceed initial eligibility levels after occupancy has commenced. The placing of this unwarranted eligibility discretion in the hands of HUD would empower the Government to extend privileged and subsidized status to many of our Nation's families who could, and should, be expected to provide for their own housing needs without Government assistance. It could also be expected that those deserving families at the lower income ranges would lose out in the eligibility competition in all too many instances and thus suffer further disillusionment than they now are living under. There is nothing we need less in Government-assisted housing today than to allow a promising program to end up offering only promises to those deserving such assistance. To allow that 46 percent, or almost half, of our Nation's families must be supported by their Government, to say nothing of 70 percent, is certainly not acceptable in our opinion.

The predecessor of this bill, the committee's bill S. 2700, wherein the lower income homeownership concept was originated, established an eligibility ceiling of 70 percent of section 221(d)(3) limits without the further latitude contained in this bill allowing such limits to be exceeded. We felt that such limits were more than reasonable and urged that within such limits program benefits be generally restricted to families with incomes ranging from \$3,000 to \$5,000. We likewise urge that this bill be so oriented.

#### MORTGAGE TERMS

Several other areas of the program have been expanded in this bill beyond the provisions of S. 2700. The monthly assistance payment to the mortgagee on behalf of the homeowner will be larger, and the mortgage limits will also be larger. We feel that this expansion is neither necessary nor warranted.

In S. 2700, the committee authorized a Government subsidy of the difference between a market interest rate and the equivalent of a 3-percent mortgage. This bill lowers the interest floor to 1 percent, thus increasing the possible subsidy, on the premise that more families at the low end of the income scale (i.e., \$3,600 per year) must be encouraged to undertake the responsibilities of a "adequate" home (i.e., \$12,000 mortgage). Such estimation of "adequacy" would purportedly justify Government assistance to match an income of \$4,800 with a mortgage obligation of \$20,000 simply because assistance could be had under this program. This reasoning would, in our opinion, result in families being urged into a mortgage obligation much larger than they should prudently undertake simply because the Government would provide a subsidy in the form of the difference between what they are capable of

paying and what they will have to pay in order to carry their obligation.

While the program is intended to bring decent housing within the reach of those in such economic circumstances that they cannot obtain such housing on their own, we do not feel that Government assistance should be so stretched as to allow the reasonableness of the mortgage obligation to be pushed to the background in favor of considerations more esthetic than anything else. If this is allowed, as will certainly be possible under this bill, the program will be highly susceptible to a gross mismatching of incomes with mortgage obligations at the taxpayers' expense. The best interests of the lower income family would hardly be served by such a possibility. And equally as important, the best interests of the American taxpayers as a whole would hardly be served by such a misdirected application of their tax dollars.

The proper setting of the interest floor for loans under this program is particularly important since the Government's monthly assistance payment will have to bridge the gap between the program's floor and the prevailing interest rate for money invested in Government-backed mortgages on the private market, which interest rate is currently 6¾ percent and possibly will go higher in the months ahead. Thus, it is apparent that the Government's cost exposure is much greater if its assistance is needed to make up the difference between the 1-percent floor set in this bill and the market rate than it would be if the floor was set at 3 percent as in S. 2700. A 3-percent mortgage is certainly a bargain at today's rates, and we do not feel that the 1-percent interest floor in the bill is reasonable under the circumstances.

Likewise, we do not think that this bill's allowable increase in the mortgage limits over those set out in S. 2700 is reasonable. In S. 2700, the amount of the mortgage could not exceed \$15,000, or \$17,500 in high-cost areas. This bill retained these limits but added the further provision that such limits could be increased to \$17,500 and \$20,000, respectively, for families with five or more members.

The purpose of this program is to assist in providing housing for families at the lower income levels that is adequate in size and modest in construction, but we do not feel that these higher limits reflect a prudent or appropriate degree of modestness in the possible allocation of the program's benefits. We recognize that every lower income family wants the most comfortable surroundings that it can secure, but every other family in the country must of necessity conform its housing to its means. In this instance, the families who are to receive Government assistance should be able to find housing well within the \$15,000 mortgage limitation that will accommodate their families adequately. The bill does allow a \$300 deduction from the bill's income eligibility requirements for each minor child in the family (which amount was set at \$200 in S. 2700), and this will of itself enable the true lower income family to carry a larger mortgage than would otherwise be the case because it would have to apply a smaller amount of its income to monthly mortgage payments. But we see no reason for expanding the benefited family's mortgage eligibility to unjustified levels, with the corresponding increase in the Government subsidy, when the original mortgage limits contained in S. 2700 almost equal the average home mortgage loan carried by American families without the benefit of Government assistance.

## ADDITIONAL ASSISTANCE

There would be created by this bill a national homeownership foundation (sec. 109) the function of which would be to extend technical and limited financial assistance to those private and public organizations organized for the purpose of assisting in the provision of housing and homeownership opportunities for lower income families.

The scope of the Foundation's operation would not be confined just to the implementation of the new programs that would be created under this bill, but rather would include the exploration of new ways to bring about the maximum involvement of the technical and financial resources of the private sector.

There is, we feel, considerable potential in this innovative mechanism, for the thrust of the Foundation's activities would be aimed at encouraging local solutions of local problems by organizations close to, and involved in, community activities. We hope that the Foundation will be given appropriate and necessary latitude to provide a much needed impetus for local initiative and action in this problem area.

## RENTAL AND COOPERATIVE HOUSING ASSISTANCE

The bill includes a new program of Government assistance to eligible, nonprofit, cooperative, or limited-dividend organizations for the development of rental and cooperative housing for lower income families (title II, sec. 201). The need for decent housing for our Nation's disadvantaged citizens is a total need for both rental and occupant-owned housing. However, there are aspects of the program with which we disagree.

The occupants of the housing that would be created under this program would be subject to the same income considerations applicable to the homeownership program, that is, family incomes for initial eligibility purposes, could not exceed 70 percent of the section 221(d)(3) eligibility levels, with the exception that 20 percent of assistance payments authorized and appropriated would be available for projects occupied by tenants with incomes at the full section 221(d)(3) eligibility levels. As is the case with the homeownership program, family incomes could exceed the initial eligibility levels after occupancy. We will suffice it to defer to our previous comments on the far-reaching scope of these eligibility levels, and note our apprehension that this program would possibly be susceptible to favoring families with incomes in excess of those levels truly representative of what we consider to be lower income.

Likewise, we do not feel that there is ample justification for the program's 1-percent interest rate floor on program mortgages. It is contended that if program mortgagors are allowed to make monthly mortgage payments on the basis of a 1-percent mortgage that lower and more affordable rents will be available to lower income tenants. Nevertheless, we feel that this will serve to encourage the construction of higher cost units beyond the adequacy necessary for the lower income families to be housed simply because the Government will subsidize the difference between the cost of the mortgage on a 1-percent interest basis and the prevailing market interest rate actually con-

tracted for. We feel that lower income families will be justly benefited if project mortgagors will confine their activities to housing these families only, and hold unit costs to levels commensurate with the family incomes reflecting a true need for assistance. In this regard, we urge the setting of a 3-percent interest rate floor rather than the 1-percent floor in this bill.

We would add that there is also an element of double subsidy in this program in that up to 20 percent of the units in any one project could be occupied by families receiving rent supplement benefits.

The monthly mortgage payment subsidy under this program would be paid to the mortgagee on behalf of the mortgagor by the Federal Government. Likewise, the Federal Government would simultaneously pay rent supplement benefits to project sponsors on behalf of eligible tenants. Thus, should a sponsor under this program want to place a tenant in a living unit larger than possible under the income eligibility formula, rent supplements could be used to make up the additional rental cost. We doubt the desirability of encouraging this concept of double subsidies.

#### FUTURE OF (221)(d)(3) BMIR

It is our most serious concern that the new rental assistance program might lend itself to perpetuating the shortcomings of the presently existing section 221(d)(3) below-market interest rate program if tighter income limitations are not required, and thus compound 221(d)(3)'s gross misdirection. This program is intended to eventually replace the 221(d)(3) subsidy program even though the latter will not be terminated if this program is enacted into law. Its replacement is certainly well called for, and any program that replaces it should be so oriented as not to contain its obvious shortcomings.

Experience with 221(d)(3) has shown that its income eligibility limits are for the most part minimums and not maximums, and its higher income limits have been inviting targets in the development of projects. The program's purported aim of providing housing for families whose incomes are too high for public housing but too low for standard housing available on the private market has been stretched to such a point that it in fact is actually extending Government-subsidized housing to the country's great middle class where no subsidy is needed or justified.

This need only be illustrated by referring to the examples of full 221(d)(3) income eligibility levels set out in the above table. We feel that the new rental program that would be created under this bill should not be allowed to parallel, or even approach, the distorted eligibility situation prevailing in 221(d)(3), particularly when the benefits of Government assistance tend to gravitate toward the highest eligible incomes, and also keeping in mind that once the initial eligibility requirements are met by a family its income can increase even higher in both the rental and homeownership programs.

#### AUTHORITY FOR ADDITIONAL FUNDING

The bill provides that on July 1, 1969, an additional \$500 million in special assistance authority will become available for use by FNMA, at the President's direction, for the purchase of Government-

backed mortgages requiring special assistance. Due to the lack of a market for section 221(d)(3) BMIR's 3-percent mortgages, the program has had to depend on FNMA's purchase, and thus support, of its mortgages under this special assistance authority.

This direct Federal lending, which is of course at the taxpayer's expense, has thus kept alive a program that subsidizes the housing costs of an income group that by any measure should be able to obtain housing on the private market without Government assistance. It is unconscionable to continue to allow such a misuse of the taxpayer's money, particularly when the financial resources of the country are being strained almost to the breaking point. We are, therefore, opposed to the granting of this additional authority.

#### PRIVATE FNMA

Under title VIII of the bill, the Federal National Mortgage Association (FNMA) would be divided into two separate instrumentalities. One of these would continue secondary market operations under the name of FNMA and would be gradually transitionalized from Federal control to private ownership as contemplated by the 1954 FNMA Charter Act. The special assistance and management and liquidation functions of the present FNMA would be vested in a new federally controlled corporation to be called the Government National Mortgage Associations (GNMA).

The new FNMA would carry forward its vital role of strengthening residential financing by providing flexibility for the marketing of Government-backed mortgages. This function would be further enhanced by the bill's authorization of the issuance by FNMA of securities against pools of FHA-insured and VA-guaranteed mortgages which would be guaranteed by the new GNMA. Private concerns could also issue similar securities that would be eligible, under certain circumstances, for GNMA guarantee. Such securities should present a significant potential for the infusion of yet untapped investment funds into the residential mortgage market.

During the committee's consideration of the bill, we noted that there should be a reasonable amount of regulatory authority retained by HUD over the new FNMA's operations in that the Government would continue to have an interest in the effective functioning of the new corporation. We asked, however, that it be recognized that the new corporation's board and officers should not be unduly encumbered by the vesting of unnecessary power in the hands of the Secretary of HUD over the corporation's internal affairs and policies, and while there is much to be observed during the transition to private ownership, we feel that the bill as now written will allow the Secretary more influence over the corporation than is actually necessary if it is to be a sufficiently private entity. In this connection, the committee approved a minority amendment changing the power to remove a board director for good cause shown from the Secretary of HUD to the President.

It was also felt that the stature and image of the new FNMA would be appropriately enhanced if the corporation's president was appointed by the President during the transition period, and a minor-

ity amendment to this effect was approved by the committee. An amendment was also approved adding a member of the mortgage lending industry to those board members to be appointed by the Secretary of HUD after the transition period.

#### NEW COMMUNITIES

We cannot concur with the inclusion in this bill of a program of Government guarantees for the development of entire new communities (title IV). The program would authorize the Secretary of HUD to guarantee bonds and other obligations issued by developers to finance the cost of acquiring and developing land, after which there would be developed on the land so acquired homes, schools, and the other usual institutions associated with a self-sustaining city or community.

The economic feasibility of such ambitious undertakings is somewhat at doubt, and past experience in this area has revealed a myriad of pitfalls awaiting the unwary. The speculative nature of these large community development programs is of itself reason to doubt the prudence of allowing the Federal Government to pledge its full faith and credit, to the possible cumulative extent of \$500 million, to such undertakings. It is altogether possible that the only solvency inherent in such undertakings will ultimately be that of the Government's financial exposure. We do not feel that there is anything to support allowing the Government's financial resources to be placed in such a position.

This doubtful proposal is being advanced at a time when the housing problems of America's existing cities and communities have not been resolved, and when the Government's financial resources are being stretched in every way possible to extend assistance for the upgrading of our country's deteriorated neighborhoods and the replacement of substandard housing within the cities.

It would be inappropriate, in our opinion, to enlarge the Government's contingent liability in this area when the demands of existing programs are so hard to meet. The homebuilding industry has at its disposal a comprehensive selection of Government housing programs, to which would be added the new lower income programs created by this bill, with which it can undertake the orderly development of quantities of housing ranging from individual structures to entire subdivisions and neighborhoods. The industry possesses the financial resources, when economic feasibility is present, to absorb the necessary costs of land development to implement these programs.

We feel that it is both sufficient and desirable that such development be undertaken within or contiguous to our country's existing cities and communities where existing governmental services and established amenities will be available to the occupants of the housing produced, and likewise, where such housing will enhance and supplement the needs of these cities and communities and their governments. This will certainly result in development activities that are more responsive to local needs than would be the case where entire cities and communities are created that would tend to reflect instead the whims of the Secretary of HUD.

## ADVANCE ACQUISITION OF LAND

Section 603 of the bill would change the definition of land eligible for acquisition by localities to be used for future use from "land planned to be utilized in connection with the future construction of public works or facilities" to "land planned to be utilized in the future for public purposes."

We do not feel that this vague definition is desirable in that it obviously could go well beyond the already flexible limitation of "public works or facilities." Such a new definition would extend the Federal Government's influence over future urban land use to an almost limitless degree.

## SPENDING AUTHORIZATIONS

The committee's setting of spending authorizations for the existing and proposed programs covered by the bill are lower in total than the authorizations proposed by the administration primarily because the committee approved only the first 3 years of its 5-year program. The bill allows a total of \$5.2 billion for a 3-year period rather than the \$7.5 billion over 5 years asked for. Included is \$300 million for both the new lower income homeownership and rental housing programs.

We are in accord with a reasonable emphasis on these new programs if they are in fact administered to fulfill the needs of those of our Nation's families who lack decent housing because of their low incomes. However, our deliberations were made in the shadow of our Government's worst confrontation with budgetary deficits and inflationary pressures in recent history, and the overall massiveness of the bill's potential cost made it imperative in our minds that spending authorizations not be allowed to ignore the priorities that must be established if the Government's financial resources are not to be subjected to unbearable strains. We feel that the bill falls short in this regard.

## URBAN RENEWAL

The bill authorizes \$1.4 billion in urban renewal funds for fiscal 1970, with an additional \$350 million for urban renewal activities in model cities areas for fiscal 1969.

Some 18 years have passed since the initiation of urban renewal's slum clearance concept. This program had as its goal the clearance of slums and blighted neighborhoods for redevelopment with decent housing for the families living in these areas. Such redevelopment was to be achieved by the involvement of, and reliance upon, private enterprise. Decent housing for the affected families, the program's paramount objective, has not been the aftermath of program experience, and private enterprise has over the years found it increasingly difficult to cope with the bureaucratic delays and involvements necessary for participation.

There has been an unrestrained increase in the program's scope over the years since its inception with a paralleling increase in cost. Neighborhood families instead of being rehoused have been subjected to harsh displacement policies. Basically sound residential structures have been razed instead of renovated or rehabilitated. Replacement

housing has for the most part been lavish in construction and out of the financial reach of the lower income families in need of housing. Commercial development has tended to push housing to the background. Since urban renewal's inception in 1949, there has been produced only slightly over 106,000 new dwelling units and 75,000 rehabilitated units in urban renewal areas. Of course, not all of these units have been affordable by neighborhood families.

It is said that this misdirection of program activities will now be reversed and we would view such to be a welcome development, but one which must be seen. It is this failure to provide decent housing that gives rise to our reluctance to further engorge the program with spending authority and allow it to continue its ineffective and wasteful pattern. We feel that our feelings in this regard would be shared by the disillusioned inhabitants of many of our country's urban renewal areas who have come to view the program as their enemy rather than their friend. Many of these people are highly skeptical of this Federal adventure in urban experimentation.

Housing, and housing that is affordable by lower income area residents, must be the future thrust of the program. The bill would amend the Housing Act of 1949 (sec. 513) to provide that "a majority of the housing units provided in urban renewal areas which will be redeveloped for predominantly residential uses \* \* \* shall be standard housing units for low or moderate income families or individuals."

There is presently required a "substantial" number of such units in a predominately residential urban renewal project, but "substantial" has in the past only been construed at 20 percent. The bill would thus require that a "majority" of the housing units in a predominately residential urban renewal project be allocated to low and moderate income housing. We take majority to mean at least 51 percent, which certainly is an improvement over the presently existing 20-percent interpretation.

But, we point out the continuing inclusion of "moderate" income families which impliedly allows program emphasis on housing for families with higher incomes. Our concern is over the housing needs of lower income families. Also, this new "majority" requirement will pertain only to projects that are "predominately residential." Program experience has shown that its basic underlying weakness is that there are not enough "predominately residential" projects. We do not feel that the new language will require an emphasis on such projects, and it is this emphasis that is sorely needed.

#### REHABILITATION

We do not feel that the section 115 rehabilitation grant (sec. 503) and section 312 direct loan (sec. 512) programs should be expanded to cover properties outside of urban renewal and code enforcement areas as the bill provides. Rehabilitation in conjunction with direct loans is potentially the urban renewal program's most effective and appropriate vehicle for the upgrading of deteriorated neighborhoods. There are innumerable dwellings in defined urban renewal project areas, where activity should be concentrated, that should have the benefit of this improvement tool without moving out to other areas.

We take encouragement that these rehabilitation opportunities can receive a greater future emphasis by the bill's increase of the rehabilitation grant maximum from \$1,500 to \$2,500 (sec. 503).

The bill would remove the existing limitations on the acquisition and rehabilitation of residential properties by a local urban renewal agency. This authority has been used for the purpose of demonstrating the feasibility of rehabilitation to area property owners. While we feel that rehabilitation techniques should be used to the greatest possible extent in program activities, we point out that it never was intended that local agencies themselves were to assume the role of the private developer. This authority should be used only where necessary to assure that rehabilitation is not overlooked as an appropriate tool for preserving and upgrading sound properties.

#### MODEL CITIES

The model cities program, as authorized by the Demonstration Cities and Metropolitan Development Act of 1966, is based on the premise that our cities lack adequate resources to deal with their local problems, and that in addition to the existing Federal urban renewal and grant-in-aid programs they must have Federal aid to plan, develop, and carry out new and imaginative proposals to rebuild their blighted areas and solve their every local problem (i.e., housing, jobs, welfare, education, disease, crime, recreation, transportation, etc.).

It is predisposed that local initiative not only cannot bring about a solution of these problems without Federal assistance, but that the cities will not know how to avail themselves of the multitude of Federal programs unless they can have Federal assistance to get Federal assistance. The bill would authorize \$12 million for additional planning grants for fiscal 1969 and \$1 billion for fiscal 1970 for supplementary grants to carry out model cities programs.

After the cities experiment and innovate, the Federal Government will be empowered to pass judgment on every local decision. With the competitive environment surrounding the award process being as it is, those cities that are favored will certainly be the cities that conform the closest to the Government's idea of what is best for them.

At this point in the program's life, 75 cities have received initial planning grants and are in the process of evolving their plans. There were 193 applicants for these grants. It is expected that the second round of planning grants will be awarded to approximately 70 cities out of 159 applicants, and that some 130 to 140 cities in all will be carrying out their programs during the early part of fiscal year 1970.

Only when these plans are fully evolved and available for close scrutiny will the Congress know what is to be called for under this unknown entity. The purpose of the program is illy defined and vague at best, and not only appears to parallel the faltering urban renewal concept, but is equally susceptible to its shortcomings. Yet, this bill unleashes the program with massive spending authority on a promised results, sight unseen, basis.

We do not feel that the Federal Government can bear the financial strain of an open-ended commitment to finance the rebuilding of all

of our country's cities, and yet the cities are being encouraged to believe that this is both feasible and possible, and possible almost overnight. This Nation's budgetary deficit and inflated economy will never be turned back if the Congress is to be continually called upon to sign one blank check in urban experimentation after another.

The problems gratuitously embraced within the scope of this program are real to be sure. But we feel that these problems can best be solved by free enterprise and local initiative without having to pay the price of smothering our cities with a blanket of Federal programs as the model cities program would do. These Federal programs are already available if needed. This committee has devoted extensive thought to the housing problems of our needy citizens and this bill would create new programs to meet this need. We feel that this housing, and other needs, can be provided if approached on a problem-by-problem, rather than city-by-city, basis, and in so doing we would be a lot more likely to be able to afford the cost to our Government.

The Secretary of HUD in commenting on the initial model cities applicants said:

We will be searching for signals from the communities that they have looked long and hard at themselves, that they have discovered solutions that are not the same old stuff, and that they have the capacity for doing what they say they want to do.

We ask that the Congress be afforded the same degree of insight into the model cities program itself before it is turned loose on our country's cities. It is only by first seeing the cities' plans that it can gain such insight. And only then will the prudence of the program's spending authority be ascertainable.

#### PUBLIC HOUSING AND RENT SUPPLEMENTS

The bill would increase authorizations for low-rent public housing annual contributions contracts by \$100 million for fiscal year 1969, and \$150 million each in fiscal years 1970 and 1971 (sec. 203). There would also be made available \$40 million in contract authority for rent supplement payments in fiscal year 1970, and \$100 million for fiscal year 1971.

The long-existing public housing program has been marked by its lack of acceptance by both our local communities and the families housed under the programs. Program projects have for the most part been comprised of large, drab, and unimaginative structures concentrated into areas that themselves take on the character of slums.

The inadequacies of public housing have given rise to various efforts to provide other alternatives for housing low-income families. The rent supplements program was enacted as such an alternative only after its benefits were confined to those with incomes at the public housing eligibility levels. We, of course, are urging that the new Government-subsidized rental program contained in this bill also be so oriented as to reach down toward such income levels. If this is done, the program might be another alternative for accommodating needy families in housing produced by private enterprise and financed in the private market.

The most promising development in public housing is the authority for sale of units to tenant families. This opportunity for ownership was introduced by the minority in 1965 and enacted into law as section 15(9) of the United States Housing Act of 1937.

This concept has been embraced by this bill in section 205, which section would replace the present confinement of purchases to detached or semidetached units and allow the purchase of any living unit if it is suitable for individual ownership. We hope that this mechanism will be utilized to the greatest extent possible in future public housing activities and thus provide tenant families with that most desirable of all alternatives, homeownership.

However, when there are alternatives to be chosen from, there should be a commensurate balancing of spending authority between the different programs. Instead, the bill would increase public housing contract authority to a level that we feel is unjustified, particularly since considerable spending authority is simultaneously given to other programs benefiting lower income families. We oppose this across-the-board spending rush.

#### URBAN INSURANCE

The Federal reinsurance which would be made available through the enactment of this bill (title XI) is necessary only because of the breakdown of law and order in certain areas of the country. While recent rioting and looting have added to the lawlessness, the insurance industry has never been required nor has it been able to provide casualty and property damage insurance without increased rates in some sections of our metropolitan areas. When the losses of organized rioting, arson, indiscriminate and sometimes unrestrained looting are added, the risk exposure cannot be met on the basis of commonly used actuarial insurance procedures without requiring a premium rate which may seem prohibitive in high risk areas.

This situation has forced private insurance companies which have historically shunned Federal Government intervention to accept that intervention if necessary in order to limit their exposure to catastrophic losses as the result of riots and other civil commotion. Unfortunately, there seems to be no reasonable alternative.

A primary governmental responsibility is to maintain law and order and an atmosphere in which private citizens and institutions can function. Law and order have not been maintained and thus private institutions have not been able to satisfy insurance needs without increasing premiums sufficiently to meet claims. These increases have been viewed as making premiums prohibitive.

We cannot accept the view that an insurer is unjustified in requiring premiums sufficient to meet claims. The charge that insurance is not available at "reasonable rates" cannot properly be aimed solely at the insurance industry but more properly at practices encouraged or not sufficiently discouraged through local governmental action or inaction.

*Insurance is not a substitute for law and order*

Insurance or reinsurance is no substitute for maintaining the proper environment which would avoid the necessity of the reinsurance. An ambulance in the valley is no substitute for a railing on the road on the side of a hill. In the absence of a railing, an ambulance can be useful.

We have not opposed the establishment of a Federal program of reinsurance because we feel that if poor governmental policy is at the root of the unrest, the Federal Government should assist in meeting the resulting insurance needs. Without insurance at acceptable rates, business in high-risk areas are disadvantaged. Business firms are less than willing to invest in riot-prone, high-risk areas which are generally the very areas which desperately need business to provide jobs as well as goods and services for the area residents.

*State authority superseded*

While we do not question the need for Federal reinsurance, we seriously question the setting up of a federal system upsetting the present pattern of State regulation. This bill contains authority for such a system.

We find in comparing the proposed legislation as presented to our committee with the recommendations of the President's National Advisory Panel on Insurance in Riot-Affected Areas that there are some significant differences.

*President's Panel recommended limited Federal authority*

The Panel envisioned a cooperative program between the private insurance industry, the State regulatory authorities, and a Federal corporation with the major responsibility and authority residing in the private sector and the States. Nowhere in the recommendations of the report do we find that the Federal agency would have authority to audit individual companies or determine through regulation the records and the form of the records of companies acquiring reinsurance. Nor do we find any suggestion that the Federal corporation be given authority to determine whether an insurer is properly participating in State plans and pools. Moreover, the Panel did not suggest that the corporation could by rules and regulation determine the form and operation of State fair plans nor that any amendments contemplated by State authorities to State fair plans must be submitted to the Federal corporation for its approval. We should also point out, most importantly, that the President's Panel recommended the authority and management of the corporation be in a board of directors which would include industry representatives, State insurance commissioners, public members, and Federal Government representatives. An executive director working under the supervision of the board would manage day-to-day operations.

*Federal executive has full power*

The bill reported by our committee puts full power in an executive director appointed by the President. An advisory board is to be appointed by the Secretary of the Department of Housing and Urban Development. The advisory board has no real management or policy-making authority or status but acts as a consulting body only.

We are concerned that this bill will result in the extension of Federal authority when it is not desirable nor necessary. Some of the authority vested in the Federal Establishment is indicated from the following segments of the bill:

Section 1202(a) vests the management of the corporation in an executive director.

Section 1214 requires State insurance authorities to transmit to the Federal corporation any proposed or adopted plan or any amendments to a plan and gives the corporation authority to modify plan requirements.

Section 1222 authorizes the corporation to determine fees and other charges and increase or decrease such premiums thereafter.

Contracts may include any terms and conditions which the corporation deems necessary.

Section 1223 provides that the Federal corporation shall determine if the programs and insurance coverage provided by States are suitable and, if not, reinsurance shall be denied. This section also permits the corporation to deny reinsurance to any insurance company that it feels is not fully participating in State plans, pools, and other programs.

Section 1234 requires any insurance company which acquires reinsurance from the Federal corporation to supply any information and in such form as the corporation shall prescribe through rules and regulations. This section also authorizes access to any books, documents, papers, and records of any insurance company for examination and audit.

*Federal control not necessary or desirable*

We do not consider these broad extensions of Federal power into the insurance industry necessary to carry out this program nor do we consider them desirable.

We offered amendments which would have transferred some of the power of the management of the program to the board or directors or advisory board but lost on a party line vote. We were able to protect some of the State insurance commissioners authority but not to the degree that we desired.

It is argued that the Federal authority is justified because of the remote possibility that the riot losses covered by the program may exceed the exposure of the insurance industry, the required State contributions, and the reinsurance premium funds. It is important to note that the President's Advisory Panel on Riot Insurance stated in its report: "We do not believe this Nation will experience riots that cause damage approaching the magnitude of these funds." We agree that such losses are not likely and can be avoided and that the remote possibility of a demand on Treasury funds is not sufficient to extend Federal regulatory power throughout the insurance industry.

#### FLOOD INSURANCE

All minority members of the committee were cosponsors of S. 1985, the flood insurance bill which was considered and approved by our committee last year. We feel that the bill approved at that time represented a satisfactory balanced approach using private enterprise to the maximum extent possible while including Federal backing in the event of catastrophic losses. The program was to be based on actuarial principles with private companies bearing risk and absorbing losses within a specified limit as agreed upon by the companies and the Department of Housing and Urban Development. Along with the risk to be accepted by the private firms was included the possibility

of a reasonable rate of profit which would be agreed to by the Secretary of Housing and Urban Development.

On the floor of the Senate, with little discussions and without the approval of industry representatives or the Department of Housing and Urban Development, the bill was amended to prevent any distribution of profits to insurance companies by the pool during the first 5 years of the program unless the amount paid to the national insurance fund as premiums, fees, and other charges were to exceed the insurance claims paid by the fund. It is the amended bill that has been included as title XII of this bill.

Insurance industry spokesmen have expressed their view that the amendment would discourage full participation by insurance companies in the joint program. Such a view is not surprising in light of the fact that according to accepted statistics, expenses and losses during the past 10 years have equaled the premiums earned by stock property-liability insurance companies. It is understandable that such companies would not be overly anxious to participate in a program which does not balance the probability of loss with the possibility of profit.

Of course, we hope that claims for flood damage will not exceed payments for reinsurance and that a reserve will be accumulated in the national insurance fund sufficient to meet any needs. We even look forward to the possibility that after some experience with the program, the private insurance industry may be able to meet needs for flood insurance without Federal assistance. We cannot, however, overlook the possibility of a major disaster or disasters during the first part of the program and do not feel that the whole concept of a cooperative undertaking should be jeopardized on this one point.

We feel that section 1235(e) is unnecessary to assure that private companies will not receive unreasonable profits from the flood insurance program because sections 1212(b)(2) and 1232(a)(3) explicitly state that any profits shall be reasonable as determined by the Secretary of the Department of Housing and Urban Development.

We therefore recommend that it be deleted from the title.

#### INTERSTATE LAND SALES

We concur in the desire of the committee to protect the general public, particularly those living on limited retirement funds, against interstate land sales promoted by unscrupulous developers taking advantage of loopholes in State and Federal laws.

However, we have reason to strongly criticize the manner in which such a legislative proposal became title XIII of this bill. This bill, which places the administrative powers in the Department of Housing and Urban Development rather than in the Securities and Exchange Commission or the Department of Justice, as did other proposals, was not subject to public hearings.

The bill which became title XIII was submitted only 2 weeks before it was accepted by the committee and prior to giving approval.

The subject of Federal legislation dealing with interstate land sales is not new to the committee. We first considered a bill in 1966 and a similar one in 1967. Those bills, which would have placed administra-

tive jurisdiction in the SEC, were significantly different from the measure in the bill we are now reporting, although their intent to eliminate fraudulent or misleading promotional sales of interstate land was the same. In 1966, S. 2672 received little official support, despite the fact that its purpose was not opposed. Federal Government agency comments on the bill were essentially negative as the excerpts quoted below indicate:

**Department of Commerce:**

Although this Department is in full sympathy with the objectives of S. 2672, to prevent fraudulent sales of real estate, we do not recommend its enactment.

Some sellers of land use high pressure tactics and misrepresent their product. Retired persons or those contemplating retirement may often be the victims of these tactics.

However, we do not believe this broad proposal is necessary to cope effectively with the small minority of unscrupulous land subdividers. The bill would add considerably to the cost of homesites, and put a considerable burden on the Securities and Exchange Commission to administer such legislation effectively.

**Department of Justice:**

The Department of Justice recommends against enactment of this legislation.

There is no clear need for new Federal legislation to control land subdivision sales in interstate commerce. In the past few years, a substantial number of convictions have been obtained under 18 U.S.C. 1341. The indictments charged use of the mails by subdivision promoters in furtherance of schemes to defraud purchasers and its suitability for its intended purpose. Similarly, the Federal Trade Commission already has the power, pursuant to 15 U.S.C. 45, after formal complaint and hearing, to issue and enforce cease-and-desist orders against land promoters utilizing false, deceptive and misleading advertising. Accordingly, additional penal sanctions and further administrative remedies at the Federal level are unnecessary.

Real estate transactions traditionally have been regulated by the States in which the property is located. In our view, enactment of local legislation, utilizing existing state real estate commissions and incorporating the full disclosure provisions outlined in the bill, is the appropriate remedy.

**Post Office Department:**

I do believe, however, that the primary solution to these problems can be provided by adequate state legislation. Our records disclose that land frauds occur infrequently in States which have adequate statutory controls which are actively enforced.

The 1967 hearings were held on S. 275 which was, except for minor differences, the same bill. Following the President's consumer message in which he expressed support for the bill, the Federal agencies reversed their oppositions and supported the legislation. There had

been no increase in fraudulent land sales, and several States had improved and strengthened their laws and efforts to deal with the problem. In addition, the National Conference of Commissioners on Uniform State Laws had developed a model bill which was being considered by other States. The bill had not been greatly altered as shown by a statement by Chairman Cohen of the Securities and Exchange Commission when he testified that: "S. 275 differs from the predecessor bill only in certain relatively minor respects."

Especially important is the fact that the bill which received strong support from the Federal agencies also established the Securities and Exchange Commission as the administering Federal agency. Minority members of the Securities Subcommittee questioned this in 1966 in letters to the Post Office Department, the Department of the Interior, the Federal Trade Commission, and the Department of Housing and Urban Development. There was no question by these agencies that the SEC would be best suited for the task. Most interesting is a comment in the reply from the Department which is now to administer the program.

In our view, the Securities and Exchange Commission is best equipped to receive and record the registration statements required under the bill since the Commission already performs a similar role regarding administration and enforcement of registration and disclosure requirements relating to the sale of corporate stocks and other securities.

Mr. Weaver did say in the same letter, however, that his office was equipped to assist the SEC "in resolving any questions that may arise with regard to the land transfer and development data to be submitted by the developers."

Now we are being asked to accept a substantially different bill but with the same intent without any testimony from the Department of Housing and Urban Development of its plans, the cost involved, the probable effectiveness of the measure, or the problems that it may cause legitimate developers and home builders.

Indeed, we asked that a day of hearings be held before the proposal was acted upon. It appeared that approval was not to be delayed even for a day or two. It was accepted, and a hearing after the fact was set for the following Thursday, 2 days later. The hearing was later changed to Friday and finally canceled because those who had expressed a desire to appear at hearings before the bill was considered decided that it would be of little value to testify on a bill that had already received approval by those to whom they were to testify. Hearings were not pressed for.

We do not deny that the provisions on interstate land sales included in this bill are more reasonable than those of former bills. We want to point out our concern, however, that the bill still deals with promotional plans not for the purpose of selling land interstate. It also can be interpreted to deal with projects which may only incidentally or accidentally be involved in advertising which may extend across State lines or an occasional sale to a person living in another State. The bill does provide that the Secretary may utilize discretion in exempting sales of lots which would be covered under the bill. We expect that these

exemptions will be liberal in instances where it can be shown that the properties are not primarily for interstate sale and also where they are located near State boundaries for sale primarily to local residents. We can claim credit for some improvements in the bill as a result of our earlier hearings. We also were able to receive acceptance of an amendment providing that binding contracts could be made without waiting 48 hours after a person has inspected the property and has read the property report as acknowledged by his signature. Despite the improvements made in the title, we feel strongly that the U.S. Senate is entitled to have the benefit of statements from those favoring legislation, those opposing it, and those recommending amendments before enacting major changes in established patterns. This we have not had. In addition, the action taken by the committee is apparently opposed by a large majority of State Governors. In answer to letters written to all 50 Governors on the question of the 1966 SEC proposal of Federal land sales legislation, we received 42 replies, 32 of which opposed the proposed Federal statute and expressed a willingness to take steps needed to handle the problem on a state level. Only four favored the land sales bill requiring registration with a Federal agency, and six gave vague or noncommittal replies.

We respect the desire of State officials to take care of this problem on a State level, and agree with the Attorney General that:

There is no clear need for new Federal legislation to control land subdivision sales in interstate commerce. In the past few years, a substantial number of convictions have been obtained under 18 U.S.C. 1341. The indictments charged use of the mails by subdivision promoters in furtherance of schemes to defraud purchasers by fraudulent representations as to the nature of land purchased and its suitability for its intended purpose. Similarly, the Federal Trade Commission already has the power, pursuant to 15 U.S.C. 45, after formal complaint and hearing, to issue and enforce cease-and-desist orders against land promoters utilizing false, deceptive, and misleading advertising. Accordingly, additional penal sanctions and further administrative remedies at the Federal level are unnecessary.

Real estate transactions traditionally have been regulated by the States in which the property is located. In our view, enactment of local legislation, utilizing existing State real estate commissions and incorporating the full disclosure provisions outlined in the bill, is the appropriate remedy.

## Individual Views of Mr. Percy

### HOMEOWNERSHIP FOR LOWER INCOME AMERICAN FAMILIES

Last year I received a letter from a Negro mother of seven who once lived in the notorious Pruitt-Igoe public housing project in St. Louis. Now she and her husband own a home of their own. She is a member of the board of the Bicentennial Civic Improvement Corp., which has sponsored an outstanding homeownership program in the Mullanphy Street area of St. Louis. She wrote:

My husband, children and I all feel that homeownership plays a big role in our lives. We feel we have a better stake in this land that is supposed to be ours. We also feel more secure and when we hear the national anthem, it has a better meaning to us. Maybe if more people had homes of their own and felt more secure and free there wouldn't be any riots, at least it is a start to building stable families. The high-rise project we lived in was not and is not the answer to our problem. There are too many people with large, medium, or small families stacked together like a hobo sandwich with no way out, only to be gnawed at until devoured. In the Bicentennial Civic Improvement Corp. we have a followup program. The families are not turned loose, we have programs to fit our needs, we meet together in the alleys, closed streets, or our private "Pub" to solve some of our problems. We have initiated maintenance classes in painting, paperhanging, electrical repairing, etc. These things are done in an orderly manner, no buildup for hatred or spite. I'm so glad for people like Father Shocklee and Father Kohler who think of people and have started a way for low income families to become homeowners.

I know my sons and daughter who are raising a family certainly feel their children will be sound, secure, and solid citizens.

The cherished ideal of homeownership has roots as deep and rich as American's heritage itself. Ever since the Pilgrims set foot on Plymouth Rock, it has been an integral part of our way of life. Thomas Jefferson said shortly after the formation of the Republic,

It is not too soon to provide every possible means that as few as possible shall be without a little portion of land.

However, as we moved from a nation, one-third of whom were homeowners 30 years ago, to now when two-thirds of American families own their own homes, to be a homeowner increasingly meant that you were a middle or upper income person. Lower income families have never been given full opportunity to buy a home of their own.

They did not have the substantial cash downpayment required, the monthly income to pay market interest costs plus principal payments, or the credit rating to warrant a mortgage. In the Housing and Urban Development Act of 1968 the Banking and Currency Committee is simply reaffirming the goal of homeownership for all Americans. This bill provides the means to broaden the range of choice so that millions of American families who now rent, but who yearn to own, may have a reasonable chance to become owners. This important bill is founded upon the rediscovered premise that homeownership can be the means of advancing not only better housing, but a whole host of values desirable in a free society. As these basic premises are strengthened and implemented over the coming years, the Housing and Urban Development Act of 1968 may well come to be regarded as truly landmark legislation.

The values of homeownership are many and varied. Perhaps the most basic are the psychological values—the feelings of security, of identity, of dignity and of belonging—that come from owning a decent home of one's own and from being a responsible member of society. Renting, while preferred by many for various reasons, can seldom produce these psychological gratifications in equal magnitude. And today, those who stand most in need of those psychological gratifications are those who have the least opportunity for attaining them.

The prospect of owning a decent home of one's own can also be an important means for overcoming the "motivation barrier." Characteristically, lower income families feel that they have little or no control over events and their environment. They see little opportunity for advancing to a better condition, either economically or socially. Their behavior focuses on immediate desires, often at the expense of attainable long-range rewards. In short, they feel that nothing they do can make a difference.

An important manifestation of homeownership is a visible new pride in the home. The homeowner, not the tenant, puts out flower boxes, manicures the lawn, and paints the trim. Related to improved maintenance of the individual's home is a respect for the property of others. Homeowners, unlike renters who can walk away from their house or apartment, have an investment. They are not just urban "tent dwellers" or "sharecroppers" as they have been called, paying rent to a slum lord or public housing agency, but owners, building up an estate, modest as it might be. Violence, theft, and vandalism damage that investment. It is thus very much in the homeowner's interest to discourage destruction and to encourage respect for property rights and the law that provides that protection.

Finally, homeownership can be a powerful contributory influence on good citizenship. The homeowner, for the same reason that he takes better care of his property, takes a greater interest in his community. The condition of his neighborhood becomes of greater concern to him. The responsiveness—and responsibility—of local government and his elected officials assume new relevance. It is his voice, more than the renter's, which is heard at the neighborhood meeting or the city council session. Having a tangible stake in his community, he acquires with it a renewed sense of responsibility as a citizen for the welfare of his community, State, and Nation.

Acquiring homeownership does not automatically instill in a poor man a renewed sense of values. Merely receiving a deed does not transform a despairing alienated slum dweller into an aspiring middle-class homeowner. But, over the long run, the fact of homeownership can have an important effect on the family that rises from lower income tenant status to achieve it. That effect will be the strengthening and reinforcement of values and behavior patterns long proven to be conducive to the highest ideals of America and the welfare of its people.

*Importance of this legislation -*

The passage of the National Housing Act in 1934 signaled a new Federal commitment to provide housing for the Nation's citizens. Congress made the commitment explicit 15 years later in the Housing Act of 1949, establishing as a national goal, the realization of a decent home and suitable environment for every American family.

Today, after more than three decades of fragmented and grossly underfunded Federal housing programs, decent housing remains a chronic problem for the disadvantaged urban household. Fifty-six percent of the country's non-white families live in central cities today, and of these, nearly two-thirds live in neighborhoods marked by substandard housing and general urban blight. For these citizens, condemned by segregation and poverty to live in the decaying slums of our central cities, the goal of a decent home and suitable environment is as far distant as ever.

\* \* \* \* \*

To date, Federal building programs have been able to do comparatively little to provide housing for the disadvantaged. In the 31-year history of subsidized Federal housing, only about 800,000 units have been constructed, with recent production averaging about 50,000 units a year. By comparison, over a period only 3 years longer, FHA insurance guarantees have made possible the construction of over 10 million middle and upper income units.<sup>1</sup>

Last year the committee began its housing hearings just a few days after the Newark riot. Representatives of the poor came to Washington and eloquently testified as to the soundness of the homeownership approach. This year the committee began its executive sessions on the bill 1 day before Dr. Martin Luther King's funeral. There has been a sense of urgency and determination in the present consideration of housing legislation rarely seen heretofore. Now the Senate is scheduled to take up the committee bill for consideration while participants of the poor people's campaign are in Washington.

The administration has, wisely, I believe, come to Congress with a 10-year housing goal. Whether one feels the goal is unrealistic either in its optimism or pessimism, I think most people will agree that it is important to have a commitment to a goal and one against which we can mark our progress in the coming years. I personally feel that the goal of 6 million new units in the next 10 years could be speeded up if the Nation truly wished to commit the resources to do so. In the

<sup>1</sup> Report of the National Advisory Commission on Civil Disorders, pp. 257 and 259-260.

meanwhile, I support the administration in its objective of achieving 1.2 million new federally assisted units in the next 3 years. If all sectors of our society join together to meet this challenge, we can succeed, where heretofore we have failed.

I am satisfied that this bill provides some of the tools to accomplish the goal, but much more will be needed than new legislation and additional sums of money. The Department of Housing and Urban Development will have to join the crusade wholeheartedly. It will have to look to new ideas and new programs with the enthusiasm of a Department that is determined to achieve, and that recognizes that the procedures and red tape of the past and present will simply be inadequate for the future. The business community must be willing to experiment with the new programs provided here as well as devise better ways and means to provide low- and moderate-income housing without Federal assistance. Local governments must learn to work with community groups and cut redtape so that programs do not get bogged down in official delay. And most of all, Congress must be responsive to the housing needs of the Nation and this bill's attempt to satisfy those needs. These new programs must be given a chance to work—funds must be appropriated on a large enough scale to permit visibility in the communities and helpful experience to the Department.

My own work on this legislation and that of my colleagues will not end when the bill is enacted into law. I intend along with others to exercise the power of legislative oversight from the minute the bill leaves the President's desk. Too many programs of late have been born with hope and promise only to die a slow death in the bureaucracy of a Federal agency. I shall do everything in my power to see this is not the case with this bill.

#### *Title I—Homeownership*

The committee has done a conscientious job in attempting to establish the necessary procedures to make the homeownership program successful. The interest subsidy provision (first proposed last year by 40 Senators in the National Home Ownership Foundation Act) is a simple and direct way to subsidize the individual to the extent and for the period he needs the subsidy. This is far superior to the awkward subsidization of the building itself. More of our housing programs should be patterned on this principle of subsidizing the individual and then letting him decide the place and type of housing he may desire. Realizing that families who would not otherwise qualify for a FHA guarantee must also be given the opportunity for homeownership, the committee established a credit assistance program for those who are deemed to be capable of homeownership with the assistance of budget, debt management, and related counseling. The credit assistance and counseling provided in the bill are essential to a successful homeownership program. It is vital that the Department of Housing and Urban Development recognizes the importance of these programs and administers them wisely.

A special risk fund has been established to pay claims on insurance under the homeownership program. The committee has also relaxed mortgage insurance requirements so that the needs of the families involved are taken into consideration as well as the actual risk involved.

I am grateful the committee accepted an amendment to the program, over the objections of the Department of Housing and Urban Development, to permit the use of existing housing, on a limited basis, for the first 3 years of the program. This will permit the Secretary to get the program underway almost immediately providing a quicker impact and visibility which are so important to the success of new programs. This provision will also permit the Secretary and his staff to collect a greater amount of experience upon which to base judgments and decisions for the later life of the program when the funds are increased.

### *National Homeownership Foundation*

Thirty-seven Senators, later joined by three others, on April 20, 1967, introduced the National Homeownership Foundation Act, S. 1592. One hundred and twelve Members of the House of Representatives also introduced identical bills.

The introduction of the National Homeownership Foundation Act caused much discussion of the means whereby homeownership for lower income families could be brought about. The bill now before the Senate reflects many of the provisions of S. 1592 as modified by the committee.

While I still prefer the provisions of the National Homeownership Foundation Act, because I feel that bill best addressed itself to the total homeownership needs of our low income citizens, I do strongly support the committee bill. All of the basic principles of S. 1592 have been included to some degree in the committee bill, and many of the specific proposals of the National Homeownership Foundation Act have been adopted by the committee in the new bill. Therefore, it is my hope that the Housing and Urban Development Act of 1968 will receive wide bipartisan support and that all Members of Congress interested in housing problems will do their best to make this new program successful.

The National Homeownership Foundation Act was based upon four fundamental principles:

1. *Homeownership*.—The principle of homeownership as an important value to lower income families has achieved near unanimous acceptance. Title I of the committee bill represents this acceptance. In particular the homeownership subsidy payable to mortgagees which was first proposed in the National Homeownership Foundation Act has been accepted as the vehicle for subsidy payments in the committee bill.

2. *Private sector involvement*.—The principle of private sector involvement and leadership has similarly gained wide acceptance, although variations as to the nature of the involvement are numerous. Section 804 of the committee bill which provides for the sale of mortgage-backed securities is an attempt to tap large pools of funds for the construction of housing in the same way the National Homeownership Foundation debentures would have done. Title IX, the national housing partnership, is another attempt in this bill to bring the full resources of the private sector to bear on housing problems.

3. *Coordinated approach*.—The National Homeownership Foundation Act established the important principle of calling for coordina-

tion of housing and economic opportunity programs. The committee bill has taken this into account by establishing counseling for new and prospective homeowners as well as authorizing the National Homeownership Foundation to assist local community organizations in the establishment of such economic opportunity programs.

4. *Self-help and involvement of the poor.*—The committee bill recognizes the importance of self-help by authorizing as did S. 1592 the use of "sweat equity" so that an individual can contribute to his downpayment by working on his own home. It also permits the homeownership program to be used by community organizations and provides that a reasonable share of interest subsidy funds be made available to those organizations which involve the residents in the planning and execution of the program. The committee bill recognizes the importance of community organizations. Through the new National Homeownership Foundation and the revolving loan fund the bill provides much needed assistance to sponsors of housing projects.

In addition to these four broad principles, many of the specifics of the National Homeownership Foundation Act are also included in the committee bill. These are too numerous to list in their entirety but a few of the most important are: a study leading to low cost homeownership insurance, broadening of title VIII training programs to include persons below the professional level, inclusion of cooperatives in the new program, and a reduction of the interest subsidy as the families' income increases.

The committee bill also creates a National Homeownership Foundation. One element in the original Foundation proposed in S. 1592 was its power to raise funds through the sale of debentures and to channel those moneys into mortgages in the "credit gap" areas in our central cities and rural areas. Coupled with the lending authority would have been a technical assistance service to provide the expertise needed by nonprofit organizations sponsoring homeownership programs at the local level. To bring the benefits of homeownership within reach of lower income families, the Treasury would have made periodic payments to mortgagees in the form of an interest subsidy to aid lower income home buyers in amortizing their mortgages, assistance that would be phased out as family income rose to moderate income levels.

The homeownership interest subsidy provisions of S. 1592, modified and placed in the administration of the Department of Housing and Urban Development by the committee, formed the basis for section 101 of the present bill. The committee preferred to rely upon conventional sources of funds for financing home purchases. As proposed in the present bill, the Foundation is essentially a redesigned and more comprehensive technical assistance service. Its functions are in many ways comparable to those of section 108 of S. 1592, and would be to—

- (1) Carry out a continuing program of encouraging private and public organizations at the national, community, and neighborhood levels in the establishment of housing programs;

- (2) Assist in the formation of organizations the purpose of which is the development and carrying out of housing programs, including the establishment of local or regional development funds for financing housing for lower income families through the pooling of moneys from private sources;

(3) Identify and arrange for the technical and managerial assistance and personnel needed for the successful operation of housing programs by public and private organizations;

(4) Assist public and private organizations in obtaining the mortgage financing, insurance, and other requirements or aids necessary for conducting programs of housing construction, rehabilitation, or improvement for lower income families;

(5) Arrange for, or provide on a limited basis, training for persons in the skills needed in administering programs of homeownership and housing opportunity for lower income families;

(6) Encourage research and innovation, and collect and make available such information as may be desirable to further the purposes of this title, including the sponsoring of seminars, conferences, and meetings, and the establishment of a continuing information program to acquaint lower income families with the means they can use to improve the quality of their housing, as well as the homeownership and housing opportunities available to them;

(7) Assist private and public organizations in establishing, in connection with their homeownership and housing opportunity programs for lower income families, counseling and similar type activities to advise lower income families of the means available to better themselves economically through job training and manpower development programs; and

(8) Perform other similar services in order to further the purposes for which the Foundation was chartered.

In withholding authority for the Foundation to raise funds through the sale of debentures with a Government guarantee, and power to make or participate in homeownership loans in credit-scarce areas, the committee reasoned as follows: Rather than create a new institution for the specific purpose of channeling mortgage funds into these areas, maximum use of existing lenders and Federal programs should first be made. While it is true that the Federal Housing Administration has frequently in the past been unwilling to insure mortgages for lower income families, mortgages initiated by nonprofit organizations, mortgages in declining urban and rural areas, or mortgages involving residential rehabilitation instead of new construction, the first remedy should be to make facilitating changes in the basic FHA legislation, so that they might proceed apace in these areas.

Thus, the committee felt the goal could be attained by (a) providing subsidy assistance to help additional families meet present FHA income requirements; (b) establishing a special new type of mortgage for the benefit of families whose credit records presently disqualify them from access to FHA insurance programs; (c) charging any foreclosures that may result to a special reserve fund financed by congressional appropriations rather than premiums; and (d) giving FHA a new congressional mandate to take risks that in many cities it now seems unwilling to take.

With these modifications, the committee has hypothesized a sharp upturn in FHA's willingness to insure homeownership mortgages for lower income families, and anticipated a new flow of mortgage funds from the private mortgage market into those areas.

Crucial to the accuracy of this prediction will be the performance of FHA. It must move boldly, using the new tools provided in this bill, to make homeownership ultimately a reality for millions of families for whom it is now beyond effective reach. The committee feels that with the new tools it has given to FHA that it should be able to do the job. The committee has requested a report from the Department on FHA's experience after the first 6 months. At that time, the committee will evaluate the program's progress in order to determine whether or not FHA has measured up to the important task given to it.

The other element critical to the success of the committee's hypothesis is the availability of capital in the private housing market to finance the FHA-insured mortgages. No matter how willing FHA becomes to insure homeownership mortgages, there will be no mortgages and no homes unless private lenders come forward with the mortgage funds. Given the extraordinary and damaging scarcity of mortgage money over the last 2 years, there is ground for skepticism as to the competitive attraction of these new mortgages. The decision of the life insurance industries to invest a billion dollars in slum areas is hopeful sign. It must be remembered, however, that the proof of the committee's theory will lie in the number of actual mortgages initiated under the provisions of this bill, and not in a compilation of encouraging words of intent from FHA and the private lending industry.

The possibility of the failure of the committee's theory is noted explicitly in subsection 109(f)(2) of the bill, creating the National Homeownership Foundation. That paragraph reads:

Whenever in its judgement the general unavailability of mortgage funds is sufficiently serious to deter the Foundation from carrying out its objective of expanding homeownership and housing opportunities for lower income families, the Foundation shall, in its annual report or in a separate report to the President and the Congress, state its findings and make such recommendations for alternate means of financing housing for such families as it deems appropriate.

This paragraph indicates that if FHA lags in its implementation of the provisions of this bill, or if private funds are not channeled into homeownership programs for lower income families, the National Homeownership Foundation may come to Congress and ask for the fund raising mortgage lending authority originally provided for in S. 1592. By this device, the committee wisely provided for the possibility that full implementation of the present bill might not be forthcoming. The door was left open to a subsequent expansion of the activities of the Foundation to bridge any credit gap that might then still remain.

It is vitally important that the National Homeownership Foundation chartered by this bill embark on an active, aggressive program for achieving its ends. This will require firsthand efforts and involvement in our urban slums and declining rural areas. It would be tragic if a foundation with a mandate to help lower income families insulated itself from them and their world through bureaucratic lethargy and layers of redtape, or through overdeference to the procedures

and programs of existing Government agencies. There must be a sense of urgency about the Foundation's undertaking that will serve as a stimulating example to other institutions and administrations. Congress should not settle for less.

A brief word should be said about section 109(h) of the bill. This paragraph requires the National Homeownership Foundation to deposit its funds in "financial institutions which are actively engaged in making loans or are otherwise carrying on activities in furtherance of homeownership and housing opportunities for lower income families." What this means, simply, is that the Foundation's moneys will be deposited in banks and savings and loan institutions which are actively investing in housing opportunities for lower income families. While the amount of money involved—\$10 million at the most—is small compared to the needs, this provision nonetheless emphasizes the importance of strengthening lending institutions which are helping low income families. This principle should be implemented in other ways as opportunities present themselves.

#### *Other new programs*

The committee adopted an amendment jointly sponsored by Senator Proxmire and myself which directs the Secretary to require, to the maximum extent feasible, the use of resident labor in the construction of low income housing. Nothing is more defeating to the residents of a low income black neighborhood, often out of work themselves, than to see white construction workers from outside the community arrive every morning to build the new housing in their neighborhood. I fully recognize the many practical problems involved, but nevertheless feel we must do much more in finding ways whereby these individuals can begin to learn a trade. A job of the most menial kind on a construction site could be the work conditioning needed to qualify an individual for a regular apprenticeship program. A variety of programs could be undertaken in this area and I sincerely hope that American labor will join with the Secretary in looking for new and innovative programs to employ ghetto residents in the rebuilding of their own neighborhoods. In many cases, participation in the rebuilding could mean as much, or possibly even more to the neighborhood, than the new units themselves.

While I recognize the desperate need for additional rental units, and support the new rental program, I think it is important to point out that more housing per dollar can be provided in the homeownership program than in any of the rental programs and the social benefit is, of course, immeasurably greater. High land, construction, and maintenance costs all contribute toward the high price of rental housing.

The national housing partnership is the administration's new attempt to bring private enterprise, with all of its expertise and financial resources, into the low and moderate income housing field. The National Homeownership Foundation as proposed in S. 1592 over a year ago, met this same need. I still favor the approach of the comprehensive program of S. 1592 as do 40 Senators, 112 Congressmen, many Governors and hundreds of business, labor, and civic groups. I favor it because I feel the National Homeownership Foundation Act meets more of the varied and complex housing needs of our Nation than any

other proposal to date. While I do not feel the national housing partnership will work as well as the Foundation concept, I sincerely hope that it can be made to work and to achieve its goals. Therefore, I support the partnership proposal and will do all I can to help make it work.

The desperate shortage of competent personnel to administer local nonprofit housing organizations requires immediate and effective implementation of the title VIII program, which section 1506 of this bill would broaden. Without competent administrative personnel, nonprofit and neighborhood organizations will continue to be uncertain risks in homeownership or housing project sponsorship. Since the broadening amendments contained in this bill (originally included in S. 2062) were originally opposed by the Department of Housing and Urban Development last year, I am particularly pleased that it was included in the administration bill this year. This is the kind of cooperation and give and take on both sides that is needed to insure successful programs.

### *Conclusion*

It is no secret that I feel deeply about homeownership for the poor, and I am gratified that ever since I first began work on developing a practical program to make it possible I have received enthusiastic encouragement from almost all quarters. Finding the ways and means for lower income families to own their own homes has required a better understanding of all aspects of urban neighborhood life than I originally possessed. I have learned many things since September 1966 when I first proposed this program, not the least of which was that I was not trying to design merely another housing program, but rather a comprehensive program whereby persons presently poor could begin to lift themselves out of poverty.

The witnesses which testified before our committee last summer and again this year dramatically underscored the importance of providing the bootstraps for millions of low-income Americans who await the chance to pull themselves out of poverty. The excitement of this new program lies in its potential to create the atmosphere in the neighborhoods of our Nation which will encourage the feeling that what one does with his own life does make a difference. The difference in concept that can importantly and dramatically build a better and stronger America by arresting the decline of its urban and rural residential areas is found in the approach that requires plans to come from the neighborhood up rather than from Washington down. We can democratize our cities. We can give people of the ghetto a piece of the action—let them be somebody and have something.

Having made these observations, I give my wholehearted support to the Housing and Urban Development Act of 1968. It represents an outstanding accomplishment by the Housing and Urban Affairs Subcommittee, and by the full Banking and Currency Committee, its members, and its staff. It contains numerous important provisions speaking to a genuine national need—the advancement of homeownership opportunities for those who today cannot hope to achieve and enjoy its benefits. It is my sincere hope that it may gain the overwhelming support of the Senate and be speeded on its way to final enactment. It will constitute, in my judgment, an important step in stabilizing our

declining urban areas. It cannot fail to provide new hope and opportunity for low-income families in both urban and rural areas.

Recently an article appeared in a Washington newspaper explaining a new homeownership program underway here in the District of Columbia. The article dramatically told the story of Mrs. Mary Briscoe who is presently paying \$190 for rent and utilities on a dilapidated frame dwelling. Within 2 months, she will be paying \$135 a month to buy the house that is now being fully rehabilitated. The project is being undertaken by a local community organization using the 221(h) program. The homeowners will come from the ranks of public housing tenants. Mrs. Briscoe's comment was simple, but compelling: "Public housing is all right, but I want something of my own." We will soon be on our way to providing this dream for millions of Americans.

CHARLES H. PERCY.

**S. 3497**

[Report No. 1123]

---

IN THE SENATE OF THE UNITED STATES

MAY 15 (legislative day, MAY 14), 1968

Mr. SPARKMAN, from the Committee on Banking and Currency, reported the following bill; which was read twice and placed on the calendar

---

**A BILL**

To assist in the provision of housing for low and moderate income families, and to extend and amend laws relating to housing and urban development.

1       *Be it enacted by the Senate and House of Representa-*  
2       *tives of the United States of America in Congress assembled,*  
3       That this Act may be cited as the "Housing and Urban  
4       Development Act of 1968".

5                               DECLARATION OF POLICY

6       SEC. 2. The Congress affirms the national goal, as set  
7       forth in section 2 of the Housing Act of 1949, of "a decent  
8       home and a suitable living environment for every American  
9       family".

10       The Congress finds that this goal has not been fully

1 realized for many of the nation's lower income families;  
2 that this is a matter of grave national concern; and that  
3 there exist in the public and private sectors of the economy  
4 the resources and capabilities necessary to the full realiza-  
5 tion of this goal.

6       The Congress declares that in the administration of those  
7 housing programs authorized by this Act which are designed  
8 to assist families with incomes so low that they could not  
9 otherwise decently house themselves, and of other Govern-  
10 ment programs designed to assist in the provision of housing  
11 for such families, the highest priority and emphasis should  
12 be given to meeting the housing needs of those families for  
13 which the national goal has not become a reality; and in  
14 the carrying out of such programs there should be the fullest  
15 practicable utilization of the resources and capabilities of  
16 private enterprise and of individual self-help techniques.

17 EMPLOYMENT OPPORTUNITIES FOR LOWER INCOME PER-  
18 SONS IN CONNECTION WITH ASSISTED PROJECTS

19       SEC. 3. In the administration of the programs authorized  
20 by sections 235 and 236 of the National Housing Act, the  
21 below-market interest rate program under section 221 (d)  
22 (3) of such Act, the low-rent public housing program under  
23 the United States Housing Act of 1937, and the rent supple-  
24 ment program under section 101 of the Housing and Urban  
25 Development Act of 1965, the Secretary of Housing and

1 Urban Development shall require that, to the greatest extent  
2 feasible, opportunities for employment arising in connection  
3 with the construction or rehabilitation of housing assisted  
4 under such programs be given to lower income persons re-  
5 siding in the area of such housing.

## 6 TITLE I—LOWER INCOME HOUSING

### 7 HOMEOWNERSHIP FOR LOWER INCOME FAMILIES

8 SEC. 101. (a) Title II of the National Housing Act is  
9 amended by adding at the end thereof the following new  
10 section:

#### 11 “HOMEOWNERSHIP FOR LOWER INCOME FAMILIES

12 “SEC. 235. (a) For the purpose of assisting lower  
13 income families in acquiring homeownership or in acquir-  
14 ing membership in a cooperative association operating a  
15 housing project, the Secretary is authorized to make, and  
16 to contract to make, periodic assistance payments on behalf  
17 of such homeowners and cooperative members. The assist-  
18 ance shall be accomplished through payments to mortgagees  
19 holding mortgages meeting the special requirements specified  
20 in this section.

21 “(b) To qualify for assistance payments, the homeowner  
22 or the cooperative member shall be of lower income and  
23 satisfy eligibility requirements prescribed by the Secretary,  
24 and—

25 “(1) the homeowner shall be a mortgagor under a

1 mortgage which meets the requirements of and is insured  
2 under subsection (i) or (j) (4) of this section: *Pro-*  
3 *vided*, That a mortgage meeting the requirements of sub-  
4 section (i) (3) (A) of this section but insured under  
5 section 237 may qualify for assistance payments if such  
6 mortgage was executed by a mortgagor determined not  
7 to be an acceptable credit risk for mortgage insurance  
8 purposes (but otherwise eligible) under subsection  
9 (j) (4) of this section or under section 221 (d) (2) or  
10 234 (c) and accepted as a reasonably satisfactory credit  
11 risk under section 237; and

12 “(2) the cooperative association of which the family  
13 is a member shall operate a housing project, the con-  
14 struction or substantial rehabilitation of which has been  
15 financed with a mortgage insured under section 213 and  
16 which has been completed within two years prior to the  
17 filing of the application for assistance payments and the  
18 dwelling unit has had no previous occupant other than  
19 the family: *Provided*, That assistance payments may be  
20 made with respect to a dwelling unit in an existing coop-  
21 erative project which meets such standards as the Secre-  
22 tary may prescribe, if the family qualifies as a displaced  
23 family as defined in section 221 (f), or a family which  
24 includes five or more minor persons, or a family occupy-  
25 ing low-rent public housing: *Provided further*, That the

1 amount of the mortgage attributable to the dwelling unit  
2 shall involve a principal obligation not in excess of  
3 \$15,000 (\$17,500 in any geographical area where the  
4 Secretary authorizes an increase on the basis of a finding  
5 that cost levels so require), except that with respect to  
6 any family with five or more persons the foregoing limits  
7 shall be \$17,500 and \$20,000, respectively.

8 “(c) The assistance payments to a mortgagee by the  
9 Secretary on behalf of a mortgagor shall be made during  
10 such time as the mortgagor shall continue to occupy the prop-  
11 erty which secures the mortgage. The payment shall be in an  
12 amount not exceeding the lesser of—

13 “(1) the balance of the monthly payment for prin-  
14 cipal, interest, taxes, insurance, and mortgage insur-  
15 ance premium due under the mortgage remaining unpaid  
16 after applying 20 per centum of the mortgagor's income;  
17 or

18 “(2) the difference between the amount of monthly  
19 payment for principal, interest, and mortgage insurance  
20 premium which the mortgagor is obligated to pay under  
21 the mortgage and the monthly payment for principal and  
22 interest which the mortgagor would be obligated to pay  
23 if the mortgage were to bear interest at the rate of 1  
24 per centum per annum.

1       “(d) Assistance payments to a mortgagee by the  
2 Secretary on behalf of a family holding membership in a  
3 cooperative association operating a housing project shall be  
4 made only during such time as the family is an occupant of  
5 such project and shall be in amounts computed on the basis  
6 of the formula set forth in subsection (c) applying the co-  
7 operative member's proportionate share of the obligations  
8 under the project mortgage to the items specified in the  
9 formula.

10       “(e) The Secretary may include in the payment to the  
11 mortgagee such amount, in addition to the amount computed  
12 under subsection (c), (d), or (j) (6), as he deems appro-  
13 priate to reimburse the mortgagee for its expenses in han-  
14 dling the mortgage.

15       “(f) Procedures shall be adopted by the Secretary  
16 for recertifications of the mortgagor's (or cooperative mem-  
17 ber's) income at intervals of two years (or at shorter in-  
18 tervals where the Secretary deems it desirable) for the  
19 purpose of adjusting the amount of such assistance payments  
20 within the limits of the formula described in subsection (c).

21       “(g) The Secretary shall prescribe such regulations as  
22 he deems necessary to assure that the sales price of, or other  
23 consideration paid in connection with, the purchase by a  
24 homeowner of the property with respect to which assistance  
25 payments are to be made is not increased above the ap-

1 praised value on which the maximum mortgage which the  
2 Secretary will insure is computed.

3 “(h) (1) There are authorized to be appropriated such  
4 sums as may be necessary to carry out the provisions of this  
5 section, including such sums as may be necessary to make the  
6 assistance payments under contracts entered into under this  
7 section. The aggregate amount of contracts to make such  
8 payments shall not exceed amounts approved in appropria-  
9 tion Acts, and payments pursuant to such contracts shall  
10 not exceed \$75,000,000 per annum prior to July 1, 1969,  
11 which maximum dollar amount shall be increased by \$100,-  
12 000,000 on July 1, 1969, and by \$125,000,000 on July 1,  
13 1970.

14 “(2) Not more than 20 per centum of the total amount  
15 of assistance payments authorized to be contracted to be  
16 made pursuant to appropriation Acts shall be contracted to  
17 be made on behalf of families whose incomes at the time of  
18 their initial occupancy are in excess of 70 per centum of  
19 the limits prescribed by the Secretary for occupants of  
20 projects financed with mortgages insured under section 221  
21 (d) (3) which bear interest at the below-market interest  
22 rate prescribed in the proviso of section 221 (d) (5).

23 “(3) Notwithstanding the provisions of subsection  
24 (i) (3) (A) with respect to the prior construction or reha-  
25 bilitation of the dwelling, or of the project in which there is

1 a dwelling unit, for which assistance payments may be made,  
2 not more than—

3 “(A) 25 per centum of the total amount of con-  
4 tracts for assistance payments authorized by appropria-  
5 tion Acts to be made prior to July 1, 1969,

6 “(B) 15 per centum of the total additional amount  
7 of contracts for assistance payments authorized by appro-  
8 priation Acts to be made prior to July 1, 1970, and

9 “(C) 10 per centum of the total additional amount  
10 of contracts for assistance payments authorized by ap-  
11 propriations Acts to be made prior to July 1, 1971,  
12 may be made with respect to existing dwellings, or dwelling  
13 units in existing projects.

14 “(i) (1) The Secretary is authorized, upon applica-  
15 tion by the mortgagee, to insure a mortgage executed by a  
16 mortgagor who meets eligibility requirements for assistance  
17 payments prescribed by the Secretary under subsection (b).  
18 Commitments for the insurance of such mortgages may be  
19 issued by the Secretary prior to the date of their execution  
20 or disbursement thereon, upon such terms and conditions  
21 as the Secretary may prescribe.

22 “(2) To be eligible for insurance under this subsection,  
23 a mortgage shall meet the requirements of section 221  
24 (d) (2) or 234 (c), except as such requirements are modi-  
25 fied by this subsection.

1       “(3) The mortgage to be insured under this subsection  
2 shall—

3               “(A) involve a single-family dwelling which has  
4 been approved by the Secretary prior to the beginning  
5 of construction or substantial rehabilitation or a one-  
6 family unit in a condominium project (together with  
7 an undivided interest in the common areas and facilities  
8 serving the project) which is released from a multi-  
9 family project, the construction or substantial rehabilita-  
10 tion of which has been completed within two years  
11 prior to the filing of the application for assistance pay-  
12 ments with respect to such family unit and the unit has  
13 had no previous occupant other than the mortgagor:  
14 *Provided*, That the mortgage may involve an existing  
15 dwelling or a family unit in an existing condominium  
16 project which meets such standards as the Secretary  
17 may prescribe, if the mortgagor qualifies as a displaced  
18 family as defined in section 221 (f), or a family which  
19 includes five or more minor persons, or a family occupy-  
20 ing low-rent public housing: *Provided further*, That the  
21 mortgage may involve a dwelling unit in an existing  
22 project covered by a mortgage insured under section 236  
23 or in an existing project receiving the benefits of finan-  
24 cial assistance under section 101 of the Housing and  
25 Urban Development Act of 1965;

1       “(B) where it is to cover a one-family unit in a  
2       condominium project, have a principal obligation not ex-  
3       ceeding \$15,000 (\$17,500 in any geographical area  
4       where the Secretary authorizes an increase on the basis  
5       of a finding that cost levels so require), except that with  
6       respect to any family with five or more persons the fore-  
7       going limits shall be \$17,500 and \$20,000, respectively;  
8       and

9       “(C) be executed by a mortgagor who shall have  
10      paid (i) in the case of any family whose income is not  
11      in excess of 70 per centum of the limits prescribed by  
12      the Secretary for occupants of projects financed with  
13      mortgages insured under section 221 (d) (3) which bear  
14      interest at the below-market interest rate prescribed  
15      in the proviso of section 221 (d) (5), at least \$200, or  
16      (ii) in the case of any other family, at least 3 per  
17      centum (or such larger amount as the Secretary may  
18      require) of the Secretary’s estimate of the cost of  
19      acquisition, which amount (in cash or its equivalent)  
20      in either instance may be applied for the payment of  
21      settlement costs and initial payments for taxes, hazard  
22      insurance, mortgage insurance premiums, and other  
23      prepaid expenses.

24      “(j) (1) In addition to mortgages insured under the  
25      provisions of subsection (i), the Secretary is authorized,

1 upon application by the mortgagee, to insure a mortgage  
2 (including advances under such mortgage during rehabilita-  
3 tion) which is executed by a nonprofit organization to finance  
4 the purchase and rehabilitation of deteriorating or substand-  
5 ard housing, for subsequent resale to lower income home  
6 purchasers who meet eligibility requirements for assistance  
7 payments prescribed by the Secretary under subsection (b) .  
8 Commitments for the insurance of such mortgages may be  
9 issued by the Secretary prior to the date of their execution  
10 or disbursement thereon, upon such terms and conditions  
11 as the Secretary may prescribe.

12 “(2) To be eligible for insurance under paragraph (1)  
13 of this subsection, a mortgage shall—

14 “(A) be executed by a private nonprofit organiza-  
15 tion, approved by the Secretary, for the purpose of  
16 financing the purchase and rehabilitation (with the in-  
17 tention of subsequent resale) of property comprising one  
18 or more tracts or parcels, whether or not contiguous,  
19 consisting of (i) four or more single-family dwellings  
20 of detached, semidetached, or row construction, or (ii)  
21 four or more one-family units in a structure or structures  
22 for which a plan of family unit ownership approved by  
23 the Secretary is established;

24 “(B) be in a principal amount not exceeding the ap-

1       praised value of the property at the time of its purchase  
2       under the mortgage plus the estimated cost of the re-  
3       habilitation;

4       “(C) bear interest (exclusive of premium charges  
5       for insurance and service charge, if any) at not to exceed  
6       such per centum per annum (not in excess of 6 per  
7       centum), on the amount of the principal obligation out-  
8       standing at any time, as the Secretary finds necessary  
9       to meet the mortgage market;

10       “(D) provide for complete amortization (subject to  
11       paragraph (4) (E) ) by periodic payments within such  
12       term as the Secretary may prescribe; and

13       “(E) provide for the release of individual single-  
14       family dwellings from the lien of the mortgage upon their  
15       sale in accordance with paragraph (4).

16       “(3) No mortgage shall be insured under paragraph  
17       (1) unless the mortgagor shall have demonstrated to the  
18       satisfaction of the Secretary that (A) the property to be re-  
19       habilitated is located in a neighborhood which is sufficiently  
20       stable and contains sufficient public facilities and amenities  
21       to support long-term values, or (B) the rehabilitation to be  
22       carried out by the mortgagor plus its related activities and  
23       the activities of other owners of housing in the neighborhood,  
24       together with actions to be taken by public authorities, will  
25       be of such scope and quality as to give reasonable promise

1 that a stable environment will be created in the neighbor-  
2 hood.

3 “(4) (A) No mortgage shall be insured under para-  
4 graph (1) unless the mortgagor enters into an agreement,  
5 satisfactory to the Secretary, that it will offer to sell the  
6 dwellings involved, upon completion of their rehabilitation,  
7 to lower income individuals or families meeting the require-  
8 ments established by the Secretary under subsection (b).

9 “(B) The Secretary is authorized to insure under this  
10 paragraph mortgages executed to finance the sale of in-  
11 dividual dwellings to lower income purchasers as provided in  
12 subparagraph (A). Any such mortgage shall—

13 “(i) be in a principal amount not in excess of that  
14 portion of the unpaid principal balance of the blanket  
15 mortgage covering the property which is allocable to the  
16 individual dwelling involved;

17 “(ii) bear interest at the same rate as the blanket  
18 mortgage; and

19 “(iii) provide for complete amortization by periodic  
20 payments within a term equal to the remaining term  
21 (determined without regard to subparagraph (E)) of  
22 such blanket mortgage.

23 “(C) The price for which any individual dwelling is sold  
24 under this paragraph shall be in an amount equal to that

1 portion of the unpaid principal balance of the blanket mort-  
2 gage covering the property which is allocable to the dwelling  
3 plus such additional amount, not less than \$200 (which may  
4 be applied in whole or in part toward closing costs and may  
5 be paid in cash or its equivalent), as the Secretary may  
6 determine to be reasonable.

7 “(D) Upon the sale under this paragraph of any indi-  
8 vidual dwelling, such dwelling shall be released from the  
9 lien of the blanket mortgage. Until all of the individual  
10 dwellings in the property covered by the blanket mortgage  
11 have been sold, the mortgagor shall hold and operate the  
12 dwellings remaining unsold at any given time, in such  
13 manner and under such terms as the Secretary may prescribe,  
14 as though they constituted rental units.

15 “(E) Upon the sale under this paragraph of all the  
16 individual dwellings in the property covered by the blanket  
17 mortgage and the release of all individual dwellings from  
18 the lien of the blanket mortgage, the insurance of the blanket  
19 mortgage shall be terminated and no adjusted premium  
20 charge shall be charged by the Secretary upon such  
21 termination.

22 “(5) Where the Secretary has approved a plan of  
23 family unit ownership, the terms ‘single-family dwelling’,  
24 ‘single-family dwellings’, ‘individual dwelling’, and ‘individ-  
25 ual dwellings’ shall mean a family unit or family units,

1 together with the undivided interest (or interests) in the  
2 common areas and facilities.

3 “(6) In addition to the assistance payments authorized  
4 under subsection (b), the Secretary may make such pay-  
5 ments to a mortgagee on behalf of a nonprofit organization  
6 which is a mortgagor under the provisions of paragraph  
7 (1) in an amount not exceeding the difference between the  
8 monthly payment for principal, interest, and mortgage  
9 insurance premium which the mortgagor is obligated to pay  
10 under the mortgage and the monthly payment for principal  
11 and interest such mortgagor would be obligated to pay if the  
12 mortgage were to bear interest at the rate of 1 per centum  
13 per annum.

14 “(k) In determining the income of any person for the  
15 purposes of this section, there shall be deducted an amount  
16 equal to \$300 for each minor person who is a member of  
17 the immediate family of such person and living with such  
18 family, and the earnings of any such minor person shall  
19 not be included in the income of such person or his family.”

20 (b) (1) Section 221 (d) (2) (A) of the National Hous-  
21 ing Act is amended by—

22 (A) striking out “not to exceed (i) \$12,500”  
23 and inserting in lieu thereof “not to exceed (i)  
24 \$15,000 (or \$17,500, in the case of a family with five or  
25 more persons)”; and

1           (B) striking out “not to exceed \$15,000” in the  
2           second proviso and inserting in lieu thereof “not to  
3           exceed \$17,500 (or \$20,000 in the case of a family  
4           with five or more persons)”.

5           (2) Section 221 (d) (2) (B) of such Act is amended  
6 by—

7           (A) inserting “, in cash or its equivalent” before  
8           the semicolon after the words “acquisition cost” in the  
9           first proviso; and

10          (B) inserting before the semicolon at the end  
11          thereof the following: “: *Provided further*, That, if the  
12          mortgagor is the owner and an occupant of the property,  
13          such mortgagor shall to the maximum extent feasible  
14          be given the opportunity to contribute the value of his  
15          labor as equity in such dwelling”.

16          (c) The purchase of any individual dwelling, sold by  
17          a nonprofit organization pursuant to the provisions of section  
18          221 (h) (5) of the National Housing Act after the effective  
19          date of this section, may be financed with a mortgage in-  
20          sured under the provisions of section 235 (j) (4) of such  
21          Act, but such mortgage shall bear interest at the rate pro-  
22          vided in section 235 (j) (2) (c) of such Act.

23          (d) Section 212 (a) of the National Housing Act is  
24          amended by inserting “or section 235 (j) (1)” after “sub-  
25          section (h) (1)” each place it appears.

26          (e) The Secretary of Housing and Urban Develop-

1 ment is authorized to provide, or contract with public or  
 2 private organizations to provide, such budget, debt manage-  
 3 ment, and related counseling services to mortgagors whose  
 4 mortgages are insured under section 235 (i) or 235 (j)  
 5 (4) of the National Housing Act as he determines to be  
 6 necessary to assist such mortgagors in meeting the respon-  
 7 sibilities of homeownership. There are authorized to be  
 8 appropriated such sums as may be necessary to carry out  
 9 the provisions of this subsection.

#### 10 CREDIT ASSISTANCE

11 SEC. 102. (a) Title II of the National Housing Act  
 12 is amended by adding after section 236 (as added by sec-  
 13 tion 201 of this Act) the following new section:

#### 14 "SPECIAL MORTGAGE INSURANCE ASSISTANCE

15 "SEC. 237. (a) The purpose of this section is to help  
 16 provide adequate housing for families of low and moderate  
 17 income, including those who, for reasons of credit history,  
 18 irregular income patterns caused by seasonal employment,  
 19 or other factors, are unable to meet the credit requirements  
 20 of the Secretary for the purchase of a single-family home  
 21 financed by a mortgage insured under section 203, 220,  
 22 221, 234, or 235 (j) (4), but who, through the incentive  
 23 of homeownership and counseling assistance, appear to be  
 24 able to achieve homeownership.

25 "(b) The Secretary is authorized upon application by

1 the mortgagee to insure under this section any mortgage  
2 meeting the requirements of this section.

3 “(c) To be eligible for insurance under this section, a  
4 mortgage shall—

5 “(1) meet the requirements of section 203 (except  
6 subsection (m) ), 220 (d) (3) (A), 221 (d) (2), 221  
7 (h) (5), 221 (i), 234 (c), or 235 (j) (4), except as  
8 such requirements are modified by this section;

9 “(2) involve a principal obligation (including such  
10 initial service charges, appraisal, inspection, and other  
11 fees as the Secretary shall approve) in an amount not to  
12 exceed \$15,000: *Provided*, That the Secretary may in-  
13 crease the amount to not exceed \$17,500 in any geo-  
14 graphical area where he finds that cost levels so require:  
15 *Provided further*, That no mortgage meeting the re-  
16 quirements of section 203 (h) or 203 (i) shall be eligible  
17 for insurance under this section if its principal obligation  
18 is in excess of the maximum limits prescribed in such  
19 subsections;

20 “(3) be executed by a mortgagor who the Secre-  
21 tary has determined, after a full and complete study of  
22 the case, would not be an acceptable credit risk for mort-  
23 gage insurance purposes under section 203, 220, 221,  
24 234, or 235 (j) (4), because of his credit standing, debt

obligations, total annual income, or income characteristics, but who the Secretary is satisfied would be a reasonably satisfactory credit risk, consistent with the objectives stated in subsection (a), if he were to receive budget, debt management, and related counseling: *Provided*, That, in determining whether the mortgagor is a reasonably satisfactory credit risk, the Secretary shall review credit histories of applicants giving special consideration to those delinquent accounts which were ultimately paid by the applicant and to extenuating factors which may have caused credit accounts of the applicant to become delinquent; and the Secretary shall also give special consideration to income characteristics of applicants whose total income over the two years prior to their applications has remained at levels of eligibility (as required under paragraph (4) of this subsection), but who, because of the character of their seasonal employment or for other reasons, have not maintained continuous employment under one employer during that time; and

“(4) require monthly payments which, in combination with local real estate taxes, do not exceed 25 per centum of the applicant’s income, based on his average monthly income during the year prior to his applica-

1       tion or the average monthly income during the three  
2       years prior to his application, whichever is higher.

3       “(d) The Secretary shall give preference in approving  
4       mortgage insurance applications under this section to families  
5       living in public housing units, especially those families re-  
6       quired to leave public housing because their incomes have  
7       risen beyond the maximum prescribed income limits, and  
8       families eligible for residence in public housing who have  
9       been displaced from federally assisted urban renewal areas.

10       “(e) The Secretary is authorized to provide, or contract  
11       with public or private organizations to provide, such budget,  
12       debt management, and related counseling services to mort-  
13       gagors whose mortgages are insured under this section, as he  
14       determines to be necessary to meet the objectives of this sec-  
15       tion. The Secretary may also provide such counseling to  
16       otherwise eligible families who lack sufficient funds to supply  
17       a downpayment to help them to save an amount necessary  
18       for that purpose.

19       “(f) The aggregate principal balance of all mortgages  
20       insured under this section and outstanding at one time shall  
21       not exceed \$200,000,000.

22       “(g) There are authorized to be appropriated such sums  
23       as may be necessary to carry out the provisions of subsec-  
24       tion (e) of this section.”

(b) Section 226 of the National Housing Act is amended by inserting "235 (i), 237," after "234,".

RELAXATION OF MORTGAGE INSURANCE REQUIREMENTS  
IN CERTAIN URBAN NEIGHBORHOODS

SEC. 103. (a) Section 223 of the National Housing Act is amended by adding at the end thereof a new subsection as follows:

"(e) Notwithstanding any provision of this title except section 212, and without regard to limitations upon eligibility contained in any section of this title, the Secretary is authorized, upon application by the mortgagee, to insure under any section of this title a mortgage executed in connection with the repair, rehabilitation, construction, or purchase of property located in an older, declining urban area in which the conditions are such that one or more of the eligibility requirements applicable to the section of this title under which insurance is sought could not be met, if the Secretary finds that (1) the area is reasonably viable, giving consideration to the need for providing adequate housing for families of low and moderate income in such area, and (2) the property is an acceptable risk in view of such consideration. The insurance of a mortgage pursuant to this subsection shall be the obligation of the Special Risk Insurance Fund."

(b) Section 203 (1) of such Act is repealed.

## SPECIAL RISK INSURANCE FUND

2 SEC. 104. (a) Title II of the National Housing Act is  
3 amended by adding after section 237 (as added by section  
4 102 of this Act) the following new section:

"PAYMENT OF INSURANCE—SPECIAL RISK INSURANCE  
FUND

7       “SEC. 238. (a) (1) Any mortgagee under a mortgage  
8 insured under section 235 (i) , 235 (j) (4) , or 237 of this title  
9 shall be entitled to receive the benefits of the insurance as  
10 provided in section 204 (a) with respect to mortgages insured  
11 under section 203. The provisions of subsections (b) , (c) ,  
12 (d) , (g) , (j) , and (k) of section 204 shall be applicable to  
13 mortgages insured under section 235 (i) , 235 (j) (4) , or  
14 237, except that all references therein to the ‘Mutual Mort-  
15 gage Insurance Fund’ shall be construed to refer to the  
16 ‘Special Risk Insurance Fund’, and all references therein to  
17 section 203 shall be construed to refer to the appropriate  
18 section.

19 “(2) Any mortgagee under a mortgage insured under  
20 section 235 (j) (1) or 236 shall be entitled to receive the  
21 benefits of insurance provided in section 207 (g) with  
22 respect to mortgages insured under section 207. The pro-  
23 visions of subsections (d), (e), (h), (i), (j), (k), (l),  
24 and (n) of section 207 shall be applicable to mortgages in-  
25 sured under section 235 (j) (1) or 236, except that all

1 references therein to the 'General Insurance Fund' shall be  
2 construed to refer to the 'Special Risk Insurance Fund' and  
3 the premium charge provided in section 207 (d) shall be  
4 payable only in cash or debentures of the Special Risk  
5 Insurance Fund.

6       “(3) In lieu of the amount of insurance benefits com-  
7 puted pursuant to paragraph (1) or (2) of this subsection,  
8 the Secretary, in his discretion and in accordance with such  
9 regulations as he may prescribe, may (with respect to any  
10 mortgage loan acquired by him) compute and pay insur-  
11 ance benefits to the mortgagee in a total amount equal to the  
12 unpaid principal balance of the loan plus any accrued inter-  
13 est and any advances approved by the Secretary and made  
14 previously by the mortgagee under the provisions of the  
15 mortgage.

16       “(b) There is hereby created a Special Risk Insurance  
17 Fund (hereinafter referred to as the 'fund') which shall be  
18 used by the Secretary as a revolving fund for carrying out  
19 the mortgage insurance obligations of sections 223 (e), 235,  
20 236, and 237, and the Secretary is hereby authorized to  
21 advance to such fund the sum of \$5,000,000 from the Gen-  
22 eral Insurance Fund established pursuant to the provisions  
23 of section 519. Such advance shall be repayable at such  
24 times and at such rates of interest as the Secretary deems  
25 appropriate. Premium charges, adjusted premium charges,

1 inspection and other fees, service charges, and any other  
2 income received by the Secretary under such sections, to-  
3 gether with all earnings on the assets of the fund, shall be  
4 credited to the fund. All payments made pursuant to claims  
5 of mortgagees with respect to mortgages insured under sec-  
6 tions 235, 236, and 237 or pursuant to section 223 (e) , cash  
7 adjustments, the principal of and interest paid on debentures  
8 which are the obligation of the fund, expenses incurred in  
9 connection with or as a consequence of the acquisition and  
10 disposal of property acquired under such sections, and all  
11 administrative expenses in connection with the mortgage  
12 insurance operations under such sections shall be paid out of  
13 the fund. There is authorized to be appropriated such sums  
14 as may be needed from time to time to cover losses sustained  
15 by the fund in carrying out the mortgage insurance obliga-  
16 tions of sections 223 (e) , 235, 236, and 237. Moneys in the  
17 fund not needed for current operations of the fund shall be  
18 deposited with the Treasurer of the United States to the  
19 credit of the fund or invested in bonds or other obligations  
20 of, or in bonds or other obligations guaranteed by, the United  
21 States. The Secretary, with the approval of the Secretary of  
22 the Treasury, may purchase in the open market debentures  
23 which are the obligation of the fund. Such purchases shall be  
24 made at a price which will provide an investment yield of  
25 not less than the yield obtained from other investments au-

1   thorized by this section. Debentures so purchased shall be  
2   canceled and not reissued.”

3       (b) Section 224 of the National Housing Act is amended  
4   by striking out “or section 233” and inserting in lieu thereof  
5   “section 233, or section 238”.

6   CONDOMINIUM AND COOPERATIVE OWNERSHIP FOR LOW  
7                   AND MODERATE INCOME FAMILIES

8       SEC. 105. (a) Section 221 of the National Housing  
9   Act is amended by adding at the end thereof two new sub-  
10   sections as follows:

11       “(i) (1) The Secretary is authorized, with respect to  
12   any project involving a mortgage insured under subsection  
13   (d) (3) which bears interest at the below-market interest  
14   rate prescribed in the proviso of subsection (d) (5), to per-  
15   mit a conversion of the ownership of such project to a plan  
16   of family unit ownership. Under such plan, each family  
17   unit shall be eligible for individual ownership and provision  
18   shall be included for the sale of the family units, together  
19   with an undivided interest in the common areas and facilities  
20   which serve the project, to low or moderate income pur-  
21   chasers. The Secretary shall obtain such agreements as he  
22   determines to be necessary to assure continued maintenance  
23   of the common areas and facilities. Upon such sale, the family  
24   unit and the undivided interest in the common areas shall  
25   be released from the lien of the project mortgage.

1       “(2) (A) The Secretary is authorized, upon applica-  
2       tion by the mortgagee, to insure under this subsection mort-  
3       gages financing the purchase of individual family units under  
4       the plan prescribed in paragraph (1). Commitments may be  
5       issued by the Secretary for the insurance of such mortgages  
6       prior to the date of their execution or disbursement thereon,  
7       upon such terms and conditions as the Secretary may pre-  
8       scribe. To be eligible for such insurance, the mortgage  
9       shall—

10               “(i) be executed by a mortgagor having an income  
11       within the limits prescribed by the Secretary for occu-  
12       pants of projects financed with a mortgage insured un-  
13       der subsection (d) (3) which bears interest at the  
14       below-market rate prescribed in the proviso of subsec-  
15       tion (d) (5) ;

16               “(ii) involve a principal obligation (including such  
17       initial service charges, appraisal, inspection, and other  
18       fees as the Secretary shall approve) in an amount not to  
19       exceed the Secretary’s estimate of the appraised value  
20       of the family unit, including the mortgagor’s interest in  
21       the common areas and facilities, as of the date the mort-  
22       gage is accepted for insurance;

23               “(iii) bear interest at a rate determined by the  
24       Secretary (which may vary in accordance with the  
25       regulations of the Secretary promulgated pursuant to

1 the last sentence of paragraph (4) of this subsection)  
2 but no less than the below-market rate in effect under  
3 the proviso of subsection (d) (5) at the date of com-  
4 mitment for insurance; and

5 “(iv) provide for complete amortization by periodic  
6 payments within such term as the Secretary may pre-  
7 scribe, but not to exceed the lesser of forty years or  
8 three-quarters of the Secretary’s estimate of the re-  
9 maining economic life of the building improvements.

10 “(B) The price for which the individual family unit  
11 is sold to the low or moderate income purchaser shall not  
12 exceed the appraised value of the property, as determined  
13 under subparagraph (A) (ii), except that the purchaser  
14 shall be required to pay on account of the property at the  
15 time of purchase at least such amount, in cash or its equiva-  
16 lent (not less than 3 per centum of such price which may  
17 be applied in whole or in part toward closing costs), as the  
18 Secretary may determine to be reasonable and appropriate.

19 “(3) Upon the sale of all of the family units covered  
20 by the project mortgage, and the release of all of the family  
21 units (including the undivided interest allocable to each unit  
22 in the common areas and facilities) from the lien of the proj-  
23 ect mortgage, the insurance of the project mortgage shall be  
24 terminated and no adjusted premium charge shall be collected  
25 by the Secretary upon such termination.

1       “(4) Any mortgage covering an individual family unit  
2 insured under this subsection shall contain a provision that,  
3 if the original mortgagor does not continue to occupy the  
4 property, the interest rate shall increase to the highest rate  
5 permissible under this section and the regulations of the  
6 Secretary effective at the time the commitment was issued  
7 for the insurance of the project mortgage; except that the  
8 requirement for an increase in interest rate shall not be appli-  
9 cable if the property is sold and the purchaser is (i) a non-  
10 profit purchaser approved by the Secretary, or (ii) a low  
11 or moderate income purchaser who has an income within  
12 the limits prescribed by the Secretary for occupants of proj-  
13 ects financed with a mortgage insured under subsection  
14 (d) (3) which bears interest at the below-market rate pre-  
15 scribed in the proviso of subsection (d) (5). The mortgage  
16 shall also contain a provision that, if the Secretary determines  
17 the annual income of the original mortgagor (or a purchaser  
18 as described in clause (ii) of this paragraph) has increased  
19 to an amount enabling payment of a greater rate of interest,  
20 the interest rate of the individual mortgage may be increased  
21 up to the highest rate permissible under the regulations of  
22 the Secretary for mortgages insured under this section effec-  
23 tive at the time the commitment was issued for the insurance  
24 of the mortgage.

25       “(5) For the purpose of this subsection, the term—

1           “(i) ‘mortgage’, when used in relation to a mort-  
2       gage insured under paragraph (2) of this subsection,  
3       includes a first mortgage given to secure the unpaid  
4       purchase price of a fee interest in, or a long-term lease-  
5       hold interest in, a one-family unit in a multifamily proj-  
6       ect and an undivided interest in the common areas and  
7       facilities which serve the project; and

8           “(ii) ‘common areas and facilities’ includes the  
9       land and such commercial, community, and other facili-  
10      ties as are approved by the Secretary.

11          “(j) (1) The Secretary is authorized, with respect to  
12      any rental project involving a mortgage insured under sub-  
13      section (d) (3), which bears interest at the below-market  
14      interest rate prescribed in the proviso of subsection (d)  
15      (5), to permit a conversion of the ownership of such proj-  
16      ect to a cooperative approved by the Secretary. Member-  
17      ship in such cooperative shall be made available only to  
18      those families having an income within the limits prescribed  
19      by the Secretary for occupants of projects financed with a  
20      mortgage insured under subsection (d) (3) which bears  
21      interest at such below-market rate: *Provided*, That families  
22      residing in the rental project at the time of its conversion  
23      to a cooperative who do not meet such income limits may  
24      be permitted to become members in the cooperative under

1 such special terms and conditions as the Secretary may  
2 prescribe.

3 “(2) The Secretary is authorized, upon application by  
4 the mortgagee, to insure under this subsection cooperative  
5 mortgages financing the purchase of projects meeting the  
6 requirements of paragraph (1). Commitments may be issued  
7 by the Secretary for the insurance of such mortgages prior  
8 to the date of their execution or disbursement thereon, upon  
9 such terms and conditions as the Secretary may prescribe. To  
10 be eligible for such insurance, the mortgage shall—

11 “(i) involve a principal obligation (including such  
12 initial service charges, appraisal, inspection, and other  
13 fees as the Secretary shall approve) in an amount  
14 not exceeding the appraised value of the property for  
15 continued use as a cooperative, which value shall be  
16 based upon a mortgage amount on which the debt service  
17 can be met from the income of the property when op-  
18 erated on a nonprofit basis, after the payment of all oper-  
19 ating expenses, taxes, and required reserves;

20 “(ii) bear interest at the below-market rate pre-  
21 scribed in the proviso of subsection (d) (5); and

22 “(iii) provide for complete amortization within  
23 such terms as the Secretary may prescribe.”

24 (b) Section 221 (g) (1) of such Act is amended by  
25 striking out “or paragraph (5) of subsection (h) of this

1 section” and inserting in lieu thereof “paragraph (5) of  
2 subsection (h) of this section or paragraph (2) of subsec-  
3 tion (i) of this section”.

4 (c) Section 221 (g) (2) of such Act is amended by  
5 striking out “paragraph (1) of subsection (h)” and insert-  
6 ing in lieu thereof “paragraph (1) of subsection (h) or  
7 paragraph (2) of subsection (j) of this section,”.

8 ASSISTANCE TO NONPROFIT SPONSORS OF LOW AND  
9 MODERATE HOUSING

10 SEC. 106. (a) The Secretary of Housing and Urban  
11 Development is authorized to provide, or contract with pub-  
12 lic or private organizations to provide, information, advice,  
13 and technical assistance with respect to the construction, re-  
14 habilitation, and operation by nonprofit organizations of  
15 housing for low and moderate income families. Assistance by  
16 the Secretary may include—

17 (1) the assembly, correlation, publication, and dis-  
18 semination of information with respect to the construc-  
19 tion, rehabilitation, and operation of low and moderate  
20 income housing, and

21 (2) providing advice and technical assistance with  
22 respect to the construction, rehabilitation, and operation  
23 of low and moderate income housing.

24 (b) (1) The Secretary is authorized to make loans to  
25 nonprofit organizations for the necessary expenses, prior to

1 construction, in planning, and obtaining financing for, the re-  
2 habilitation or construction of housing for low and moderate  
3 income families under any federally assisted program. Such  
4 loans shall be made without interest and shall not exceed 80  
5 per centum of the reasonable costs expected to be incurred in  
6 planning, and in obtaining financing for, such housing prior  
7 to the availability of financing, including, but not limited to,  
8 preliminary surveys and analyses of market needs, prelimi-  
9 nary site engineering and architectural fees, site acquisition,  
10 application and mortgage commitment fees, and construction  
11 loan fees and discounts. The Secretary shall require repay-  
12 ment of loans made under this subsection, under such terms  
13 and conditions as he may require, upon completion of the  
14 project or sooner, and may cancel any part or all of a loan as  
15 he may determine cannot be recovered from the proceeds of  
16 any permanent loan made to finance the rehabilitation or  
17 construction of the housing.

18 (2) The Secretary shall determine prior to the making  
19 of any loan that the nonprofit organization meets such re-  
20 quirements with respect to financial responsibility and stabil-  
21 ity as he may prescribe.

22 (3) There are authorized to be appropriated for the pur-  
23 poses of this subsection not to exceed \$7,500,000 for the  
24 fiscal year ending June 30, 1969, and not to exceed \$10,-  
25 000,000 for the fiscal year ending June 30, 1970. Any

1 amounts so appropriated shall remain available until ex-  
2 pended, and any amounts authorized for any fiscal year under  
3 this paragraph but not appropriated may be appropriated  
4 for any succeeding fiscal year.

5 (4) Funds appropriated for the purposes of this subsec-  
6 tion shall be deposited in a fund which shall be known as the  
7 Low and Moderate Income Sponsor Fund, which shall be  
8 available without fiscal year limitation and be administered  
9 by the Secretary as a revolving fund for carrying out the  
10 purposes of this subsection. Sums received in repayment of  
11 loans made under this subsection shall be deposited in such  
12 fund.

13 INSURANCE PROTECTION FOR HOMEOWNERS

14 SEC. 107. (a) The Secretary of Housing and Urban  
15 Development is authorized, in cooperation with the private  
16 insurance industry, to develop a plan for the establishment  
17 at the earliest practicable date of an insurance program to  
18 help homeowners in meeting mortgage payments in times  
19 of personal economic adversity. Such insurance program shall  
20 be designed to protect mortgagors against foreclosure due to  
21 curtailment of income resulting from factors beyond their  
22 effective control, including such factors as death, disability,  
23 illness, and unemployment. Such insurance program shall also  
24 be designed to be actuarially sound through the use of premi-

1   ums, fees, extended or increased payment schedules, or other  
2   similar methods, in conjunction with such Federal participa-  
3   tion as may be necessary.

4       (b) Within six months following the date of enactment  
5   of this Act, the Secretary shall report to the Congress on his  
6   actions under this section, and shall recommend to the Con-  
7   gress such legislation as he deems appropriate to authorize  
8   him to enter into agreements with any insurance company,  
9   or any corporation or joint enterprise formed to provide home  
10   mortgage insurance protection, for the purpose of reinsuring  
11   insurance reserve funds, subsidizing premium payments on  
12   behalf of lower income mortgagors, or otherwise making pos-  
13   sible the insurance protection of homeowners in accordance  
14   with subsection (a). In preparing such recommendations the  
15   Secretary shall consult with other agencies or instrumentali-  
16   ties of the United States which insure or guarantee home  
17   mortgages in order that such legislation as may be recom-  
18   mended affords equal benefits to mortgagors participating in  
19   their programs.

20       NATIONAL ADVISORY COMMISSION ON LOW INCOME

21                               HOUSING

22       SEC. 108. (a) (1) There is hereby established the Na-  
23   tional Advisory Commission on Low Income Housing  
24   (hereinafter referred to as the "Commission"). The Com-  
25   mission shall be composed of twenty-one members as follows:

1           (A) Four members appointed by the President of  
2     the Senate, two from the majority party and two from  
3     the minority party;

4           (B) Four members appointed by the Speaker of  
5     the House of Representatives, two from the majority  
6     party and two from the minority party; and

7           (C) Thirteen members appointed by the President,  
8     not more than three of whom shall be from the Federal  
9     Government. Appointment shall be made by the Presi-  
10    dent, whenever practicable, after consultation with the  
11    ranking majority and minority members of the Housing  
12    Subcommittees of the Committees on Banking and Cur-  
13    rency of the Senate and House of Representatives.

14          (2) Any vacancy in the Commission shall not affect its  
15    powers, but shall be filled in the same manner in which the  
16    original appointment was made.

17          (3) Eleven members of the Commission shall constitute  
18    a quorum, but a lesser number may conduct hearings.

19          (4) The members of the Commission shall elect a  
20    Chairman and a Vice Chairman from the membership of  
21    the Commission.

22          (b) (1) The Commission shall undertake a compre-  
23    hensive study and investigation, to further the policy set  
24    forth in section 2 of this Act, of practicable and effective

1 ways of bringing decent, safe, and sanitary housing within  
2 the reach of low income families. Such study shall evaluate  
3 existing housing programs designed to assist such families,  
4 and explore new ways by which public and private resources  
5 may be more effectively utilized in meeting the housing needs  
6 of such families. In the carrying out of such study, the Com-  
7 mission may, where necessary or desirable, utilize the serv-  
8 ices of private research organizations, and shall, insofar as is  
9 practicable, seek to coordinate its investigation with studies  
10 undertaken, or being undertaken, by the Banking and  
11 Currency Committees of the Senate and House of  
12 Representatives.

13 (2) The Commission shall be organized and begin its  
14 functions at the earliest possible date, and shall submit to the  
15 President and to the Congress an interim report with respect  
16 to its findings and recommendations not later than July 1,  
17 1969. A final report of its findings and recommendations  
18 shall be submitted to the President and the Congress not  
19 later than July 1, 1970.

20 (c) (1) The Commission or, on the authorization of the  
21 Commission, any subcommittee or members thereof, may,  
22 for the purpose of carrying out the provisions of this section,  
23 hold such hearings, take such testimony, and sit and act at  
24 such times and places as the Commission deems advisable.  
25 Any member authorized by the Commission may administer

1 oaths or affirmations to witnesses appearing before the Com-  
2 mission or any subcommittee or members thereof.

3 (2) Each department, agency, and instrumentality of  
4 the executive branch of the Government is authorized and  
5 directed to furnish to the Commission, upon request made  
6 by the Chairman or Vice Chairman, such information as  
7 the Commission deems necessary to carry out its functions  
8 under this section.

9 (3) Subject to such rules and regulations as may be  
10 adopted by the Commission, the Chairman, without regard  
11 to the provisions of title 5, United States Code, governing  
12 appointments in the competitive service, and without regard  
13 to the provisions of chapter 51 and subchapter III of chapter  
14 53 of such title relating to classification and General Sched-  
15 ule pay rates, shall have the power—

16 (1) to appoint and fix the compensation of such  
17 staff personnel as he deems necessary, and

18 (2) to procure temporary and intermittent serv-  
19 ices to the same extent as is authorized by section 3109  
20 of title 5, United States Code, but at rates not to exceed  
21 \$50 a day for individuals.

22 (d) (1) Any member of the Commission who is ap-  
23 pointed from the executive or legislative branch of the Gov-  
24 ernment shall serve without compensation in addition to

1 that received in his regular employment, but shall be en-  
2 titled to reimbursement for travel, subsistence, and other  
3 necessary expenses incurred by him in the performance of  
4 duties vested in the Commission.

5 (2) Members of the Commission, other than those re-  
6 ferred to in paragraph (1), shall receive compensation at  
7 the rate of \$75 per day for each day they are engaged in the  
8 performance of their duties as members of the Commission  
9 and shall be entitled to reimbursement for travel, subsistence,  
10 and other necessary expenses incurred by them in the per-  
11 formance of their duties as members of the Commission.

12 (e) There are authorized to be appropriated, out of any  
13 money in the Treasury not otherwise appropriated, such  
14 sums as may be necessary to carry out this section.

15 (f) The Commission shall cease to exist thirty days  
16 after the submission of its final report.

17 NATIONAL HOMEOWNERSHIP FOUNDATION

18 SEC. 109. (a) (1) There is hereby created a body cor-  
19 porate to be known as the "National Homeownership Foun-  
20 dation" (hereinafter referred to as the "Foundation") to  
21 carry out a continuing program of encouraging private and  
22 public organizations at the national, community, and neigh-  
23 borhood levels to provide increased homeownership and  
24 housing opportunities in urban and rural areas for lower  
25 income families through such means as—

1           (A) encouraging the investment in, and sponsoring  
2 of, housing for lower income families;

3           (B) encouraging the establishment of programs of  
4 assistance and counseling to lower income families to  
5 enable them better to achieve and afford adequate  
6 housing;

7           (C) providing a broad range of technical assistance  
8 through publications and advisory services to public and  
9 private organizations which are carrying out, or are  
10 desirous of carrying out, programs to expand homeown-  
11 ership and housing opportunities for lower income fam-  
12 ilies; and

13           (D) providing grants and loans to public and pri-  
14 vate organizations carrying out homeownership and  
15 housing opportunity programs for lower income families  
16 to help cover some of the expenses of such programs.

17       (2) The Foundation shall be deemed to be a corpora-  
18 tion without members organized and established under the  
19 provisions of the District of Columbia Nonprofit Corpora-  
20 tion Act, with all the rights, powers, and responsibilities  
21 thereof except as limited by this section and any amend-  
22 ments thereto. This section shall constitute the articles of  
23 incorporation and charter of the Foundation, which shall  
24 not be an agency or instrumentality of the United States  
25 Government. The Congress expressly reserves the exclusive

1 right to alter or amend this charter. The Foundation shall  
2 have succession until dissolved by Act of Congress. The  
3 Foundation shall maintain its principal office in the District  
4 of Columbia.

5       (3) No part of the net earnings of the Foundation  
6 shall inure to the benefit of any private person, and no sub-  
7 stantial part of its activities shall be devoted to attempting  
8 to influence legislation. The Foundation shall not participate  
9 or intervene in any political campaign on behalf of any  
10 candidate for public office. The Foundation shall be oper-  
11 ated and administered at all times as a charitable and edu-  
12 cational foundation.

13       (4) No employee or officer of the Foundation shall  
14 receive compensation in excess of that received by or here-  
15 after prescribed by law for heads of executive departments.

16       (5) The Foundation shall make maximum use of exist-  
17 ing public and private agencies and programs, and in carry-  
18 ing out its functions the Foundation is authorized to con-  
19 tract with individuals, private corporations, organizations,  
20 or associations, and with agencies of the Federal, State, and  
21 local governments.

22       (6) The Foundation is authorized to receive donations  
23 and grants from individuals and from public and private  
24 organizations, foundations, and agencies.

25       (7) The Foundation may use only donated funds, or

1 funds derived from payment of interest on loans made by it,  
2 for the principal and interest payments on any borrowings.

3 (b) (1) The Foundation shall have a Board of Direc-  
4 tors consisting of eighteen members, fifteen of whom shall  
5 be appointed by the President of the United States, with  
6 the advice and consent of the Senate. The other three mem-  
7 bers shall be, ex officio, the Secretary of Housing and Urban  
8 Development, the Secretary of Agriculture, and the Director  
9 of the Office of Economic Opportunity. The President shall  
10 appoint one of the fifteen appointed members to serve as  
11 Chairman of the Board for a term of three years.

12 (2) Within thirty days after the date of enactment of  
13 this Act, the President shall appoint the remaining fifteen  
14 members of the Board. Not more than five of such members  
15 shall, at the time of their appointments, be serving full time  
16 as officers or employees of the Federal Government, or as  
17 officers or employees of any State or local government.  
18 Each appointed member of the Board shall hold office for  
19 a term of three years, except that (A) any member ap-  
20 pointed to fill a vacancy prior to the expiration of the term  
21 for which his predecessor was appointed shall be appointed  
22 for the remainder of such term, and (B) the terms of the  
23 members first taking office shall expire, as designated by  
24 the President at the time of appointment, five at the end of

1 the first year, five at the end of the second year, and five  
2 at the end of the third year after the date of appointment.  
3 Members of the Board, however appointed, shall be eligible  
4 for reappointment, but at no time shall there be more than  
5 five members of the Board who at the time of their appoint-  
6 ment or reappointment were full-time officers or employees  
7 of the Federal Government or of any State or local govern-  
8 ment.

9       (3) Appointed members of the Board who are not  
10 employees of the Federal Government, while attending  
11 meetings or conferences of the Board or otherwise serving  
12 on business of the Board, shall be entitled to receive com-  
13 pensation at rates fixed by the President, but not exceeding  
14 \$100 per day, including travel time, and while so serving  
15 away from their homes or regular places of business they  
16 may be allowed travel expenses, including per diem in lieu  
17 of subsistence, as authorized by section 5703 of title 5,  
18 United States Code, for persons in the Government service  
19 employed intermittently.

20       (4) The Board shall appoint an Executive Director  
21 of the Foundation. The Executive Director shall be the chief  
22 executive officer of the Foundation, shall serve at the pleas-  
23 ure of the Board, and all other executive officers and all  
24 employees shall be responsible to him. The Board shall  
25 also cause to be appointed a secretary, a treasurer, and

1 such other officers as may be necessary to conduct prop-  
2 erly the business of the Foundation, and shall provide for  
3 filling vacancies in such offices.

4 (5) The Board shall adopt bylaws for the Foundation  
5 which shall be made available for public inspection upon  
6 request.

7 (c) (1) The Foundation shall assist public and private  
8 organizations, at their request, in initiating, developing,  
9 and conducting programs to expand homeownership and  
10 housing opportunities for lower income families. To provide  
11 such assistance and to carry out the purposes of this section,  
12 the Foundation is authorized to—

13 (A) carry out a continuing program of encourag-  
14 ing private and public organizations at the national,  
15 community, and neighborhood levels in the establish-  
16 ment of such programs;

17 (B) assist in the formation of organizations the  
18 purpose of which is the development and carrying out  
19 of such programs, including the establishment of local  
20 development funds for financing housing for lower in-  
21 come families through the pooling of moneys from  
22 private sources;

23 (C) identify and arrange for the technical and  
24 managerial assistance and personnel needed for the suc-

1        successful operation of such programs by public and private  
2        organizations;

3            (D) assist public and private organizations in ob-  
4        taining the mortgage financing, insurance, and other  
5        requirements or aids necessary for conducting programs  
6        of housing construction, rehabilitation, or improvements  
7        for lower income families;

8            (E) arrange for, or provide on a limited basis,  
9        training for persons in the skills needed in administering  
10       programs of homeownership and housing opportunity  
11       for lower income families;

12           (F) encourage research and innovation, and collect  
13        and make available such information as may be desirable  
14        to further the purposes of this section, including but not  
15        limited to such activities as the sponsoring of seminars,  
16        conferences, and meetings, and the establishment of a  
17        continuing information program to acquaint lower in-  
18        come families with the means they can use to improve  
19        the quality of their housing and the homeownership and  
20        housing opportunities available to them;

21           (G) assist private and public organizations in estab-  
22        lishing, in connection with their homeownership and  
23        housing opportunity programs for lower income families,  
24        counseling and similar activities designed to advise lower  
25        income families of the means available to better them-

1       selves economically through job training and manpower  
2       development programs; and

3           (H) perform other similar services in order to fur-  
4       ther the purposes of this section.

5       (2) The Foundation may, if it deems it appropriate,  
6       charge a reasonable fee for any assistance or services pro-  
7       vided under this subsection.

8       (d) (1) In order to assist public and private organiza-  
9       tions which are carrying out homeownership and housing  
10      opportunity programs for lower income families to fill unmet  
11      needs, initiate exceptional programs, and experiment with  
12      new approaches and programs, the Foundation is author-  
13      ized, subject to such terms and conditions as it may prescribe,  
14      to make grants and loans to such organizations to help defray  
15      the following expenses:

16           (A) organizational and administrative expenses in-  
17      curred in commencing the operation of a program, or in  
18      expanding an existing program, to the extent that the  
19      activities are related to providing homeownership and  
20      housing opportunities for lower income families;

21           (B) necessary preconstruction costs incurred for  
22      architectural assistance, land options, application fees,  
23      and similar items; and

24           (C) the cost of carrying out programs providing  
25      counseling or similar services to lower income families

1       for whom housing is being provided, in order to enable  
2       those families better to achieve and afford adequate hous-  
3       ing, in such matters as home management, budget man-  
4       agement, and home maintenance.

5       (2) In order to be eligible for a grant or loan under  
6       this subsection, the organization seeking such assistance shall  
7       demonstrate to the satisfaction of the Foundation that the  
8       funds requested are not otherwise available from Federal  
9       sources: *Provided*, That a grant or loan under this section  
10      may be provided to help cover that portion of the cost of  
11      an eligible activity not covered by Federal funds.

12      (3) The Foundation shall encourage cooperation be-  
13      tween public and private organizations carrying out programs  
14      of homeownership and housing opportunity for lower in-  
15      come families and the neighborhoods and communities af-  
16      fected by such programs. To help assure such cooperation  
17      and in order to coordinate, to the maximum extent feasible,  
18      any construction or rehabilitation activities with the develop-  
19      ment goals of the neighborhood or community affected, no  
20      application for a loan or grant under this subsection shall be  
21      considered unless such application has been submitted to the  
22      governing body of the community affected, or to such other  
23      entity of local government as may be designated by the gov-  
24      erning body, for such recommendations as the local govern-

ing body or its designee may desire to make. Any recommendations so made shall be given careful consideration by the Foundation before taking final action on any such application. If, upon the expiration of thirty days after any such application has been submitted to such governing body or its designee, such body or designee fails to provide such recommendations, the application may be considered without the benefit of such recommendations.

(e) The Foundation shall coordinate its activities and consult with the Department of Housing and Urban Development and other Federal departments and agencies engaged in providing homeownership and housing opportunities for lower income families.

(f) (1) Not later than one hundred and twenty days after the close of each fiscal year, the Foundation shall prepare and submit to the President and to the Congress a full report of its activities during such year. Such report shall include an account of the Foundation's experiences with the efforts of private and public organizations to expand homeownership and housing opportunities for lower income families, together with such recommendations as it deems appropriate.

(2) Whenever in its judgment the general unavailability of mortgage funds is sufficiently serious to deter the Foundation from carrying out its objective of expanding homeown-

1 ership and housing opportunities for lower income families,  
2 the Foundation shall, in its annual report or in a separate  
3 report to the President and the Congress, state its findings  
4 and make such recommendations for alternate means of  
5 financing housing for such families as it deems appropriate.

6 (g) (1) The financial transactions of the Foundation  
7 shall be audited by the General Accounting Office in accord-  
8 ance with the principles and procedures applicable to com-  
9 mercial corporate transactions and under such rules and regu-  
10 lations as may be prescribed by the Comptroller General  
11 of the United States. The representatives of the General  
12 Accounting Office shall have access to all books, accounts,  
13 financial records, reports, files, and all other papers, things,  
14 or property belonging to or in use by the Foundation and  
15 necessary to facilitate the audit, and they shall be afforded  
16 full facilities for verifying transactions with the balances or  
17 securities held by depositories, fiscal agents, and custodians.  
18 The audit shall cover the fiscal year corresponding to that  
19 of the United States Government.

20 (2) A report of each such audit shall be made by the  
21 Comptroller General to the Congress not later than Janu-  
22 ary 15 following the close of the fiscal year for which the  
23 audit was made. The report shall set forth the scope of the  
24 audit and shall include a statement of assets and liabilities,

1 capital and surplus or deficit; a statement of sources and  
2 application of funds; and such comments and information as  
3 may be deemed necessary to keep Congress informed of the  
4 operations and financial condition of the Foundation, to-  
5 gether with such recommendations with respect thereto as  
6 the Comptroller General may deem advisable. The report  
7 shall also show specifically any program, expenditure, or  
8 other financial transaction or undertaking observed in the  
9 course of the audit, which, in the opinion of the Comptroller  
10 General, has been carried on or made without authority of  
11 law. A copy of each report shall be furnished to the Presi-  
12 dent and to the Foundation at the time submitted to the  
13 Congress.

14 (h) Funds of the Foundation shall be deposited, to  
15 the extent practicable, in accounts with financial institu-  
16 tions which are actively engaged in making loans or are  
17 otherwise carrying on activities in furtherance of home-  
18 ownership and housing opportunities for lower income  
19 families.

20 (i) There is authorized to be appropriated to the Foun-  
21 dation not to exceed \$10,000,000 to carry out the purposes  
22 of this section. Appropriations made hereunder shall remain  
23 available until expended.

1       **TITLE II—RENTAL HOUSING FOR LOWER**  
2                               **INCOME FAMILIES**

3                               **PART A—PRIVATE HOUSING**

4       **RENTAL AND COOPERATIVE HOUSING FOR LOWER**  
5                               **INCOME FAMILIES**

6       SEC. 201. (a) Title II of the National Housing Act is  
7 amended by adding after section 235 (as added by section  
8 101 of this Act) the following new section:

9       “RENTAL AND COOPERATIVE HOUSING FOR LOWER  
10                               INCOME FAMILIES

11       “SEC. 236. (a) For the purpose of reducing rentals for  
12 lower income families, the Secretary is authorized to make,  
13 and to contract to make, periodic interest reduction pay-  
14 ments on behalf of the owner of a rental housing project  
15 designed for occupancy by lower income families, which  
16 shall be accomplished through payments to mortgagees hold-  
17 ing mortgages meeting the special requirements specified in  
18 this section.

19       “(b) Interest reduction payments with respect to a  
20 project shall only be made during such time as the project  
21 is operated as a rental housing project and is subject to a  
22 mortgage which meets the requirements of, and is insured  
23 under, subsection (j) of this section.

24       “(c) The interest reduction payments to a mortgagee  
25 by the Secretary on behalf of a project owner shall be in

1 an amount not exceeding the difference between the monthly  
2 payment for principal, interest, and mortgage insurance  
3 premium which the project owner as a mortgagor is obligated  
4 to pay under the mortgage and the monthly payment for  
5 principal and interest such project owner would be obligated  
6 to pay if the mortgage were to bear interest at the rate of  
7 1 per centum per annum.

8 “(d) The Secretary may include in the payment to the  
9 mortgagee such amount, in addition to the amount computed  
10 under subsection (c), as he deems appropriate to reimburse  
11 the mortgagee for its expenses in handling the mortgage.

12 “(e) As a condition for receiving the benefits of in-  
13 terest reduction payments, the project owner shall operate  
14 the project in accordance with such requirements with re-  
15 spect to tenant eligibility and rents as the Secretary may  
16 prescribe. Procedures shall be adopted by the Secretary  
17 for review of tenant incomes at intervals of two years (or at  
18 shorter intervals where the Secretary deems it desirable).

19 “(f) For each dwelling unit there shall be established  
20 with the approval of the Secretary (1) a basic rental charge  
21 determined on the basis of operating the project with pay-  
22 ments of principal and interest due under a mortgage bear-  
23 ing interest at the rate of 1 per centum per annum; and (2)  
24 a fair market rental charge determined on the basis of op-  
25 erating the project with payments of principal, interest, and

1 mortgage insurance premium which the mortgagor is obli-  
2 gated to pay under the mortgage covering the project. The  
3 rental for each dwelling unit shall be at the basic rental  
4 charge or such greater amount, not exceeding the fair mar-  
5 ket rental charge, as represents 25 per centum of the tenant's  
6 income.

7       “(g) The project owner shall, as required by the Sec-  
8 retary, accumulate, safeguard, and periodically pay to the  
9 Secretary all rental charges collected in excess of the basic  
10 rental charges. Such excess charges shall be deposited by  
11 the Secretary in a fund which may be used by him as a re-  
12 volving fund for the purpose of making interest reduction  
13 payments with respect to any rental housing project cov-  
14 ered by a mortgage insured under this section, subject to  
15 limits approved in appropriation Acts pursuant to subsection  
16 (i). Moneys in such fund not needed for current operations  
17 may be invested in bonds or other obligations of the United  
18 States or in bonds or other obligations guaranteed as to prin-  
19 cipal and interest by the United States.

20       “(h) In addition to establishing the requirements speci-  
21 fied in subsection (e), the Secretary is authorized to make  
22 such rules and regulations, to enter into such agreements,  
23 and to adopt such procedures as he may deem necessary or  
24 desirable to carry out the provisions of this section.

25       “(i) (1) There are authorized to be appropriated such

1 sums as may be necessary to carry out the provisions of this  
2 section, including such sums as may be necessary to make  
3 interest reduction payments under contracts entered into  
4 under this section. The aggregate amount of contracts to  
5 make such payments shall not exceed amounts approved in  
6 appropriation Acts, and payments pursuant to such contracts  
7 shall not exceed \$75,000,000 per annum prior to July 1,  
8 1969, which maximum dollar amount shall be increased by  
9 \$100,000,000 on July 1, 1969, and by \$125,000,000 on  
10 July 1, 1970.

11 “(2) Not more than 20 per centum of the total amount  
12 of interest reduction payments authorized to be contracted  
13 to be made pursuant to appropriation Acts shall be contracted  
14 to be made with respect to families, occupying rental housing  
15 projects insured under this section, whose incomes at the time  
16 of the initial renting of the projects are in excess of 70 per  
17 centum of the limits prescribed by the Secretary for occupants  
18 of projects financed with mortgages insured under section  
19 221 (d) (3) which bear interest at the below-market interest  
20 rate prescribed in the proviso of section 221 (d) (5).

21 “(j) (1) The Secretary is authorized, upon application  
22 by the mortgagee, to insure a mortgage (including advances  
23 on such mortgage during construction) which meets the re-  
24 quirements of this subsection. Commitments for the insur-

1     ance of such mortgages may be issued by the Secretary prior  
2     to the date of their execution or disbursement thereon, upon  
3     such terms and conditions as he may prescribe.

4     “(2) As used in this subsection—

5         “(A) the terms ‘family’ and ‘families’ shall have  
6         the same meaning as in section 221;

7         “(B) the term ‘elderly or handicapped families’  
8         shall have the same meaning as in section 202 of the  
9         Housing Act of 1959; and

10         “(C) the terms ‘mortgage’, ‘mortgagee’, and ‘mort-  
11         gagor’ shall have the same meaning as in section 201.

12     “(3) To be eligible for insurance under this subsection,  
13     a mortgage shall meet the requirements specified in subsec-  
14     tions (d) (1) and (d) (3) of section 221, except as such  
15     requirements are modified by this subsection. In the case of  
16     a project financed with a mortgage insured under this sub-  
17     section which involves a mortgagor other than a cooperative  
18     or a private nonprofit corporation or association and which  
19     is sold to a cooperative or a nonprofit corporation or associa-  
20     tion, the Secretary is further authorized to insure under this  
21     subsection a mortgage given by such purchaser in an amount  
22     not exceeding the appraised value of the property at the time  
23     of purchase, which value shall be based upon a mortgage  
24     amount on which the debt service can be met from the  
25     income of the property when operated on a nonprofit basis,

1 after payment of all operating expenses, taxes, and required  
2 reserves.

3 “(4) The mortgage to be insured under this subsection  
4 shall—

5 “(A) be executed by a private mortgagor eligible  
6 under subsection (d) (3) or (e) of section 221;

7 “(B) bear interest (exclusive of premium charges  
8 for insurance and service charges, if any) at not to ex-  
9 ceed such per centum per annum, on the amount of the  
10 principal obligation outstanding at any time, as the Sec-  
11 retary finds necessary to meet the mortgage market; and

12 “(C) provide for complete amortization by periodic  
13 payments within such term as the Secretary may  
14 prescribe.

15 “(5) The property or project shall—

16 “(A) comply with such standards and conditions as  
17 the Secretary may prescribe to establish the acceptability  
18 of such property for mortgage insurance and may include  
19 such nondwelling facilities as the Secretary deems ade-  
20 quate and appropriate to serve the occupants and the  
21 surrounding neighborhood: *Provided*, That the project  
22 shall be predominantly residential and any nondwelling  
23 facility included in the mortgage shall be found by the  
24 Secretary to contribute to the economic feasibility of the  
25 project, and the Secretary shall give due consideration

1 to the possible effect of the project on other business  
2 enterprises in the community: *Provided further, That,*  
3 in the case of a project designed primarily for occupancy  
4 by elderly or handicapped families, the project may in-  
5 clude related facilities for use by elderly or handicapped  
6 families, including cafeterias or dining halls, community  
7 rooms, workshops, infirmaries or other inpatient or out-  
8 patient health facilities, and other essential service  
9 facilities;

10 “(B) include five or more dwelling units; and

11 “(C) be designed primarily for use as a rental proj-  
12 ect to be occupied by lower income families or by  
13 elderly or handicapped families: *Provided, That* lower  
14 income persons who are less than sixty-two years of  
15 age shall be eligible for occupancy in such a project,  
16 but not more than 10 per centum of the dwelling units  
17 in any such project shall be available for occupancy  
18 by such persons.

19 “(6) With the approval of the Secretary, the mortgagor  
20 may sell the individual dwelling units to lower income  
21 or elderly or handicapped purchasers. The Secretary  
22 may consent to the release of the mortgagor from his lia-  
23 bility under the mortgage or the credit instrument secured  
24 thereby, or consent to the release of parts of the mortgaged  
25 property from the lien of the mortgage, upon such terms and

1 conditions as he may prescribe, and the mortgage may pro-  
2 vide for such release.

3 “(k) As used in this section the term ‘tenant’ includes  
4 a member of a cooperative, the term ‘rental housing proj-  
5 ect’ includes a cooperative housing project, and the terms  
6 ‘rental’ and ‘rental charge’ mean, with respect to members  
7 of a cooperative, the charges under the occupancy agree-  
8 ments between such members and the cooperative.

9 “(l) In determining the income of any person for the  
10 purposes of this section, there shall be deducted an amount  
11 equal to \$300 for each minor person who is a member of the  
12 immediate family of such person and living with such family,  
13 and the earnings of any such minor person shall not be  
14 included in the income of such person or his family.”

15 (b) (1) Section 212 (a) of the National Housing Act  
16 is amended by striking out “or 232” in the first sentence  
17 of the second paragraph and inserting in lieu thereof “, 232  
18 or 236”.

19 (2) Section 227 (a) of such Act is amended by striking  
20 out “or (viii) under section 234 (d)” and inserting in lieu  
21 thereof “(viii) under section 234 (d), or (ix) under section  
22 236”.

23 (3) Section 227 (c) of such Act is amended by striking  
24 out “or section 233 (b) (2)” each place it appears and in-  
25 serting in lieu thereof “section 233, or section 236”.

1       (c) The Secretary of Housing and Urban Develop-  
2 ment is authorized, upon such terms and conditions as he may  
3 prescribe, to transfer to section 236(j) of the National  
4 Housing Act the insurance of a mortgage which has not  
5 been finally endorsed for insurance under section 221(d)(3)  
6 of such Act and which has been approved for the below  
7 market interest rate prescribed in the proviso of section  
8 221(d)(5) of such Act.

9       (d) The Secretary of Housing and Urban Develop-  
10 ment is authorized, upon such terms and conditions as he  
11 may prescribe, to insure under section 236(j) of the Na-  
12 tional Housing Act a mortgage meeting the requirements of  
13 such section given to refinance a mortgage loan which was  
14 made under section 202 of the Housing Act of 1959: *Pro-*  
15 *vided*, That the application for such insurance is filed with  
16 the Secretary on or before the date of project completion,  
17 or within such reasonable time thereafter as the Secretary  
18 may permit.

19       (e) (1) Section 101(g) of the Housing and Urban  
20 Development Act of 1965 is amended by striking out “and  
21 231(c)(3)” and inserting in lieu thereof “, 231(c)(3),  
22 and 236”.

23       (2) Section 101(j)(1) of such Act is amended by—

24               (A) striking out “and” at the end of subparagraph

25               (B) ;

(B) striking out the period at the end of subparagraph (C) and inserting in lieu thereof “; and”; and

(C) inserting a new subparagraph (D) to read as follows:

“(D) a private nonprofit corporation or other private nonprofit legal entity, a limited dividend corporation or other limited dividend legal entity, or a cooperative housing corporation, which is a mortgagor under a mortgage insured under section 236 (j) of the National Housing Act which has been approved for receiving the benefits of this section: *Provided*, That payments shall not be made with respect to more than 20 per centum of the dwelling units in any property so financed.”

(f) Section 207 of the Appalachian Regional Development Act of 1965 is amended—

(1) by inserting in the heading “AND SECTION 236” immediately after “SECTION 221”;

(2) by inserting “or section 236” after “section 221” each place it appears;

(3) by inserting “or ‘section 236’ ” after “‘section 221’ ” in subsection (a); and

(4) by inserting “, Government National Mortgage Association,” immediately after “Federal Housing Administration” in subsection (c).

## RENT SUPPLEMENT PROGRAM

SEC. 202. (a) Section 101(a) of the Housing and Urban Development Act of 1965 is amended by striking out everything after the word "exceed" the second time the word appears in the third sentence and inserting in lieu thereof the following: "\$150,000,000 per annum prior to July 1, 1969, which maximum dollar amount shall be increased by \$40,000,000 on July 1, 1969, and by \$100,000,000 on July 1, 1970."

(b) Section 101(b) of such Act is amended by inserting after the first sentence the following: "Such term also includes a private nonprofit corporation or other private nonprofit legal entity, a limited dividend corporation, or other limited dividend legal entity, or a cooperative housing corporation, which is the owner of a rental or cooperative housing project financed under a State or local program providing assistance through loans, loan insurance, or tax abatements, and which prior to completion of construction or rehabilitation is approved for receiving the benefits of this section."

## PART B—LOW-RENT PUBLIC HOUSING

## INCREASED LOW-RENT PUBLIC HOUSING AUTHORIZATION

SEC. 203. (a) Section 10(e) of the United States Housing Act of 1937 is amended by striking out in the first sentence "\$366,250,000 per annum, which limit shall be increased by \$47,000,000 on the date of enactment of

1 the Housing and Urban Development Act of 1965, and by  
2 further amounts of \$47,000,000 on July 1 in each of the  
3 years 1966, 1967, and 1968, respectively,” and inserting  
4 in lieu thereof the following: “\$554,250,000 per annum.  
5 which limit shall be increased by \$100,000,000 on the date  
6 of enactment of the Housing and Urban Development Act  
7 of 1968 and by further amounts of \$150,000,000 on July 1  
8 in each of the years 1969 and 1970,”.

9 (b) Section 20 of such Act is amended by—

10 (1) striking out “not to exceed \$1,500,000,000”  
11 in the first sentence and inserting in lieu thereof “which  
12 shall not, unless authorized by the President, exceed  
13 \$1,500,000,000”; and

14 (2) inserting after the first sentence the following:  
15 “For the purpose of determining obligations incurred  
16 to make loans pursuant to this Act against any limita-  
17 tion otherwise applicable with respect to such loans, the  
18 Secretary shall estimate the maximum amount to be  
19 loaned at any one time pursuant to loan agreements then  
20 outstanding with public housing agencies.”.

21 UPGRADING MANAGEMENT AND SERVICES IN PUBLIC

22 HOUSING PROJECTS

23 SEC. 204. Section 15 of the United States Housing  
24 Act of 1937 is amended by adding at the end thereof the  
25 following new paragraph:

1       “(10) The Secretary is authorized to enter into con-  
2 tracts to make grants to public housing agencies to assist,  
3 where necessary, in financing tenant services for families  
4 living in low-rent housing projects. In making such contracts  
5 and grants, the Secretary shall give preference to programs  
6 providing for the maximum feasible participation of the  
7 tenants in the development and operation of such tenant  
8 services. There are authorized to be appropriated for the  
9 purposes of this paragraph not to exceed \$20,000,000 for  
10 the fiscal year ending June 30, 1969, and not to exceed  
11 \$40,000,000 for the fiscal year ending June 30, 1970. Any  
12 amounts so appropriated shall remain available until ex-  
13 pended, and any amounts authorized for any fiscal year under  
14 this paragraph but not appropriated may be appropriated for  
15 any succeeding fiscal year commencing prior to July 1,  
16 1970.”

17                   PURCHASE OF UNITS BY TENANTS

18       SEC. 205. Section 15 (9) of the United States Housing  
19 Act of 1937 is amended by striking out “which is suitable  
20 by reason of its detached or semidetached construction” and  
21 inserting in lieu thereof “, if the property to be acquired is  
22 sufficiently separable from other property retained by the  
23 public housing agency to make it suitable”.

24                   PUBLIC HOUSING IN INDIAN AREAS

25       SEC. 206. (a) Section 1 of the United States Housing  
26 Act of 1937 is amended by striking out “urban and rural

1 nonfarm” in the first sentence and inserting in lieu thereof  
 2 “urban, rural nonfarm, and Indian”.

3 (b) Section 10 (a) of such Act is amended by inserting  
 4 “or Indian” after “nonfarm” in the fourth proviso.

5 TITLE III—FEDERAL HOUSING ADMINISTRA-  
 6 TION INSURANCE OPERATIONS

7 MORTGAGE INSURANCE PREMIUMS FOR SERVICEMEN AND  
 8 THEIR WIDOWS

9 SEC. 301. Section 222 of the National Housing Act is  
 10 amended by—

11 (1) striking out “Secretary of the Treasury” each  
 12 place it appears and inserting in lieu thereof “Secretary  
 13 of Transportation”; and

14 (2) adding at the end thereof two new subsections  
 15 as follows:

16 “(f) The Secretary is authorized to transfer to this sec-  
 17 tion the insurance on any mortgage covering a single-family  
 18 dwelling or a one-family unit in a condominium project in-  
 19 sured under this Act, if the mortgage indebtedness thereof  
 20 has been assumed by a serviceman who at the time of as-  
 21 sumption is the owner of the property and either occupies the  
 22 property or certifies that his failure to do so is the result of  
 23 his military assignment, or, in the case of the United States  
 24 Coast Guard, other assignment.

25 “(g) Where a serviceman dies while on active duty in  
 26 the Armed Forces of the United States or in the United

1 States Coast Guard, leaving a surviving widow as owner of  
2 the property, the period of ownership (as such term is used  
3 in subsection (c) of this section) shall extend for two years  
4 beyond the date of the serviceman's death or until the date  
5 the widow disposes of the property, whichever date occurs  
6 first. The Secretary of Defense or the Secretary of Transpor-  
7 tation, as the case may be, shall notify such widow promptly  
8 following the serviceman's death of the additional costs to be  
9 borne by the mortgagor following termination of the two-  
10 year period."

11 SEASONAL HOMES

12 SEC. 302. Section 203 of the National Housing Act is  
13 amended by adding at the end thereof the following new  
14 subsection:

15 "(m) The Secretary is authorized to insure under this  
16 section any mortgage meeting the requirements of sub-  
17 section (b) of this section, except as modified by this  
18 subsection. To be eligible, the mortgage shall involve a  
19 principal obligation not in excess of \$15,000 and not in  
20 excess of 75 per centum of the appraised value of the prop-  
21 erty, as of the date the mortgage is accepted for insurance.  
22 The mortgage shall cover a dwelling for single-family occu-  
23 pancy which is approved for mortgage insurance prior to

1 the beginning of construction. The dwelling need not be  
2 designed for year-round occupancy, but it shall (1) meet  
3 standards prescribed by the Secretary, and (2) be located  
4 in an area where the Secretary finds it is not practicable to  
5 obtain conformity with many of the requirements essential  
6 to the insuring of mortgages on housing in built-up urban  
7 areas. The development of the property with respect to  
8 which the mortgage is executed shall be consistent with the  
9 conservation of water and other natural resources of the area,  
10 and such property shall be an acceptable risk, giving con-  
11 sideration to the economic potential of the area in which the  
12 dwelling is located and the contribution that the housing will  
13 make toward improving the area. The Secretary may sus-  
14 pend the issuance of commitments under this subsection for  
15 the insurance of mortgages secured by properties situated in  
16 any area, whenever he determines that (i) there is a serious  
17 and unusual shortage of mortgage funds for residential con-  
18 struction in such area, (ii) such insurance would affect ma-  
19 terially and adversely the availability of mortgage funds for  
20 residential construction in such area, and (iii) such suspen-  
21 sion would not have an adverse impact upon the balanced  
22 economic development of the area."

1       MODIFICATIONS IN TERMS OF INSURED MORTGAGES  
2                   COVERING MULTIFAMILY PROJECTS

3       SEC. 303. Title II of the National Housing Act is  
4 amended by adding after section 238 (as added by section  
5 104 of this Act) the following section:

6       “MODIFICATIONS IN TERMS OF INSURED MORTGAGES  
7                   COVERING MULTIFAMILY PROJECTS

8       “SEC. 239. (a) The Secretary shall not consent to any  
9 request for an extension of the time for curing a default under  
10 any mortgage covering multifamily housing, as defined in the  
11 regulations of the Secretary, or for a modification of the terms  
12 of such mortgage, except in conformity with regulations pre-  
13 scribed by the Secretary in accordance with the provisions  
14 of this section. Except as otherwise hereinafter provided, such  
15 regulations shall require as a condition to the granting of any  
16 such request, that, during the period of such extension or  
17 modification, any part of the rents or other funds derived by  
18 the mortgagor from the property covered by the mortgage  
19 which is not required to meet actual and necessary expenses  
20 arising in connection with the operation of such property,  
21 including amortization charges under the mortgage, be held  
22 in trust by the mortgagor and distributed only with the con-  
23 sent of the Secretary. In prescribing regulations under this  
24 section the Secretary may provide for the granting of con-  
25 sent to any request for an extension of the time for curing

1 a default under any mortgage covering multifamily housing,  
2 or for a modification of the terms of such mortgage, without  
3 regard to the foregoing requirement, in any case or class of  
4 cases in which an exemption from such requirement does not  
5 (as determined by the Secretary) jeopardize the interests  
6 of the United States.

7 “(b) Whoever, as an owner of a property which is  
8 security for a mortgage described in subsection (a), or as  
9 a stockholder of a corporation owning such property, or as  
10 a beneficial owner under any business organization or trust  
11 owning such property, or as an officer, director, or agent of  
12 any such owner, (1) willfully uses or authorizes the use of  
13 any part of the rents or other funds derived from property  
14 covered by such mortgage in violation of a regulation pre-  
15 scribed by the Secretary under subsection (a), or (2) if  
16 such mortgage is determined, as provided in subsection (a),  
17 to be exempt from the requirement of any such regulation  
18 or is not otherwise covered by such regulation, willfully and  
19 knowingly uses or authorizes the use, while such mortgage is  
20 in default, of any part of the rents or other funds derived from  
21 the property covered by such mortgage for any purpose other  
22 than to meet actual and necessary expenses arising in con-  
23 nection with such property (including amortization charges  
24 under the mortgage), shall be fined not more than \$5,000  
25 or imprisoned not more than three years, or both.”

1 CONDOMINIUMS

2 SEC. 304. (a) Section 234 (c) of the National Housing  
3 Act is amended by striking out “rental housing, and (3)”  
4 in the first sentence and inserting in lieu thereof the follow-  
5 ing: “rental housing: *Provided*, That a one-family unit in  
6 a multifamily project involving eleven or less units shall be  
7 eligible for insurance without having been covered by a proj-  
8 ect mortgage, and (3)”.

9 (b) Section 234 (c) of such Act is further amended by  
10 striking out “(iii) 75 per centum” in the third sentence,  
11 and inserting in lieu thereof “(iii) 80 per centum”.

12 (c) Section 234 (f) of such Act is amended by strik-  
13 ing out “five” and inserting in lieu thereof “four”.

14 INSURANCE OF LOANS FOR PURCHASE OF FEE SIMPLE

15 TITLE FROM LESSORS

16 SEC. 305. (a) Title II of the National Housing Act  
17 is amended by adding after section 239 (as added by sec-  
18 tion 303 of this Act) the following section:

19 “PURCHASE OF FEE SIMPLE TITLE FROM LESSORS

20 “SEC. 240. (a) The Secretary is authorized, upon such  
21 terms and conditions as he may prescribe, to make commit-  
22 ments to insure and to insure loans made by financial insti-  
23 tutions for the purpose of financing purchases by home-  
24 owners of the fee simple title to property on which their  
25 homes are located.

1 “(b) As used in this section—

2 “(1) the term ‘financial institution’ means a lender  
3 approved by the Secretary as eligible for insurance  
4 under section 2 or a mortgagee approved under section  
5 203 (b) (1) ; and

6 “(2) the term ‘homeowner’ means a lessee under a  
7 long-term ground lease,

8 “(c) To be eligible for insurance under this section, a  
9 loan shall—

10 “(1) relate to property on which there is located  
11 a dwelling designed principally for a one-, two-, three-,  
12 or four-family residence;

13 “(2) not exceed the cost of purchasing the fee  
14 simple title, or \$10,000 per family unit, whichever is  
15 the lesser;

16 “(3) be limited to an amount which when added  
17 to any outstanding indebtedness related to the property  
18 (as determined by the Secretary) creates a total out-  
19 standing indebtedness which does not exceed the mort-  
20 gage limits prescribed in section 203 (b) ;

21 “(4) bear interest at not to exceed such per centum  
22 per annum (not in excess of 6 per centum), on the  
23 amount of the principal obligation outstanding at any  
24 time, as the Secretary finds necessary to meet market

1 conditions, and such other charges (including such serv-  
2 ice charge, appraisal, inspection, and other fees) as may  
3 be approved by the Secretary;

4 “(5) have a maturity satisfactory to the Secretary,  
5 but not to exceed twenty years from the beginning of  
6 amortization of the loan or three-quarters of the remain-  
7 ing economic life of the home, whichever is the lesser;  
8 and

9 “(6) comply with such other terms, conditions, and  
10 restrictions as the Secretary may prescribe.

11 “(d) The provisions of paragraphs (3), (5), (6), (7),  
12 (8), and (10) of section 220 (h) shall be applicable to loans  
13 insured under this section and, as applied to loans insured  
14 under this section, references in those paragraphs to ‘home  
15 improvement loans’ and ‘this subsection’ shall be construed  
16 to refer to loans under this section.”

17 (b) Section 5 (c) of the Home Owners Loan Act of  
18 1933, as amended (12 U.S.C. 1464 (c) ), is amended by  
19 adding immediately before the last paragraph the following  
20 new paragraph:

21 “Notwithstanding any other provisions of this subsec-  
22 tion, an association may invest in loans or obligations, or in-  
23 terests therein, as to which the association has the benefit of

1 insurance under section 240 of the National Housing Act, or  
 2 of a commitment or agreement therefor, and such invest-  
 3 ments shall not be included in any percentage of assets or  
 4 other percentage referred to in this subsection.”

5 EXTEND SECTION 221(d)(2) SALES HOUSING PROGRAM FOR  
 6 TWO-, THREE-, AND FOUR-FAMILY RESIDENCES TO ALL  
 7 LOW AND MODERATE INCOME FAMILIES

8 SEC. 306. Section 221 (d) (2) of the National Housing  
 9 Act is amended by striking out “a displaced family” at the  
 10 end of the first proviso and inserting in lieu thereof “the  
 11 mortgagor”.

12 REMOVE DIVIDEND RESTRICTION FOR NONDWELLING FACIL-  
 13 ITIES IN SECTION 221 PROJECTS

14 SEC. 307. Section 221 (f) of the National Housing Act  
 15 is amended by striking out in the first sentence all that fol-  
 16 lows the word “mortgage” in the proviso and inserting in  
 17 lieu thereof “: *Provided further*, That, in the case of a mort-  
 18 gage which bears interest at the below-market interest rate  
 19 prescribed in the proviso of subsection (d) (5), the provi-  
 20 sions of section 220 (d) (3) (B) (iv) shall only apply if the  
 21 mortgagor waives the right to receive dividends on its equity  
 22 investment in the portion thereof devoted to commercial  
 23 facilities.”

1 SUPPLEMENTAL LOAN PROGRAM FOR PROJECTS FINANCED  
2 WITH FHA INSURED MORTGAGES

3 SEC. 308. Title II of the National Housing Act is  
4 amended by adding after section 240 (as added by section  
5 305 of this Act) the following new section:

6 "SUPPLEMENTAL LOANS FOR MULTIFAMILY PROJECTS  
7 "SEC. 241. (a) With respect to a multifamily project  
8 or group practice facility covered by a mortgage insured  
9 under any section or title of this Act, the Secretary is author-  
10 ized, upon such terms and conditions as he may prescribe, to  
11 make commitments to insure, and to insure, supplemental  
12 loans (including advances during construction or improve-  
13 ment) made by financial institutions approved by the Secre-  
14 tary. As used in this section, 'supplemental loan' means a  
15 loan, advance of credit, or purchase of an obligation repre-  
16 senting a loan or advance of credit made for the purpose of  
17 financing improvements or additions to such project: *Pro-*  
18 *vided*, That a loan involving a nursing home covered by a  
19 mortgage insured under section 232 or a loan involving a  
20 group practice facility covered by a mortgage insured under  
21 title XI may also be made for the purpose of financing equip-  
22 ment to be used in the operation of such nursing home or  
23 facility.

24 "(b) To be eligible for insurance under this section, a  
25 supplemental loan shall—

1           “(1) be limited to 90 per centum of the amount  
2       which the Secretary estimates will be the value of such  
3       improvements, additions, and equipment, except that  
4       such amount, when added to the outstanding balance  
5       of the mortgage covering the project or facility, shall  
6       not exceed the maximum mortgage amount insurable  
7       under the section or title pursuant to which the mortgage  
8       covering such project or facility is insured;

9           “(2) have a maturity satisfactory to the Secretary  
10      but not to exceed the remaining term of the mortgage;

11          “(3) bear interest (exclusive of premium charges  
12      for insurance and service charges, if any) at not to ex-  
13      ceed such per centum per annum (not in excess of 6 per  
14      centum), on the amount of the principal obligation out-  
15      standing at any time, as the Secretary finds necessary to  
16      meet market conditions;

17          “(4) be secured in such manner as the Secretary  
18      may require;

19          “(5) be governed by the labor standards provisions  
20      of section 212 that are applicable to the section or title  
21      pursuant to which the mortgage covering the project  
22      or facility is insured; and

23          “(6) contains such other terms, conditions, and  
24      restrictions as the Secretary may prescribe.

1       “(c) The provisions of subsections (d), (e), (g),  
 2       (h), (i), (j), (k), (l), and (n) of section 207 shall be  
 3       applicable to loans insured under this section, except that  
 4       (1) all references to the term ‘mortgage’ shall be construed  
 5       to refer to the term ‘loan’ as used in this section, (2) loans  
 6       involving projects covered by a mortgage insured under  
 7       section 213 that is the obligation of the Cooperative Manage-  
 8       ment Housing Insurance Fund shall be insured under and  
 9       shall be the obligation of such fund, and (3) loans involving  
 10      projects covered by a mortgage insured under section 236  
 11      shall be insured under and shall be the obligation of the Spe-  
 12      cial Risk Insurance Fund.”

13      HOME IMPROVEMENT LOANS—INCREASE IN MAXIMUM  
 14      MATURITY, FINANCE CHARGE, AND LOAN AMOUNT

15      SEC. 309. Section 2 (b) of the National Housing Act is  
 16      amended by—

17               (1) striking out “\$3,500” and inserting in lieu  
 18               thereof “\$5,000”;

19               (2) striking out “five years” and inserting in lieu  
 20               thereof “seven years”;

21               (3) striking out “\$5 discount” and inserting in lieu  
 22               thereof “\$5.50 discount”; and

(4) striking out "\$4 discount" and inserting in lieu thereof "\$4.50 discount".

#### EXPERIMENTAL HOUSING PROGRAM

SEC. 310. Section 233 of the National Housing Act is amended by—

(1) striking out "of this title" immediately before the semicolon in subsection (b) and inserting in lieu thereof "or titles of this Act"; and

(2) striking out "of this title" in subsection (e) and inserting in lieu thereof "or title of this Act".

#### TERM OF FEDERAL HOUSING ADMINISTRATION MORTGAGES

#### FOR LAND DEVELOPMENT

SEC. 311. Section 1002 (d) (1) of the National Housing Act is amended—

(1) by striking out "seven" and inserting in lieu thereof "ten"; and

(2) by striking out the semicolon and inserting in lieu thereof the following: "*Provided*, That the Secretary may agree to a reasonable extension of the term of a mortgage, the maturity of which is limited by this paragraph to not more than ten years, if he determines that unusual or unforeseen circumstances

1        make such extension necessary to avoid undue hardship  
2        to the mortgagor;”.

3 REHABILITATED MULTIFAMILY PROJECTS IN URBAN RE-  
4 NEWAL AREAS

5        SEC. 312. (a) Section 220 (d) (3) (B) (ii) of the  
6 National Housing Act is amended by inserting immediately  
7 preceding the semicolon at the end thereof “: *Provided*  
8 *further*, That the mortgage may involve the financing of the  
9 purchase of property which has been rehabilitated by a local  
10 public agency with Federal assistance pursuant to section  
11 110 (c) (8) of the Housing Act of 1949, and, in such case,  
12 the foregoing limitations upon the amount of the mortgage  
13 shall be based upon the appraised value of the property as  
14 of the date the mortgage is accepted for insurance”.

(b) Section 221 (d) (3) (iii) of the National Housing Act is amended by inserting immediately preceding the colon at the end of the first proviso “: *Provided further*, That the mortgage may involve the financing of the purchase of property which has been rehabilitated by a local public agency with Federal assistance pursuant to section 110 (c) (8) of the Housing Act of 1949, and, in such case, the amount of the mortgage shall not exceed the appraised value of the property as of the date the mortgage is accepted for insurance”.

## 1 MISCELLANEOUS HOUSING INSURANCE

2 SEC. 313. (a) Section 223 of the National Housing Act  
3 is amended by—

4 (1) striking out that part of the text of subsection  
5 (a) which precedes the first numbered paragraph and  
6 inserting in lieu thereof the following: “Notwithstanding  
7 any of the provisions of this Act and without regard to  
8 limitations upon eligibility contained in any section or  
9 title of this Act, the Secretary is authorized, upon appli-  
10 cation by the mortgagee, to insure or make commitments  
11 to insure under any section or title of this Act any  
12 mortgage—”;

13 (2) striking out in the first and second provisos of  
14 subsection (a) (7) “applicable to loans insured under  
15 section 203, 207, 213, 220, 221, 222, 231, 232, or  
16 233, as the case may be” and inserting in lieu thereof  
17 “prescribed under the applicable section or title of this  
18 Act”;

19 (3) striking out in subsection (c) each time it  
20 appears “this title” and inserting in lieu thereof “this  
21 Act”;

22 (4) striking out in subsection (c) “title I, title II,  
23 title VI, title VII, title VIII, or title IX” and in-

1       serting in lieu thereof "any section or title of this  
2       Act"; and

3           (5) striking out at the end of subsection (c)  
4       "(except that in any case the payment of insurance  
5       shall be in debentures)".

6       (b) Section 223 (d) of such Act is amended by striking  
7       out all that follows "as he may prescribe," and inserting in  
8       lieu thereof the following: "insure under the same section  
9       as the original mortgage a loan by the mortgagee in an  
10      amount not exceeding the excess of the foregoing expenses  
11      over the project income. Such loan shall (1) bear interest  
12      (exclusive of premium charges for insurance) at not to  
13      exceed the per centum per annum currently permitted for  
14      mortgages insured under the section under which it is to  
15      be insured, (2) be secured in such manner as the Secretary  
16      shall require, and (3) be limited to a term not exceeding  
17      the unexpired term of the original mortgage. The Secretary  
18      is authorized to collect a premium charge for insurance of  
19      loans pursuant to this subsection in an amount computed at  
20      the same premium rate as is applicable to the original  
21      mortgage. This premium shall be payable in cash or in  
22      debentures of the insurance fund under which the loan is  
23      insured at par plus accrued interest. In the event of a failure  
24      of the borrower to make any payment due under such loan  
25      or under the original mortgage, both the loan and original

1 mortgage shall be considered in default, and if such default  
2 continues for a period of thirty days, the lender shall be  
3 entitled to insurance benefits, computed in the same manner  
4 as for the original mortgage, except that in determining the  
5 interest rate under section 224 for the debentures repre-  
6 senting the portion of the claim applicable to the loan, the  
7 date of the commitment to insure the loan and the insurance  
8 date of the loan shall be taken into consideration rather than  
9 the commitment or insurance date for the original mortgage.”

10 SUPPLEMENTARY LOANS FOR COOPERATIVE HOUSING PUR-  
11 CHASED FROM THE FEDERAL GOVERNMENT

12 SEC. 314. Section 213 (j) of the National Housing Act  
13 is amended by—

14 (1) inserting after the first sentence of paragraph  
15 (1) the following sentence: “The Secretary is further  
16 authorized to make commitments to insure and to insure  
17 supplementary cooperative loans (including advances  
18 during construction or improvement) with respect to  
19 any property purchased from the Federal Government  
20 by a nonprofit corporation or trust of the character  
21 described in paragraph (1) of subsection (a), if the  
22 property is covered by an uninsured mortgage repre-  
23 senting a part of the purchase price.”; and

24 (2) adding before the semicolon at the end of par-  
25 agraph (2) (B) the following: “, except that, in the

1 case of repairs or improvements to a property covered by  
2 an uninsured mortgage dated more than twenty years  
3 prior to the date of the commitment to insure, of such  
4 magnitude that the Secretary deems them to be a major  
5 rehabilitation or modernization of such property, the loan  
6 may have a maturity date up to ten years in excess of  
7 the remaining term of the uninsured mortgage”:

8 **EQUIPMENT IN NURSING HOMES**

9 SEC. 315. Section 232 of the National Housing Act is  
10 amended by—

11 (1) striking out the text of subsection (b) (2) and  
12 inserting in lieu thereof the following:

13 “(2) the term ‘mortgage’ means a first mortgage  
14 on real estate in fee simple, or on the interest of either  
15 the lessor or lessee thereof (A) under a lease for not  
16 less than ninety-nine years which is renewable, or (B)  
17 under a lease having a period of not less than fifty years  
18 to run from the date the mortgage was executed. The  
19 term ‘first mortgage’ means such classes of first liens as  
20 are commonly given to secure advances (including but  
21 not limited to advances during construction), on, or the  
22 unpaid purchase price of, real estate under the laws of  
23 the State in which the real estate is located, together  
24 with the credit instrument or instruments, if any, secured  
25 thereby, and any mortgage may be in the form of one or

1 more trust mortgages or mortgage indentures or deeds  
 2 of trust, securing notes, bonds, or other credit instru-  
 3 ments, and, by the same instrument or by a separate  
 4 instrument, may create a security interest in initial  
 5 equipment, whether or not attached to the realty. The  
 6 term 'mortgagor' shall have the meaning set forth in  
 7 section 207 (a) of this Act.";

8 (2) striking out the text in subsection (d) which  
 9 precedes the first numbered clause and inserting in lieu  
 10 thereof the following:

11 "(d) In order to carry out the purposes of this  
 12 section, the Secretary is authorized to insure any  
 13 mortgage which covers a new or rehabilitated nursing  
 14 home, including equipment to be used in its operation,  
 15 subject to the following conditions:"; and

16 (3) striking out "when the proposed improvements  
 17 are completed" before the period at the end of subsection  
 18 (d) (2) and inserting in lieu thereof the following:  
 19 ", including equipment to be used in the operation of the  
 20 nursing home, when the proposed improvements are  
 21 completed and the equipment is installed".

## 22 PROGRAMS

23 SEC. 316. Section 3 (a) of the Act entitled "An Act to  
 24 amend chapter 37 of title 38 of the United States Code with

1 respect to the veterans' home loan program, to amend the  
 2 National Housing Act with respect to interest rates on insured  
 3 mortgages, and for other purposes'', approved May 7, 1968,  
 4 is amended by inserting "235 (j) (2) (C), 240 (c) (4), 241  
 5 (b) (3)," after "234 (f),".

6 SALE OF REHABILITATED UNITS IN MULTIFAMILY  
 7 STRUCTURES

8 SEC. 317. (a) Section 221 (h) (2) (A) of the National  
 9 Housing Act is amended to read as follows:

10 "(A) be executed by a private nonprofit cor-  
 11 poration or association, approved by the Secretary,  
 12 for financing the purchase and rehabilitation (with the  
 13 intention of subsequent resale) of property comprising  
 14 one or more tracts or parcels, whether or not contiguous,  
 15 upon which there is located deteriorating or substandard  
 16 housing consisting of (i) four or more single-family  
 17 dwellings or detached, semidetached, or row construc-  
 18 tion, or (ii) four or more one-family units in a structure  
 19 or structures for which a plan of family unit ownership  
 20 approved by the Secretary is established;"

21 (b) Section 221 (h) of such Act is amended by adding  
 22 at the end thereof a new paragraph as follows:

23 "(6) Where the Secretary has approved a plan of  
 24 family unit ownership, the terms 'single-family dwelling',  
 25 'single-family dwellings', 'individual dwelling', and 'indi-

1   vidual dwellings' shall mean a family unit or family units,  
2   together with the undivided interest (or interests) in the  
3   common areas and facilities."

4   **TITLE IV—GUARANTEES FOR FINANCING NEW**  
5         **COMMUNITY LAND DEVELOPMENT**

6                     **CITATION**

7         **SEC. 401.** This title may be referred to as the "New  
8   Communities Act of 1968".

9                     **PURPOSE**

10         **SEC. 402.** It is the purpose of this title, by facilitating  
11   the enlistment of private capital in new community develop-  
12   ment, to encourage the development of new communities  
13   that—

14             (1) contribute to the general betterment of living  
15   conditions through the improved quality of community  
16   development made possible by a consistent design for  
17   the provision of homes, commercial and industrial facili-  
18   ties, public and community facilities, and open spaces;

19             (2) make substantial contributions to the sound  
20   and economic growth of the areas in which they are  
21   located;

22             (3) provide needed additions to the general housing  
23   supply;

24             (4) provide opportunities for innovation in hous-

1       ing and community development technology and in land  
2       use planning;

3           (5) enlarge housing and employment opportunities  
4       by increasing the range of housing choice and providing  
5       new investment opportunities for industry and com-  
6       merce; and

7           (6) encourage the maintenance and growth of a  
8       diversified local homebuilding industry.

9                           GUARANTEE AUTHORITY

10       SEC. 403. To carry out the purposes of this title the  
11       Secretary is authorized to guarantee, and enter into commit-  
12       ments to guarantee, the bonds, debentures, notes, and other  
13       obligations issued by new community developers to help fi-  
14       nance new community development projects. The Secretary  
15       may make such guarantees and enter into such commitments,  
16       subject to the limitations contained in sections 404 and 405,  
17       upon such terms and conditions as he may prescribe, taking  
18       into account (1) the large initial capital investment required  
19       to finance sound new communities, (2) the extended period  
20       before initial returns on this type of investment can be ex-  
21       pected, (3) the irregular pattern of cash returns characteris-  
22       tic of such investment, and (4) the financial and security in-  
23       terests of the United States in connection with guarantees  
24       made under this title.

## 1            ELIGIBLE NEW COMMUNITY DEVELOPMENT

2            SEC. 404. No guarantee or commitment to guarantee  
3 may be made under this title unless the Secretary has de-  
4 termined that—

5            (1) the proposed new community (A) will be  
6 economically feasible in terms of economic base or po-  
7 tential for growth, and (B) will contribute to the  
8 orderly growth and development of the area of which it  
9 is a part;

10           (2) there is a practicable plan (including appropri-  
11 ate time schedules) for financing the land acquisition and  
12 land development costs of the proposed new community  
13 and for improving and marketing the land which, giving  
14 due consideration to the public purposes of this title and  
15 the special problems involved in financing new com-  
16 munities, represents an acceptable financial risk to the  
17 United States;

18           (3) there is a sound internal development plan for  
19 the new community which (A) has received all govern-  
20 mental approvals required by State or local law or by  
21 the Secretary: and (B) is acceptable to the Secretary as  
22 providing reasonable assurance that the development  
23 will contribute to good living conditions in the area being  
24 developed, will be characterized by sound land use pat-

1       terns, will include a proper balance of housing for fami-  
2       lies of low and moderate income, and will include or  
3       be served by such shopping, school, recreational, trans-  
4       portation, and other facilities as the Secretary deems  
5       satisfactory; and

6               (4) the internal development plan is consistent with  
7       a comprehensive plan which covers, or with comprehen-  
8       sive planning being carried on for, the area in which the  
9       land is situated, and which meets criteria established by  
10      the Secretary for such comprehensive plans or planning.

11                               ELIGIBLE OBLIGATIONS

12      SEC. 405. (a) Any bond, debenture, note or other obli-  
13      gation guaranteed under this title shall—

14               (1) be issued by a new community developer, other  
15      than a public body, approved by the Secretary on the  
16      basis of financial, technical and administrative ability  
17      which demonstrates his capacity to carry out the pro-  
18      posed project;

19               (2) be issued to and held by investors approved  
20      by, or meeting requirements prescribed by, the Secre-  
21      tary, or if an offering to the public is contemplated, be  
22      underwritten upon terms and conditions approved by  
23      the Secretary;

24               (3) be issued to finance a program of land devel-  
25      opment (including acquisition or use of land) approved

1 by the Secretary: *Provided*, That the Secretary shall,  
2 through cost certification procedures, escrow or trustee-  
3 ship requirements, or other means, insure that all pro-  
4 ceeds from the sale of obligations guaranteed under this  
5 title are expended pursuant to such program;

6 (4) involve a principal obligation in an amount  
7 not to exceed the lesser of (A) 80 per centum of the  
8 Secretary's estimate of the value of the property upon  
9 completion of the land development or (B) the sum  
10 of 75 per centum of the Secretary's estimate of the  
11 value of the land before development and 90 per centum  
12 of his estimate of the actual cost of the land development;

13 (5) bear interest at a rate satisfactory to the Sec-  
14 retary, such interest to be exclusive of any service  
15 charges and fees that may be approved by the Secretary;

16 (6) contain repayment and maturity provisions sat-  
17 isfactory to the Secretary; and

18 (7) contain provisions which the Secretary shall  
19 prescribe with respect to the protection of the security  
20 interests of the United States (including subrogation pro-  
21 visions), liens and releases of liens, payment of taxes,  
22 and such other matters as the Secretary may, in his dis-  
23 cretion, prescribe.

24 (b) The outstanding principal obligations guaranteed

1 under this title with respect to a single new community  
2 development project shall at no time exceed \$50,000,000.

3 FEES AND CHARGES

4 SEC. 406. The Secretary is authorized to establish and  
5 collect fees for guarantees made under this title and may  
6 make such charges as he considers reasonable for the analy-  
7 sis of development and financing plans and for appraisals  
8 and inspections related to new community development proj-  
9 ects. On or before January 1, 1970, the Secretary shall  
10 make a report to the Congress concerning the fees and other  
11 charges under this title that he estimates will be adequate to  
12 provide income sufficient for a self-supporting program.

13 GUARANTEE FUND

14 SEC. 407. (a) To provide for the payment of any lia-  
15 bilities incurred as a result of guarantees made under this  
16 title, the Secretary is authorized to establish a revolving fund  
17 which shall be comprised of (1) receipts from fees and  
18 charges; (2) recoveries under security or subrogation rights  
19 or other rights, and any other receipts obtained in connection  
20 with such guarantees; and (3) such sums, which are hereby  
21 authorized to be appropriated, as may be required for pro-  
22 gram operations and nonadministrative expenses and to make  
23 any and all payments guaranteed under this title.

24 (b) The full faith and credit of the United States is

1 pledged to the payment of all guarantees made under this  
2 title with respect to both principal and interest, including  
3 (1) interest, as may be provided for in the guarantee,  
4 accruing between the date of default under a guaranteed  
5 obligation and the payment in full of the guarantee, and (2)  
6 principal and interest due under any debentures issued by  
7 the Secretary toward payment of guarantees made under  
8 this title.

9 (c) Notwithstanding any other provision of law relating  
10 to the acquisition, handling, improvement, or disposal of real  
11 and other property by the United States, the Secretary shall  
12 have power, for the protection of the interests of the guaran-  
13 tee fund authorized under this section, to pay out of such  
14 fund all expenses or charges in connection with the acqui-  
15 sition, handling, improvement, or disposal of any property  
16 acquired by him under this title; and notwithstanding any  
17 other provision of law, the Secretary shall also have power to  
18 pursue to final collection by way of compromise or other-  
19 wise all claims acquired by him in connection with any se-  
20 curity, subrogation, or other rights obtained by him in carry-  
21 ing out this title.

22 (d) The aggregate of the outstanding principal obliga-  
23 tions guaranteed under this title shall at no time exceed  
24 \$500,000,000.

## INCONTESTABILITY

SEC. 408. Any guarantee made by the Secretary under this title shall be conclusive evidence of the eligibility of the obligations for such guarantee, and the validity of any guarantee so made shall be incontestable in the hands of a qualified holder of the guaranteed obligation except for fraud or material misrepresentation on the part of such holder.

## ENCOURAGEMENT OF SMALL BUILDERS

SEC. 409. The Secretary shall adopt such requirements as he deems necessary to assure that new community construction assisted under this title will encourage the maintenance of a diversified local homebuilding industry and broad participation by builders, particularly small builders.

## LABOR

SEC. 410. All laborers and mechanics employed by contractors or subcontractors in land development assisted under section 403 shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a—276a-5). No assistance shall be extended under section 403 for land development without first obtaining adequate assurance that these labor standards will be maintained upon the construction work involved in such development. The Secretary of Labor shall have, with respect to the labor standards specified

1 in this section, the authority and functions set forth in Reor-  
2 ganization Plan Numbered 14 of 1950 (64 Stat. 1267), and  
3 section 2 of the Act of June 13, 1934 (40 U.S.C. 276c).

#### 4 REAL PROPERTY TAXATION

5 SEC. 411. Nothing in this title shall be construed to  
6 exempt any real property that may be acquired and held by  
7 the Secretary as a result of the exercise of lien or subroga-  
8 tion rights from real property taxation to the same extent,  
9 according to its value, as other real property is taxed.

#### 10 SUPPLEMENTARY GRANTS

11 SEC. 412. (a) The Secretary is authorized to make  
12 supplementary grants to State and local public bodies and  
13 agencies carrying out new community assistance projects,  
14 as defined in section 415(c), if the Secretary determines  
15 that such grants are necessary or desirable for carrying out  
16 a new community development project approved for assist-  
17 ance under section 403, and that a substantial number of  
18 housing units for low and moderate income persons is to be  
19 made available through such development project.

20 (b) In no case shall any grant under this section exceed  
21 20 per centum of the cost of the new community assistance  
22 project for which the grant is made; and in no case shall the  
23 total Federal contributions to the cost of such project be  
24 more than 80 per centum.

1       (c) In carrying out his authority under this section the  
2 Secretary shall consult with the Secretary of Agriculture  
3 with respect to new community assistance projects assisted  
4 by that Department, and he shall, for the purpose of sub-  
5 section (b), accept that Department's certifications as to  
6 the cost of such projects.

7       (d) There are authorized to be appropriated for grants  
8 under this section not to exceed \$5,000,000 for the fiscal year  
9 ending June 30, 1969, and not to exceed \$25,000,000 for  
10 the fiscal year ending June 30, 1970. Any amounts so  
11 appropriated shall remain available until expended, and any  
12 amounts authorized for any fiscal year under this subsection  
13 but not appropriated may be appropriated for any succeeding  
14 fiscal year commencing prior to July 1, 1970.

15       GENERAL PROVISIONS AND RULES AND REGULATIONS

16       SEC. 413. In the performance of, and with respect to,  
17 the functions, powers, and duties vested in him by this title,  
18 the Secretary shall (in addition to any authority otherwise  
19 vested in him) have the functions, powers, and duties (in-  
20 cluding the authority to issue rules and regulations) set  
21 forth in section 402, except subsections (c) (2), (d), and  
22 (f), of the Housing Act of 1950: *Provided*, That subsec-  
23 tion (a) (1) of section 402 shall not apply with respect to  
24 functions, powers, and duties under section 412 of this title.

## 1           AUDIT BY GENERAL ACCOUNTING OFFICE

2           SEC. 414. The financial transactions of recipients of Fed-  
3 eral grants or developers whose obligations are guaranteed  
4 by the United States pursuant to this title may be audited by  
5 the General Accounting Office under such rules and regula-  
6 tions as may be prescribed by the Comptroller General of the  
7 United States. The representatives of the General Accounting  
8 Office shall have access to all books, accounts, records, re-  
9 ports, files, and all other papers, things, or property belong-  
10 ing to or in use by such developers or recipients of grants  
11 pertaining to their financial transactions and necessary to  
12 facilitate the audit.

## 13                           DEFINITIONS

14           SEC. 415. As used in this title—

15           (a) The term “land development” means the process  
16 of grading land, making, installing, or constructing water  
17 lines and water supply installations, sewer lines and sewage  
18 disposal installations, steam, gas, and electric lines and in-  
19 stallations, roads, streets, curbs, gutters, sidewalks, storm  
20 drainage facilities, and other installations or work, whether  
21 on or off the site, which the Secretary deems necessary or  
22 desirable to prepare land for residential, commercial, indus-  
23 trial, or other uses, or to provide facilities for public or com-  
24 mon use. The term “land development” shall not include any

1 building unless it is (1) a building which is needed in con-  
2 nection with a water supply or sewage disposal installation  
3 or a steam, gas, or electric line or installation, or (2) a  
4 building, other than a school, which is to be owned and  
5 maintained jointly by the residents of the new community  
6 or is to be transferred to public ownership, but not prior  
7 to its completion.

8 (b) The term "actual costs" means the costs (exclu-  
9 sive of rebates or discounts) incurred by a new community  
10 developer in carrying out the land development assisted  
11 under this title. These costs may include amounts paid for  
12 labor, materials, construction contracts, land planning, engi-  
13 neers' and architects' fees, surveys, taxes, and interest dur-  
14 ing development, organizational and legal expenses, such  
15 allocation of general overhead expenses as are acceptable to  
16 the Secretary, and other items of expense incidental to devel-  
17 opment which may be approved by the Secretary. If the  
18 Secretary determines that there is an identity of interest  
19 between the new community developer and a contractor,  
20 there may be included as a part of actual costs an allowance  
21 for the contractor's profit in an amount deemed reasonable  
22 by the Secretary.

23 (c) The term "new community assistance projects"  
24 means projects assisted by grants made under section 702  
25 of the Housing and Urban Development Act of 1965, sec-

1 tion 306 (a) (2) of the Consolidated Farmers' Home Admin-  
2 istration Act, or title VII of the Housing Act of 1961.

3 CONFORMING AMENDMENTS

4 SEC. 416. (a) Section 202 (b) (4) of the Housing  
5 Amendments of 1955 is amended by adding before the  
6 period at the end of the second sentence "or under title IV  
7 of the Housing and Urban Development Act of 1968".

8 (b) The first paragraph of section 24 of the Federal  
9 Reserve Act is amended by striking out all that follows  
10 "national banking association" in the fourth sentence and  
11 adding "may make loans or purchase obligations for land  
12 development which are secured by mortgages insured under  
13 title X of the National Housing Act or guaranteed under  
14 title IV of the Housing and Urban Development Act of  
15 1968."

16 (c) The next to last paragraph of section 5 (c) of the  
17 Home Owners' Loan Act of 1933 is amended by adding at  
18 the end thereof the following new sentence: "Without regard  
19 to any other provision of this subsection, an association may  
20 invest in loans or obligations, or interests therein, as to which  
21 the association has the benefit of any guaranty under title IV  
22 of the Housing and Urban Development Act of 1968 as now  
23 or hereafter in effect, or of a commitment or agreement there-  
24 for, and such investments shall not be included in any per-

1 centage of assets or other percentage referred to in this  
2 subsection.”

3 TITLE V—URBAN RENEWAL

4 SEC. 501. (a) Title I of the Housing Act of 1949 is  
5 amended by adding after the title heading the following new  
6 subheading:

7 “PART A—URBAN RENEWAL PROJECTS, DEMOLITION PRO-  
8 GRAMS, AND CODE ENFORCEMENT PROGRAMS”

9 (b) Title I of such Act is further amended by adding at  
10 the end thereof the following new part:

11 “PART B—NEIGHBORHOOD DEVELOPMENT PROGRAMS

12 “PURPOSE AND AUTHORITY

13 “SEC. 131. (a) To facilitate more rapid renewal and  
14 development of urban areas on an effective scale, and to en-  
15 courage more efficient and flexible utilization of public and  
16 private development opportunities by local communities in  
17 such areas, the Secretary is authorized to make financial as-  
18 sistance available under this title to local public agencies  
19 for undertakings and activities which are carried out under a  
20 neighborhood development program approved by him pur-  
21 suant to this part.

22 “(b) A neighborhood development program shall con-  
23 sist of urban renewal project undertakings and activities in  
24 one or more urban renewal areas which are planned and  
25 carried out on the basis of annual increments in accordance

1 with the provisions of this title for planning and carrying out  
2 urban renewal projects, except as modified by the provisions  
3 of this part.

4 “(c) No application for financial assistance in planning  
5 and carrying out a neighborhood development program shall  
6 be approved by the Secretary unless—

7 “(1) the governing body of the locality has, by  
8 resolution or ordinance, approved the proposed program  
9 and the annual increment covered by the application  
10 and authorized the filing of the application for financial  
11 assistance; and

12 “(2) the Secretary has concluded that there is the  
13 necessary capacity to carry out the undertakings and  
14 activities included under the program.

15 “FINANCIAL PROVISIONS

16 “SEC. 132. (a) Upon the approval of a neighborhood  
17 development program by the Secretary, the cost of any under-  
18 takings and activities authorized as part of the program shall  
19 be financed in accordance with the loan, capital grant, and  
20 project cost provisions of part A, except:

21 “(1) net project cost may be calculated on the basis  
22 of costs incurred and proceeds derived for the account  
23 of the program during a specified twelve-month period,  
24 and may be recalculated for succeeding periods of twelve

1 months to reflect additional costs and additional proceeds  
2 since the date of the last computation or recomputation;  
3 and

4 “(2) if property has been acquired but not disposed  
5 of prior to the computation or recomputation of net proj-  
6 ect cost, temporary loans made or secured under this title  
7 to finance undertakings or activities included in the pro-  
8 gram may remain outstanding until the property has  
9 been disposed of and the proceeds thereof, together with  
10 additional funds becoming available to the program, are  
11 sufficient to permit repayment of the loans.

12 “(b) In the event that gross project cost as computed  
13 for a specified twelve-month period is exceeded, with respect  
14 to that period, by the sum of (1) the sales price of land  
15 or other property sold, and (2) the imputed capital value  
16 of land or other property leased or retained by the local  
17 public agency in accordance with the provisions of the urban  
18 renewal plan, the local public agency shall pay to the  
19 Secretary two-thirds of the excess (or three-fourths in the  
20 case of a program on a three-fourths grant basis), which  
21 amount shall be available to the Secretary for grant payments  
22 under section 103.

23 “LOCAL GRANTS-IN-AID

24 “SEC. 133. (a) For the purpose of determining the  
25 eligibility of local grants-in-aid in connection with under-

1 takings and activities carried out under a neighborhood  
2 development program, the three-year period referred to in  
3 section 110 (d) shall be deemed to be a period of three  
4 years prior to the authorization by the Secretary of the  
5 first contract for financial assistance under the program which  
6 includes the urban renewal area which is benefited by the  
7 public improvement or facility for which credit is claimed;  
8 and the seven-year period referred to in clause (1) of sec-  
9 tion 112 (b) shall be deemed to be a period of seven years  
10 prior to the date of authorization by the Secretary of the  
11 first contract for financial assistance under the program which  
12 includes the urban renewal area which is benefited by the  
13 expenditures for which credit is claimed.

14 “(b) No portion of the cost of a public improvement or  
15 public facility (to the extent otherwise eligible) may be in-  
16 cluded as a local grant-in-aid in computing the gross project  
17 cost of an approved program for any twelve-month period—

18 “(1) prior to commencement of construction of the  
19 improvement or facility, or

20 “(2) in excess of the amount actually expended or  
21 obligated by contract.

22 “(c) The provisions of section 104 with respect to the  
23 pooling of local grants-in-aid among the various projects  
24 undertaken by a local public agency shall not be applicable  
25 with respect to any excess local grants-in-aid resulting from

1 the urban renewal projects contained in a neighborhood de-  
2 velopment program.

3 "GENERAL PROVISIONS

4 "SEC. 134. (a) For purposes of this part—

5 " (1) the workable program requirement in section  
6 101 (c) shall apply to the authorization, rather than the  
7 execution, of any contract for loans or capital grants;

8 " (2) capital grants on a three-fourths basis may  
9 only be made under section 103 (a) (2) (B) ;

10 " (3) the relocation requirements specified in sec-  
11 tion 105 (c) shall apply to each annual increment of an  
12 approved program;

13 " (4) section 106 (g) (relating to transient hous-  
14 ing) shall apply to activities undertaken under approved  
15 programs, except that the determination as to need for  
16 transient housing shall be made with respect to any sale  
17 or lease of land for construction of such housing prior to  
18 such sale or lease; and

19 " (5) the requirement concerning demolition and  
20 removal of buildings and improvements stated in clause  
21 (A) of the sentence following paragraph (10) of sec-  
22 tion 110 (c) shall apply to each annual increment of an  
23 approved program.

24 " (b) The approval by the Secretary of financial assist-

1   ance for one or more annual increments of a neighborhood  
2   development program shall not be considered as obligating  
3   him to provide financial assistance for any subsequent annual  
4   increments.

5       “(c) The urban renewal plan referred to in section 110  
6   (b) may cover one or more of the urban renewal areas cov-  
7   ered by a neighborhood development program and such plan  
8   may be modified from time to time to cover additional urban  
9   renewal areas added to the program. The Secretary may  
10   establish such requirements, as he deems appropriate, pre-  
11   scribing the scope and content of such plan, taking into con-  
12   sideration, among other matters, the degree of detail needed  
13   in the plan to properly and expeditiously carry out the activi-  
14   ties and undertakings proposed in any annual increment of a  
15   neighborhood development program.”

16                   INCREASED   AUTHORIZATION

17       SEC. 502. (a) Section 103 (b) of the Housing Act  
18   of 1949 is amended by striking out in the first sentence  
19   everything after “exceed” and inserting in lieu thereof “\$7,-  
20   600,000,000, which amount shall be increased by \$1,400,-  
21   000,000 on July 1, 1969.”

22       (b) Section 103 (b) of such Act is further amended by  
23   striking out “\$250,000,000” in the second sentence and in-  
24   serting in lieu thereof “\$600,000,000”.

## REHABILITATION GRANTS

1  
2 SEC. 503. (a) The second sentence of section 115 (a)  
3 of the Housing Act of 1949 is amended by striking out the  
4 words "a structure" and "structure" and inserting in lieu  
5 thereof "real property".

6 (b) Section 115 (b) of such Act is amended by striking  
7 out "\$1,500" and inserting in lieu thereof "\$2,500".

8 (c) Section 115 (a) of such Act is amended by insert-  
9 ing "(1)" after "(a)", and by adding at the end thereof  
10 a new paragraph as follows:

11 "(2) In addition to the authority conferred by para-  
12 graph (1), and notwithstanding any other provision of this  
13 title, the Secretary is authorized, through the utilization of  
14 local public agencies where feasible, to make grants (payable  
15 from any grant funds provided under section 103 (b)) to an  
16 individual or family, as described in subsection (b), to cover  
17 the cost of repairs and improvements necessary to make real  
18 property owned and occupied by such individual or family  
19 conform to public standards for decent, safe, and sanitary  
20 housing. No grants shall be made under this paragraph in the  
21 case of any property, unless (A) such property is in an area  
22 within a locality (other than an urban renewal area) which  
23 the governing body of the locality has determined, and so

1 certifies to the Secretary, contains a substantial number of  
 2 structures in need of such repairs and improvements, (B)  
 3 there is in effect for the locality a workable program meeting  
 4 the requirements of section 101 (c), and (C) the area is  
 5 scheduled for rehabilitation or concentrated code enforcement  
 6 within a reasonable time, and such repairs and improvements  
 7 to any property are consistent with the plan for rehabilita-  
 8 tion or concentrated code enforcement.”

#### 9 REHABILITATION IN URBAN RENEWAL AREAS

10 SEC. 504. Section 110 (c) (8) of the Housing Act of  
 11 1949 is amended by striking out (1) “guidance purposes,  
 12 and”, and (2) the proviso at the end thereof.

#### 13 DISPOSITION OF PROPERTY FOR LOW AND MODERATE

#### 14 INCOME HOUSING

15 SEC. 505. Section 107 (a) of the Housing Act of 1949  
 16 is amended by—

17 (1) inserting “, section 221 (h) (1), section 235  
 18 (j) (1), or section 236” after “or (d) (4)”;

19 (2) inserting “or lessee” after “purchaser” where it  
 20 appears and “or lease” after “purchase”;

21 (3) striking out “rental or cooperative”; and

22 (4) striking out “moderate” and inserting in lieu  
 23 thereof “low or moderate”.

1 GRANTS FOR LOW AND MODERATE INCOME HOUSING IN  
2 OPEN LAND PROJECTS

3 SEC. 506. Section 103 (a) (1) of the Housing Act of  
4 1949 is amended by inserting before the period at the end  
5 thereof the following: “, except that he may contract for  
6 a grant in an amount not to exceed two-thirds of the differ-  
7 ence between the proceeds from any land disposed of pur-  
8 suant to section 107, and the fair value of the land without  
9 regard to such section”.

10 URBAN RENEWAL LOAN CONTRACTS

11 SEC. 507. (a) Section 102 (c) of the Housing Act of  
12 1949 is amended by:

13 (1) striking out “at interest rates lower than pro-  
14 vided in the loan contract” in the first sentence; and

15 (2) inserting before the period at the end of the  
16 first sentence the following: “: *Provided*, That, if at  
17 any time during the undertaking of the project, the inter-  
18 est rate on such a loan from a source other than the  
19 Federal Government is greater than the rate at which  
20 funds could be made available under the Federal loan  
21 contract, the Secretary may make a supplemental grant  
22 to the local public agency in the amount of the difference  
23 between the interest cost from such sources and the  
24 interest cost at the contract rate, and no part of the

1 amount of any such grant shall be required to be con-  
2 tributed as a part of the local grant-in-aid”.

3 (b) Loan contracts outstanding on the date of enact-  
4 ment of this section may be amended to incorporate the  
5 provisions authorized by the amendment contained in sub-  
6 section (a) without regard to the proviso in section 110 (g)  
7 of the Housing Act of 1949.

8 PROJECT COMPLETION PRIOR TO DISPOSITION OF CERTAIN  
9 PROPERTY

10 SEC. 508. (a) Section 106 of the Housing Act of 1949  
11 is amended by adding at the end thereof the following new  
12 subsection:

13 “(i) Upon a determination by the Secretary that (1)  
14 not more than 5 per centum of the total area of land ac-  
15 quired as part of an urban renewal project remains to be  
16 disposed, (2) the local public agency does not expect  
17 to be able, due to circumstances beyond its control, to dis-  
18 pose of such land in the near future, (3) all other project  
19 activities are completed, and (4) the local public agency  
20 has agreed to dispose of or retain such land for uses in ac-  
21 cordance with the urban renewal plan, the urban renewal  
22 project may be deemed completed, and the net project cost  
23 may be computed and the capital grant paid.”

24 (b) Section 110 (f) of such Act is amended by insert-

1 ing before the period at the end thereof the following: "or  
2 for subsequent disposition or retention as provided under  
3 section 106 (i)".

#### 4 DEMOLITION GRANTS

5 SEC. 509. (a) The first sentence of section 116 (a) of  
6 the Housing Act of 1949 is amended by inserting after "un-  
7 sound" the following: ", a harborage or potential harborage  
8 of rats,".

9 (b) Section 116 (b) of such Act is amended by insert-  
10 ing after the comma at the end of clause (2) the following:  
11 "or will be consistent with a systematic rodent control pro-  
12 gram being undertaken in the neighborhood,".

#### 13 AIR RIGHTS SITES IN URBAN RENEWAL AREAS

14 SEC. 510. (a) Section 110 (c) (1) (iv) of the Hous-  
15 ing Act of 1949 is amended by striking out "for use for indus-  
16 trial development" and inserting in lieu thereof "for use for  
17 the development of industrial or educational facilities".

18 (b) Section 110 (c) (7) of such Act is amended by  
19 striking out "for industrial development" and inserting in  
20 lieu thereof "for the development of industrial or educational  
21 facilities".

#### 22 INTERIM ASSISTANCE FOR BLIGHTED AREAS

23 SEC. 511. Title I of the Housing Act of 1949 is amended  
24 by adding after section 117 a new section as follows:

## 1 "INTERIM ASSISTANCE FOR BLIGHTED AREAS

2 "SEC. 118. Notwithstanding any other provision of this  
3 title, the Secretary is authorized to enter into contracts (in  
4 an aggregate amount not to exceed \$20,000,000 in any  
5 fiscal year) to make, and to make, grants as provided in this  
6 section (payable from any grant funds provided under section  
7 103 (b) ) to cities, other municipalities, and counties for the  
8 purpose of assisting such localities in carrying out programs to  
9 alleviate harmful conditions in slum and blighted areas which  
10 are planned for substantial clearance, rehabilitation, or fed-  
11 erally assisted code enforcement in the near future but in  
12 which some immediate public action is needed until clear-  
13 ance, rehabilitation, or code enforcement activities can be  
14 undertaken. Such grants shall not exceed two-thirds (or  
15 three-fourths in the case of any city, other municipality,  
16 or county having a population of fifty thousand or less  
17 according to the most recent decennial census) of the  
18 cost of planning and carrying out programs which may  
19 include (1) the repair of streets, sidewalks, parks, play-  
20 grounds, publicly owned utilities, and public buildings to  
21 meet needs consistent with the short-term continued use  
22 of the area prior to the undertaking of the contemplated  
23 clearance or upgrading activities, (2) the improvement of  
24 private properties to the extent needed to eliminate the most

1 immediate dangers to public health and safety, (3) the  
2 demolition of structures determined to be structurally un-  
3 sound or unfit for human habitation and which constitute a  
4 public nuisance and serious hazard to the public health and  
5 safety, (4) the establishment of temporary public play-  
6 grounds on vacant land within the area, and (5) the im-  
7 provement of garbage and trash collection, street cleaning,  
8 and similar activities. The Secretary shall encourage, wher-  
9 ever feasible, the employment of otherwise unemployed or  
10 underemployed residents of the area in carrying out the  
11 activities and undertakings assisted under this section. The  
12 provisions of sections 101 (c), 106, and 114 shall be appli-  
13 cable to activities and undertakings assisted under this  
14 section to the same extent as if such activities and under-  
15 takings were being carried out in an urban renewal area  
16 as part of an urban renewal project.”

17 REHABILITATION LOANS

18 SEC. 512. (a) Section 312 (a) of the Housing Act of  
19 1964 is amended to read as follows:

20 “SEC. 312. (a) The Secretary is authorized, through  
21 the utilization of local public and private agencies where  
22 feasible, to make loans as herein provided to the owners  
23 and tenants of property to finance the rehabilitation of such  
24 property. No loan shall be made under this section unless—

25 “(1) (A) the property is situated in an urban re-

1 newal area or an area in which a program of concen-  
2 trated code enforcement activity is being carried out  
3 pursuant to section 117 of the Housing Act of 1949,  
4 and the rehabilitation is required to make the property  
5 conform to applicable code requirements or to carry out  
6 the objectives of the urban renewal plan for the area; or

7 “(B) (i) the property is in an area (other than  
8 an area described in subparagraph (A)) which the  
9 governing body of the locality has determined, and so  
10 certifies to the Secretary, contains a substantial number  
11 of structures in need of rehabilitation, (ii) there is in  
12 effect for the locality a workable program meeting the  
13 requirements of section 101(c) of the Housing Act  
14 of 1949, (iii) the property is residential and owner-  
15 occupied, (iv) the property is in need of rehabilitation  
16 and is in violation of the local minimum housing or  
17 similar code, and (v) the area is scheduled for rehabili-  
18 tation or concentrated code enforcement within a reason-  
19 able time, and the rehabilitation of this property is  
20 consistent with the plan for rehabilitation or code  
21 enforcement.

22 “(2) the applicant is unable to secure the necessary  
23 funds from other sources upon comparable terms and  
24 conditions; and

25 “(3) the loan is an acceptable risk taking into

1 consideration the need for the rehabilitation, the security  
2 available for the loan, and the ability of the applicant  
3 to repay the loan.”

4 (b) Section 312 (h) of such Act is amended by striking  
5 out “October 1, 1969” and inserting in lieu thereof “Octo-  
6 ber 1, 1970”.

7 LOW AND MODERATE INCOME HOUSING IN RESIDENTIAL  
8 URBAN RENEWAL AREAS

9 SEC. 513. Section 105 (f) of the Housing Act of 1949  
10 is amended to read as follows:

11 “(f) A majority of the housing units provided in urban  
12 renewal areas which will be redeveloped for predominantly  
13 residential uses and which receive Federal recognition after  
14 the date of enactment of the Housing and Urban Develop-  
15 ment Act of 1968 shall be standard housing units for low  
16 or moderate income families or individuals.”

17 TITLE VI—URBAN PLANNING AND FACILITIES

18 COMPREHENSIVE PLANNING

19 SEC. 601. Section 701 of the Housing Act of 1954 is  
20 amended to read as follows:

21 “COMPREHENSIVE PLANNING

22 “SEC. 701. (a) In order to assist State and local gov-  
23 ernments in solving planning problems, including those re-  
24 sulting from the increasing concentration of population in  
25 metropolitan and other urban areas and the out-migration

1 from and lack of coordinated development of resources and  
2 services in rural areas; to facilitate comprehensive planning  
3 for urban and rural development, including coordinated  
4 transportation systems, on a continuing basis by such govern-  
5 ments; and to encourage such governments to establish and  
6 improve planning staffs and techniques on an areawide basis,  
7 and to engage private consultants where their professional  
8 services are deemed appropriate by the assisted govern-  
9 ments, the Secretary is authorized to make planning grants  
10 to—

11 “(1) State planning agencies for the provision of  
12 planning assistance to (A) cities and other municipali-  
13 ties having a population of less than 50,000 according  
14 to the latest decennial census, and counties without  
15 regard to population: *Provided*, That grants shall be  
16 made under this paragraph for planning assistance to  
17 counties having a population of 50,000 or more, accord-  
18 ing to the latest decennial census, which are within  
19 metropolitan areas, only if (i) the Secretary finds that  
20 planning and plans for such county will be coordinated  
21 with the program of comprehensive planning, if any,  
22 which is being carried out for the metropolitan area of  
23 which the county is a part, and (ii) the aggregate  
24 amount of the grants made subject to this proviso does  
25 not exceed 15 per centum of the aggregate amount

1 appropriated, after September 2, 1964, for the purposes  
2 of this section, (B) any group of adjacent communities,  
3 either incorporated or unincorporated, having a total  
4 population of less than 50,000 according to the latest  
5 decennial census and having common or related urban  
6 planning problems, (C) cities, other municipalities, and  
7 counties, referred to in paragraph (3) of this subsection  
8 and areas referred to in paragraph (4) of this subsection,  
9 and (D) Indian reservations;

10 “(2) State, metropolitan, and regional planning  
11 agencies for metropolitan or regional planning;

12 “(3) cities, other municipalities, and counties which  
13 (A) are situated in redevelopment areas or economic  
14 development districts designated by the Secretary of  
15 Commerce under title IV of the Public Works and Economic  
16 Development Act of 1965, or (B) have suffered  
17 substantial damage as a result of a catastrophe  
18 which the President, pursuant to section 2(a) of ‘An  
19 Act to authorize Federal assistance to States and local  
20 governments in major disasters, and for other purposes’,  
21 approved September 30, 1950, as amended (42 U.S.C.  
22 1855a), has determined to be a major disaster;

23 “(4) official governmental planning agencies for  
24 areas where rapid urbanization has resulted or is expected  
25 to result from the establishment or rapid and substantial

1 expansion of a Federal installation, or for areas where  
2 rapid urbanization is expected to result on land developed  
3 or to be developed as a new community approved under  
4 section 1004 of the National Housing Act, or title IV of  
5 the Housing and Urban Development Act of 1968;

6 “(5) States for State and interstate comprehensive  
7 planning and for research and coordination activity re-  
8 lated thereto, including technical and other assistance  
9 for the establishment and operation of intrastate and  
10 interstate planning agencies;

11 “(6) State planning agencies for assistance to dis-  
12 trict planning, or planning for areas within districts,  
13 carried on by or for district planning agencies;

14 “(7) metropolitan and regional planning agencies,  
15 with the approval of the State planning agency or (in  
16 States where no such planning agency exists) of the  
17 Governor of the State, for the provision of planning  
18 assistance within the metropolitan area or region to  
19 cities, other municipalities, counties, groups of adjacent  
20 communities, or Indian reservations described in clauses  
21 (A), (B), (C), and (D) of paragraph (1) of this  
22 subsection;

23 “(8) official governmental planning agencies for  
24 any area where there has occurred a substantial reduc-

1       tion in employment opportunities as the result of (A)  
2       the closing (in whole or in part) of a Federal instal-  
3       lation, or (B) a decline in the volume of Government  
4       orders for the procurement of articles or materials pro-  
5       duced or manufactured in such area;

6           “(9) tribal planning councils or other tribal bodies  
7       designated by the Secretary of the Interior for planning  
8       for an Indian reservation;

9           “(10) the various regional commissions established  
10      by the Appalachian Regional Development Act of 1965  
11      or under the Public Works and Economic Develop-  
12      ment Act of 1965 for comprehensive planning for the  
13      regions established under such Acts (or State agencies  
14      or instrumentalities participating in such planning) ; and

15          “(11) local development districts, certified under  
16      section 301 of the Appalachian Regional Development  
17      Act of 1965, for comprehensive planning for their en-  
18      tire areas, or for metropolitan planning, urban planning,  
19      county planning, or small municipality planning within  
20      such areas in the Appalachian region, and for planning  
21      for Appalachian regional programs.

22      Planning assisted under this section shall, to the maximum  
23      extent feasible, cover entire areas having common or related  
24      development problems. The Secretary shall encourage co-  
25      operation in preparing and carrying out plans among all

1 interested municipalities, political subdivisions, public agen-  
2 cies, and other parties in order to achieve coordinated devel-  
3 opment of entire areas. To the maximum extent feasible,  
4 pertinent plans and studies already made for areas shall be  
5 utilized so as to avoid unnecessary repetition of effort and  
6 expense. Planning which may be assisted under this section  
7 includes the preparation of comprehensive transportation  
8 surveys, studies, and plans to aid in solving problems of traf-  
9 fic congestion, facilitating the circulation of people and goods  
10 in metropolitan and other areas and reducing transportation  
11 needs. Planning carried out with assistance under this section  
12 shall also include a housing element as part of the prepara-  
13 tion of comprehensive land use plans, and this consideration  
14 of the housing needs and land use requirements for housing in  
15 each comprehensive plan shall take into account all available  
16 evidence of the assumptions and statistical basis upon which  
17 the projection of zoning, community facilities, and popula-  
18 tion growth is based, so that the housing needs of both the  
19 region and the local communities studied in the planning will  
20 be adequately covered in terms of existing and prospective  
21 in-migrant population growth. Funds available under this  
22 section shall be in addition to and may be used jointly with  
23 funds available for planning surveys and investigations under  
24 other federally aided programs, and nothing contained in this  
25 section shall be construed as affecting the authority of the

1 Secretary of Transportation under section 307 of title 23,  
2 United States Code.

3 “(b) A planning grant made under subsection (a)  
4 shall not exceed two-thirds of the estimated cost of the work  
5 for which the grant is made: *Provided*, That such a grant  
6 may be made for up to 75 per centum of such estimated  
7 cost when made for planning primarily for (1) redevelop-  
8 ment areas, local development districts, or economic de-  
9 velopment districts, or portions thereof, described in para-  
10 graphs (3) (A) and (11) of subsection (a), (2) areas  
11 described in subsection (a) (8), and (3) the various regions,  
12 as described in subsection (a) (10). All grants made under  
13 this section shall be subject to terms and conditions pre-  
14 scribed by the Secretary. No portion of any grant made  
15 under this section shall be used for the preparation of plans  
16 for specific public works. The Secretary is authorized, not-  
17 withstanding the provisions of section 3648 of the Revised  
18 Statutes, as amended, to make advance or progress payments  
19 on account of any grant made under this section. There are  
20 authorized to be appropriated for the purposes of this section  
21 not to exceed \$265,000,000 prior to July 1, 1969, and not  
22 to exceed \$390,000,000 prior to July 1, 1970. Of the amount  
23 available prior to July 1, 1969, \$20,000,000 may be used  
24 only for district planning grants under subsection (a) (6),  
25 which amount shall be increased by \$10,000,000 on July 1,

1 1969. Any amounts appropriated under this section shall  
2 remain available until expended: *Provided*, That of any funds  
3 appropriated under this section, not to exceed an aggregate  
4 of \$10,000,000 plus 5 per centum of any funds so appro-  
5 priated may be used by the Secretary for studies, research,  
6 and demonstration projects, undertaken independently or by  
7 contract, for the development and improvement of techniques  
8 and methods for comprehensive planning and for the advance-  
9 ment of the purposes of this section, and for grants to assist  
10 in the conduct of studies and research relating to needed  
11 revisions in State statutes which create, govern, or control  
12 local governments and local governmental operations.

13 “(c) The Secretary is authorized, in areas embracing  
14 several municipalities or other political subdivisions, to en-  
15 courage planning on a unified regional, district, or metro-  
16 politan basis and to provide technical assistance for such  
17 planning and the solution of problems relating thereto.

18 “(d) It is the further intent of this section to encourage  
19 comprehensive planning, including transportation planning,  
20 for States, cities, counties, metropolitan areas, districts, re-  
21 gions, and Indian reservations and the establishment and  
22 development of the organizational units needed therefor. In  
23 extending financial assistance under this section, the Secre-  
24 tary may require such assurances as he deems adequate that  
25 the appropriate State and local agencies are making reason-

1 able progress in the development of the elements of compre-  
2 hensive planning. The Secretary is authorized to provide  
3 technical assistance to State and local governments and their  
4 agencies and instrumentalities, and to Indian tribal bodies,  
5 undertaking such planning and, by contract or otherwise, to  
6 make studies and publish information on related problems.

7 “(e) In the exercise of his responsibilities under this  
8 section, the Secretary shall consult with those officials of  
9 the Federal Government responsible for the administration  
10 of programs of Federal assistance to the States and munici-  
11 palities for various categories of public facilities and other  
12 comprehensively planned activities. He shall, particularly,  
13 consult with the Secretary of Agriculture prior to his ap-  
14 proval of any district planning grants under subsections  
15 (a) (6) and (g), and with the Secretary of Commerce  
16 prior to his approval of any planning grants which include  
17 any part of an economic development district as defined  
18 and designated under the Public Works and Economic De-  
19 velopment Act of 1965. The Secretary of Agriculture and  
20 the Secretary of Commerce, as appropriate, may provide  
21 technical assistance, with or without reimbursement, in con-  
22 nection with the establishment of districts by the Secretary  
23 of Housing and Urban Development and the carrying out  
24 of planning by such districts.

1       “(f) The consent of the Congress is hereby given to any  
2 two or more States to enter into agreements or compacts, not  
3 in conflict with any law of the United States, for cooperative  
4 efforts and mutual assistance in the comprehensive planning  
5 for the growth and development of interstate, metropolitan.  
6 or other urban areas, and to establish such agencies, joint or  
7 otherwise, as they may deem desirable for making effective  
8 such agreements and compacts.

9       “(g) In addition to the planning grants authorized by  
10 subsection (a), the Secretary is further authorized to make  
11 grants to organizations composed of public officials whom  
12 he finds to be representative of the political jurisdictions with-  
13 in a metropolitan area, region, or district for the purpose of  
14 assisting such organization to undertake studies, collect data,  
15 develop metropolitan, regional, and district plans and pro-  
16 grams, and engage in such other activities as the Secretary  
17 finds necessary or desirable for the solution of the metropoli-  
18 tan, regional, or district problems in such areas, regions,  
19 or districts. To the maximum extent feasible, all grants under  
20 this subsection shall be for activities relating to all the de-  
21 velopmental aspects of the total metropolitan area, region, or  
22 district including, but not limited to, land use, transporta-  
23 tion, housing, economic development, natural resources de-  
24 velopment, community facilities, and the general improve-

1 ment of living environments. A grant under this subsection  
2 shall not exceed two-thirds of the estimated cost of the work  
3 for which the grant is made.

4       “(h) In addition to the other grants authorized by this  
5 section, the Secretary is authorized to make grants to assist  
6 any city, other municipality, or county in making a survey  
7 of the structures and sites in such locality which are deter-  
8 mined by its appropriate authorities to be of historic or  
9 architectural value. Any such survey shall be designed to  
10 identify the historic structures and sites in the locality, deter-  
11 mine the cost of their rehabilitation or restoration, and pro-  
12 vide such other information as may be necessary or appro-  
13 priate to serve as a foundation for a balanced and effective  
14 program of historic preservation in such locality. The aspects  
15 of any such survey which relate to the identification of his-  
16 toric and architectural values shall be conducted in accord-  
17 ance with criteria found by the Secretary to be comparable  
18 to those used in establishing the National Register main-  
19 tained by the Secretary of the Interior under other provisions  
20 of law; and the results of each such survey shall be made  
21 available to the Secretary of the Interior. A grant under  
22 this subsection shall not exceed two-thirds of the cost of the  
23 survey for which it is made, and shall be made to the appro-  
24 priate agency or entity specified in paragraphs (1) through  
25 (11) of subsection (a) or, if there is no such agency or

1 entity which is qualified and willing to receive the grant and  
2 provide for its utilization in accordance with this subsection,  
3 directly to the city, other municipality, or county involved.

4 “(i) As used in this section—

5 “(1) The term ‘metropolitan area’ means a stand-  
6 ard metropolitan statistical area, as established by the  
7 Bureau of the Budget, subject, however, to such mod-  
8 ifications or extensions as the Secretary deems to be  
9 appropriate for the purposes of this section.

10 “(2) The term ‘region’ includes (A) all or part of  
11 the area of jurisdiction of one or more units of general  
12 local government, and (B) one or more metropolitan  
13 areas.

14 “(3) The term ‘district’ includes all or part of the  
15 area of jurisdiction of (A) one or more counties, and  
16 (B) one or more other units of general local govern-  
17 ment, but does not include any portion of a metropolitan  
18 area.

19 “(4) The term ‘comprehensive planning’ includes  
20 the following:

21 “(A) preparation, as a guide for governmental  
22 policies and action, of general plans with respect  
23 to (i) the pattern and intensity of land use, (ii)  
24 the provision of public facilities (including trans-  
25 portation facilities) and other government services,

1           and (iii) the effective development and utilization  
2           of human and natural resources;

3           “(B) long-range physical and fiscal plans for  
4           such action;

5           “(C) programing of capital improvements and  
6           other major expenditures, based on a determination  
7           of relative urgency, together with definitive financ-  
8           ing plans for such expenditures in the earlier years  
9           of the program;

10          “(D) coordination of all related plans and  
11          activities of the State and local governments and  
12          agencies concerned; and

13          “(E) preparation of regulatory and adminis-  
14          trative measures in support of the foregoing.

15          Comprehensive planning for the purpose of districts  
16          shall not include the planning for or assistance to  
17          establishments in relocating from one area to another  
18          or to assist subcontractors whose purpose is to divest,  
19          or whose economic success is dependent upon divest-  
20          ing, other contractors or subcontractors of contracts  
21          theretofore customarily performed by them: *Provided,*  
22          That this limitation shall not be construed to prohibit  
23          assistance for the expansion of an existing business  
24          entity through the establishment of a new branch,  
25          affiliate, or subsidiary of such entity, if the Secretary

1 finds that the establishment of such branch, affiliate, or  
2 subsidiary will not result in an increase in unemploy-  
3 ment in the area of original location or in any other area  
4 where such entity conducts business operations, unless  
5 the Secretary has reason to believe that such branch,  
6 affiliate, or subsidiary is being established with the inten-  
7 tion of closing down the operations of the existing busi-  
8 ness entity in the area of its original location or in any  
9 other area where it conducts such operations.

10 “(5) The term ‘State planning agencies’ includes  
11 official State planning agencies and (in States where no  
12 such planning agency exists) agencies or instrumental-  
13 ties of State government designated by the Governor  
14 of the State and acceptable to the Secretary.

15 “(6) The terms ‘metropolitan planning agencies’,  
16 ‘regional planning agencies’, and ‘district planning  
17 agencies’ mean official metropolitan, regional, and dis-  
18 trict planning agencies, or other agencies and instru-  
19 mentalities designated by the Governor (or Governors  
20 in the case of interstate planning), and acceptable to the  
21 Secretary, empowered under State or local law or inter-  
22 state compact to perform metropolitan, regional, or dis-  
23 trict planning, respectively: *Provided*, That such agen-  
24 cies and instrumentalities shall, to the greatest practi-  
25 cable extent, be composed of or responsible to the elected

1 officials of the unit or units of general local government  
2 for whose jurisdictions they are empowered to engage in  
3 planning.”

4 PLANNED AREAWIDE DEVELOPMENT

5 SEC. 602. (a) The heading of title II of the Demon-  
6 stration Cities and Metropolitan Development Act of 1966  
7 is amended to read as follows: “TITLE II—PLANNED  
8 AREAWIDE DEVELOPMENT”.

9 (b) Section 201 of such Act is amended to read as  
10 follows:

11 “FINDINGS AND DECLARATION OF PURPOSE

12 “SEC. 201. (a) The Congress hereby finds that the  
13 welfare of the Nation and of its people is directly dependent  
14 upon the sound and orderly development and the effective  
15 organization and functioning of our State and local govern-  
16 ments.

17 “It further finds that it is essential that our State and  
18 local governments prepare, keep current, and carry out com-  
19 prehensive plans and programs for their orderly physical  
20 development with a view to meeting efficiently all their  
21 economic and social needs.

22 “It further finds that our State and local governments  
23 are especially handicapped in this task by the complexity  
24 and scope of governmental services required, the multiplicity  
25 of political jurisdictions and agencies involved, and the inade-

1 quacy of the operational and administrative arrangements  
2 available for cooperation among them.

3 “It further finds that present requirements for areawide  
4 planning and programing in connection with various Federal  
5 programs have materially assisted in the solution of areawide  
6 problems, but that greater coordination of Federal programs  
7 and additional participation and cooperation are needed from  
8 the States and localities in perfecting and carrying out such  
9 efforts.

10 “(b) It is the purpose of this title to provide through  
11 greater coordination of Federal programs and through sup-  
12 plementary grants for certain federally assisted development  
13 projects, additional encouragement and assistance to States  
14 and localities for making comprehensive areawide planning  
15 and programing effective.”

16 (c) Section 202 of such Act is amended by striking out  
17 “metropolitan”, each place it appears, and inserting in lieu  
18 thereof “areawide”.

19 (d) (1) Section 205 of such Act is amended by striking  
20 out “metropolitan development”, each place it appears, and  
21 inserting in lieu thereof “areawide development”.

22 (2) Such section is further amended by striking out  
23 “metropolitan areas” and “metropolitan area” and inserting  
24 in lieu thereof “areas” and “area”, respectively.

1       (3) Such section is further amended by striking out  
2 “metropolitanwide” each place it appears, and inserting in  
3 lieu thereof “areawide”.

4       (4) Such section is further amended by striking out  
5 “metropolitan planning”, each place it appears, and insert-  
6 ing in lieu thereof “areawide planning”.

7       (5) Such section is further amended by inserting “where  
8 appropriate,” after “(B)” in subsection (c) (1).

9       (6) Such section is further amended by striking out in  
10 subsection (f) the following: “within the metropolitanwide  
11 area”.

12       (e) (1) Paragraphs (1) and (2) of section 208 of  
13 such Act are amended by striking out “Metropolitan” and  
14 inserting in lieu thereof “Areawide”.

15       (2) Paragraph (7) of such section is amended—

16               (A) by striking out “or metropolitan or regional”  
17 and inserting in lieu thereof “, metropolitan, regional,  
18 or district”; and

19               (B) by striking out in the parenthetical phrase the  
20 word “metropolitan”.

21       (f) Section 206 (b) of such Act is amended by striking  
22 out the second sentence and inserting in lieu thereof the  
23 following: “Any amounts appropriated under this section  
24 shall remain available until expended, and any amounts

1 authorized for any fiscal year under this section but not  
2 appropriated may be appropriated for any succeeding fiscal  
3 year commencing prior to July 1, 1970.”

4 ADVANCE ACQUISITION OF LAND

5 SEC. 603. (a) Section 701 of the Housing and Urban  
6 Development Act of 1965 is amended by striking out in  
7 clause (3) thereof “in connection with the future construc-  
8 tion of public works and facilities.” and inserting in lieu  
9 thereof “in the future for public purposes.”

10 (b) Section 704 of such Act is amended to read as  
11 follows:

12 “SEC. 704. (a) In order to encourage and assist the  
13 timely acquisition of land planned to be utilized in the future  
14 for public purposes, the Secretary is authorized to make  
15 grants to States and local public bodies and agencies to assist  
16 in financing the acquisition of a fee simple estate or other  
17 interest in such land.

18 “(b) The amount of any grant made under this section  
19 shall not exceed the aggregate amount of reasonable interest  
20 charges on the loans or other financial obligations incurred to  
21 finance the acquisition of such land for a period not in excess  
22 of the lesser of (1) five years from the date of acquisition of  
23 such land, or (2) the period of time between the date on

1 which the land was acquired and the date its use began for  
2 the purpose for which it was acquired: *Provided*, That where  
3 all or any portion of the cost of such land is not financed  
4 through borrowings, the amount of the grant shall be com-  
5 puted on the basis of the aggregate amount of reasonable in-  
6 terest charges that the Secretary determines would have  
7 been required.

8 “(c) No grant shall be made under this section unless  
9 the Secretary determines that the land will be utilized for a  
10 public purpose within a reasonable period of time and that  
11 such utilization will contribute to economy, efficiency, and  
12 the comprehensively planned development of the area. The  
13 Secretary shall in all cases require that land acquired with  
14 the assistance of a grant under this section be utilized for a  
15 public purpose within five years after the date on which a  
16 contract to make such grant is entered into, unless (1) the  
17 Secretary determines that due to unusual circumstances a  
18 longer period of time is necessary and in the public interest,  
19 and (2) reports such determination promptly to the Com-  
20 mittees on Banking and Currency of the Senate and House  
21 of Representatives.

22 “(d) No land acquired with assistance under this sec-  
23 tion shall, without approval of the Secretary, be diverted  
24 from the purpose originally approved. The Secretary shall

1 approve no such diversion unless he finds that the diversion  
2 is in accord with the then applicable comprehensive plan for  
3 the area. In cases of a diversion of land to other than a pub-  
4 lic purpose, the Secretary may require repayment of the  
5 grant, or substitution of land of approximately equal fair  
6 market value, whichever he deems appropriate. An interim  
7 use of the land for a public or private purpose in accordance  
8 with standards prescribed by the Secretary, or approved by  
9 him, shall not constitute a diversion within the meaning of  
10 this subsection.

11 “(e) Notwithstanding any other provision of law, no  
12 project for which land is acquired with assistance under  
13 this section shall, solely as a result of such advance acqui-  
14 sition, be considered ineligible for the purpose of any other  
15 Federal loan or grant program, and the amount of the pur-  
16 chase price paid for the land by the recipient of a grant  
17 under this section may be considered an eligible cost for the  
18 purpose of such other Federal loan or grant program.”

19 EXTENSION OF INTERIM PLANNING REQUIREMENTS IN  
20 WATER AND SEWER FACILITIES PROGRAM

21 SEC. 604. Section 702 (c) of the Housing and Urban  
22 Development Act of 1965 is amended by striking out “July  
23 1, 1968” and inserting in lieu thereof “October 1, 1969”.

1 AUTHORIZATIONS FOR THE WATER AND SEWER FACILITIES,  
2 NEIGHBORHOOD FACILITIES, AND ADVANCE ACQUISITION OF LAND PROGRAMS  
3

4 SEC. 605. (a) Section 708 (a) of the Housing and  
5 Urban Development Act of 1965 is amended by adding at  
6 the end thereof the following: "In addition, there is authorized to be appropriated for grants under section 702 not to  
7 exceed \$115,000,000 for the fiscal year commencing on July  
8 1, 1969."

10 (b) Section 708 (b) of such Act is amended by striking  
11 out "July 1, 1969" and inserting in lieu thereof "July 1,  
12 1970".

13 OPEN-SPACE LAND PROGRAM

14 SEC. 606. (a) Section 702 (b) of the Housing Act of  
15 1961 is amended to read as follows:

16 "(b) There are authorized to be appropriated, for the  
17 purpose of making grants under this title, not to exceed  
18 \$310,000,000 prior to July 1, 1969, and not to exceed  
19 \$460,000,000 prior to July 1, 1970. Any funds so appropriated shall remain available until expended."

21 (b) Section 708 (b) of such Act is amended by striking  
22 out "\$50,000" and inserting in lieu thereof "\$125,000".

1 AUTHORIZE THE MAKING OF FEASIBILITY STUDIES IN THE  
2 PUBLIC WORKS PLANNING ADVANCES PROGRAM

3 SEC. 607. Section 702 (a) of the Housing Act of 1954  
4 is amended by inserting after "to aid in financing the cost of"  
5 the following: "feasibility studies,".

6 TITLE VII—URBAN MASS TRANSPORTATION

7 GRANT AUTHORIZATIONS

8 SEC. 701. (a) Section 4 (b) of the Urban Mass Trans-  
9 portation Act of 1964 is amended by (1) striking out the  
10 word "and" where it first appears in the first sentence, and  
11 (2) inserting before the period at the end of the first sen-  
12 tence "; and \$190,000,000 for fiscal year 1970".

13 (b) Section 6 (c) of such Act is amended by (1) strik-  
14 ing out "\$50,000,000" and inserting in lieu thereof "\$56,-  
15 000,000", and (2) inserting at the end thereof the follow-  
16 ing: "On or after July 1, 1969, the Secretary may make  
17 available to finance projects under this section such additional  
18 sums out of the grant authorization provided in section 4 (b)  
19 as he deems appropriate."

20 DEFINITION OF MASS TRANSPORTATION

21 SEC. 702. Section 12 (c) (5) of the Urban Mass Trans-  
22 portation Act of 1964 is amended to read as follows:

1           “(5) the term ‘mass transportation’ means trans-  
2           portation by bus, rail, or other conveyance, either pub-  
3           licly or privately owned, which provides to the public  
4           general or special service (but not including school buses  
5           or charter or sightseeing service) on a regular and con-  
6           tinuing basis.”

7           EXTENSION OF EMERGENCY PROGRAM UNDER THE URBAN

8                           MASS TRANSPORTATION ACT

9           SEC. 703. Section 5 of the Urban Mass Transportation  
10          Act of 1964 is amended by striking out “November 1, 1968”  
11          and inserting in lieu thereof “July 1, 1970”.

12                       NON-FEDERAL SHARE OF NET PROJECT COST

13          SEC. 704. (a) Section 4 (a) of the Urban Mass Trans-  
14          portation Act of 1964 is amended by striking out the last  
15          sentence and inserting in lieu thereof the following: “The  
16          remainder of the net project cost shall be provided, in cash,  
17          from sources other than Federal funds. Not more than 50 per  
18          centum of such remainder may be provided from other than  
19          public sources, and any public or private transit system funds  
20          shall be provided solely from undistributed cash surpluses,  
21          replacement or depreciation funds or reserves available in  
22          cash, or new capital; except that in cases of demonstrated

1   fiscal inability of an applicant actively engaged in preparing  
2   and effectuating a program for a unified or officially coordi-  
3   nated urban transportation system as part of the comprehen-  
4   sively planned development of the urban area, such re-  
5   mainder may be provided from other than public sources. No  
6   refund or reduction of the remainder of the net project cost  
7   shall be made at any time unless there is at the same time a  
8   refund of a proportional amount of the Federal grant.”

9       (b) Section 5 of such Act is amended by striking out the  
10   last sentence and inserting in lieu thereof the following: “The  
11   remainder of the net project cost shall be provided, in cash,  
12   from sources other than Federal funds. Not more than 50  
13   per centum of such remainder may be provided from other  
14   than public sources, and any public or private transit system  
15   funds shall be provided solely from undistributed cash sur-  
16   pluses, replacement or depreciation funds or reserves avail-  
17   able in cash, or new capital; except that in cases of demon-  
18   strated fiscal inability of an applicant actively engaged in  
19   preparing and effectuating a program for a unified or offi-  
20   cially coordinated urban transportation system as part of  
21   the comprehensively planned development of the urban area,  
22   such remainder may be provided from other than public

1 sources. No refund or reduction of the remainder of the net  
2 project cost shall be made at any time unless there is at the  
3 same time a refund of a proportional amount of the Federal  
4 grant.”

## 5 TITLE VIII—SECONDARY MORTGAGE MARKET

### 6 PURPOSES

7 SEC. 801. The purposes of this title include the partition  
8 of the Federal National Mortgage Association as heretofore  
9 existing into two separate and distinct corporations, each of  
10 which shall have continuity and corporate succession as a  
11 separated portion of the previously existing corporation. One  
12 of such corporations, to be known as Federal National Mort-  
13 gage Association, will be a Government-sponsored private  
14 corporation, will retain the assets and liabilities of the pre-  
15 viously existing corporation accounted for under section 304  
16 of the Federal National Mortgage Association Charter Act.  
17 and will continue to operate the secondary market operations  
18 authorized by such section 304. The other, to be known as  
19 Government National Mortgage Association, will remain in  
20 the Government, will retain the assets and liabilities of the  
21 previously existing corporation accounted for under sections  
22 305 and 306 of such Act, and will continue to operate the  
23 special assistance functions and management and liquidating  
24 functions authorized by such sections 305 and 306.

## 1     AMENDMENTS TO THE FEDERAL NATIONAL MORTGAGE

## 2                     ASSOCIATION CHARTER ACT

3         SEC. 802. (a) The heading of title III of the National  
4     Housing Act is amended by striking out "FEDERAL NA-  
5     TIONAL MORTGAGE ASSOCIATION" and inserting in  
6     lieu thereof "NATIONAL MORTGAGE ASSOCIATIONS".

7         (b) Section 301 of such Act is amended—

8             (1) by striking out "in the Federal Government a";

9             (2) by striking out "facility for" and inserting in  
10     lieu thereof "facilities for";

11            (3) by striking out "of such facility" and inserting  
12     in lieu thereof "thereof";

13            (4) by striking out "facility to" and inserting in  
14     lieu thereof "facilities to"; and

15            (5) by striking out "the existing mortgage port-  
16     folio of the Federal National Mortgage Association" and  
17     inserting in lieu thereof "federally owned mortgage  
18     portfolios".

19         (c) Section 302 (a) of such Act is amended—

20             (1) by inserting "(1)" immediately following  
21     "(a)";

22             (2) by striking out "(hereinafter referred to as  
23     the 'Association')"; and

1           (3) by adding at the end thereof the following  
2           new paragraph:

3           “(2) On the effective date established pursuant to sec-  
4           tion 808 of the Housing and Urban Development Act of  
5           1968, the body corporate described in the foregoing para-  
6           graph shall cease to exist in that form and is hereby parti-  
7           tioned into two separate and distinct bodies corporate, each  
8           of which shall have continuity and corporate succession as a  
9           separated portion of the previously existing body corporate,  
10          as follows:

11          “(A) One of such separated portions shall be a body  
12          corporate without capital stock to be known as Government  
13          National Mortgage Association (hereinafter referred to as  
14          the Association), which shall be in the Department of  
15          Housing and Urban Development and which shall retain  
16          the assets and liabilities acquired and incurred under sections  
17          305 and 306 prior to such effective date, including any and  
18          all liabilities incurred pursuant to section 302 (c). The Asso-  
19          ciation shall have succession until dissolved by Act of Con-  
20          gress. It shall maintain its principal office in the District of  
21          Columbia and shall be deemed, for purposes of venue in civil  
22          actions, to be a resident thereof. Agencies or offices may be  
23          established by the Association in such other place or places  
24          as it may deem necessary or appropriate in the conduct of  
25          its business.

1       “(B) The other such separated portion shall be a body  
2 corporate to be known as Federal National Mortgage Asso-  
3 ciation (hereinafter referred to as the corporation), which  
4 shall retain the assets and liabilities acquired and incurred  
5 under sections 303 and 304 prior to such effective date. The  
6 corporation shall have succession until dissolved by Act of  
7 Congress. It shall maintain its principal office in the District  
8 of Columbia and shall be deemed, for purposes of venue  
9 in civil actions, to be a resident thereof.”

10       (d) Section 302 (b) of such Act is amended—

11           (1) by striking out “the Association is authorized”  
12 and inserting in lieu thereof “each of the bodies corporate  
13 named in subsection (a) (2) is authorized”;

14           (2) by striking out “lend (under section 304) on  
15 the security of,”;

16           (3) by inserting immediately before the colon  
17 “; and the corporation is authorized to lend on the  
18 security of any such mortgages and to purchase, sell,  
19 or otherwise deal in any securities guaranteed by the  
20 Association under section 306 (g)”; and

21           (4) by striking out “no mortgage may be pur-  
22 chased” and inserting in lieu thereof “the Association  
23 may not purchase any mortgage”.

24       (e) Section 302 (c) (1) of such Act is amended by  
25 striking out “, consistent with section 307,”.

1       (f) Section 302 (c) (2) (C) of such Act is amended to  
2 read as follows:

3           “(C) The Department of Housing and Urban  
4 Development.”.

5       (g) Section 302 (c) (2) of such Act is amended by  
6 striking out “incurred by the Federal National Mortgage”  
7 and inserting in lieu thereof “incurred by the”.

8       (h) The heading of section 303 of such Act is amended  
9 to read as follows: “CAPITALIZATION—FEDERAL NATIONAL  
10 MORTGAGE ASSOCIATION”.

11       (i) Section 303 (a) of such Act is amended—

12           (1) by striking out “nonvoting common stock” and  
13 inserting in lieu thereof “common stock, without par  
14 value, which shall be vested with all voting rights, each  
15 share being entitled to one vote with rights of cumula-  
16 tive voting at all elections of directors”;

17           (2) by striking out “nonvoting preferred stock” and  
18 inserting in lieu thereof “nonvoting preferred stock, with  
19 a par value of \$100 per share,”;

20           (3) by striking out the second and third sentences  
21 thereof and inserting in lieu thereof “The free transfera-  
22 bility of the common stock at all times to any person,  
23 firm, corporation, or other entity shall not be restricted  
24 except that, as to the corporation, it shall be transfer-  
25 able only on the books of the corporation.”;

1           (4) by striking out “of the capital surplus and the  
2       general surplus accounts”;

3           (5) by striking out “retire” and inserting in lieu  
4       thereof “retire, at par,”; and

5           (6) by striking out “the Association shall deem  
6       feasible” and inserting in lieu thereof “possible subse-  
7       quent to the effective date established pursuant to section  
8       808 of the Housing and Urban Development Act of  
9       1968”.

10       (j) Section 303 (b) of such Act is amended—

11           (1) by striking out “for its services” and inserting  
12       in lieu thereof “, which may be regarded as elements of  
13       pricing,”; and

14           (2) by striking out the last sentence thereof.

15       (k) Section 303 (c) of such Act is amended—

16           (1) by striking out “(only in denominations of  
17       \$100 or multiples thereof) ”;

18           (2) by inserting immediately after the first sen-  
19       tence thereof “In addition to the shares of common stock  
20       issued under the foregoing sentence, the corporation may  
21       issue additional shares in return for appropriate pay-  
22       ments into capital or capital and surplus. The corpora-  
23       tion shall at all times require each servicer of its mort-  
24       gages to own a minimum amount of common stock of the  
25       corporation, measured by its stated value. Such mini-

1       mum amount shall not exceed 2 per centum, as deter-  
2       mined from time to time by the corporation with the  
3       approval of the Secretary of Housing and Urban De-  
4       velopment, of the aggregate outstanding principal balances  
5       of all mortgages of the corporation which have been  
6       purchased subsequent to the effective date established  
7       pursuant to section 808 of the Housing and Urban  
8       Development Act of 1968 and which are then serviced  
9       by such servicer for the corporation.”; and

10       (3) by striking out “the general surplus account  
11       of the Association shall not be reduced through the pay-  
12       ment of dividends applicable to such common stock  
13       which exceed in the aggregate 5 per centum of the par  
14       value of the outstanding common stock of the Associa-  
15       tion” and inserting in lieu thereof “the aggregate amount  
16       of cash dividends paid on account of any share of such  
17       stock shall not exceed any rate which may be deter-  
18       mined from time to time by the Secretary of Housing  
19       and Urban Development to be a fair rate of return after  
20       consideration of the current earnings and capital condi-  
21       tion of the corporation”.

22       (1) Section 303 (d) of such Act is amended by striking  
23       out “\$225,000,000” and inserting in lieu thereof “\$225,-  
24       000,000; but no such stock may be issued subsequent to the

1 effective date established pursuant to section 808 of the  
2 Housing and Urban Development Act of 1968”.

3 (m) Section 303 (g) of such Act is repealed.

4 (n) The heading of section 304 of such Act is amended  
5 to read as follows: “SECONDARY MARKET OPERATIONS—FED-  
6 ERAL NATIONAL MORTGAGE ASSOCIATION”.

7 (o) Section 304 (a) (1) of such Act is amended by  
8 striking out “and the Association shall not purchase any  
9 mortgage insured or guaranteed prior to the effective date of  
10 the Housing Act of 1954”.

11 (p) Section 304 (b) of such Act is amended by strik-  
12 ing out “earnings, and in” and inserting in lieu thereof  
13 “earnings unless a greater ratio shall be fixed at any time  
14 or from time to time by the Secretary of Housing and Urban  
15 Development. In”.

16 (q) Section 304 (c) of such Act is amended by striking  
17 out “(1) all of the preferred stock of the Association held  
18 by the Secretary of the Treasury has been retired, or (2)”.

19 (r) Sections 303 and 304 of such Act, as amended by  
20 the foregoing subsections of this section, are further  
21 amended—

22 (1) by striking out “Association” each place it ap-  
23 pears and inserting in lieu thereof, in each such place,  
24 “corporation”; and

1           (2) by striking out "Association's" each place it  
2       appears and inserting in lieu thereof, in each such place,  
3       "corporation's".

(s) The heading of section 305 of such Act is amended to read as follows: "SPECIAL ASSISTANCE FUNCTIONS—GOVERNMENT NATIONAL MORTGAGE ASSOCIATION".

7 (t) The heading of section 306 of such Act is amended  
8 to read as follows: "MANAGEMENT AND LIQUIDATING  
9 FUNCTIONS—GOVERNMENT NATIONAL MORTGAGE ASSOCIA-  
10 TION".

11 (u) Subsections (a) and (b) of section 307 of such  
12 Act are repealed.

(v) Section 307 (c) of such Act is amended by striking out "board of directors of the Association" and inserting in lieu thereof "Secretary of Housing and Urban Development".

16           (w) The heading of section 308 of such Act is amended  
17 to read as follows:

18 "MANAGEMENT".

19 (x) Section 308 of such Act is amended—

20 (1) by inserting "(a)" immediately following  
21 "308";

(2) by striking out the first two sentences thereof  
and inserting in lieu thereof “All the powers and duties  
of the Government National Mortgage Association shall  
be vested in the Secretary of Housing and Urban De-

1       velopment and the Association shall be administered un-  
2       der the direction of the Secretary.”;

3           (3) by striking out “the board shall determine” and  
4       inserting in lieu thereof “the Secretary shall determine”;

5           (4) by striking out “Association. The chairman of  
6       the board” and inserting in lieu thereof “Association, and  
7       shall have power to adopt, amend, and repeal bylaws  
8       governing the performance of the powers and duties  
9       granted to or imposed upon it by law. The Secretary”;

10          (5) by striking out “board of directors,” and insert-  
11       ing in lieu thereof “Secretary,”;

12          (6) by striking out the last sentence thereof; and

13          (7) by adding at the end thereof the following new  
14       subsection:

15       “(b) The Federal National Mortgage Association shall  
16       have a board of directors which shall consist of fifteen per-  
17       sons, one-third of whom shall be appointed annually by the  
18       Secretary, and the remainder of whom shall be elected annu-  
19       ally by the common stockholders. The board shall at all times  
20       have as members appointed by the Secretary at least one per-  
21       son from the homebuilding industry, at least one person from  
22       the mortgage lending industry, and at least one person from  
23       the real estate industry. Each member of the board of direc-  
24       tors shall be appointed or elected for a term ending on the  
25       date of the next annual meeting of the stockholders, except

1 that any such member may be removed from office by the  
2 President for good cause. Any elective seat on the board  
3 which becomes vacant after the annual election of the direc-  
4 tors shall be filled by the board, but only for the unexpired  
5 portion of the term. Any appointive seat which becomes  
6 vacant shall be filled by appointment of the Secretary, but  
7 only for the unexpired portion of the term. Within the  
8 limitations of law and regulation, the board shall deter-  
9 mine the general policies which shall govern the opera-  
10 tions of the corporation, and shall have power to adopt,  
11 amend, and repeal bylaws governing the performance of  
12 the powers and duties granted to or imposed upon it by law.  
13 The board of directors shall select and effect the appoint-  
14 ment of qualified persons to fill the offices of president and  
15 vice president, and such other offices as may be provided for  
16 in the bylaws. Any member of the board who is a full-time  
17 officer or employee of the Federal Government shall not,  
18 as such member, receive compensation for his services.”.

19 (y) Section 309 (a) of such Act is amended—

20 (1) by striking out “The Association” and insert-  
21 ing in lieu thereof “Each of the bodies corporate named  
22 in section 302 (a) (2)”;

23 (2) by striking out “by its board of directors, to  
24 adopt, amend, and repeal bylaws governing the per-

1       formance of the powers and duties granted to or imposed  
2       upon it by law;”;

3           (3) by striking out “conduct its business” and in-  
4       serting in lieu thereof “conduct its business without re-  
5       gard to any qualification or similar statute”;

6           (4) by striking out “the Association may deem”  
7       and inserting in lieu thereof “it may deem”; and

8           (5) by striking out “the purposes of the Associa-  
9       tion” and inserting in lieu thereof “its purposes”.

10       (z) Section 309 (c) of such Act is amended—

11           (1) by striking out “(1)”;

12           (2) by striking out “The Association” and insert-  
13       ing in lieu thereof “(1) The Government National  
14       Mortgage Association”;

15           (3) by striking out “, and (2) the Association  
16       shall, with respect to its secondary market operations  
17       under section 304 after the cutoff date referred to in  
18       section 303 (d) of this title, pay annually to the Secre-  
19       tary of the Treasury, for covering into miscellaneous  
20       receipts, an amount equivalent to the amount of Federal  
21       income taxes for which it would be subject if it were not  
22       exempt from such taxes with respect to such secondary  
23       market operations”; and

1           (4) by adding at the end thereof the following new  
2 paragraph:

3       “(2) The Federal National Mortgage Association, in-  
4 cluding its franchise, capital, reserves, surplus, mortgages or  
5 other security holdings, and income, shall be exempt from  
6 all taxation now or hereafter imposed by any State, terri-  
7 tory, possession, Commonwealth, or dependency of the  
8 United States, or by the District of Columbia, or by any  
9 county, municipality, or local taxing authority, except that  
10 any real property of the corporation shall be subject to State,  
11 territorial, county, municipal, or local taxation to the same  
12 extent as other real property is taxed.”

13       (aa) Section 309 (d) of such Act is amended—

14           (1) by inserting “(1)” immediately following  
15 “(d)”;

16           (2) by striking out “Chairman of the Board” and  
17 inserting in lieu thereof “Secretary of Housing and  
18 Urban Development”;

19           (3) by striking out “agents,” and inserting in lieu  
20 thereof “agents of the Government National Mortgage  
21 Association,”; and

22           (4) by adding at the end thereof the following  
23 new paragraph:

24       “(2) The board of directors of the Federal National  
25 Mortgage Association shall have the power to select and

1 appoint or employ such officers, attorneys, employees, and  
2 agents, to vest them with such powers and duties, and to fix  
3 and to cause the corporation to pay such compensation to  
4 them for their services, as it may determine; and any such  
5 action shall be without regard to the Federal civil service  
6 and classification laws. Appointments, promotions, and sep-  
7 arations so made shall be based on merit and efficiency, and  
8 no political test or qualification shall be permitted or given  
9 consideration. Each officer and employee of the corporation  
10 who is employed by the corporation prior to the termination  
11 of the transitional period referred to in section 810 (b) of  
12 the Housing and Urban Development Act of 1968 and who  
13 on the day previous to the beginning of such employment  
14 will have been subject to the civil service retirement law  
15 (subch. III of ch. 83 of title 5, United States Code),  
16 shall, so long as his employment by the corporation con-  
17 tinues without a break in continuity of service, continue  
18 to be subject to such law; and for the purpose of such law  
19 his employment by the corporation without a break in con-  
20 tinuity of service shall be deemed to be employment by the  
21 Government of the United States. The corporation shall con-  
22 tribute to the Civil Service Retirement and Disability Fund  
23 a sum as provided by section 8334 (a) of title 5, United  
24 States Code, except that such sum shall be determined by

1 applying to the total basic pay (as defined in 5 U.S.C.  
2 8331 (3) and except as hereinafter provided) paid to the  
3 employees of the corporation who are covered by the civil  
4 service retirement law, the per centum rate determined an-  
5 nually by the United States Civil Service Commission to be  
6 the excess of the total normal cost per centum rate of the  
7 civil service retirement system over the employee deduction  
8 rate specified in section 8334 (a) of title 5, United States  
9 Code. The corporation shall also pay into the Civil Service  
10 Retirement and Disability Fund such portion of the cost of  
11 administration of the fund as is determined by the United  
12 States Civil Service Commission to be attributable to its  
13 employees. Notwithstanding the foregoing provisions, there  
14 shall not be considered for the purposes of the civil service  
15 retirement law that portion of the basic pay in any one year  
16 of any officer or employee of the corporation which exceeds  
17 the basic pay provided for in section 5312 of title 5, United  
18 States Code, on the last day of such year. Except as provided  
19 in this subsection, the corporation shall not be subject to  
20 the provisions of title 5, United States Code."

21 (bb) Section 309 (e) of such Act is amended—

22 (1) by striking out "body corporate created by  
23 section 302" and inserting in lieu thereof "bodies cor-  
24 porate named in section 302 (a) (2)";

25 (2) by inserting " , 'Government National Mort-

1       gage Association’,” immediately following “‘Federal  
2       National Mortgage Association’”; and

3               (3) by striking out the second sentence and insert-  
4       ing in lieu thereof “Violations of the foregoing sentence  
5       may be enjoined by any court of general jurisdiction at  
6       the suit of the proper body corporate. In any such suit,  
7       the plaintiff may recover any actual damages flowing  
8       from such violation, and, in addition, shall be entitled to  
9       punitive damages (regardless of the existence or non-  
10      existence of actual damages) of not exceeding \$100 for  
11      each day during which such violation is committed or  
12      repeated.”

13      (cc) Section 309 (g) of such Act is amended to read as  
14      follows:

15      “(g) The Federal Reserve banks are authorized and  
16      directed to act as depositaries, custodians, and fiscal agents  
17      for each of the bodies corporate named in section 302 (a)  
18      (2), for its own account or as fiduciary, and such banks shall  
19      be reimbursed for such services in such manner as may be  
20      agreed upon; and each of such bodies corporate may itself act  
21      in such capacities, for its own account or as fiduciary, and for  
22      the account of others.”

23      (dd) Section 309 of such Act is amended by adding  
24      thereto the following new subsection:

25      “(h) The Secretary of Housing and Urban Develop-

1 ment shall have general regulatory power over the Federal  
2 National Mortgage Association and shall make such rules  
3 and regulations as shall be necessary and proper to insure  
4 that the purposes of this title are accomplished. No stock,  
5 obligation, security, or other instrument shall be issued by  
6 the corporation without the prior approval of the Secretary.  
7 The Secretary may require that a reasonable portion of  
8 the corporation's mortgage purchases be related to the  
9 national goal of providing adequate housing for low and  
10 moderate income families, but with reasonable economic  
11 return to the corporation. The Secretary may examine and  
12 audit the books and financial transactions of the corporation,  
13 and he may require the corporation to make such reports  
14 on its activities as he deems advisable."

15 (ee) Section 311 of such Act is amended—

16 (1) by striking out "the Association" and insert-  
17 ing in lieu thereof "either of the bodies corporate named  
18 in section 302 (a) (2)"; and

19 (2) by adding at the end thereof "All stock, obliga-  
20 tions, securities, participations, or other instruments  
21 issued pursuant to this title shall, to the same extent  
22 as securities which are direct obligations of or obliga-  
23 tions guaranteed as to principal or interest by the United  
24 States, be deemed to be exempt securities within the  
25 meaning of laws administered by the Securities and

1       Exchange Commission; but all such issuances shall be  
2       made only with the approval of the Secretary of Hous-  
3       ing and Urban Development.”

4                               PARTICIPATIONS

5       SEC. 803. Section 302 (c) (5) of the Federal National  
6       Mortgage Association Charter Act is amended by inserting  
7       at the end thereof the following: “In the event that the  
8       insufficiency required by the trustee is on account of principal  
9       maturities of outstanding beneficial interests or participations  
10      authorized to be issued pursuant to paragraph (4) of this  
11      subsection, or pursuant hereto, the trustee is authorized to  
12      elect to issue additional beneficial interests or participations  
13      for refinancing purposes in lieu of requiring any trustor or  
14      trustors to make payments to the trustee from appropriated  
15      funds or other sources. Each such issue of beneficial in-  
16      terests or participations shall be in an amount determined by  
17      the trustee but not in excess of the aggregate amount which  
18      the trustee would otherwise require the trustor or trustors  
19      to pay from appropriated funds or other sources, and may be  
20      issued without regard to the provisions of paragraph (4)  
21      of this subsection. All refinancing issues of beneficial in-  
22      terests or participations shall be deemed to have been issued  
23      pursuant to the authority contained in the appropriation Act  
24      or Acts under which the beneficial interests or participations  
25      were originally issued.”

## 1                   MORTGAGE-BACKED SECURITIES

2           SEC. 804. (a) Section 304 of the Federal National  
3 Mortgage Association Charter Act is amended by adding at  
4 the end thereof the following new subsection:

5           “(d) To provide a greater degree of liquidity to the  
6 mortgage investment market and an additional means of  
7 financing its operations under this section, the corporation is  
8 authorized to set aside any mortgages held by it under this  
9 section, and, upon approval of the Secretary of the Treasury,  
10 to issue and sell securities based upon the mortgages so set  
11 aside. Securities issued under this subsection may be in the  
12 form of debt obligations or trust certificates of beneficial in-  
13 terest, or both. Securities issued under this subsection shall  
14 have such maturities and bear such rate or rates of interest  
15 as may be determined by the corporation with the approval  
16 of the Secretary of the Treasury. Securities issued by the cor-  
17 poration under this subsection shall, to the same extent as  
18 securities which are direct obligations of or obligations guar-  
19 anteed as to principal and interest by the United States, be  
20 deemed to be exempt securities within the meaning of laws  
21 administered by the Securities and Exchange Commission.  
22 Mortgages set aside pursuant to this subsection shall at all  
23 times be adequate to enable the corporation to make timely  
24 principal and interest payments on the securities issued and  
25 sold pursuant to this subsection.”

1 (b) Section 306 of such Act is amended by adding at  
2 the end thereof the following new subsection:

3 “(g) The Association is authorized, upon such terms and  
4 conditions as it may deem appropriate, to guarantee the  
5 timely payment of principal of and interest on such trust  
6 certificates or other securities as shall (1) be issued by the  
7 Federal National Mortgage Association under section 304  
8 (d), or by any other issuer approved for the purposes of this  
9 subsection by the Association, and (2) be based on and  
10 backed by a trust or pool composed of mortgages which are  
11 insured under the National Housing Act or title V of the  
12 Housing Act of 1949, or which are insured or guaranteed  
13 under the Servicemen’s Readjustment Act of 1944 or chap-  
14 ter 37 of title 38, United States Code. The Association  
15 shall collect from the issuer a reasonable fee for any guaranty  
16 under this subsection and shall make such charges as it may  
17 determine to be reasonable for the analysis of any trust or  
18 other security arrangement proposed by the issuer. In the  
19 event the issuer is unable to make any payment of principal  
20 of or interest on any security guaranteed under this sub-  
21 section, the Association shall make such payment as and  
22 when due in cash, and thereupon shall be subrogated fully  
23 to the rights satisfied by such payment. Any Federal, State,  
24 or other law to the contrary notwithstanding, the Association  
25 is hereby empowered, in connection with any guaranty under

1 this subsection, whether before or after any default, to pro-  
2 vide by contract with the issuer for the extinguishment, upon  
3 default by the issuer, of any redemption, equitable, legal, or  
4 other right, title, or interest of the issuer in any mortgage  
5 or mortgages constituting the trust or pool against which the  
6 guaranteed securities are issued; and with respect to any  
7 issue of guaranteed securities, in the event of default and  
8 pursuant otherwise to the terms of the contract, the mort-  
9 gages that constitute such trust or pool shall become the  
10 absolute property of the Association subject only to the un-  
11 satisfied rights of the holders of the securities based on and  
12 backed by such trust or pool. The full faith and credit of the  
13 United States is pledged to the payment of all amounts  
14 which may be required to be paid under any guaranty under  
15 this subsection. There shall be excluded from the total  
16 amounts set forth in subsection (c) the amounts of any  
17 mortgages acquired by the Association as a result of its op-  
18 erations under this subsection.”

19 SUBORDINATED AND CONVERTIBLE OBLIGATIONS

20 SEC. 805. Section 304 of the Federal National Mort-  
21 gage Association Charter Act is amended by adding thereto  
22 (after subsection (d) as added by section 804 of this Act)  
23 the following new subsection:

24 “(e) For the purposes of this section, the corporation  
25 is authorized to issue, upon the approval of the Secretary

1 of the Treasury, obligations which are subordinated to any  
2 or all other obligations of the corporation, including sub-  
3 sequent obligations. The obligations issued under this sub-  
4 section shall have such maturities and bear such rate or  
5 rates of interest as may be determined by the corporation  
6 with the approval of the Secretary of the Treasury and may  
7 be made redeemable at the option of the corporation before  
8 maturity in such manner as may be stipulated in such  
9 obligations. Any of such obligations may be made convert-  
10 ible into shares of common stock in such manner, at such  
11 price or prices, and at such time or times as may be stipulated  
12 therein. The total principal amount of such subordinated  
13 obligations which may be outstanding at any one time shall  
14 not exceed two times the sum of (1) the capital of the cor-  
15 poration represented by its outstanding common stock and  
16 (2) its surplus and undistributed earnings at such time. The  
17 outstanding total principal amount of such obligations which  
18 are entirely subordinated to the obligations of the corpora-  
19 tion issued or to be issued under subsection (b) shall be  
20 deemed to be capital of the corporation for the purpose of  
21 determining the aggregate amount of obligations issued  
22 under subsection (b) which may be outstanding at any  
23 one time. Obligations issued by the corporation under this  
24 subsection shall, to the same extent as securities which are  
25 direct obligations of or obligations guaranteed as to principal

1 or interest by the United States, be deemed to be exempt  
 2 securities within the meaning of laws administered by the  
 3 Securities and Exchange Commission. The corporation shall  
 4 insert appropriate language in all of its obligations issued  
 5 under this subsection clearly indicating that such obliga-  
 6 tions, together with the interest thereon, are not guaranteed  
 7 by the United States and do not constitute a debt or obliga-  
 8 tion of the United States or of any agency or instrumen-  
 9 tality thereof other than the corporation. The corporation is  
 10 authorized to purchase in the open market any of its obli-  
 11 gations outstanding under this subsection at any time and at  
 12 any price.”
